RE: survey for leafy greens growers

Dear Growers and Friends,

If you grow any type of lettuces, endives, escaroles and spinach, including baby greens and salad mixes, please take a few minutes to fill out the enclosed survey.

The Florida Lettuce Advisory Committee, vegetable scientists at Everglades REC, and Palm Beach County Extension Services have received a 2-year Leafy Greens grant from the USDA Specialty Crops Program for approximately \$475,000 to support research and extension programs specifically directed at leafy greens. You have faced many challenging problems in leafy greens production, and this is a good opportunity for you to tell us what areas you would like UF-IFAS Research/Extension to focus on. Your prompt response to this survey will be invaluable to us and help to direct our research/extension money/priorities to address the problems and needs that affect you the most.

Please e-mail the completed survey to David Sui at [dsui@ufl.edu](mailto:dsui@ufl.edu). Also contact David if you have any questions or concerns. Thank you for your input.

Sincerely,

David Sui

*Serving growers is our top priority!*
