Ever-changing spectral wash of colors, highlights, and shadows across the building facades. This spectacular "light show" is primarily controlled by the sun's position in the sky from dawn to dusk, day to day, and season to season.

Subtle minute-to-minute, but at times will suddenly be incredibly dramatic. This proposal enables the facades of the South County Civic Center to never look exactly the same from any two vantage points at any time of the daylight hours.

Architectural compatibility is the shape of the Spectral Unit echoes the profile of the building facades.

The proposal will further express the diagonal grid of the wall surfaces through the addition of surface-mounted dimensional hemispheres at a 50% grid frequency of the existing grid pattern.

Your input is important!
Tuesday April 10, 2007
2:30 – 3:30 p.m.
Refreshments will be served.

Meet the artists and tell us what you think about the proposed artistic enhancements to the exterior walls of the Civic Center !!!!

We hope you'll join us for a discussion with the artist about his proposal to transform the facades of the Civic Center into an eye-catching, colorful community landmark.
