An in-depth comprehensive non-credit course (120 hours) covering hydraulics and apparatus operations. Topics include friction loss, developing effective, efficient and safe fire streams, master streams, water supplies, drafting, foam operation, supporting fixed fire protection systems, vehicle operation and maintenance, driving simulators, tools and equipment, and the many other aspects of the position of Driver Operator.

### **Recommended Texts:**

Palm Beach County Fire Rescue Driver Operator Manual (Available on the first day of class for \$44.00 check payable to Board of County Commissioners).

IFSTA Pumping Apparatus Driver Operator Handbook, 2<sup>nd</sup> Edition. Search the internet for the best prices on new & used books.

**Upon successful completion the student will receive certificates for Fire Service Hydraulics & Apparatus Operations which qualifies them to sit for the State Pump Operator Exam.**
