

New GIS Data Catalog Search and Download Site

<http://www.pbcgov.com/iss/itoperations/cwgis/gisdatasearch>

We published a new site you might want to bookmark when searching for Palm Beach County GIS data. The EGIS Data Catalog web site is up live to the public. You can set up links to it from your respective home pages and forward this to anyone working with GIS data so they can direct data requests to this web site.

Wishing you well,
Penny and Kelly
