According to the Special Act, the local rules and regulations must meet or exceed the standards established by the State Department of Children & Families. The changes provided for in these Rules and Regulations are for the most part due to the cumulative inclusion of changes in state law, which occurred over the past three years, and to clarify and include language comparable to the Palm Beach County Rules and Regulations Governing Child Care, thereby providing parents in Palm Beach County with a daycare option which best ensures the health, safety and wellbeing of children in care. C. Background and Policy Issues (continued from page 1)

Staff proposed these changes in order to incorporate a number of changes made in state law over the course of the past three years, and also to increase the compliance rate of these facilities. Staff also proposed the inclusion of language from the Code addressing fees for the re-issuance of license pursuant to change in ownership. Staff proposed additional changes in order make these Rules and Regulations easier to implement and easier for the regulated community to understand. The Department is aware that parents continue to seek options for daycare which ensure the health, safety and wellbeing of children in care. These changes are intended to be made to that end.

The following is a brief summary of substantive changes to the existing Rules and Regulations:

1. Language addressing procedures for hearings, denial and revocation of licenses is expanded to give greater detail and to provide for the timeliness of hearings and continuances of same.
2. Staff training and qualifications: these requirements have been increased, to incorporate the following statutory requirements -- adding the requirement for the Training in Early Literacy and Language Development, and adding the requirement for 10 hours of annual in-service training. The Department is also adding the requirement for Immunization and Health Records Training, and adding the requirement for Basic Water Safety Course completion.
3. The language addressing enforcement has been expanded to incorporate existing statutory language regarding misrepresentation of license status and license capacity, misrepresentation to licensing authorities, and misrepresentation to parents or guardians which leads to great harm, injury or death of children in care. There is also additional language enabling the use of corrective action plans as enforcement tools.
4. The current annual fee for family day care facilities is \$40.00. The language incorporating a \$25.00 fee for change in ownership is included herein to cover the administrative costs of processing the application for change in ownership which was not previously included in the family day care rules and regulations.
5. The language addressing substitutes, emergency supervision, and night time care requirements has been clarified and expanded to better enable provider compliance.
6. The Department is adding language commensurate with language recently added to the Palm Beach County Rules and Regulations Governing Child Care to allow for the Department to enact appropriate interim policies to ensure the health, safety and wellbeing of children in care in the event that a state of emergency is declared.

These changes are anticipated to significantly and positively affect the health, safety and well-being of children in care; provide parents with another alternative type of daycare; and increase compliance levels of day care providers in Palm Beach County. In addition, the inclusion of statutory changes will render the Palm Beach County Rules and Regulations Governing Family Day Care no less stringent than the state requirements.

58 the number of hours the substitute(s) work(s) in their home, within seven

4. It is the intent of these Rules that the operator be the primary caregiver for children in care during the hours of operation of the family day care facility. During the operating hours of the facility, the substitute(s) shall not provide care to children on a regular basis, as in such case, the operator is not the primary caregiver.
5. An individual may serve or be listed as a substitute for more than one licensed family day care provider or child care facility.
6. An individual shall not serve as a substitute in excess of 40 hours per month on average during a twelve (12) month period in any one family day care home for which they have been identified as the designated substitute. In addition, a substitute may not provide care for children for more than 12 hours continuously per day or per twenty-four hour period.
7. A licensed family day care provider with an operational family day care home, shall not serve as substitute for another family day care provider, or child care facility.

9 be treated as a disqualifying felony offense for screening purposes under this
10 rule.
11

12 Any new personnel not screened at the time of licensure shall, within five
13 working days after coming within the provisions of these Rules, submit to the

21 replaced, and shall notify the facility of its findings. When disposition
22 information is missing on a criminal record, it shall be the responsibility of the
23 person being screened, upon request of the department, to obtain and supply
24 within thirty (30) days the missing disposition information to the Department.

CLASSIFICATION OF VIOLATIONS

A violation is noncompliance with any provision of §§. 402.301 - 402.319, Florida Statutes, or these applicable Rules. The Department will use the following classifications as a guideline for determining the severity of violations of these Rules:

- A. Class I Violations: Are the most serious in nature and could result or do result in death or serious harm to the health, safety and well-being of a child and include overt abuse and negligence related to the operation and maintenance of a facility.
- B. Class II Violations: Are serious in nature but do not pose an immediate threat to the health, safety and well-being of a child but could reasonably be expected to cause harm within ninety (90) days (for example, a leaking roof that could collapse) and include those conditions or occurrences related to the operation and maintenance of a facility, other than Class I violations.
- C. Class III Violations: Are the least serious in nature and pose no threat to the health, safety and well-being of a child and include those conditions or occurrences related to the operation and maintenance of the facility other than Class I or Class II violations.
- D. Other: Violations not included above or classified as a Class I, II, or III violation but for which fines may be issued depending on severity or recurrence.
- E. In addition to the provisions previously set forth herein, it is a violation of these Rules to:
 - (1) Fail, by false statement, misrepresentation, impersonation, or other fraudulent means, to disclose in any application for voluntary or paid employment, licensure or certification regulated herein, all information required or a material fact used in making a determination as to such person's qualifications to be family day care personnel, in a child care facility, or other child care program.
 - (2) Operate or attempt to operate a family day care facility under a license or certificate that is revoked, or terminated.
 - (3) Misrepresent, by act or omission, a family day care facility to be duly licensed pursuant to this rule without being so licensed.

ARTICLE XVIII- ENFORCEMENT

- A. In addition to the revocation procedures set forth above, any violation of Chapter 59-1698 Laws of Florida, as amended, these Rules and Regulations, or Florida Statutes, §§ 402.301--402.319, as amended or replaced, or the Rules and Regulations promulgated thereunder, is subject to enforcement by the Department through the Palm Beach County Environmental Control Officer pursuant to Chapter 77-616, Laws of Florida, as amended. Pursuant to Chapter 77-616, Laws of Florida, the Environmental Control Hearing Board is authorized to issue fines of up to \$500 per violation per day of violation. Violations of these Rules may result in the issuance of an order requiring the owner/operator of the facility to appear before the Environmental Control Hearing Board and show cause why a civil penalty should not be imposed or corrective action ordered. Thereafter, the Environmental Control Hearing Board will convene, hear the matter, and, if a violation is found to have occurred, issue an order that may require corrective action and payment of a fine. Failure to pay any such fine may result in the filing of a lien against any and all property of the facility owner. The provisions of this paragraph describe an additional and supplemental means of enforcement. Nothing contained in this paragraph shall prohibit the County from enforcing these Rules and Regulations by any other means, including, but not limited to the institution of time-limited corrective action plans for the family day care facility and/or referral to the State Attorney's Office for criminal prosecution, pursuant to Chapter 77-616, Laws of Florida, as amended or replaced.
- B. Each day of violation shall be considered a separate and distinct violation.
- C. Members of the Child Care Facilities Board and its representatives may enter and inspect family day care facilities at reasonable hours, and may question such persons and investigate such facts, conditions, and practices or matters as may be necessary or appropriate to determine whether any person has violated any provision of Chapter 59-1698, Special Acts, Laws of Florida, as amended, or of any rule and regulation issued hereunder. The right of entry and inspection shall also extend to any premises which the Department has reason to believe are being operated or maintained as a family day care facility without a license, but no such entry or inspection of any premises shall be made without the permission of the person in charge thereof unless a warrant is first obtained from the circuit court authorizing same. Any application for a license or renewal made pursuant to these Rules, or any advertisement to the public of family day care as defined herein shall constitute permission for entry or inspection of any premises for which such license is sought in order to facilitate verification of the information submitted on or in connection with the application. In the event that a licensed facility refuses permission for entry or inspection to the Department, a warrant shall be obtained from the circuit court authorizing same prior to such entry or inspection. Disciplinary action may also be instituted pursuant to Article XVIII (A) herein.
- D. In addition to conspicuously posting the license, the family day care facility shall post with the license:
- 1) Each citation for a violation of any standard or requirement of these Rules and Regulations that has resulted in disciplinary action mandated by the Environmental Control Hearing Board.
 - 2) An explanation, written in simple language, of the corrective action, if any, taken by the facility for each citation. Included in the

3) Each citation, explanation, and description of corrective action shall remain posted for one (1) year after the Environmental Control Hearing Board's effective date.

Should the Department determine that any family day care personnel makes any misrepresentation in violation of Article XVII (E) above to a parent who has placed a child in the family day care facility, and the parent relied upon the misrepresentation, and the child suffers great bodily harm, permanent disfigurement, permanent disability, or death as a result of an intentional act or negligence by the family day care personnel, then such matter may be referred to the State Attorney's Office for criminal prosecution, pursuant to Chapter 77-616, Laws of Florida, as amended or replaced.
