Palm Beach County Environmental Resource Management Department (ERM) has an ongoing "Chain-of-Lakes Water Quality Monitoring Program." ERM has six monitoring stations on Lake Osborne where data is collected on a bimonthly basis or six times per year. ERM monitors the lake for many nutrients including nitrogen and phosphorus, pesticides, heavy metals and bacteria. ERM also monitors the water quality at 14 sites within the entire 30 mile Chain of Lakes system.

Based on upon the heavy usage of the community restroom for showers and as a comfort station it is estimated that as much as 250 lbs of nitrogen and 41 pounds of phosphorus could be seeping into the ground water from the existing fifty year old concrete septic tank.

Once the project is completed in the fall of 2009, and the caretaker's residence and main community restroom have been disconnected from the existing septic tanks and connected to the City of Lake Worth municipal sewer system, ERM will monitor Lake Osborne to determine if water quality has improved. There is already an ERM monitoring station located in close proximity to the camp grounds.

Note that any changes to the Grant Work Plan Project Budget (of more than 10% in any line item), scope of work, or timelines shall require Department approval and amendment to the grant agreement.

ATTACHMENT A-2
REVISED PROJECT WORK PLAN
Palm Beach County
LP6077/2

Project Title: <i>Provide a brief title for the project proposed.</i>
Chain of Lakes Restoration
Project Location: <i>Identify the location of the project and include the county/counties involved in the project area. If this project affects water, include the watershed and hydrologic unit code.</i>
Chain of Lakes, Palm Beach County, Southeast Florida Coast, 03090202
Project Background: <i>Provide a summary of the site/project area and the justification supporting the need for the Florida Department of Environmental Protection to fund the proposed project.</i> Adopted by the Board of County Commissioners in 1998, the State of the Lakes Management Plan provides for creating/restoring essential fish and wildlife habitat along the lake shorelines, undertaking detailed evaluations for improving water quality through addressing stormwater and bottom sediments, developing stormwater discharge treatments, encouraging community support and providing public education on water quality and lake issues. Partially funded by the 2006 Chain of Lakes legislative appropriation, the Square Lake/East Slough Wetland Restoration Project has successfully restored/enhanced 51 acres of freshwater wetlands. The 2007 Chain of Lakes legislative appropriation partially funded the North Westgate Phase V and VI Project and the C-51 Muck Removal Project, removing over 100,000 cubic yards of muck, developing stormwater discharge treatments, and improving water quality to the Lakes. For the 2008 legislative appropriations, the following are four (4) sub-projects, prioritized by a selection committee of local environmental managers, to address environmental restoration: 1. Towns of Glen Ridge/Cloud Lake Infrastructure Improvements The Palm Beach County Engineering Department will implement stormwater treatment infrastructure improvements in the Towns of Glen Ridge and Cloud Lake. Overland stormwater runoff and sediment-laden discharge from Gem Lake and Cloud Lake to the C-51 Canal impairs water quality to the Chain of Lakes. 2. Lake Ida Restoration The Lake Ida Restoration Project includes environmental enhancement of approximately 6 acres within Palm Beach County's Lake Ida Park. Currently, Lake Ida's shoreline is 75% developed and lacks important littoral habitat for fisheries and stormwater runoff treatment. 3. Chain of Lakes Monitoring The Chain of Lakes Monitoring Project will consist of various sub-projects with the overall objective being to determine whether the lakes' environmental health are improving based on the implementation of construction projects designed to benefit the habitat and water quality. 4. Grant Administration Administrative functions provided by County staff for the Chain of Lakes Restoration and Enhancement Projects.

Project Objectives: *Provide a list of objectives, in bullet format, expected to be achieved as a result of funding/completing this proposed project.*

- Towns of Glen Ridge/Cloud Lake Infrastructure Improvements include improved stormwater treatment, increased water quality to the COL, installation of native littoral zone, improved habitat to fisheries, and increased water storage to prevent flooding of property.
- Lake Ida Restoration objectives include removal of non-native invasive vegetation, creation of 6 acres of wetland, excavation of muck and fill, improved water quality through the natural filtration of newly created wetland, installation of littoral zone and native plantings, improved habitat to fisheries, prevent erosion loss to shoreline from wave and wind energy.
- Chain of Lakes Monitoring objective is to determine whether the lakes' environmental health are improving based on the implementation of construction projects designed to benefit the habitat and water quality.
- Grant Administration includes Site inspections to track compliance with the terms of subgrantees contracts; Review of subgrantees invoices, progress reports and site inspection reports, consistent with individual contracts and Scopes of Services; Prepare Grant Manager and Engineer Certifications; Preparation of reports submitted to the Department on project status and funding; and Preparation of project modifications to the Scope of Services as may be appropriate and coordination of contract modifications with the Department and subgrantees.

Project Description: *Provide a detailed description of the work to be performed for the project. Include maps, drawings etc. to support project activities. Project descriptions should include a specific list of tasks/activities for accomplishing the project.*

1. Towns of Glen Ridge/Cloud Lake Infrastructure Improvements

The Towns are presently experiencing flooding when the adjacent C-51 Canal and Stub Canal reach higher stages resulting in overland flow from one canal to the other. This surface run-off carries with it pollutants and sediments that enter the Chain of Lakes (COL) watershed from the C-51 (West Palm Beach) Canal. Project elements include berming the Stub Canal bank to a higher elevation, thereby increasing lake storage. The two lakes, which currently discharge sediments and nutrients during flooding, will be dredged of their muck sediments and an aeration system may be included. Stormwater improvements such as swales, exfiltration, and pollution control devices will also be implemented. Additionally, a littoral zone will be planted in the lakes equal to 8 square feet per linear foot of shoreline. This will further improve water quality and restore habitat to the lakes.

2. Lake Ida Restoration

The project will restore and create approximately 2 acres of open water fisheries, 3 acres of herbaceous marsh, and 1 acre of hardwood swamp. Currently, the site is devoid of functioning wetland and fish habitat, contributing to impaired water

quality, erosion and sedimentation to the Lake. Non-native invasive species are established and contributing to new recruitment within the watershed. Enhancement of these areas is essential for Lake Ida's vital freshwater habitats that support regionally significant plants and wildlife. Major restoration features include the removal of exotic species, the excavation of muck and fill to sustain wetlands, and the establishment of a diversity of plants to create high-quality habitat. Removing dense stands of exotic Brazilian pepper opens up 3 acres for wetland creation. Wetland hydrology is established by removing approximately 30,000 cubic yards of muck and fill to create ground elevations and suitable habitat for associated plant and wildlife communities. The installation of littoral zones protects 1,500 feet of Lake Ida's shoreline from erosion and sedimentation due to wave and wind energy.

3. Chain of Lakes Monitoring

The subprojects for State Fiscal Year 2007-2008 may include but are not limited to the following activities:

- GIS maps of septic/stormwater point sources along COL--prioritize sites for installation of baffle boxes & septic to sewer retrofits, retention areas;
- Water quality monitoring;
- Public Education Program;
- Evaluation of additional sediment removal projects;
- Investigate incorporation of sediment traps & floating vegetation barriers along canals prior to discharge to lakes;
- Investigate muck capping of nutrient rich sediments;
- Sediment Management Study;
- Mechanical harvesting of vegetation;
- Tape grass (*Vallisneria*) pilot project; and
- Fishery Survey.

4. Grant Administration

- Review of subgrantees invoices, progress reports and site inspection reports, consistent with individual contracts and Scopes of Services;
- Site inspections to track compliance with the terms of subgrantees contracts;
- Prepare Grant Manager and Engineer Certifications;
- Preparation and administration of subgrants associated with individual projects;
- Preparation of reports submitted to the Department on project status and funding; and
- Preparation of project modifications to the Scope of Services as may be appropriate and coordination of contract modifications with the Department and subgrantees.
- Coordinate project review committee and outreach activities.

Important fish nurseries and wildlife habitat are ensured by the survival of native plant communities. Regularly scheduled exotic plant maintenance guarantees the removal of non-native plants. Ground elevations in open water areas will be maintained for beneficial stormwater treatment and fisheries habitat. Water flow and quality are expected to improve in the project area. Excess nutrients in the system are removed through the excavation of highly-organic sediments. As-built drawings will illustrate the success of construction activities. Conclusions and results drawn from monitoring activities will provide support of project performance and success.

Note that any changes to the Grant Work Plan Project Budget (of more than 10% in any line item), scope of work, or timelines shall require Department approval and amendment to the grant agreement.

In consideration of the mutual benefits to be derived herefrom, the Department and the Grantee do hereby agree as follows:

1. The Grantee does hereby agree to perform in accordance with the terms and conditions set forth in this Agreement, Attachment A (Project Work Plan), and all attachments and exhibits named herein which are attached hereto and incorporated by reference. For purposes of this Agreement, the terms "Contract" and "Agreement" and the terms "Grantee", "Recipient" and "Contractor" are used interchangeably.
2. This Agreement shall begin upon execution by both parties and end no later than December 31, 2008, inclusive. This Agreement may be amended to provide for additional services if additional funding is made available by the Legislature.

As consideration for the services rendered by the Grantee under the terms of this Agreement, the Department shall pay the Grantee on a cost reimbursement basis in an amount not to exceed \$800,000. The parties hereto agree that the Grantee is responsible for providing a minimum match of \$800,000 toward the project described in Attachment A. - B. The Grantee shall be reimbursed on a cost reimbursement basis for all eligible project costs upon receipt and acceptance of a properly completed Disbursement Request Package (provided as Attachment B). The Grantee agrees to be responsible for the fulfillment of all work elements included in any subcontract consented to by the Department and agrees to be responsible for the payment of all monies due under any subcontract. It is understood and agreed by the Grantee that the Department shall not be liable to any subcontractor for any expenses or liabilities incurred under the subcontract and that the Grantee shall be solely liable to the subcontractor for all expenses and liabilities incurred under the subcontract.
- B. The Department of Environmental Protection supports diversity in its procurement program and requests that all subcontracting opportunities afforded by this Agreement embrace diversity enthusiastically. 1.0 Introduction

The Habitat Restoration Master Plan for Lake Osborne encompasses a portion of the western shoreline of Lake Osborne and associated water bodies. In accordance with the approved State of the Lakes Management Plan for the chain of Lakes, the proposed shoreline restoration encompasses three restoration projects identified in the State of the Lakes Plan.

The statement of work addresses restoration and enhancement activities could include removal of invasive exotic plants in uplands and wetlands and planting aquatic vegetation on existing littoral shelves, creating hardwood wetlands, enhancing tropical hardwood hammocks, removing accumulated organic muck sediments in Square Lake, installing box culverts to hydraulically connect and improve flow between water bodies, excavating open channels to enhance water movement and provide fisheries habitat, and install shoreline stabilization features, using a combination of stone and geogrid material, to reinforce shorelines.

The project will likely be constructed in phases. This project is considered Phase I and will include the Square Lake and East Slough Restoration Plan. Future phase(s) as part of this project to include: E-4 Canal / North Lobe, Picnic Island and the Oxbow, and the West Side of Custard Apple Slough.

MONITORING

In addition to reviews of audits conducted in accordance with OMB Circular A-133 and Section 215.97, F.S., as revised (see "AUDITS" below), monitoring procedures may include, but not be limited to, on-site visits by Department staff, limited scope audits as defined by OMB Circular A-133, as revised, and/or other procedures. By entering into this Agreement, the recipient agrees to comply and cooperate with any monitoring procedures/processes deemed appropriate by the Department of Environmental Protection. In the event the Department of Environmental Protection determines that a limited scope audit of the recipient is appropriate, the recipient agrees to comply with any additional instructions provided by the Department to the recipient regarding such audit. The recipient further agrees to comply and cooperate with any inspections, reviews, investigations, or audits deemed necessary by the Chief Financial Officer or Auditor General.

AUDITS

PART I: FEDERALLY FUNDED

This part is applicable if the recipient is a State or local government or a non-profit organization as defined in OMB Circular A-133, as revised.

1. In the event that the recipient expends \$500,000 or more in Federal awards in its fiscal year, the recipient must have a single or program-specific audit conducted in accordance with the provisions of OMB Circular A-133, as revised. EXHIBIT 1 to this Agreement indicates Federal funds awarded through the Department of Environmental Protection by this Agreement. In determining the Federal awards expended in its fiscal year, the recipient shall consider all sources of Federal awards, including Federal resources received from the Department of Environmental Protection. The determination of amounts of Federal awards expended should be in accordance with the guidelines established by OMB Circular A-133, as revised. An audit of the recipient conducted by the Auditor General in accordance with the provisions of OMB Circular A-133, as revised, will meet the requirements of this part.
2. In connection with the audit requirements addressed in Part I, paragraph 1., the recipient shall fulfill the requirements relative to auditee responsibilities as provided in Subpart C of OMB Circular A-133, as revised.
3. If the recipient expends less than \$500,000 in Federal awards in its fiscal year, an audit conducted in accordance with the provisions of OMB Circular A-133, as revised, is not required. In the event that the recipient expends less than \$500,000 in Federal awards in its fiscal year and elects to have an audit conducted in accordance with the provisions of OMB Circular A-133, as revised, the cost of the audit must be paid from non-Federal resources (i.e., the cost of such an audit must be paid from recipient resources obtained from other than Federal entities).

EXHIBIT 1 to this Agreement indicates State financial assistance awarded through the Department of Environmental Protection by this Agreement. In determining the State financial assistance expended in its fiscal year, the recipient shall consider all sources of State financial assistance, including State financial assistance received from the Department of Environmental Protection, other state agencies, and other nonstate entities. State financial assistance does not include Federal direct or pass-through awards and resources received by a nonstate entity for Federal program matching requirements.

2. In connection with the audit requirements addressed in Part II, paragraph 1, the recipient shall ensure that the audit complies with the requirements of Section 215.97(7), Florida Statutes. This includes submission of a financial reporting package as defined by Section 215.97(2)(d), Florida Statutes, and Chapters 10.550 (local governmental entities) or 10.650 (nonprofit and for-profit organizations), Rules of the Auditor General.
