2. Impact Statement

The ultimate goal of providing legal/permanency planning services to our clients is ensure and maintain access to medical care and empower them to improve their quality of life and living conditions and promote economic self-sufficiency. In doing so, there will be a direct reduction, or even elimination, in reliance on the limited public assistance and Ryan White funded programs, such as STRMU, ADAP, emergency assistance, Ryan White Pharmacy and Medical dollars, transportation and other Ryan White funded programs. This will free up limited resources to ensure medical care and access to a wider base of the HIV/AIDS community who may not be in care.

Clients will be assisted with accessing Social Security benefits, Medicaid and Medicare(including Medicare "D") and private disability benefits, thereby improving their quality of life, living conditions and providing a means to access medical care. Assistance with issues involving health care and insurance, particularly insurance continuation, promotes continuity of medical care and linkages to medical care providers. Assisting clients to access benefits, such as insurance through employers, will help promote medical coverage.

Similarly, representation in employment matters, including anti-discrimination and reasonable accommodation provisions of the Americans with Disabilities Act, allows HIV+ persons to either re-enter the workforce or remain employed. Specifically, for HIV infected individuals whose medical condition has improved, assistance is provided with the many legal issues involved with returning to work, including loss of public assistance, uninterrupted continuation of health care benefits, and continuation of health insurance (COBRA) after leaving the workforce.

Preparation of advance directives allows individuals to exercise personal autonomy over decisions involving their health, finances and end-of-life issues, which directly impact health outcomes..

All our services aim to access and maintain access to medical care through working to promote self-sufficiency and reduce or eliminate reliance on limited available resources. The goal is to positively impact outcomes affecting the HIV-related clinical status of an individual with HIV/AIDS.
