Justification for Firing Range Training Enhancement Project

This proposal involves two components, enhancing the safety of the shooters as well as the instructors, and to provide real life training to our students. The first component involves the purchase of seven (7) Peltor PowerCom BRS Series 2-way Headsets. These headsets provide the highest level of hearing protection possible while also affording clear communication between the range master and all instructors on the range. External and handheld radios are often difficult to hear during actual firing and if heard the instructor must remove their hearing protection to communication which is harmful to their hearing. This project will allow for the highest level of safety for everyone involved.

The second component involves the purchase of two (2) LED light bars, the exact same light bars used on many police vehicles. The object of this training is to expose students to the difficulties associated with threat identification and target acquisition when these very bright, flashing lights are in operation. Anyone who has been exposed to a strobe light in a room knows that your sight is impacted. It is critical that our students obtain this exposure in a training environment so they are better prepared to deal with the real-life situations they will face on the street.

The objectives are simple and oriented around the safety of our students and staff while at the same time providing the most realistic training possible to our students.

Objectives

- Zero injuries during live fire exercises as a result of the enhanced communications capabilities which result for the use of the two way communications system.
- At a minimum, 95% of all shooters will achieve qualifying scores when shooting a
 prescribed course of fire utilizing the enhanced lighting system which simulates real life
 shooting situations.
- 100% of all shooters will experience the very different shooting environment created when confronting a potential life threatening situation in both a day and night environment impacted by the use of the enhanced lighting system.

To measure the effectiveness of our program based on the enhanced capabilities provided by the newly purchased equipment we have established the following measures.

Performance Measures

- Headsets will be worn by the range master and all instructors during <u>all</u> live firing exercises.
- Any and all injuries will be reported following standard college procedures

- All injury reports will be studied to determine cause and what, if anything can be done to minimize the risk of reoccurrence.
- Attendance records will be maintained for all BRTP as well as advance and specialized programs conducted in the range.
- Qualification records will be maintained for all BRTP as well as advance and specialized programs conducted in the range.
- Course evaluations will be completed by all classes using the fire range during the first 12 months of operation.
- All course evaluations will be reviewed to determine if there are any deficiencies in our training program as identified by the students and action to rectify such deficiencies will be taken.
