I. EXECUTIVE BRIEF

Motion and Title: Staff recommends motion to:

A) **approve** Grant Agreement #12-035E in the amount of \$9,795 with the Sea Turtle Conservancy (STC) to fund a press kit, public screening fees and venue fees for a Dark Sky Festival, expiring April 30, 2013;

B) **approve** Budget Amendment of \$9,795 in the Beach Improvement Fund; and

C) **authorize** the County Administrator or his designee to sign all future time extensions, task assignments, certifications, and other forms associated with this Grant Agreement, and necessary minor amendments that do not change the scope of work, terms or conditions of the Grant Agreement.

D) **authorize** the County Administrator or his designee to sign agreements associated with venue activities reviewed by County Attorney and within the approved budget.

Summary: Artificial lighting has impacts on numerous species of wildlife including sea turtles. Environmental Resources Management (ERM) will expand the existing Dark Sky Awareness educational campaign by coordinating a one day free public event in the Spring of 2013 that will emphasize the importance of preserving the night sky and provide participants with the knowledge to make more environmentally sound lighting choices. The STC grant will reimburse \$9,795 for project costs using funds from the Florida Sea Turtle License Plate Grant Program. No County match is required. The Grant Agreement is effective upon execution by both parties and expires April 30, 2013. Countywide (SF)

Background and Justification: Palm Beach County beaches provide important nesting habitat for two species of endangered sea turtles, the green and the leatherback and serve as one of the largest nesting habitats for the loggerhead sea turtle in the western hemisphere. Approximately 26% of the total sea turtle nesting and 21% of the total hatchling disorientation in Florida occurs in Palm Beach County. In an effort to increase awareness regarding the cumulative impacts of artificial lighting, ERM will have a free public event which will include activities such as a free screening of "The City Dark", a documentary about light pollution and the disappearing night sky. Exhibitors including lighting design firms, environmental organizations and local experts will also be invited to participate. This is the third phase of ERM's Sea Turtle Education and Dark Sky Awareness campaign. Due to the popularity of the educational material produced with previous grants, STC has awarded PBC additional funding for a press kit, public screening fee, and venue fees.

Attachment A PROJECT SUMMARY, TASKS AND DELIVERABLES

Project Summary: This project is the third phase of the Sea Turtle Education and Dark Sky Awareness campaign. Educational materials were produced with Sea Turtle Grant #09-037E and #11-014E. ERM will expand the educational campaign by hosting a Dark Sky Festival. This event will focus on educating the residents and visitors of Palm Beach County on the harmful effects of light pollution and will provide the resources for change. The free public event will emphasize the effects of artificial lighting on astronomy, possible links to human health and impacts to wildlife, with emphasis on local sea turtle populations. A wide range of exhibitors including lighting design firms, environmental organizations and local experts will be invited to participate. The schedule of events will include activities such as a free screening of "The City Dark" a documentary about light pollution and the disappearing night sky, discussion from a panel of experts, a photography exhibit and a "star" party. Funding is for a press kit, public screening fee, and venue fees.

Project Tasks and Expected Accomplishments: The Dark Sky Festival will attempt to reach a broad audience, including tourists, residents, schools, property managers, condominium and municipal boards and local lighting representatives and consultants. ERM will also invite local and international environmental organizations and wildlife experts to participate. With the background information provided at the Dark Sky Festival participants will walk away with an understanding of how important conserving the night sky is and they will have the knowledge to make more environmentally sound lighting choices. The Dark Sky Festival will educate local residents and visiting tourist that even though they do not live directly on the coast, their choices still impact coastal life.
