#### DESCRIPTION OF PROPOSAL

Provide asbestos abatement of asbestos mastic at existing ductwork required to be demolished for the complete project. A time extension of twenty one (21) calendar days is requested as a result of the asbestos abatement impacting the demolition activities on the critical path. Please furnish written direction to proceed by March 18, 2016.

Re: Asbestos Abatement, Terminal air handler replacement project, Palm Beach International Airport, 1000 James L Turnage Blvd, West Palm Beach, FL 33415

Dear Mr. Sturgill:

This proposal is to furnish all labor, equipment, material and disposal for the work noted below at the above referenced location. All work will be done in accordance with all local, state and federal regulations. Quantities, scope and durations are based on conversations and meetings with Hill York and Morganti representatives.

- 1. Provide a one supervisor and two workers to remove the asbestos containing putty at the seams of the sheet metal as the sheet metal is separated by others. The crew will leave the sheet metal in a "clean" state with no asbestos putty so that the sheet metal can be transported and disposed of by others as a non-asbestos containing material.
- 2. Included in this proposal price is the cost of fingerprinting and IDs required for the crew to work in the airside areas of the airport.
- 3. Removal of the putty for the mechanical units and fresh air plenums from the east and west penthouse mechanical rooms will be done in containments just outside the mechanical rooms, the containment will be a mobile unit that can be dismantled at the end of each day and assembled at the beginning of each day. All "danger asbestos" signs will be obscured from the general public with black poly barriers. Workers will not be wearing protective suits and respirators outside in view of the public. Based on the negative exposure assessment, the crew will only be using protective suits and respirators at the worker's discretion or if the OSHA personnel samples go above the PEL at some point during the operation. The area will be equipped with a HEPA filtered negative air machine that will create negative air pressure in the containment. The machine and exhaust will be set up in a manner that it is not readily visible to the public. Due to the added preparation, steps and handling these areas will have a crew of one supervisor and three workers.
- 4. In all other mechanical rooms where the units are no going to be active during the dismantling process the removal of the putty will take place in the room prior to removal and disposal.
- 5. Price includes labor for removal of the asbestos containing material, tools, equipment, PPE, disposal, materials (poly, tape, bags, glue and labels).
- 6. Disassembly of the air handlers and duct by others. Transport and disposal of the "clean" sheet metal and mechanical components by others. Water and electric for the project by others.
- 7. Price excludes any layout, engineering, shoring, safety railing or safety anchor point on the roofs if required. CES employee will provide their own PPE.
- 8. Price is based on the crew working Monday through Friday up to eight hours onsite daily. During the course of the work if the crew is not removing the asbestos putty the client is authorized to use the crew

- as labor for other services as they see fit for this project provided it does not exceed the daily hours onsite or hinder the asbestos removal operations.
- 9. Air monitoring and/or air clearance provided and paid for by others if desired.
- 10. Prices are based on performing the work in coordination with the client.
- 11. Prices are based on all labor being general labor as per the Palm Beach wage scale.
- 12. Project pricing is based on the client's anticipated 135 working days schedule. Price is based on a daily rates of \$1,700.00 for penthouse units and plenums and \$2,180 for the penthouse units and plenum and the airport ID process and fees (\$1,400), if the project is completed faster or exceeds the anticipated schedule the total price will be adjusted.

PROPOSAL PRICE, Daily Rate-\$1,700.00 for non-penthouse mechanical units and plenums,

Daily Rate-\$2,180.00 for the penthouse mechanical rooms and plenums, plus airport ID

processing and fees = \$269,300.00

If you should have any questions or concerns, please contact me in our Davie office at 954-583-9528.
