Water Utilities Department

I. EXECUTIVE BRIEF

Motion and Title: Staff recommends motion to approve: Consultant Services Authorization (CSA) No. 01 with Kimley-Horn and Associates, Inc., (R2017-0903) for Water Treatment Plant 11 (WTP11) Production Well 11 Well and Well Head Project in the amount of \$138,402.12.

Summary: On July 11, 2017, the Board of County Commissioners (BCC) approved the Contract for Consulting/Professional Services Water Treatment and Water Resources Engineering Services (Contract) with Kimley-Horn and Associates, Inc., (R2017-0903) to obtain engineering/professional services for utility related projects. CSA No. 1 will provide for construction services related to the Water Treatment Plant 11 Production Well 11 (PW-11) Well and Wellhead Project. PW-11 will provide an additional 900 gallons per minute (gpm) of raw water to WTP 11 and result in improved wellfield management practices. The Small Business Enterprise (SBE) participation goal established by the SBE Ordinance is 15% overall. The Contract with Kimley-Horn and Associates, Inc., provides for SBE participation of 28% overall and Minority/Women Business Enterprise (M/WBE) participation of 7%. CSA No. 1 includes an overall SBE and M/WBE participation of 68.47% and 16.04% respectively. The cumulative SBE participation, including CSA No. 1 is 68.47% overall. Kimley-Horn and Associates, Inc., is a Palm Beach County company. The Project is in the FY17 Capital Improvement Plan adopted by the BCC. (WUD Project No. 15-058) District 6 (MJ)

Background and Justification: On August 2, 2015, the Contract Review Committee approved CSA No. 7 for Kimley-Horn and Associates, Inc., in the amount of \$90,163.08 to provide professional engineering, surveying and hydrogeological consulting services for the design of PW-11 a new Floridan Aquifer raw water production well supplying WTP11. PW-11 will provide an additional 900 gpm of raw water to WTP11 and assist with improved wellfield management practices allowing plant operations staff to rest production wells for longer periods of time and also balance raw water quality being treated by WTP11. CSA No. 1 provides for professional engineering and hydrogeological services during construction of the Water Treatment Plant 11 Production Well 11 Well and Wellhead Project. The Project includes the drilling and construction of the raw water production well as well as the installation of a submersible well pump and motor with variable frequency drive (VFD), column pipe, wellhead facilities, electrical supply, instrumentation and above ground site facilities such as lighting and fencing.

CONSULTANT SERVICES AUTHORIZATION NO. 1

PALM BEACH COUNTY WATER UTILITIES DEPARTMENT ENGINEERING/PROFESSIONAL SERVICES

SCOPE OF WORK FOR

Water Treatment Plant 11 Production Well 11 Well and Wellhead Construction Phase Services

INTRODUCTION

Palm Beach County (COUNTY) entered into an agreement entitled Contract for Engineering/ Professional Services - Palm Beach County Utilities Department Project No. WUD <u>17-007</u> (CONTRACT) with <u>Kimley-Horn and Associates</u>, <u>Inc.</u> (CONSULTANT) to provide engineering services for various general activities on (Reference Document <u>R2017-0903</u>). This Consultant Service Authorization will be performed under that CONTRACT.

This Consultant Services Authorization encompasses providing services related to the Water Plant 11 Well PW-11 well and wellhead construction phase services.

BACKGROUND

The following scope of services consists of construction phase services for Water Treatment Plant 11 proposed Production Well 11 (PW-11). The design and permitting phases have been completed and the project is currently being bid.

SCOPE OF SERVICES

CONSULTANT shall perform the engineering Scope of Services as described herein.

Construction Phase Services

The Consultant's site visits will be for the purpose of endeavoring to provide the Owner a greater degree of confidence that the completed work of its contractors will conform to the construction documents. The Consultant neither guarantees the performance of contractors, nor assumes responsibility for any contractor's failure to perform its work in accordance with the contract documents. Work that the Consultant believes does not comply with the contract documents will be brought to the attention Palm Beach County Water Utilities and the contractor. The Consultant shall have no responsibility for any contractor's means, methods, techniques, equipment choice and usage, sequence, schedule, safety programs, or safety practices, nor shall the Consultant have any authority or responsibility to stop or direct the work of any contractor.

Consultant will provide construction phase services including hydrogeological services, performance testing, operational testing and startup of well, electrical and I&C construction phase services and preparation of a well completion report for well PW-11 Floridan Aquifer well. Consultant will utilize subconsultant services of JLA Geosciences, Inc. (JLA) for the hydrogeologic consulting services, and Hillers Electrical Engineering, Inc. (HEE) for electrical consulting services and SCADA programming of well.

Rev. 5-27-15

Consultant will attend on-site kick-off (pre-construction), progress meetings and make ten (10) onsite site visits to review construction progress and prepare site visit reports as well as attend construction coordination meetings as part of the site visits; provide coordination during construction, review geophysical and video logs of well PW-11, review contractor's submittals, provide onsite hydrogeologic observation during critical elements of rehabilitation, well logging, acid treatment; post rehabilitation development testing and specific capacity testing; and witness post- rehabilitation videos. It is assumed that the construction will be substantially complete in ten (10) months and be at final completion twelve (12) months.

Consultant will provide hydrogeological support and observation services during Upper Floridan Aquifer well PW-11 construction including contractor mobilization, surface casing installation, pilot hole drilling, geophysical logging, casing installation, grouting casing in place for each lift of cement, completion interval drilling and associated testing, preliminary well development, acid treatment, pump development and testing. Consultant will also provide well performance testing, including water level measurements, specific capacity analysis, and basic water quality testing (conductivity, chlorides, silt density indices~SDI's and sand testing). Consultant will provide up to 400 hours of on-site hydrogeological services (JLA).

Consultant will review drilling, geologic and geophysical data and provide recommendations for casing setting depths and completion intervals. Consultant will review pump test results and provide recommendations for permanent pump setting depth and recommended in service pumping rate.

Consultant will review water quality testing results, which include clearance water quality in accordance with PBCHD regulations and additional water quality for membrane projections. Water sampling will be provided by the general contractor and/or well driller.

Consultant will provide contract document interpretation, shop drawing and pay request review and change order requests. Consultant will answer requests for additional information and issue clarifications. These construction phase services assume the well location, and formation water disposal determined above will not change during construction. Shop drawing submittal will be reviewed for conformance with the intent of the contract documents. Shop drawing will be submitted directly to the Consultant. The Consultant will review the submittal and return copies to the contractor and Palm Beach County Water Utilities.

Consultant will prepare a well completion report for well PW-11, including a summary of the lithologic logs, field logs, hydrologic and water quality data, and preparation of figures, data, lithogic logs, and appropriate attachments. The well completion report and data will be used for well clearance when the well is requested to be placed into service. Up to four (4) final copies of the report will be furnished to Owner.

It is anticipated that the construction phase from notice to proceed to substantial completion will take approximately ten (10) months, with well construction activities being approximately seven (7) months. Final completion will take an additional two (2) months after substantial completion, approximately twelve (12) months after Notice to Proceed.

The installation of the wellhead piping, valves, instrumentation, well pump, column piping, and electrical service for operation of the well PW-11 is assumed to be included under the drilling and rehabilitation phase. Consultant will provide up to ten (10) site visits to review the progress of this work, and attend pump and equipment startup and operational testing.

Consultant will attend up to eight (8) onsite progress meetings to discuss progress, review construction related issues, and provide coordination where needed, as well as attend one (1) pre-construction meeting.

Rev. 5-27-15

Consultant, under HEE subconsultant, will modify the water plant PLC to include well PW-11 operation and control

Consultant will prepare and submit a FDEP certification of construction completion and request for clearance to place PW-11 into operation (FDEP Form 62-555.900(9)). Record drawing information will be provided and included with the certification package.

Consultant will prepare record drawings based on information provided by the contractor and information collected in the field during site visits. The effort in preparing record drawings is based on the construction being within general conformance of the bid documents without significant changes to the design documents. Consultant will furnish four (4) copies of 24x36 drawings and electronic form in pdf and CADD format to PBCWUD.

If the construction of the project is postponed or cancelled at the two hold-points defined in the construction contract, Consultant will coordinate with PBCWUD termination of this CSA and remaining compensation required to close the project out to PBCWUD satisfaction.

ITEMS PROVIDED BY OWNER

1. Final bid and contractor contract documents

DELIVERABLES

1. Record drawings – 6 copies 24x36 format, CADD format

ITEMS NOT INCLUDED

1. Well matrix modifications or water plant programming beyond listed herein.

COMPENSATION

The services included in this CSA supplement are based on a lump sum value of \$138,402.12.

SBE PARTICIPATION

1. SCHEDULE 3(A) - Professional Services Activity Report

This form shall be submitted by the prime contractor with each payment application when SBE and/or M/WBE sub-consultants are utilized in the performance of the contract. This form shall contain the names of all SBE and M/WBE sub-consultants, specify the sub-consultants dollar amount for each sub-consultants and show amount drawn and payments to date issued to sub-consultants.

2. SCHEDULE 4 – SBE-M/WBE Payment Certification

A schedule 4 for each SBE and/or M/WBE sub-consultant shall be completed and signed by the proposed SBE and/or M/WBE after receipt of payment from the prime. When applicable, the prime shall submit this form with each application submitted to the county for payment to document payment issued to a sub-consultant in the performance of the contract.

SBE participation is included in the **ATTACHMENT F** under this authorization. The attached Schedule 1 defines the SBE applied to this CSA/Contract and Schedule 2 establishes the SBE contribution from each subcontractor (Letter of Intent to Perform as an SBE).

RE: Proposal for Hydrogeologic Consulting Services for Palm Beach County Water Utilities Dept. Water Plant #11 UFA Well PW-11 Construction Observation, Testing and Reporting Services

Dear Mark:

JLA Geosciences, Inc., is pleased to have the opportunity to provide Hydrogeologic Services to Kimley-Horn and Associates, Inc. (KHA) and its client, Palm Beach County Water Utility Department (PBCWUD) for the above referenced project. Our proposed scope of work will include construction and testing phase services for one (1) Upper Floridan Aquifer supply well indentified as PW-11, located near the Lake Region Water Treatment Plant in Belle Glade, Florida. Note our proposal from last year has been revised to reduce fee by having the project managed by a PG/Project Manager instead of a Principal (me) and daily summary logs preparation were removed from the scope of work. Instead, field notes will be scanned and copied for the record.

The following tasks identify our proposed scope of work with our associated costs for your consideration.

1.0 Contractor Coordination and Project Management — Attend monthly construction progress meetings at PBCWUD CROC during the estimated 6 month project and be the principal liaison to KHA and the County for well construction related work; provide project planning and coordination, assist with pre-construction activities, meetings with the well contractor, client, engineering project management team and owner's representatives, review shop drawings for all down hole well related items not including surface piping, mechanical, electrical and instrumentation.

Professional and support services

\$ 8,280.00

2.0 Floridan Aquifer Water Supply Well Construction Phase Services PW-11 — Provide hydrogeologic observation services, hydrogeologic direction and well design/construction expertise during construction of Floridan aquifer production well PW-9. JLA hydrogeologist staff will be present on site during critical phases of well construction including: pilot hole drilling, geophysical logging, casing installation and cement grouting, completion interval drilling, flow and water quality testing, well development, step drawdown testing, and well video observation. Observe and direct well acid treatment if required. Recommend constructed depths of bore holes, casings and open intervals. Direct step drawdown testing, perform water level measurements, specific capacity analysis and water quality testing. This task will include

jlageosciences.com

PBCWUD WTP11 Well PW-11 Construction Services Proposal June 28, 2017 (revised) Page 2 of 2

providing geologist's lithologic logs; well construction daily field logs; water quality field data summaries; and copies of the geophysical logs provided by the Contractor. This task will also include preparation of weekly summary reports, technical evaluation and review of data and work to support monthly progress meetings. Digital photos will be taken of significant activities during construction of the well. The proposed budget is based on an estimated 6-month construction schedule for the contractor to substantially complete well PW-11. The estimate of labor hours is based on the attached summary.

Professional and support services

\$ 52,124.00

3.0 **Well Completion Report** - Prepare lithologic logs and complete geologic interpretations; review well construction field logs and compile summary; complete analysis of all hydrologic and water quality field data; geophysical log analysis, summarize pumping test methods and results. Prepare a well completion report for PW-9 and PW-10 including figures, data tables, geologic geophysical logs, pump test data and water quality data.

Professional and support services

\$ 12,160.00

TOTAL PROPOSAL LUMP SUM PRICE

\$ 72,564.00

This proposal was prepared based on the information provided to date and our understanding of the project. If you feel that we have omitted anything or have not clearly defined the anticipated scope of work, we will gladly review additional information, and modify the scope and associated costs accordingly.

We look forward to working with KHA and PBCWUD on this important project. Thanks for this opportunity and if you have any questions please don't hesitate to call me.

Sincerely,

JLA Geosciences, Inc.

James L. Andersen, P.G. Principal Hydrogeologist

HEE

HILLERS ELECTRICAL ENGINEERING, INC.

June 29, 2017

Mark Miller, P.E. Kimley-Horn 1920 Wekiva Way, Suite 200 West Palm Beach, FL 33411

Subject:

Lake Region (WTP11) Well PW-11

Dear Mark:

Hillers Electrical Engineering, Inc. (HEE) is pleased to provide Kimley-Horn a revised proposal for the electrical and I&C construction services as well as the PLC programming services associated with the above referenced project. The scope of services is as follows:

Construction Services

- Attend pre-construction meeting
- Review electrical, well pump and I&C shop drawings
- Answer RFI's
- Issue clarifications and small design modifications
- Periodic site visits
- · Prepare preliminary and final punch list
- Assist with start-up services
- Prepare "As-Built" drawings
- Perform the PLC programming services and coordination with the SCADA group

The following is a list of shop drawings we intend to review:

Electrical

- -directional bore conduit
- -raceways
- -cables
- -manhole and JB
- -lighting
- -breakers
- -well motor
- -VFD
- -support devices
- -concrete encased duct bank

<u>I&C</u>

- -control panel
- -RTU
- -instruments
- -antenna & tower

23257 State Road 7, Suite 100, Boca Raton, Florida 33428 561-451-9165 Fax: 561-451-4886

Page 2 Mark Miller, P.E.

Our proposed electrical and I&C construction services as well as PLC programming services fee is \$ 22,203.12.

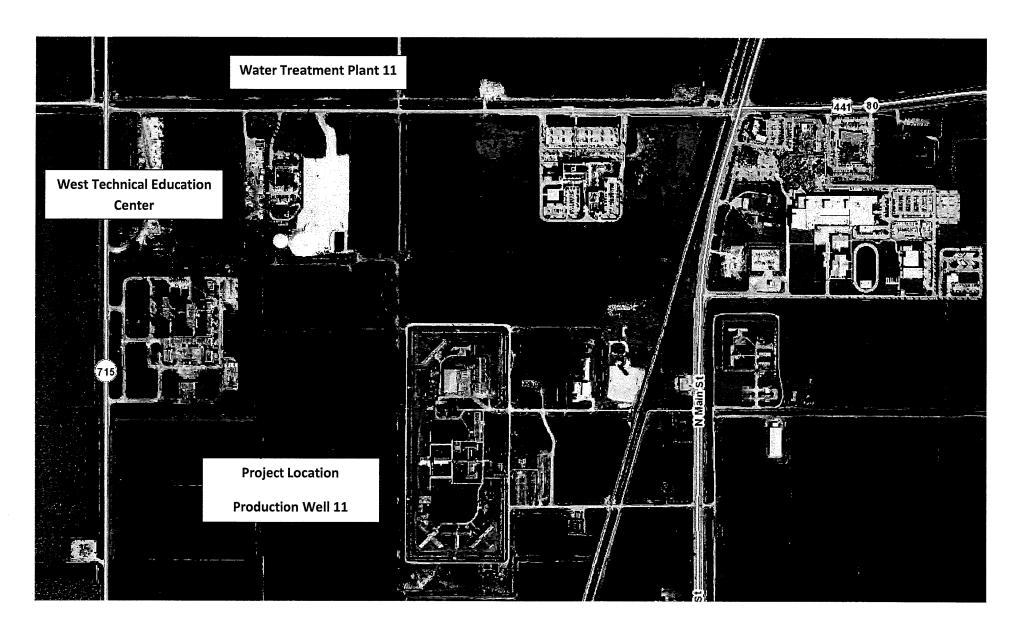

If you have any questions, please do not hesitate to call me.

Sincerely,

Paul Hillers
