I. EXECUTIVE BRIEF

**Motion and Title:** Staff recommends motion to approve: An Agreement with the Palm Beach Soil and Water Conservation District in an amount not to exceed \$79,000 to provide soil and water resource conservation services for FY 2019.

**Summary:** This Agreement provides funding for the Palm Beach Soil and Water Conservation District's ("District") Resource Conservation Activities. The District provides resource conservation services to rural, agricultural, and urban communities to facilitate soil and water conservation in Palm Beach County. Services include agricultural technical assistance, Best Management Practices implementation assistance, education to conserve water through irrigation, and improvements to water quality and quantity in Palm Beach County. Countywide (AH)

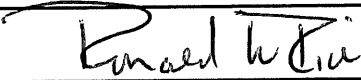

**Background and Justification:** The District has been supported by the Board of County Commissioners since 1979. The District provides resource conservation services to rural, agricultural, and urban communities to facilitate soil and water conservation in Palm Beach County. Services include soil information, technical assistance, conservation education and free assistance to improve water quality and quantity in Palm Beach County. The District conducts quarterly farm audits to assess the correct design/implementation of agricultural pest control, fertilizer use, and water management best management practices (BMPs) that are documented in the farm's "Notice of Intent to Implement BMPs" filed with the Florida Department of Agriculture and Consumer Services (FDACS). Any deficiencies identified are reported for corrective action to ensure that these Palm Beach County properties (leased to farmers) are in compliance with FDACS state water quality standards.

This Agreement requires Palm Beach County to provide \$79,000 in funding to the District for payment of soil and water resource conservation services and health insurance benefits. This is for the same amount that was provided to the District for FY 2018. The remaining contributions for the District's \$321,390 budget come from USDA Natural Resources Conservation Service, FDACS, National Association of Conservation Districts and various Palm Beach Soil and Water Conservation District programs and services. Since FY 1991 Board direction provided that the program be funded under "Contributions to Other Government Agencies".

This Agreement for FY 2019, in accordance with previous Board directives includes language, which provides for the District to make good faith efforts to include small business enterprises for procurement opportunities. Monitoring responsibilities have been assigned to the Palm Beach County Cooperative Extension Service Department.

Pump Calibrations, recommendations for improved irrigation efficiency, water quality, Best Management Practice (BMP) implementation and cost-share program information are also provided to the nursery growers. During the last fiscal year, the lab documented actual water savings of 77.60 million gallons of water on over 77 acres of agriculture land. The actual savings is documented from only 25% of the properties evaluated.

**C. PBC-BCC Ag Reserve Land Management**

Reports and photos are sent to the County quarterly and a detailed report including crop detail is prepared annually.

The Urban MIL evaluates irrigation systems to assist landowners and businesses in saving money, water and improving their landscaping. The District works with Home Owner Associations, Municipalities and Towns providing comprehensive irrigation evaluations that are tailored to fit the needs of the client. The District also gives presentations to HOAs, local clubs and other county residence, as well as participates in the Master Gardeners classes bi-annually. The District is seeking additional funding to expand the program's evaluation component, in order to provide a free service to homeowners that will include evaluations, Urban BMP and Florida Friendly Landscaping education.
