I. EXECUTIVE BRIEF

Motion and Title: Staff recommends motion to approve: Change Order 2 to Lanzo Trenchless Technologies, Inc.-South (Lanzo) for the Glades Priority 1 Collection System Rehab & Sanitary Sewer Evaluation Survey (SSES) Project in the amount of \$260,145 and providing for a 60 day project time increase.

Summary: On September 26, 2017, the Board of County Commissioners (BCC) approved the Water Utilities Department (WUD) Contract for Glades Priority 1 Collection System Rehab & SSES project Belle Glade with Lanzo Trenchless Technologies, Inc.-South, (R2017-1365). The project, as originally approved, entailed the rehabilitation of over 22,000 linear feet of gravity sewer main and approximately 300 manholes in 14 lift station basins located in the cities of Belle Glade, Pahokee and South Bay. However, during the course of construction it was discovered that additional gravity sewer segments not originally included in the scope of work are in poor condition and require rehabilitation. Lanzo has submitted a proposal for the rehabilitation and improvement of the additional gravity sewer segments in the amount of \$260,145. The completion of this project will result in a reduction of infiltration into the gravity sewer collection system and an improvement of the wastewater service. The Contract provides for SBE participation of 3.28%. Change Order No. 2 provides for 0% SBE participation. The cumulative SBE participation including Change Order No. 2 is 2.93%. Lanzo Trenchless Technologies, Inc.-South is a Palm Beach County company. This Project is included in the WUD's FY 19 Budget. (WUD Project No. 15-024) District 6 (MJ)

Background and Justification: WUD has reviewed the proposal as provided by Lanzo for the rehabilitation of the additional gravity sewer segments not included in the original scope of work and determined that the proposed cost is reasonable. This additional work will involve lining the existing gravity sewer collection system from 8-inch to 12-inch and reinstating all sanitary sewer laterals to ensure continuous flow. As afore-stated, the completion of this project should result in a reduction of infiltration into the gravity sewer collection system and the improvement of the same.

Please note this is an estimate and payment will be made on actual quantities installed as measured by the Post-CCTV report.

Please note, for short-run liners to be installed, i.e. 60 LF or less, we are requesting a minimum unit price fee of \$ 3,000.00 per each installed, as the mobilization and prep work required for installing short liners a great deal similar to longer runs. This would be for liner installation only. Lateral reinstatement, end seal installation, pre-liners and any other work would be billed separately.

We are also requesting 60 calendar days of time extension. This does not take into consideration any point repairs, lateral replacements or any additional work other than what is outlined here. Any required point repairs, etc., will be dealt with on a case-by-case basis for additional payment and time compensation.

Please feel free to contact me should you have any questions.
