I. EXECUTIVE BRIEF

Motion and Title: Staff recommends motion to approve on preliminary reading and advertise for Public Hearing on July 2, 2019 at 9:30 a.m.: an Ordinance of the Board of County Commissioners of Palm Beach County, Florida, to be entitled "The Palm Beach County Infectious Disease Elimination Program", establishing authority for an infectious disease elimination program pursuant to Florida Statute 381.0038(4); providing for a title; providing for applicability; providing for definitions; providing authorization for a needle exchange program; providing conditions precedent to establishing the needle exchange program; providing for approval of operator; providing for security of sites and equipment; providing for needle exchange program operations; providing for data and reporting requirements for needle exchange program; providing for lawful participation in needle exchange program; providing for enforcement; providing for state, county and municipal funding prohibited; providing for repeal of laws in conflict; providing for severability; providing for inclusion in the code of laws and ordinances; providing for captions; and providing for an effective date.

Summary: The Florida Legislature recently approved the infectious Disease Elimination Act (the Act), as codified in Section 381.0038(4), Florida Statutes, authorizing the Board of County Commissioners to establish a sterile needle and syringe exchange program within its geographic boundaries with the goal of eliminating infectious diseases, including HIV and Hepatitis C. This ordinance, if adopted, will allow a needle exchange program to operate in Palm Beach County. A subsequent contract with an eligible provider must be approved and executed by the Board of County Commissioners prior to any program initiating operations within the County. The Center for Disease Control also states the programs have proven to increase entry into substance use disorder treatment, reduce needle stick injuries to first responders, reduce overdose deaths, and save health care dollars by preventing infections and preventing HIV and viral Hepatitis. The approved legislation adds Florida to a list of 39 states in the country already offering needle/syringe exchange programs. No County funds are required for the program, as they are expressly prohibited by the Act. Countywide (DC)

Background and Policy Issues: The Infectious Disease Elimination Act was modeled on the "IDEA Exchange" program in Miami Dade County, which was given a five-year trial approval by the Legislature in 2016. The program consists of fixed and mobile needle exchange sites, at which used needles are exchanged for clean ones. Program participants may also be given drugs that reverse opioid overdoses (Narcan), may be tested for HIV, and are given information connecting them to medical care and drug rehabilitation resources. Since its 2016 inception, the program reports it has pulled approximately 300,000 used needles out of circulation.
