**Marine Debris and Derelict Vessel Removal Services**

CONTRACTOR will remove marine debris within portions of nine County Natural Area Projects, namely Osprey Park, Currie Park, South Cove, Snook Islands, Ibis Isles, Bryant Park Wetlands and Shoreline, Jewell Cove, Grassy Flats, and Tarpon Cove (see maps attached hereto and incorporated herein). Access will require a boat or vessel of an appropriate size to navigate the above-cited Natural Areas without creating damage to the sites and include areas along the rock wave breaks and islands/mangrove planters not accessible by land. Marine debris removal includes but is not limited to non-biodegradable items such as bags, styrofoam cups, balloons, all plastics, fishing lines and nets, traps, as well as glass, metal, rubber and wood products. CONTRACTOR will also be responsible to dispose of and/or recycle all materials at the Solid Waste Authority.

Marine debris removal events shall be performed each quarter of the calendar year and completed by: July 31; October 31; January 31, and April 30 for each year through the beginning of 2023. Within one week notification by the COUNTY, the CONTRACTOR will remove marine debris for a particular site as requested by the COUNTY. Each marine debris removal event shall be reviewed and approved by the County. During each cleanup event, CONTRACTOR will note the approximate quantity of trash collected at the sites and include this information in the invoice. This event will satisfy the quarterly requirements for that site.

CONTRACTOR will remove vessels which have been lawfully determined by the Florida Fish and Wildlife Commission, or other law enforcement entity, to be derelict or abandoned within the meaning of Florida Statutes. Vessels which have been lawfully tagged as derelict, abandoned or at-risk may be removed from the waters of Palm Beach County. Contractor will receive specific instructions from the County as to which vessels may be removed under this contract. For its part, the County will receive vessel-specific authorization from FWC or other law enforcement entity prior to directing Contractor to remove a vessel. Additionally, Contractor will seek other potential funding as match to increase the number of derelict or abandoned vessels removed.

**SCHEDULE OF PAYMENTS**

The Scope of Work shall be completed by CONTRACTOR as defined in Exhibit "A". Compensation for the work tasks stated herein shall be in accordance with the following Schedule of Payments:

**ANNUAL WORK EFFORT**

Task(s) to be completed: Quarterly marine debris removal at Osprey Park, Currie Park, South Cove, Snook Islands, Ibis Isles, Bryant Park Wetlands and Shoreline, Jewell Cove, Grassy Flats, and Tarpon Cove; Marine debris removal events shall be performed each quarter of the calendar year and completed by: July 31; October 31; January 31 and April 30 for each year through the beginning of 2023.

Quarterly Reports would be due within 30 days of each completed quarter and include dates and quantities of marine debris removed for each site.

Compensation: \$6,831 per quarterly marine debris removal event or \$27,324 annually for up to three years;

\* Deliverable(s) Required: Quarterly Report after each marine debris removal event for three years.

All costs associated with the removal of derelict vessels will be itemized and submitted to the County for payment approval. Costs for marine debris and derelict vessel removal combined cannot exceed \$50,000 annually or \$150,000 for up to three years.

**Total= \$150,000**

\* Deliverables shall be defined as quarterly reports indicating quantities and approximate locations of marine debris removed from the County project sites.

### Best Management Practices for DV removal

#### Derelict Vessel Removal Process

Derelict vessels are existing impacts to the environment as well as boating safety hazards, impediments to navigation, and esthetic nuisances. Typically these vessels are found grounded on the edges of active waterways where they may have physical impacts on benthic and shoreline communities. However, the impact of these vessels is not limited to their immediate location. If left unattended, the influences of winds and tides continue to push the boats causing greater impact as they become more deeply mired into the environment. Early extraction of these vessels will avoid and minimize the environmental impacts. In addition to these physical impacts resulting from the movement of these vessel through the environment; there is the long term effect caused by their continued degradation and decay in the marine environment. These vessels may be constructed of various materials, such as wood, steel, aluminum, or fiberglass; each having varying degrees of resilience and can remain in the marine environment for extended periods of time. With the progression of time; the environmental impacts increase with the shading from the hull and displacement of live bottom and emergent vegetative communities resulting from the expansion of the debris field as the vessels disintegrates. The impacts resulting from the removal of these vessels during any stage is less than the impacts caused by the long-term presence of the vessel in the marine environment. Therefore the early detection and removal of these abandoned and derelict vessels is the best means of minimizing the individual or cumulative impacts to the environment.

#### Derelict Vessel Removal (FDEP) Permit Exemption

An Exemption under Florida Administrative Code Chapter 62-330-051(5)(g) by Florida Department of Environmental Protection, has been established for the removal of derelict vessels. Based on the presumption that the extraction of these vessels from the marine environment will cause only minimal environmental impacts and in turn avoid the long-term impacts resulting from the degradation of the vessel at it current location. The environmental impacts are ameliorated by the application of the best management practices referenced below.

#### Florida Administrative Code Chapter 62-330-051(5)(g)

(g) The removal of derelict vessels, as defined in Section 823.11(1), F.S., by federal, state, and local agencies, provided:

1. The derelict vessel case has been completed as specified in Section 705.103, F.S., and has been entered into the Statewide Derelict Vessel Database maintained by the Florida Fish and Wildlife Conservation Commission;

2. All work is done in a manner that, to the greatest practicable extent, avoids additional dredging or filling, grounding or dragging of vessels, and damage to submerged resources such as seagrass beds, oyster beds, coral communities, mangroves, other wetlands, and live bottom; and
3. An absorbent blanket or boom shall be immediately deployed on the surface of the water around the derelict vessel if fuel, oil, or other free-floating pollutants are observed during the work.

#### **General Derelict Vessel Removal and Environmental Protection Best Management Practices**

The following best management practices (BMP's) will be employed by the marine contractor during the removal of derelict vessels. These BMP's will be incorporated into the contract for each vessel removal project. The marine contractor selected for the project will be required to show proof of their ability to meeting the BMP requirements with their contingency of equipment, staff and expertise in the removal of derelict vessels.

Compliance with these BMP's will be monitored by the County and by local Florida Fish and Wildlife Conservation Commission law enforcement officers. These BMP's are as follows:

- a. All Work Is To Meet The Following Requirements:
  1. Operations are to be limited to daylight hours.
  2. Operations are to be staged from an upland area.
  3. All work is to be performed in a manner that avoids and/or minimizes impacts to live bottom and other resource areas (e.g., seagrass beds, oyster beds, wetlands, mangroves, and other sensitive habitats) while approaching, working in, and leaving the derelict vessel site.
  4. All work shall avoid impacts to manatees, sea turtles, and other species listed by the state and federal government as threatened or protected.
  5. The Contractor will remove all contaminants and pollutants including fuels, batteries, paints, solvents, and engine from the derelict vessel prior to extraction. Any contaminant or pollutant found to be contained within a derelict vessel shall be removed by the Contractor, placed in an approved container, and disposed of properly. The placement of an absorbent blanket on the surface of the water around the derelict vessel within the turbidity barrier is required where free floating product (gas/oil) is observed.
  6. The Contractor is to provide appropriate best management practices (BMPs) approved by the Florida Department of Environmental Protection for erosion control and turbidity protection while each derelict vessel is being removed. In areas of low to moderate currents, a Type II floating turbidity barrier will be

installed within a ten (10) foot radius of the vessel being removed prior to starting any removal activities. The turbidity barrier shall be anchored to the bottom of the waterway.

7. The Contractor is to provide appropriate BMPs for erosion control and turbidity prevention around the vessels/barges being used to remove the derelict vessel and around the perimeter of any upland staging site (where necessary).
8. The Contractor is to monitor turbidity levels throughout removal work.
9. In an effort to reduce turbidity, a crane, winch and/or approved alternate method is to be used to raise the derelict vessel from the water.
10. The Contractor will measure turbidity levels and allow them to return to a level that is not in excess of 20 NTU's over initial turbidity readings prior to removal of turbidity measures.
11. The dragging of vessels is to be avoided both on and off-shore. All vessels/barges used in vessel removal shall continually monitor water depths to avoid running aground.
12. The Contractor will load derelict vessels onto a barge and/or flat bed truck (or similar) for proper disposal.
13. The Contractor is to photo-document all removals as described in Item 6 below with pictures taken before, during and after removal. The Contractor will provide a daily written report of all removal activities.

b. For Derelict Vessels That Are Floating Or Lightly Aground:

1. The vessel is to be pumped out as needed and extracted (floated out) during high water.
2. Following extraction, the vessel is to be towed from the grounded location to a boat ramp or other removal point while avoiding and/or minimizing impacts to live bottom areas.

c. For Derelict Vessels That Are Hard Aground:

1. The vessel is to be approached using shallow draft vessels.
2. The vessel is to be extracted using a crane from a shallow draft deck barge, by hand using the best available tools, or similar approach to minimize impacts to the site and surrounding areas.

d. For Derelict Vessels Sunken In Shallow Water:

1. Install and inflate flotation bags as needed.
2. Lift the vessel with barge mounted crane or similar equipment.
