Assumptions & Clarifications

Turner

GMP SCOPE ASSUMPTIONS & CLARIFICATIONS

Below is a listing of assumptions and clarifications that form the basis of the scope that is included and not included in the GMP. Where actual conditions on the project differ from the assumptions and clarifications listed below, the estimate may require adjustment. These assumptions and clarifications serve to clarify, and take precedence over, details or items shown within RFP Documents, in the event there is a discrepancy between or among them.

GENERAL

1. The GMP is based on the 100% Construction Document dated July 14, 2021 by RS&H. Please see document list included with this GMP dated October 5, 2021.
2. The General Requirement & General Conditions costs included in this GMP assumes a stand-alone project. If the Switchgear project occurs concurrently with the Chiller 4 and 5 Replacement project, we will be able to offer savings due to those efficiencies.
3. The health and safety of all Turner employees, trade partners, and others on our project sites continues to be our top priority. As such, we have developed the following protocols, standards and requirements for all projects in order to reduce the risk of contracting or spreading COVID-19 (collectively the Turner COVID-19 Protocols and Provisions):
 - Project Mitigation Measures
 - Containing the Spread of COVID-19
 - COVID-19 Personal Protective Equipment

We have included the cost and schedule impacts in our GMP to the extent included in or required by the above referenced Turner COVID-19 Protocols and Provisions.

Any additional/alternative measures required by the Owner (including, but not limited to vaccination mandates), mandated by applicable law or regulation, recommended by CDC or OSHA, or other authorities having jurisdiction, or schedule or cost impacts caused by events outside of Turner's control, including without limitation delays and additional costs arising from COVID-19 including, but not limited to, financial shocks, supply chain disruptions, labor force disruptions and/or travel disruptions or other causes beyond Turner's reasonable control or responsibility, shall entitle Turner to an equitable adjustment of the Contract Sum and/or Contract Time. This specifically includes, but is not limited to, delays and cost escalation arising from COVID-19 cases that trigger requirements for the quarantining of individuals per our above listed protocols, as may be amended from time to time.

4. This GMP is based upon the provided Project Schedule dated 10-21-2021 (*reference Supplemental Note below) and contingent upon receiving a Notice To Proceed as indicated. Due to volatility in the construction market and its supply chain, Turner reserves its right to amend the GMP prior to receiving the Notice to Proceed for impacts beyond Turner's control. We assume that material prices will remain stable from the date of this Proposal to the execution of the applicable Subcontracts. To the extent material prices or supply chain impacts are inconsistent with the assumptions in this GMP, Turner will receive an equitable adjustment of the Guaranteed Maximum Price and the Contract Time. We recommend that the Owner maintain an allowance or Owner-held contingency to mitigate these risks. Additionally, the GMP includes the below trade specific allowances should unexpected escalation impacts occur:
 - a. An allowance in the amount of \$10,000 is included for unexpected escalation for mechanical materials and equipment.

Turner

- b. An allowance in the amount of \$250,000 is included for unexpected escalation of electrical materials and equipment.

*Supplemental Note: During negotiations of GMP, the planned Board Approval date shifted by approximately 3 weeks from the bid schedule. The GMP schedule was updated however, trade partner pricing impacts were not validated. It is understood that any pricing escalation impacts during trade partner awards related to the later award dates can be reconciled against the above allowances.

- 5. This GMP assumes the Owner and Architect will expeditiously review submittals so as to release materials for order and fabrication. Due to current supply chain disruptions, Owner and Architect will cooperate with Turner and its Subcontractors in revising specifications for material and equipment experiencing significant shortages or delays so as to maintain the Contract Time. This proposal assumes that such revisions are not a substitution and are subject to an additive or deductive (as appropriate) adjustment in the Guaranteed Maximum Price and the Contract Time.
- 6. This GMP assumes state funding and includes compliance with Appendix B. This GMP excludes compliance with Appendices A, C, and D and therefore makes no provisions to accommodate any federal funding, support, or involvement nor does the GMP include compliance with any Federal Acquisition Regulations or flow-downs.
- 7. This GMP does not include any provisions for Buy America or Buy American Act(s).
- 8. The following general scope items are **included** in the GMP:
 - a. Construction Contingency
 - b. Subcontractor Default insurance or subcontractor bonding
 - c. Payment & Performance Bond
 - d. Builder's Risk Insurance
 - e. Palm Beach County Living Wage Rate
 - f. Corporate General Liability and Workers Compensation
 - g. Sales tax on applicable materials and equipment
 - h. Owner Allowances
- 9. The following general scope items are **not included** in the GMP and are assumed to be not required, by others, or by the Owner:
 - a. Hazardous material handling and abatement
 - b. Master Building Permit
 - c. Impact Fees
 - d. Utility service charges or consumption costs
 - e. Architectural & engineering fees
 - f. Environmental Site Assessments
 - g. Geotechnical site investigation (soils report)
 - h. 3rd party inspection fees
 - i. Inspector General costs
 - j. Owner Contingency
 - k. Fire watch including but not limited to Fire department fees and fire alarm monitoring fees
 - l. BIM Services
 - m. Security Guard / Watchman Services
 - n. Sweeper trucks and operators

10. The windstorm deductible for Builder Risk Insurance is \$250,000 or 5% of the work-in-place at the time of the incident, whichever is greater.
11. Deductibles for insurance products is not included. If required, it is understood the deductibles are to be funded through additive change order to the project.
12. The GMP assumes that all existing site conditions are accurately represented on the drawings, and does not include any costs arising from changes required to address differing site conditions.
13. It is assumed that the design documents provided as the basis of this GMP are consistent with all laws, codes, and regulations affecting this project. Any changes required resulting from the permit reviews of the drawings, or during inspections due to the AHJ's interpretation of the design and codes, would need to be addressed via change order.
14. The GMP assumes that electronic drawing files (Autocad or Revit) will be provided to Turner and its trade subcontractors at no charge for use in generating shop drawings and delegated design components, and for trade coordination.
15. Any delays to this schedule caused by third parties such as building inspectors, or code consultants, or municipal agencies having jurisdiction over the project, shall be the basis of a Change Order to the contract for time extensions and additional compensation. Delays caused by PZB inspectors issuing Correction Notices due to installation not meeting FBC or NEC Requirements will not be entitled for time extension or additional compensation.
16. Liquidated Damages have not been defined at the time of GMP submission. Liquidated Damages are assumed to be limited to the below conditions, capped at the CM Fee:
 - a. Liquidated Damages to be assessed, not to exceed \$1,000 per day beyond Substantial Completion
 - b. Liquidated Damages to be assessed, not to exceed \$0 per day beyond Final Completion
17. The GMP assumes a mutual waiver of consequential damages will be obtained.
18. Hazardous material handling is excluded from the GMP. It is assumed PBIA will provide a full hazardous material survey prior to the commencement of work.
19. It is understood any cost for hurricane preparedness is to be funded from Construction Contingency.
20. The GMP includes Owner Allowances for items that are undefined in terms of design, quality, or quantity. Turner will keep the Owner notified when allowance dollars are being utilized and will request prior approval, to the extent practical to allow for the work to proceed along with the schedule. If the cost, when finalized, is more than the Allowance, the GMP shall be adjusted accordingly pursuant to the contract.
21. This estimate includes FOD management for airside activities only.

22. Area breakouts provided in the GMP summary page are for accounting purposes only and do not represent stand-alone pricing.

C – INTERIORS

23. An allowance in the amount of \$10,000 is included to furnish new doors, frames, and hardware should the existing assemblies not be able to be reused.
24. This GMP includes one prime coat and one finish coat of Sherwin Williams Pro Mar 200 eggshell at CMU wall infill.
25. This GMP includes two finish coats of Pro Industrial Acrylic at steel lintels, HM frames and HM doors.
26. This GMP includes Armorseal 8100 floor coating at equipment pad modification areas where demo, grinding and leveling of existing pads occur.

31. The GMP assumes existing mechanical equipment being reused and reinstalled is in good working condition and does not require repair.
32. Water treatment and detergent is excluded.
33. A 1 year warranty for labor is included for AHU-3 which will begin at beneficial use.
34. A standard 1 year warranty for new fan coil units is included and assumed to begin at beneficial use.

ELECTRICAL & LOW VOLTAGE SYSTEMS

35. The GMP includes diverting existing water to an existing green area and/or drain located on site for all dewatering activities. Dewatering systems and associated permit fees are excluded.
36. The GMP assumes that FP&L has performed a utility MV study and has confirmed the reliability of A and B MV service.
37. The GMP includes initial fuel only for the stand by generators being provided for Substation B and Substation C for when the systems are down to one transformer.

38. The GMP excludes a temporary generator in order to back up the entire complex while redundant power is taken offline.
39. Medium Voltage switchgear A and D are existing to remain therefore an Arc Flash study has not been included.
40. The GMP assumes that all existing raceways systems to be re-used are in reusable condition.
41. In the event that an underground conduit is not reusable the GMP excludes saw cutting and patching of existing floors and slabs to install new/correct conduit issue.
42. This GMP includes painting of exterior exposed conduits only.
43. The GMP assumes that new medium voltage switchboard breakers will be located in the exact same location as the previous Siemen switchboards, resulting in no modifications to downstream conduit/wire.
44. The technical specifications require a (3) year service agreement to be included in the GMP to provide the manufacturer's recommended maintenance during the warranty period. This GMP is based upon Eaton Corporation's suggested services per their proposed Tri-annual Service Agreement Scope dated October 5, 2021.

F – SPECIAL CONSTRUCTION & DEMOLITION

TEMPORARY PARTITIONS

45. Temporary partitions are included per the design indicated on sheet G004. These walls are anticipated to be weather resistant, however, will not be waterproof.

DEMOLITION

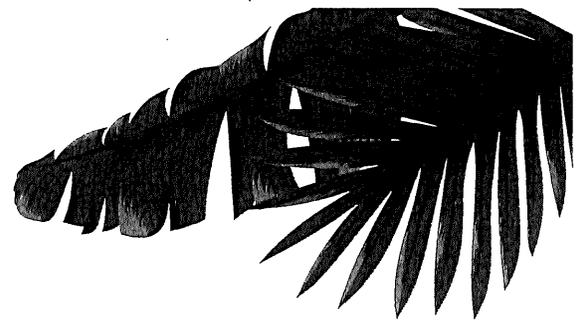

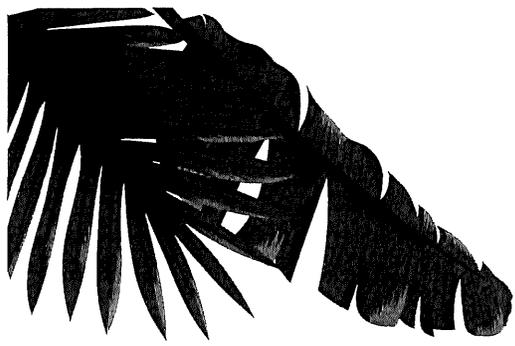

46. This estimate excludes any modification to the opening at the Main Electrical room. It is assumed that the opening is adequate to remove and install the switchgear.
47. Shoring at removed exterior door locations is excluded.

G – SITEWORK

LANDSCAPING

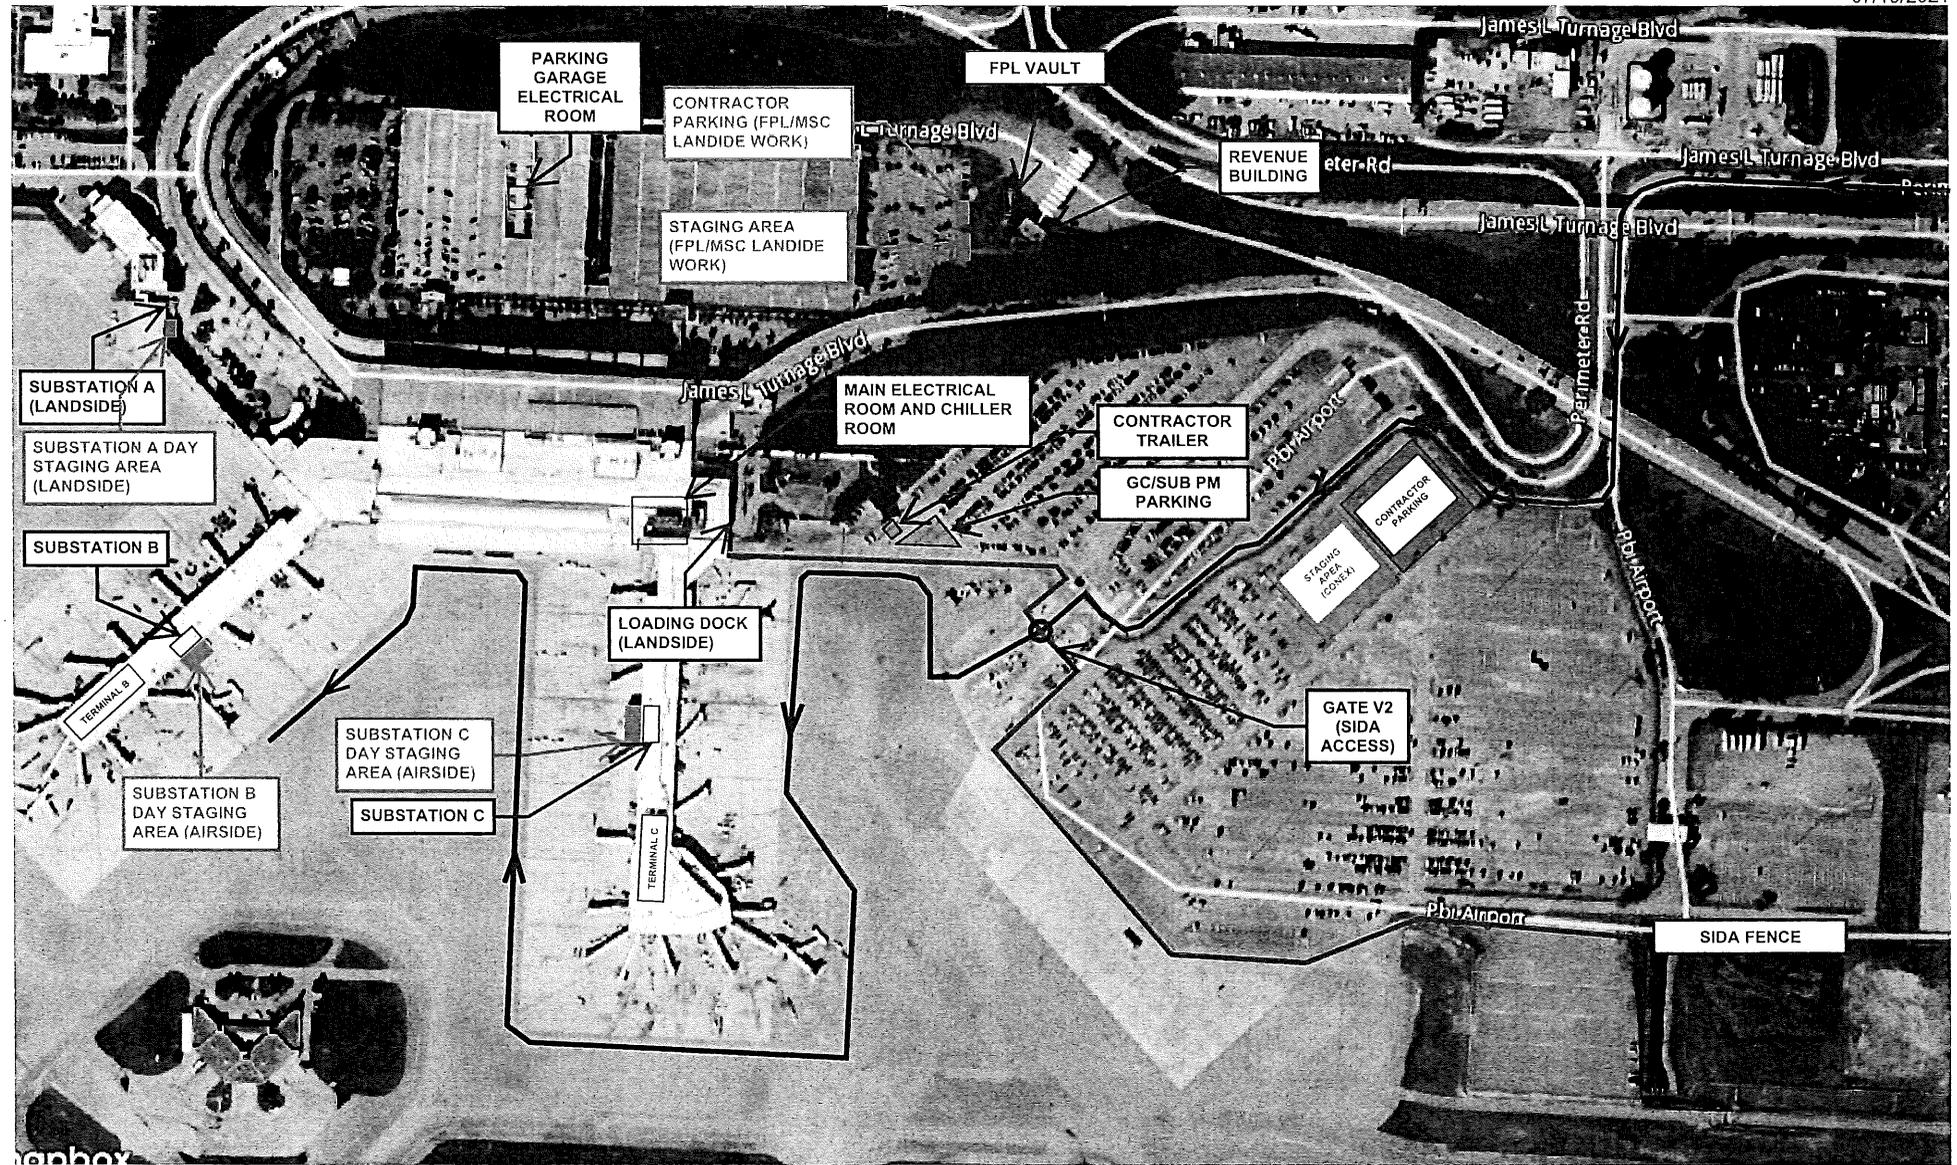

48. The GMP includes turf maintenance until final acceptance of all contract work. If turf maintenance is required for only one month after sod installation, a deduct alternate has been provided for consideration.

RE: ORIGINAL BOND FILING IN FLORIDA

The latest version of Florida Statute 255.05 requires that a contractor who enters into a contract with a PUBLIC ENTITY in the State of Florida must provide Performance and Payment Bonds for the project and record the bonds in the public records of the County where the improvement is located.

Therefore, we are enclosing 3 original sets of this Payment and Performance Bond which needs to be filed with the Clerk of the Circuit Court in the County in accordance with Florida Statute 255.05.

If you have any questions, please do not hesitate to call us.

Sincerely,

Elliott W. Wolffe
