

PALM BEACH COUNTY
BOARD OF COUNTY COMMISSIONERS

AGENDA ITEM SUMMARY

Meeting Date: March 14, 2023 Consent [X] Regular []
Public Hearing []

Department: Water Utilities Department

I. EXECUTIVE BRIEF

Motion and Title: Staff recommends motion to approve: a Contract for the Kings Point Flanders and Capri Water Main Replacement (Project) with Amici Engineering Contractors, LLC (Contractor) in the amount of \$5,693,565.60.

Summary: On October 19, 2022, the Palm Beach County Water Utilities Department (PBCWUD) received six (6) bids for the Project. Contractor was determined to be the lowest responsive and responsible bidder in the amount of \$5,693,565.60. The Project provides for all materials, labor, supervision, equipment, supplies, fees, expertise, and services necessary for the replacement of approximately 18,500 linear feet of water main within Kings Point Flanders and Capri subdivisions. The construction services consist of installation of potable water mains, fire protection improvement, replacement of water service lines, and all associated appurtenances within the Kings Point residential community.

This Project was procured under the requirements of the Equal Business Opportunity Ordinance. On September 8, 2022, the Goal Setting Committee applied an Affirmative Procurement Initiative (API) of a minimum mandatory 20% Small Business Enterprise (SBE) subcontracting participation of which 3% shall be among certified African American and/or Hispanic American owned firms. Contractor has met the established API. The Contract provides for 20.37% SBE participation, which includes 4.03% MBE participation, 4.03% MBE (B). Contractor is headquartered in Miami, Florida. The Project is included in the PBCWUD FY23 budget. (PBCWUD Project No. 21-034) District 5 (MWJ)

Background and Justification: The work to be completed under this Project is part of the continued improvement, restoration and repair of the water main infrastructure in the PBCWUD service area. The completion of this project will allow for isolation of pipelines during pipe breaks, thereby reducing emergency repair costs and minimizing the interruption of water service to customers.
