I. EXECUTIVE BRIEF

Motion and Title: Staff recommends motion to approve: Consultant Services Authorization (CSA) No. 10 to the Consulting/Professional Services Utility Distribution & Collection System Engineering Services Contract (Contract) with Holtz Consulting Engineers, Inc. (Consultant) for the Main St. and Gator Blvd. Water Main Break Analysis (Project) for a not to exceed amount of \$218,892.68.

Summary: On December 15, 2020, the Board of County Commissioners approved the Palm Beach County Water Utilities Department (PBCWUD) Contract (R2020-1897) with Consultant. CSA No. 10 provides for professional engineering services to conduct an investigation of the water main failures along SR 80/N. Main St. and Gator Blvd. in Belle Glade, Florida. The investigation shall include forensic testing and investigations, geotechnical investigations, and recommendations for future projects.

This Contract was procured under the requirements of the Equal Business Opportunity Ordinance. On October 2, 2019, the Goal Setting Committee applied an Affirmative Procurement Initiative (API) of a minimum mandatory 20% Small Business Enterprise (SBE) subcontracting goal and an evaluation preference for up to 15 points based upon the relative level of dollar participation by certified SBE firms. The Contract provides for 96.00% SBE participation, which includes 90.00% MBE participation, 85.00% MBE (H), and 5.00% MBE (A). CSA No. 10 includes 0.00% SBE participation, which includes 0.00% MBE participation, 0.00% H, and 0.00% A. The cumulative SBE participation including CSA No. 10 is 75.52%, which includes 62.73% MBE participation, 61.63% H, and 1.10% A. Consultant is a Palm Beach County based company. The Project is included in the PBCWUD FY23 budget. (PBCWUD Project No. 23-033) District 6 (MWJ)

Background and Justification: PBCWUD Project No. 13-052 involved the installation of a 16-inch and a 12-inch polyvinyl chloride (PVC) water main in Belle Glade, Florida. This water main has experienced three (3) failures in recent years. PBCWUD staff, who made the emergency repairs, indicated that the breaks may be caused by improper bedding of the water main pipe. This Project will assess the condition of the pipe trench, pipe material, and provide recommendations on trench requirements for future projects in Belle Glade.

CONSULTANT SERVICES AUTHORIZATION NO. 10
Palm Beach County Water Utilities Department
Contract for Consulting/Professional Services
Utility Distribution & Collection System Engineering Services
Resolution No. R2020-1897 Contract Dated December 15, 2020

Project Title: Main St and Gator Blvd Water Main Break Analysis

PBCWUD Project No.: 23-033

Consultant: Holtz Consulting Engineers, Inc.

Address: 270 S Central Blvd, Suite 207, Jupiter, FL 33458

Budget Line Item No.: 4001-720-2323-3120

District No.: 6

This Consultant Services Authorization provides for: conducting a pipe failure investigation of the existing Polyvinyl Chloride (PVC) water main failures along SR 80 (N. Main St.) and Gator Blvd. in Belle Glade. Investigation shall include forensic testing, investigations, geotechnical investigations, and recommendations for future projects.

(See ATTACHMENT A for detailed scope of services)

The Contract provides for 96.00% SBE participation, which includes 90.00% MBE participation, 85.00% MBE (H), and 5.00% MBE (A).

This Consultant Services Authorization includes <u>0.00%</u> overall participation which includes, <u>0.00%</u> MBE participation, <u>0.00%</u> MBE (H), and <u>0.00%</u> MBE (A).

The cumulative SBE participation, including this Consultant Services Authorization is <u>75.52%</u>, which includes <u>62.73%</u> MBE participation, <u>61.63%</u> MBE (H), and <u>1.10%</u> MBE (A).

1. Services completed by the Consultant to date :

See ATTACHMENT B.

- 2. Consultant shall begin work upon receipt of Notice to Proceed correspondence.
- 3. The compensation to be paid to the Consultant for providing the requested services shall be:
 - A. Computation of time charges plus expenses, not to exceed \$218,892.68
 - B. Fixed price of \$0.00
 - C. Total \$218,892.68
- 4. This Authorization may be terminated by the County without cause or prior notice. In the event of termination not the fault of the Consultant, the Consultant shall be compensated for all services performed through the date of termination, together with reimbursable expenses (if applicable) then due.

SCOPE OF SERVICES

PBCWUD Project No.: 23-033

Project Title: Main St. and Gator Blvd. Water Main Break Analysis

INTRODUCTION:

Palm Beach County Water Utilities (PBCWUD) Project No. 13-052 involved the installation of a 16-inch and a 12-inch polyvinyl chloride (PVC) water main in Belle Glade, FL. This water main has experienced three (3) failures in recent years, including:

- A break in the 16-inch PVC water main on 6/27/2021
- A break in the 12-inch PVC water main on 1/10/2022
- A break in the 16-inch PVC water main on 12/31/2022

PBCWUD staff who made the emergency repairs indicated that the breaks were caused by improper bedding of the water main pipe. This Consultant Services Authorization encompasses conducting a pipe failure investigation of the existing PVC water main failures along SR 80 / N. Main St. and Gator Blvd. in Belle Glade, Florida. The investigation shall include forensic testing, investigations, geotechnical investigations, and recommendations for future projects.

SCOPE OF SERVICES

Holtz Consulting Engineers, Inc. (CONSULTANT) shall perform and be responsible for the engineering Scope of Services as described herein:

Task 1 - Forensic Investigation

A forensic analysis of the pipe shall be performed by CONSULTANT. The following tasks shall be performed:

CONSULTANT will review any documents provided. CONSULTANT will travel to a PBCWUD site to examine the remains of the pipe. An incident site inspection may be conducted, and photographs and measurements may be taken. Portions of or all of the retained pipes will be selected for detailed examination and transported to CONSULTANT's laboratory.

The PVC material will be sampled and analyzed by Fourier Transform Infrared Spectroscopy (FTIR). The fracture surface of the PVC material will be examined under a light microscope to determine the fracture origin and the likely cause of the failure. Scanning Electron Microscope (SEM) imaging will be conducted if deemed necessary by the forensic engineer to determine the cause of the pipe failure.

The PVC material will be sampled for mechanical testing. Testing that will be conducted includes lzod, longitudinal and traverse tensile, modulus of elasticity and deflection temperature.

A written report will be provided summarizing the tasks performed and results of the forensic investigation.

Task 1 Deliverables:

One copy of the final report in portable document format (PDF).

Task 1 Assumptions:

• PBCWUD staff can cut and provide a sample from the piece of the broken PVC pipe that was removed when the emergency repairs were made.

Task 2 - Geotechnical Investigations

CONSULTANT shall perform geotechnical investigations to evaluate and determine the nature and density of the soil backfill and bedding materials that surround the pipe. Five (5) locations will be targeted for the evaluation. The following geotechnical investigation tasks shall be performed:

Subtask 2.1 - Excavations

CONSUL TANT shall hire an underground contractor to excavate the existing water main in five (5) locations for the geotechnical engineering to perform the investigations. The CONSULTANT's excavation contractor will be responsible for clearance of the buried utilities through Sunshine State One-Call, and the areas of the proposed excavations will be dewatered by well points prior to excavation (if required to obtain a dry trench to collect proper soil samples).

Subtask 2.2 - Right-of-Way Coordination/Permitting

CONSULTANT shall coordinate with the Palm Beach County Land Development Division and obtain any permits required for potholing the existing main within the right-of-way of Gator Blvd. CONSULTANT shall also coordinate with the Florida Department of Transportation (FOOT) and obtain any permits required for potholing the existing main within the right-of-way of SR 80/N. Main St.

Subtask 2.3 - Geotechnical Engineering

The scope of work will involve observation of and logging of test pits that are to be excavated by CONSUL TANT's excavation contractor adjacent to the existing pipeline. During the digging process, CONSULTANT will photograph the conditions found, and enter the excavation at frequent vertical intervals to measure the density of the soils exposed and to obtain samples for laboratory testing. CONSULTANT's field representatives will also check the contact between the pipe bedding and the pipe.

Materials exposed in the excavations will be classified in accordance with the United Soil Classification System (ASTM D 2487) and appropriate geological nomenclature. Representative samples from the excavations will be transported to CONSULTANT's laboratory for testing consisting of moisture-density (i.e., Proctor) relationships and grain size distribution (sieve) analysis.

The gathered field and laboratory data will be presented in a written report signed and sealed by a registered professional engineer. The engineering report shall include a graphical log of each test pit showing subsurface material types and thicknesses, a table listing the in-place density test

results, and graphical presentations of the laboratory test results. The report shall also provide photo documentation of the work, and a written summary of the conditions found within each of the five (5) excavation locations.

Task 2 Deliverables

Final report in PDF along with two (2) signed and sealed hard copies.

Task 2 Assumptions:

- CONSUL TANT will provide all excavation including dewatering, maintenance of traffic (MOT), sod restoration, permits, etc., necessary for the geotechnical investigation.
- PBCWUD will provide copies of the pipeline record drawings, inspection reports, and density test reports during construction of the water main.

Task 3 - Recommendations

CONSULTANT will review the results of the forensic and geotechnical reports, PBCWUD's current design standards and details, and develop recommendations to improve PBCWUD's contract documents in order to help avoid future pipe failures similar to this, if possible.

Subtask 3.1 Summary Technical Memorandum

CONSULTANT shall prepare a technical memorandum summarizing the results of the forensic and geotechnical reports, potential causes of the water main failures, and make recommendations to decrease the likelihood of these types of failures in the future. These recommendations could include changes to the PBCWUD's standard details, pipeline design and installation standards, or quality control requirements.

Task 3 Deliverables

- · Draft report in PDF.
- Final report in PDF along with two (2) hard copies.

Task 4 - Project Management

Project management includes contract administration, quality assurance/quality control (QA/QC), and project meetings with PBCWUD staff.

Subtask 4.1 Contract Administration

The progress of the project will be monitored, and resources will be managed to achieve the schedule, budget, and work quality goals of the project. The CONSULTANT will coordinate with PBCWUD staff and will keep PBCWUD informed as to the status and progress of the project. Communications with PBCWUD will be conducted under this task. Invoices shall be prepared monthly.

Subtask 4.2 Quality Assurance/Quality Control (QA/QC)

The CONSULTANT will be conducting an internal QA/QC review of the deliverables for

conformance to the contract and internal program requirements. The results of these reviews will be incorporated into the deliverables prior to submission to PBCWUD for review and comment.

Subtask 4.3 Monthly Schedule Update

Submit electronic project schedule on a monthly basis. This schedule will be submitted on the first Friday of every month for the duration of the contract.

Subtask 4.4 Project Design Review and Coordination Meetings

Attend and participate in up to three (3) project meetings total with PBCWUD staff during the design phase of the project. Meetings are anticipated as follows:

- a. One (1) project kick-off meeting
- b. One (1) meeting to discuss the PBCWUD's comments on the forensic and geotechnical reports
- One (1) additional meeting to discuss the recommendations to the PBCWUD's standard details and installation requirements to avoid similar main breaks

Task 4 Deliverables

- · Provide a monthly updated project schedule in PDF.
- · Provide meeting minutes summarizing the key points of all review meetings in PDF.

SCOPE OF SERVICES ASSUMPTIONS:

- Hazardous materials Unless otherwise specifically required by this contract or through purchase orders, the CONSULTANT shall not have any responsibility for the discovery, presence, handling, removal or disposal, or exposure of persons to any hazardous or toxic substance of any form at the project site.
- 2. All excavations shall be made in public rights-of-way or in PBCWUD easements.

PBCWUD RESPONSIBILITIES:

- Designate a project representative as PBCWUD's primary contact for CONSULTANT. CONSULTANT will rely on PBCWUD's designated project representative for instructions and approval of CONSULTANT's services.
- 2. Provide existing record drawings, Geographic Information System (GIS) files, system pressures, available modeling, future projects and improvements information, and other information pertinent to the project and project schedule.
- 3. Review and provide comments on all deliverables within two (2) weeks of delivery.
- Attendance of key PBCWUD personnel to meetings as requested. It is requested to have key staff from the Engineering, Construction, and Operations & Maintenance (O&M) present at project review meetings.

DOI: 12/31/22

Ex Project No. 2301734.000

Dear Mr. Fowler:

Thank you for retaining Exponent (E^x) to assist you on the above-referenced project. We will be pleased to provide the requested analysis on an hourly rate plus expenses basis. Exponent's services are provided only in accordance with our *Terms and Conditions of Agreement*, a copy of which is enclosed and made a part hereof by reference. It is our understanding that Exponent's retention on this project is with Holtz Consulting Engineers, Inc., on behalf of Palm Beach County and, as such, all charges (i.e., fees and expenses) incurred by Exponent on this project will be billed to your office, but will be the responsibility of Palm Beach County, and/or its insurer, independent of other parties/payees involved. If invoices should be mailed to an address other than the one above, please provide that information with the signed letter. For purposes of the *Terms and Conditions of Agreement*, "client" shall mean Palm Beach County. My billing rate for 2023 is \$430 per hour.

I will review the materials you will furnish, examine the available physical evidence, review available documentary and testimonial evidence, review applicable codes, standards, and practices, and make recommendations to you as to additional research or testing I will need to do to form my opinions. The total costs are difficult to estimate in advance, however experience indicates that projects of this nature may cost approximately between \$30,000 and \$50,000. Please note this is only an estimate; should you assign us additional tasks for the benefit of your client, they will be billed as executed.

Pursuant to our *Terms and Conditions of Agreement*, it is the policy of E^x to request a retainer of \$5000 for this case. Our Federal Tax ID number is 77-0218904. The retainer does not constitute an estimate of project costs but will be held on account until E^x's final invoice is issued. At that time, you have the option of paying the invoice in full and requesting a refund of your retainer or applying the retainer against the final invoice. Any excess will be refunded.

2301734.000-9371

To ensure that you are apprised of the technical efforts expended on this project, monthly invoices and activity summaries will be provided as the tasks are executed. Our charges will include professional fees and support staff fees, at our current commercial rates (commensurate with the level of experience of the personnel assigned to the engagement), equipment usage fees and other out-of-pocket expenses. Payment of each invoice will be due upon receipt.

To avoid any appearance of a potential conflict of interest or financial interest on the part of E^x in the outcome of this project, you will agree on behalf of your client that all outstanding Exponent invoices for services rendered on this project will be paid 1) before any deposition testimony is offered in this case, and 2) before any trial testimony is offered in this case.

We have conducted a conflict-of-interest check based upon the following information supplied by you:

- Palm Beach County (Florida)
- AKA Services, Inc. (Installer. No longer in business)
- NAPCO (North American Pipe Company)
- Westlake Pipe and Fittings

Based upon this information, E^x has determined that it does not have a conflict that would preclude us from assisting you in the above-referenced matter. We look solely to you to inform us whether the parties listed above are accurate and complete. E^x will continue to rely on you to keep us informed of new parties involved in this case as this matter proceeds.

Again, thank you for consulting E^x . I look forward to working with you on this project. To confirm your receipt of this letter and your understanding of and acceptance of the terms of retention, please sign and return one copy of this letter to E^x in Miami. Because of the requirements of the Sarbanes-Oxley Act, please be advised that work on this matter cannot be undertaken by E^x prior to our receipt of the acceptance copy of this retention letter. Please call me if you have any further questions or comments about this project or our agreement concerning the terms of the retention.

Very truly yours,	Accepted by:

RE: Geotechnical Proposal for Gator Lane Utility Review

Belle Glade, Florida

TSFGeo Proposal No. 2302-064

Dear Craig:

Per your request, **TIERRA SOUTH FLORIDA**, **Inc.** (**TSFGeo**) is pleased to submit this proposal for providing geotechnical services for utility reviews along Gator Lane in Belle Glade, Florida. This proposal includes an outline of our proposed scope of work, an estimate of the total job cost, and our anticipated schedule for completion of the work.

PROJECT INFORMATION

We understand that the water main has had failures due to improper bedding. The primary objective of the review is to observe and document the soils and damages to utilities, and assist in determining the cause of the failures to potentially avoid such damages in the future.

PROPOSED SCOPE OF WORK

At this time, we anticipate five (5) sites will be evaluated. The County Utility Department will perform all work for Maintenance of Traffic, excavations, safety of excavates, removal of roadway, base, and subgrade, stockpile of materials, and replacement of the materials after the utilities are exposed and documented. The proposed work from TSFGeo <u>at each site</u> is summarized below.

- 1.) One (1) Standard Penetration Test Prior to Excavation, to 30 feet.
 - a. Lab testing of any deleterious soils encountered.
- 2.) Test Pit review of the excavation areas
 - a. Document soil layers and depths.
 - b. Photos of excavations and soils obtained.
- 3.) Compaction Testing of the backfilled materials.
 - a. Obtain Proctors samples and test
 - b. Observe compaction and complete density tests.
- 4.) Summary of observations
 - a. Written report summation of the actions.
 - b. Provide summary of possible reason for failures.

Proposed locations will be provided at a later date. It is our understanding that the field work will be performed in the daytime.

Boring locations will be located in the field by our personnel by measuring distances with a tape from known reference points. Prior to drilling at the project site, TSFGeo will notify the local utility companies and request that underground utilities be marked. Our experience, however, is that the utility companies will not mark privately owned utilities.

Our proposal assumes that private/airside utility lines will be located in the field by others prior to mobilization of the drill rig. TSFGeo will recommend a utility line locating service upon request. Borings are completed with truck-mounted equipment, and the boring locations may be performed in grassed areas. TSFGeo will endeavor to minimize impacts to grass or landscape from the truck tires. However, our fees does not include a fee to restore the grass or landscape.

A geotechnical engineer will evaluate the results of all drilling and laboratory testing. A report will be issued that contains the information noted below in Table 2.

Table 2 – Report to Include					
Technical Area	Description of Report Items				
General	 Summary of USDA Soil Information for the project area Soil Profiles Boring Location Plan Results and Summary data for Laboratory Testing Provide Engineering opinion of the case of failure. 				
Re-Construction	 Summary of soil proctor tests Density test results for re-construction of the soil layers. 				

UNIT FEE ESTIMATE

It is proposed that the fee for the performance of the services outlined above is determined on a unit price basis in accordance with the attached Fee Schedule and that the work be performed pursuant to TSFGeo's General Conditions enclosed herewith and incorporated into this proposal. On the basis of the proposed quantities, it is estimated that the total fee will be approximately as noted below.

Our estimate covers the work needed to present our findings in a formal report. Not included are reviews of foundation drawings, preparation of construction specifications, special conferences and any other work requested after submittal of our report.

Boring, sampling, and testing requirements are a function of the subsurface conditions encountered. Therefore, the estimated fee previously indicated is approximate, and compensation for the exploration will be based on the actual work and tests performed. We will endeavor to keep the exploration cost at a minimum consistent with good engineering practice.

It is proposed that the fee for the performance of the services outlined above is determined on a unit price basis in accordance with the attached Fee Schedule and that the work be performed pursuant to TSFGeo's General Conditions enclosed herewith and incorporated into this proposal. On the basis of the proposed quantities, it is estimated that the total fee will be approximately as noted below for each site:

ITEM	- UNIT	RATE QUANTITY	,	FEES 🔻
Soil Testing			ليتا	1113
Field Density Test (five [5] minimum)	per test	\$45.00	20	\$900.00
Proctors	pertest	\$120.00	2	
Limerock Bearing Ratio Test	pertest	\$400.00	1	\$400.00
Atterberg Limit Test	pertest	\$95.00	2	
Organic Content Test	per test	\$55.00	2	\$110.00
Soil Observation (On Site)	per hour	•	12	\$1,740.00
Natural Sample Moisture Content	pertest	\$25.00	5	\$125.00
Concrete & Masonry Materials	•	•	_	+
Concrete Compression Test (Min. four [4] cylinders per trip)	perset	\$160.00	2	\$320.00
Masonry Units	•	•		,
Aggregate Testing				
A. Full grain size (8 sieves)	per test	\$80.00	3	\$240.00
Asphalt Testing				
Field Explorations/Investigations				
Standard Penetration Test Borings-Truck Rig (0'-50')	per foot	\$15.00	30	\$450.00
Grout-Seal Boreholes (0'-50')	per foot	\$8.00	30	\$240.00
Casing Allowance (0'-50')	per foot	\$9.00	30	\$270.00
Mobilization of Truck-mounted drill rig to project (Min. Charge)				
A. 50-mile travel	per unit	\$450.00	1	\$450.00
Miscellaneous Service				
Personnel Classifications (Salary Costs)				
Project Manager	hour	\$274.05	1	\$274.05
Chief Engineer	hour	\$245.19	2	\$490.38
Principal Engineer	hour	\$237.99	3	\$713.97
Senior Engineer	hour	\$223.56	6	\$1,341.36
Project Engineer	hour	\$209.13	12	\$2,509.56
Sr. Engineering	hour ····	\$139.89	8	\$1,119.12
		TOTAL		\$12,123.44

Our estimate covers the work needed to present our findings in a formal report. Not included are reviews of foundation drawings, preparation of construction specifications, special conferences and any other work requested after submittal of our report.

Boring, sampling, and testing requirements are a function of the subsurface conditions encountered. Therefore, the estimated fee previously indicated is approximate, and compensation

for the exploration will be based on the actual work and tests performed. We will endeavor to keep the exploration cost at a minimum consistent with good engineering practice.

Borings are completed with truck-mounted equipment, and the boring locations will likely be in grassed areas. TSFGeo will endeavor to minimize impacts to grass or landscape from the truck tires. However, our fees does not include a fee to restore the grass or landscape.

SCHEDULE AND AUTHORIZATION

TSFGeo will proceed with the work after receipt of a signed copy of this proposal. With our present schedule, we can commence work within several days of project approval (weather permitting) and fieldwork is expected to take 2 to 3 days to complete, weather permitting. The written report can generally be submitted within two weeks after completion of the field exploration, depending on the extent of the laboratory-testing program. Verbal preliminary recommendations can be made to appropriate parties prior to submittal of the written report.

We at TSFGeo appreciate the opportunity to submit this proposal and look forward to working with you on this project. If you should have any questions concerning our proposal, please contact our office.

TSFGeo's General Conditions

- SCOPE OF WORK: Work means the specific geotechnical, analytical, testing or other service to be performed by Tierra South Florida, Inc. (TSFGeo) as set forth in TSFGeo's proposal, Client's acceptance of the scope of work and these General Conditions. Additional work ordered by Client shall also be subject to these General Conditions. TSFGeo shall have no duty or obligation to any third party greater than that set forth in TSFGeo's proposal, Client's acceptance of TSFGeo's proposal, Client's acceptance of TSFGeo's proposal and these General Conditions. The ordering of work from TSFGeo, or the reliance on any of TSFGeo's work, shall represent acceptance of the terms of 178FGeo's proposal, client's acceptance of TSFGeo's proposal and these General Conditions. The ordering of work from TSFGeo, or the reliance on any of TSFGeo's work, shall represent acceptance of the terms of 178FGeo's proposal, client's acceptance of TSFGeo's proposal and these General Conditions. The ordering of work from TSFGeo, or the reliance on any of TSFGeo's work, shall represent acceptance of the terms of 178FGeo's proposal, client's acceptance of TSFGeo's proposal and these General Conditions. The ordering of work from TSFGeo, or the reliance on any of TSFGeo's work, shall represent acceptance of the terms of 178FGeo's proposal and these General Conditions. The ordering of work from TSFGeo, or the reliance on any of TSFGeo's proposal and these General Conditions, regardless of the terms of 178FGeo's proposal, client's acceptance of TSFGeo's proposal and these General Conditions, regardless of the terms of 178FGeo's proposal, client's special conditions. The ordering of work from TSFGeo, or the reliance on any of TSFGeo's proposal, client's conditions the terms of any substance and the conditions to the proposal conditions to the conditions to the terms of 178FGeo's proposal and these General Conditions. The ordering of the ordering of the proposal conditions to the proposal conditions on the proposal conditions on the proposal conditions

- 5.
- 6.

- 10.
 - OF PAYMENT -Payment is due within 30 days of date of invoice. Payments not made when due shall bear interest at eighteen (18) percent annum or at the maximum rate allowed by law from the date of the initial same is paid.

 If the Client fails to make any payment due to TSFGeo for service and/or expenses within 60 days of date of invoice, TSFGeo may, after giving seven days' written notice to Client, suspend services until all outstanding amounts have been paid to TSFGeo in full. Further, TSFGeo may, in addition to withholding services, or singularly, withhold reports, plans and other documents not paid in full by the Client. In the event that final payment for completed work is not made, TSFGeo shall request that all copyrighted documents which were submitted to client be returned and all information used in project plans be removed from project documents.

 In the event it is necessary to take legal action to effect collection, whether or not litigation is commenced, the Client agrees to reimburse TSFGeo for expenses in connection with any claims or suits, including reasonable attorney's fees, including but not limited to the trial and anneliate levels
- reasonable attorney's fees, including but not limited to the trial and appellate levels.

 10.3. This contract shall be governed by the laws of the State of Florida.

 CONSTRUCTION REVIEW TSFGeo cannot accept responsibility for any design work unless the work includes services for construction review to determine whether or not the work performed is in substantial compliance with TSFGeo's conclusions and recommendations. 11.
- companded with 15PGe03 condustons and recommendations.

 INDEMNIFICATION -TSFGeo agrees to hold harmless and indemnify Client from and against liability arising out of TSFGeo's negligent performance of the work. Client agrees to indemnify and hold TSFGeo harmless from all liability including all costs, attorney's fees and expenses of defense for any claims by any other person or corporation which may arise out of the performance or breach of this contract for which TSFGeo was not solely negligent. 12.
- TSFGeo was not solely negligent.

 LIMITATION OF LIABILITY-The Client/Owner agrees to limit TSFGeo's liability for negligent professional acts, errors or omissions, such that the total aggregate liability of TSFGeo shall not exceed \$50,000 or the total fee for the services rendered on this project, whichever is greater. The Owner further agrees to require the contractor and his subcontractors a similar limitation of liability suffered by the contractor or the subcontractors arising from TSFGeo's negligent professional acts, errors or omissions.

 13.1. If Client prefers to have higher limits on professional liability, TSFGeo agrees to increase the limits up to a maximum of \$1,000,000 upon Client's written request at the time of accepting our proposal provided that Client agrees to pay an additional consideration of 5 percent of our total fee. The additional charge for the higher liability limits is because of the greater risk assumed and is not strictly a charge for additional professional liability insurance.

 INSURANCE-TSFGeo represents that it and its agents, staff and consultants employed by it are protected by Worker's Compensation insurance and Employer's Liability Insurance in conformance with applicable state laws. TSFGeo has such coverage under public liability and property damage insurance policies that TSFGeo deems to be adequate. A Certificate of Insurance can be supplied evidencing such coverage upon request. 13.
- 14.
- request.

 14.1. Within the limits and conditions of such insurance, TSFGeo agrees to indemnify and save client harmless from and against any loss, damage or liability arising from any negligent acts by TSFGeo, its agents, staff and consultants employed by it. TSFGeo shall not be responsible for any loss, damage or liability beyond the amounts, limits and considerations of such insurance. TSFGeo shall not be responsible for any loss, damage or liability arising from any acts by clients, its agents, staff and other consultants employed by it.

 14.2. Cost of the above coverage is included in our quoted fees. If additional coverage or increased limits of liability are required, TSFGeo will endeavor to obtain the requested insurance and charge separately for costs associated with additional coverage or increased limits.

 TERMINATION -This agreement may be terminated by either party upon seven days written notice in the event of substantial failure by the other party to perform in accordance with the terms thereof. Such termination shall not be effective if the substantial failure has been remedied before expiration of the period specified in the written notice. In the event of termination, TSFGeo shall be paid for services performed to the termination notice date plus reasonable termination expenses. 15. tion notice date plus reasonable termination expenses.
- 15.1. In the event of termination or suspension for more than three months, prior to completion of all reports contemplated by this Agreement, TSFGeo may complete a report on the services performed to the date of notice of termination or suspension. The expenses of termination or suspension shall include all direct costs for TSFGeo in completing such analyses, records and reports.

 CLIENT'S OBLIGATION TO NOTIFY TSFGeo Client represents and warrants that it has advised TSFGeo fany known or suspected hazardous materials or conditions, utility lines and pollutants at any site at which TSFGeo is to do work hereunder, and unless TSFGeo has assumed in writing the responsibility of locating subsurface objects, structures, lines or conduits, Client agrees to defend, indemnify and save TSFGeo harmless from all claims, suits, losses, costs and expenses, including reasonable attorney's fees as a result of personal injury, death or property damage occurring with respect to TSFGeo's performance of its work and resulting to or caused by contact with subsurface or latent objects, structures, lines or conduits where the actual or potential presence and location thereof were not revealed to TSFGeo by Client.

 HAZARDOUS MATERIALS -This agreement shall not be interpreted as requiring TSFGeo to assume the status of an owner, operator, generator, storer, transporter, treater or disposal facility as those terms appear within RCRA or within any Federal or State statute or regulation governing the generation, treatment storage and disposal of follutants. 16.
