AGENDA ITEM SUMMARY

Meeting Date: February 6, 2024 Consent [X] Regular []
Public Hearing []

Department: Water Utilities Department

I. EXECUTIVE BRIEF

Motion and Title: Staff recommends motion to approve: Work Order (WO) No. 5 to the 2022 Pipeline Continuing Construction Contract (Continuing Contract) with Hinterland Group Inc., (Contractor) for the Critical Facilities and Single Feed Community Improvements Phase 1 (Project) in the amount of \$1,439,489.45.

Summary: On May 16, 2023, the Board of County Commissioners approved the Palm Beach County Water Utilities Department (PBCWUD) Continuing Contract (R2023-0676) with Contractor. WO No. 5 provides for the installation of approximately 8,200 linear feet of 12-inch water main along 110th Avenue North, from the M Canal to Orange Boulevard which provides a redundant water main to minimize the risk of service interruption.

The Contract was procured under the requirements of the Equal Business Opportunity Ordinance. On September 8, 2022, the Goal Setting Committee applied an Affirmative Procurement Initiative of a minimum mandatory 20% Small Business Enterprise (SBE) subcontracting participation of which 5% shall be among certified African American and/or Hispanic American owned firms. The Contract provides for 20.96% SBE participation, which includes 5.85% MBE participation, 5.85% MBE (H). WO No. 5 includes 22.55% SBE participation, which includes 0% MBE participation, 0% MBE (H). The cumulative SBE participation including WO No. 5, is 14.70% SBE, which includes 1.49% MBE participation, 1.49% MBE (H). Contractor is a Palm Beach County based company. The Project is included in the PBCWUD FY24 budget. (PBCWUD Project No. 21-041) District 6 (MWJ)

Background and Justification: The proposed main will connect to the existing 12-inch water main on Maywood Crest Drive at the south end of the Bayhill community, will continue south along 110th Avenue North, and will connect to an existing 12-inch water main along the north side of the M Canal. PBCWUD identified the Bayhill residential community and adjacent area is being served by a single water main and lacks adequate isolation valves. The Project includes the installation of a redundant water main and isolation valves to reduce emergency repair costs, and minimize the risk of service interruptions to the area. The Project is needed to increase the efficiency, effectiveness, and reliability of the water distribution system and to help reduce the operation and maintenance workload and associated costs.
