

PALM BEACH COUNTY
BOARD OF COUNTY COMMISSIONERS

AGENDA ITEM SUMMARY

Meeting Date: August 19, 2025 [X] Consent [] Regular
Department: Palm Tran [] Ordinance [] Public Hearing

I. EXECUTIVE BRIEF

Motion and Title: Staff recommends motion to approve a Maintenance Memorandum of Agreement (MMOA) for Bus Shelters and Associated Amenities between the Florida Department of Transportation (FDOT) and Palm Beach County (County), by and through its Board of County Commissioners (BCC), regarding maintenance and upkeep of the bus shelters constructed under FDOT Project Number 438386-1-52-01.

Summary: The FDOT State Road (SR) 5/US 1 from Palmetto Park Road to SR 850/Northlake Boulevard Public Transportation Shelters Project 438386-1-52-01 (Project) will improve the experience of transit riders by constructing bus shelters that will make taking transit safer, more convenient, and easier to access. Bus shelters will be located at various locations along US 1(both northbound and southbound) at the Northwood District, Gregory Road, Lantana Road, Linton Boulevard, Spanish River Boulevard, and NE 20th Street. These shelters will include elevated bus shelter platforms to improve safety and access for riders with disabilities, lighting to improve safety and comfort for riders, real-time bus arrival information for riders' convenience, bike racks for cyclists who wish to take transit, and covered seating to protect riders from the elements. The financial obligation for this MMOA is covered by Palm Tran's Contract for Bus Stop Maintenance Services with Chandler & Cambelle Investment Group, LLC, R2024-1285. Accordingly, this MMOA will be of no cost to the County.

This MMOA requires broader indemnification by the County than that approved by PPM CW-F-049. The MMOA requires the County and its employees, representatives, agents, consultants, sub-consultants, contractors, and/or sub-contractors to indemnify, defend, and hold harmless FDOT and all of its officers, agents, and employees from any claim, loss, damage, cost, charge, or expense arising out of the County's intentional and/or negligent acts or occurrences, omissions or commissions. The indemnification obligation must also be passed on to consultants, sub consultants, contractors and/or subcontractors. The Risk Management Department and County Attorney's Office have reviewed the indemnification requirements of this grant and advised staff accordingly. Given that liability is limited to the County's intentional and/or negligent acts or omissions related to this MMOA, and the statutory caps of Section 768.28, Florida Statutes, staff recommends BCC approval. Countywide (MM)

Background and Justification: This Project was prioritized in the Palm Beach Transportation Planning Agency's (TPA) fiscal year 23-27 Transportation Improvement Program (TIP) to enhance transit shelters within the existing right of way. The TIP is the five (5) year funding program for transportation projects covering all modes of travel in the County. The TIP identifies transportation improvements funded by federal, state, and local sources.

Safe, Responsive, and Customer-Focused Maintenance and Cleaning of Bus Stops

Chandler Campbell & Daschle has proudly served Palm Tran as your premier bus stop maintenance service provider since 2020. We have collaborated closely with the Palm Tran team to obtain all necessary signage and maps for each bus stop. By identifying high ridership areas, we created a tailored schedule for trash pick-up and maintenance.

We pinpointed locations that require more frequent pressure washing and developed a schedule to perform this work outside of normal business hours, ensuring pedestrian safety. Additionally, we implemented a service detail tracker, providing real-time and historical data for each bus stop serviced.

Our fleet of branded Chandler Campbell & Daschle vehicles are strategically stationed across the county, allowing us to promptly respond to dispatches and work orders. We have established multiple communication channels, enabling the Palm Tran team to connect with our admin staff and drivers seamlessly, whether through phone, email, or text message, accommodating various preferences and schedules. Internally, we maintain a group chat for our drivers and maintenance team, equipped with tracking capabilities in all vehicles. This system allows us to dispatch vehicles efficiently, ensuring timely resolution of work orders requested by Palm Tran.

To ensure we meet our job duties, we work with reliable vendors to secure all necessary supplies, including vehicles for county-wide travel, trash disposal locations, maintenance supplies, and equipment for installations. Our vehicles are equipped with inverters for power tools, racks, and toolboxes to securely transport and store our equipment.

At Chandler & Campbell, we pride ourselves on delivering world-class services. Regardless of the contract size, we believe in dedicating a project manager and providing a level of service that exceeds expectations. Our dedicated administrative team supports not only the Palm Tran team but also our maintenance technicians in the field.

We make it a priority to acknowledge all emails and work orders from the Palm Tran team promptly. To ensure transparency and accountability, we provide detailed proof of performance photos that are date and time-stamped, including the coordinates of each bus stop. Our goal is to provide before and after photos so Palm Tran can clearly see the state of each stop before and after our work.

By implementing a stringent coding system, we guarantee that photos are never reused and always accurate. As your eyes in the field, it is our responsibility to maintain transparency and ensure the highest standards of service at all times.

Strategic Project Execution: Our Approach and Methodology

As the current service provider, Chandler Campbell & Daschle is well-acquainted with the specific needs and requirements of Palm Tran regarding the Bus Stop Maintenance Services Program. Palm Tran, the public transportation provider for Palm Beach County, operates a mid-sized transit system with roughly 150 fixed-route buses serving 31 routes and facilitating over 20,000 fixed-route trips daily. This service covers a county with a population of approximately 1.5 million residents, including over 2,900 bus stops across nearly 40 municipalities. Additionally, Palm Tran offers demand response services through Palm Tran Connection, highlighting the critical role of maintaining a dependable and well-maintained transit system.

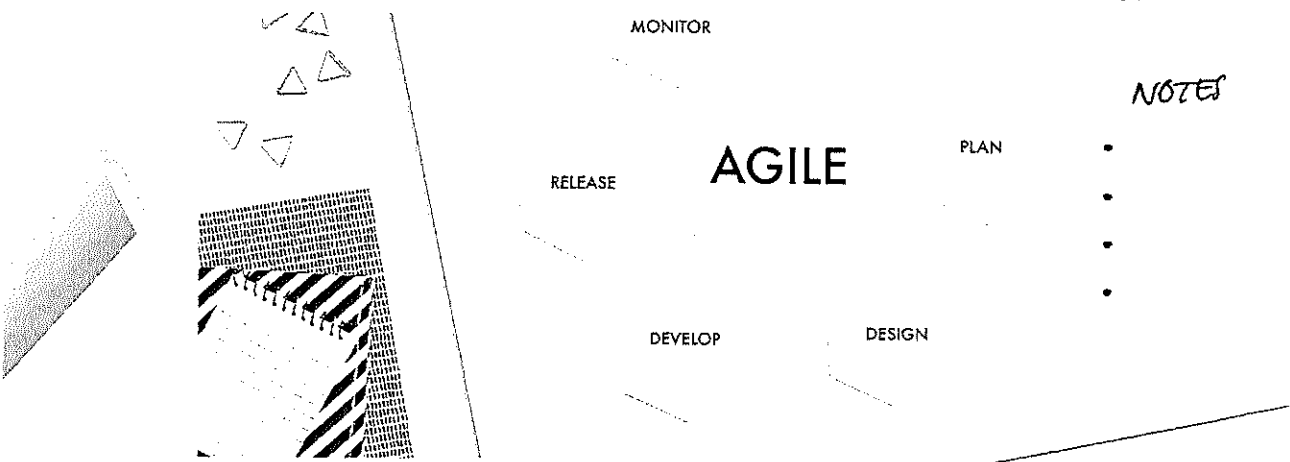

We understand that the Palm Tran's operations are managed from three main facilities: Palm Tran North in West Palm Beach, Palm Tran South in Delray Beach, and Palm Tran West in Belle Glade. Our familiarity with the distribution and operational specifics of these facilities enables us to effectively customize our maintenance services to meet the distinct needs of each location.

The primary objective of this project is to ensure that Palm Tran bus stops are consistently clean, attractive, and safe. Chandler Campbell & Daschle is committed to continuing our role by providing exceptional maintenance services on an as-needed basis, upholding the highest standards of cleanliness and safety across all specified bus stops.

It should be noted that Palm Tran has existing maintenance contracts covering about 40% of its bus stops, which include those with advertising shelters and benches. These specific locations are not within the scope of this RFP. Our focus will be on maintaining the remaining bus stops listed in Attachment A, with the understanding that the number and status of these stops may change as they have in the past. We are ready to adjust our services as needed to align with Palm Tran's evolving requirements.

In essence, our strategy for the Bus Stop Maintenance Services Program is based on our thorough understanding of Palm Tran's operational needs and our unwavering commitment to delivering high-quality service. We are dedicated to ensuring that Palm Tran bus stops are kept in excellent condition, providing a safe and pleasant experience for all users of the transit system.

Strategic Project Execution: Our Approach and Methodology

Our approach is centered on providing client-based solutions by maintaining open communication channels and consistent contact to meet your specific needs. With multiple vehicles stationed throughout the county, we are well-equipped to manage scheduled trash pick-ups and disposals, as well as to respond promptly to emergency situations as they arise.

We have a proven track record of handling additional services beyond the normal scope of work. This includes shelter repairs caused by wreckage and other damages, as well as pressure washing shelters that have been occupied by the homeless population. In such cases, we follow a strict protocol by contacting our Palm Tran representative to arrange for a team to assist in relocating individuals from the shelter, allowing us to clean and restore it to good condition.

Our versatility also extends to providing clean-up services at Palm Tran North to assist with facility maintenance. Our client-focused service is designed to be adaptable and responsive, allowing us to quickly address needs that fall outside the typical scope of work. For any additional services required, we provide detailed estimates and only proceed with the work once we receive approval from Palm Tran.

We pride ourselves on being a reliable partner, dedicated to maintaining and enhancing our partnership with Palm Tran. Our comprehensive capabilities ensure that we can consistently deliver high-quality service and support, meeting and exceeding the expectations of our clients.

Essential Resources for Delivering Exceptional Palm Tran Services

Having partnered with you for many years, we are fully equipped with the necessary tools and resources to perform our role effectively. Our well-equipped vehicles carry essential tools, and we maintain a storage facility for our consumables, along with secured locations for trash disposal. For pressure washing, we utilize the water source at the Palm Tran facility (with Palm Tran's approval) and park our maintenance vehicles there as well.

The necessary poles, Simme seats, and signage for repairs and installations are provided directly by Palm Tran. Most screws and bolts required are successfully procured by CCD. In emergencies or when specific tools are unavailable, the Palm Tran team has graciously allowed us to use their tools to complete the necessary work.

All CCD maintenance staff are badged by Palm Tran, allowing them to access authorized locations seamlessly and prevent any disruptions to Palm Tran operations. Additionally, we promptly pick up signage notices from Palm Tran as needed to ensure timely execution of changes, which can occur rapidly.

Our strong partnership with Palm Tran has enabled us to work seamlessly together, providing world-class service to the Palm Beach community. This collaborative effort ensures that we can meet all maintenance needs efficiently and effectively.

Implementation Timeline for Bus Stop Maintenance Services Contract

1 Contract Award and Initial Planning

- Upon contract award, we will immediately schedule an initial planning meeting with Palm Tran to finalize staffing requirements and commence the recruitment process for additional staff if needed. As the incumbent, we already have tenured staff in place who are well-versed in the required duties. We will conduct a thorough assessment of the routes and update the high-ridership lists to ensure we are in sync with Palm Tran's needs.

Following the initial planning, we will conduct site assessments of all bus stops to document current conditions, develop detailed cleaning and maintenance schedules, and coordinate with Palm Tran to ensure access to necessary resources and facilities. We will then implement the full-scale maintenance program, monitoring progress, addressing any issues, and conducting quality assurance checks to ensure everything is on track.

Regular maintenance and cleaning activities will continue, with ongoing analysis of performance data and feedback to identify areas for improvement. We will provide monthly performance reports to Palm Tran and periodically review and update maintenance schedules and strategies to ensure alignment with Palm Tran's needs. This structured approach ensures a smooth transition and effective implementation of the Bus Stop Maintenance Services contract, emphasizing continuous improvement and client satisfaction.

2 Staff Augmentation and Training

- We will evaluate the current staff and hire additional resources if necessary to meet the contract requirements. During this period, we will review all on-site consumables and ensure we are equipped with all the necessary tools to perform work without interruption. All current and new employees will receive refresher courses in driver and safety training before the new contract begins. Any newly hired employees will obtain a Palm Tran badge for site access to collect materials and pick up items as needed.

3 Site Assessments and Preparations

Although we are the incumbent, we will treat this as a new contract, assessing all stops and reviewing the contractual requirements to prepare a current scope of work and handouts for employees to ensure they are equipped to perform as required by the new contract guidelines

We will conduct site assessments of all bus stops to document current conditions and develop detailed cleaning and maintenance schedules based on these assessments. Coordination with Palm Tran will be essential to finalize schedules and ensure access to necessary resources and facilities. This structured approach will ensure a smooth transition and effective implementation of the Bus Stop Maintenance Services contract, emphasizing continuous improvement and client satisfaction.

4 Initial Deployment

Begin the initial deployment of maintenance teams to high-priority bus stops, conduct maintenance and cleaning at these locations while collecting data and feedback, evaluate the performance and make necessary adjustments, and then finalize and distribute the comprehensive maintenance schedule to all staff. Provide feedback to Palm Tran on necessary maintenance issues and identify potential stops that could be categorized as high-ridership or require more frequent maintenance services

We will begin the full-scale implementation of the maintenance program across all designated bus stops, monitoring progress and addressing any issues to ensure adherence to schedules. Additionally, we will conduct quality assurance checks and collect feedback from Palm Tran to maintain high standards of service.

5 Ongoing Operations and Optimization

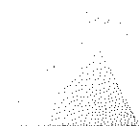

We will maintain regular maintenance and cleaning activities, analyze performance data and feedback to identify areas for improvement, and implement optimization strategies to enhance efficiency and effectiveness.

6 Completion of Services

Upon completing our maintenance and cleaning services, Chandler Campbelle & Daschle will ensure all bus stops are left in optimal condition, meeting the highest standards of cleanliness and functionality. We will conduct a final quality assurance check to verify that all tasks have been performed to the specifications outlined in the contract. Any outstanding issues or additional maintenance needs identified during this final inspection will be promptly addressed.

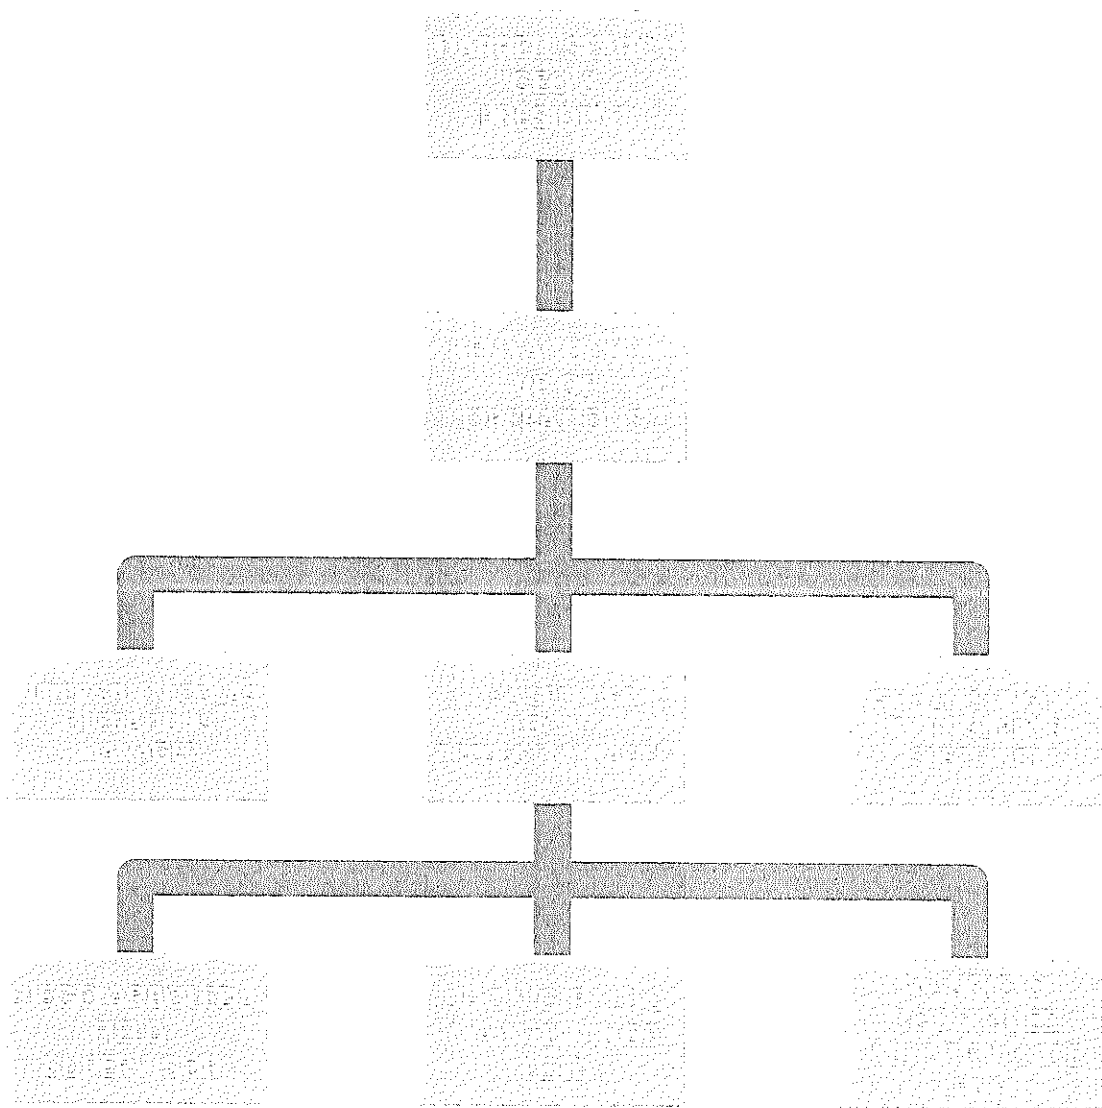

We will compile a comprehensive report detailing the services performed, including proof of performance photos and any relevant data collected throughout the project. This report will be submitted to Palm Tran for review and feedback. Additionally, we will ensure that all Palm Tran equipment and badges are returned to the necessary personnel at the end of the contract.

If the contract is placed back up for bid and we are not the successful award recipient, we will assist the new contractor with anything needed to ensure their success. Our goal is not just to be a good partner, but also to uphold our commitment to the county by providing world-class service and supporting the success of other small business owners.

A.2. Approximately 294 additional emergency calls for pickups

Q.4. Can the government provide the routes map?

A.4. Yes

<https://palm-tran.maps.arcgis.com/apps/webappviewer/index.html?id=b1c8363bfe6044a9bbd7a96f01923098>

Q.5. Page 5, Section 1.6 states the contract start date is September 2nd with four (4) twelve (12) month renewal options. However, on page 78, Article 3, it states the contract starts on September 1st with two (2) twelve (12) month renewal options. Can the County confirm which statement is correct?

A.5. The contract start date is September 2, 2024 with four (4) twelve (12) month renewal options.

Q.6. Page 19, Section 3.1 - Experience/Qualification/Background/Reference Information, specifically sections 3.1.1 and 3.1.2, mentions safe, responsive, and customer-focused maintenance and cleaning of bus stops. Can the government confirm the statement made during the brief Zoom meeting on 6/13 that proven experience in providing safe, responsive, and customer-focused maintenance and cleaning in outdoor/indoor areas will be more relevant than specific locations such as bus stops due to the shortage of customers with bus stops in the county?

A.6. Proposer should respond to the requirements specified in Section 3.1

Q.7. Page 26, Section 4.4.2 - Can the government/county clarify the statement regarding potential work tasks: "Remove and/or reinstall bus stop poles"? To what extent does this apply?

A.7. As specified.

Q.8. Page 26, Section 4.4.3 - Can the government clarify what type of precautions are required to protect personal and property injuries?

A.8. Ensure safety precautions are in place to avoid injuries to transit riders. (Ex. Cones, barricades, flags, etc.)

Q.9. Page 26, Section 4.4.4 - Can the government/county clarify and provide examples of when and under which circumstances the contractor shall provide traffic control to ensure public safety?

A.9. Maintenance Activities: Traffic control is required whenever maintenance activities are performed on or near roadways.

Q.10. Page 26, Section 4.4.7 - Will new bus shelters or benches without contractual services in place be requested as additional services with an addendum to the current contract?

A.10. No

Q.11. Page 31, Section 4.8.1 - Can the government/county specify the perimeter of the surrounding areas to be pressure washed or provide a measurement in feet/square feet?

A.11. Affected areas within 15ft will require pressure cleaning.

Q.12. Appendix A - Price Proposal Page: Can the government clarify what is meant by (1+2) on the TOTAL FIRM FIXED ANNUAL PRICE?

A.12. (1) The total prices for all services (2) Pressure cleaning services (1+2) should equal the total annual price.

Q.13. Attachment A - Can the government clarify what the information/numbers under the columns "OFF" and "ONS" mean?

A.13. "OFF" = Disembarkment, "ON"= Boarding the bus

Q.14. Is there a way to get the stops on a map? I have them number and information listed on the document but it's really hard to find which ones we are talking about.

A.14. <https://palm-tran.maps.arcgis.com/apps/webappviewer/index.html?id=b1c8363bfe6044a9bbd7a96f01923098>

Q.15. Is it possible to find out how much trash is removed (I'm not sure if it's weight or cubic foot) each year or if that's not possible, how many containers are on the route?

A.15. Can't provide an estimate of tonnage of trash. Approximately 1200 trash containers

Q.16. This may be too late, but I mentioned it as I was leaving and I was told I should send it in this email. On the charge for dumping the trash. We will pay premium price. Of course we pass that on in the bid. But we are using county dump sites. This means the county is paying premium pay to use their own sites. (I may be wrong about this) If the winner of the bid were given a discounted rate or no charge at county facilities, that seems like a more efficient and cost effective way for the county and the contractor.

A.16. Proposer should respond to the solicitation requirements.

Q.17. Can I get a copy of the winning bus stop bid from two years ago?

A.17. Request sent to Public Records Request on 06/17/2024

C. Questions received from Faithworks Total Ground Maintenance, LLC and the County's responses:

Q.1. What is the proposed budget for this project?

A.1. \$230,000.00 Annually

Q.2. What is the current average monthly invoice amount for this project?

A.2. \$13,259.03 monthly

Q.3. Can you provide a schedule detailing the number of times a request for landscaping was issued over the last year?

A.4. Approximately 10 times monthly (120 Total)

Q.5. Can you provide a schedule detailing the number of pressure cleanings performed on **each** location in the last year?

A.5. High Ridership Stops -Twice yearly or as needed

Q.6. Can you provide a schedule detailing the number of times trash pickup was performed for each location over last year?

A.6. In addition to contract requirements an additional 294 pickups

Q.7. Can you provide the square footage for each location?

A.7. Unknown

Q.8. Can you provide a list of areas deemed as high usage stops?

A.8. The 100 high ridership stops are throughout Palm Beach County. A list will be provided to the awarded vendor.

Q.9. If using a local SBE as a subcontractor, will local preference points be given even if prime is not local?

A.9. The SBE Preference has precedence over the Local Preference. In instances where both Preferences apply, the SBE Preference shall be used.

Q.10. What is the expected turnaround time for graffiti removal after the request is made?

A.10. As soon as possible; within an agreed upon timeframe.

Q.11. Can you provide a schedule detailing the number of times a request for graffiti removal was issued over the last year?

A.11. Approximately 12 incidents

Q.12. If using a local SBE for supplies as opposed to labor, can that count towards the local SBE requirement and point allocations?

A.12. The Affirmative Procurement Initiative (API) placed on the solicitation is SBE Evaluation Preference for SBE Participation, which is not mandatory. Yes a supplier can count towards the SBE participation at 60% of the value of the supply. The company that has the highest SBE participation on their team will be awarded the 15 points and all other companies will be awarded points based on a sliding scale.

Q.13. In Attachment A - List of bus stops locations, what does "offs" and "ons" mean?

A.13. "OFF"=Disembarkments, "ON"= Boarding the bus

Q.15. What reporting database is currently being used apart from Excel by the current contractor?

A.15. Unknown

Q.16. If the reporting database tool of choice is provided by the contractor, are there any restrictions or preferences provided by the County?

A.16. None

Q.17. Approximately how much manpower/number of laborers does the current contractor use to fulfill the obligations of this contract?

A.17. Proposer should determine number of laborers based on the solicitation requirements.

Q.18. How far in advance of the start date of the contract will the County Project Manager provide the established schedule for twice weekly trash pick-up & high ridership bus stops that require 3-4 times per week? (refer to Section 4.6.2)

A.18. All stops require trash pick-up minimum of twice weekly. High ridership routes will be provided once the contract is awarded.

Q.19. How far in advance will pressure washing requests be given by the County & how much time is allotted for the contractor to service all requested stops? (Ex: 2-weeks to service how many stops?)

A.19. Schedules will be provided for monthly pressure cleaning services/stops.

Q.20. The termination without cause is listed as 10 days. Since this is such an extensive contract, is there an opportunity to give the contractor more time - like 30 days?

A.20. Not at this time.

Q.21. Is there a maximum number of subcontractors that can be used for this contract?

A.21. The decision of how many subcontractors a prime commits to participate in the contract is solely their discretion. However, please note for each subcontractor being utilized, the appropriate correlating OEBO records (Schedule 1 & 2) must be submitted with the proposal. In addition, if the proposer is awarded the contract, their commitment of SBE participation is considered a part of the contract terms

D. Questions received from UG2 and the County's responses:

Q.1. What is the annual cost of the current contract?

A.1. The current contract annual cost is \$159,108.36

Q.2. Can you post a copy of the current proposal?

Q.3. Who is the current provider?

A.3. The current provider is Chandler & Campbell Investment Group

Q.4. The current due date is July 10th & the selection committee is meeting on July 19th. Given that timeline can an extension to the due date be granted?

A.4. Unfortunately, the current contract expires 9/1/2024 and Palm Tran is unable to extend.

Q.5. Can you provide the average number of poles that are replaced annually?

A.5. Approximately 120 yearly

Q.6. Please confirm the # of service days for the heavily used bus stops (Approximately 150 bus stops) is 3 times per week or 4 times per week?

A.6. Varies, minimum of three times per week
