I. EXECUTIVE BRIEF

Motion and Title: Staff recommends motion to approve:

(A) Change Order No. 7 to Amendment No. 9 to the Contract for Construction Manager (CM) at Risk Services (Contract) (R2019-0042) with The Morganti Group, Inc. (MGI) for CM at Risk Services for the Terminal Roof Improvements Project (Project) at Palm Beach International Airport (PBI) in the amount of $1,087,928.77, extending the project duration by 204 calendar days; and

(B) a Budget Transfer of $1,087,929 in the Airport's Improvement and Development Fund, which also includes a transfer from reserves in the amount of $1,087,929 to provide budget for the MGI Contract.

Summary: The Project was approved on February 7, 2023 (R2023-0214) in the amount of $8,422,400 with a project duration of 459 calendar days. Change Order No. 1 through Change Order No. 6 increased the project amount by $4,996,354.26, extended the project duration by 398 calendar days, and provided for additional work needed to eliminate water intrusion, mitigate condensation, and replace water-damaged materials, including ductwork and insulation. A detailed contract history is included in Attachment 1. Approval of Change Order No. 7 increases the project amount by $1,087,928.77 for a total project amount of $14,506,683.03 and extends the project duration by 204 calendar days for a total project duration of 1,061 calendar days. Change Order No. 7 provides for the application of a new waterproofing system to the elevator and stair towers. Water intrusion is continuing to occur despite previous applications of traditional sealants. It was determined that the application of a new waterproofing system is required to eliminate the continued water intrusion in the PBI terminal from the towers. A Disadvantaged Business Enterprise (DBE) goal of 12% was established for the Contract. The DBE participation for Change Order No. 7 is 0.00%. The DBE participation for this Project to date is 11.2%. The DBE participation for the Contract to date is 15.79%. **Countywide (AH)**

Background and Policy Issues: The PBI terminal has been experiencing water intrusion from various sources. The Project includes replacement of the existing terminal roof membrane and portions of existing concrete composite roof deck with a new roof system, replacement of the expansion joints, and modifications to the existing mechanical and electrical equipment impacted by the roof replacement. During the course of construction, significant penetrations in the building envelope were discovered, requiring repair to prevent further water damage to the interior building systems.
