The traffic signals are designed to respond to this warning by adjusting the signal color display and stop traffic from traversing the road where the crossing gates are coming down. The railroad operators need to install smart and accurate detection systems that would close the railroad crossings only when and for the duration of the train passing at the specified location. 11/28/2023	<b><u>Directed staff of the County Attorney and Legislative Affairs to research using Impact Fee interest dollars outside of the zones where the dollars were collected.</u></b> Seek legislative changes.	Workshop	Weiss	Bonlarron	Coffman, Denise	<p>Staff researched this item and included the information in the attached document. Upon review, it was determined that both Florida Statute and ULDC prohibited this kind of transfer between zones.</p> <p>The County Attorney's office determined that the County cannot legally transfer interest gained from a trust fund designated for one benefit zone to subsidize impact fee costs for affordable housing in another benefit zone.</p> <p>Benefit zones and their respective trust funds are established under Section A.8 of Article 13 of the ULDC. The stated purpose of the trust funds is to ensure that all expenditures of impact fees sufficiently benefit new development in the benefit zone from which the impact fees were collected. Section A.9 of Article 13, which authorizes trust funds to be invested in interest bearing sources, specifies that the same limitations that apply to the use of impact fees also apply to the use of the interest gained from their investment; providing that, the income derived from a benefit zone trust fund shall be applied to that same trust fund.</p> <p>The County's limitations on the use of interest derived from impact fee trust funds conforms with Florida Statute, and prevailing AGO opinions and supporting case law on the matter. Section 219.075(1)(b), Florida Statutes, provides that the interest on invested public funds pending distribution shall be reasonably apportioned and allocated and shall be credited to the account of, and paid to, the office or distributee, together with the principal on which such earnings accrued. Citing this statute and supporting case law, the Attorney General's Office, in AGO 94-39, opined that interest that accumulates on invested impact fees may be used to replace fees not collected due to waivers or deferrals for low income housing, as long as such interest is used for the purpose for which the specific fund is created. See Contractors &amp; Builders Ass'n of Pinellas Cnty. v. City of Dunedin, 329 So. 2d 314 (Fla. 1976) (where contractors challenged the legality of a municipal ordinance authorizing impact fees for water and sewer connections, the Staff has begun identifying estimated dates that directives will be completed as of 12/4/23</p>	In Process	08/29/2024
