BOARD OF COUNTY COMMISSIONERS
AGENDA ITEM SUMMARY**

Department: Engineering & Public Works
Submitted For: Traffic Division

I. EXECUTIVE BRIEF

Motion and Title: Staff recommends motion to approve: Work Order G-2 in the not to exceed amount of \$1,426,422.80 to the Traffic Signal Continuing Services Construction Contract (Contract) dated August 19, 2025 (R2025-1042), with Gerelco Traffic Controls, Inc. (Gerelco) to upgrade the traffic signal from spanwire to mast arm at the intersection of Hypoluxo Road and Military Trail, Palm Beach County (County) Intersection ID Number 41650 (Project).

Summary: Approval of this Work Order will allow Gerelco to construct the Project. Per County PPM CW-F-050, this Work Order exceeds the threshold relating to staff approvals of Work Orders to annual contracts, thus requiring approval from the Board of County Commissioners (BCC). Prior to and including this Work Order, \$1,444,269.80 of the Gerelco not to exceed contract amount of \$10,000,000 have been spent or encumbered. On August 19, 2025, the BCC approved the Contract with Gerelco to provide for and install various signal components for traffic control devices. The Contract was presented to the Goal Setting Committee (GSC) on November 20, 2024, and the GSC established an Affirmative Procurement Initiative (API) of a Small Business Enterprise (SBE) Price Preference. To date, the overall SBE participation achieved on the Contract is 20%. Gerelco has an office located in the County. **This Project is funded by the infrastructure sales tax. District 2 (YBH)**

Background and Justification: The County requests Gerelco construct the Project in accordance with the Work Order. The construction cost is not to exceed \$1,426,422.80, including a contingency of \$129,674.80. The Engineering and Public Works Department recommends BCC approval.

NOTES [Notes Date 11-01-16 & 07-01-13]:

- If an entry appears in column FA, a shorter arm is required. This is obtained by removing length from the arm tip and the arm length shortened from FA to FA, SAA Similar.
- If an entry appears in column UAA, a shorter pole is required. This is obtained by removing length from the pole tip and the pole height shortened from UA to UAA.
- Work this sheet with the Signal Designer's "Mast Arm Tabulation". See "Mast Arm Tabulation" for special instructions that include non-standard Handhole location, paint color, terminal compartment requirement, and pedestrian features.
- Work with Indexes 649-030 and 649-031.
- DESIGN WIND SPEED = 170 MPH

GEOTECHNICAL NOTES:

- The contractor shall anticipate difficult drilled shaft installation due to the presence of loose to very loose sand, or compacted fill, or any combination of these layers. The presence of difficult soil conditions may occur at varying depths below the ground.
- The contractor shall anticipate potential cave-in of the sandy soils, and difficult/impossible conditions to retain bentonite/polymer slurry inside the drilled holes.
- All costs for labor, materials, equipment and incidentals necessary to mitigate difficult drilled shaft foundation installation shall be incidental to the pay item of the structure for which the drilled shaft foundation is required.

FOUNDATION NOTES [Notes Date 01-01-12]:

- Design based on borings taken 11/08/2021 sealed by Harmon Bennett, P.E. with Tierra South Florida.
- Assumptions and values used in design:
Soil Type = SP
Soil Layer Thickness = ≥15 ft.
Soil Friction Angle = 29 deg.
Soil Weight = 42.6pcf
Design Water Table is 5-7 ft. below surface
