HEALTH AND HUMAN SERVICES ELEMENT

I. INTRODUCTION

The Health and Human Services Element is an optional Element under Rule 9J-5, F.A.C. Palm Beach County decided in 1989 to create this optional Element in recognition of the importance of managing the County's responsibilities of providing health and human services. This Element complies with the requirements of Rule 9J-5 F.A.C. for optional Elements.

A. Purpose

The purpose of the Health and Human Services Element is to assist in the development of an infrastructure to ensure availability of health and human services sufficient to protect the health, safety and welfare of Palm Beach County residents. The Element identifies the County's role in funding, providing and/or supporting the delivery of health and human services; it also defines the County's relationship with other funders and providers of services for the purpose of maximizing the resources and benefits available to Palm Beach County residents.

System of Care

The Health and Human Services Element has been organized around a System of Care. A System of Care is defined as a comprehensive spectrum of behavioral health, social services, medical services and other necessary services organized into a coordinated network to meet the multiple, complex and changing needs of children, adults and seniors.

The System of Care encompasses the scope and delivery of services. The core values of the System of Care are: (1) the service delivery system is driven by the needs of the clients; (2) the services are community based, and delivered in the least restrictive environment; and (3) the services are culturally competent.

The System of Care includes the provision of a full array of services provided to meet the needs of the individual client. The client and other interested parties are included in the development of the service delivery system and collaborative systems. Finally, the System of Care provides early identification and intervention programs and services, and, advocacy for programs and services to meet the needs of children, adults and seniors.

B. Assessment and Conclusions

History

The Health and Human Services Element was adopted in 1989 and substantially revised in 1997 as a result of the Evaluation and Appraisal Report (EAR) and Comprehensive Plan mandates. Additional modifications to the Element were made in 1998, 1999, and 2000 based on the findings and issues contained within the EAR.

Goals, Objectives & Policies

The Citizens Advisory Committee on Health & Human Services (CAC), Plan Development Implementation Committee and Department of Community Services Staff organized Goals within the Element to reflect the following core values: 1) prevention, 2) self-sufficiency and

economic stability, 3) sustainable systems of care, 4) integration and coordination of services and funding, 5) quality and cost-effectiveness, 6) demonstration of quality through measurable outcomes; and, 7) responsiveness to diversity in Palm Beach County.

Goals within the Element express the “vision” for health and human services while the Objectives express the “tactics” of how the vision will be accomplished. Evaluation measures that provide the means to assess progress toward the Goal, as well as provide input into planning cycles were developed. The evaluation measures addressed: data sources, data collection methods, frequency of reporting, and analysis (output vs. outcome).

Policies were drafted to ensure that Goals were attainable. Policies are the actions that specify what steps Palm Beach County Departments/Divisions will take to implement the Objectives - other agencies and organizations outside the jurisdiction of the County were only cited if there was a commitment by the agency to be held accountable for that action.

The CAC recognizes that Policies (actions) are time limited. They (Policies) comprise the Implementation Plan.
