   In the Commercial Pod and Civic Pod of a PUD, Camouflage Towers 60 feet in height or less may be approved by the DRO.

   e. Lot Size – MUPD
   A Camouflage Tower may be located in MUPD with CH or CL FLU designation with a minimum of five acres, provided the tower complies with all applicable regulations.

   f. Associated Uses in RT, RS, and RM Zoning Districts and Commercial or Civic Pod of a PUD
   Camouflage Towers shall be permitted only in association with the following uses: Assembly Institutional Nonprofit; Place of Worship; College or University; Electric Generating Facility, excluding electrical transmission line streets as provided herein; Government Services; Passive Park; Public Park; Golf Course; Schools; Solid Waste Transfer Station; Minor Utility; Electric Distribution Substations; or Water or Wastewater Treatment Plant; commercial, office or industrial development.

   g. Additional Submission Requirements
   Applications for approval to install a Camouflage Tower shall include the following information:
   1. A colorized illustration or representation of the proposed tower.
   2. The height, diameter, and coloration of the proposed facility.
   3. A statement of compatibility to indicate the nature and character of the surrounding area, and how the proposed facility will be consistent with the overall characteristics of the area.

   h. Public Parks Five Acres or Greater
   The minimum separation between any existing residential structure, and Camouflage Towers located in public parks five acres or greater shall be 125 percent of tower height. In addition, the tower shall be set back a distance of at least 75 percent of tower height from any property line adjacent to an existing residential use or vacant residential parcel or 20 percent of the tower height from any adjacent non-residential zoning district or public R-O-W.

3. Monopole Tower
   a. Definition
   A structure that consists of a single pole supported by a permanent foundation.

   b. Lot Size – MUPD
   A Monopole Tower may only be located in an MUPD with CH or CL FLU designation with a minimum of five acres, provided the tower complies with all applicable regulations.

   c. Increase in Height
   The height of a Monopole Tower may be increased as provided herein.
1) **Percentage of Increase**
   The height of a proposed Monopole Tower may be increased by 20 percent, one time only, without regard to required separation or setback requirements, for all applications which provide proof of the collocation of an additional personal wireless service provider. Additional increases are subject to setbacks and separations of this Code.

2) **Proof of Collocation**
   Proof of collocation shall be provided in a form acceptable to the County Attorney and the Zoning Director. Proof of collocation shall include an executed contract or lease providing for use of the facility for a period of at least ten years.

4. **Self-Support/Lattice Tower**
   a. **Definition**
      A structure that is constructed without guy wires or ground anchors.

5. **Guyed Tower**
   a. **Definition**
      A structure that is supported either partially or completely by guy wires and ground anchors.
   b. **Lot Size – MUPD**
      A Guyed Tower may only be located in an MUPD with a CH or CL FLU designation with a minimum of five acres, provided the Tower complies with all applicable regulations.
   c. **Setbacks**
      Breakpoint calculations may be provided to demonstrate a tower will collapse within the minimum required zoning district setbacks. Breakpoint calculations shall be certified by a professional engineer, licensed in the State of Florida.
   d. **Anchors**
      Peripheral supports and guy anchors may be located within required setbacks provided they shall be located entirely within the boundaries of the property on which the communication tower is located. Peripheral supports and guy anchors shall be located at least ten feet from all property lines.

D. **Collocation in Streets**
   1. **Electrical Transmission Lines and Substations**
      Antennas and other wireless equipment may be attached to existing or modified Transmission Poles or utility structures within an Electric Distribution or Electric Transmission Substation, subject to the following: [Ord. 2017-016]
      a. **Stealth Electrical Communication Structures and Poles**
         1) **Definition**
            A Transmission Pole, or structure within an Electric Distribution Substation or Electric Transmission Substation, supporting collocated wireless attachments, which is not readily identifiable as a tower. Stealth structures are limited to canister-type antenna design. [Ord. 2017-016]
      b. **Full Array Electrical Communication Structures and Poles**
         1) **Definition**
            A Transmission Pole, or structure within an Electric Distribution Substation or Electric Transmission Substation, supporting collocated wireless attachments, which are visible and readily identifiable as a commercial communication tower. [Ord. 2017-016]
      c. **Typical Structures**
         Typical structures include Transmission Poles within utility transmission corridors or substations, or other similar electrical transmission infrastructure located within substations such as lighting masts or backup transformer connection poles. [Ord. 2017-016]
d. Modifications to Transmission Poles or Utility Structures

Height increases to Transmission Poles and other Substation structures may be allowed to accommodate antenna attachments. Modified replacement poles or utility structures may be permitted to the extent required to meet structural or Building Code requirements due to increased wind load from height increases or attachments, provided that modifications generally appear to be of a similar dimensions and appearance to existing or adjacent poles or structures. [Ord. 2017-016]

1) Application Requirements

Applications for Stealth or Full Array Electrical Transmission Poles or Utility Structures shall include a detailed analysis and supporting documentation establishing the original dimensions, including height or any other structural characteristics that the proposed modifications are based on. [Ord. 2017-016]

2) Determination of Original Pole or Structure Dimensions

The final determination of the original dimensions specified in an application shall be decided by the DRO in consultation with the Building Official, or the Building Official where Permitted by Right. [Ord. 2017-016]

e. Approval Process

Exceptions to the approval processes for modification to Electric Transmission Poles or Utility Structures specified in Table 4.B.9.A, Commercial Communication Towers Matrix, Stealth Transmission Poles or Utility Structures, may be allowed as follows: [Ord. 2017-016]

1) Stealth

a) Subject to DRO Approval

May be Permitted by Right provided the increase in height is either: [Ord. 2017-016]
(1) less than 35 percent, or [Ord. 2017-016]
(2) 50 percent and the Tower is located a minimum of 2,500 feet from a Public Street or parcel with a residential FLU designation or use. [Ord. 2017-016]
b) Subject to Class A or Class B Conditional Use Approval
May be allowed subject to DRO approval provided the increase in height is either:
(1) less than 35 percent, or [Ord. 2017-016]
(2) 50 percent and the Tower is located a minimum of 2,500 feet from a Public Street or parcel with a residential FLU designation or use. [Ord. 2017-016]

2) Full Array Urban
a) Subject to DRO Approval
May be Permitted by Right where allowed in agricultural, commercial, industrial, or institutional zoning districts, provided the increase in height is: [Ord. 2017-016]
(1) less than 35 percent, and [Ord. 2017-016]
(2) the Tower is located a minimum of 2,500 feet from any Public Street, or parcel with a residential FLU designation or use. [Ord. 2017-016]

b) Subject to Class A or Class B Conditional Use Approval
May be allowed subject to DRO approval, where allowed in agricultural, commercial, industrial, or institutional zoning districts, provided the increase in height is either: [Ord. 2017-016]
(1) less than 35 percent, or [Ord. 2017-016]
(2) 50 percent and the Tower is located a minimum of 2,500 feet from any Public Street, or parcel with a residential FLU designation or use. [Ord. 2017-016]

c) Residential Districts including Residential Pod of PUD
May be allowed to be collocated within a Transmission or Distribution Substation subject to Class A Conditional Use approval. [Ord. 2017-016]

3) Full Array Rural
a) Subject to DRO Approval
May be Permitted by Right where allowed in agricultural, commercial, industrial, or institutional zoning districts, subject to the following; [Ord. 2017-016]
(1) the increase in height is less than 50 percent, and [Ord. 2017-016]
(2) located a minimum of: [Ord. 2017-016]
   (a) 2,500 feet from any Public Street; [Ord. 2017-016]
   (b) one mile from any Arterial or Collector; and, [Ord. 2017-016]
   (c) parcel with a residential FLU designation or use. [Ord. 2017-016]

b) Subject to Class A or Class B Conditional Use Approval
May be allowed subject to DRO approval, where allowed in agricultural, commercial, industrial, or institutional zoning districts, provided the increase in height is less than 50 percent, and the Tower is located a minimum of 2,500 feet from any Public Street, and one mile from any Arterial or Collector or parcel with a residential FLU designation or use. [Ord. 2017-016]

f. Exceptions to Separation and Setback Requirements
The following exceptions may be allowed from the minimum separation or setbacks established in Art. 4.B.9.B.2, Separation and Setbacks: [Ord. 2017-016]
1) General Exceptions
   a) Stealth
      Modifications to Stealth Transmission Poles or Electric Distribution or Electric Transmission Substation utility structures that do not exceed 35 percent of the height of the original Pole or structure. [Ord. 2017-016]
   
   b) R-O-W with Collocated Minor Utility on Adjacent Parcel
      Setbacks from adjacent parcels that are included in the Development Order for the purposes of providing for a supporting Collocated Minor Utility (excluding separations from residential or occupied buildings). [Ord. 2017-016]
   
   c) Adjacent Properties with Bona Fide Agriculture Uses
      Parcels with an agricultural FLU designation and zoning district, supporting Bona Fide Agriculture, provided that separation distances from occupied structures are a minimum of 150 percent of the Tower height. [Ord. 2017-016]

2) Towers Located on Residential Parcels
Measurement may exclude Open Space areas designated on an approved Plan for non-residential uses such as water management tracks or landscape buffers, but excluding any common areas located within 50 feet of a Recreation Amenity or public or civic use such as...
Day Cares, Schools, or Places of Assembly, including any outdoor recreation areas. [Ord. 2017-016]

g. Other Attachments or Structures
Additional wireless support attachments or structures other than that permitted at the top of the structure or pole, may be allowed subject to the following: [Ord. 2017-016]

1) Transmission Corridors
   a) Attachments
      Attachments must be concealed within the pole or structure. External attachments such as, electrical or mechanical boxes or backpacks, excluding a utility meter, electrical cabling, platforms, or other similar modifications shall be prohibited, unless allowed otherwise herein. [Ord. 2017-016]
   b) Equipment Boxes
      Equipment boxes may be allowed within an Arterial or Planned Collector Street, subject to approval by the County Engineer. [Ord. 2017-016]
   c) Equipment Shelters
      Equipment shelters supporting collocated cellular equipment placed on Electrical Transmission Lines, may be allowed to be located on an adjacent parcel, subject to compliance with the following: [Ord. 2017-016]
      (1) Minor Utility
         May be allowed in accordance with the districts, approval process and any other development standards for a Minor Utility. [Ord. 2017-016]
      (2) Developed Parcels
         Where a Minor Utility is collocated with another use, the Minor Utility shall be prohibited within the front or side street yard, unless abutting a perimeter buffer. In either scenario, the Minor Utility shall not adversely impact interior site design or function, including but not limited: to pedestrian or vehicular circulation, landscaping, or commonly recognized CPTED standards. [Ord. 2017-016]

h. FDO Requirements
Prior to the issuance of a Building Permit, the Applicant shall supply a letter from FDO demonstrating no anticipated impact to the usual and customary transmission or reception operability of public safety communication systems. This letter shall be based upon information supplied to FDO by the Applicant identifying the latitudinal and longitudinal coordinates of the proposed wireless communication equipment, the proposed RF spectrum of operations, and any further technical information deemed necessary by FDO in order to render a technical conclusion. Any costs incurred by FDO for an independent third party to provide technical assistance in rendering a conclusion, as determined by FDO in its sole and absolute discretion and authorized in advance by the Applicant, shall be the responsibility of the Applicant regardless of permit issuance, failure to obtain a permit, or withdrawal. [Ord. 2017-016]

2. Florida Department of Transportation (FDOT) Streets
Within the streets for I-95 and the Florida Turnpike owned or controlled by the FDOT, towers, or antennas are subject to the following:
   a. Installation of Antennas
      Antennas may be attached to existing communication towers, light standards, or other structures or facilities subject only to Building Permit Review.
   b. Construction of New Towers
      New towers constructed within streets shall comply with the following requirements:
      1) Towers installed in those portions of streets immediately adjacent to any property possessing a residential designation shall be:
         a) Located in a street at least 250 feet in width;
         b) Only a Monopole or Self-Support/Lattice Tower;
         c) No more than 150 feet in height;
         d) Set back a minimum of 150 feet from the nearest property line; and,
         e) Require review as provided in Table 4.B.9.A, Commercial Communication Towers Matrix.
      2) Towers installed in those portions of streets immediately adjacent to any property possessing a non-residential designation shall be:
         a) Located in a street at least 200 feet in width;
         b) Only a Monopole or Self-Support/Lattice Tower;
         c) No more than 200 feet in height;
d) Set back a minimum of 75 feet from the nearest non-residential property line and 150 feet from any residential property line; and,

c. Separation of New Towers
New towers shall be subject to the separation distances as provided in Table 4.B.9.B, Distance between Towers.

E. Eligible Facilities Request for Modification
This Subsection implements Subsection 6409(a) of the Middle Class Tax Relief and Job Creation Act of 2012 (“Spectrum Act”), as interpreted by the Federal Communications Commission’s (“FCC” or “Commission”) Acceleration of Broadband Deployment Report & Order, which requires a state or local government to approve any Eligible Facilities Request for a modification of an existing tower or base station that does not result in a substantial change to the physical dimensions of such tower or base station.

1. Definitions
For the purposes of this Subsection, the terms used have the following meaning:

a. Base Station
A structure or equipment at a fixed location that enables FCC-licensed or authorized wireless communications between user equipment and a communications network. The term does not encompass a tower as defined herein or any equipment associated with a tower. Base Station includes, without limitation:
1) Equipment associated with wireless communications services such as private, broadcast, and public safety services.
2) Radio transceivers, antennas, coaxial or fiber-optic cable, regular and backup power supplies, and comparable equipment, regardless of technological configuration (including Distributed Antenna Systems (“DAS”) and small-cell networks).
3) Any structure other than a tower that, at the time the relevant application is filed under this Subsection, supports or houses equipment described in paragraphs a.1) and a.2) that has been reviewed and approved under the applicable zoning process, or under another state or local regulatory review process, even if the structure was not built for the sole or primary purpose of providing that support.
The term Base Station does not include any structure that, at the time the relevant application is filed under this Subsection, does not support or house equipment described in a.1) and a.2) of this Subsection.

b. Collocation
The mounting or installation of transmission equipment on an eligible support structure for the purpose of transmitting and/or receiving radio frequency signals for communications purposes.

c. Eligible Facilities Request
Any request for modification of an existing tower or base station that does not substantially change the physical dimensions of such tower or base station, involving:
1) Collocation of new transmission equipment;
2) Removal of transmission equipment; or,
3) Replacement of transmission equipment.

d. Eligible support structure
Any tower or base station as defined in this Subsection, provided that it is existing at the time the relevant application is filed under this Subsection.

e. Existing
A constructed tower or base station is existing for purposes of this Subsection if it has been reviewed and approved under the applicable zoning process, or under another state or local regulatory review process, provided that a tower that has not been reviewed and approved because it was not subject to a zoning review process when it was built, but was lawfully constructed, is existing for purposes of this Subsection.

f. Site
For towers other than towers in the public rights-of-way, the current boundaries of the leased or owned property surrounding the tower and any access or utility easements currently related to the site, and, for other eligible support structures, further restricted to that area in proximity to the structure and to other transmission equipment already deployed on the ground.

g. Substantial Change
A modification substantially changes the physical dimensions of an eligible support structure if it meets any of the following criteria:
1) For towers other than towers in the public rights-of-way, it increases the height of the tower by more than ten percent or by the height of one additional antenna array with separation from the nearest existing antenna not to exceed 20 feet, whichever is greater; for other eligible support structures, it increases the height of the structure by more than ten percent or more than ten feet, whichever is greater;

2) For towers other than towers in the public rights-of-way, it involves adding an appurtenance to the body of the tower that would protrude from the edge of the tower more than 20 feet, or more than the width of the Tower structure at the level of the appurtenance, whichever is greater; for other eligible support structures, it involves adding an appurtenance to the body of the structure that would protrude from the edge of the structure by more than six feet;

3) For any eligible support structure, it involves installation of more than the standard number of new equipment cabinets for the technology involved, but not to exceed four cabinets; or, for towers in the public rights-of-way and base stations, it involves installation of any new equipment cabinets on the ground if there are no pre-existing ground cabinets associated with the structure, or else involves installation of ground cabinets that are more than ten percent larger in height or overall volume than any other ground cabinets associated with the structure;

4) It entails any excavation or deployment outside the current site;

5) It would defeat the concealment elements of the eligible support structure; or,

6) It does not comply with conditions associated with the siting approval of the construction or modification of the eligible support structure or base station equipment; provided, however, that this limitation does not apply to any modification that is non-compliant only in a manner that would not exceed the thresholds identified in paragraphs b.1) through b.4) of this Subsection.

h. Transmission Equipment

Equipment that facilitates transmission for any FCC-licensed or authorized wireless communication service, including, but not limited to, radio transceivers, antennas, coaxial or fiber-optic cable, and regular and backup power supply. The term includes equipment associated with wireless communications services including, but not limited to, private, broadcast, and public safety services.

i. Tower

Any structure built for the sole or primary purpose of supporting any FCC-licensed or authorized antennas and their associated facilities, including structures that are constructed for wireless communications services including, but not limited to, private, broadcast, and public safety services.

2. Application Procedures

Notwithstanding any other provisions in this Section to the contrary, eligible facilities requests for a modification of an existing tower or base station that does not result in a substantial change to the physical dimensions of such tower or base station as determined by the process set forth herein, shall be subject to Building Permit Review only.

a. Application requirements.

Applications shall include all information necessary to determine whether the modification of the existing tower or base station that does not substantially change its physical dimensions.

b. Timeframe for Review

Within 60 days of the date on which an Applicant submits an application, the Zoning Division shall approve the application unless it determines that the application is not covered by this Subsection.

c. Tolling of the Timeframe for Review

The 60-day review period begins to run when the application is filed, and may be tolled only by mutual agreement by the Zoning Division and the Applicant, or in cases where the Zoning Division determines that the application is incomplete. The timeframe for review is not tolled by a moratorium on the review of applications.

1) To toll the timeframe for incompleteness, the Zoning Division must provide written notice to the Applicant within 30 days of receipt of the application, specifically delineating all missing documents or information required.

2) The timeframe for review begins running again when the Applicant makes a supplemental submission in response to the notice of incompleteness.
3) Following a supplemental submission, the Applicant will be notified within ten days that the supplemental submission did not provide the information identified in the original notice delineating missing information. The timeframe is tolled in the case of second or subsequent notices. Second or subsequent notices of incompleteness may not specify missing documents or information that was not delineated in the original notice of incompleteness.

d. Failure to Act
In the event the Zoning Division fails to approve or deny a request seeking approval under this Subsection within the timeframe for review (accounting for any tolling), the request shall be deemed granted, and the Applicant may proceed directly to Building Permit Review. The deemed grant does not become effective until the Applicant notifies the applicable reviewing authority in writing after the review period has expired (accounting for any tolling) that the application has been deemed granted.

F. Review Procedures Shared Use Application Requirements for New Towers
Prior to submittal of an application for approval of a proposed tower for Conditional Use, Development Order Amendment, DRO, or Building Permit Review, all Applicants for communication towers shall comply with the procedures indicated below. An application for the appropriate review process must be submitted within one year of the notice mailing date.

1. Notification
All communication tower Applicants shall provide notice by certified mail to all users on the Communication Tower Users List. The following information shall be included in the notice: description of the proposed tower; general location; longitude and latitude; general rate structure for leasing space, which shall be based on reasonable local charges; proposed height; a phone number to locate the Applicant or agent for the communication tower; and, a shared use application form. A copy of the notice shall be mailed to the Communications Division and the Zoning Division. The notices shall invite potential communication tower users to apply for space on the proposed tower to encourage collocation.

2. Shared Use Application
Potential communication tower users shall respond to the notice within 20 days of receipt of certified mailing. Response shall be submitted utilizing a shared use application form. A completed shared use application form shall be sent to the owner of the proposed communication tower or authorized agent. The tower Applicant shall not be responsible for a lack of response or responses received after the 20-day period. The Zoning Division shall provide the shared use application form.

3. Feasibility
The feasibility of each shared use request shall be evaluated by the Applicant. The evaluation shall document the feasibility of shared use between the proposed communication tower owner and a potential lessee or sharer. Factors to be considered when evaluating the feasibility of shared use include but are not limited to: structural capacity; RF interference; geographic service area requirements; mechanical or electrical incompatibilities; inability or ability to locate equipment on approved and unbuilt communication towers; cost (if fees and costs for sharing would exceed the cost of the new communication tower amortized over a 25-year period); FCC limitations that would preclude shared use; and, other applicable Code requirements.

4. Rejection or Dispute
If the Applicant rejects one or more request(s) for shared use and if potential tower lessees dispute the rejection(s) for shared use, the following procedure shall occur within ten working days after the shared use response deadline.

a. Submittal
The Applicant shall submit two copies of the following to the Zoning Division: a brief evaluation of each rejected response; all design data for the proposed communication tower; and, an explanation indicating the structural improvements necessary to facilitate the requests that are rejected due to structural limitations, paid for by the tower space lessee.

b. Consultant
The Zoning Division shall forward copies of all applications for shared use and the Applicant's evaluation of each rejected request to a qualified communications consultant. The consultant shall be selected by and retained at the discretion of the Zoning Division and paid by Applicant who is refusing to allow collocation from an interested service provider.

c. Evaluation
Within ten working days of receiving the shared use responses that were rejected by the Applicant and disputed by the potential tower space lessee, the consultant shall review and prepare an evaluation. Two copies of the consultant's evaluations shall be sent to the Zoning Division. One
copy of the evaluation shall be made an official part of the communication tower application and one copy of the evaluation shall be forwarded to the Applicant by the Zoning Division. The consultant's report shall be advisory, and made part of the staff report, and considered in reviewing the communication tower application.

5. **Acceptance with No Dispute**
   If the Applicant did not reject any requests for shared use or if rejected requests for tower space are not disputed by any potential tower lessee(s), consultant review is not necessary.

G. **Tower Removal, Replacement and Height Increases**

1. **Tower Removal**
   a. **Form of Agreement**
      All obsolete or abandoned communication towers shall be removed within three months following cessation of use. Prior to the issuance of a Building Permit or Site Plan approval, whichever occurs first, the Property Owners or tower operators shall submit an executed removal agreement to ensure compliance with this requirement. The removal agreement shall be in a form acceptable to the County Attorney.
   b. **Surety for Removal**
      Prior to the issuance of a Building Permit, surety shall be submitted by the Property Owner or tower operator to ensure the removal of abandoned communication towers. The form of surety shall be subject to approval by the Executive Director of PZB and the County Attorney. The required surety shall be irrevocable, unless released by the BCC. The surety shall be utilized to cover the cost of removal and disposal of abandoned towers and shall consist of the following:
      1) submittal of an estimate from a certified structural engineer indicating the cost to remove and dispose of the tower;
      2) a surety equivalent to 50 percent of the estimated cost to remove and dispose of the tower;
      3) an agreement to pool multiple sureties of the tower owner or Property Owner to allow pooled surety to be used to remove abandoned towers; and,
      4) an agreement by the tower owner or Property Owner to replenish surety pool upon utilization of surety by PBC.
   c. **Alternative Surety for Removal**
      The Zoning Director, subject to review by the County Attorney, may accept documentation from a tower owner that adequate resources or irrevocable contractual obligations are available to remove obsolete or abandoned communication towers.
   d. **Form of Surety**
      Surety shall be provided in a form consistent with the requirements of Art. 11.B.2.A.6.c, Performance or Surety Bond.
   e. **Surety Required**
      Surety required shall be provided only for towers constructed after the effective date of this Code.

2. **Replacement**

   The following tower hierarchy shall be used to determining impact:

   **LEAST IMPACT**
   - Camouflage
   - Stealth
   - Monopole
   - Self-Support/Lattice
   - Guyed

   **MOST IMPACT**

   a. **Conforming Towers**
      An existing conforming tower may be replaced subject to the criteria below. If the criteria are not met, the replacement tower shall comply with the requirements of Tower Height Increases and Accessory Structures, below.
      1) The tower shall accommodate a minimum of two providers.
      2) The tower shall be of the same or lesser impact than the existing structure pursuant to the tower hierarchy.
      3) The tower may be required to be relocated on site to lessen the impact on adjacent parcels.
      4) The tower shall be subject to review by the Zoning Division through the DRO, Art. 2.C.5.C, Administrative Modifications to Prior DOs, Administrative Amendment process.
      5) The tower may be structurally modified to allow collocation.
b. Non-Conforming Towers
An existing non-conforming tower may be replaced subject to the criteria below. If the criteria are not met, the replacement shall comply with the requirements of Tower Height Increases and Accessory Structures, below.
1) The tower shall accommodate a minimum of two providers.
2) The tower shall be of equal or less impact than the existing structure pursuant to the tower hierarchy.
3) The tower may be required to be relocated on site to lessen the impact on adjacent parcels.
4) The tower shall be subject to review by the DRO.
5) The tower may be structurally modified to allow collocation.

3. Tower Height Increases

a. Conforming and Non-Conforming Towers
Unless otherwise provided herein, the height of a conforming or non-conforming tower may be increased on one occasion subject to the requirements of Table 4.B.9.F, Tower Height Increases.

<table>

Notes:
1. Increases of 25 feet or less.
2. Increases greater than 25 feet and 45 feet or less.
3. Increases greater than 45 feet and 65 feet or less.
4. Increases greater than 65 feet.

b. Monopoles
Unless otherwise provided herein, the height of an existing Monopole may be increased, on one occasion, by a maximum of 20 percent to accommodate a second user subject to standard Building Permit Review. An additional increase of up to 20 percent may be approved to accommodate an additional user, subject to standard Building Permit Review. Increases shall be based upon the original approved tower height.

c. Setbacks
If it is determined that the proposed tower cannot meet setback requirements due to increases in tower height to accommodate the collocation of at least one additional service provider, minimum setback requirements may be reduced by a maximum of 15 feet, except from residential property lines.

4. Accessory Structures
The size of an accessory structure or structures may be increased to accommodate collocation. The expansion shall be subject to Zoning Division review through the DRO Administrative Amendment process.

H. Exemptions and Waivers

1. States of Emergency
The PZB Executive Director may waive the review timeframes in the event of a declared State of Emergency.

2. Government Towers
If the regulations in the Commercial Communication Towers prohibit a Government-Owned Tower from being located at a specific site and the tower is required to protect the public health, safety, or welfare, the applicable criteria may be waived or modified by the BCC. In such cases the BCC shall make a finding of fact justifying the modification.

3. School Sites
Towers located on school sites and utilized for educational purposes only pursuant to F.S. § 1013.18 shall not be considered Commercial Communication Towers.

4. Exemptions for Existing Television Broadcast Towers
Guyed Towers existing as of December 31, 1997 with a principal use as a television broadcasting tower shall be exempt from the provisions of this Section as provided below.
a. **Separation and Setback Distances**

b. **Distance between Towers**

   Television towers as provided herein shall be exempt from the distance between tower requirements of **Table 4.B.9.B, Distance between Towers**.

c. **Visual Impact Analysis**

   Existing or replacement television towers as provided herein shall be exempt from the visual impact analysis requirements of **Art. 4.B.9.I.4, Visual Impact Analysis Standards**.

d. **Replacement or Reconstruction of Existing Towers**

   Television towers exempted by the operation of this Subsection may be replaced or reconstructed on the same parcel as provided below.

1) **Approval**

   Television towers to be replaced or reconstructed shall be reviewed as provided in **Table 4.B.9.A, Commercial Communication Towers Matrix**.

2) **Tower Height**

   The height of a replacement or reconstruction of an existing tower may be increased subject to approval as provided in **Table 4.B.9.A, Commercial Communication Towers Matrix**.

3) **Required Setbacks from Property Lines**

   Setbacks from property lines shall be provided as indicated below.

   a) **Structures of Equal or Lesser Height**

      Television towers to be replaced or reconstructed with a structure of equal or lesser height shall provide a setback substantially the same as the existing setbacks, taking into account the continued location of the tower being replaced during construction.

   b) **Structures of Greater Height**

      Television towers to be replaced or reconstructed with a structure of greater height shall provide a minimum setback of 110 percent of tower height from any adjacent street and a minimum setback of 100 percent of tower height from all adjacent property lines.

   c) **Breakpoint Calculations**

      All setbacks shall be substantiated by certified breakpoint calculations. The breakpoint calculations shall demonstrate that should tower failure occur the entire height of the tower shall fall within with property lines of the tower site.

   d) **Non-Conformity Not Created**

      Replacement or reconstruction of a television broadcast tower shall not result in creation of a non-conforming structure or non-conforming use. The television broadcast tower resulting from the replacement or reconstruction as provided herein shall be deemed a conforming structure and use.

5. **Type 2 Waiver from Required Dimensional Criteria**

   A Type 2 Waiver from the separation, setback, distance between towers, height, and similar dimensional criteria applicable to communication towers may be allowed.

   a. **Towers Approved as a Class A or Class B Conditional Use**

      The dimensional criteria may be reduced by the BCC for Class A Conditional Uses and Class B Conditional Uses subject to the criteria contained herein.

   b. **Towers Approved on an Administrative Basis**

      The dimensional criteria may be reduced by the BCC for towers subject to review by the DRO or the Building Permit process subject to the criteria contained herein.

   c. **Requests for a Type 2 Waiver**

      When considering a request to allow a Type 2 Waiver from one or more required dimensional criteria, the BCC must determine that: the request complies with the intent of this Section; and the request is consistent with the criteria listed below.

   d. **Criteria for Granting a Type 2 Waiver**

      The following criteria shall be utilized by the BCC when considering requests for Waivers. Each request for a Waiver must be consistent with the following criteria listed below: **Art. 4.B.9.H.5.d.1-8**. In addition, each request for a Type 2 Waiver must be consistent with one or more of the following criteria: **Art. 4.B.9.H.5.d.9-18**.

      1) **Protection of Public Welfare**
The Waiver, if approved, will not be injurious to the uses in the area adjacent to the structure and otherwise will not be detrimental to the public welfare.

2) **Economics**
The Waiver is not granted based solely upon or in large measure due to costs associated with complying with all requirements contained herein.

3) **Incompatibility Not Created**
The Waiver, if granted, will not result in an incompatibility between the proposed tower or communication facility and adjacent uses.

4) **Exhaustion of Other Remedies**
The Waiver, subject to documentation provided by the Applicant, is necessary within the defined search or propagation study area as all other Waiver alternatives have been exhausted. Alternatives to a Waiver shall include but not be limited to such techniques as collocation, use of Stealth or Camouflage structures, and use of building-mounted equipment and facilities.

5) **Minimum Waiver**
Grant of the Waiver is the minimum Waiver that will make possible the reasonable use of the parcel of land, building, or structure.

6) **Consistent with the Plan**
Grant of the Waiver will be consistent with the purposes, goals, objectives and policies of the Plan and this Code.

7) **Not Detrimental**
The grant of the Waiver will not be injurious to the area involved or otherwise detrimental to the public welfare.

8) **Prohibition of Service**
The Waiver, subject to documentation provided by the Applicant, is necessary within the defined search or propagation study area so as not to prohibit the provision of personal wireless, television, and related communication services as defined by the Telecommunications Act of 1996 and rules of the FCC, if adopted.

9) **FAA Limitations**
The Waiver is required to comply with locational standards established by the FAA.

10) **Lack of Technical Capacity**
The Waiver, subject to documentation provided by the Applicant, is necessary within the defined search or propagation study area as existing towers or other structures do not possess the capacity to allow reasonable technical service.

11) **Height of Existing Structures**
The Waiver, subject to documentation provided by the Applicant, is necessary within the defined search or propagation study area as existing towers or other structures are not of sufficient height to provide reasonable service.

12) **Lack of Structural Capacity**
The Waiver, subject to documentation provided by the Applicant, is necessary within the defined search or propagation study area as existing towers or structures do not have the structural capacity to accommodate the equipment needed to provide reasonable service within the defined search or propagation study area.

13) **Interference**
The Waiver, subject to documentation provided by the Applicant, is necessary within the defined search or propagation study area due to interference that may be caused resulting from such factors as collocation on existing towers or structures, the nature of other communications equipment or signals, or other technical problems that would result in interference between providers.

14) **Unreasonable Costs**
The Waiver, subject to documentation provided by the Applicant, is necessary within the defined search or propagation study area as the fees, costs, or contractual provisions to collocate on or adapt an existing tower or structure for collocation are unreasonable.

15) **More Appropriate Site**
The Waiver, subject to documentation provided by the Applicant, is necessary within the defined search or propagation study area as a result of identification of a more appropriate site that does not meet dimensional criteria, including such factors as distance from residential uses, existence of permanent screening and buffering, and location within a large scale non-residential area.
16) Avoid Certain Locations
The Waiver, subject to documentation provided by the Applicant, is necessary within the defined search or propagation study area to avoid location in one or more of the following:
   a) officially designated wilderness areas, wildlife refuges, and wildlife management areas;
   b) officially designated vegetation and wildlife preserves;
   c) habitats of threatened/endangered species, historical sites;
   d) Indian religious sites;
   e) locations which may cause significant alteration of wetlands, deforestation, or water diversion;
   f) night use of high intensity lights in residential areas;
   g) environmentally sensitive lands acquired or leased by PBC; or,
   h) linked open space corridors as set forth in the Plan.

17) Reduce Residential Impact
The Waiver, subject to documentation provided by the Applicant, is necessary within the defined search or propagation study area and will allow a proposed tower location to reduce the impact on adjacent residential uses.

18) Effect of Governmental Regulation or Restrictive Covenant
The Waiver, subject to documentation provided by the Applicant, is necessary within the defined search or propagation study area due to governmental regulations or restrictive covenants which preclude location of a tower.

e. Simultaneous Consideration
A request for a Type 2 Waiver from one or more required dimensional criteria may be considered at the same time a related request for tower approval is considered. However, final BCC, ZC, or Administrative approval shall not be granted until a final decision is rendered by the BCC.

6. Non-Conforming Lots of Record
Towers may be located on non-conforming lots of record provided the structure will comply with all requirements of this Section without a Type 2 Waiver from any dimensional criteria as provided herein.

I. Application Requirements for Towers
In addition to the application requirements under Art. 2, Application Processes and Procedures, the Applicant shall comply with the following:

1. Propagation Study
The provider shall submit a propagation study prepared by a professional engineer, licensed in the State of Florida, to justify the need to construct a new tower. Propagation studies shall not be required for television towers. Propagation studies shall include the following information:
   a. the location of other sites considered, including potential options for collocation and alternative sites or properties;
   b. desired signal strength in the area to be served; and,
   c. current and predicted RF coverage following installation and use of the new tower facility.

2. Location of Existing Towers
   a. Provide or update previously submitted data indicating the location of their towers, latitude and longitude, tower height, and tower type.
   b. Submit an alternative structure map with a minimum one-mile radius around the proposed site. The alternative structure map shall include the location of all existing towers located within the one-mile radius. An alternative structure map shall not be required for television towers.

3. Compatibility
To assist in ensuring compatibility between a proposed communication tower and surrounding land uses, the information listed below shall be included with all applications for development approval, Development Order Amendments, etc.
   a. Site and Tower Location
      The proposed site of a tower and the proposed location of the tower within that site, indicated on an official PBC Zoning quad sheet.
   b. Aerial Photography
      The proposed location of a tower, indicated on an aerial map possessing a scale of not more than one inch equals 300 feet ("1" = 300'). The aerial photograph shall indicate all adjacent land uses within a radius of 2,000 feet from the site of the proposed tower.
   c. Visual Impact Analysis
      A visual impact analysis, consistent with the requirements of Art. 4.B.9.I.4, Visual Impact Analysis Standards.
d. Buffering
Buffering and landscaping as required by this Section.

4. Visual Impact Analysis Standards

a. Applicability and Procedure
Any application to construct a Monopole Tower greater than 150 feet in height or any Guyed or Self-Support/Lattice Tower greater than 150 feet in height is subject to these standards. The Applicant shall be advised of the requirement to submit a visual impact analysis by the Zoning Director within ten working days following the application submittal deadline date.

b. General
To assess the compatibility with and impact of a proposed tower site on adjacent properties, an Applicant seeking to construct a tower subject to these requirements may be required to submit a visual impact analysis. The Applicant may request review of a proposed tower location, prior to application submittal to the appropriate Zoning process, to determine whether or not a visual impact analysis will be required. A visual impact analysis may be required under the circumstances listed below.

1) Existing residential uses are located along 50 percent or more of the entire perimeter of the proposed tower site.

2) When the proposed site is located adjacent to:
   a) Officially designated wilderness areas, wildlife refuges, and wildlife management areas;
   b) Officially designated vegetation and wildlife preserves;
   c) Habitats of threatened/endangered species;
   d) Historical sites;
   e) Indian religious sites;
   f) Locations which may cause significant alteration of wetlands, deforestation, or water diversion;
   g) Residential areas when night use of high intensity lights is required;
   h) Environmentally sensitive lands acquired or leased by PBC; or,
   i) Linked open space corridors as set forth in the Plan.

3) The proposed site does not meet the distance between towers requirements. The Applicant may utilize digital imaging technology to prepare the analysis, in a manner acceptable to the Zoning Director. The visual impact analysis shall, at minimum, provide the information listed below.
   a) The location of the proposed communication tower illustrated upon an aerial photograph at a scale of not more than one inch equals 300 feet (1" = 300'). All adjacent zoning districts within a 3,000-foot radius from all property lines of the proposed communication tower site shall be indicated.

   b) A line of site analysis shall include the following information:
      (1) Identification of all significant existing natural and man-made features adjacent to the proposed tower site and identification of features which may provide buffering and screening for adjacent properties and public streets;
      (2) Identification of at least three specific points within a 2,000-foot radius of the proposed tower location, subject to approval by the Zoning Director, for conducting the visual impact analysis;
      (3) Certification by the professional that the proposed communication tower meets or exceeds the standards contained in this Code;
      (4) Copies of all calculations and description of the methodology used in selecting the points of view and collection of data submitted in the analysis;
      (5) Graphic illustration of the visual impact of the proposed communication tower, at a scale that does not exceed five degrees of horizontal distance, presented from the specific identified points;
      (6) Identification of all screening and buffering materials under the permanent control of the Applicant (only screening and buffering materials located within the boundaries of the proposed site shall be considered for the visual impact analysis.);
      (7) Identification of all screening and buffering materials that are not under the permanent control of the Applicant but are considered of a permanent nature due to ownership or use patterns, such as a public park, vegetation preserve, required development buffer, etc.;
      (8) Screening and buffering materials considered in the visual impact analysis shall not be removed by future development on the site;
(9) Screening and buffering materials considered in the visual impact analysis shall be replaced if they die;

(10) Prohibited plant species, pursuant to Art. 7.E, Existing Native Vegetation, Prohibited, and Controlled Plant Species, shall not be considered in the visual impact analysis; and,

(11) Any additional information that may be required by the Zoning Director to fully review and evaluate the potential impact of the proposed communication tower.

4) In addition to all other applicable standards of the Code, the following visual impact standards may be applied when a visual impact analysis is required for any application to construct a tower.
   a) At least 25 percent of the tower height is screened from all streets other than expressways, or Arterials and Planned Collector Streets with five lanes or more.
   b) At least three specific points from adjacent streets, shall be identified, subject to approval by the Zoning Director, for conducting the visual impact analysis.
   c) The results of the line of site analysis performed as part of the visual impact analysis.
   d) The distance a proposed communication tower, including anchors for guy wires, and guy wires are proposed to be set back from surrounding properties such that its height, bulk, and scale is compatible with surrounding residential and non-residential uses.
   e) At least 25 percent of the tower is screened from view from a majority of the points selected by the Zoning Director for the visual impact analysis.
   f) The degree or amount of buffering or screening materials permanently included as part of the application.

5) The visual impact analysis shall be prepared and sealed by an architect, engineer, landscape architect, or surveyor and mapper registered in the State of Florida. PBC, at the expense of the Applicant and at its own discretion, may employ such consultants as are necessary to review and evaluate the visual impact analysis.

J. Prior Approvals
   The style, height, and overall appearance of any tower or communications facility constructed pursuant to these regulations shall be consistent with plans and elevations submitted as part of an application for development approval. The DRO shall have the authority to approve additions or minor modifications, which do not materially modify the appearance of a tower as approved by the ZC or BCC. Modification which cannot be approved by the DRO shall be subject to a Development Order Amendment as provided in this Code.

K. Consultant Services
   A qualified telecommunication consultant shall be selected and retained by the Zoning Director, and paid for by an Applicant, to review technical documents related to the siting of communication towers and facilities. The consultant may review technical documents, propagation studies, and other related documents to determine the following:
   1. Need for additional towers;
   2. Existence of incompatibilities between providers that may hinder collocation;
   3. Necessity of waiver relief to deviate from established dimensional criteria;
   4. Compliance with the general requirements of this Section; and,
   5. The Applicant shall reimburse PBC for the consultant fees prior to the certification of the application for public hearing process or approval of the application by the DRO.

L. List of Tower Users
   The DRO shall maintain a current Communication Tower Users List, which shall be made available upon request, and shall also be published on the Zoning Web site.

M. Intergovernmental Activities
   1. Mapping
      PBC shall participate in any countywide mapping program to identify proposed and existing tower sites.
   2. Notification
      a. PBC shall participate in an intergovernmental notification program by continuously providing information regarding tower construction applications to the PBC Intergovernmental Coordination Program Clearinghouse.
      b. All jurisdictions within a two-mile radius of a proposed tower site located in unincorporated PBC shall be notified at the time of application submittal.

**Use Type**

- **Agricultural Excavation**
- **Type 1A Excavation**
- **Type 1B Excavation**
- **Type 2 Excavation**
- **Type 3A Excavation**
- **Type 3B Excavation**

**Supplementary Use Standards**

- P Permitted by Right
- D Subject to DRO Approval
- B Subject to Zoning Commission Approval (Class B Conditional Use)
- A Subject to BCC Approval (Class A Conditional Use)
- - Prohibited Use, unless stated otherwise within Supplementary Use Standards

**Use Approval Process Key:**

- **P** Permitted by Right
- **D** Subject to DRO Approval
- **B** Subject to Zoning Commission Approval (Class B Conditional Use)
- **A** Subject to BCC Approval (Class A Conditional Use)
- **-** Prohibited Use, unless stated otherwise within Supplementary Use Standards

*(1) Supplementary Use Standards for each use must be reviewed regardless of the approval process set forth in the Use Matrix. Refer to the numbers in the Supplementary Use Standards column.*
B. Common Provisions and General Standards

1. Purpose and Intent

The purpose of this Chapter is to provide for the health, safety, and welfare of the residents of PBC by ensuring beneficial and sound land management practices associated with excavation and mining activities. To prevent a cumulative negative impact on PBCs natural resources and to achieve these goals, it is the intent of this Section to:

a. ensure that mining and excavation activities do not adversely impact the health, safety, and welfare of the citizens of PBC;

b. prevent immediate and long-term negative environmental and economic impacts of poor land development practices;

c. encourage the use of economically feasible and environmentally sound mining and excavation practices;

d. preserve land values by ensuring that alteration of a parcel by non-commercial land excavation does not result in conditions that would prevent that parcel from meeting minimum land development requirements for other valid uses;

e. encourage the rehabilitation of commercially mined sites to other beneficial uses by promoting economical, effective and timely site reclamation;

f. protect existing and future beneficial use of surrounding properties from the negative effects of excavation and mining;

g. provide for the off-site disposal of excess extractive material provided that the excavation site is incorporated into the approval of a bona fide site development plan;

h. establish a regulatory framework of clear, reasonable, effective, and enforceable standards and requirements for the regulation of excavation, mining, and related activities; and,

i. ensure that excavation and mining activities and resulting mined lakes are not allowed to become public safety hazards, or sources of water resource degradation or pollution.

2. Applicability

All mining and excavation activities that create a temporary or permanent body of water within unincorporated PBC shall comply with the regulations established in the Code and other State and Local requirements, as applicable.

In the event that provisions of this Section conflict with regulations of other applicable regulatory agencies, the more restrictive regulations shall apply. Other permitting agencies include but are not limited to SFWMD, Florida Fish and Wildlife Conservation Commission, USACE, DEP, and ERM.

b. Previously Approved Development Orders (DOs)

Applications for excavation and mining projects approved prior to September 25, 1996, may amend the certified site (excavation) plan pursuant to Art. 2.C, Administrative Processes, to comply with the Standards enumerated below provided the excavation site is incorporated into the approval of a bona fide site development plan; the DRO may review and approve the excavation plan, pursuant to Art. 2.C, Administrative Processes, provided the subject site complies with the compatibility criteria in Art. 4.B.10.C.5.i.2), Type 3A Excavation, and the technical standards in Art. 4.B.10.B.7, Technical Standards, and provided there is no increase in the land area, excavated surface area, quantity of excavated material, or intensity as approved by the BCC in the original DO. Any increase shall require approval of a DOA by the BCC pursuant to Art. 2.B, Public Hearing Processes. Applicable standards include:

1) Art. 4.B.10.B.7.a, Operational Standards and Requirements;

2) Art. 4.B.10.B.7.b, Construction Standards, excluding depth;

3) Art. 4.B.10.B.7.c, Reclamation Standards;

4) Art. 4.B.10.C.5.i.2)b)(3), Buffer; and,

5) Art. 4.B.10.B.7.e, Maintenance and Monitoring.

3. Excavation Types

Excavation or mining activities shall not be conducted unless such activities are deemed exempt or an approval has been issued in accordance with this Section. The types of excavation that are allowed are as follows:

a. Agricultural Excavation

Approval process for Agricultural Excavation is administered by ERM and PZB. Application procedures and requirements are subject to Art. 4.B.10.C.1, Agricultural Excavation. Agricultural Excavation in the WCAA are administered by ERM. Application procedures and requirements are in Art. 4.B.10.C.1.i, WCAA Excavation.
b. **Type 1 Excavation**
Two approval processes (Types 1A and 1B) are administered by PZB for excavations on Single Family lots. Application procedures and requirements are in Art. 4.B.10.B.5.a, Content of Application.

c. **Type 2 Excavation**
The approval process for Type 2 Excavation is administered by PZB and ERM. Application procedures and requirements are in Art. 4.B.10.B.5.b, Additional Application Requests for Type 2, Type 3A and Type 3B.

d. **Type 3 Excavation**
Two approval processes for commercial mining excavation activities (Type 3A and Type 3B) are administered by PZB and ERM. Application procedures and requirements are in Art. 4.B.10.B.5, Supplemental Application Requirements.

4. **Prohibitions and Exemptions**

   a. **Prohibitions**
   Excavation and mining activities shall be prohibited in the following areas:
   1) RR-20 FLU designation.
   2) The Pleistocene Sand Ridge.
   3) An archeological site, unless approved and requested as a Class A Conditional Use.
   4) Publicly owned conservation areas, publicly-owned Preservation Areas or environmentally sensitive lands.
   5) Areas otherwise prohibited by this Section.

   b. **Exemptions**
The following excavation activities shall be exempt from the requirements of this Section:

   1) **Existing Lakes**
   Existing mined lakes approved prior to June 16, 1992 that have a valid Development Order which complies with the criteria below shall be exempt from the requirements of this Section. If an amendment is proposed that deviates from the original approval, then a Development Order Amendment shall be requested pursuant to Art. 2.B, Public Hearing Processes, and shall comply with the provisions in Art. 1.F, Nonconformities.
   a) Regulated by a National Pollutant Discharge Elimination System Permit; or
   b) Regulated by a Florida Department of Environmental Protection (DEP) industrial wastewater operation permit; or
   c) Located within an approved residential, commercial, industrial or mixed use development and function as a stormwater management facility pursuant to:
      (1) A surface water management construction permit issued by the SFWMD; or
      (2) A conceptual permit issued by the SFWMD that delineates proposed littoral slopes of the excavated lake(s) conducive for planting; or
      (3) An applicable Land Development Permit depicting proposed littoral and upland slopes of a mined lake. As long as the existing excavated lake continues to meet the water quality standards contained in Chapter 62-302, F.A.C.

   2) **Pools**
   Swimming pools, pursuant to Art. 5.B, Accessory Uses and Structures.

   3) **Small Ponds**
   Ponds accessory to a principal use, such as lily ponds, goldfish ponds, reflecting ponds, and other small ornamental water features with a maximum depth of four feet OWL and not exceeding 500 square feet in surface area.

   4) **Cemeteries**
   Burial plots in approved cemeteries.

   5) **R-O-W**
   Excavation in a road R-O-W, when the road is under construction. To qualify for this exemption, excavation shall be performed by PBC, the FDOT or any Water Control District created by special act to operate under F.S. ch. 298(95) Excavation activity located outside the R-O-W boundary, performed to accommodate roadway drainage, and which creates a permanent open body of water for a period of 180 days or more, shall comply with the standards of a Type 2 Excavation in Art. 4.B.10.C.4, Type 2 Excavation.

   6) **Utilities**
   Excavations necessary for the installation of utilities, including septic systems.
7) Man-Made Drainage Structures
The repair, reconstruction and maintenance of existing non-tidal man-made canals, channels, control structures with associated riprap, erosion controls, intake structures, and discharge structures, provided:
   a) All spoil material is deposited directly to a self-contained upland site, which will prevent the release of material and drainage from the spoil site into surface waters of the State;
   b) No more dredging is performed than is necessary to restore the canal, channels, and intake, and discharge structures to original design specifications or as amended by the applicable permitting agency; and,
   c) Control devices in use at the dredge site that prevent the release of turbidity, toxic, or deleterious substances into adjacent waters during the dredging operation.

8) WCAA Canals
Canals of conveyance located in the WCAA which require permits from SFWMD or DEP, provided the permitted project does not exceed 15 feet in depth from OWL.

9) Mitigation Projects
Mitigation projects permitted by SFWMD, DEP, or ERM, pursuant to F.S. ch. 403 and F.S. ch. 373, and Chapter 62-312, F.A.C., as amended, and Art. 14, Environmental Standards, including projects approved to implement an adopted Surface Water Improvement & Management (SWIM) plan, provided the permitted project depth does not exceed 20 feet from OWL or 15 feet from OWL in the WCAA. Projects proposed to exceed these depths shall comply with Art. 4.B.10.B.5, Supplemental Application Requirements, the administrative waiver requirements of Art. 4.B.10.B.8, Administration and Enforcement, and the technical standards of Art. 4.B.10.B.7.a, Operational Standards and Requirements, Art. 4.B.10.B.7.b.1), Separation, Art. 4.B.10.B.7.b.2), Slopes, Art. 4.B.10.B.7.c, Reclamation Standards, and Art. 4.B.10.B.7.d, Performance Guarantee Requirements.

10) Wetlands
Excavation activities within jurisdictional wetlands that have been issued permits pursuant to Wetlands Protection requirements or have been issued a permit for wetland impacts through the Environmental Resource Permit (ERP) process by DEP, USACE, SFWMD, or any other agency with ERP delegation for PBC.

11) Agricultural Ditches
Agricultural ditches supporting vegetation production which meet the standards of Bona Fide Agriculture (i.e. groves, row crops, hay, and tree farming) constructed solely in uplands that are less than six feet in depth from OWL. These ditches shall not connect to canals of conveyance or waters of the State without the appropriate Federal, State, and Local approvals and permits.

12) De Minimis Impact
Those projects for which ERM and PZB approval is necessary and both departments determine that there will be no significant adverse environmental or land use impacts. A de minimis determination from one agency does not constitute approval by the other.

13) Canals of Conveyance
Canals of conveyance that require permits from SFWMD, USACE, DEP, or ERM pursuant to Wetlands Protection requirements.

14) Excavation by Public Agencies
   a) Excavation performed by or special districts created by special legislative act governed by the BCC, provided such excavation complies with the following:
      (1) solely under the jurisdiction, authority, and control of PBC, or the applicable district.
      (2) completed, operated, and maintained in perpetuity by PBC, or the applicable special district,
      (3) an official part of the operation and function of PBC, or the applicable special district.
      (4) In order to be exempt under this provision, the PBC Department or applicable district shall:
          (a) schedule and conduct a public hearing; the notice of the public hearing shall be published at least seven days prior to the hearing, in a newspaper of general circulation,
          (b) provide written notice of the intent to engage in excavation activities subject to a permit issued by the SFWMD or the FDEP to the Executive Director of PZB and
the Director of ERM at least 30 days prior to the commencement of construction activity, and,

(c) provide written notification of the public hearing required above to the Executive Director of PZB and the Director of ERM at least 30 days prior to the public hearing.

(5) For excavations greater than the maximum depth listed in Art. 4.B.10.C.1.c, Maximum Depth, and Art. 4.B.10.C.2.g, Depth, the chloride and TDS requirements shall apply.

b) Excavations, Canals, Impoundments
Excavations, canals, impoundments, regional stormwater treatment areas, and related projects to enhance water quality, water supply, environmental quality, and natural resources operated by the SFWMD, ACOE, or water control districts or improvement districts created pursuant to F.S. ch. 298 and within PBC.

5. Supplemental Application Requirements
a. Content of Application
All Type 1B, Type 2, Type 3A, and Type 3B Excavations shall supplement the applicable application requirements with the material and information listed below:

1) Statement
Application listing the nature of the excavation operation, including but not limited to:

a) amount and type of materials to be excavated;
b) duration of the excavation activity and reclamation activity;
c) the proposed method of excavation;
d) the amount of fill to remain on site;
e) if permitted, the amount of fill to be removed from site; and,
f) intent to comply with Art. 9.A, Archaeological Resources Protection.

2) Site Plan
A site plan depicting:

a) Boundaries, dimensions and acreage of the site and excavated surface area(s);
b) All existing and proposed improvements including easements, streets, weigh stations, and other structures;
c) Setbacks and separations;
d) Preservation Areas;
e) Water table elevations, including Ordinary Water Level.

b. Additional Application Requests for Excavation, Type 3A and Type 3B
All applications for Type 3A and Type 3B Excavations shall require the additional information listed below.

1) Soil Statement
A statement certified by an engineer indicating the type of soils to be excavated and that the soils are suitable for road or structural fill construction or the soil contains excessive amounts of silt, rock, or muck.

2) Site Plan
A site plan depicting:

a. Art. 4.B.10.B.7.a, Operational Standards and Requirements, as applicable;
b. Equipment storage, and stockpile areas, including sizes and heights; and,
c. Location of grading, sorting, crushing and similar equipment necessary for the operation and distribution of excavated material.

3) Landscape Plan
A landscape plan indicating the buffers and reclamation planting required.

4) Cross Sections
Cross Sections delineating compliance with the following requirements, as applicable:

a) Art. 4.B.10.B.7.b, Construction Standards;
b) Art. 4.B.10.B.7.c, Reclamation Standards; and,
c) Buffer details.

5) Operations Plan
An operations plan shall be submitted in the form of a statement and include the methods of material extraction, on site processing, including erosion and sediment control methods, and particulate matter control. The plan shall also delineate how impacts from hauling operations will be controlled.
6) Haul Route Plan
A map indicating all possible proposed haul routes within the radius of impacts. Radius of impact is defined as the primary street system commencing at the access point of the excavation site and extending out along all streets in all directions to the closest Arterial or Plan Collector Street.

7) Additional Information
a) Report Schedule
Report Schedule, pursuant to Art. 4.B.10.B.7.e, Maintenance and Monitoring.
b) Location Map
Surrounding uses map depicting the location of the outer boundary of area to be excavated and distances to surrounding land uses; including all residences within the applicable specified distance in the separation standards in Art. 4.B.10.C.5.i, Compatibility Standards.
c) Phasing Plan
A phasing plan and tabular data depicting acreage, location, sequence of operations and schedule of reclamation requirements.
d) Tree Survey
A tree survey, as required by Art. 4.B.10.B.7.c.4.d), Calculating Planting Requirements.

6. Notice of Intent to Construct
All applications for Agricultural, WCAA, Type 2 Excavation, and Type 3 mining activities shall submit a Notice of Intent to Construct in accordance with the provisions below:

a. Notice of Intent
Prior to commencement of any on-site excavation or mining activities, a Notice of Intent to Construct shall be submitted to and receive written approval from ERM.

b. Contents of Notice of Intent to Construct
The following information shall be included with the completed Notice of Intent to Construct form:
1) Paving and Drainage plans, if applicable;
2) Preliminary plat, if applicable, and restrictive covenant, pursuant to Art. 4.B.10.B.7.c.5), Area of Record;
3) Art. 4.B.10.B.7.c.3), Littoral Planting Reclamation Standards;
4) Master Plan, showing all phases of development, if applicable; and Items 1 and 2 (preliminary plat) shall be signed and sealed by a certified engineer or surveyor as applicable, recognized and approved by the Florida Department of Professional Regulation (FDPR); and,
5) Methods of stormwater pollution prevention if construction of the project may result in an area of exposed soil greater than one acre subject to Federal National Pollution Discharge Elimination System (NPDES) stormwater regulations, a copy of the on-site Stormwater Pollution Prevention Plan shall be submitted as part of the permit application.

c. Agriculture Excavation
All Agricultural and WCAA Excavation shall submit a detailed explanation of the proposed Bona Fide Agriculture use. This explanation shall demonstrate consistency with applicable industry standards and shall satisfy the definition requirements of Bona Fide Agriculture pursuant to Art. 1.H, Definitions and Acronyms.

d. Type 3 Exceptions
A Type 3 application shall include documentation of an approved for Class A Conditional Use pursuant to Art. 2.B, Public Hearing Processes.

e. Written Approval
ERM shall issue a written approval to the Applicant within 30 days upon receipt of a Notice of Intent to Construct and appropriate fee with all information necessary to demonstrate that the provisions of this Section will be met, and confirmation by the Land Development Division that all necessary approvals for County R-O-Ws have been issued.

7. Technical Standards
a. Operational Standards and Requirements
All excavation types shall comply with the following operational standards, unless specifically exempt or prohibited pursuant to this Section.

1) Hours of Operation
All excavation and hauling activity, except dewatering, shall only occur between the hours of 7:00 a.m. and 7:00 p.m. Monday through Friday, unless otherwise specified in this Section.
2) **Objectionable Odors**
The excavation activity shall be conducted in such a manner as to prevent the occurrence of odors which can be detected off the premises.

3) **Emission of Fugitive Particulate Matter**
Excavation operations, including hauling activity, shall be conducted to prevent the emission of dust or other solid matter into the air or onto adjacent properties pursuant to the smoke, emissions and particulate matter provisions in Art. 5.E, Performance Standards, and Chapter 62-296, F.A.C.

4) **Existing Topsoil**
Where feasible, existing topsoil shall be stored and redistributed on site to provide adequate growing conditions for the revegetation of plant species. Where such storage is not feasible, the area shall be restored with soil of an equal or better quality than that of the excavated topsoil and be redistributed to provide adequate growing conditions.

5) **Equipment Storage, Maintenance and Service Areas**
Equipment storage, maintenance and service areas shall be set back a minimum 200 feet from all property lines abutting a residential district or use. The equipment storage area shall be designed such that noise generated by the equipment is muffled in order to comply with the noise performance standards in Art. 5.E, Performance Standards.

6) **Regulated Substances**
All storage and use of regulated substances shall comply with Local, State, and Federal regulations. All regulated substance dispensing areas shall comply with Best Management Practices. Any spill of any regulated substance shall be reported to the PBCHD within one hour and to ERM within one hour or at the beginning of the next business day.

7) **Dewatering**
Dewatering shall not be allowed unless permitted by a State agency, Federal agency, the SFWMD, or the dewatering operation is in compliance with conditions of Rule 40E-20.302(3), F.A.C. If dewatering is permitted, pumps shall be located, submerged, buried, or encased in an insulated structure in order to comply with the noise standards in Art. 5.E, Performance Standards.

8) **Access to Public Prohibited**
Signs shall be posted prohibiting access to the general public while excavation and reclamation activity is being conducted.

9) **Retail Sale of Material**
The retail sale of excavated material shall not be permitted on site.

10) **Hauling Standards**
a) **General**
(1) All trucks hauling material from sites that permit off-site removal shall be covered to prevent debris and fill from spilling onto the roadway.
(2) The hauler shall employ measures acceptable to the PBCHD, and any applicable road maintenance authority, to ensure that roads are properly maintained and kept free of fugitive particulate matter.
(3) The BCC may require special conditions, including, but not limited to construction of turn lanes and other roadway improvements necessary to provide safe traffic movement.
(4) All vehicles used to haul excavated material shall use the approved haul routes. Vehicles shall not use Local Residential Streets to access Arterial or Collector Streets.

b) **Executed Agreement**
The BCC or the County Engineer may require an executed agreement between the Applicant and the County Engineer and other applicable road maintenance authorities which may include but not be limited to documentation of the existing conditions of the streets within the radius of impact, as defined in Art. 4.B.10.B.5.b.6), Haul Route Plan. The agreement shall include a description of the hauling operations including but not limited to the number of trips (as approved in the original Development Order), duration of excavation and hauling activity, truck size and weights and the existing conditions of all possible streets designated as haul routes, as well as any requirements for periodic inspections, financial guarantees and the Applicant’s other responsibilities.
11) Phasing
In the event the excavation activity is conducted in phases, the phasing plan required by Art. 4.B.10.B.7.a, Operational Standards and Requirements, shall be subject to Art. 2.E, Monitoring of Development Orders (DOs) and Conditions of Approval, Art. 2.E.2.C, Time Limitations for Commencement, and the requirements in Art. 4.B.10.B.7.c, Reclamation Standards. All excavation types, except Type 3A and Type 3B shall comply with Art. 2.E, Monitoring of Development Orders (DOs) and Conditions of Approval, which limits the project to two primary phases for the purposes of monitoring commencement of the Development Order. Additional sub-phases may be permitted for each primary phase for the purposes of conducting the excavation activity in accordance with this Section. For Type 3A and Type 3B Excavations, the number of phases and the duration of each phase shall be established as a Condition of Approval. When establishing the Condition of Approval for the number and duration of each phase, the BCC shall consider the size of the proposed excavation project, existing and proposed surrounding land uses, surrounding FLU designations, and other pertinent information.

12) Sound Insulation
All machinery, heavy equipment and vehicles utilized for excavation and hauling purposes shall be equipped with double mufflers to reduce airborne noise caused by excavation operations.

b. Construction Standards
All excavation types shall comply with the following construction standards, unless exempt.

1) Separation
Separations shall be measured from the top of bank of the nearest excavated area to the property line or designated area in any given direction as defined below: Excavation shall not be constructed within:
   a) Wellfield Zone 1 or 300 feet from a public water supply well, whichever is more restrictive;
   b) 200 feet from a wetland or in a wetland, unless approved by ERM;
   c) 300 feet from a Class 1 or Class 2 landfill;
   d) 300 feet from a site with known contamination;
   e) 100 feet from a septic system or sanitary hazard;
   f) 100 feet from a potable water well, except for Type 1A and Type 1B Excavations; or,
   g) 200 feet from publicly-owned conservation areas, publicly-owned preservation areas, or environmentally sensitive lands, unless approved by ERM.

2) Slopes
   a) Slope Angle
   Slopes for all excavation types with unplanted littoral zone areas shall be no steeper than four feet horizontal to one foot vertical to a minimum depth of minus two feet OWL. Slopes below the minus two feet depth shall not exceed two feet horizontal to one foot vertical or the natural angle of repose for the specific conditions encountered. Grades and slopes shall be constructed in such a manner as to minimize soil erosion and to make the land surface suitable for revegetation. The slopes shall be adequately vegetated with appropriate ground cover from top of bank to edge of water within 30 days of final grading and thereafter maintained to prevent wind and water erosion.

b) Slope for Planted Littoral Zones
   The slope for excavation with planted littoral zone areas shall be no steeper than ten feet horizontal to one foot vertical to a distance of five feet waterward of the designated planted littoral zone area. Shallower slopes are encouraged to promote greater success of the littoral zone plantings. A copy of the record drawings certified by a surveyor or engineer recognized and approved by FDPR shall be submitted to ERM within 30 days following completion of slope construction.
   (1) Inspection
   Within 48 hours prior to completion of construction of the required slopes for the planted littoral zones, notification to ERM is required in order to schedule a slope inspection.

c) Drainage
   Overland sheet flow directly into an excavated area shall be minimized. Those areas within a maximum of 50 feet of the excavated lake may discharge runoff to the lake. This restriction shall not apply to any catchment area discharging runoff to a lake designated as a water management tract and incorporated in an approved stormwater management plan.
for treatment and control of runoff from a development site, where the boundaries of said catchment are delineated on an approved plan.

3) **Final Site Conditions**
No sharp declivities, pits, depressions, or debris accumulation shall remain after reclamation. Final grading shall conform to the contour lines and grades on the approved reclamation plan.

c. **Reclamation Standards**

1) **General**

a) **Types of Reclamation**
Four types of reclamation standards are defined below. Reclamation standards vary based on the type of excavation activity as set forth in Art. 4.B.10, Excavation Uses.

(1) **Excavated Area**
This area includes the depth of a lake and all slopes waterward of the top of bank, excluding littoral plantings.

(2) **Littoral Planting**
This area includes all plantings waterward from edge of OWL or plus one (+1) OWLs.

(3) **Upland**
This area includes the land area landward of the top of bank and requires that a minimum area of land be maintained or created around the perimeter of an excavated area to preserve future use of the land.

(4) **Upland Planting**
This area includes all plantings landward of the top of bank and requires stabilization of soil and re-establishment of native upland vegetation.

2) **Excavated Area Reclamation Standard**
All slopes shall be reclaimed in accordance with Art. 4.B.10.B.7.b, Construction Standards, and in Art. 4.B.10.B.7.c, Reclamation Standards. Areas not required to be stabilized with littoral plantings shall be stabilized and planted with appropriate ground cover from top of bank to the edge of the water. If seeding is used, a minimum of 50 percent coverage shall be required. The depth of the lake and side slopes shall comply with Art. 4.B.10.B.7.b, Construction Standards.

3) **Littoral Planting Reclamation Standards**
All Agricultural (excluding WCAA), Type 2 and Type 3 Excavations, excluding ponds, shall comply with the following littoral zone standards. Exempted excavations within the WCAA shall provide a littoral zone if the land use ceases to be agricultural.

a) **Planted Littoral Zones**
Planted littoral zones shall be provided which comprise, at a minimum, an area equivalent to eight square feet per linear foot of shoreline. Creativity in design in the placement of the planted littoral zone is strongly encouraged, such as extended areas in one portion of the lake or at the discharge point. For basins with multiple lakes that are interconnected, littoral zones may be concentrated within one or more lakes so long as the basin as a whole contains the total required littoral area. The planted littoral zone area shall be limited to the area between one foot above OWL and two feet below OWL. If the Applicant demonstrates to ERM that the planted littoral area elevations should differ from this requirement based on site specific conditions and based on fluctuations around the OWL, ERM may approve planted littoral area elevations other than those elevations stated above. Requirements for littoral zone planting shall be in addition to any planting for wetland mitigation required by DEP, SFWMD, USACE, ERM, or any other agency with wetland jurisdiction.

b) **Vertical Walls**
Vertical walls, bulkheads, or other means of hardening the shoreline may be allowed, however, for each linear foot of vertical wall, an additional eight square feet of planted littoral zone shall be required. Thus every linear foot of vertical wall shall require 16 square feet of planted littoral zone to be planted.

c) **Planting Requirements**
The littoral zone shall be provided with a minimum of six inches of a sand topsoil mix to promote vegetative growth for those areas that do not have adequate soil conditions to ensure plant survivorship. The littoral zone shall be planted with at least five species of appropriate native wetland vegetation, with an average spacing of two feet on center or as approved by ERM. The design and species used shall be such that the plants have an anticipated minimal 80 percent coverage. This criterion shall be met from the 180-day monitoring period, and in perpetuity. The Director of ERM shall maintain a list of acceptable...
plant species for use in their appropriate elevations within the littoral zones. The list may be amended for general application as more information becomes available. The list shall be open for public inspection and distribution.

d) Timing of Planting
Planting of the excavated lake or pond shall occur no later than immediately prior to the issuance of the first certification of occupancy for any lot adjacent to or abutting the bank of that lake. ERM may approve in writing a phasing plan for planting large single lake systems or interconnected multi-lake systems that would allow lake planting to be phased. At all times, Applicant is responsible for minimizing erosion of the littoral shelves until the planting is completed. ERM shall be notified within 48 hours prior to completion of the littoral zone planting.

e) Littoral Planting Plans
The plans shall detail the species and numbers of plants to be used, the location and dimensions of the littoral areas, including any compensatory littoral areas, if applicable; typical cross Section of planted littoral zones from lake maintenance easements to the maximum depth of the lake; the location and dimensions of any structure for which a compensatory littoral area is required; the methods for planting and ensuring survival of the plants; and other reasonable information required by the Director of ERM.

Projects which are proposed to be conducted in phases, shall include plans which delineate the phases of excavation and shall include guarantees for each phase. The signatory of the plans and specifications shall have a personal familiarity with the site and soil conditions based upon a field review.

4) Upland Reclamation Standards
Upland reclamation standards apply to Type 2 and all Type 3 Excavations only.

a) Reclamation Plan
(1) General
A site reclamation plan shall be submitted as an integral part of the application for a Type 2 or Type 3 Excavation and shall be approved by DRO prior to commencement of work. Reclamation is required to ensure a viable end use for the excavation site. The plan shall demonstrate compliance with the requirements in Art. 4.B.10.B.7, Technical Standards, except for the littoral planting plan which has its own application submittal requirements. However, the reclamation plan submitted to DRO shall indicate the littoral planting areas.

(2) Type 2 Excavation
The certified final site development plan shall function as the standards required for the final development plan.

(3) Type 2 Excavation Exceeding Off-Site Removal Limitations
As set forth in Art. 4.B.10.C.4, Type 2 Excavation, shall be classified as a Type 3A Excavation when the Applicant proposes to remove more than ten percent of the fill off-site. Notwithstanding final site plan certification, the final site development plan shall function as the reclamation plan and planting requirements shall be met in accordance with the landscape requirements for the final site development plan. In such cases, the BCC may waive all or modify a portion of the explicit upland reclamation planting requirements defined below based on the ultimate use of the site. The BCC may require that the upland reclamation plantings defined below be incorporated into the open space pedestrian system as defined on the final site development plan.

(4) Type 3 Excavation
The reclamation plan for a Type 3 Excavation shall comply with the upland reclamation standards in this Section.

b) Perimeter Reclamation
At a minimum, 75 percent of the perimeter of the excavated area shall have a width of 180 feet; and the remaining 25 percent shall have a width of 100 feet. All disturbed and reclaimed areas shall be planted or seeded with a permanent native ground cover to reduce the loss of topsoil due to water and wind erosion, to provide adequate growing conditions for reclamation planting requirements and to prevent the establishment of prohibited plant species.
c) **Timing of Upland Reclamation**
Reclamation shall occur immediately following the end of excavation or immediately following each phase of excavation, whichever occurs first. Upon commencement of reclamation and rehabilitation of the initial phase of this excavation, the next phase of excavation may commence upon written authorization by the DRO. The applicable guarantee must be on file prior to authorization for the commencement of excavation on any subsequent phase.

(1) **Timing of Planting**
If excavation activity is phased, planting shall occur at the completion of each phase. Planting of the reclaimed upland area should occur during the rainy season (June-October), within six months after completion of the excavated area or phase thereof, as applicable. The Property Owner shall ensure that proper watering and maintenance occurs in order to ensure a successful survival rate. If planting does not occur during the rainy season, then the Property Owner shall provide irrigation to establish the new plantings. PZB shall be notified 48 hours prior to completion of the upland plantings.

d) **Calculating Planting Requirements**
In addition to the buffer requirements in Art. 4.B.10.C.5, Type 3 Excavation, the following upland planting requirements shall apply.

(1) **Sites Supporting Native Vegetation**
Calculations to determine the reclamation planting requirements for sites supporting native vegetation shall be based on the existing tree cover. Controlled or prohibited species shall be exempt from this calculation. In addition, any tree species located within the required perimeter buffer area shall also be exempt. If no vegetation exists, the Applicant shall demonstrate that the site was cleared before 1986 or has been issued and has complied with a vegetation removal permit.
A certified tree survey shall be submitted by either a landscape architect, forester, land surveyor, or engineer who is registered in the State of Florida. This count shall include all existing on-site native trees with a trunk diameter three inches or greater to be measured at four and one-half feet above the ground. The number of existing trees meeting this criterion shall then be divided by the total number of acres to obtain a tree-per-acre figure. The number of replacement trees to be planted at the time of final site reclamation shall be determined by multiplying the trees-per-acre figure by the number of required reclaimed land acres remaining at the time of final site reclamation. Credit shall be given by PZB for existing trees greater than three inches in diameter which are relocated and/or adequately protected during excavation. Any trees relocated and/or protected shall be deducted from the replacement tree count requirement. The trees to be replanted shall be native and a minimum eight feet high. In addition, two under-story 18-inch-high seedlings shall be planted for each tree required to be planted.

e) **Upland Planting Reclamation Standards**
The upland reclamation plantings may be clustered in one area of the reclaimed upland area or dispersed throughout the reclaimed upland area. No minimum or maximum area is required, except as a condition of approval, as long as the vegetation is planted in accordance with standards set forth in Art. 7.D, Landscape Standards, and Art. 14.C, Vegetation Preservation and Protection. A minimum of five native plant species shall be used to fulfill the planting requirements. The design and species used shall be such that the plants have an anticipated minimal survival rate of at least 80 percent at the end of each monitoring period.

f) **Plan Requirements**
The upland reclamation planting plan shall be submitted to the DRO simultaneously with the application for the final site plan.

(1) The signatory of the plans and specifications shall have personal familiarity with the site and soil conditions based upon a field review. The plans shall be signed and sealed by a professional landscape architect certified by the Florida Department of Professional Regulation.

(2) At a minimum, the plans shall detail the location, species and numbers of plants to be used, and the methods for planting and ensuring survival of the plants, and other reasonable information required by ERM.
g) **Phased Projects**
   In the event that upland reclamation is to be conducted in phases, the following additional requirements shall apply:
   
   1. A phasing plan shall be submitted indicating:
      a) exact acreage of each phase;
      b) proposed duration of excavation and reclamation of each phase; and,
      c) number of trees to be planted.

5) **Area of Record**
   All reclaimed littoral and upland planting areas shall be identified graphically and in writing on a separate restrictive covenant. The graphic shall be signed and sealed by a certified engineer or surveyor as applicable, recognized and approved by the FDPR. If a plat is required, pursuant to Art. 11, Subdivision, Platting, and Required Improvements, all planted littoral zones and upland reclamation planting areas shall be identified by reference to the restrictive covenant. The plat and restrictive covenant shall be reviewed and approved by the Zoning Division, ERM, and the County Attorney’s office prior to recordation. A copy of the plat, if applicable, and recorded restrictive covenant shall be provided to ERM and PZB, prior to issuance of written approval of the Notice of Intent to Construct. Within 30 days following plat recordation, a copy of the recorded plat shall be provided to ERM and Zoning Division. An Applicant may submit a written request to ERM to approve the termination of a recorded restricted covenant agreement provided the DO has been rescinded and no excavation of any water management tract has occurred. A copy of the termination of the restrictive covenant shall be provided to ERM. A restrictive covenant may be amended upon written request by an Applicant and approval by ERM. The littoral area and reclaimed upland planting area shall be specifically and separately reserved to the owner, or if applicable, to the Property Owners’ Association as its perpetual maintenance responsibility, without recourse to PBC or any other governmental entity or agency. The plat, if applicable, restrictive covenant and Property Owners’ Association documents, shall contain the following statement: [Ord. 2019-034]

   It is a punishable violation of PBC Laws, Ordinances, Codes, Regulations, and approvals to alter the approved slopes, contours, or cross sections or to chemically, mechanically, or manually remove, damage, or destroy any plants in the reclaimed areas and planted littoral zone except upon the written approval from the Director of ERM or Zoning, as applicable. It is the responsibility of the owner or Property Owners’ Association, its successors or assigns, to maintain the required survivorship and coverage of the reclaimed upland and planted littoral areas and to ensure on-going removal of prohibited and invasive non-native plant species from these areas.

d. **Performance Guarantee Requirements**
   1) **General**
      ERM shall administer guarantee requirements for the excavated area and littoral plantings. The Zoning Division shall administer guarantee requirements for reclaimed upland area, and upland plantings. The Land Development Division shall administer guarantee requirements associated with road maintenance and repair of haul routes if required by the BCC or County Engineer Executed Agreement pursuant to Art. 4.B.10.B.7.a.10)b), Executed Agreement.
   
   2) **Guarantees Required**
      The guarantees for phased projects may be bonded separately with approval by the DRO.
      
      a) **Agricultural and Type 2 Excavations**
         Agricultural and Type 2 Excavations shall be required to provide a guarantee for the littoral zones. If approved as a Class A conditional use, guarantees may also be required for the excavated area, upland reclamation (excluding upland plantings) and roadway maintenance and repair.
      
      b) **Type 3 Excavation**
         Approval of at least five guarantees shall be required for Type 3 Excavation:
         
         1. excavated areas;
         2. reclaimed upland areas;
         3. upland planting areas; and,
         4. littoral zones.
      
      c) Approval may be required for Type 3 Excavation for road maintenance and repair.
3) Execution
The performance guarantee shall be executed by a person or entity who owns a property in part or in whole or has legal interest in the property. Transfer of title to the subject property shall not relieve the need for the performance guarantee. The seller shall maintain, in full force and effect, the original performance guarantee until it is replaced by the purchaser. [Ord. 2019-034]

4) Form of Guarantee
The guarantee shall assure the project performs as approved by the BCC and in accordance with the standards of this Code. The guarantee shall take the form of:
   a) A cash deposit or certificate of deposit assigned to PBC;
   b) An escrow agreement for the benefit of PBC;
   c) A performance bond issued by a Florida registered guarantee company which shall be listed on the U.S. Department of Treasury Fiscal Services, Bureau of Government Financial Operations. Said bond may be canceled only upon a 60-day written advance notice and acceptance of cancellation by ERM, PZB or Land Development Division, as applicable;
   d) An unencumbered, clean, irrevocable letter of credit which must be executed on a form provided by PBC; or,
   e) Unless otherwise approved in writing by ERM, PZB or Land Development Division, as applicable, performance bonds or letters of credit shall be on forms provided by PBC.

5) Amount of Guarantee
   a) General
      The amount of the guarantees shall be adjusted in accordance with the Consumer Price Index, as provided by the Congressional Budget Office and as approved by the County Attorney's Office.
   b) Excavated Area
      Guarantee shall be a minimum of 1,000 dollars per acre of permitted excavation area.
   c) Littoral Zones
      The guarantee shall be a minimum of 10,000 dollars and shall be an amount of no less than 110 percent of the total estimated cost for planting, maintaining, and monitoring the required littoral shelves. ERM retains the option for requesting a second cost estimate for which the performance guarantee is based.
   d) Reclaimed Upland and Upland Planting Areas
      Guarantee shall be a minimum of 10,000 dollars and shall be an amount of no less than 110 percent of the total estimated cost for reclaiming, planting, maintaining, and monitoring the upland area and required upland planting areas. PZB retains the option for requesting a second cost estimate for which the guarantee is based.

6) Submittal and Approval of Guarantee
   Except in the case of an application by a political subdivision or agency of the State, all Applicants shall submit the guarantee instruments and obtain approval of the guarantee as provided below.
   a) Reclaimed Upland Area and Upland Planting Areas
      Guarantees for the reclaimed upland area and upland planting areas shall be submitted with the DRO application and approved prior to DRO approval of the Final Excavation Plan.
   b) Excavated Area and Littoral Zones
      Guarantees for the excavated area and littoral zones shall be approved by ERM prior to issuance of written approval of the Notice of Intent to Construct.
   c) Road Maintenance and Repair
      When required, guarantees for road maintenance and repair shall be approved by the Land Development Division prior to issuance by ERM of the Applicant's Notice of Intent to Construct.

7) Duration and Release
   The guarantee for the excavated area and upland reclamation area of Type 3 Excavation may be reduced once the "as-built" plan is approved. However, the guarantee shall continue to cover the upland planting and littoral planting areas until released by Palm Beach County.
   a) Excavated Areas for Type 3 Excavation
      At the request of the Applicant, the guarantees shall be released by ERM, after DRO certification of the final as-built reclamation plan, in accordance with Art. 4.B.10.C.5.g, Use Approval and Procedures.
b) **Upland Reclamation Area**
At the request of the Applicant, the guarantees shall be released by PZB, after DRO certification of the final as-built reclamation plan, in accordance with Art. 4.B.10.B.7.c.5), *Area of Record*.

c) **Littoral and Upland Planting Reclamation Areas**
The guarantees shall remain in effect a minimum of 730 days (two years) after reclamation is completed in accordance with all requirements of this Section. Guarantees shall not be released until approved plats or separate instruments are recorded and proof of recordation is provided to ERM and PZB, pursuant to Art. 4.B.10.B.7.d, *Performance Guarantee Requirements*. Following verification of successful completion of reclamation through approval of the submitted as-builds, area of record, monitoring reports, and, site inspection(s) by ERM and PZB, as applicable, guarantees shall be released.

d) **Road Maintenance and Repair**
When required, the guarantee shall be released by the County Engineer and any applicable road maintenance authority after certification of the final phase of the as-built plan and upon final inspection and acceptance of the repair, maintenance and condition of the streets within the radius of impact.

8) **PBC Use of Guarantee**
Should PBC find it necessary to use the performance guarantee for corrective work or to fulfill the Applicant’s reclamation, reconstruction or maintenance obligations as set forth herein, the Applicant shall be financially responsible for all legal fees and associated costs incurred by PBC in recovering its expenses from the firm, corporation or institution that provided the performance guarantee.

e. **Maintenance and Monitoring**
The following maintenance and monitoring program is required for all planted littoral zones and reclaimed planted upland areas.

1) **Excavation Activity**
The Applicant shall submit an annual report to the DRO indicating the status of the excavation activity. The report shall include, but not be limited to, the status of:
   a) the current phase(s) of excavation;
   b) all phases of excavation and reclamation activities (including date(s) of completion and anticipated dates of completion);
   c) amount of material extracted and amount of material removed from the site;
   d) condition of perimeter buffers and landscaping; and,
   e) status of compliance with conditions of approval and applicable requirements in this Section.

2) **Initial Maintenance and Monitoring of Reclaimed Upland Areas and Littoral and Upland Planting Areas**
The planted littoral zones and planted upland areas shall be inspected and monitored for at least one year after planting. Equipment storage, maintenance and service areas shall be monitored until completion of the excavation activity for contamination by regulated substances. The maintenance and monitoring program shall comply with the following requirements:
   a) **Maintenance**
   Inspections, monitoring, exotic plant species removal and replanting during each monitoring period shall be required to maintain the minimum:
      (1) 80 percent coverage criterion for the planted littoral zone from the 180-day monitoring period; and
      (2) 80 percent survivorship for the planted upland area from the 180-day monitoring period;

   b) **Exotic Plant Species**
   Complete removal of the following plant species from the planted littoral zone and upland areas, as applicable:
      (1) prohibited and invasive non-native plant species as defined by Art. 14.C, *Vegetation Preservation and Protection*; and
      (2) invasive species, such as cattails, primrose willows, and water hyacinth.
c) **Regulated Substances**
Inspections and monitoring of all equipment storage, maintenance and service areas shall be required to ensure the site has not been contaminated by regulated substances. Construction areas shall be maintained in accordance with the “Regulated Substance Best Management Practices for the Construction Industry.”

d) **Submittals for Monitoring Programs**
Submittal of monitoring reports for each monitoring period shall be required. The planted littoral zone reports shall be submitted to ERM and the reclaimed upland planting reports shall be submitted to the Zoning Division. These monitoring reports shall represent the monitoring periods commencing with a time zero report, 90-day, 180-day and 360-day reports.
The time zero monitoring report shall be submitted within 30 days of the initial planting. Each subsequent report shall be submitted within 30 days of the completion of the monitoring period. If following the first year of the maintenance and monitoring period, PBC finds the planted littoral or reclaimed planted upland areas to be in non-compliance with the provisions herein, the land owner or entity having maintenance responsibility may be required by PBC to extend their maintenance and monitoring period, until compliance with the maintenance and monitoring requirements is met.

e) **Content of Monitoring Reports**
Each monitoring report, including the time zero report, shall assess the species, numbers, and locations of planted littoral zones and reclaimed upland planting areas. The report shall also depict the equipment maintenance, storage and service areas and assess the condition of the ground as a result of possible leakage or spillage of regulated substances. The report shall include multiple photographs (panoramas are preferred) of the site clearly showing these areas. Photographs must be taken at approximately the same location(s) each time.
In addition, the report shall detail the species, numbers and locations of additional plantings that were made to attain the 80 percent survivorship/coverage criteria, if such plantings were necessary.

3) **Long-Term Maintenance and Monitoring of Reclaimed Upland Areas and Littoral and Upland Planting Areas**
After the first year, the land owner or entity having maintenance responsibility for the planted littoral zone and planted upland reclamation area, shall maintain these areas in the following manner.
a) The reclaimed upland areas shall maintain a minimum survivorship of 80 percent, and the planted littoral zone shall maintain a minimum coverage of 80 percent.
b) Exotic and invasive non-native plant species as defined by Art. 14.C, Vegetation Preservation and Protection, such as cattails, primrose willows and water hyacinth, shall be restricted to a coverage of less than ten percent of the required planted littoral zone. No exotic or invasive non-native plant species shall be permitted in the upland areas.

4) **Repair, Reconstruction Modification**
DRO approval shall be obtained prior to any reconfiguration of the approved lake or reclaimed upland area. Written approval from the Director of ERM shall be obtained prior to modification of the planted littoral zones.

8. **Administration and Enforcement**
a. **Administrative Waiver from Construction Criteria for Agricultural, WCAA, Type 2 and Type 3 Excavations**
   1) **Authority and Criteria**
   Administrative waivers from the slope, depth, or littoral zone standards contained in Art. 4.B.10.B.7, Technical Standards, for Agricultural, WCAA, Type 2, and Type 3 Excavations may be granted by ERM in accordance with the standards of this Section. ERM may grant the waivers to an Applicant upon demonstration by a preponderance of evidence, that such administrative waivers will not be injurious to the area involved or otherwise detrimental to the public welfare, and that special or unique circumstances exist to justify the administrative waivers based on one or more of the following conditions:
a) That the literal application of these standards will create an unreasonable hardship and that the special and unique circumstances do not result from the actions of the Applicant;
b) That a request for relief from the littoral planting requirements include an alternative plan with a contribution to the Pollution Recovery Trust Fund of twice the amount calculated by the formula for a guarantee located in Art. 4.B.10.B.7.d.5)c), Littoral Zones and for review and approval by the Director of ERM. If the littoral zone had been depicted on the site or master plan, a modification of the plan shall be processed in order to delete the littoral zone from the plan;

c) That appropriate technology and methods will be used to ensure consistency with the intent of the Code; or,

d) The proposed administrative waiver will not be adverse to the general intent and purpose of this Section.

2) Limitations
No administrative waiver shall be approved for those separation items in Art. 4.B.10.B.7.b, Construction Standards, unless the item specifically allows approval by ERM; nor for any mining or excavation operation location which will reduce hydraulic recharge distances to a public water supply well in excess of two percent; nor within 200 feet of a publicly-owned conservation area, environmentally sensitive land area, or publicly-owned Preservation Area. An administrative waiver may be granted for littoral areas within a lake supporting Bona Fide Agriculture operations. If the land use changes from Bona Fide Agriculture use, the littoral requirements for the new land use shall be required.

3) Review Process
The request shall be included with the Notice of Intent to Construct, unless a Notice of Intent to Construct has been previously approved. An appropriate fee and drawings of sufficient detail shall be required in order to provide the information needed to determine if granting approval of the waiver is appropriate. The application and drawings, excluding littoral planting plans, shall be signed and sealed by a professional recognized and approved by the Florida Department of Professional Regulation for this type of project.

a) Upon receipt of a request to deviate from the Construction Criteria, ERM shall have 30 days to request any additional information.

b) Within 30 days of receipt of the requested additional information, ERM may only request information needed to clarify the additional information supplied or to answer new questions raised by or directly related to the additional information.

c) If ERM does not ask for additional information within 30 days of receipt of the request, the request shall be deemed complete upon date of receipt.

d) If an Applicant fails to respond to a request for the fee or any additional information within 60 days, the request may be denied without prejudice. However, ERM may grant an extension of time as is reasonably necessary to fulfill the request for additional information. ERM action shall be approval or denial, and shall be included with the issued written approval of the Notice of Intent to Construct.

b. Violations, Enforcement, and Penalties

1) Violations
Violations not related to conditions imposed by the Notice of Intent to Construct excavation, may be referred to the Director of Code Enforcement as determined by the Director of ERM. For each day or portion thereof, it shall be a violation of this Section to:

a) fail to comply with a requirement of this Section, a condition of an approval or an authorized exemption granted hereunder;

b) fail to comply with the design specifications or littoral planting plan submitted with the Notice of Intent to Construct for which a written approval was issued by ERM;

c) alter or destroy the approved depths, slopes, contours, or cross-sections;

d) chemically, mechanically, or manually remove, damage, destroy, cut, or trim any plants in the littoral zones, except upon written approval by the Director of ERM;

e) dredge, excavate, or mine the lake or littoral zones without prior receipt of approval(s) from ERM and/or PZB;

f) cause water quality violations in excess of the standards contained in Chapter 62-302, F.A.C.; or,

g) dewater in Type 1A, Type 1B; and Agricultural Excavations unless otherwise permitted by a State agency, Federal agency, or the SFWMD.
c. **Enforcement**

Violation of each provision of this Section, any conditions of approval, or any of those violations listed in **Art. 4.B.10.B.8.b, Violations, Enforcement, and Penalties**, above, shall be deemed a separate violation and may be subject to fines up to 1,000 dollars per day per violation. In order to enforce compliance with the provisions of this Section, ERM, PZB and the County Engineer may issue a cease and desist order or require that future DRO certifications be denied or a Building Permit or CO be withheld. Violations of the provisions of this Section shall be punishable by one or more of the following:

1) Quadruple permit fees shall be assessed if permits were not obtained for violations involving activities which would otherwise have been permitable, as determined by ERM, PZB, or the Land Development Division.
2) This Section shall be enforced through the remedies as outlined in **Art. 10, Enforcement**. However, PBC is not prevented from enforcing the provisions of this Section by any other measures allowable by law, including but not limited to, F.S. ch. 125 and F.S. ch. 162, as may be amended.
3) If the Applicant has violated the provisions of this Section, or a condition of approval, staff may place the subject Development Order back on a BCC agenda for re-consideration in accordance with the provisions of **Art. 2.E, Monitoring of Development Orders (DOs) and Conditions of Approval**, and **Art. 10, Enforcement**.

d. **Restoration**

Damage to upland reclamation areas, planted littoral shelves, littoral plants and/or streets may result in an order to restore to the approved conditions. Excavation operations that have occurred without approval and receipt of written approval from ERM, PZB or the County Engineer, as applicable may result in an order to restore the site or streets in the radius of impact to preexisting conditions.

e. **Additional Remedies**

In addition to the sanctions contained herein, PBC may take any other appropriate legal action, including but not limited to, administrative action, and requests for temporary and permanent injunctions, to enforce the provisions of this Section.

f. **Use of Collected Monies**

All monies collected by ERM as civil penalties for violations of this Section shall be deposited in the PBC Pollution Recovery Trust Fund.

9. **Appeals**

An Applicant may appeal a final determination made by the appropriate authority that interprets excavation uses as contained in **Art. 1.B.1.A, Authority**, based on the appeal process in **Art. 2.A.14, Appeal**.

C. **Definitions and Supplementary Use Standards for Excavation Uses**

Before commencement of any excavation, approval shall be obtained pursuant to the procedures and standards defined in this Section.

1. **Agricultural Excavation**

a. **Definition**

Excavation necessary to support Bona Fide Agriculture production operations, including but not limited to the creation of ponds or lakes to construct accessory structures supporting the agricultural use, livestock ponds, canal laterals and roads, but excluding customary agricultural activities such as plowing and maintenance of canals and roads.

b. **Separation and Setbacks**

In addition to the separation requirements in **Art. 4.B.10.C.1, Agricultural Excavation**, shall maintain a minimum setback of 100 feet, measured from the inside edge of the lake maintenance easement to any adjacent property line.

c. **Maximum Depth**

Excavation activity shall not exceed 20 feet from OWL. This maximum depth may be exceeded if approved by ERM in accordance with **Art. 4.B.10.B.8, Administration and Enforcement**, provided the Applicant adequately ensures that chloride levels shall not exceed 250 parts per million (ppm) and Total Dissolved Solids (TDS) either does not exceed 500 ppm or is in accordance with Rule 62.520.420(2), F.A.C., in the excavated lake based on ground water sampling prior to construction, or the Applicant may provide reasonable assurance that the ambient off-site chloride and TDS levels will not be degraded based upon background levels. Additional sampling may be required by ERM during and after construction.
d. Sediment Sump
A sediment sump may be constructed at the excavated lake or pond inlet to a depth of 25 feet OWL. A sump shall not exceed five percent of the mined lake area.

e. Reclamation, Maintenance and Monitoring

f. Use Approval and Procedures
All applications for Agricultural Excavation shall include a detailed explanation of the proposed Bona Fide Agriculture use. This explanation shall demonstrate consistency with applicable industry standards and satisfy the definition requirements of Bona Fide Agriculture pursuant to Art. 1.H, Definitions and Acronyms. The excavation shall be the minimum necessary to implement the proposed Bona Fide Agriculture use.

1) Two Acres or Less – DRO
Agricultural Excavation consisting of two acres or less in surface area, may be approved pursuant to Art. 2.G.4.G, Development Review Officer (DRO). The DRO shall review for compliance with the standards of this Section and may approve the application with or without conditions.

2) Greater Than Two Acres – Conditional Use
Off-site removal shall apply the appropriate compatibility standards of Art. 4.B.10.C.5, Type 3 Excavation.

3) Additional Review
See Art. 4.B.10.C.5.g.1), Excavation Pre-Application Checklist.

g. Guarantee Requirements
Agricultural Excavation shall comply with the Guarantee requirements pursuant to Art. 4.B.10.B.7.d, Performance Guarantee Requirements.

h. Notice of Intent to Construct
In accordance with Art. 4.B.10.B.6, Notice of Intent to Construct, shall be required.

i. WCAA Excavation

1) Operational and Construction Standards
An application for WCAA Excavation shall comply with the standards in Art. 4.B.10.B.7.a, Operational Standards and Requirements, and Art. 4.B.10.B.8.b, Violations, Enforcement, and Penalties, and except for hours of operation.

2) Separations and Setbacks
In addition to the separation requirements in Art. 4.B.10.B.7.b.1), Separation, a WCAA Excavation shall maintain a minimum setback of 50 feet measured from the inside edge of the lake maintenance easement to any adjacent property lines.

3) Depth
The maximum depth for the excavated lake or pond shall not exceed 15 feet from OWL due to chloride and TDS considerations. This maximum depth may be exceeded if approved by ERM in accordance with Art. 4.B.10.B.8, Administration and Enforcement, provided the Applicant adequately ensures that chloride levels shall not exceed 250 parts per million (ppm) and Total Dissolved Solids (TDS) does not exceed 500 ppm or is in accordance with Rule 62.520.420(2), F.A.C., within the excavated lake or pond based on ground water sampling prior to construction. Additional sampling may be required during and after construction.

4) Sediment Sump
A sediment pump may be constructed at the excavated lake or pond inlet to a depth of 25 feet OWL. However, this sump shall not exceed five percent of the mined lake area.

5) Approval and Procedures
All applications for WCAA Excavation shall include a detailed explanation of the proposed Bona Fide Agriculture use. This explanation shall demonstrate consistency with applicable industry standards and shall satisfy the definition requirements of Bona Fide Agriculture pursuant to Art. 1.H, Definitions and Acronyms. Excavation shall be the minimum necessary to implement the Bona Fide Agriculture use.

a) Additional Requirement. See Art. 4.B.10.C.5.g.1), Excavation Pre-Application Checklist.
6) **Notice of Intent to Construct**  
In accordance with [Art. 4.B.10.B.6, Notice of Intent to Construct](#), shall be required.

2. **Type 1A Excavation**
   a. **Definition**  
   Excavation necessary to obtain fill for the construction of a Single Family dwelling or an accessory structure to a Single Family dwelling on a lot.
   b. **Lot Size**  
   A minimum of one acre.
   c. **Excavated Surface Area**  
   The maximum surface area of all excavation on the premises shall be less than two-tenths acre or 8,712 square feet.
   d. **Off-Site Removal**  
   Off-site removal of extracted material is prohibited.
   e. **Separation and Setbacks**  
   In addition to the separation requirements in [Art. 4.B.10.B.7.b.1), Separation](#), Type 1A Excavation shall maintain the following minimum setbacks, measured from the inside edge of the lake maintenance easement.
   1) 15 feet at the time of construction from any adjacent property line. The top of bank shall be a minimum of five feet.
   2) 50 feet from any potable water well.
   3) 100 feet from any septic system pursuant to [Art. 15.A, PBC Environmental Control Rule I – Onsite Sewage Treatment and Disposal Systems](#).
   f. **Slope**  
   If a lake excavated prior to June 16, 1992, does not comply with the minimum slope requirements of [Art. 4.B.10.B.7.b.2), Slopes](#), a minimum four-foot-high gated fence completely enclosing the excavated area may be substituted for the required slopes.
   g. **Depth**  
   Excavation activity shall not exceed ten feet in depth below OWL.
   h. **Reclamation**  
   The Applicant shall comply with the following reclamation requirements prior to issuance of a CO.
   1) Compliance with the slope and drainage and reclamation standards of [Art. 4.B.10.B.7.b, Construction Standards](#), shall be required.
   2) The Property Owner shall submit a Certificate of Compliance sealed by a registered Land Surveyor to the Building Division depicting:
      a) an as-built survey showing the location, size, and depth of the excavated area; and
      b) in cases where no permanent water body is created, the site plan submitted with the Building Permit shall serve as the reclamation plan.
   i. **Use Approval and Procedures**  
   The request shall be made concurrent with an application for a Building Permit. Approval shall be issued concurrent with receipt of a Building Permit for a Single Family dwelling.
      1) **Application Requirements**  
      The Building Permit plans shall be supplemented with the following information:
         a) **Site Plan**  
         A general site plan complying with the standards of this Section;
         b) **Statement**  
         A statement estimating the amount of excavated material, in cubic yards; and,
         c) **Notarized Authorization**  
         Notarized authorization from the Property Owner to excavate.
      2) **Determination of Sufficiency, Review and Decision**  
      A Building Permit shall be issued by PZB, with or without conditions of approval, after the application has been determined complete and in compliance with this Section.
   3. **Type 1B Excavation**
      a. **Definition**  
      Excavation necessary to obtain fill for the construction of a Single Family dwelling or an accessory structure to a Single Family dwelling on a lot.
      b. **Lot Size**  
      A minimum of two and one-half acres.
c. **Excavated Surface Area**
The maximum surface area of all excavation on the premises shall be less than 25 percent of the gross lot area and shall not exceed two acres.

d. **Off-Site Removal**
Off-site removal of extracted material is prohibited.

e. **Separations and Setbacks**
In addition to the separation requirements of [Art. 4.B.10.B.7.b, Construction Standards](#), Type 1 Excavation shall maintain the following minimum setbacks:
1) 30 feet at the time of construction from any adjacent property line.
2) 50 feet from any potable water well.
3) 100 feet from any septic system pursuant to [Art. 15.A, PBC Environmental Control Rule I – Onsite Sewage Treatment and Disposal Systems](#).

f. **Maximum Depth**
Excavation activity shall not exceed 15 feet in depth below OWL.

g. **Reclamation**
The Applicant shall comply with the following reclamation requirements prior to issuance of a CO.
1) Compliance with the slope angle, drainage, and reclamation standards of [Art. 4.B.10.B.7.b, Construction Standards](#).
2) The Property Owner shall submit a Certificate of Compliance sealed by a registered Land Surveyor to the DRO depicting:
   a) An as-built survey showing the location, size, and depth of the excavation.
   b) In cases where no permanent water body is created, the Building Permit site plan shall serve as the reclamation plan.

h. **Use Approval and Procedures**
The request shall be made concurrent with an application for a Building Permit. Approval shall be issued concurrent with receipt of a Building Permit for a Single Family dwelling.
1) **DRO Approval**
Pursuant to [Art. 2.C, Administrative Processes](#): DRO Approval shall be required. The DRO shall review for compliance with this Section and may approve the application with or without conditions.
2) **Duration**
A Type 1B Excavation permit shall expire 120 days from the date authorization is received to begin excavation activity. The DRO may grant one 90-day extension.

4. **Type 2 Excavation**
a. **Definition**
Excavation necessary to create a lake or lakes required to implement a Development Order.

b. **Location**
A Type 2 Excavation may be permitted to implement a Development Order for a principal use as allowed in [Art. 4.B.10, Excavation Uses](#), and to implement a Final Master Plan, Final Site Plan, or Final Subdivision Plan approved by the DRO.

c. **Standards**
An application for a Type 2 Excavation shall comply with the following requirements:
1) [Art. 4.B.10.B.7.a, Operational Standards and Requirements](#), and [Art. 4.B.10.B.7.b, Construction Standards](#);
2) Excavated area, Littoral zone and general upland reclamation requirements pursuant to [Art. 4.B.10.B.7.c, Reclamation Standards](#);
3) [Art. 4.B.10.B.7.d, Performance Guarantee Requirements](#);
4) [Art. 4.B.10.B.7.e, Maintenance and Monitoring](#); and,
5) [Art. 4.B.10.B.6, Notice of Intent to Construct](#).

d. **Separations and Setbacks**
In addition to the separation requirements in [Art. 4.B.10.B.7.b.1), Separation](#), Type 2 Excavation shall maintain a minimum setback of 30 feet, measured from the top of bank to the perimeter boundary of the Planned Development District, Subdivision, Final Site Plan, streets 80 feet in width or greater, and canal R-O-W. For the purpose of this separation and setbacks provision, the top of bank is considered the waterward edge of the lake maintenance easement.

e. **Depth**
The maximum depth of a Type 2 Excavation shall be in accordance with [Art. 4.B.10.C.1.c, Maximum Depth](#).
f. Use Approval and Procedures

1) DRO Approval

Prior to initiating Type 2 Excavation activities, DRO shall review the final site development plan for compliance with the standards of this Section and may approve with or without conditions.

2) Off-Site Removal of Excess Fill – DRO

DRO may approve removal of more than ten percent of the extracted material from the site if:

a) The Applicant demonstrates that the make-up of the natural soil contains an excessive amount of silt, rock, or muck and construction of required drainage structures or construction of required structural foundations require removal of an excessive amount of silt, rock, or muck; or

b) The removal of the material is the minimum necessary to accommodate on-site drainage requirements or structural fill requirements; and,
c) The impact of the excavated material will not cause adverse effects to internal Property Owners or internal streets.

3) **Off-site Removal of Excess Fill – Conditional Use**

A minimum of 90 percent of the fill shall be used on site, unless unusual site conditions exist. If an excess of ten percent of fill is proposed to be removed from a site and no unusual conditions exist justifying removal of more than ten percent of the excavated material, as specified in [Art. 4.B.10.C.4.f.2.](#) *Off-Site Removal of Excess Fill – DRO*, the application shall be subject to the following:

a) **Approval Process**

Apply for a Class A Conditional Use process, pursuant to the standards of [Art. 2.B.7.](#) *Types of Applications* for Conditional Uses, Development Order Amendments, Unique Structures, and Type 2 Waivers.

b) **Requirements**

The Applicant shall comply with the following standards:

(1) [Art. 4.B.10.B.7.a.](#) *Operational Standards and Requirements*.
(2) Littoral Planting Reclamation Standards in [Art. 4.B.10.B.7.c.3.](#) *Upland*.
(3) Upland Reclamation Standards in [Art. 4.B.10.B.7.c.4.](#) *Upland Planting*.
(4) Maintenance and Monitoring requirements for excavated areas, and littoral plantings in [Art. 4.B.10.B.7.e.](#) *Maintenance and Monitoring*.
(5) Buffer requirements in [Art. 4.B.10.C.5.i.2)b)(3).](#) Type 3A Excavation, Buffer.
(6) Setbacks shall be provided pursuant to Type 2 setback requirements in [Art. 4.B.10.C.4.d.](#) *Separations and Setbacks*.

c) **Frontage**

The development shall have direct frontage on and access to a Collector or Arterial Street depicted on the County’s Thoroughfare Identification Map.

d) **Location**

The following Type 3A standards shall apply, unless waived by the BCC after a finding of fact that waiver of these standards will not violate the compatibility standards, pursuant to [Art. 4.B.10.C.5.i.](#) *Compatibility Standards*.

4) **Excavation, Performed by Public Agency, To Provide Drainage for a Public Street**

a) Excavation activity located outside the street boundary, conducted solely to accommodate drainage for a public streets and performed or caused to be performed by contract with a public agency, as defined herein, shall comply with the standards below. The excavation activity shall:

(1) be on land owned by PBC, the State, or a Water Control District created by special act to operate under [F.S. ch. 298](#) (1996); or
(2) be on land granted by easement to and accepted by PBC, the State, or a Water Control District; and,
(3) be the absolute minimum necessary to comply with the surface water drainage requirements for the public streets.

b) For the purpose of [Art. 4.B.10.C.4.](#) *Type 2 Excavation*, authorization by PBC, FDOT, or a Water Control District to construct public streets shall constitute a valid Development Order. The excavation design and activity shall only be required to comply with these standards indicated below. No other provision applicable to Type 2 Excavation as contained in this Article shall apply. **[Ord. 2018-018]**

(1) Notice of Intent to Construct pursuant to [Art. 4.B.10.B.6.](#) *Notice of Intent to Construct*;
(3) Littoral zone and general upland reclamation requirements pursuant to [Art. 4.B.10.B.7.c.](#) *Reclamation Standards*; and,
(4) Maintenance and Monitoring requirements pursuant to [Art. 4.B.10.B.7.e.](#) *Maintenance and Monitoring*.

5. **Type 3 Excavation**

a. **Definition**

The extraction of minerals primarily for commercial purposes.
b. Classification of Types
   Type 2, or Agricultural Excavation that exceed established criteria, as defined in this Section, are
to be considered a Type 3 Excavation. Two classes of Type 3 Excavation (Type 3A and Type 3B) are
established to distinguish between the types of mining operations.

1) Type 3A Excavation
   Excavation activity that extracts materials from the earth and may require limited on-site
processing by using temporary or portable crushers, sifters and conveyor systems. A Type 3A
Excavation activity may use dragline, dredging or earthmoving equipment to perform the mining
operation provided the operation complies with the standards of this Section. The use of
explosive devices or permanent structures or equipment used to crush or sift material shall be
prohibited.

2) Type 3B Excavation
   Excavation activity that extracts materials from the earth and may require extensive processing
of the material on site. Type 3B Excavation may use dragline, dredging, earthmoving
equipment to perform the mining operation. The use of explosives and heavy industrial
equipment to crush, sift and transport the material on site may be permitted subject to
compliance with the standards of this Section.

c. Standards
   An application for a Type 3 Excavation shall comply with the following requirements:
   1) Operational and construction standards pursuant to Art. 4.B.10.B.7.a, Operational Standards
      and Requirements, and Art. 4.B.10.B.7.b, Construction Standards.
   2) Excavated area, Littoral zone and upland reclamation requirements pursuant to Art.
      4.B.10.B.7.c, Reclamation Standards.
   4) Art. 4.B.10.B.7.e, Maintenance and Monitoring.

d. Location
   A Type 3 Excavation may be allowed in accordance with Art. 4.B.10, Excavation Uses. Mining may
be allowed with limitations in the zoning districts identified below.

1) AP Zoning District in the AP FLU Designation
   Mining shall be limited to the support of public road construction projects, agricultural activities,
or water management projects associated with ecosystem restoration, regional water supply
or flood protection, on sites identified by the SFWMD or the U.S. Army Corps of Engineers
where such uses provide viable alternative technologies for water management. Mining shall
demonstrate compliance with standards in Art. 4.B.10.C.5.i, Compatibility Standards.

e. Depth
   The maximum depth of a Type 3 Excavation shall be in accordance with Art. 4.B.10.C.1.c,
Maximum Depth.

f. Accessory Use
   An Asphalt or Concrete Plant shall be allowed as an accessory use to a Type 3B Excavation,
subject to DRO approval and provided that:
   1) the site is a minimum of 500 acres;
   2) the use is separated at least one-half mile from any residential use or district; and,
   3) direct access to the plat is provided from an Arterial Street.

g. Use Approval and Procedures
   A Class A Conditional Use approval is required for a Type 3 Excavation, in accordance with Art.
2.B, Public Hearing Processes. A Type 3 Excavation shall require an additional level of review that
exceeds the County’s current scope of review to establish that the request will not have a significant
adverse impact to water quality or the overall health of available water resources.

1) Excavation Pre-Application Checklist
   Concurrent with submittal of an excavation application for the DRO certification for public
hearing, the Applicant shall secure the information described on the excavation pre-application
checklist and shall use this information as the basis for a pre-application meeting with DEP.
This pre-application information and meeting is necessary to obtain a Preliminary Assessment
Letter (PAL) from the DEP, Bureau of Mines and Minerals. The Pre-Application Checklist is
available from the Zoning Division, as amended periodically by the Executive Director of PZ&B.
   a) Preliminary Assessment Letter (PAL)
      The Applicant shall gather the information described on the checklist and conduct a pre-
application meeting with the DEP. The County application shall not be determined to be
sufficient without the PAL or its equivalent as stated in Art. 4.B.10.C.5.g.1)b), Alternative to the Preliminary Assessment Letter. Should the DEP identify certification issues regarding the application, these issues must be resolved prior to certification of the application for public hearing.

b) Alternative to the Preliminary Assessment Letter
In lieu of a Preliminary Assessment Letter, the Applicant may submit one of the following to the County:
(1) An Environmental Resource Permit; or
(2) Request for Additional Information demonstrating no apparent concerns will be generated from the application.

c) Conditions of Approval
The DEP may recommend conditions of approval to the BCC to resolve issues related to its regulations.

2) Water Control or Management District
Concurrent with submittal of an excavation application for the DRO certification for public hearing, the Applicant shall submit a duplicate copy to the Zoning Division to be forwarded to the Water Control or Management District, whichever is applicable, that has jurisdiction to maintain roads and drainage in the area. The Water Control District may provide comments to the DRO to be included in the staff report for presentation to the BCC.

3) Final DRO Approval
Prior to starting any activity associated with the excavation project, the Applicant shall submit an excavation plan to the DRO for review and approval in accordance with Art. 2.C, Administrative Processes.

   a) The Applicant shall submit a phasing plan complying with the requirements of Art. 4.B.10.B.5, Supplemental Application Requirements, and Art. 4.B.10.B.6, Notice of Intent to Construct.

   b) Once reclamation and rehabilitation of the preceding phase of excavation has commenced, a subsequent phase of excavation may begin after receipt of all guarantees, required by Art. 4.B.10.B.7.e, Maintenance and Monitoring, and written authorization by the DRO.

   c) Prior to final site approval by the DRO, ERM shall confirm that the Applicant has provided all necessary State final approved permits.

4) Amendment to Development Order
If amendments to the BCC approval are necessary to accommodate other State permitting requirements, and provided these changes are within boundaries of the existing BCC approval, these amendments shall be allowed at final plan approval by the DRO.

5) Haul Agreement
The BCC may require, as a condition of approval, for an executed agreement for the proposed haul in accordance with Art. 4.B.10.B.7, Technical Standards, prior to issuance of the Notice of Intent to Construct by ERM.

6) Notice of Intent to Construct
Notice of Intent to Construct shall be submitted to and receive approval from ERM in accordance with Art. 4.B.10.B.6, Notice of Intent to Construct, prior to initiating any on-site excavation activities.

7) Reclamation Plan Approval and Release of Performance Guarantees
Prior to the release of any performance guarantee. The DRO shall approve an “as built” reclamation plan. The plan shall include certified as-built drawings and written certification, bearing the seal of an engineer registered in the State of Florida, certifying compliance with Art. 4.B.10.B.7, Technical Standards, (excluding littoral and upland planting requirements), and that all construction related Development Order conditions and guarantees have been satisfied. Performance guarantees for planting areas shall be released in accordance with Art. 4.B.10.B.7.e, Maintenance and Monitoring.

h. Annual Report
For the purpose of Type 3 Excavation, the owner shall submit an Annual Report to Monitoring on the anniversary date of the BCC approval date. The Annual Report is necessary to monitor the intent of the conditional use approval and applicable BCC conditions. In addition, the report is to ensure compliance and update the Agency requirements as listed below:
1) General
   a) Acres mined to date;
   b) Tonnage removed/sold including a copy of the resource extraction fee receipt to the County;
   c) Status of each phase;
   d) Updates to master/site plans;
   e) Documentation that the intended use of the material complies with County requirements, such as, but not limited to, the quarry’s status with FDOT and other usages for the mined aggregate;
   f) Status of compliance with conditions contained within the approved Resolution(s);
   g) Status of compliance with all required permits including the most recent compliance inspection from subject agencies, and status of any identified notice of noncompliance/violations;
   h) Full stamped, executed or signed copies, including exhibits and plans, of required permits from all participating agencies including modifications or updates as they occur; and,
   i) Certification and documentation that all seismograph instruments have been re-calibrated during the calendar year.

2) Agencies
   Address the following agency requirements:
   a) Archaeological
      (1) Status of found artifacts and their location(s); and
      (2) Copy of notification(s) to County and State Archaeologist and current status.
   b) Engineering
      (1) Status of potential road construction requirements, signalization and R-O-W acquisitions.
   c) Environmental
      (1) Status of Notice of Intent to Construct (NIC) conditions of approval and compliance with Administrative waivers;
      (2) Status of extraction fee; and,
      (3) Water quality data from designated sampling location from FDEP.
   d) Health
      (1) Status of compliance for any onsite sewage treatment and disposal systems;
      (2) Status of compliance for any onsite drinking water systems; and,
      (3) Status of compliance with BMP’s for mosquito control including the need for aerial spraying.
   e) Planning
      (1) Status of possibility for the mined areas to be utilized for Water Management or ecosystem restoration purposes with a letter or any executed binding agreements from each corresponding agency discussing pertaining to the reclaimed mined areas future proposed uses.
   f) Zoning
      (1) Copy of the daily blasting log;
      (2) Copy of the State Fire Marshall’s blast permit; and,
      (3) Status of the upland reclamation requirements.

i. Compatibility Standards
   A Type 3 Excavation shall be reviewed to assure the proposed excavation is compatible with surrounding land uses and complies with the applicable separation and setback standards and to ensure there are no negative impacts as defined herein. The BCC shall not approve the application if a finding is made that the use will be incompatible with surrounding land uses. For the purposes of this requirement, incompatible means negative impacts caused to surrounding land uses because of proximity or direct association of contradictory, incongruous, or discordant land uses or activities, including, but not limited to, the impacts of noise, vibration, dust, traffic, smoke, odors, toxic matter, radiation, and similar environmental conditions.

1) General
   The following standards shall apply to both Type 3A and Type 3B mining activities.
   a) Location and Access
      Local Residential Streets shall not be used for access or as a haul route. The site shall front on and have direct access to an Arterial or Collector Street designated on the County’s
Future Thoroughfare Identification Map. In cases when the street on the Thoroughfare Identification Map is not paved, the BCC may allow a Type 3 Excavation to locate and have access to the street provided the BCC makes a finding of fact that the use of the street will not cause an incompatible effect on surrounding residential uses, and may condition the project to obtain a haul permit in accordance with Art. 4.B.10.B.7.a.10), Hauling Standards.

(1) Restrictions in the RR FLU Designation
Commercial excavation shall be prohibited in neighborhoods which support developed Single Family residences on 60 percent of the valid lots of record. For the purposes of this requirement, neighborhoods shall be defined as an area contained within a platted subdivision, a rural unrecorded subdivision an approved affidavit of exemption, an area which has prepared a neighborhood plan in accordance with the Plan, or is in an area with lots of similar size. Commercial excavation located in an area with a rural residential land use designation that do not satisfy the definition of neighborhood above, shall have a minimum of 100 acres and 500 feet of frontage with direct access to an Arterial or Collector Street as specified herein.

b) Separation from Other Land Uses
Minimum separations from protected land uses are defined in Art. 4.B.10.C.5.i, Compatibility Standards. Unless otherwise specified, separation shall be measured from the outermost edge of the excavated area (top of bank), equipment, stockpiles, buildings, or structures, to the closest structure of a protected land use. The BCC may reduce the required separation distance based on the compatibility of the use with the adjacent area, and the remoteness or proximity of adjacent incompatible uses, provided the reduction complies with the intent of the compatibility standards in Art. 4.B.10.C.5.i, Compatibility Standards. The BCC shall state the basis for the reduced separation and make a finding of fact that the reduction should not negatively impact adjacent uses. If the separation is reduced, the BCC may require increased setbacks, buffering and other restrictions as necessary to protect surrounding land uses.

(1) Residential Uses
For the purposes of this Section, existing residential uses shall be defined as a residential lot supporting a residence in a platted subdivision, a rural unrecorded subdivision, an approved affidavit of exemption, a plat waiver, or other recorded instrument and is not located within the boundary of the excavation project.

c) Setbacks
Setbacks shall be measured from the outermost edge of the excavated area (top of bank), structure, building, equipment, or stockpile to the boundary of the excavation project.

d) Fence
If mining activity is conducted within one-half mile of a residential use, the mining operation shall be completely enclosed by a minimum six-foot-high fence, wall, or natural barrier and shall have signage posted to prohibit trespassing.

e) Noise
Airborne noise produced from the excavation activity shall comply with the noise provisions in Art. 5.E, Performance Standards, as measured at the nearest inhabited structure. The sound level limits are allowed to increase for a limited duration. For this limited period, noise generated by excavation projects may increase up to ten decibels more than permitted by Table 5.E.4.B, Maximum Sound Levels. In addition, the noise level may increase to a maximum of 120 decibels once each weekday (Monday through Friday) for a maximum of ten seconds.

2) Type 3A Excavation
a) Restrictions in the RR FLU Designation
(1) Lot Size
A minimum of 40 acres.

(2) Minimum Surface Area
The maximum excavated surface area shall not exceed 30 percent of the gross area contained within the boundary of the excavation project.
b) General
The following standards shall apply to a Type 3A Excavation:

(1) Minimum Separations and Setbacks
In addition to the separation requirements in Art. 4.B.10.B.7.b, Construction Standards, a Type 3A Excavation shall maintain the following separations and setbacks from adjacent uses as provided below.

(a) Separations from Residential Land Uses
Separation from an existing residence shall be a minimum of one-quarter mile, measured from the property line of the excavation project to the inhabited structure.

(b) Setbacks

Table 4.B.10.C – Setbacks

(2) Stockpile Height
Stockpile height shall be limited to 30 feet.

(3) Buffer
A buffer shall be preserved or installed along a property lines in accordance with the provisions below. The buffer shall be planted and maintained in accordance with the standards of Art. 7.C, Landscape Buffer and Interior Landscape Requirements, as applicable.

(a) Existing Vegetative Buffer
If a substantial native or non-native, non-invasive vegetative buffer exists, then the vegetation shall be utilized as an Incompatibility Buffer and preserved along the entire perimeter of the site, except for an approved access area. To be considered substantial, the buffer shall provide an opaque screen and be a minimum depth of one 100 feet. If the 100-foot buffer is not opaque, then native vegetation complying with the standards of a Type 3 Incompatibility Buffer shall be required to be planted to supplement the existing vegetation and shall form a solid visual buffer within two years. All native vegetative buffers shall be protected during the duration of the excavation activity in accordance with the standards in Art. 7.E, Existing Native Vegetation, Prohibited, and Controlled Plant Species, and in Art. 14.C, Vegetation Preservation and Protection.

(b) Existing Prohibited Vegetative Buffer
To provide an instant buffer the BCC, by condition of approval, may permit existing prohibited species to be maintained within the setbacks for a Type 3A Excavation until completion of the excavation activity. In such cases the prohibited species shall be removed prior to DRO approval of the as-built drawings for the final phase of excavation, provided the last phase is a minimum of 25 acres. A landscape buffer as required by applicable Sections of Art. 7.C, Landscape Buffer and Interior Landscape Requirements, shall be installed in conjunction with subsequent development.

(c) No Existing Vegetative Buffer
If a buffer does not exist along the areas defined below, then an opaque native buffer shall be installed complying with the standards of a Type 3 Incompatibility Buffer. The buffer shall be supplemented with a planted berm, a solid landscape barrier, or combination thereof to reach a height of eight feet in two years. The BCC may require the buffer to be planted to simulate natural conditions. This buffer shall be installed adjacent to:
(1) all streets;
(2) all residential zoning districts;
(3) lots supporting existing or proposed residential uses in the AR Zoning District.

Unless otherwise determined by the BCC, a buffer shall not be required.
adjacent to land in agricultural production in the AP, or SA Zoning Districts nor in the AR Zoning District if the land is used solely for Bona Fide Agriculture purposes; and,

(4) commercial zoning districts.

3) **Type 3B Excavation**
   a) **Restrictions in the RR and SA FLU Designation**
      (1) **Lot Size**
          A minimum of 100 acres.
      (2) **Maximum Surface Area**
          The maximum excavated surface area shall be determined by the BCC.
   b) **General**
      A Type 3B Excavation shall comply with the following criteria:
      (1) **Minimum Separations and Setbacks**
          In addition to the separation requirements in Art. 4.B.10.B.7.b, Construction Standards, a Type 3B Excavation, except those that lie in the area defined as the WCAA, shall comply with the separation and setback regulations below. Excavation projects in the WCAA shall be evaluated on a case-by-case basis in accordance with the compatibility criteria Art. 4.B.10.C.5.i, Compatibility Standards, and shall have separation requirements set by the BCC.

      (a) **Separation from Residential Uses**
          Separations from residential uses, shall be a minimum of one-eighth of a mile, in all directions measured in accordance with Art. 4.B.10.C.5.i.1)b), Separation from Other Land Uses, above.

      (b) **Setbacks**
          Minimum setbacks shall be provided based on separations from uses as indicated below.

      (c) **Separation from Commercial and Industrial Uses**
          Commercial: One-half mile
          Industrial: One-eighth mile

(2) **Mining Impact Study**

A Mining Impact Study shall be submitted for a Type 3 B Excavation in the WCAA and for projects which the Applicant requests a reduction in the required separations. The study shall detail all methods and procedures for material extraction, processing, storage and hauling operations. At a minimum the study shall include the time of day blasting will occur, the maximum number of holes to be shot each occurrence, including the type of explosive agent, maximum pounds per delay, method of packing and type of initiation device to be used for each hole. The study shall include a blasting schedule and establish noise and vibration standards complying with Art. 4.B.10.C.5.i, Compatibility Standards. The study shall also demonstrate how these operations will impact surrounding land uses.

(a) Prior to certification of an application for inclusion on a public hearing agenda, the DRO may retain a technical consultant to advise the PBC of the adequacy of the standards established in conjunction with the Mining Impact Study. The cost of PBCs consultant shall be borne by the Applicant.

(3) **Noise and Vibration Monitoring Report**

The Applicant shall monitor all blasting and other mining activities and record resultant noise and vibrations. PZB may, at any time, require the Property Owner to submit monthly monitoring reports, indicating the number, time, peak over pressure (noise)
and vibration caused by each activity. If requested, the Property Owner shall provide the noise and vibration monitoring report within two working days from the date of the request.

(4) **Buffer**

A buffer shall be installed along all property lines as specified below. The buffer shall be planted and maintained in accordance with the standards of Art. 7, Landscaping.

(a) **Existing Native Vegetative Buffer**

Existing native vegetation within 100 feet of the property line shall be preserved along the entire perimeter of the site, except for an approved access area.

(b) **Existing Prohibited Vegetative Buffer**

To provide an instant buffer along the entire perimeter of the site, the BCC, by condition of approval, may permit existing prohibited species to be maintained in the setbacks until completion of the excavation activity. In such cases, the prohibited species shall be removed prior to DRO approval of the as-built drawings for the final phase of excavation, provided the last phase is a minimum of 25 acres. A landscape buffer as required by Art. 7.C, Landscape Buffer and Interior Landscape Requirements, shall be installed in conjunction with subsequent development.

(c) **Type 3 Incompatibility Buffer**

Sites within a one-quarter mile of a public or private streets, which does not support an existing opaque native or non-native, non-invasive vegetative buffer shall install a Type 3 Incompatibility Buffer. The buffer shall be supplemented with a planted berm, a solid landscape barrier, or combination thereof.

(d) **No Existing Vegetative Buffer**

If a buffer does not exist along the areas defined below, then an opaque native buffer shall be installed complying with the standards of a Type 3 Incompatibility Buffer. The buffer shall be supplemented with a berm, a solid landscape barrier, or combination thereof to reach a height of eight feet in two years from the date of installation. The BCC may require the buffer to be planted to simulate natural conditions. This buffer shall be installed adjacent to:

(a) All residential zoning districts; and

(b) Lots supporting existing or proposed residential uses in the AR Zoning District.

Unless otherwise determined by the BCC, a buffer shall not be required adjacent to land in agricultural production in the AP or AR Zoning District if the land is used solely for Bona Fide Agriculture purposes.

c) **Hours of Operation**

Excavation and hauling activity shall occur only between the hours of 6:00 a.m. and 7:00 p.m., Monday through Friday and 9:00 a.m. to 5:00 p.m. on Saturday, unless otherwise determined by the BCC. Blasting activity shall be limited to 10:00 a.m. to 5:00 p.m., Monday through Friday.

d) **Notice of Intent to Construct**

Compliance with Art. 4.B.10.B.6, Notice of Intent to Construct.

j. **Extraction Fee for Impacts**

To offset the impacts of mining, a natural resource extraction fee is to be provided yearly for this mining operation from the operators of this mine or its successors. The basis for the extraction fee is calculated at five cents per ton of material sold from the mine. The tonnage will be calculated at the end of each calendar year with the information provided to ERM by January 31 of the succeeding year with the payment of five cents per ton provided by February 15. The funds will be used for environmental enhancement and compliance and monitoring activities which include, but are not limited to: Purchase land; restore land to a more natural state; and, enhance the flora and fauna of already preserved natural areas. The natural resources extraction fee shall escalate annually at the rate prescribed by F.S. § 373.41492(5) as amended. In the event the legislature of the State of Florida or the County imposes, by legislation, ordinance, or other means, an extraction fee, tax, or charge, then this natural resources extraction fee shall be reduced by the same amount.

**Use Approval Process Key:**

- **P** Permitted by Right
- **D** Subject to DRO Approval
- **A** Subject to BCC Approval (Class A Conditional Use)
- **B** Subject to Zoning Commission Approval (Class B Conditional Use)
- **X** Prohibited Use, unless stated otherwise within Supplementary Use Standards

(1) Supplementary Use Standards for each use must be reviewed regardless of the approval process set forth in the Use Matrix. Refer to the numbers in the Supplementary Use Standards column.
B. General Standards and Application Requirements

1. Design Standards
   a. All Temporary Uses, which includes all related activities, structures, vehicles, and equipment shall not be located in a manner that distracts motor vehicle operators, or causes any vehicles to stop or park in violation of the law or official traffic-control devices. [Ord. 2018-002]
   b. All Temporary Uses and temporary structures shall not be located in the required setbacks, parking, driveway aisles or loading areas, vehicular maneuvering areas, fire lanes, landscape buffers, sidewalks, or ADA accessible routes, unless stated otherwise herein. [Ord. 2018-002]

2. Signage
   All signage for Temporary Uses shall comply with Art. 8, Signage, unless otherwise stated herein.

3. Electric Service
   All electrical use shall meet the requirements established by the PBC Chief Electrical Inspector and PBC Fire-Rescue Department, and the Applicant shall obtain a Building Permit for an electrical connection or generator for temporary power, if applicable.

4. Palm Beach County Parks
   Approvals for Temporary Uses located within Palm Beach County Parks shall be submitted to and reviewed by the PBC Parks and Recreation Department.

5. Submittal Requirements
   In addition to the requirements pursuant to Art. 2.C.5.D, Temporary Use, the following documentation shall be provided by the Applicant: [Ord. 2018-002]
   a. Consent
      The Applicant shall obtain and submit as part of their application, consent from the Property Owner(s) or a POA, of which has ownership or control over the property where the Temporary Use will be located.
   b. Liability and Insurance
      The Applicant shall submit:
      1) A proof of liability insurance listing the BCC as additionally insured and certificate holder. It shall be paid in full covering the period for which the permit is issued, in the minimum amount of 500,000 dollars per occurrence; and
      2) A hold harmless affidavit, which holds PBC harmless for any liability connected with the operation.

C. Definitions and Supplementary Use Standards for Specific Uses

1. Communication Cell Sites on Wheels (COWs)
   a. Definition
      A temporary facility utilized to ensure adequate telecommunications capacity during periods of high usage or during periods when traditional modes of communication are unavailable. COWs consist of a folding or telescoping monopole or guyed structure, with attached antenna, mounted on a trailer or truck.
   b. Zoning Districts
      1) Non-Residential Districts
         a) COWs Greater Than 50 Feet in Height
            COWs greater than 50 feet in height located on parcels with non-residential zoning designations shall be subject to the following:
            (1) Setback
               The structure shall meet the greater of the setback requirements of the applicable zoning district or a distance equal to 110 percent of its height.
            (2) Separation
               The structure shall be separated a minimum of 300 percent of its height from any residential structure on an adjacent parcel.
         b) COWs 50 Feet in Height or Less
            COWs 50 feet in height or less, located on parcels with non-residential zoning designations are subject to the following:
            (1) Setback
               The structure shall meet the setback requirements of the applicable zoning district, provided that a commercial power source (e.g., electric) is utilized, in lieu of petroleum-based auxiliary power (e.g., generator).
            (2) Separation
               The structure shall be separated a minimum of 150 percent of its height from any residential structure on an adjacent parcel.
(3) Other
COWs not utilizing a commercial power source shall be subject to the setback requirements of Art. 4.B.11.C.1.b.1)a), COWs Greater Than 50 Feet in Height.

2) Residential Districts
a) COWs Greater Than 50 Feet in Height
COWs greater than 50 feet in height located on parcels with residential zoning designations shall be subject to the following:

(1) Setback
The structure shall meet a setback from the property lines equal to 150 percent of its height.

(2) Separation
The structure shall be separated a minimum of 300 percent of its height from any residential structure on an adjacent parcel.

b) COWs 50 Feet in Height or Less
COWs 50 feet in height or less, located on parcels with residential zoning designations are subject to the following:

(1) Setback
The structure shall meet a setback from the property lines equal to 75 percent of its height; provided that a commercial power source (e.g., electric) is utilized, in lieu of petroleum-based auxiliary power (e.g., generator).

(2) Separation
The structure shall be separated a minimum of 150 percent of its height from any residential structure on an adjacent parcel.

(3) Other
COWs not utilizing a commercial power source shall be subject to the setback requirements of Art. 4.B.11.C.1.b.1)a), COWs Greater Than 50 Feet in Height, above.

c. Use Limitations
COWs shall be allowed only in association with recognized large-scale Special Events with a minimum projected daily attendance of 30,000 or greater. The Zoning Director may consider allowing COWs for events with projected attendance of less than 30,000 people. The Applicant shall provide documentation that the existing communication facilities cannot accommodate the increase in usage.

d. Fencing
The COW shall be enclosed by a temporary fence a minimum of six feet in height, or other barrier approved by the Zoning Director.

e. Removal Bond and Agreement
The Applicant shall execute a removal agreement and post a 50,000.00-dollar removal bond, subject to approval by the Zoning Director and County Attorney.

f. States of Emergency
The requirements of this Section may be waived by the PZB Executive Director in the case of a declared State of Emergency, as provided by law.

2. Day Camp
a. Definition
An establishment which provides care, protection, and programmed activities for children five years of age and older for a period of less than 24 hours per day.

b. Duration
Maximum 16 weeks per calendar year.

c. Operation
This use shall not operate as a Day Care as defined and regulated by the Department of Children and Family Services.

d. Accessory Use
A Day Camp for 200 or fewer children may be Permitted by Right as an accessory use to a legally established institutional, civic, recreational, or educational use.
3. Mobile Retail Sales  
   a. Definition  
      General Retail Sales, including the sale of food, from a mobile vehicle or a portable trailer without a fixed or permanent location. [Ord. 2020-020]
   b. Exception  
      Transient sales vehicles that travel to several locations in one day, and spend less than two hours in the same location, may be exempt from ZAR approval process and these requirements. [Ord. 2019-005]
   c. Location  
      1) Sites must comply with parking space requirements outlined in Table 6.B.1.B, Minimum Parking and Loading Requirements prior to applying for a Mobile Retail Sales. [Ord. 2018-002]
      2) The first Mobile Retail Sales vendor approved on a site may occupy up to two of the required parking spaces. Additional Mobile Retail Sales vendors may occupy on-site parking spaces only when those spaces are in excess of Table 6.B.1.B, Minimum Parking and Loading Requirements.
   d. Setbacks  
      The use shall be set back a minimum of 200 feet from any property line of an existing residential use, unless: [Ord. 2020-020]  
      1) a permanent building or structure blocks the view of the Mobile Retail Sales; or [Ord. 2020-020]  
      2) a minimum 80-foot Local Commercial Street separates both uses. [Ord. 2020-020]
   e. Number of Vendors  
      A maximum of three Mobile Retail Sales vendors per development, provided they comply with the location above.
   f. Operation  
      1) All operations, equipment, merchandise, and related activities shall be contained within the mobile vehicle or portable trailer.
      2) All mobile vehicles and portable trailers shall vacate the site by midnight, unless otherwise stated within Art. 5.E.5, Hours of Operation, whichever is more restrictive.
   g. Roadside Vendors  
      Applications for roadside vendors located within Palm Beach County R-O-Ws shall be submitted to and reviewed by the PBC Traffic Division in accordance with Roadside Stands and Vendors, Chapter 13, Article V of the PBC Code, as amended.

4. Real Estate Sales Model and Management Office, Non-PDD  
   a. Definition  
      A residential unit used for real estate marketing and sales as a builder’s office, and for other services directly associated with the sale of residential units. [Ord. 2019-005]
   b. Duration  
      The DO shall be valid for five years from the date of issuance and may be renewed for an additional five years. [Ord. 2018-002]
   c. Location  
      Shall be located on the property with access directly from a paved street. [Ord. 2019-005]  
      1) Exception  
         Sales Model or Office may be located off site for properties that are in Jupiter Farms, The Acreage, or Palm Beach Country Estates. [Ord. 2019-005]
   d. Parking  
      The driveway and required handicap spaces shall be the only paved parking areas.
   e. Signage  
   f. Storage  
      Outdoor storage of construction material, supplies, or equipment shall not be permitted.
   g. Number  
      A builder may construct and operate a maximum of two manned and two unmanned models in a platted residential subdivision which is not in a PUD, or in one of the following residential areas:  
      1) Jupiter Farms.
      2) The Acreage.
      3) Palm Beach Country Estates.
h. Operation
   1) A builder’s office may be allowed provided it is limited to the garage area.
   2) Unmanned models shall not have employee office space.
   3) Sales shall be limited to new units built by the company operating the sales model.

i. Completion Agreement
   All sales models, including those in existence prior to January 1, 1998, shall execute a completion agreement in a manner and form acceptable to the County Attorney. The completion agreement shall include any modification(s) necessary to convert the model to a residential use.
   1) Existing Models
      All sales models existing on January 1, 1998 shall file a completion agreement with PBC by July 1, 1998. This agreement shall specifically identify all improvements, which are not consistent with the provisions of this Section, such as but not limited to additional parking or location on unpaved roads. At the time of executing the completion agreement, all signage shall comply with the requirements of this Section.

j. Modifications
   Non-residential interior modifications shall be prohibited. The following improvements may be permitted only within the garage of the model:
   1) Room divider partitions;
   2) Electrical improvements; and,
   3) A temporary facade in lieu of a garage door.

k. Removal
   The temporary office shall be removed from the site no later than 30 days after the final CO has been issued for the last residential unit. [Ord. 2019-005]

5. Real Estate Sales and Management Office, PDD or TDD
   a. Definition
      An office for the sale and resale of new and existing residential units. For RVPD, units shall mean RV sites. [Ord. 2019-005]
   b. Submittal Requirement
      The Applicant shall submit a Regulating Plan showing the location of the Sales Office and required parking. A notarized removal agreement shall be executed and submitted concurrently with the application. [Ord. 2019-005]
   c. Location
      The Sales Office may be allowed in a Residential, Commercial, Private Civic, or Recreation Pod. Sales of RV sites may be located within the Recreation Pod of the RVPD. A Sales Office shall comply with the setback requirements in Table 3.D.1.A, Property Development Regulations (PDRs), and shall be located so as not to interfere with on-site construction operations and access. [Ord. 2014-025] [Ord. 2019-005]
   d. Access
      Temporary access to the Sales and Management Office may be approved by the DRO, and shall be limited to one year. Extension may be approved by the DRO. [Ord. 2019-005]
   e. Parking
      A minimum of two parking spaces, plus one for each employee on the shift of greatest employment, shall be provided. All parking areas, with the exception of handicap spaces and access, shall be provided on a hard surface of pavement, asphalt, shell rock, or mulch, provided the subgrade is compacted. Handicap spaces and access shall be provided in accordance with Art. 6.B.1.C, Parking Spaces for Persons Who Have Disabilities. [Ord. 2019-005] [Ord. 2020-020]
   f. Signs
      Refer to Art. 8.D, Temporary Signs. [Ord. 2019-005]
   g. Removal
      The temporary office shall be removed from the site no later than 30 days after the final CO has been issued for the last residential unit. [Ord. 2008-037] [Ord. 2019-005]
      1) RVPD
         The temporary use shall be removed upon completion of the project, CO of a permanent RV site Real Estate Sales Office, or upon expiration of the maximum time to commence development for the last phase. The BCC may impose a Condition of Approval with a specific date for compliance. [Ord. 2014-025] [Ord. 2019-005]
h. Sale
   1) Pod
      A temporary Real Estate Sales Office for the sale of new units shall be permitted only in a Residential Pod or other temporary location approved by the DRO. Sales shall be limited to only new units in the pod. [Ord. 2019-005]
   2) Project
      A temporary Real Estate Sales Office for the sale and resale of units in the entire project, or phase of a project, shall be permitted in a Residential Pod, Private Civic Pod, Commercial Pod, or Recreation Pod, subject to approval by the DRO. A temporary Real Estate Sales Office serving an entire project shall only be permitted within a planned development and/or phase approved for 300 or more units. Sales and resales shall be limited to only units within the planned development. [Ord. 2019-005]

i. Resale
   Resale of existing units from a temporary Real Estate Sales Office shall cease when the remaining number of units without a CO in the project, or phase, as applicable, reaches the following:

<table>
<thead>
<tr>
<th>Number of Units in a Project or Phase</th>
<th>Units Remaining without a CO</th>
</tr>
</thead>
<tbody>
<tr>
<td>≥ 1,000</td>
<td>20</td>
</tr>
<tr>
<td>500-999</td>
<td>16</td>
</tr>
<tr>
<td>300-499</td>
<td>12</td>
</tr>
</tbody>
</table>

   [Ord. 2019-005]

6. Real Estate Sales Model, PDD or TDD
   a. Definition
      A residential unit for the sale of only new units within a Residential Pod of a PDD or TDD. A Sales Model may be used as a temporary Real Estates Sales and Management Office. [Ord. 2019-005]
   b. Approval Process
      Subdivision approval of the Sales Model lots by the Land Development Division shall be required prior to the issuance of a Building Permit. The Land Development Division may approve the lots prior to final platting. Sales Models shall comply with all applicable PDRs prior to the issuance of a CO. [Ord. 2019-005]
   c. Duration
      The use of a residential unit as a sales model shall cease prior to issuance of the CO for the last remaining unit in the pod.
   d. Residential Pod
      A maximum of eight, or 20 percent of the number of units in the pod, whichever is less, shall be permitted as sales models. A maximum of eight sales models per pod may be constructed prior to platting.
   e. Model Row
      Developments that are approved for a total of 300 or more units may construct a model row. A model row shall be open to the public for the sale of only new units in the project. The sale or resale of units outside the project shall be prohibited. [Ord. 2019-005]
      1) Number
         A maximum of 16 sales models shall be permitted in the model row. A maximum of one model row shall be permitted for every three pods under development, consisting of a minimum of 60 units each.
      2) Location
         A model row shall be located in a Residential Pod. Access to the model row shall be from a location approved by the DRO or allowed by this Code. [Ord. 2019-005]
   f. Access
      Temporary access to the Sales Model(s) may be permitted by the DRO, and shall be limited to one year. Extension may be approved by the DRO. [Ord. 2019-005]
   g. Signs
      Refer to Art. 8.D, Temporary Signs. [Ord. 2019-005] [Ord. 2020-020]
   h. Removal
      The Sales Model shall cease no later than 30 days after the final CO has been issued for the last remaining residential unit in the pod. [Ord. 2019-005]
7. Recycling Drop-Off Bin
   a. Definition
      A totally enclosed temporary structure or portable container within which the following pre-sorted, recyclable materials are collected: glass, aluminum, steel, and plastic containers no greater than six gallons in capacity, and paper.
   b. Location
      The drop-off bin shall be located in or adjacent to an on-site parking area, and shall not be located within required parking spaces. In TMD districts and for IRO projects, the Recycling Drop-Off Bins shall be designed to be consistent with the building’s design and shall not be located on a Main Street. [Ord. 2017-025]
   c. Signage
      Signage shall be required for all bins, as follows:
      1) Location
         a) One sign shall be located on the front or side where materials are collected.
         b) No more than two signs shall be allowed.
      2) Minimum/Maximum Size
         A minimum of eight and a maximum of 16 square feet.
      3) Content
         All required sign content shall be in lettering a minimum of six inches in height. The name and phone number of a responsible party shall be clearly posted. The name of the organization that is collecting the recyclable materials shall also be posted and include whether for profit, not-for profit, or government entity. No additional content other than logos, clarification of materials to be collected for recycling, or direction signage identifying the bin shall be allowed.
   d. Storage
      Recycling materials shall be contained within a leak-proof bin or trailer. There shall be no outdoor storage of materials or refuse.
   e. Number
      The number of recycling bins shall be based upon the overall acreage of a development, including outparcels, provided all development regulations are met on site. A minimum of one recycling bin for each site up to a maximum of one recycling bin per acre, rounded down to the nearest whole acre, may be allowed. No more than three bins shall be clustered or located within any one-acre area unless collocated with loading, dumpster, or other similar areas.
   f. Operation
      1) The bin and adjacent area shall be maintained and free from litter, debris, and residue on a daily basis. Failure to maintain the bin and adjacent area may result in the revocation of the DO. [Ord. 2018-002]
      2) No processing of deposited materials shall be allowed on site. Limited sorting or separation may only be permitted when a bin is manned by a person during permitted collection hours. The unit shall employ no mechanical sorting or processing equipment.
      3) A recycling bin containing 40 cubic yards or more shall be monitored by a person. Manned collection activities shall be limited to between 7:00 a.m. to 8:00 p.m. daily.
   g. Prohibited Materials
      Collection of materials shall be expressly limited to pre-sorted, recyclable materials identified in this Supplementary Use Standard. Collection of any other materials, including but not limited to rubber, textiles, hazardous wastes, or construction debris is prohibited.
   h. Mobility
      The mobility of a drop-off bin shall be maintained at all times.

8. Special Event
   a. Definition
      A temporary activity which may include rides, amusements, food, games, crafts, and performances.
   b. Typical Special Events
      Typical Special Events may include but are not limited to carnivals, circuses, temporary auctions, rallies, and revivals.
   c. Approval Process
      The use shall be subject to ZAR if the event is projected to attract less than 1,000 patrons on a site less than two acres. Project attendance shall be specified in the application. [Ord. 2018-002]
   d. Duration
      1) A Special Event shall not exceed 14 consecutive days.
2) If the Applicant provides to the Zoning Division a Justification Statement explaining the need for an extension, Zoning Staff shall determine whether the extension shall be granted up to 21 total consecutive days based on the following:
   a) The types of activities warrant the additional time period; and
   b) The time extension shall not cause an adverse impact or a nuisance to the adjacent parcels.

3) A maximum of three events during any 12 consecutive calendar months per parcel. [Ord. 2018-002]

e. **Zoning District – Residential**

Special Events that are prohibited in residential zoning districts may be allowed subject to a DRO approval if the following standards are met: [Ord. 2018-002]

1) Shall be collocated with a Place of Worship;
2) Hours of operation shall be from 9:00 a.m. to 5:00 p.m.; and,
3) Special Events and religious services operating during the same time are required to provide parking for both activities or comply with the off-site parking provisions in Art. 6, Parking, Loading, and Circulation.

f. **Location**

Shall not front a street under construction.

1) **U/S Tier**

   Primary access shall be from a paved Arterial or Collector Street.

2) **All Other Tiers**

   a) In the Rural, Exurban, AGR, and Glades Tiers, primary access shall be from a paved street.
   b) Back-out parking directly onto a public street shall be prohibited.

g. **Setbacks**

All buildings, trailers, temporary parking areas, tents, mechanical devices, rides, animals, and related equipment and activities shall be set back as follows: [Ord. 2020-020]

1) A minimum of 50 feet from any adjacent streets.
2) A minimum of 200 feet is required from any property line with an existing residential use. [Ord. 2020-020]

h. **Parking**

The use shall be prohibited on vacant undeveloped parcels, unless parking is provided on a stabilized surface with defined ingress/egress for vehicles to enter and exit the site in a forward motion.

9. **Temporary Green Market**

a. **Definition**

A temporary gathering of vendors, primarily for the purpose of selling fresh unprocessed fruit, vegetables, flowers, and consumable items such as coffee, bread, and prepared food.

b. **Duration**

Shall only be allowed on weekends and holidays, and up to six months per calendar year.

c. **Lot Size**

A minimum of one acre with the exception of lots located in the WCRAO where a minimum of one-half of an acre is required.

d. **Signage**

Vendor signs shall not be visible from the Right-of-Way.

e. **Operation**

1) Tents exceeding 120 square feet shall be subject to a Building Permit Review.
2) Motor vehicles utilized for the purpose of transporting vendor supplies and products may be allowed on site, provided the vehicles are removed from the site within two hours after the market closes each weekend.
3) Shall not utilize required parking spaces.

10. **Temporary Retail Sales**

a. **Definition**

General retail sales without a fixed or permanent location.

b. **Typical Uses**

Typical uses may include but are not limited to temporary sales of Christmas trees, pumpkins, fireworks, plants, art, paintings, rugs, and furniture.
c. **Duration**
   Shall not exceed 30 consecutive days and a maximum of four times per calendar year per parcel.

d. **Zoning District – AGR**
   Shall be limited to Christmas trees, plants, and pumpkins.

e. **Location**
   Shall front an Arterial Street.

f. **Number**
   A maximum of one temporary tent or structure shall be allowed per parcel.

g. **Operation**
   All debris shall be completely removed from the site, and the property shall be returned to its original condition, within 24 hours of the expiration of the DO or the removal of the activities associated with Special Event. [Ord. 2018-002]

h. **Special Provisions for Sparklers**
   Shall comply with the following additional requirements:
   1) **Zoning Districts**
      Shall be limited to CG and IL.
   2) **Seasonal Limitations**
      Shall only be allowed June 20 through July 5 and December 10 through January 2 of each year.
   3) **Additional Application Requirements**
      The application shall include the following information: [Ord. 2018-002]
      a) **Fire Marshal Certification**
         The PBC Fire Marshall shall review and approve the location of the sale of the sparklers and issue a certificate of registration.
      b) **Affidavit of Compliance**
         A signed and notarized affidavit of compliance with the Approved List of Sparklers maintained by the State Fire Marshall. The affidavit shall be submitted affirming that only products on the State Fire Marshall’s approved List of Sparklers will be sold and that violation of the affidavit may result in an injunction.
      c) **Documentation**
         Copies of State of Florida registration documents for any corporate or other business entity, evidence of registering any fictitious name to be used and driver’s licenses for the Applicant’s authorized agents.

i. **Parking**
   Parking shall be provided on site, on a stabilized surface with defined ingress/egress. Vehicles shall enter and leave the site in a forward motion.

11. **Temporary Vehicle Sales**
   a. **Definition**
      The temporary sale of new or used motor vehicles, including cars, trucks, and recreational vehicles.
   b. **Duration**
      1) Limited to five consecutive calendar days, not to exceed four times per calendar year.
      2) Shall be prohibited during the months of November and December.
   c. **Lot Size**
      A minimum of ten acres.
   d. **Setbacks**
      The event area shall be set back a minimum of 50 feet from all buildings.
   e. **Parking**
      1) A maximum of 50 required on-site parking spaces may be utilized, and no related activities shall extend beyond the designated area.
      2) Accessible parking spaces shall not be occupied by activities related to the use.
   f. **Accessory Sales**
      Up to three Mobile Retail Sales vendors limited to sales of food and beverage may be allowed as an accessory use to Temporary Vehicle Sales, subject to the Mobile Retail Sales Supplementary Use Standards.

CHAPTER A  GENERAL OVERVIEW

Section 1  Introduction

As established by Art. 4.A.1, the Zoning Director shall maintain and publish a User Guide to assist the public with applicability of Art. 4, Use Regulations, which includes determining the appropriate use type that is allowed in each Zoning District, identify all applicable standards related to the use, and Thresholds that may trigger additional levels of approvals, such as, DRO or Public Hearing.

The information provided in this User Guide will offer general steps to follow when trying to identify the use classification and approval process for a site in a specific zoning district as follows:

<table>
<thead>
<tr>
<th>Section</th>
<th>Tool</th>
<th>Objective</th>
</tr>
</thead>
</table>
| B.1.    | GeoNav | • Identify the site location and zoning district  
|         |       | • Identify the Future Land Use (FLU) designation of the site |
| B.2.    | ezInfo | • Identify if the site is located in an Overlay |
| B.3.    | ULDC Art. 3.A.3, Zoning District Consistency with the Future Land Use Atlas (FLUA) (Interactive Code or pdf format) | • Check that the zoning district is consistent with the FLU designation |
| B.4.    |       | • Determine the proposed use function |
| B.5.    |       | • Determine the approval process for the proposed use  
|         |       | • Check the Use Matrix footnote to determine the “Use approval process key” |
| B.6.    | ULDC Art. 4, Use Regulations (Interactive Code or pdf format) | • Determine if there are General Standards applicable to all uses in the classification and Supplementary Standards specific to the use. |
| B.7.    |       | • Determine if there are applicable thresholds specific to the use. |
| B.8.    |       | • Identify additional factors to be considered when determining uses approval process |

Section 2  General Organization of Art. 4, Use Regulations

A. Uses are grouped in Art. 4, Use Regulations, by classifications as follows:
1. Residential;
2. Commercial;
3. Recreation;
4. Institutional, Public and Civic;
5. Industrial;
6. Agricultural;
7. Utilities;
8. Transportation;
9. Commercial Communication Towers;
10. Excavation; and,
11. Temporary.

B. Each use classification includes the following:
1. Use Matrix
   The Use Matrix consolidates use approvals in standard zoning districts, Planned Development Districts (PDDs), Traditional Development Districts (TDDs), and two Overlays; Urban Redevelopment Area Overlay (URAO) and Infill Redevelopment Overlay (IRO). Each Matrix
identifies uses in alphabetical order, zoning districts, and approval processes. The number in the "Supplementary Use Standard" column of the Use Matrix refers to the definition and Supplementary Use Standards applicable to each use.

2. General Standards
This portion includes requirements that are applicable to all uses under the specific Use Classification.

3. Definitions and Supplementary Use Standards
Each use includes a definition and multiple Supplementary Use Standards organized to be consistent with the order in which site plans are typically reviewed. Example of standards include: Approval Process, Tier, Overlay, Future Land Use (FLU) Designation, Zoning District, and Lot Size.
CHAPTER B  INSTRUCTIONS FOR RESEARCHING A PROPOSED USE

Index of Interactive URL to be used with this User Guide

A. PZB Zoning Web page:
   http://discover.pbcgov.org/pzb/zoning/Pages/default.aspx

B. MyGeoNav map system:
   http://maps.co.palm-beach.fl.us/cwgis/mygeonav.html

C. PZB ezInfo page:

Section 1  Identify the Site Location, Zoning District and Future Land Use (FLU) Designation

Identify the site location and current zoning district for the specific site by following these simple steps:

A. Begin by accessing MyGeoNav online navigation map at http://maps.co.palm-beach.fl.us/cwgis/mygeonav.html
B. Add GIS layers by clicking on and see the drop down menu with default layers. Check Zoning and Future Land Use layers:

C. Locate the site by entering the address
D. User will be able to locate the existing Zoning District and click on the Future Land Use (FLU) for the current Site Zoning District and FLU.

Using the Daycare example listed above:

The research above indicates that the Site has a current Zoning District of RS (Residential Single) and a FLU of LR-3
Section 2 Identify the Overlay of the Site

Overlay provisions contained in Art. 3 of the ULDC, prevail over other regulations in the Code. Checking the Overlay will provide additional information related to approval process, specific use regulations, site design requirements or additional requirements only applicable in parcels located in the Overlay.

To identify the Overlay, login to the ezInfo database, which can be accessed through the Zoning Web site at http://discover.pbcgov.org/pzb/zoning/Pages/default.aspx.

A. Using the PZB Website ezInfo; click on link.

B. Enter the site information into the “Property Information” screen as indicated below.
C. From the results screen as below, click on tab labeled “LAND USE”

Daycare example:

The Zoning Database above indicates that the Site has no Overlay District; Zoning District is Single Family Residential (RS); and FLU is Low Residential 3 (LR-3).

D. Take note of the Zoning District, FLU and Overlay assigned to the Site.
Section 3  Zoning District Consistency with FLU Designation

Ensure the Zoning District of the property is consistent with the FLU designation. Article 3.A.3, Zoning District Consistency with the Future Land Use Atlas (FLUA) indicates such consistency. That article includes tables for Standard zoning districts, Planned Development Districts (PDDs) and Traditional Development Districts (TDDs), that help identify consistency with FLU designations; Exceptions and limitations applicable to specific zoning districts; and, exceptions for prior approvals.

</table>

If the zoning district is not consistent with the FLU designation, a rezoning will be required. Ensure the zoning district to which the site will be rezoned still allows the use of your interest.

**Daycare example:**

*RS Zoning District is consistent with the LR-3 FLU designation.*
Section 4  Determine the Proposed Use

The user shall determine the proposed use for the subject site based on the following definitions that describe the use functionality:

A. Principal
   As defined in Art. 1, a Principal use is “the primary and major purpose for which land or building is used as allowed by the applicable Zoning District.” Only those Uses listed within the use matrices in Art. 4 Use Regulations, may be considered a principal use. A site may have more than one principal use.

B. Collocated
   As defined in Art.1, a Collocated use is referred to as “two or more uses classified with the definition of a use listed in Article 4.B.” Some principal uses that are not normally allowed within a Zoning District, as noted in the Use Matrices, may be allowed as a collocated use if, expressly stated under the Supplementary Use Standards. All collocated uses are required to comply with all of the Supplemental Use Standards applicable to the use.

C. Accessory
   As defined by Art. 1, “a permitted use that is customarily associated with the principal use and clearly incidental to the principal use, and is subordinate in area, extent, or purpose to and serves only the principal use.” Uses not allowed in a Zoning District shall not be accessory to a principal use unless stated otherwise in the Supplementary Use Standards of the use intended to be accessory. Additional accessory use limitations and requirements are contained in Art. 5.B, Accessory Uses and Temporary Structures.

D. Flex Space
   Flex space is only allowed when approved in accordance with Art. 5.B.1.C, Flex Space.
   1. Limited office or retail opportunities are provided in industrial zoning districts where otherwise prohibited, or
   2. Limited type of industrial uses are allowed in commercial zoning districts consistent with the CH FLU designation.

Daycare example:

The Proposed Use for the Site is a Daycare; therefore, the proposed Daycare will be considered Principal Use. B, C & D above do not apply by definition. All principal uses are listed in the table of content of Art. 4 by Use Classification. Daycare is listed under the Institutional, Public and Civic Use Classification, therefore approval process and Supplementary Use Standards will be under that use classification.
Section 5  Determine the Approval Process

The following steps will assist you in determining the approval process for the proposed use:

A. Refer to the index on the first few pages of ULDC Article 4, Use Regulation to identify what classification includes the use in question.

The Interactive ULDC Article 4 can be accessed by visiting http://www.pbcgov.com/epzbcommon/asp_html/epzbMenu.aspx?ReferrerID=ezinfo&FROM=EZ&TargetMenuItem=ULDC+Interactive+Code where all ULDC articles are available in pdf.
All articles are also available in pdf at http://discover.pbcgov.org/pzb/zoning/ULDC/Articles.aspx.

B. Keep in mind the corresponding page number for the Use Matrix and the page number for the specific Supplementary Use Standards.

**Daycare example:**

All principal uses are listed in the table of content of Art. 4 by Use Classification. Daycare is listed under the Institutional, Public and Civic Use Classification, therefore approval process (page 125), General Standards applicable to all uses in that classification (page 127), and Supplementary Use Standards (Page 131) need to be considered to apply to the use.
C. The Use Matrix consolidates standard zoning districts, Planned Development Districts (PDDs), and Traditional Development Districts (TDDs). It also includes approvals for uses in the Urban Redevelopment Area (URA) Overlay and Infill Redevelopment Area (IRO) Overlay.

D. Refer to the Institutional, Public and Civic Use Matrix and locate the row where the use is listed to determine approval processes applicable to the use in the different zoning districts.

E. Once the use is identified in the Use Matrix, look for the approval process applicable to the zoning district (determined in Sections 1 and 2) of the intended site to locate the use.

Daycare example:

It will be necessary to determine if the Daycare is Limited or General. The difference is determined in the use definition or under Supplementary Use Standards. In this case, they differ in the number or children or adults, therefore the approval process also differs.
F. Check the Process Key at the bottom of each Use Matrix to find out the meaning of each approval process letter.

Daycare example:

A General Daycare is allowed in the RS Zoning District subject to Class A Conditional Use approval.
APPENDIX A – ARTICLE 4, USER GUIDE
Unified Land Development Code (ULDC)

G. There are various processes to obtaining approval for specific Uses that are identified by the letters (P,S,D,B,A) or dash (-) under each zoning district. An expanded definition for each approval process can be found in the ULDC Article 4.A.7.C.

The Use Matrix shows the most restrictive approval process; some uses may be shown as prohibited but the Supplementary Use Standards may allow the use limited to specific provisions or thresholds.

H. Zoning applications for use approval as noted in the Use Matrices, can be as follows:
   - Public Hearings - Conditional Uses A and B
   - Administrative Approval - DRO (D) and Special Permit (S)

I. Prohibited uses (indicated with a dash) are not allowed in the Zoning District unless the Supplementary Use Standard indicates an approval process based on specific thresholds or design standards.

40. Vehicle Sales and Rental, Light
   
   e. Zoning Districts
      1) Commercial Pod of PUD and Neighborhood Center of TND
         Shall be limited to a Neighborhood Vehicle Rental Facility.
      2) LCC and TMD
         Shall be limited to Indoor Vehicle Showroom.
      3) Districts with Commercial Low FLU Designation
         The sale or rental of OHVs, RVs, boats, or motorcycles shall be subject to the standards for Accessory Uses.
      4) IL District - Automobile Rental
         Automobile rental may be permitted in the IL district when located on an Arterial Street, subject Class A Conditional Use approval.
APPENDIX A – ARTICLE 4, USER GUIDE

Unified Land Development Code (ULDC)

J. Uses noted in the Use Matrix as Permitted by Right (P) are subject to Building Permit, Business Tax Receipt (BTR) or similar process.

In some cases, the Supplementary Use Standard indicates a lower level of approval is permitted when the use is subject to specific requirements, such as but not limited to, lot size or building square footage.

25. Office, Business or Professional

a. Definition

An establishment providing executive, management, administrative, or professional services.

b. Typical Uses

A Business or Professional Office may include but is not limited to property and financial management firms; employment, travel, advertising, or real estate agencies; pay day lending offices, check cashing services and currency exchange agencies; contract post offices; professional or consulting services; and business offices of private companies, utility companies, public agencies, and trade associations.

c. Approval Process

The use may be Permitted by Right if limited to the following:

1) A maximum of 10,000 square feet of GFA per parcel in the CN Zoning District.
2) A maximum of 15,000 square feet of GFA per parcel in the CLO Zoning District.
3) A maximum of 20,000 square feet of GFA per parcel in the CC Zoning District.

Section 6 Determine General and Supplementary Use Standards

A. General Standards

ATTENTION
General Standards at the beginning of the use classification are applicable to all uses in the classification.

These standards are in addition to the specific ones listed under each use.

B. Supplementary Use Standards

The uses identified in the Matrices may have additional standards that must be satisfied in order for a use to be considered for approval. In each Matrix next to the use of interest is a number that corresponds to the specific Supplementary Use Standards.

In the electronic version of the ULDC as well as in ePZB the number is also a hyperlink to the use definition and Supplementary Use Standards in Article 4.

Using the Daycare example above:
The Supplementary Standard number found next to Daycare-Limited, as in the Matrix is # 7. Refer to the Supplemental Standards in the General Section and in #7 of the Institution, Public and Civic classification for standards that apply to the particular use of Daycare.

The Supplementary Use Standards section includes:

1. Use Definition:
   Read carefully the specificity in the use definition as it may include aspects that make the use different from other uses, particularly those of similar nature.

2. Typical Uses:
   Many uses include a section titled “Typical Uses”, which is a list of similar uses designed to assist the reader in identifying business activities or operations that fit within the definition of the principal use.
21. **Laundry Service**
   a. **Definition**
   An establishment that provides washing, drying, dry-cleaning, or ironing services or machines to be used by customers on the premises, or that is engaged in providing cleaning services.
   b. **Typical Uses**
   A Laundry Service may include but is not limited to coin laundry establishments, laundromats, neighborhood cleaners and dry cleaners, and industrial cleaning facilities serving commercial cleaners or the hospitality industry.

3. **Standards:**
Mostly organized in the common form in which a site plan is revised and following the order of standards contained in the different articles of the ULDC, the standards include regulations for nonconformities, approval process, tier, Overlay, FLU designation, zoning district, location, lot size, setbacks, separation, building area, building height, collocated or accessory use, accessory structures, architecture, nuisances, parking, landscaping, signage, and others, typically labeled with terms specific to the use.
Section 7 Determine the applicable Development Thresholds

The user shall verify if there are any additional requirements for approval in the specific Supplementary Use Standards including thresholds such as building square footage, frontage or location to mention some.

30. Repair and Maintenance, Light
   a. Definition
   An indoor establishment engaged in the minor repair or maintenance of automobiles, light duty commercial vehicles rated one ton capacity or less, boats, motorcycles, personal watercraft, golf carts, mopeds, lawn mowers, major household appliances, or household furniture.
   b. Typical Uses
   Light Repair and Maintenance establishments may include but are not limited to tune-up stations, glass shops, quick-lube stations, muffler shops, upholstery shops, tire installation and service, alignment shops, replacement of brake linings, and lawn mower repair and maintenance.
   c. Overlay – Westgate Community Redevelopment Area Overlay (WCRAO)
   Light Repair Maintenance uses are prohibited in the NR, NRM, NG and NC Sub-areas, as outlined in Table 3.B.14.F. WCRAO Sub-area Use Regulations. [Ord. 2006-004]
   d. Zoning Districts – CN and CC District and Commercial Pod of PUD
   Shall be limited to a maximum of 5,000 square feet of GFA. [Ord. 2005 – 002]

Requirements under Article 4.A.9, Development Thresholds; need to be considered at all times. If any development triggers those thresholds the approval of the use or uses may be different than the one shown in the Use Matrix.

Notes:
1. Land area devoted to retention pursuant to the requirements of the C-51 drainage basin, or land area devoted to vegetation preservation pursuant to the Environmentally Sensitive Lands Ordinance, excluding AGR or Sector Plan preserve areas, shall not be counted toward the maximum acreage threshold. [Ord. 2006-004]
2. PDDs or TDDs in the AGR Tier are limited to the 80/20 PUD, 60/40 PUD or AGR TMD (FLUE Policy 1.5.1-a).
3. There are no thresholds for the UC or UI FLU designations. [Ord. 2011-016]
4. Dwelling units shall include any density awarded as part of a density bonus program. [Ord. 2006-004 [Ord. 2011-016]

[Ord. 2010-005] [Ord. 2010-022]

Notes:

1. Approval of a subdivision plan is required for all subdivision of land for which a plat or plat waiver has not been granted pursuant to Article 11, Subdivision, Platting and Required Improvements or which exceeds the threshold above.

2. Projects exceeding the thresholds above shall comply with Article 5.C, Design Standards.
Section 8  Other Factors that May Affect the Approval Process

The user should determine if there are other factors that may affect the proposed use approval. The list below is not definite and further discussion with the zoning division staff may assist in identifying other requirements in accordance with the ULDC. Some factors to consider are:

A. Variance relief from any of the requirements or standards of Article 4 shall be prohibited unless expressly stated otherwise.
B. Uses in Airport Zones may be further restricted or subject to special regulations as specified in Article 16, Airport Regulations.
C. Specific Regulations shall apply in certain Zoning Districts, as specified under Art. 3.D.3, Zoning District Specific Regulations.
D. Uses not specifically listed in the Use Matrices but consistent with the definition of a listed use, may be classified by the Executive Director of PZB pursuant to Article 1.B, Interpretation of the Code.
E. All uses shall comply with all requirements of the ULDC unless expressly exempted otherwise.
F. In addition to the standards noted in Art. 4, uses are also subject to other requirements in the Code such as Parking, Signage, Landscaping or specific regulations that relate to Overlays, Planned Development District or Traditional Development Districts, depending on the use location.
G. The Zoning Division may be able to clarify any additional requirements or concerns regarding the application process or any ULDC requirements for the proposed use.

ARTICLE 5
SUPPLEMENTARY STANDARDS

CHAPTER A  GENERAL

Section 1  Purpose and Intent

The purpose and intent of this Article is to establish minimum standards for accessory and temporary uses, design standards, Parks and Recreation, performance standards, legal documents, and density bonus programs.

Section 2  Definitions

Section 3  Deviations

Deviation(s) from the provisions of this Article may be permitted for development supporting government facilities within the PO Zoning District, subject to Art. 2, Application Processes and Procedures and PPM #ZO-O-063, as applicable and as amended. [Ord. 2007-013] [Ord. 2010-022] [Ord. 2019-005]

CHAPTER B  ACCESSORY USES AND STRUCTURES

Section 1  Supplementary Regulations

A. Accessory Uses and Structures

1. General

The following provisions in this Section shall apply to all development in Standard, PDD, or TDD Zoning Districts, unless otherwise stated. [Ord. 2007-001] [Ord. 2017-007]

a. Standards

Uses indicated in the Use Matrix as blank in a zoning district shall not be allowed as accessory use unless stated otherwise in Art. 4, Use Regulations. An accessory use or structure shall be subject to the same regulations that apply to the principal use or structure, except as otherwise stated. [Ord. 2017-007]

b. Location

All accessory uses and structures except for approved off-site parking, shall be located on the same lot as the principal use. No accessory structure shall be located in the front or side street yard except for dumpsters, or unless stated otherwise herein. [Ord. 2017-007] [Ord. 2017-025] [Ord. 2018-002]

1) General Exceptions

Structures such as: fences and walls; entry features for access ways internal to a PUD; bike racks; outdoor recreation amenities and support structures such as cabanas, located within a Neighborhood Recreation Facility or Recreation Pod; or, structures, projects, and improvements listed in Art. 3.D.1.D.5, Setback Exceptions, excluding mechanical equipment accessory to a building, may be allowed within front or side street yards. [Ord. 2017-025]

2) Exceptions for Buildings Accessory to Residential

A detached garage, cabana, accessory quarters, or guest cottage, may be allowed within the front or side street yard, subject to the following: [Ord. 2017-025]

a) The building is consistent with the architecture characteristics of the principal building, including roofing materials, fenestration, and paint color, where applicable; [Ord. 2017-025]

b) When accessory to a principal residential use, such as a Single Family home, accessory structures shall be connected to the principal building by common shared driveways, sidewalks, or pathways; and, [Ord. 2017-025]

c) An application for a DO or Building Permit for any building proposing to utilize this provision shall include an affidavit from a licensed architect or general contractor, delineating how the proposed building will be in compliance with the requirements above. [Ord. 2017-025]
3) **Accessory Solar**

Accessory solar in the form of mechanical equipment attached to other permitted structures, or Solar Trees, in accordance with the standards of **Art. 5.B.1.A.27, Accessory Solar Energy Systems.** [Ord. 2017-025]

**c. Floor Area**

1) **Non-Residential Zoning Districts**

Where allowed, accessory uses and structures shall not exceed 30 percent of the GFA or business receipts of the principal use or uses, whichever is more restrictive. Minor Utility use is not subject to this provision. [Ord. 2017-007]

2) **Residential Zoning Districts**

Accessory uses and structures in the U/S Tier shall not exceed the square footage of the principal use.

**d. Setbacks, Accessory Structure**

1) **Residential Districts (Except AR)**

Accessory structures may be set back a distance of five feet from the side and rear property lines provided it is not located in an established easement or required landscape buffer.

a) **Townhouse**

Accessory structures shall meet the setback and separation requirements in **Table 3.D.2.A, Townhouse Property Development Regulations.** No detached accessory building or structure other than permitted fences or walls shall be permitted on any lot less than 30 feet in width.

b) **ZLL**

Accessory structures shall meet the setback requirements of **Table 3.D.2.B, ZLL Property Development Regulations.** [Ord. 2008-037]

c) **Exceptions**

1) All structures used as dwellings, such as guest cottages, grooms quarters, and accessory dwellings, shall meet the minimum setback in **Table 3.D.1.A, Property Development Regulations (PDRs), or Art. 1.F.2.C.1, Minimum Residential Setback Requirements,** if applicable. [Ord. 2016-042]

2) All structures over ten feet in height shall meet the minimum setbacks in **Table 3.D.1.A, Property Development Regulations (PDRs), or Art. 1.F.2.C.1, Minimum Residential Setback Requirements,** if applicable. [Ord. 2016-042]

3) Encroachment into easements shall be in accordance with **Art. 5.F.2.A, Easement Encroachment.**

2) **AR District**

a) **Conforming Lot Dimensions**

Accessory structures may be set back a distance of 25 feet from the side and rear property lines on lots with conforming width and depth lot dimensions.

![Figure 5.B.1.A – Accessory Structure Setbacks](image)
b) **Non-Conforming Lot Dimensions**

The setbacks for accessory structures on lots with nonconforming width or depth may be reduced for either non-conforming dimension, as follows: [Ord. 2016-042]

1. **General**
   A minimum setback distance of 15 feet from the side or rear property lines; or [Ord. 2016-042]

2. **U/S Tier**
   The minimum setback may be reduced in accordance with the following: [Ord. 2016-042]
   - (a) The reduced setback permitted under [Art. 1.F.2.C.1, Minimum Residential Setback Requirements]; or [Ord. 2016-042]
   - (b) Parcels that are less than or equal to 13,999 square feet may apply the accessory structure setbacks of [Art. 5.B.1.A.1.d.1), Residential Districts (Except AR). [Ord. 2016-042]

3. **Minimum Setback from Easements**
   Must be five feet from all established easements, except where use of [Art. 5.B.1.A.1.d.1), Residential Districts (Except AR) is permitted. [Ord. 2016-042]

3) **Prohibition in Landscape Buffers**
Accessory structures shall not be located within a required landscape buffer. [Ord. 2016-042]

4) **Non-Residential Districts**
Accessory structures shall meet the setback requirements in [Table 3.D.1.A, Property Development Regulations (PDRs)].

5) **U/S Tier – Maximum Accessory Structure Dimensions**
In the U/S Tier, all accessory structures located on a parcel in a residential district shall not occupy more than 25 percent of the distance between property lines. [Ord. 2008-037] [Ord. 2016-042]

---

**Figure 5.B.1.A – Accessory Structure Dimensions**

In the U/S Tier, all accessory structures located on a parcel in a residential district shall not occupy more than 25 percent of the distance between property lines.

This Example:
Distance between property lines: 100’
Total of A+B accessory structures: 10’ x 10’ = 20’
100’ x 25% = 25’ maximum allowed by Code
e. Specific Accessory Uses

1) Office
   a) Areas of a building dedicated to the administrative operation and incidental to a principal
      use or uses listed in the Use Matrix may be Permitted by Right. [Ord. 2017-007]
   b) One parking space shall be provided for every 250 square feet of accessory office. [Ord.
      2017-007] [Ord. 2020-001]

2) Incidental Sales
   Sales of products incidental to a principal use may be Permitted by Right in commercial,
   industrial, or institutional, public, and civic use classifications subject to the following, unless
   stated otherwise: [Ord. 2017-007]
   a) Maximum ten percent of the GFA; [Ord. 2017-007]
   b) One parking space for every 200 square feet of accessory sales; [Ord. 2017-007]
   c) Merchandise is not stored outside or visible from any street; and, [Ord. 2017-007]
   d) Commercial signage is only to advertise the principal use. [Ord. 2017-007]

2. Fences and Walls

a. Height Measurement
   The height shall be measured adjacent to the fence or wall from the lowest grade on either side
   of the fence or wall, unless stated otherwise below: [Ord. 2015-006] [Ord. 2016-016]

1) Located on Berm
   Height shall be measured from the elevation of the berm where the fence or wall is constructed,
   unless in conflict with standards for Grade Change below. [Ord. 2015-006]

2) Grade Change
   a) Residential
      Height may be increased when the fence or wall is located on a retaining wall, subject to
      the requirements of Art. 5.B.1.A.2.b.5), Residential District Grade Changes. [Ord. 2016-
      016]
   b) PDD or Non-Residential Perimeter Buffers
      Height may be increased when the fence or wall is located on a retaining wall, subject to
      the requirements of Art. 7.D.5, Landscape Buffers with Grade Changes. [Ord. 2016-016]

b. Height and Related Standards

1) Residential Uses
   The maximum height for a fence or wall on or adjacent to a residential lot line or in a landscape
   buffer shall be as follows: [Ord. 2015-006] [Ord. 2019-023] [Ord. 2019-034]
   a) Within required front setback:
      (1) four feet, or [Ord. 2005-041] [Ord. 2015-006]
      (2) six feet for property owned by PBC for preservation or conservation purposes. [Ord.
          2005-041] [Ord. 2015-006]
   b) Within required side, side street, and rear setback: six feet. [Ord. 2015-006]
   c) Within a landscape buffer: six feet. [Ord. 2015-006]
2) **Non-Residential Uses**

The maximum height for a fence or wall on or adjacent to a lot line or in a landscape buffer shall be as follows: [Ord. 2015-006] [Ord. 2019-023] [Ord. 2019-034]

a) Within the required front setback: six feet. [Ord. 2015-006]

b) Within the required side, side street, and rear setback: eight feet. [Ord. 2015-006]
3) Attachments
Gates, gateposts, decorative features, and lights attached to a fence or wall in a setback or perimeter buffer shall not exceed three feet in any horizontal distance or two feet in height above the fence or wall. Decorative features and lights shall be spaced a minimum of eight feet apart, measured on center. [Ord. 2015-006]

Figure 5.B.1.A – Attachments to Walls

[Ord. 2015-006]

4) General Exceptions
a) Fences and walls up to eight feet in height shall be permitted within a street buffer adjacent to a golf course. [Ord. 2015-006]
b) Fences around tennis courts may exceed six feet in height, subject to the setback requirements in Table 5.B.1.A, Setbacks – General. [Ord. 2015-006]
c) The ZC and BCC may require increased heights to ensure adequate screening and buffering between incompatible uses. [Ord. 2015-006] [Ord. 2016-016]
d) DRO may approve increased fence heights and modify allowable locations for fences with and without barbed wire for minor utilities, water and wastewater treatment plants. [Ord. 2007-013] [Ord. 2015-006]
e) Schools may increase the fence height to eight feet along the perimeter of the site. [Ord. 2017-007]

5) Residential District Grade Changes
The height of a fence or wall located within the front, side or rear setback of a lot supporting a Single Family dwelling unit, may be increased when located adjacent to a lot having a different elevation where a retaining wall is installed along the property line, in accordance with the following: [Ord. 2015-006] [Ord. 2016-016]

a) Grade Measurement
The difference in grade shall be determined by measuring the elevation where the fence or wall is constructed and the elevation of the abutting lot at the property line. [Ord. 2015-006]
b) Maximum Height Increase
The height of the fence or wall may be increased by the difference in grade up to a maximum of two feet, whichever is less, as follows: [Ord. 2015-006]
(1) Within the required front setback: Up to a maximum of six feet. [Ord. 2015-006]
(2) Within a side or rear setback: Up to a maximum of eight feet. [Ord. 2015-006]
(3) A guard railing not to exceed three feet in height may be permitted where the grade difference is greater than two feet, provided the mass of the railing does not exceed the mass necessary to meet the opening limitations and strength requirements of the Florida Building Code, Residential. [Ord. 2015-006]
c. **Walls – Appearance**
   The exterior surface of a wall shall be finished with paint, stucco, or other commonly accepted material, and continuously maintained in its original appearance.

d. **Sight Distance**
   Walls and fences shall comply with Art. 11.E.9.C, Minimum Safe Sight Distance and Corner Clips at Intersection.

e. **Dangerous Materials**
   Fences or walls in any zoning district, shall not be electrified or contain any substance such as broken glass, spikes, nails, barbed wire, razors, or any other dangerous material designed to inflict discomfort, pain, or injury to a person or animal, except as allowed below. [Ord. 2010-005] [Ord. 2011-001]

1) **Barbed Wire Exceptions and Regulations**
   The use of barbed wire is prohibited except in instances as detailed below. The County recognizes that barbed wire may be necessary to secure certain non-residential uses or structures. Therefore, the County allows the installation of barbed wire on top of the fence or wall, subject to the following: [Ord. 2005-002] [Ord. 2010-005] [Ord. 2011-001] [Ord. 2017-007]

a) **Allowable Uses for Barbed Wire**
   (1) Commercial Communication Towers [Ord. 2017-007]
   (2) Electric Power Facilities; [Ord. 2017-007]
   (3) Electric Transmission Facility; [Ord. 2017-007]
   (4) Minor Utility; [Ord. 2017-007]
   (5) Prisons; [Ord. 2017-007]
   (6) Solid Waste Transfer Stations; [Ord. 2017-007]
   (7) Water or Wastewater Treatment Plant; and, [Ord. 2017-007]
   (8) Zoo. [Ord. 2017-007]
   (9) Except when located adjacent to a parcel having a residential FLU designation, residential zoning district, or residential use, barbed wire that is not visible from any public street, may be installed with the following uses: [Ord. 2017-007]
(a) Contractor Storage Yard; [Ord. 2017-007]
(b) Salvage or Junk Yard; [Ord. 2017-007]
(c) Self-Service Storage; [Ord. 2017-007]
(d) Sugar Mill or Refinery; and, [Ord. 2017-007]
(e) Towing Service Storage. [Ord. 2017-007]

(10) Bona Fide Agriculture use located in AGR, AP, and AR Zoning Districts; and AGR-PDD Preserve Parcels. When Bona Fide Agriculture is located in the AR Zoning District other than nurseries, barbed wire shall be set back a minimum of 25 feet from any property line. [Ord. 2017-007]

(11) Properties with a conservation FLU designation, for the purposes of protecting publicly-owned natural areas; [Ord. 2005-002] [Ord. 2010-005] [Ord. 2011-001]

(12) Properties where the owner can document a valid Development Permit for the use of barbed wire; [Ord. 2010-005] [Ord. 2011-001] [Ord. 2017-007]

(13) The Zoning Director shall have the authority to allow the installation of barbed wire for any uses pursuant to Art. 4.B, Use Classification, when the Applicant demonstrates a need to comply with Federal, State, or Local Government regulations. In support of the barbed wire installation, the Zoning Director may require the Applicant to perform mitigation in order to address compatibility with adjacent properties or visibility from adjacent street right-of-way; and, [Ord. 2010-005] [Ord. 2011-001] [Ord. 2017-007]

(14) A removal agreement shall be executed to remove the barbed wire, prior to issuance of a Building Permit. This agreement shall require the removal of the barbed wire in the event the use changes to another use not allowed in the list above. [Ord. 2017-007]

b) Standards

(1) Height

The barbed wire shall not exceed 20 percent of the overall permitted height of the fence or wall or two feet whichever is less. [Ord. 2017-007]

(2) Height Exemption

Bona Fide Agriculture, Prisons, and other uses as authorized by the Zoning Director pursuant to provisions in Art. 5.B.1.A.2.e.1.a)(13), shall be permitted to exceed the 20-percent provision. The calculation of the overall height of a fence or wall is inclusive of any barbed wire. [Ord. 2005-002] [Ord. 2010-005] [Ord. 2011-001] [Ord. 2017-007]

2) Electrified Fences – Exceptions and Regulations

The use of electrified fences is prohibited except in instances as detailed below. The County recognizes that electrified fences may be necessary to secure certain non-residential uses or structures. Therefore, the County allows the installation of electrified fencing, subject to the following: [Ord. 2013-018]

a) Allowable Uses for Electrified Fences

Electrified fences shall only be allowed for the following uses: [Ord. 2013-018]

(1) Commercial uses, as follows: [Ord. 2013-018]

(a) Auction, Outdoor; [Ord. 2013-018]

(b) Contractor Storage Yard; [Ord. 2013-018]

(c) Flea Market, Outdoor; [Ord. 2013-018] [Ord. 2017-007]

(d) Landscape Service; [Ord. 2013-018]

(e) Laundry Services; [Ord. 2013-018]

(f) Marina; [Ord. 2017-007]

(g) Parking, Commercial; [Ord. 2013-018] [Ord. 2017-007]

(h) Repair and Maintenance, Heavy, [Ord. 2013-018] [Ord. 2017-007]

(i) Self-Service Storage, Limited Access; [Ord. 2013-018] [Ord. 2017-007]

(j) Self-Service Storage, Multi-Access; [Ord. 2017-007]

(k) Towing Service and Storage; [Ord. 2013-018] [Ord. 2017-007]

(l) Vehicle Sales and Rental, Light; and, [Ord. 2013-018] [Ord. 2017-007]

(m) Vehicle or Equipment Sales and Rental, Heavy. [Ord. 2017-007]

(2) Institutional, public, and civic uses, as follows: [Ord. 2013-018] [Ord. 2017-007]

(a) Airport; and [Ord. 2013-018]

(b) Government Services. [Ord. 2013-018]

(3) Recreation uses, as follows: [Ord. 2013-018]

(a) Zoo. [Ord. 2013-018] [Ord. 2017-007]

(6) All uses listed under the excavation use Classification in Art. 4.B.10.A, Excavation Use Matrix. [Ord. 2017-007]

(7) All uses listed as industrial uses in Table 4.B.5.A, Industrial Use Matrix. [Ord. 2013-018]

(9) Properties with a conservation FLU designation, for the purposes of protecting publicly-owned natural areas. [Ord. 2013-018]

(10) To secure permanent mechanical equipment except on individual residential lots. [Ord. 2013-018]

(11) The Zoning Director shall have the authority to allow the installation of electrified fences for any uses pursuant to Art. 4.B, Use Classification, when the Applicant demonstrates a need to comply with Federal, State, or Local Government regulations. The Zoning Director may require the Applicant to perform mitigation in order to address compatibility with adjacent properties or visibility from adjacent street right-of-way. [Ord. 2013-018]

(12) An agreement to remove an electrified fence shall be executed prior to issuance of a Building Permit. The agreement shall require removal of the electrified fence if the use changes to other than an allowable use listed above. [Ord. 2013-018]

b) Standards

Electrified fences shall be installed, operated, or maintained in compliance with the following: [Ord. 2013-018]

(1) Technical Standards

All electrified fences are subject to permitting and review by the Building Division and shall be designed, installed, operated, and maintained in a manner not to be injurious to individuals. [Ord. 2013-018]

(2) Exterior Non-Electrified Fence or Wall

Electrified fences and gates shall be attached to the interior of, or completely surrounded on the side facing the property exterior, by a non-electrified fence or wall that meets the following requirements: [Ord. 2013-018]

(a) Minimum of six feet in height; [Ord. 2013-018]

(b) The separation between the exterior, non-electrified fence, or wall and the electrified fence shall be a minimum of four inches and a maximum of eight inches; [Ord. 2013-018]

(c) When adjacent to or within 50 feet of a parcel of land with a residential FLU designation or use, the non-electrified fence shall include a solid material that will screen the electric fence from view and prevent a person from being able to penetrate the non-electrified fence; and, [Ord. 2013-018]

(d) Exterior fences such as chain link shall have openings no larger than two and three-eighths inches. [Ord. 2013-018]

(3) Public Warning Signage

Provide and maintain signage, subject to prior review by the Building Division, which satisfies the intent of the requirements contained in ISO-3864 or a current equivalent internationally accepted standard, and that such signage be placed within ten feet of all corners, not more than 45 feet apart, so as to be plainly visible. Exceptions to screening or landscaping requirements may be permitted where necessary to ensure visibility of signage. [Ord. 2013-018]

(4) Height

The maximum height of an electrified fence and any attachments shall not exceed the height of any required exterior non-electrified fence or wall, or other required screening, by more than a maximum of two feet in height. Any portion of an electrified fence that exceeds the height of the non-electrified fence shall be limited to a maximum of two horizontally placed strands per vertical foot, a maximum of 12.5 gauge in diameter, with attachments spaced not less than 20 feet on center, excluding gates. [Ord. 2013-018]
(5) Location, Landscaping, or Screening

(a) Within Required Setbacks
Electrified fences shall not be permitted within any required setback or within 50 feet from property lines, whichever is greater, unless the perimeter landscape buffer is in compliance with Art. 7, Landscaping, unless stated otherwise herein. [Ord. 2013-018]

(b) Within 50 Feet of Any Property Line
Any electrified fence located within 50 feet of any property line (excluding within a required perimeter buffer) and abutting a non-conforming landscape buffer, shall be screened from view by landscaping, fences, walls, or buildings, excluding the top two feet. [Ord. 2013-018]

(c) Outdoor Storage
The use of electrified fences in outdoor storage areas shall only be permitted when in compliance with the following screening requirements, excluding the top two feet: [Ord. 2013-018]

(1) When located in non-residential districts, the screening requirements of Art. 5.B.1.A.3, Outdoor Storage and Activities; and [Ord. 2013-018]

(2) When located in residential districts or for uses which allow outdoor storage by definition or in another Section, shall be screened from view by landscaping, fences, walls, or buildings. [Ord. 2013-018]

(d) Mechanical Equipment
The use of electrified fences with mechanical equipment shall only be permitted when in compliance with the screening requirements of Art. 5.B.1.A.20, Mechanical Equipment, excluding the top two feet. [Ord. 2013-018]

(6) Non-Conforming Dangerous Materials
If a property has non-conforming dangerous materials in areas that will be secured by the installation of electrified fences, the dangerous materials shall be removed prior to electrification or the issuance of a Certificate of Completion by the PBC Building Division for the electrified fence. [Ord. 2013-018]

(7) URAO, IRO, WCRAO, and TDD Limitations

(a) Electrified fences shall not be permitted in any URAO, IRO, or TDD developments constructed with a required build-to-line or any other area unless located behind buildings and in areas not accessible by the public. [Ord. 2013-018] [Ord. 2017-025]

(b) Electrified fences within the WCRAO shall be prohibited in all Sub-areas except for the UI Sub-area. [Ord. 2013-018]
3. Outdoor Storage and Activities

Outdoor storage of merchandise, inventory, vehicles and trailers used in operation of a business, equipment, refuse, or similar materials, and outdoor activities associated with a use operation in all zoning districts shall be subject to the following standards, unless stated otherwise: [Ord. 2017-007] [Ord. 2019-039]

![Figure 5.B.1.A – Outdoor Storage](image)

a. General
Outdoor storage and activities may only be allowed when incidental to the use located on the premises. [Ord. 2017-007]

b. Location
Outdoor storage and activity areas shall not be located in any of the required setbacks. Bollards or other acceptable barricades to the Zoning Division shall be provided to delineate pile locations. [Ord. 2017-007]

c. Height
Outdoor storage material shall not exceed 15 feet in height or the height of the screening, whichever is less. The height could be less if required by Chapter 62-709, F.A.C., as amended. [Ord. 2017-007]

d. Screening
Outdoor storage and activity areas shall be completely screened from all property lines by landscaping, fences, walls, or buildings. [Ord. 2017-007]

e. Industrial FLU Designation, Zoning Districts, or Uses
1) Outdoor storage and activity areas adjacent to parcels of land with an industrial FLU designation or use and not visible from any street shall be exempted from the screening requirements. [Ord. 2017-007]

2) Outdoor Activity areas in industrial uses shall have a Type 3 Incompatibility Buffer along property lines adjacent to parcels with a civic, conservation, commercial, recreational, or residential FLU designation, or use, or where visible from a public R-O-W. The Incompatibility Buffer shall be a minimum of 25 feet in width. [Ord. 2017-007]

3) Outdoor activities such as chipping, crushing, grinding, manufacturing, or processing shall be restricted to uses in the IG Zoning District and Industrial General Pod of PIPD unless approved as a Class A Conditional Use. [Ord. 2017-007]
f. Exceptions
The following uses or material are exempt from this Section:
1) Storage and sales of landscape plant material.
2) Temporary storage of material used for road construction on a lot directly adjacent to the roadway under construction. [Ord. 2017-007]

g. Parking/Storage

4. Outdoor Display
a. Merchandise must be mobile and stored indoors overnight daily.
b. Merchandise must be accessory to a principal use located on the same property.
c. Merchandise shall not be located in any required setback, parking space, loading space, loading area, vehicular use area, fire lane, landscape buffer, required sidewalk, ADA accessibility route, or drainage easements.

Figure 5.B.1.A – Outdoor Display
5. Docks
   a. Accessory Docks
      Applicants shall comply with the Boat Facility Siting Plan of the Palm Beach County Manatee Protection Plan. This requirement does not apply to Single Family docks and only applies to expansion of existing marine facilities or development of new marine facilities with five or more slips. Accessory docks located on the same lot as a residence shall meet a five-foot setback from the side property lines. Accessory docks not located on the same lot as a residence shall comply with the following setbacks: [Ord. 2009-040]

   1) Dock in Publicly-Owned Waterway
      A minimum five-foot side setback measured from the extension of the property lines into the waterway. The property lines shall be extended into the waterway in the same direction and bearing as the side lot lines.

   2) Dock in Privately-Owned Waterway
      The setback shall be determined by the Person asserting ownership in interest or jurisdiction over the waterway. Signed consent by this Person must be in place prior to permit being issued. Owner sign off and consent shall be required. The dock shall be located directly adjacent to, and abutting, the lot on which the residence is located.

6. Entry Features
   Unless exempt in Art. 3.D.1.D.5, Setback Exceptions, entry features shall comply with Table 5.B.1.A, Entry Feature Setbacks. Setbacks may be taken from the edge of the pavement for access ways internal to a PDD. [Ord. 2005-002]

<table>

</tr>
<tr>
<td></td>
</tr>
<tr>
<td>Side, Street, and Rear</td>
</tr>
<tr>
<td>25'</td>
</tr>
<tr>
<td>15'</td>
</tr>
</tbody>
</table>

7. Fuel, Gas, or Chemical Storage Tanks
   Above-ground accessory fuel, gas, or chemical storage tanks, three feet or greater in height shall be subject to the zoning district setbacks or the minimum setbacks required by the Florida Building and Fire Prevention codes, whichever is greater, and screening. New and replacement storage tanks shall be screened from view if adjacent to a residential use or FLU designation and visible from an adjacent R-O-W. The screening shall consist of an opaque barrier or equivalent landscaping a minimum height equal to the highest point of the storage tanks. [Ord. 2019-034]

8. Dumpsters
   Each use shall provide a method for the removal of refuse when individual collection, from a licensed solid waste hauler is not provided. All outdoor receptacles for the storage and disposal of refuse, vegetation, and recyclable material, such as dumpsters, trash compactors, and recycling containers, shall meet the following standards:
   a. Storage Area
      A minimum of one refuse container and one recycling container shall be provided for each non-residential project and per Multifamily project with 16 units or more. All refuse containers shall be stored in a storage area. Storage areas shall have a minimum dimension of ten feet by ten feet. [Ord. 2018-002]
   b. Location
      Containers shall be located to minimize turning and back-up movements by pick-up and removal vehicles. Dumpster shall not encroach into easements or landscape buffers. [Ord. 2018-002]
   c. Setback
      2) In all other zoning districts, dumpsters shall be set back a minimum of 25 feet from all property lines. [Ord. 2018-002]
   d. Screening
      Containers shall be screened from view by a solid opaque enclosure. The open end of the enclosure shall have an opaque gate which provides a minimum of ten feet of clearance when open for service. All exposed exterior sides of the enclosure, other than the open end, shall be landscaped with one 36-inch-high shrub planted 24 inches on center. If improvements are proposed for previously approved containers, screening shall be provided to the greatest extent possible. [Ord. 2018-002]
e. **Retrofitting of Existing Developments**

The retrofitting of existing developments to comply with the standards of this Section is permitted at a ratio of deletion of one parking space for each outdoor receptacle, not to exceed ten percent of the total required parking spaces.

**Figure 5.B.1.A – Typical Example of Dumpster Layout**

---

9. **Neighborhood Recreation Facility**

A non-profit facility designed and intended for recreational use by occupants of a residential development or subdivision owned and operated by a POA or equivalent. Recreation facilities shall be subject to the following standards: [Ord. 2011-001] [Ord. 2013-001]

a. **Property Development Regulations (PDRs)**

1) PDRs shall be in accordance with the standards for a Recreation Pod in Table 3.E.2.D, PUD Property Development Regulations. [Ord. 2011-001]

2) PDRs for outdoor recreation amenities shall be in accordance with Art. 5.B.1.A.10, Outdoor Recreation Amenities. [Ord. 2013-001]

b. **Parking**

Parking shall be in accordance with Art. 6, Parking, Loading, and Circulation. [Ord. 2011-001] [Ord. 2020-001]

1) The POA or its equivalent shall be responsible for ensuring adequate on-site parking is provided during Special Events. [Ord. 2011-001]

c. **Landscaping**

Landscaping shall be in accordance with Art. 7, Landscaping, except that perimeter buffers shall not be required for golf course greens (excluding driving ranges or other recreational amenities) abutting internal streets or residential lots if approved by the BCC on a Preliminary Master Plan or Subdivision Plan. [Ord. 2011-001]

d. **Additional Requirements for Standard Zoning Districts**

In addition to the above, recreation facilities in a Standard Zoning District shall also comply with the following: [Ord. 2011-001]

1) Shall be subject to a Class A Conditional Use approval. [Ord. 2011-001]

2) Shall be located within the residential subdivision it serves; [Ord. 2011-001]

3) Shall not front on an Arterial or Collector Street; and, [Ord. 2011-001]

4) The Applicant shall provide documentation of ownership and management by the POA or an equivalent. [Ord. 2011-001]
10. Outdoor Recreation Amenities
An open-air amenity designed and intended to support recreation activities including but not limited to: basketball courts, tennis courts, playgrounds, and tot lots, excluding those uses regulated elsewhere such as Outdoor Entertainment. [Ord. 2013-001]

a. Principal and Accessory Use
   1) Principal Use
      Any outdoor recreation amenities owned and operated as a commercial enterprise or in combination with other commercial recreation uses on the same property shall be considered a principal use subject to the PDRs of the applicable district. [Ord. 2011-001] [Ord. 2013-001]
   2) Accessory Use
      Any outdoor recreation amenities operated by a non-profit assembly, social, civic organization, Property Owners’ Association (POA), or resident of a dwelling unit shall be considered an accessory use. The accessory use shall be located on the same lot as the principal use except if operated by a residential POA. If operated by a POA, the accessory use shall be located within the boundaries of the development, or a Neighborhood Recreation Facility. [Ord. 2011-001] [Ord. 2013-001]

b. Setbacks – General
   The following setbacks shall apply to outdoor recreation amenities and equipment, excluding swimming pools and spas, and shall be measured to the edge of the court surface or fence, whichever is more restrictive: [Ord. 2006-004] [Ord. 2011-001] [Ord. 2013-001] [Ord. 2014-001]
   1) Common Recreation Amenities
      Outdoor recreation amenities operated by a non-profit assembly, social, civic organization, or Property Owners’ Association (POA) on a community recreation pod, tract, or designated area, shall be set back a minimum of 50 feet from any residential property line, unless stated otherwise herein. [Ord. 2011-001] [Ord. 2013-001] [Ord. 2014-001]
   2) Residential Lot Recreation Equipment
      Recreation equipment located on a residential lot, which require issuance of a Building Permit shall comply with the setbacks in Table 5.B.1.A, Setbacks – General. [Ord. 2014-001]
Table 5.B.1.A – Setbacks, General

Notes:
1. Shall apply only to a Cottage Home that is on a single lot. [Ord. 2019-034]

Figure 5.B.1.A – Pool Setbacks

Examples of Pool Setbacks

- Single Family Interior Lot
- Single Family Corner Lot
- Zero Lot Interior
- Zero Lot Corner
b) Exceptions

(1) Single Family Design Clusters
   Single Family design clusters are a type of Single Family dwellings no longer permitted. Swimming pools and spas for projects with previously approved Single Family design clusters shall comply with the setbacks indicated on the PBC site plan. If setbacks are not indicated on site plan, setbacks for ZLL homes shall be applied.

(2) Single Family and ZLL Homes Adjacent to Open Space
   Swimming pools or spas may be constructed with a three-foot rear or side interior setback if adjacent to dedicated open space 50 feet in width or greater. [Ord. 2013-001]

(3) Neighborhood Recreation Facility
   Swimming pools or spas may be constructed with a ten-foot rear or side interior setback if adjacent to dedicated open space 50 feet in width or greater. [Ord. 2008-037] [Ord. 2013-001]

2) Building Coverage
   Swimming pools and spas shall not be included in the building coverage calculation unless enclosed within a building or a screen enclosure with a solid roof.

3) Fencing, Screening, and Access
   Swimming pools and spas shall be enclosed by a safety barrier, wall, fence, or other structure in accordance with the 2001 Florida Building Code, as amended. [Ord. 2005-002]

4) Common Area
   The construction of private swimming pools and spas for individual dwelling units within a common area is prohibited, unless the swimming pools and spas were legally constructed prior to April 21, 1995. If 30 percent of the existing dwelling units in a pod or subdivision have existing legally constructed swimming pools or spas in the common area, the remaining dwelling units within the same pod or subdivision may construct a swimming pool or spa as shown on the Final Subdivision Plan or Final Site Plan. If the Final Subdivision Plan or Final Site Plan does not graphically depict the placement of swimming pools or spas in common area, application shall be made to DRO to amend the Final Subdivision Plan or Final Site Plan to depict the placement of the swimming pool or spa if in compliance with the following criteria:
   a) Legally Permitted
      The Applicant demonstrates that existing swimming pools and spas were legally permitted and constructed in common areas;
   b) Joint Applicant
      The POA or equivalent must be included as part of a Joint Applicant on the Building Permit application; [Ord. 2011-001]
   c) Setbacks
      The swimming pool or spa must comply with all setback requirements measured from the outer boundary of the common area or have a 15-foot separation from primary structures, whichever is greater;
   d) Perimeter Landscape Area
      Accessory structures and improvements shall not be permitted in a required perimeter landscape area;
   e) Open Space
      The entire development must continue to meet open space requirements;
   f) Documents
      The homeowners’ documents shall be amended to include provisions that allow private use of the common area upon association approval; and
   g) Prohibitions
      Swimming pools or spas shall not be permitted in a common area that is designed as a water management tract.
11. Screen Enclosures
   a. General
      Screen enclosures may be covered with a screened or solid roof, as follows:

   Figure 5.B.1.A – Typical Screen Enclosure Setbacks
   PLAN VIEW

   b. Setbacks for Screen Enclosures with Screened Roofs
      Setbacks for screen enclosures with screened roofs shall be measured as specified in the Table below:

[Ord. 2013-001] [Ord. 2018-018]

Notes:
1. Shall apply only to a Cottage Home that is on a single lot. [Ord. 2019-034]
1) Exceptions
   a) Single Family Design Clusters
      Single Family design clusters are a type of Single Family dwelling no longer permitted. Screen enclosures with screen roofs for projects with previously approved Single Family design clusters shall comply with the setback indicated on the approved Site Plan. If setbacks are not indicated on an approved plan, setbacks for ZLL homes shall be applied.
   b) Single Family and ZLL Homes Adjacent to Open Space
      Screen enclosures with a screen roof may be constructed with zero-foot rear or side interior setbacks in accordance with Art. 3.D.1.D.4.a, Open Space. [Ord. 2008-037]
   c) Recreation Facilities
      Screen enclosures may be constructed with a minimum of seven-foot rear or side setback if adjacent to dedicated open space 50 feet in width or greater.

2) Townhouses
   a) Setbacks are required to be in compliance with the Townhouse standards of Art. 3.D.2.A, Townhouse;
   b) Screen enclosure shall maintain a minimum separation between other screen enclosures or the principal structure of Townhouse groups, as specified in Table 5.B.1.A, Screen Enclosure Setbacks;
   c) Separations between two Townhouse groups shall be measured by drawing a centerline between the two adjacent groups and measuring a minimum distance of equal to one-half of the required separation from the centerline between structures to ensure an equidistant separation; and,
   d) Screen enclosures for Townhouses may cover 100 percent of the total lot area provided minimum separations between Townhouse groups are met.

3) ZLL Developments
   A minimum five-foot-high opaque privacy fence or wall shall be provided on the zero side of ZLL extending from the rear of the structure to the rear corner of the screen enclosure. The screen enclosure may be attached to the fence or wall. The wall shall be constructed of materials consistent with Art. 3.D.2.B.3.d, Privacy Walls or Fences. A screen enclosure which is not attached to the privacy wall shall be set back a minimum of two feet from the ZLL side.

4) Building Coverage
   Screen enclosures with screen roofs shall not be included in the building coverage calculation.

5) Maximum Allowable Size
   Screen enclosures shall be permitted to cover a maximum of 30 percent of the total lot area, except for Townhouses.

6) Height
   The height of the screen enclosure shall not exceed the height of the home to which it is attached.

7) Screen Enclosures within Common Areas of a Residential Development
   See procedures under Art. 5.B.1.A.10.c.4), Common Area.

   c. Screen Enclosures with Solid Roofs
      1) Setbacks
         Screen enclosures with a solid roof shall meet the minimum setbacks of the principal use of the lot.
      2) Special Townhouse Provisions
         If the roof of the enclosure is solid, there shall be a minimum eight-foot-high wall on the shared lot line extending from the dwelling to the rear corner of the portion of the enclosure that is roofed. The wall shall be fire-rated in accordance with applicable Building Codes. The screen enclosure may be attached to the masonry wall.
      3) Height
         The height of the screen enclosure with a solid roof shall not exceed the height of the dwelling unit to which it is attached.
      4) Screen Enclosures with Solid Roofs within Common Areas of Residential Developments
         See procedures under Art. 5.B.1.A.10.c.4), Common Area.
      5) ZLL Setback
         A screen enclosure which is not attached to the privacy wall shall be set back a minimum of four feet from the ZLL side.
12. Communication Antennas
A transmitting and/or receiving device used for AM/FM radio, television, microwave, telephone, cellular, personal wireless services, and related forms of electronic communications. This excludes amateur radio antennas and satellite dish antennas. [Ord. 2017-007]

a. Applicability
Unless an Eligible Facilities Request for Modification is approved pursuant to Art. 4.B.9.E, Eligible Facilities Request for Modification, these standards below shall apply to antennas mounted on roofs, or attached to buildings or legal billboards (collocations). [Ord. 2006-004] [Ord. 2017-007]

b. Review Process
1) Antennas, excluding whip antennas not exceeding eight feet in height and six inches in diameter, may be permitted and shall be reviewed as follows: [Ord. 2017-007]

<table>
<thead>
<tr>
<th>Zoning District or Use</th>
<th>Structure Height</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Single Family Residential</td>
</tr>
<tr>
<td>&lt; 25'</td>
<td>Not Permitted</td>
</tr>
<tr>
<td>25-45'</td>
<td>Development Review Officer</td>
</tr>
<tr>
<td>&gt; 45'</td>
<td>Class B Conditional Use</td>
</tr>
</tbody>
</table>

[Ord. 2017-007]

2) Building Permit
A Building Permit shall be required for the installation of all antennas in addition to any other review process. [Ord. 2017-007]

c. Architectural Compatibility
Demonstrate architectural compatibility (color and/or texture) with the structure on which it is located. [Ord. 2017-007]

d. Screening
If the antenna is attached to a pole support structure, the pole shall be concealed by an opaque screen. [Ord. 2017-007]

e. Size Limitations for Panel Antenna
Each panel shall not exceed a maximum height of eight feet; maximum depth of four feet; and, maximum width of four feet. [Ord. 2017-007]

f. Supplemental Application Requirements
In addition to the requirements indicated above, plans depicting cross sections or elevations of the panel attached to the structure shall be provided at the time of submittal of the application package. [Ord. 2017-007]

g. Setbacks
1) Accessory Structures
Roof-mounted accessory structures shall meet a minimum 25-foot setback from the edge of the roof or comply with the architectural compatibility standards pursuant to Art. 5.B.1.A.12.c, Architectural Compatibility. [Ord. 2017-007]

2) There shall be no minimum setback required for antennas. [Ord. 2017-007]

h. Whip Antennas
Whip antennas not exceeding eight feet in height and six inches in diameter shall be permitted in any zoning district. Whip antennas may be attached to residential structures, utility poles, etc. Whip antennas, unless attached to a residential structure, shall be installed at least 50 feet from any existing residential structure. [Ord. 2017-007]
13. **Accessory Radio Tower**
   A radio tower for non-commercial electronic communication purposes may be permitted as an accessory structure to civic, institutional, recreational, and agricultural uses subject to the following standards:
   a. **Height**
      The radio tower shall not exceed 100 feet in height from ground level; and
   b. **Setbacks**
      An accessory radio tower shall be set back a distance equal to the height of the tower. The radio tower shall be located in such a manner that it will not fall on any power line.
   c. **Exceptions for SFWMD Telemetry Towers in the Glades Tier**
      SFWMD telemetry towers may be considered an accessory use within the Glades Tier, subject to the following: [Ord. 2014-025]
      1) DRO approval of an FSP; [Ord. 2014-025]
      2) Located on parcels owned by the SFWMD or leased from the Board of Trustees of the Internal Improvement Trust Fund (TIITF) of the State of Florida; [Ord. 2014-025]
      3) Height may exceed 80 feet; [Ord. 2014-025]
      4) The DRO may approve setback reductions for property lines or lease tracts within parcels owned by the SFWMD or TIITF, when it is demonstrated to DRO that the tower will collapse within the property or the adjoining parcels owned by the SFWMD or TIITF; and, [Ord. 2014-025]
      5) If located within the USA of the Glades Tier, rezoning for consistency with the parcel’s FLU designation shall not be required. [Ord. 2014-025]

14. **Government-Owned Towers**
   The following regulations shall be applicable to government-owned towers providing governmental services, including but not limited to emergency services. [Ord. 2018-002]
   a. New or modification of towers 100 feet or less in height, may be permitted by right in any zoning district, provided the setbacks, separation and distance between towers is at least 100 percent of the tower height, unless stated otherwise. All government towers in excess of 100 feet in height shall be subject to the standards in Table 5.B.1.A, Antenna Review Process. [Ord. 2018-002]
   b. Government-owned towers that do or will support commercial antennas shall be subject to the approval and Supplementary Use Standards pursuant to Art. 4.B.9 Commercial Communication Towers. [Ord. 2018-002]

[Ord. 2018-002]

Notes:

2. Applications subject to public hearing shall comply with and be limited to only the notification requirements in Art. 2.B.5.B, Newspaper Publication and Art. 2.B.5.D, Signs. [Ord. 2018-002]
3. For government entities other than Palm Beach County, coordination shall be undertaken with the County’s Facilities Development and Operation Department (FDO) for placement on the next available BCC meeting or hearing following receipt of a sufficient written request and fulfillment of required public notification. [Ord. 2018-002]
4. A government agency looking to locate a tower in a prohibited zoning district per Table 4.B.9.A, Commercial Communication Towers Matrix, may request BCC approval of the tower as an emergency conditional approval provided that: [Ord. 2018-002]
   - There are no properties owned by that government agency that are available within the defined service area in the zoning districts where towers are allowed; [Ord. 2018-002]
   - The tower is the minimum necessary to protect the public health, safety, or welfare of PBC residents; and, [Ord. 2018-002]
   - The Applicant makes a presentation to the BCC at a scheduled meeting or hearing on the merits of the request. [Ord. 2018-002]
5. Setbacks, separation or distance between towers may be reduced or exempted by the BCC based on findings of fact, including but not limited to: [Ord. 2018-002]
   - Demonstrate that the tower is the minimum necessary to maintain the level of service to protect the public health, safety, or welfare of PBC residents. [Ord. 2018-002]
   - Setbacks, separation and distance between towers are the minimum necessary to protect adjacent uses and structures. [Ord. 2018-002]
   - All setbacks less than 100 percent of the tower height shall be substantiated by a registered engineer in the State of Florida certifying that the tower is the minimum necessary to protect the public health, safety, and welfare of PBC residents; and, [Ord. 2018-002]

Notes:

1. A government agency proposing to locate a tower in a prohibited zoning district per Table 4.B.9.A, Commercial Communication Towers Matrix, may request approval of the tower as a Class A Conditional Use. [Ord. 2018-002]
15. Amateur Radio and Television Antennas

a. Purpose and Intent
The purpose and intent of this Section is to provide for the safe and effective installation and operation of amateur radio, citizens band radio, and television antenna support structures, and the beam, satellite, or other antennas installed on those support structures. It is also the purpose and intent of this Section to provide for a reasonable accommodation of amateur radio communications, in accordance with 47 CFR 95 and 97, while reflecting PBC’s legitimate interest of protecting and promoting the health, safety, welfare, neighborhood aesthetics, and morals of its citizens.

b. Applicability
All amateur and citizens band radio and television transmission and receiving antennas, including satellite dish antennas, shall be governed by the standards of this Section.

c. Antennas and Antenna Support Structures
All antenna support structures and the beam, satellite, or other antenna installed on those antenna support structures, shall be considered accessory uses, allowed only in conjunction with a Single Family dwelling, and shall comply with this Section and Art. 16, Airport Regulations.

d. Use Approval
1) Existing Uses
All antenna support structures and the beam, satellite, or other antennas installed on these support structures which have been constructed, installed, and are operational as of February 1, 1990, shall be considered legal, nonconforming uses which are vested.

2) New Uses
Antenna support structures and their antennas shall be permitted as accessory uses to residential uses and be reviewed and approved as provided below:

a) All Lots
A maximum of two antenna support structures and their antennas, 40 feet or less in height, shall be permitted on any lot. Two additional antenna support structures and their antennas shall be allowed, one to a maximum of 75 feet in height, and the second to a maximum of 100 feet in height. Additional support structures or structures that exceed these height limitations shall require a Class B conditional use approval.

b) Permits
All applicable permits shall be obtained.

e. Standards
1) Base Size
The base dimension for each antenna support structure shall be limited to a maximum five feet in overall width at grade. The foundation for each antenna support structure shall be no more than one foot above grade.

2) Setbacks
a) Antenna Support Structure
(1) Location
Antenna support structures shall not be located in the front setback.

(2) Lots Less than One Acre
Antenna support structures shall be located to comply with the district setback standards or a minimum of 25 feet, as measured from the center of the support structure, whichever is greater.

(3) Lots on One Acre or More
Antenna support structures shall be located to comply with the greater of the following:
(a) The minimum district setback standards as measured from the center of the support structure;
(b) 25-foot setback for support structures and their antennas less than 75 feet in height; or,
(c) A setback of 50 percent of the height of the support structure and its antenna equal to or greater than 75 feet in height.

(4) All Lots
Antenna support structures shall be located on the property so as to provide adequate setbacks from above-ground utility power lines other than Applicant’s service lines as follows:
(a) Setback a minimum distance equal to 50 percent of the height as calculated from grade to the highest point of the antenna support structure and its antenna; or...
(b) The owner shall submit a break point calculation certified by a professional engineer, or the owner shall submit the manufacturer's specifications that demonstrate a clear fall radius.

f. Antennas
In addition to complying with the setback standards, beam array, satellite, or other antennas shall be mounted so as to provide for removal at approach of hurricanes, if necessary, or provide for the lowering of such beam. The antenna or any element thereof shall be set back a minimum of ten feet from all R-O-Ws, easements, or property under different ownership.

g. Anchors
All peripheral anchors shall be located entirely within the boundaries of the property. If said supports and anchors are closer than five feet to property under different ownership, and if such support or anchor extends greater than three feet above the ground, it shall be effectively screened against direct view from abutting properties and shall extend no greater than six feet above ground.

16. Satellite Dish Antennas
a. Applicability
All satellite dish antennas shall be governed by the standards of this Section unless exempted below or regulated as part of an amateur radio antenna.

1) Exemptions
a) Residential Uses
Satellite dish antennas 40 inches or less in diameter shall be exempt from these requirements.

b) Non-Residential Uses
Satellite dish antennas under 80 inches in diameter shall be exempt from these requirements.

b. Standards
1) Residential Uses
a) Number
A maximum of one satellite dish antenna over 40 inches in diameter shall be allowed on a residential lot.

b) Location and Setbacks
Satellite dish antennas shall be mounted on the wall, ground, or a support structure in the side or rear yard and shall not be located on a wall facing the front property line or within an easement.

(1) Setbacks
Satellite dish antennas shall meet setback requirements of the district as measured from the outermost point of the dish on the side closest to the applicable setback or property line.

c) Screening
Satellite dish antennas, if located in the side or rear yard, shall be screened by an opaque fence or hedge.

d) Height
Satellite dish antennas shall not exceed the height limitations of the district.

2) Non-Residential Uses
a) Number
No limitation.

b) Location and Setbacks
Satellite dish antennas shall be wall, roof, or ground mounted, and shall not be located in the front or side corner yard.

(1) Setbacks
Satellite dish antennas shall meet setback requirements of the district as measured from the outermost point of the dish on the side closest to the applicable setback or property line.

c) Screening
Satellite dish antennas shall be completely screened from adjacent residential districts by an opaque wall (including parapet walls), fence, or hedge, or combination thereof, pursuant to Art. 5.B.1.A.2, Fences and Walls and Art. 7.D.4.A, Hedges.
17. Neighborhood Commercial Development (NCD)
   a. General
      It is the purpose of this Section to allow a limited amount of commercial uses in certain residential developments which developed prior to the establishment of planned development regulations in Ord. No. 73-2 (1973). Residential developments which meet the criteria in this Section will be allowed a limited amount of commercial area within the project without rezoning to a planned development district. It is the purpose of this Section to allow limited neighborhood serving commercial uses in residential areas under the control of an HOA without a commercial FLU designation or rezoning to a commercial district.
   b. Procedure
      Residential developments which meet the criteria in this Section may create a Master Plan showing existing development and the proposed commercial area. The area shall be subject to approval as a Class A conditional use.
   c. Criteria
      1) Property Owners' Association (POA)
         The application for a NCD shall be submitted by an HOA under the control of the residents.
      2) Minimum Threshold
         The HOA must contain a minimum of 500 units.
      3) Location
         The NCD shall meet the location criteria for a Commercial Pod in a PUD Art. 3.E.2, Planned Unit Development (PUD).
      4) Number
         A maximum of one NCD shall be permitted for each HOA.
      5) Size
         A NCD shall not exceed three acres in area.
      6) Limitation
         Uses shall be limited to the regulations of the CN district, excluding real estate sales offices. [Ord. 2005-041]

18. Bike Racks
   a. Number of Bikes
      Each bike rack shall accommodate a minimum of five bikes.
   b. Multifamily Uses
      Multifamily projects with more than 100 units shall provide one bike rack per 50 units.
   c. Commercial Uses
      All commercial projects subject to site plan approval by the DRO shall provide one bike rack per 200 parking spaces.
   b. Recreation Pod or Neighborhood Recreation Facility
      Shall provide a minimum of one bike rack. [Ord. 2020-001]
19. Permanent Generators
   a. Applicability
      1) Permitted Use
         Use of permanent generators shall be permitted during periods of electrical power outages in
         utility systems maintained by the utility service provider or when the BCC declares a state of
         emergency. [Ord. 2006-004] [Ord. 2007-013]
      2) Type 2 and 3 CLF, Club Houses, and Nursing or Convalescent Facility
         A permanent emergency generator shall be required for all Type 2 and 3 CLFs, Nursing or
         Convalescent Facilities, and PDD or TDD clubhouses 20,000 square feet, or greater. [Ord.
         2006-004] [Ord. 2007-013]
         a) Exemptions
            (1) Developments that have a BCC or DRO approved plan that graphically indicates a
                clubhouse(s) shall be exempt from the generator requirement except for projects that
                exceed 75 percent or more of the Improvement Value as stated below. [Ord. 2007-
                013] [Ord. 2013-001]
            (2) Renovations or additions that do not exceed 75 percent or more of the Improvement
                Value may be exempt from these requirements. [Ord. 2007-013] [Ord. 2011-016]
            (3) A PDD or TDD clubhouse located in the Coastal High Hazard Area as defined by the
                Plan, shall be exempt from this requirement. [Ord. 2007-013]
            (4) A PDD or TDD that has one or more clubhouses with a generator meeting the
                requirements of this Section, shall be exempt for any other remaining clubhouses
                within the development. [Ord. 2007-013]
   b. Standards
      1) General
         The following standards shall apply to all permanently installed generators. [Ord. 2006-004]
         a) Maximum Permissible Sound Level
            Refer to Art. 5.E.4.B.2. and Table 5.E.4.B, Maximum Sound Levels, [Ord. 2006-004]
         b) Screening
            Generators that are not located within, or completely screened by a building, shall be
            screened from view when adjacent to or visible from a public R-O-W or parcels with a
            conservation or residential FLU or use. Screening may include the use of fences, walls or
            hedges, or a combination thereof. [Ord. 2006-004]
c) Maintenance Cycle
Generators may be operated for exercising purposes one time per week, excluding Sundays, for a period not exceeding 30 minutes between the hours of 10:00 a.m. to 5:00 p.m. [Ord. 2006-004]

d) Location and Setbacks
Generators shall meet the district setback requirements for principal structures, but shall not be located between the front or side street façade of a building and a R-O-W or in an easement, unless: [Ord. 2006-004] [Ord. 2007-001]
(1) Encroachment is limited to ten percent of setback; [Ord. 2007-001]
(2) Where applicable, the Applicant indicates that an HOA has been notified of the application for Building Permit; [Ord. 2007-001]
(3) The generator shall be screened from view from any public rights-of-way or adjacent property lines by an opaque fence/wall; and, [Ord. 2007-001]
(4) If this criteria cannot be met, the Applicant may apply for a Type 1 Variance, pursuant to Art. 2.C.5.E, Type 1 Variance. [Ord. 2007-001]

2) Residential
The following shall be applicable to SFD, ZLL, TH, and MF units. [Ord. 2006-004]

a) Number
A maximum of one generator shall be allowed on a SFD, ZLL, or TH lot. A maximum of one generator per structure shall be permitted for Multifamily developments, with exception to condominiums, which shall be permitted one generator per unit. [Ord. 2006-004]

b) Setback Exceptions
Generators less than four feet in height from finished grade may be allowed within the required side and rear setbacks in accordance with Table 5.B.1.A, Setbacks for Generators Less Than Four Feet in Height. [Ord. 2006-004]

Table 5.B.1.A – Setbacks for Generators Less Than Four Feet in Height (1)

[Ord. 2006-004]

Notes:
1. Refer to FBC for additional location criteria.

3) Type 2 and 3 CLF, PUD Club Houses, and Nursing Homes
Required generators shall have a minimum operating capacity to provide service for the following: [Ord. 2006-004]

a) Essential Functions
Essential electrical systems within the building, including but not limited to, exit lighting, emergency lighting, elevators, fire alarm system, bathroom exhaust fans, and, bathroom hot water heaters. [Ord. 2006-004]

b) General Lighting
Lighting for a minimum of 30 percent of the building’s GFA, including but not limited to, main meeting or gathering area, hallways, and bathrooms. [Ord. 2006-004]

c) Multipurpose Room
Air conditioning for 30 percent of the building’s GFA including the largest meeting or gathering room. [Ord. 2006-004]

d) Fuel Storage
Sufficient to operate the generator for the minimum of 72 hours at the full load capacity. [Ord. 2006-004]

4) Non-Residential
There is no limitation to the number of generators. [Ord. 2006-004]

20. Mechanical Equipment

a. Applicability
This Section shall apply to the installation of improvements associated with mechanical equipment. [Ord. 2008-037]
1) Location and Setbacks
   a) Setback Exceptions
      Setback exceptions shall be applied pursuant to Art. 3.D.1.D.5, Setback Exceptions. [Ord. 2008-037]
   b) Height Exceptions
      Height exceptions shall be applied pursuant to Art. 3.D.1.E.4, Height Exceptions. [Ord. 2008-037]

2) Screening Requirements
   a) New and replacement equipment, shall be screened on all sides by an opaque barrier constructed of materials, and color compatible with the building or structure, or equivalent landscaping for ground-mounted equipment, to a minimum height equal to the highest point of the equipment. [Ord. 2006-004] [Ord. 2008-037] [Ord. 2011-016]
   b) Exemption
      (1) Screening shall not be required for roof-mounted mechanical equipment for the following: [Ord. 2006-004] [Ord. 2011-016] [Ord. 2019-005]
         (a) if the equipment is less than one foot in height, measured from the roof deck, and is painted to match the color of the structure it is attached to or servicing; [Ord. 2006-004] [Ord. 2008-037] [Ord. 2011-016]
         (b) for any industrial use with an industrial FLU designation if adjacent to a parcel with an industrial use and industrial FLU designation; [Ord. 2011-016] [Ord. 2019-005]
         (c) if an existing roof cannot structurally support additional weight associated with required screening materials. A certified letter, from a structural engineer or architect registered in the State of Florida, shall be submitted with the applicable permit substantiating that the roof cannot support the additional weight; or [Ord. 2008-037] [Ord. 2011-016]
         (d) for any industrial use with an industrial FLU designation if the equipment cannot be viewed from an adjacent R-O-W. A line of sight plan prepared in accordance with Art. 5.C.1.G.2, Line of Sight Analysis, shall be submitted with the applicable permit demonstrating that equipment cannot be viewed from the adjacent R-O-W. [Ord. 2011-016] [Ord. 2012-027] [Ord. 2019-005]
   c) Screening Exemptions
      (1) Solar Energy Systems
         Solar Energy Systems, including Solar Trees, are exempt from the screening requirements. [Ord. 2014-001] [Ord. 2017-025]
      (2) Existing Multifamily Condominium
         Replacement of roof-mounted mechanical equipment located on a Multifamily condominium may be exempt from new screening requirements, subject to the following: [Ord. 2015-006] [Ord. 2017-025]
         (a) Shall not be relocated closer to the edge of a roof, with exception to the minimum necessary to accommodate current technology requiring larger equipment, such as a heat pump or high-efficiency air compressor; and [Ord. 2015-006]
         (b) Increase in height shall only be permitted to accommodate elevated stands required to comply with the Building Code or upon demonstration that replacement equipment is larger due to current technology. [Ord. 2015-006]

21. Livestock
   a. Standards of Approval
      Domesticated livestock shall be allowed accessory to a Single Family residential use subject to the following standards: [Ord. 2012-027]
      1) Tier
         Shall only be located in the Rural and Exurban Tiers and when not within a PUD. [Ord. 2012-027]

22. Pot Bellied Pigs
   Pot bellied pigs may be kept as pets in a Single Family or Zero Lot Line Home, subject to the following: [Ord. 2013-001]
   a. Maximum Number
      No more than two pot bellied pigs per household are allowed. [Ord. 2013-001]
   b. Residence
      Pot bellied pigs shall reside within the residence (Single Family or ZLL Home) of its owner. [Ord. 2013-001]
c. Limitations
The commercial care, boarding or grooming, and the breeding of domesticated miniature or potbellied pigs is prohibited. [Ord. 2013-001]

23. Mobile Home
The use of a mobile home shall be prohibited unless stated otherwise in Art. 4, Use Regulations and this Article. [Ord. 2017-007]

<table>

</table>

Notes:
1. Mobile Home shall not be used for storage or display.
2. Supplementary Use Standards are indicated in Art. 4, Use Regulations.
3. Specific regulations are stated in this Article.

24. Air Curtain Incinerator
A combustion device used to burn trees and brush. [Ord. 2017-007]

a. Standards
   1) Exemptions
      The following temporary air curtain incinerators are exempt from the requirements of this Section: Incinerators operating under written approval from the PBC Health Department in accordance with the PBC Open Burning Ordinance (Ord. No. 2005-020); and incinerators used for the emergency burning of storm generated debris by a local government. [Ord. 2006-004] [Ord. 2017-007]
   2) Storage
      Except in the AP Zoning District, on-site outdoor storage of unprocessed material shall be limited to 45 days. Pile height shall be limited to 15 feet. Outdoor storage shall be set back a minimum of 25 feet from any property line or 50 feet from any property line adjacent to a residential district or use. Storage areas shall be screened from view pursuant to Art. 5.B, Accessory Uses and Structures. [Ord. 2006-004] [Ord. 2017-007]
   3) Hours of Operation
      Hours of operation are limited to 8:00 a.m. to 5:00 p.m., Monday through Friday. The incinerator shall not be charged before 9:00 a.m. and shall be completely extinguished one hour before sunset. [Ord. 2006-004] [Ord. 2017-007]
   4) No Burn Days
      The incinerator shall not operate on “no burn days” as designated by the PBC Fire-Rescue Department. [Ord. 2006-004] [Ord. 2017-007]
   5) Setback
      The incinerator shall be set back a minimum of 1,200 feet from any property line abutting a residential district or use. [Ord. 2006-004] [Ord. 2017-007]

b. Supplemental Application Requirements
   1) Site Plan
      A site plan illustrating how the operation functions, circulation routes, square footage, height and location of buildings, incinerator and storage piles. [Ord. 2017-007]
   2) Waste
      An explanation of the quantity of waste to be received expressed in cubic yards per day or tons per day. [Ord. 2017-007]
   3) Dust Control
      A plan which addresses dust control in traffic, storage and processing areas. Dust control measures may include: additional setbacks, full or partial enclosure of air curtain incinerator and watering or enclosing storage piles. If facility with an air curtain incinerator also includes chipping, mulching or composting, adherence to the Supplementary Use Standards applicable to such use shall also be required. [Ord. 2017-007]
25. Air Stripper
A remedial system which treats contaminated groundwater. [Ord. 2017-007]
   a. Duration
      The length of time a remedial system may remain on a site shall be determined by ERM. [Ord. 2017-007]
   b. Setback
      If the Applicant is unable to meet the property development regulations, in lieu of a variance, the Zoning Division shall be authorized to determine the location of the structure and set necessary conditions for landscaping and screening. [Ord. 2017-007]

26. Kennels and Runs
Runs applicable to any Kennel use shall be subject to the following:
   a. Fences
      Safety fences around the outdoor runs shall not exceed six feet in height. [Ord. 2017-007]
   b. Hedge
      If the safety fence is not opaque, a continuous solid opaque hedge, a minimum of four feet at installation, shall be provided around the outdoor run. [Ord. 2017-007]
   c. Setbacks
      1) General
         a) Enclosed structures or enclosed runs shall comply with the minimum setbacks applicable to the principal dwelling unit. [Ord. 2006-036] [Ord. 2017-007]
         b) Outdoor runs or non-enclosed structures shall not be located within 25 feet of any property line. [Ord. 2006-036] [Ord. 2017-007]
      2) Hobby Breeders
         Outdoor runs or non-enclosed structures used by hobby breeders shall not be located within 50 feet of any property line adjacent to a residential district or 25 feet of any property line adjacent to a non-residential district. [Ord. 2006-036] [Ord. 2017-007]
   d. Guard Dog Shelter Exemption
      Adequate shelter required by ACC for any guard dog registered in accordance with ACC Ord. No. 98-22 may be allowed in any zoning district. A shelter for a permanent on-site guard dog, associated with guard duty, shall be exempt from the setback requirements of this Section when adjacent to non-residential zoning districts or uses. [Ord. 2008-036] [Ord. 2017-007]

27. Accessory Solar Energy Systems
Accessory Solar Energy Systems may be allowed as an accessory use, subject to the following: [Ord. 2017-025]
   a) Incidental and Subordinate
      Applications for the installation of an accessory Solar Energy System shall include documentation from the manufacturer, architect, engineer, or contractor performing installation, verifying the system is the maximum necessary to meet onsite energy usage. This limitation does not prohibit the use of net metering where permitted. [Ord. 2017-025]
   b) Collocation with Buildings
      Solar Energy Systems are classified as mechanical equipment, and may be placed on principal or accessory buildings, including those permitted within a front or side street yard. [Ord. 2017-025]
   c) Standards for Other Structures
      Solar Energy Systems installed on other structures shall be limited to the side or rear yard in accordance with the Standards of this Chapter, except as follows: [Ord. 2017-025]
      1) Exception
         Where the conditions of the side or rear yard prohibit installation, a Solar Energy System may be installed in the front or side street yard, subject to the following: [Ord. 2017-025]
            (a) Structures greater than six feet in height shall meet the minimum setbacks for the district. Structures less than six feet in height may be permitted within required setbacks, but in no case shall the system be located within 25 feet of the property line; and [Ord. 2017-025]
            (b) The system is completely screened from view from any other parcel or R-O-W through use of landscaping, fences, or walls. [Ord. 2017-025]
      2) Solar Trees
         A Solar Energy System installed on a structure intended to provide shade, provide for public art, or other similar function, may be allowed provided that the structure complies with setbacks, does not adversely impact any required or preserved landscaping, be placed so as to conflict with any vehicular or pedestrian circulation system, nor shade more than ten percent of any Open Space area. [Ord. 2017-025]
(3) Associated Solar – with Mechanical Structures
Where used to power electric gates, environmental monitoring stations, street lights, or other similar, provided the solar panel does not exceed a maximum of four square feet, and all electrical cables or equipment are hidden within the structure. [Ord. 2017-025]

d) Incorporation of Solar in Vehicular and Pedestrian Surfaces
The incorporation of Solar Energy Systems into any parking lot, sidewalk, bike path, or similar surface, shall be exempt from any setback or front or side street yard limitation. [Ord. 2017-025]

B. Government or Utility Emergency or Temporary Structures
This Section is intended to facilitate the placement or construction of structures or facilities that are temporary. These structures or facilities are utilized to ensure the health, safety, and welfare of the public from natural or pending disasters; or construction staging activities for infrastructure improvements. Typical uses may include: fire stations, hurricane shelters, utility facilities; or, construction staging areas. [Ord. 2011-001] [Ord. 2018-002] [Ord. 2019-005]

1. Review and Approval Process
Emergency or temporary structures shall be subject to the approval by the DRO through a ZAR process. The ZAR process may be waived by the Executive Director of PZB or designee as stated below: [Ord. 2018-002] [Ord. 2019-005]

a. Emergency Structures
The Executive Director of PZB may waive the ZAR process, and authorize the issuance of a Building Permit for the temporary structure upon determination that a public emergency, pending natural disaster, or actual natural disaster exists. [Ord. 2011-001] [Ord. 2018-002] [Ord. 2019-005]

b. Temporary Structures
The Zoning Director may require a PAC with the DRO in order to seek input from the various County Agencies on the temporary structure or staging area, or may seek direction from the BCC through an AI pursuant to Art. 2.C.8.B, Administrative Inquiry (AI). The Zoning Director shall consider documentation from the Applicant and any other input from County Agencies before issuance of a DO. [Ord. 2011-001] [Ord. 2011-016] [Ord. 2017-007] [Ord. 2018-002] [Ord. 2019-005]

1) Duration
The DO shall be valid for up to a period of six months from date of issuance, with one three-month extension by the Zoning Director. The BCC may extend the timeframe through an AI by the Zoning Director. [Ord. 2011-001] [Ord. 2018-002]

2) Construction Staging Areas for Right-of-Ways (R-O-Ws)
In addition to the requirements listed above, the following shall apply to those construction staging areas located on or adjacent to residentially zoned parcels. [Ord. 2008-003] [Ord. 2018-002]

a) Hours of Operation
Activity on the site shall not commence prior to 7:00 a.m. and must be completed prior to 10:00 p.m. A Type 1 Variance may be applied for to request modification from this provision. [Ord. 2008-003] [Ord. 2018-002]

b) Setbacks or Separations
Stored materials shall not be located within the required minimum district setback. [Ord. 2008-003] [Ord. 2018-002]

c) Screening
Temporary screening material, a minimum of five feet in height and 85-percent opacity shall be provided around the perimeter of the staging area, adjacent to residential uses, to mitigate visual impact. [Ord. 2008-003] [Ord. 2018-002]

d) Dust Control
Appropriate measures shall be taken, pursuant to Health Department requirements, to control dust or other airborne particulate matter. [Ord. 2008-003] [Ord. 2018-002]

e) Exceptions
Projects with a duration of 30 days or less shall be exempt from the requirements of this Section. [Ord. 2008-003] [Ord. 2018-002]

C. Temporary Structures
The purpose of this Section is to supplement regulations for temporary structures pursuant to the latest edition of the Florida Building Code, Section 108, Temporary Structures and Uses, and Section 3103, Temporary Structures. If there is a conflict between this Section and the provisions of the Florida Building Code, as amended, the latter shall apply. Temporary structures may be temporarily located on a property
to facilitate the construction or development of an approved project, or for a temporary use.  [Ord. 2019-005]

1. Types of Temporary Structures
Temporary structures may include, but are not limited to the following: trailer, shipping container, or construction fence. Temporary structures may be utilized for residential and non-residential related activities, except for tents. Tents may be utilized for non-residential activities only. All temporary structures shall be subject to the following, except stated otherwise:  [Ord. 2019-005]

   a. Residential
   Temporary structures may be utilized for on-site security, or as a temporary dwelling while a Single Family residence is under construction, and may be allowed only in the AR Zoning District of the Rural Service Area (AR/RSA). No additions shall be allowed except for awnings and demountable screen panels, stairs, decks, and trellises. Construction fences shall be exempt from the above limitations.  [Ord. 2017-007] [Ord. 2019-005]

   b. Non-Residential
   Temporary structures may be utilized as an office for professions who are actively involved on the construction site; or for the storage of goods or equipment, or to accommodate employees and business operation during the construction or renovation of a permanent structure.  [Ord. 2019-005]

2. Approval Process
All temporary structures or construction fences that are listed in this Section may be subject to Building Permit approval process or applicable State law. The Building Division shall determine which permits would apply at the application submittal. The application may be submitted concurrently with other permit applications for permanent or temporary structures. The applications may be forwarded to the Zoning Division or other County Agencies for review.  [Ord. 2019-005]

   a. Concurrent Applications
   A permit for the temporary structure shall be submitted concurrent with the permit application for the permanent structure.  [Ord. 2019-005]

   b. Plans or Survey
   The Applicant may utilize a plan or the most current survey of the property to indicate the location of the proposed temporary structures to demonstrate compliance of the requirements in this Chapter or any other applicable codes or Conditions of Approval.  [Ord. 2019-005]

   c. Agency Approval
   Sanitary sewage facilities and a potable water well may be required for certain temporary structures by the governmental agencies having appropriate jurisdiction, permits, and inspections for the installation, if applicable, the approval must be obtained from the PZB Department and Health Department.  [Ord. 2017-007] [Ord. 2019-005]

3. Additional Requirements for Temporary Structures
Temporary structures shall be subject to the following additional requirements, where applicable:  [Ord. 2019-005]

   a. Placement or Erection of Temporary Structure
   Temporary structure may only be placed or erected on the site after or concurrent with the issuance of a demolition permit or a Building Permit for land development activities, subject to the approval of the Building Division.  [Ord. 2019-005]

   b. Duration
   The temporary structure shall remain on the property only for the length of time necessary to construct a permanent structure.  [Ord. 2019-005]

   c. Location
   The structure and related parking shall be located on the site so as not to interfere with access to developed areas or areas under construction. A Watchman Trailer and required parking shall be allowed to be located in areas under construction.  [Ord. 2019-005]

   d. Setbacks
   Setbacks shall be in accordance with Table 3.D.1.A, Property Development Regulations (PDRs), and the applicable zoning district in which the property is located.  [Ord. 2019-005]

   e. Construction Fence
   All construction sites shall be enclosed and secured by a continuous fence at least six feet in height and shall be installed in accordance with the Florida Building Code. All fences installed pursuant to this Section shall be subject to the visibility at intersections requirements of Art. 11.E.9.C, Minimum Safe Sight Distance and Corner Clips at Intersection of this Code.  [Ord. 2019-005]

   f. Parking
   Parking to serve the temporary structure shall be within the construction site.  [Ord. 2019-005]
g. Removal
The temporary structure shall be removed from the site after issuance of the final Certificate of Occupancy (CO) or a Certificate of Completion (CC) of the permanent structure, unless a time extension is granted by the Building Official. Construction fences may be required to remain or be installed for safety purposes after the construction ceases. [Ord. 2019-005]

4. Portable Storage Container
Portable storage containers may be used for the temporary storage of goods for residential uses subject to the following requirements, and shall be exempt from the Zoning Division and Building Permit review: [Ord. 2017-025] [Ord. 2019-005]

a. A maximum of one container 16 feet in length, eight feet in width, and eight feet in height may be allowed, for no more than two times a year for a maximum of 15 days each time; [Ord. 2017-025]

b. Shall be located on driveways not to overlap easements, sidewalks, or R-O-W; [Ord. 2017-025]

c. Shall be set back a minimum of seven and one-half feet from the side property lines, except where no other driveway areas are available, the setback may be reduced subject to the dimensions in Art. 6.B.3.A.2.a.3a)(1)(a), Local or Residential Access Streets; and, [Ord. 2017-025]

d. Code Enforcement Division shall utilize the above requirements for any citation of violations. [Ord. 2019-005]

D. Flex Space
A type of use that allows a flexible amount of retail, office and industrial space in one structure located on parcels with an Industrial (IND), Economic Development Center (EDC), or Commercial High (CH) Future Land Use (FLU) designation, that are directly related to the principal use. [Ord. 2010-005]

1. Review Process
Applications for flex space shall be reviewed pursuant to Art. 2, Application Processes and Procedures, in addition to one of the following options: [Ord. 2010-005]

a. Option 1 – Uses requiring BCC approval shall be subject to the applicable review process pursuant to Art. 2.B.7, Types of Applications. The Applicant shall identify the portion of the building designated for flex space on the site plan. All other uses subject to an administrative review process shall be permitted in the BCC approved building. [Ord. 2010-005] [Ord. 2017-007]

b. Option 2 – Uses requiring DRO approval shall be subject to the review process pursuant to Art. 2.C, Administrative Processes. The Applicant shall identify the portion of the building designated for flex space on the site plan. All other uses subject to the Building Permit Review process shall be permitted in the DRO approved building. [Ord. 2010-005]

c. Option 3 – Uses subject to the Building Permit Review process may occupy a bay or the entire building as long as they comply with the applicable Supplementary Use Standards and additional ULDC requirements (parking, signage, etc.). The Applicant shall identify the portion of the building designated for flex space on the site plan. The Applicant has the option of applying flex space provisions to a specific bay in the building or having the entire building (single use tenant) dedicated to flex space. The Applicant shall submit the Building approved site plan to the Zoning Division for informational purposes indicating the area designated as flex space and demonstrating that the overall site is in compliance with the applicable ULDC regulations. [Ord. 2010-005]

2. Development Standards

a. CH FLU
Flex space located on parcels with a CH FLU shall be permitted to have the following mix of uses: a minimum of 50 percent industrial, not to exceed 75 percent; with the balance consisting of office or retail. [Ord. 2010-005]

b. IND OR EDC FLU
Flex space located on parcels with an IND FLU shall be permitted to have the following mix of uses: a maximum of 30 percent retail, with the balance consisting of industrial. [Ord. 2010-005] [Ord. 2017-007]

c. Parking and Loading Requirements
1) CH-FLU
Parking shall be calculated at the rate of 3 spaces per 1,000 square feet of floor area. [Ord. 2010-005]

2) IND-FLU
Parking shall be calculated at the rate of 2.5 spaces per 1,000 square feet of floor area. [Ord. 2010-005]
3) Reserve Parking or Parking Covenant
   a) Additional parking shall be reserved on site in the event that the flex space is converted back to regular commercial or industrial use, the minimum requirements based upon the proposed use as indicated in Table 6.B.1.B, Minimum Parking and Loading Requirements; or [Ord. 2010-005]
   b) A restrictive parking covenant informing current and future owners of the required parking requirements for the uses. If the flex space is converted at a future date the site must comply with the minimum parking requirements based upon the use as indicated in Table 6.B.1.B, Minimum Parking and Loading Requirements prior to Final DRO or Building Permit approval, whichever is applicable. In the event the onsite parking is not sufficient for the proposed use or parking spaces cannot be accommodated on the site, the owner shall be limited to uses that generate parking consistent with existing parking. The covenant shall be submitted to the Zoning Division for County Attorney review and approval at the time of Final DRO or Building Permit application. The approved covenant shall be recorded in the Clerk of Circuit Courts of PBC, and a copy of the approved and recorded covenant shall be submitted to the Zoning Division prior to issuance of a Building Permit. [Ord. 2010-005]

d. Thresholds
   Proposed flex space uses shall comply with the established review thresholds pursuant to Table 4.A.9.A, Thresholds for Projects Requiring DRO Approval, and Table 4.A.9.B, Thresholds for Projects Requiring Board of County Commissioners Approval. [Ord. 2010-005]

3. Uses Allowed
   The uses indicated in the Table below, may utilize flex space provisions pursuant to the applicable approval process indicated in Review Process above. [Ord. 2017-007]

<table>
<thead>
<tr>

[Ord. 2017-007]

Notes:
1. Flex space use to be allowed in IND or EDC FLU designation subject to DRO Approval.
2. Flex space use to be allowed in CH FLU designation subject to Class A Conditional Use approval.
CHAPTER C  DESIGN STANDARDS

Section 1  Architectural Guidelines

A. Purpose and Intent
The purpose of these guidelines is to encourage development to contribute to PBC as a unique place by enhancing the built environment. These guidelines are intended to ensure that new development and redevelopment will be compatible with the surrounding area and enhance the appearance of the local community.

B. Threshold
This Chapter shall apply to the following projects, buildings, and related signs:

1. General
   a. All non-residential projects or buildings requiring approval by the BCC or ZC; [Ord. 2006-036]
   b. All non-residential projects or buildings requiring approval by the DRO in accordance with the use matrices in Art. 4, Use Regulations, and Table 3.D.1.A, Property Development Regulations (PDRs), or those exceeding the thresholds in Table 4.A.9.A, Thresholds for Projects Requiring DRO Approval; [Ord. 2006-036] [Ord. 2017-007]
   c. Multifamily buildings with more than 16 units or three or more stories; [Ord. 2006-036] [Ord. 2009-040] [Ord. 2010-005]
   d. Substantial renovations of existing built projects or buildings meeting the threshold of this Chapter;
   and, [Ord. 2006-036]
   e. The following uses, regardless of building size; [Ord. 2006-036]
      1) Heavy or Light Repair and Maintenance; [Ord. 2006-036] [Ord. 2012-027] [Ord. 2017-007]
      2) Retail Sales for automotive parts and accessories; [Ord. 2006-036] [Ord. 2012-027] [Ord. 2017-007]
      3) Type 1 Restaurants with drive through requesting location criteria exception pursuant to Art. 4.B.2.C.33, Restaurant, Type 1; and, [Ord. 2012-027] [Ord. 2017-007]
      4) Type 3 CLF. [Ord. 2017-007]

2. Mixed Use
   Mixed use development that includes a combination of residential and one or more non-residential uses that do not trip the thresholds listed above, shall comply with the following guidelines to ensure the project is vertically or functionally integrated; [Ord. 2006-036]

3. Any mixed use project in the WCRAO. [Ord. 2006-004]

C. Exemptions
1. Agricultural or industrial buildings not visible from a public street or residential zoning district.
2. Buildings which are exempt from local Building Permits or government review pursuant to State of Florida or Federal Statutes.
4. Primary and secondary building frontages within a TMD, and buildings in the NRM, NG, and NC Sub-areas of the WCRAO that have a side setback of less than 15 feet, shall be exempt from the requirements of Art. 5.C.1.I.1.c.1.a), Recesses/Projections. [Ord. 2005-041] [Ord. 2006-004]
5. Palm Beach County Water Utility Facilities which are not visible from a public street or residential zoning district or are limited access, high security facilities not open to the general public. [Ord. 2007-013]
6. All of the uses/features (except for parapet screening of mechanical equipment noted in the height exceptions in Art. 3.D.1.E.4, are also exempt from architectural requirements. These uses/features include: [Ord. 2007-013]
   a. Tanks; [Ord. 2007-013]
   b. Water towers; [Ord. 2007-013]
   c. Cooling towers; [Ord. 2007-013]
   d. Miscellaneous, unoccupied utility support structures of 1,000 SF or less (proposed addition to list). [Ord. 2007-013]
D. Effect

1. Effect on Prior BCC and ZC Approvals
   These guidelines shall apply to all previously approved projects as a BCC or ZC Condition of Approval as part of a DOA or Status Report. Previously approved architectural Conditions of Approval shall remain in full effect unless amended by the BCC or ZC. Non-residential projects previously approved by the BCC or ZC shall comply with Art. 5.C.1.H.1.a, General. [Ord. 2006-004]

2. Effect on Prior DRO Approvals
   These guidelines shall not apply to projects or buildings which have a previously approved site plan by the DRO, unless within a PDD or for any use specifically identified within Art. 4.B, Use Classification. Non-residential projects previously approved by the DRO or ZC shall comply with Art. 5.C.1.H.1.a, General. [Ord. 2006-004]

3. Effect on Other Regulations
   These guidelines shall supplement architectural requirements of an Overlay District, Neighborhood Plan, or other applicable regulations. In case of a conflict, the more strict regulation shall apply.

E. Review Process

PZB shall review all applicable buildings for compliance with this Chapter during the Building Permit or Zoning review process, and provide a written determination of compliance with the requirements of this Chapter. An application submitted for any type of review process listed below may apply for Type 2 Waiver for a Unique Structure designation or Type 2 Variance, pursuant to Art. 2.B.7., Types of Applications: [Ord. 2009-040] [Ord. 2017-007]

1. Methods
   An Applicant or PBC may request review for compliance with this Chapter in accordance with any one of the following methods: [Ord. 2005-002]
   a. Type 1 – Projects Requiring BCC Approval
      A request for a determination of compliance with the requirements of this Chapter may be submitted with the application. A written determination of compliance with this Chapter shall be made in the staff report containing the recommendation for the Development Order. The request for a determination shall be submitted no less than 30 days prior to the public hearing. [Ord. 2005-002] [Ord. 2009-040]
   b. Type 2 – Projects Requiring ZC Approval
      A request for a determination of compliance with the requirements of this Chapter may be submitted with the ZC application. A written determination of compliance with this Chapter shall be made in the staff report containing the recommendation for the Development Order. The request for a determination shall be submitted no less than 30 days prior to the ZC public hearing. [Ord. 2009-040]
   c. Type 3 – Projects Requiring DRO or Site Plan Approval
      A request for a determination of compliance with the requirements of this Chapter may be submitted with the original DRO or site plan approval application. A written determination of compliance with this Chapter shall be made in the comment letter regarding the Development Order for the project. The request for a determination shall be included in the initial DRO application. [Ord. 2009-040]
   d. Type 4 – Projects Requiring Building Permit Approval
      Buildings requiring a Building Permit only shall be reviewed for compliance through the standard Building Permit Review process. The request for a determination shall be submitted prior to or concurrent with the Building Permit application. [Ord. 2009-040]

2. Unique Structure
   a. Purpose and Intent
      To recognize structures that comply with the definition in Art. 1.H.2.A.78.m, Unique Structure, that by the nature of their: scale, massing, proportion, rhythm, style, harmony, order, balance, etc., warrant a special designation. PBC has diverse architectural styles in the various Tiers that are reflective of the historical evolution of the community. The architecture guidelines were established to preserve and enhance those communities through common building design elements. The allowance for unique structures will continue to foster preservation of key design elements while recognizing new and creative design and materials. An Applicant may apply for Unique Structure designation pursuant to Art. 2.B.7.D, Type 2 Waiver, for any of the types of review outlined in Art. 5.C.1.E, Review Process. A Unique Structure designation will require the Applicant to clearly demonstrate that by complying with the standard architectural guidelines in Art. 5.C.1.H, Guidelines, the overall design would be compromised. A structure classified as unique does not have to apply for variances, but shall comply with the standards in Art. 2.B.7.D.4, Standards for a
**Unique Structure.** The Unique Structure process shall not be requested if the Applicant can seek Variances in Art. 2.B.7.E, Type 2 Variance. [Ord. 2009-040] [Ord. 2011-001]

b. **Applicability**
An Applicant seeking a Unique Structure designation shall submit the request on forms specified by the PBC Official responsible for reviewing the application, pursuant to Art. 5.C.1.F, Application Requirements. [Ord. 2009-040]

c. **Review Process**
The Unique Structure shall be reviewed pursuant to Art. 5.C.1.E, Review Process and Art. 2.B.7.D.4, Standards for a Unique Structure. Staff shall review the request and prepare a staff report for approval, approval with conditions, or denial to the Zoning Commission. The Zoning Commission will make a finding and recommendation to the BCC that the request is consistent with the required Standards. The BCC shall make the final decision to approve, approve with conditions, or deny the designation of Unique Structure. [Ord. 2009-040]

3. **Type 1 Waiver – Green Architecture**

   a. **Purpose and Intent**
   To encourage and promote the design and construction of Green Architecture. This Section provides for Type 1 Waivers from the architecture design guidelines, provided the Applicant can achieve the minimum points necessary to be classified as Green Architecture. In order to design sustainable architecture, certain allowances for Type 1 Waivers in Art. 5.C.1.H, Guidelines, need to be recognized and allowed if minimum standards are met. The provisions in Table 5.C.1.E, Green Architecture Designation Rating Program, provide alternative design solutions to achieve Green Architecture while still complying with the general intent of the architecture guidelines. [Ord. 2009-040] [Ord. 2012-027]

   b. **Applicability**
   An Applicant proposing to utilize the Green Building Architecture Waiver provisions for the construction of new or structurally renovated buildings shall be required to comply with the following: [Ord. 2009-040]
   1) Submit an application as required in Art. 5.C.1.F, Application Requirements, [Ord. 2009-040]
   2) Comply with the review process outlined below in Art. 5.C.1.E.3.c, [Ord. 2009-040]
   3) Comply with the requirements outlined in Table 5.C.1.E, Green Architecture Designation Rating Program, [Ord. 2009-040]

   c. **Review Process**
The Green Architecture designation application shall be reviewed and approved, approved with conditions, or denied in conjunction with one of the review processes outlined in Art. 5.C.1.E, Review Process. The registered architect shall complete the required Zoning application, which will require compliance with the Table 5.C.1.E, Green Architecture Designation Rating Program, [Ord. 2009-040] [Ord. 2011-016]

   1) **Calculating Points**
The registered architect shall be responsible for calculating the total points obtained for requirements listed in Table 5.C.1.E, Green Architecture Designation Rating Program. Any requirement that does not have specific qualitative and or quantitative measurements the registered architect shall refer to the USGBC Green Building Council rating system to determine acceptable national measurements. In order for the Zoning Director to grant the Green Architecture designation, the Applicant shall obtain a minimum of 30 out of a total of 50 points from Table 5.C.1.E, Green Architecture Designation Rating Program. The Applicant may choose one or any combination of these categories to achieve the minimum 30-point requirement. If a minimum of 30 points cannot be achieved, then the architecture shall comply with Art. 5.C.1.H, Guidelines. The registered architect of the building shall be required to monitor the building construction until final Certificate of Occupancy to ensure compliance with the Green Architecture approval. [Ord. 2009-040]
d. Appeals
If the application is denied, the Applicant may appeal the decision to the Zoning Commission in compliance with the standards of Art. 2.C.5.F, Type 1 Waiver. [Ord. 2011-016] [Ord. 2012-027]

4. Administrative Amendments by DRO
Minor amendments to BCC or ZC approved architectural elevations pursuant to Review Types 1 and 2 may be approved by the Zoning Director provided the changes do not reduce compatibility with surrounding properties. Changes shall be limited to the following: [Ord. 2009-040]
a. A maximum increase of 25 percent or ten feet in overall building height, from finished grade to highest point, whichever is less;

b. Modifications to the architectural composition which are equal to or enhance the approved elevation; and,

c. Modifications to ensure consistency with this Chapter.

F. Application Requirements
The application form and requirements for Architecture Review, including Unique Structure and Green Architecture shall be submitted on forms specified by the PBC Official responsible for reviewing the application. All application documents shall be consistent with the Technical Manual. [Ord. 2009-040]

G. Visual Impact Analysis
A visual impact analysis shall be submitted with the chosen method of review only for projects or buildings which are contiguous to a public street or to a residentially zoned property. The visual impact analysis shall be prepared and certified by a design professional and include:

1. Environmental Assessment
An assessment of the natural and man-made environments surrounding the proposed building utilizing a minimum of four views taken from the subject property of all contiguous public streets and/or residentially-zoned properties and one aerial photograph with the proposed building superimposed on the site.

2. Line of Sight Analysis
A line of sight analysis of the proposed building in relation to the surrounding area. This may be accomplished by submitting a two-dimensional cross section(s) of the site showing the proposed building elevations in relation to contiguous public R-O-Ws and residentially zoned properties.

3. Prevalent Theme
A written description by the design professional of the prevalent architectural character of the surrounding area, or desirable architectural character, if no prevalent architectural character exists. If a prevalent architectural character does not exist, the use of architectural styles such as Spanish Eclectic, Mediterranean Revival, Florida Vernacular, or Bermuda/Island is encouraged.

4. Architectural Compliance Statement
A written description by the qualified design professional that the visual impact analysis indicates that the architectural composition of the proposed project or building creates focal points in scale with the pedestrian environment, and complements or enhances existing structures in the surrounding area.

H. Guidelines
1. Non-Residential Design Elements
The following guidelines shall apply to all non-residential projects or buildings that meet the threshold in Art. 5.C.1.B, Threshold, and are not exempt in Art. 5.C.1.C, Exemptions: [Ord. 2005-002]

a. General
An overall unified architectural character and image shall be created by the use of common elements such as consistent forms, colors, materials, and details. Similar, but not identical, architectural treatment between pods within a multi-pod project may be permitted to allow diversity within the project.

1) Similar architectural composition and treatment shall be provided on all sides of each building contiguous to or visible from a public street or residential zoning district. [Ord. 2009-040]

2) Out parcels and accessory buildings within a project shall be constructed of compatible materials, color, and character as the principal building.

b. Roofline
The roofline along each elevation shall incorporate a minimum of one design feature each from Table 5.C.1.H, Primary Roof Design Element, and Table 5.C.1.H, Secondary Roof Treatment, below. The same features are not required on each elevation:
Table 5.C.1.H – Primary Roof Design Element

<p>| | |</p>

c. Façade

The front, side, and rear façades, if contiguous to a public street or residential zoning district of every building, shall incorporate recesses, projections, and architectural elements such as columns, arches, etc., as provided below:

1) Required Design Elements

All applicable façades, unless exempted above, shall meet the following standards:

a) Recesses/Projections

Façades greater than 50 feet in length shall incorporate recesses and projections a minimum of 12 inches in depth along a minimum of 20 percent of the total length of the façade. The recesses or projections shall be distributed along the façade with a maximum spacing of 100 feet between each recess or projection. Façades with four or more bay doors may exclude the combined length of the bay doors from the total façade length.

b) Walls

Blank walls shall not exceed ten feet in height or 20 feet in length. Control and expansion joints shall constitute a blank wall, unless used in a decorative pattern with varied materials or textures and spaced a maximum of ten feet on center. Relief and reveal depth shall be a minimum of three-quarters of an inch.

c) Storefronts

Individual ground-level retail uses with exterior public access that are part of a larger freestanding building, other than regional commercial facilities, shall have display windows along a minimum of 20 percent of the façade length. Windows shall be defined with details such as frames, sills, shutters, planters, relief trims, or lintels. Storefront design, relief features, and decorative treatments shall complement contiguous storefronts.

2) Additional Design Elements

In addition to Art. 5.C.1.H.1.c.1), Required Design Elements, the front and side façades shall include a minimum of one of the following design elements:

a) Exterior Treatment

The exterior treatment of the front elevation shall consist of a minimum of two different building materials, textures, or finishes at a ratio of a maximum of 80 percent for the primary treatment and a minimum of 20 percent for the secondary treatment. Exterior finishes such as stucco, brick, wood, coquina, or cut stone are encouraged. The surfaces of multiple exterior storefronts within a building, except regional commercial facilities, shall complement contiguous storefronts.

b) Fenestration Details

Architectural features or details such as, windows, awnings, covered arcades, sills, shutters, reliefs, trims, columns, pilasters, quoins, reveals, cornices, horizontal banding, arches, decorative vents, and/or accent tile, shall be integrated into the façade to avoid the appearance of a blank wall and shall be provided along a minimum of 60 percent of the façade length of the front, side, and rear façades if contiguous to a public street or residential zoning district.
d. Entries

All public entries shall be easily identifiable and integrated into the building architecture. Each freestanding principal structure shall have a minimum of one clearly defined primary public entrance feature. The primary entrance shall incorporate a minimum of one design element each from Table 5.C.1.H, Primary Entry Feature Design Element, and Table 5.C.1.H, Secondary Decorative Treatment, below:

![Table 5.C.1.H – Primary Entry Feature Design Element](image)

![Table 5.C.1.H – Secondary Decorative Treatment](image)

e. Color

Color shall be considered to achieve architectural compatibility with architecture in the surrounding area and to complement structures within a development. [Ord. 2009-040]

f. Design Elements Subject to ZC or BCC Approval

The following elements are prohibited, unless approved by the ZC or BCC pursuant to the review process of this Chapter:
1) structures which are of symbolic design for the purpose of advertising;
2) high intensity, metallic, neon, or fluorescent colors;
3) neon tubing, fiber optics or similar lighting, excluding those used for signage;
4) high gloss vinyl and plastic awnings;
5) awnings with horizontal ribbing, flowered or similarly patterned designs;
6) unpainted or plain/unfinished exterior façades, excluding galvalume and galvanized steel roof; and,
7) smooth-faced, painted, concrete masonry block.

g. Rural Design Elements

The following standards shall also apply to non-residential projects, buildings, and signs in the Rural and Exurban Tiers.
1) Roof

The roofline along each elevation shall incorporate a minimum of one design feature each from Table 5.C.1.H, Rural Roof Design Element, and Table 5.C.1.H, Rural Decorative Roof Treatment below. The same features are not required on each elevation. [Ord. 2018-002]

![Table 5.C.1.H – Rural Roof Design Element](image)

![Table 5.C.1.H – Rural Decorative Roof Treatment](image)
a) **Material**

Roof materials shall be limited to standing seam metal, corrugated, or 5V crimp made of copper, terne-coated stainless steel, galvalume or galvanized steel, slate, dimensional or architectural wood shingles, or metal shingles.

2) **Exterior Building Finishes**

Exterior building and sign finishes shall be limited to:

a) vinyl, lap cedar or hard textured concrete siding with rough or smooth horizontal planks, six-inch lap siding, shingles, or vertical board and batten;

b) brick or brick veneer;

c) stone;

d) textured stucco; and,

e) split face, pre-formed, or textured masonry block.

3) **Façades**

a) **Single-Story Buildings**

A minimum of three of the following architectural details or other similar treatment shall be integrated into all applicable single-story building façades to avoid the appearance of a blank wall:

1. columns or pilasters;
2. decorative cornices;
3. horizontal banding;
4. arches;
5. decorative vents or louvers;
6. moldings and trims;
7. decorative shutters; and,
8. bay windows.

b) **Multi-Story Buildings**

In addition to the required architectural details above, multi-story buildings shall also have breaks such as a canopy, balcony, overhang, or other horizontal projections.

4) **Porches and Entryways**

All buildings shall have prominent entryways with well-defined porches and railings. Porches shall be provided along the entire front façades, and 50 percent of the side or rear façades if contiguous to a public street or residential zoning district. The design of a porch may be interrupted by required exits, paved pedestrian entrances, loading areas, and shall include the following: [Ord. 2018-002]

a) **Width**

Porches shall have a minimum clear, unobstructed width of eight feet.

b) **Railings and Posts**

Porches shall incorporate decorative railings with posts at a maximum of 12 feet on center along the entire length, excluding pedestrian access points.

5) **Windows and Doors**

All windows and doors shall have architectural details such as panels, transoms, crossbucks, shutters, decorative trims, or moldings. All glass areas shall appear to be multi-paned.

2. **Multifamily Design Elements**

In addition to the guidelines for non-residential projects, Multifamily projects shall adhere to the following guidelines: [Ord. 2010-005]

a. **Master Elevations**

Master elevation approvals may be reused within a project, provided the master elevation complies with Art. 5.C.1.G, Visual Impact Analysis, for each location in which that elevation is used.

b. **Balconies and Patios**

Individual balconies and/or patios shall be provided for a minimum of 20 percent of the total number of units within each building.

I. **Large Scale Commercial Development**

Large Scale Commercial Development shall be defined as any large single tenant retail use, with or without accessory tenants, in a single building, between 65,000 and 200,000 gross square feet. These regulations shall apply to all new developments and developments meeting the requirements of Art. 5.C.1.D, Effect.

[Ord. 2005-002]

1. **Single Tenant Limit**

Variances from these requirements shall be prohibited. [Ord. 2005-002] [Ord. 2011-001]
a. **CL FLU**

The maximum building size for a single tenant shall be less than 65,000 gross square feet except as follows: [Ord. 2005-002] [Ord. 2013-001] [Ord. 2017-025]

1) The commercial development of the parcel located at the northwest corner of Southern Boulevard and Seminole Pratt Whitney Road and identified in the legal description in Ord. No. 2010-030 (LGA 2010-012); and [Ord. 2005-002] [Ord. 2013-001] [Ord. 2017-025]

2) Sites approved under Ord. No. 2008-048 and Ord. No. 2009-028 as an LCC in the Urban/Suburban Tier are allowed to have up to a maximum of 100,000 square feet. [Ord. 2017-025]

b. **CH FLU**

The maximum building size for a single tenant shall be 200,000 gross square feet. [Ord. 2005-002]

1) **Exception**

An additional 10,000 square feet shall be permitted, for a total of 210,000 gross square feet, subject to Class A Conditional Use approval and the following requirements: [Ord. 2005-002] [Ord. 2018-002]

a) Perimeter landscaping buffer widths and plant material required by Art. 7.C, Landscape Buffer and Interior Landscape Requirements, shall be increased by twenty percent. [Ord. 2005-002]

b) One additional pedestrian amenity shall be required in addition to the requirements of Art. 5.C.1.I.3.d, Pedestrian Amenities. [Ord. 2005-002]

c) A minimum of 50 percent of the walkways required by Art. 5.C.1.I.3.d.2), shall be covered, providing overhead shelter from the elements. Covered areas shall be evenly distributed between the furthest parking stalls and public entrances. [Ord. 2005-002]

d) A maximum of two out-parcels shall be permitted, subject to the following: [Ord. 2005-002]

 1) Walkways consistent with those required by Art. 5.C.1.I.3.d.2), shall be provided to both outparcels from a public entrance for any single tenant having greater than 200,000 gross square feet. [Ord. 2005-002]

  2) Building square footage for convenience stores with gas sales and/or auto service stations shall be deducted from the additional 10,000 square feet permitted under this exception. [Ord. 2005-002]

If the project is to be phased, all of the above improvements shall be installed in the first phase. [Ord. 2005-002]

2. **Façade Orientation**

For the purposes of this Section, façade orientation shall be defined as follows: [Ord. 2005-002]

a. Front façade: The wall of a building containing the principal public entrance. The front façade is generally located parallel with and facing the principal parking area for the building. [Ord. 2005-002]

b. Side A façade: The wall of a building containing a secondary public entrance. The Side A façade is generally located parallel with and facing secondary parking area for the building. [Ord. 2005-002]

d. Rear façade: The rear wall of a building generally opposite the front façade. [Ord. 2005-002]

3. **Single Tenants 65,000 Gross Square Feet or More**

Developments with single tenants occupying 65,000 gross square feet or more shall be subject to the requirements of Table 5.C.1.I, Large Scale Commercial Development. [Ord. 2005-002]
Table 5.C.1.I – Large Scale Commercial Development

</table>

Notes:
1. Any side or rear façade with a secondary public entrance shall meet the requirements of Side A above.
2. Front façade requirements shall be used for any façade that is oriented towards a street.
3. Percentage as a total length of façade.
4. The percentage length shall be in accordance with this Table, or Table 7.C.3.B, Foundation Planting and Dimensional Requirements, whichever is greater.
5. Minimum width: 12 feet.
6. A minimum of 15 percent of the parking shall be located immediately fronting a Side A entrance. [Ord. 2005-002]

### a. Roofline
1. **Parapet Articulation**
   a) Articulation in parapet shall be required with a minimum of five feet for front and side A façades, and any façade oriented towards a street; and, two and one-half feet for side B and rear façades. [Ord. 2005-002]
   b) A Parapet return is required with a length equal to or exceeding the required parapet articulation. [Ord. 2005-002]

### b. Façade
1. **Recesses/Projections**
   Façades greater than 100 feet in length shall incorporate recesses and projections along the total length of the façade, in accordance with Table 5.C.1.I, Large Scale Commercial Development. Required recesses and projections shall be distributed along the façade with a maximum spacing of 150 feet. Recesses and projections shall be from finished grade to roofline. [Ord. 2005-002]

2. **Fenestration Details**
   a) Windows
   Windows shall be provided in accordance with Table 5.C.1.I, Large Scale Commercial Development. [Ord. 2005-002]
   (1) A minimum of 70 percent of windows on front and side A façades shall be transparent, or window box displaying only merchandise. The remaining 30 percent may be non-transparent. [Ord. 2005-002]
   (2) Windows shall be at pedestrian scale. [Ord. 2005-002]

3. **Exterior Treatment**
   a) A minimum of two different types of building materials shall be used, with a 70 percent-30 percent ratio. A change in stucco or use of windows will not count toward meeting this requirement. [Ord. 2005-002]
   b) Exposed gutters or rain leaders are permitted if decorative in nature. [Ord. 2005-002]

4. **Covered Walkways**
   a) Façades with a public entrance shall provide covered walkways along a minimum of 70 percent of the overall length of the front façade, and 30 percent of the overall length of side A façades. [Ord. 2005-002]
   b) Covered walkways shall be a minimum of 10 feet in width, unobstructed, with appropriately spaced columns and pitched roofs. [Ord. 2005-002]
c. Public Entrances
1) A minimum of one public entrance shall be provided along the front façade. [Ord. 2005-002]
2) One additional secondary public entrance shall be provided on a side façade, subject to the following: [Ord. 2005-002]
   a) The secondary entrance shall be accessible to the public during the same business hours as the primary entrance, or from 10 a.m. to 6 p.m., whichever is less. [Ord. 2005-002]
   b) Secondary public entrances shall be located a minimum distance of 25 percent of the length of the side A façade, from the corner of the front façade. [Ord. 2005-002]

d. Pedestrian Amenities
1) One public amenity shall be provided for every 50,000 square feet, or fraction thereof, including but not limited to public art; (not depicting any advertising); fountains (of at least eight feet in height and 16 feet in diameter); pergolas; bell or clock tower; and, public seating areas (not in conjunction with a restaurant). Required pedestrian amenities shall be a minimum of 800 square feet and 25 feet in width. [Ord. 2005-002]
2) A minimum of two pedestrian pathways a minimum of ten feet in width leading from the furthest parking spaces to public entrances shall be required. These pathways shall incorporate the use of decorative pavement, trellises, seating, pergolas, arbors, gazebos, and landscaping. [Ord. 2005-002]

J. Appeal
1. Non-Judicial Remedies
   Any Applicant aggrieved by an administrative interpretation or decision regarding this Chapter who wishes to appeal the interpretation or decision shall file an appeal to the ZC and follow the appeal procedures established in Art. 2.C.5.F, Type 1 Waiver. [Ord. 2005-002] [Ord. 2011-016] [Ord. 2012-027]
2. Exhaustion of Non-Judicial Remedies
   Any Applicant, the Executive Director of PZB, the BCC member representing the district in which the project or building is to be located, aggrieved by a decision of the ZC regarding an interpretation or decision regarding this shall, within 30 calendar days from the date a decision by the ZC is rendered, file an appeal to the BCC. [Ord. 2005-002] [Ord. 2011-016]

CHAPTER D  PARKS AND RECREATION – RULES AND RECREATION STANDARDS

Section 1  General

The Director of Parks and Recreation shall be responsible for implementing, applying, interpreting, and modifying the standards of this Chapter.

A. Purpose and Intent
   The purpose and intent of this Chapter is to ensure the provision of parks, on-site recreation areas, and facilities in proportion to the demand created by development. By requiring such facilities, it is the intent of this Section to ensure the provision of functionally adequate, aesthetically pleasing, and safe park and recreation areas. The specific objectives of this Chapter are as follows:
1. Establish recreational standards for the development of land within unincorporated PBC;
2. Aid in the coordination of land development in PBC in accordance with orderly physical patterns;
3. Provide public and private park and recreation areas in accordance with the objectives of the Recreation and Open Space Element of the Plan; and,
4. Ensure that necessary recreational improvements will be provided for residents concurrent with residential development.

B. Applicability
   The standards of this Chapter shall apply to all development in unincorporated PBC, or existing development that is modified to the extent that it includes residential uses or site design changes or features that were not specifically shown on the previously approved plans. All recreation areas established by this Chapter shall be continuously maintained according to the standards of this Chapter.
Section 2 Types of Parks

A. Countywide Parks and Preservation/Conservation Areas

1. Countywide Parks
   The PBC Parks and Recreation Department supplies a countywide system of public park and recreational facilities for which Level of Service (LOS) standards are established in the Recreation and Open Space Element of the Plan. For purposes of park concurrency, Regional, Beach, and District Park LOS are established and Park Impact Fees assessed on new residential development to maintain the countywide park systems LOS concurrent with growth. The CIE is updated annually to include projects needed to meet countywide Comprehensive Plan LOS that will be funded through the Parks and Recreational Department’s ongoing Capital Improvement Program. [Ord. 2006-004]

2. Countywide Park Impact Fees
   Park Impact Fees shall be assessed according to the provisions of Art. 13.B, County District, Regional, and Beach Parks Impact Fees, as amended, to meet Countywide LOS needs for public regional, beach, and district parks.

3. Reservations
   Where a planned countywide Beach, Regional, District park, or Preservation/Conservation area is shown in the Plan, and a proposed development application is located in whole or part within the planned Beach, Regional, District park, or Preservation/Conservation area, such area shall be reserved for a period not to exceed two years during which time PBC shall either acquire the land or release the reservation. The time period initiating the reservation shall commence with the filing of an application for Development Order.

B. Community and Neighborhood Park Recreation Standards

1. Required Recreational Areas
   All proposed residential development shall make adequate provisions for recreation areas to accommodate the neighborhood and community park level recreational needs of the residents of the development. The recreation areas shall consist of a developed parcel of land that includes recreational facilities of a type consistent with the needs of the residents. The recreation parcel shall be located so as to provide convenient and safe pedestrian access for the residents of the development. The recreation area shall be reserved by the developer for the perpetual use of the residents of the development. The owner of the land or a Property Owners’ Association and their successors in interest shall be responsible for the perpetual maintenance of the recreation area.

2. Calculation of Required Recreation
   The required recreation area shall be the equivalent of two and one-half acres of developed land per 1,000 people population, based on the 2010 Census average Person Per Household (PPH) rate of 2.39 people per unit. Development of recreational facilities shall be of a type suitable for general neighborhood or community park use. The dollar amount to be spent on recreational improvements per acre shall be no less than 75 percent of PBC’s average cost per acre for developing community and neighborhood park type facilities as calculated by the Parks and Recreation Department based on the current PBC cost per acre to develop Community or Neighborhood park facilities. The minimum dollar amount to be spent on recreation facilities shall be determined by the Parks and Recreation Department at the time of Final Site Plan submission. [Ord. 2016-042]
   a. WCRAO
   The required recreation area shall be the equivalent of one and one-quarter acres of developed land per 1,000 people population, based on 2.39 people per unit. [Ord. 2008-037]

3. Approval
   Prior to DRO certification, projects proceeding to the public hearing process shall indicate the character and location of the proposed recreation in the application for review and approval by the Parks and Recreation Department. For projects requiring Final Site Plan approval, the proposed location and configuration of the recreation area(s) and the recreational improvements shall be indicated on the plan for review and approval by the Parks and Recreation Department.

4. Reduction in Recreation Area Land Requirement
   The Parks and Recreation Department may allow reduction of the recreation land area requirement by not more than 25 percent when other open space tracts are platted and made available to residents for recreational purpose and the combined value of the recreation facilities to be constructed and the resulting reduced land area exceeds the total value of the recreation land area and facilities requirement of Art. 5.D.2.B.2, Calculation of Required Recreation, by a minimum of 25 percent. [Ord. 2006-004]
5. **Cash-Out Option**

At the option of the Parks and Recreation Department, the developer may, in lieu of or in combination with [Art. 5.D.2.B.2, Calculation of Required Recreation](#), contribute the dollar value of the total recreational area requirement of this Chapter including land and improvements of this Chapter for the entire development at the time the first plat is submitted for recording. Land value shall be based on PBC’s cost to acquire land for community or neighborhood parks at the time the first plat is submitted for recording, or on a PBC approved certified MSA appraisal of the average value of the land in the development at the time of first plat. All such funds collected shall be held in a non-lapsing Park and Recreation Trust Fund for the acquisition and improvement of community or neighborhood parks according to the provisions of [Art. 5.D.2.B.6, Park and Recreation Trust Fund](#).

a. **WCRAO**

At the option of the Parks and Recreation Department, with a positive recommendation from the WCRA, the developer may, in lieu of or in combination with [Art. 5.D.2.B.2, Calculation of Required Recreation](#), contribute the dollar value of the total recreational area requirement, or convey land of equal value within the WCRA targeted area to the County, as identified by the Parks and Recreation Department or the WCRA Plan, including land and improvements for the entire development, or a portion thereof, at the time the first plat is submitted for recording or issuance of the first residential or mixed use Building Permit. Land value shall be based on PBC’s cost to acquire land for community or neighborhood parks at the time the first plat is submitted for recording, issuance of the first residential or mixed use Building Permit or on a PBC approved certified MSA appraisal of the average value of the land in the development at the time of first plat or issuance of the first residential or mixed use Building Permit. All such funds collected shall be held in a non-lapsing Park and Recreation Trust Fund for the acquisition and improvement of the WCRA community or neighborhood parks according to the provisions of [Art. 5.D.2.B.6, Park and Recreation Trust Fund](#).

[Ord. 2008-037]

6. **Park and Recreation Trust Fund**

Monies deposited by a developer pursuant to this Chapter shall be expended within a reasonable period of time for the purpose of acquiring and/or developing land necessary to meet the need for neighborhood or community type recreational facilities created by the development in order to provide a system of parks which will be available to and sufficiently benefit the residents of the development. Monies deposited by a developer pursuant to this Chapter shall be expended to acquire and/or develop land for park purposes not farther than five miles from the perimeter of the development.

7. **Other**

The BCC shall establish an effective program for the acquisition of lands for the development of public parks in order to meet, within a reasonable period of time, the existing need for public parks. The annual budget and capital improvement program of PBC shall provide for appropriation of funds as may be necessary to carry out PBC’s program for the acquisition and/or development of land for public parks. The funds necessary to acquire lands to meet the existing need for PBC parks must be provided from a source of revenue other than from the amount deposited in the Trust Fund.

8. **Open Space Credit**

Where developed recreational facilities are provided within lands required or credited for other open space purposes pursuant to this Code, (i.e., buffer areas, natural preserves, utility easements, R-O-W, drainage, or water management tracts), only credit for the cost of approved facilities may be applied towards the recreation area requirement of [Art. 5.D.2.B.2, Calculation of Required Recreation](#), and only if the facilities are reserved for the use of the residents of the development.
9. Property Development Regulations
Any parcel of land used to satisfy Parks and Recreation Standards shall meet the following requirements: [Ord. 2006-004] [Ord. 2020-001]

### Table 5.D.2.B – Property Development Regulations (1)

</tbody>
</table>

[Ord. 2020-001]

**Notes:**

1. The Parks and Recreation Department may reduce the minimum recreation parcel dimensions by not more than ten percent when considering location, abutting land uses, accessibility, recreation facilities to be offered, and the parcel’s function in the overall recreation and open space network of the development. [Ord. 2006-004]

2. Exclusive of above-ground easements and landscape buffers, underground easements are permitted in the recreation parcel with prior approval by the Director of the Parks and Recreation Department, and as long as the utility of the recreation parcel is not adversely impacted. [Ord. 2016-042] [Ord. 2020-001]

3. Projects providing recreation sites with less than 7,500 square feet in size may not include the parking within the minimum size for a recreation parcel. [Ord. 2020-001]

4. CLFs may be exempt from the minimum parcel size and minimum dimensions, with prior approval by the Director of the Parks and Recreation Department.

5. CLF recreational requirements may be satisfied using a combination of interior and exterior recreation areas, with prior approval by the Director of the Parks and Recreation Department. [Ord. 2016-042]

6. Projects with four or fewer dwelling units, may use Art. 5.D.2.B.5, Cash-Out Option for compliance with their minimum recreation site. [Ord. 2020-001]

### C. Passive Park
See Art. 4.B.3.C.8, Park, Passive.

### D. Public Park
See Art. 4.B.3.C.9, Park, Public.

### E. Infill Neighborhood Park
See Art. 4.B.3.C.7, Park, Neighborhood Infill.

### F. Phasing
Any development required to provide recreation shall follow one of the following phasing plans:

1. **Single Phasing**
   When the development is to be constructed in a single phase, or where each phase will provide recreational facilities specifically for the residents of that phase, then the recreational site(s) for that phase shall be site planned, or platted, concurrent with that phase of construction. No more than 40 percent of the Building Permits for residential units shall be issued for the phase until the recreational improvements have been completed in their entirety and open for use and accessible to the residents, or unless a phasing plan for completion of the required recreation area is agreed to and approved by the Parks and Recreation Department. [Ord. 2006-004]

2. **Multiple Phasing**
   When the development is to be constructed in multiple phases or plats and one or more required recreational site(s) is/are intended to serve the residents of two or more phases of the development, then the following sequence shall be adhered to:
   a. The recreation site(s) shall be site planned concurrent with the site plan for the first phase of residential development for which the recreational site will serve.
   b. The recreation site(s) shall be platted concurrent with the plat for the residential development phase they will serve. No more than 40 percent of the Building Permits for residential units shall be issued for any phase until the recreational improvements have been completed in their entirety and open for use and accessible to the residents, or unless a phasing plan for completion of the required recreation area is agreed to and approved by the Parks and Recreation Department. [Ord. 2006-004] [Ord. 2016-042]

3. **Multifamily and Congregate Living Facilities**
   No more than 20 percent of the Certificates of Occupancy for the residential units shall be issued for the phase until the recreational improvements have been completed in their entirety and open for use and accessible to the residents, or unless a phasing plan for completion of the required recreation area is agreed to and approved by the Parks and Recreation Department. [Ord. 2016-042]
G. Public Park Landscape Standards
This Section recognizes that public parks require flexibility in landscape design to address unique natural
and man-made resources that serve the public. Public park landscape standards are applicable in all
development Tiers and promote open views and vistas into natural landscapes, lakes, greenways,
blueways, and open spaces for appreciation and benefit of the public. Deviations for publicly-owned and
operated public parks from the landscaping requirements of Art. 7, Landscaping, are as follows: [Ord. 2006-
004] [Ord. 2008-003] [Ord. 2011-001]
1. General Standards
   a. Minimum Tree Quantities
      A minimum of one tree is required per 1,200 square feet overall area, excluding lakes, natural
      areas, and recreation areas. [Ord. 2006-004] [Ord. 2008-003]
   b. Minimum Shrub Quantities
      A minimum of one shrub is required per 1,250 square feet of impervious area, excluding lakes and
      wetlands. [Ord. 2006-004] [Ord. 2008-003]
   c. Interior and Perimeter Buffer Trees
      A minimum of 75 percent of required trees shall be Canopy trees. Palms or pines may be counted
      as one Canopy tree, not to exceed 25 percent of the total number of required trees. [Ord. 2006-
      004]
   d. Foundation Planting
      1) Exemption
         Open-air pavilions, bathrooms, scoreboxes, mechanical vaults, and similar park structures less
         than 2,000 square feet are exempt from foundation planting requirements. [Ord. 2006-004]
      2) Dimensions
         Foundation planting shall be provided along a minimum of 50 percent of front and side façades,
         and the rear façade if oriented towards any public use area. Width shall be a minimum of five
         feet along front and rear façades, where required, and eight feet along side façades. [Ord.
         2006-004]
2. Perimeter Buffer Landscape Requirements
   a. R-O-W Buffers
      1) Applicability
         R-O-W Buffers pursuant to Art. 7, Landscaping for public parks, open space, and golf courses,
         shall be exempt from the planting requirements of Table 7.C.2.A, R-O-W Buffer Landscape
         Requirements. Required R-O-W Buffer trees may be planted in a natural pattern within and
         adjacent to the designated landscape buffer. [Ord. 2006-004] [Ord. 2008-037]
      2) Required Plantings
         Where parking lots, maintenance buildings, and/or loading areas are located immediately
         adjacent to R-O-W Buffers, the standards in Art. 5.D.2.G.a.1), Applicability, shall not apply.
         Where shrub and hedge plantings are required, the minimum number of layers of shrubs
         indicated in Table 7.C.2.A, R-O-W Buffer Landscape Requirements may be reduced to two in
         all Tiers. [Ord. 2008-037]
   b. Compatibility Buffer
      Compatibility Buffers shall be a minimum of five feet in width. Public park uses adjacent to other
      public park open space and civic uses or pods shall be exempt from Compatibility Buffer
      requirements. Required Compatibility Buffers shall be exempt from the shrub planting requirements
      of Table 7.C.2.B, Compatibility Buffer Landscape Requirements. Required trees may be planted in
      a natural pattern within or adjacent to the designated landscape buffer. [Ord. 2006-004] [Ord.
      2008-037]
   c. Incompatibility Buffer
      Incompatibility Buffers shall be a minimum of 15 feet in width. The minimum number of layers of
      shrubs indicated in Table 7.C.2.C, Incompatibility Buffer Landscape Requirements may be reduced
      to two in all Tiers. [Ord. 2006-004] [Ord. 2008-037]
   d. Pathways in Buffers
      Pedestrian pathways, exercise trails, and other related recreational trails may be allowed to
      meander in required R-O-W and Compatibility Buffers. [Ord. 2006-004]
   e. Berms
      Berms shall be permitted in any perimeter buffer in all Tiers. [Ord. 2006-004]
   f. Fences and Walls
      Walls and fences may be located along the property line, and may be exempt from the tree, shrub,
fences are permitted in any perimeter buffer in any Tier, and may be exempt from the requirements of Art. 7.D.4.C.1, Chain Link Fences. [Ord. 2006-004]

g. WCRAO
Landscape buffers shall not be required if the proposed park and recreation areas are internally integrated within the development. [Ord. 2008-037]

3. On-Site Parking Requirements
   a. Landscape Islands
      One landscape island a minimum of ten feet in width shall be required per ten spaces, in all Tiers (maximum 100 feet apart), excluding spaces that are designated for vehicles with trailers. [Ord. 2006-004] [Ord. 2018-002] [Ord. 2018-018]
CHAPTER E PERFORMANCE STANDARDS

Section 1 Major Intersection Criteria

As specified in this Code, certain specific uses shall be located at major intersections or internal to a PDD that is located at a major intersection. For the purpose of this Chapter, to be considered a major intersection each roadway at the intersection, shall meet at least one of the following standards:

A. Four Lanes
   The roadway currently exists at four lanes or more, link to link, and is shown on the Thoroughfare R-O-W Protection Map. Dedication of R-O-W or construction of additional lanes solely in front of a property shall not satisfy this standard;

B. Five-Year Road Plan
   The roadway appears in the Five-Year Road Plan to be constructed as a major Arterial of at least four lanes;

C. Traffic Volume
   The current average traffic volume on the roadway is greater than 10,000 trips per day as shown on the Peak Season Traffic Volume Table published by the Palm Beach County Traffic Division; [Ord. 2009-040]

D. R-O-W
   The roadway is shown on the Thoroughfare Plan as 120-foot R-O-W or greater; or,

E. Upgrade Agreement
   The Applicant agrees to improve the roadway system to meet the standards in this Chapter as a Condition of Approval.

Section 2 Location Criteria

A. Purpose and Intent
   To mitigate the adverse impacts created by excessive concentrations of specific uses at intersections and along roadways that adversely impact traffic flow, pedestrian circulation and visual impacts related to site layout. [Ord. 2006-004]

B. Intersection Criteria
   Applicable uses shall be limited within 1,000 feet of any intersection, measured from the intersection of the centerlines of each street to the nearest exterior wall or outdoor dining area of the use. [Ord. 2006-004]

C. Separation Criteria
   Any use within 1,000 feet of an intersection pursuant to the location criteria above shall be exempt from this requirement. A use shall meet the following separation criteria of any other same and existing or approved use, measured by drawing a straight line between the nearest point of the exterior wall or outdoor dining area of the proposed use to the same for an existing or approved use: [Ord. 2006-004]
   1. 1,000-feet; or
   2. 500-feet.

D. Existing Uses
   The locational and separation criteria in this Section shall have no effect on any existing uses that are conforming uses as of the effective date of this Code. Where applicable, any DOA to an existing use shall comply with Art. 4.B.2.C.33.f.3), Exceptions, to the greatest extent feasible. [Ord. 2006-004]

Section 3 Drainage

For all development in all districts, drainage shall be designed and constructed in accordance with the drainage and storm water management standards of Art. 11, Subdivision, Platting, and Required Improvements, except that the requirements for legal positive outfall, pursuant to Art. 11.E.1.A.3, Stormwater Management System, shall not apply to:

A. Development That Meets Both of the Following Criteria
   1. The primary use is a parking lot, open storage, open sided structure with no utilities, or similar use as determined by the County Engineer.
   2. The property is not located adjacent or contiguous to a drainage facility which provides access to a point of legal positive outfall

B. Industrial Designations
   Individual lots designated as Industrial on the FLUA which have a zoning designation of IL, IG, MUPD, PIPD, or SWPD are limited to industrial uses, are located 300 hundred feet or more away from connecting to legal positive outfall, and which provide either:
1. Adequate on-site lake area to store the 100-year, three-day rainfall event within the limits of the lake; or
2. Store a 100-year, three-day rainfall event on this site in a combination of lake and surface storage conditioned upon providing a hydrological study showing that inundation of the parking lot areas and driveways does not persist for more than 72 hours following cessation of the 100-year, three-day rainfall event.

C. Security Trailers or Caretaker Quarters Allowed In Conjunction with an Exempted Use
Any parcel meeting the above listed exemptions from the provisions of legal positive outfall shall connect to a central sewer system and shall not utilize a septic tank system.

D. Lands with Paola or St. Lucie Soil Types
Projects that are planned on lands located approximately along the I-95 corridor that consist of Paola or St. Lucie soil types which are excessively drained and have a depth to water table in excess of eight feet, as measured from the average natural elevation of the property. In lieu of providing legal positive outfall for projects meeting the above criteria, projects shall be developed utilizing a water management system that contains the 100-year three-day storm event entirely within a designated retention area, after accounting for soil storage. Calculations showing total on-site retention shall be provided utilizing the rainfall distribution as detailed in SFWMD's Vol. IV Manual, latest edition. [Ord. 2005-002]

Section 4 Nuisances

A. General
1. Purpose and Intent
   The purpose and intent of this Chapter is to regulate possible nuisances, such as excessive noise, vibration, odors, and outdoor lighting which could interfere with the peaceful enjoyment of land.
2. Applicability
   This Chapter shall apply to all land in the unincorporated area of PBC, unless exempt pursuant to Art. 5.E.1.E, Upgrade Agreement.
3. Conflicts
   Any conflict between this Chapter and any other provision in this Code or any other Ordinance adopted by the BCC, or provision, regulation, standard, or law adopted by Statute, the more stringent shall apply.
4. Definitions
5. Exemptions
   The following are exempt from this Chapter:
   a. Transportation
      Sound generated from motor vehicles legally operating on any public R-O-W regulated by F.S. ch. 316 (Uniform Traffic Control Law). Sound generated by interstate rail carriers operating on any railroad R-O-W. Sound generated by an airport, including all airport related operations. All other uses of land preempted by applicable State of Florida or Federal laws or regulations.
   b. Sanctioned Activities
      Sound generated by a government sanctioned activity conducted on public land or in a public R-O-W (e.g., parades).
   c. Crowd Noise
      Non-amplified sound generated by a crowd noises at sporting events.
   d. Research and Technology Overlay (RTO)
      Sound generated from a source located within the RTO.
   e. Farm Operation
      Bona Fide Agriculture operations conforming to generally accepted agricultural and best management practices.
   f. AGR District
      Noise, vibration, smoke, emissions, particulate matter, and odors by farm operations conforming to generally accepted agricultural and management practices in the AGR district. [Ord. 2005-041]
   g. Temporary, Portable Power Generators
      Sound generated by temporary, portable power generators used only during periods of electrical power outages in utility distribution systems maintained by the utility service provider. [Ord. 2005-041]
B. Noise Limitations and Prohibitions
In addition to the maximum sound levels set forth in Table 5.E.4.B, Maximum Sound Levels, the following activities shall be limited or prohibited as follows:

1. Prohibitions
   a. Horns
      Sounding a horn or other audible signal device, except as required by law or as a warning of imminent danger. The sounding of any device for an unnecessary reason or unreasonable period of time is prohibited.
   b. Parks
      Operating or playing any radio, television, phonograph, musical instrument, or similar device on public land or in a public R-O-W at a distance of 100 feet from the source which generates excessive noise.
   c. Amplified Sound
      Operating, playing, or using any loud speaker, loud speaker system, sound amplifier, radio, television, phonograph, musical instrument, or similar device which generates excessive noise at the property line of inhabited residential land. This provision shall not apply to special events but shall apply to lounges, restaurants, or nightclubs.
   d. Advertising
      Operating, playing, or using any device which generates excessive noise at the property line that is cast or emitted upon the public streets and sidewalks for the purpose of commercial advertising or for attracting the attention of the public.
   e. Machinery and Construction Work
      The operation of any machinery, demolition equipment, construction equipment, excavating equipment, power tool, equipment of semi-mechanical device, or undertaking construction work which generates excessive noise at the property line of inhabited residential land between the hours of 10:00 p.m. and 7:00 a.m. Construction work other than minor repairs by a homeowner and work permitted to an owner builder shall be prohibited on Sunday. This restriction shall not prohibit the use of pumps or machinery which, because of their nature and purpose, are required to be in operation 24 hours a day.
   f. Lawn Equipment
      The operation of lawn or garden maintenance equipment or machinery which generates Excessive Noise at the property line of inhabited residential land between the hours of 10:00 p.m. and 7:00 a.m.

2. Maximum Sound Levels
   a. No person shall operate or cause to be operated any source of sound from any location in such a manner as to create a sound level which exceeds the limits set forth below in Table 5.E.4.B, Maximum Sound Levels, for more than ten percent of any measurement period, which period shall not be less than ten minutes. Sound level measurement compliance shall be determined with a Type 2 or equivalent sound level meter using the A-weighting scale in accordance with the standards of the American National Standards Institute (ANSI). All measurements shall be made with a sound meter at or within the boundary of the complaining landowner within the property lines of the receiving land.

[Ord. 2006-004]
3. **Public Nuisance**
   a. **Injunctive Relief**
      Any emission of noise the generation of sound from any source in excess of the limitations established in, or pursuant to, this Chapter shall be deemed and is hereby declared to be a public nuisance. Upon receipt of written complaint of violation of this Chapter, the Code Enforcement Officer may investigate and request the County Attorney to file injunctive proceedings to abate the nuisance. Such proceedings shall be cumulative and in addition to the penalties provided herein.
   b. **Civil Action**
      The generation of sound from any source not limited by this Code shall be considered a civil issue and addressed accordingly by law.

C. **Vibration**
   1. **Non-Industrial Districts**
      In all districts, except with an Industrial (IND) FLU designation, no use shall operate so as to produce ground vibration noticeable by a person of reasonable sensitivity at the property line.

D. **Smoke, Emissions, and Particulate Matter**
   1. **General Requirements**
      No use or activity shall be operated except in full compliance with the standards controlling air pollution as provided in the laws of the State of Florida and the ordinances. [Ord. 2006-004]
   2. **Smoke**
      In all districts, unless otherwise covered by a specific visible emission limiting standard by a FDEP Rule or County Ordinance, every use shall be operated so as to prevent the emission of smoke from any source whatever, the density of which is equal to or greater than that designated as Number 1 on the Ringelmann Chart, or the opacity of which is equal to or greater than twenty percent. For the purpose of grading the density of smoke, the Ringelmann Chart, as published and used by the United States Bureau of Mines, or Method 9, as published in Chapter 62-296, F.A.C., is incorporated herein by reference. All measurements shall be at the point of emission. [Ord. 2006-004]
   3. **Dust and Particulate**
      Every use shall be operated to prevent the emission into the air of dust or other solid particulate matter which may cause danger to land and the health of persons or animals at or beyond the lot line of the premises on which the use is located, in accordance with Chapter 62-296, F.A.C. [Ord. 2006-004]
   4. **Objectionable Odors**
      No person shall cause, suffer, allow or commit the discharge of air pollutants which contribute to an objectionable odor in accordance with Rule 62-296.320(2), F.A.C. [Ord. 2006-004]
   5. **Toxic or Noxious Matter**
      No use shall for any period of time, discharge across the boundaries of a lot on which it is located, toxic or noxious matter in such concentrations as to be detrimental to or endanger the public health, safety, comfort, or general welfare, or cause injury or damage to persons, land, or the use of land, or render unclean the waters of the state to the extent of being harmful or inimical to the public health, or to animal or aquatic life, or to the use of such waters for domestic water supply, industrial purposes, recreation, or other legitimate and necessary uses. [Ord. 2006-004]

E. **Outdoor Lighting**
   1. **Purpose and Intent**
      It is the intent of this Section to preserve, protect, and enhance the lawful nighttime use and enjoyment of any and all property through the use of appropriate lighting practices and systems. Such individual fixtures, luminaries, and lighting systems are designed, constructed, and installed to: control glare and light trespass; minimize obtrusive light; eliminate the increase of lighting levels on competing sites; provide safe roadways for motorist, cyclists, and pedestrians; conserve energy and resources while maintaining safety, security, and productivity; and, curtail the degradation of the nighttime visual environment. [Ord. 2005-041]
   2. **Applicability**
      All outdoor lighting shall be subject to the requirements of Table 5.E.4.E, Illumination Levels, and Table 5.E.4.E, Maximum Permitted Luminaire Height, unless exempted or permitted to deviate as described herein. Lighting not specifically listed may be classified by the Executive Director of PZB pursuant to Art. 1.B, Interpretation of the Code. In addition to the standards in this Section, outdoor lighting shall be consistent with Art. 14, Environmental Standards. [Ord. 2005-041] [Ord. 2011-016] [Ord. 2019-034]
   a. **Conflict**
      In the case of a conflict between this Section and other provisions of this Code, or other applicable codes, the more strict regulation shall apply. [Ord. 2005-041]
b. **Non-Conforming Lighting**

All luminaries that do not comply with the standards of this Section shall be subject to the limitations on expansion, maintenance, relocation, damage repair, and renovations pursuant to [Art. 1.F, Nonconformities.][Ord. 2005-041]

c. **Exemptions**

The following shall be exempt to the extent listed below: [Ord. 2005-041] [Ord. 2019-034]

1) **Residential**

   Single Family, Townhouses, and Multifamily with a maximum of two units shall not be subject to the requirements of [Art. 5.E.4.E.3, Submittal Requirements] and [Art. 5.E.4.E.4, Standards].

   All permitted outdoor lighting shall be oriented and directed away from adjacent residential uses or adjacent streets that are internal or external to the subject property. [Ord. 2005-041] [Ord. 2019-034]

2) **Street Lights**

   Street lights in any public R-O-W that meet the requirements of the appropriate public utility. [Ord. 2005-041]

3) **Temporary Lighting**

   The temporary use of low-wattage or low-voltage lighting for public festivals, celebrations, and the observance of holidays are exempt from regulation except where they create a hazard or nuisance from glare. [Ord. 2005-041]

4) **Landscape and Accent Lighting**

   Landscape and accent lighting fixtures that comply with the Florida Building Code, Chapter 13 Section 13-415.1ABC.2.1 efficiency requirements shall be exempt. All exempt landscape and accent lighting fixtures must have a locking mechanism and a glare shield so that light is aimed, and remains aimed at the surface intended. [Ord. 2008-037]

5) **Public Park and Recreation Facilities**

   Government-owned or operated public parks and recreation facilities that are only open between dawn and dusk, shall not be subject to the requirements of this Section. [Ord. 2018-018]

6) **Temporary Uses pursuant to Art. 4.B.11.** [Ord. 2019-034]

d. **Prohibited Outdoor Lighting**

   The following types of outdoor lighting are prohibited in unincorporated PBC: [Ord. 2005-041]

1) Any light that creates glare observable within the normal range of vision onto a street or creates a safety hazard; [Ord. 2005-041]

2) Any light that resembles an authorized traffic sign, signal, or device, or that interferes with, misleads, or confuses vehicular traffic as determined by the Zoning Director or Traffic Director; [Ord. 2005-041]

3) Beacon or searchlights, except for temporary grand openings and special events, as limited by State or Federal law; [Ord. 2005-041]

4) Any drop lens fixture or fixture that does not meet the IESNA full cut-off classification of zero percent of lumens above 90 degrees from nadir. This includes, but is not limited to, parking lot fixtures, building façade fixtures, and other non-landscape lighting fixtures; and, [Ord. 2008-037]

5) **Animated Lighting**, unless authorized under [Art. 8, Signage.][Ord. 2005-041]

e. **Deviations**

   Lighting may vary from this Section to the extent necessary to comply with the following: [Ord. 2005-041]

1) [F.S. § 655.962], related to ATM lighting; [Ord. 2005-041]

2) [F.S. § 812.173], related to parking lots for convenience businesses; [Ord. 2005-041]

4) Airport lighting regulated by State or Federal law; [Ord. 2005-041]

5) Lighting for obstructions to air navigation as provided in U.S. Department of Transportation, Federal Aviation Administration Advisory Circular 70/7460-1L; [Ord. 2005-041]

6) Lights required on vehicles under state uniform traffic control statutes or for vessels under vessel safety statutes under F.S. ch. 316 and F.S. ch. 327; [Ord. 2005-041]

7) Lighting for public health required by F.S. ch. 381; [Ord. 2005-041]

8) Electrical code statute requirements under State building code; [Ord. 2005-041]

9) [F.S. § 553.963] and [F.S. § 553.904], Efficiency and Energy Conservation Statutes under Building Code Standards; [Ord. 2005-041]
10) Lighting for outdoor theaters under F.S. § 555.07; [Ord. 2005-041]
12) Other Federal, State, and local laws and regulations that may apply. [Ord. 2005-041]

3. Submittal Requirements
   a. Photometric Plan
      All Building Permit applications that include the use of external luminaries, or luminaries visible from the exterior of a structure shall include an outdoor lighting plan and an outdoor security lighting plan showing location, type, and height of all luminaries, and photometrics in foot-candle output of all proposed and existing luminaries on site. On-site lighting to be included in the calculations shall include, but is not limited to, lighting for parking lot, canopies, recessed lighting along the building, and/or overhang. Each plan shall include any calculations or modifications required to comply with items listed in Art. 5.E.4.E.2.e, Deviations. The photometric plans shall include the following: [Ord. 2005-041]
      1) A table showing the average, minimum, and maximum foot-candles, average to minimum ratio, and maximum to minimum ratio on the site, and maximum luminaire heights. Maximum photometric calculation grid shall not exceed ten feet. [Ord. 2005-041]
      2) Manufacturer's catalog cuts that provide a description of the luminaries, including wattage, lumen output, glare reduction/control devices, lamps, on-off cycle control devices, and mounting devices. [Ord. 2005-041]
      3) All photometric plans must be signed and sealed by a licensed engineer, architect, or landscape architect. [Ord. 2005-041] [Ord. 2008-037]
      4) A Certificate of Compliance signed and sealed by a licensed engineer, architect, or landscape architect, must be submitted prior to the issuance of a Certificate of Occupancy. [Ord. 2005-041] [Ord. 2008-037]
      5) The photometric plan shall not include time averaging or other alternative methods of measurement. A Light Loss Factor (LLF) shall be used for the calculations in a photometric plan. The values of the LLF shall be a maximum value of 0.72 for Metal Halide, 0.81 for High Pressure Sodium, and 0.95 for LED, based on manufacturers’ initial lamp lumens. [Ord. 2005-041] [Ord. 2008-037]

4. Standards
   a. Confinement
      All outdoor lighting shall utilize full cutoff luminaries per the Illuminating Engineering Society of North America (IESNA) definition of full cutoff which allows for zero percent of lumens above 90 degrees from nadir. No luminaries other than landscape lighting exempted per Art. 5.E.4.E.2.c.4), shall be directed upwards to avoid urban sky glow. In the U/S Tier, accent and landscape luminaries not exceeding 100 watts. [Ord. 2005-041] [Ord. 2008-037]
   b. Light Trespass
      The maximum illumination at the property line of an adjoining residential parcel or public R-O-W is 0.33 horizontal and vertical foot-candles measured at six feet above grade level. Said illumination likewise measured at the property line of an adjoining non-residential parcel, shall not exceed 3.0 horizontal and vertical foot-candles measured at six feet above grade level. [Ord. 2005-041]
   c. Security Lighting and Time Restrictions
      1) Full cutoff luminaires shall be used for all security lighting and dusk-to-dawn area lighting. [Ord. 2005-041]
      2) Outdoor illumination, including but not limited to, areas used for outdoor sales and display, eating, parking, assembly, service, storage of equipment and freight, loading and unloading, repair, maintenance, commercial activities, and industrial activities shall not continue after 11:00 p.m., or no more than one hour after active use of the area ceases, whichever is later, except for security lighting. [Ord. 2005-041]
      3) Security lighting shall be required for all active entrances to buildings, parking lots, and access to buildings or parking lots. All security lighting shall maintain an average of 0.75fc, a minimum of 0.3fc and a maximum of 3fc from dusk until dawn. [Ord. 2005-041] [Ord. 2008-037]
      4) No outdoor recreational facility shall be illuminated after 11:00 p.m. except to conclude a scheduled and sanctioned recreational or sporting event by PBC or other authorized agency in progress prior to 11:00 p.m. The luminaries shall be extinguished after outdoor recreational events are completed and the site has been vacated. [Ord. 2005-041]
a) Exceptions
Public recreational facilities such as boat ramps, fishing piers, or other similar facilities that operate or are open to the public on a 24-hour basis. [Ord. 2005-041]

5) Automatic timing devices with a photosensor or an astronomical timeclock, which control the hours of illumination shall be required for all parking lots, car dealerships/outdoor display lots, and parking garages. These devices may remain on Eastern Standard Time throughout the year. [Ord. 2005-041] [Ord. 2008-037]

d. Illumination Levels

Table 5.E.4.E, Illumination Levels, indicates the minimum and maximum illumination levels for specific site elements, as well as the maximum to minimum, and average to minimum ratios. [Ord. 2005-041]

Notes:
1. Measured in foot-candles.
2. Building or accessory mounted luminaries used to light parking lots shall comply with parking lot illumination levels.
3. May be increased to 20 foot-candles for the first row of display parking located adjacent, but not more than 100 feet from a R-O-W.
4. Applicable to outdoor recreation areas only, excluding areas such as parking lots, drive isles, pathways, building, and landscape lighting.
5. Fully shielded bollards not greater than 42 inches in height may be permitted up to 20 foot-candles.
e. Luminaire Heights

Table 5.E.4.E, Maximum Permitted Luminaire Height, identifies the maximum height for any freestanding or structure mounted luminaires.

Notes:
1. For the purposes of this Table, residential parcel shall include any residential use, or any vacant parcel with a residential FLU designation.
2. The height of any lighting luminaire within 100 feet of a parcel with a residential use or FLU designation shall be limited in accordance with the height limitations for Property Boundary, Residential.
3. Applicable to outdoor recreation areas only, excluding areas such as parking lots, drive isles, pathways, building, and landscape lighting.
4. Minimum setback shall be 45 feet from exterior edge of wall for all luminaries, except luminaries mounted to interior face of perimeter wall, which do not exceed the height of the perimeter wall.

f. Measurement

1) Illumination levels shall be measured in foot-candles with a direct-reading, calibrated, portable light meter. The light meter shall be placed not more than six inches above grade level. [Ord. 2005-041]

2) For the purpose of measuring light trespass, the light meter shall be placed at the property line of the subject parcel six feet above the grade level. [Ord. 2005-041]

Section 5 Hours of Operation

Hours of operation relate to the time during which the use is open to the public for business. For uses not open to the public, hours of operation shall be the time in which the use has employees working. [Ord. 2017-007]

A. Proximity to Residential

Any non-residential use shall be subject to the hours of operations indicated in Table 5.E.5.A, Hours of Operation, when located within 250 feet of a parcel of land with a residential FLU designation or use, unless stated otherwise. Mixed uses located in the following zoning districts shall not be considered residential uses for the purposes of hours of operation: Neighborhood General (NG), Neighborhood Commercial (NC) and Urban General (UG) Sub-areas of the WCRAO and UC, UI, MXPD, and TMD. [Ord. 2017-007] [Ord. 2017-025] [Ord. 2018-018]

</table>

**Notes:**
1. Stocking activities or deliveries for non-residential uses are subject to the hours listed above when located within 250 feet of a parcel of land with a residential use or FLU designation. [Ord. 2018-018]

### B. Measurement
Measurement shall be taken by drawing a straight line from the property line of the residential use or FLU designation to the closest point of the loading area, the exterior wall, structure, or bay housing the non-residential use. [Ord. 2009-040] [Ord. 2017-007] [Ord. 2018-018]

### C. Existing Uses
Uses existing prior to this amendment may comply with the requirements existing at the time the use was established, unless modified by a subsequent Development Order. [Ord. 2009-040] [Ord. 2017-007]

### D. Exemptions
Uses owned or operated by a governmental entity that provide essential services for the public, as determined by the Zoning Director, shall be exempt from these standards. [Ord. 2009-040] [Ord. 2017-007]

### E. Type 2 Waiver
Hours of Operation may be altered pursuant to Art. 2.B.7.D, Type 2 Waiver. [Ord. 2018-018]

### CHAPTER F LEGAL DOCUMENTS

Any legal documents requiring PBC approval shall be reviewed prior to submission by a licensed attorney. This shall include documents required by Code or as a condition of any land use approval. For the purposes of the provisions, “legal documents” shall include, but not be limited to, the following types of documents: restrictive covenants, easements, agreements, access agreements, removal agreements, unity of control, and unity of title. Any document that follows exactly the language of a PBC-approved form is exempt from this requirement.

### Section 1 Maintenance and Use Documents

#### A. Purpose and Intent
This Chapter is established to ensure that adequate ownership and maintenance measures will be provided in residential and other developments to protect and perpetually maintain all common areas or other required areas (including improvements located upon or within the common areas) required pursuant to this Code or other applicable PBC Ordinances or regulations. This Chapter is also established to ensure the continued availability and utility of the common areas for the residents or occupants of the development and to prevent such facilities or the need for such facilities from becoming an unnecessary burden or nuisance to the PBC or surrounding property. Nothing in this Chapter shall be construed as creating any obligation upon the PBC to maintain such common areas or their improvements or to otherwise ensure their availability and condition.

#### B. Applicability
This Chapter shall apply to all developments subject to review by the DRO as delineated elsewhere in this Code. Developments for which waivers of platting are administratively obtained shall also comply with the requirements of this Chapter. [Ord. 2010-022]

#### C. Exception
Generally, the maintenance and use documents requirement shall not apply to lands or improvements to be owned and maintained under a condominium or cooperative. The developer of any lands to be owned "and maintained under a condominium or cooperative shall establish and regulate those in accordance with the requirements set forth by the State of Florida. If the condominium or cooperative is located within a PUD, though, additional PBC document requirements may apply.
D. General Requirements
A developer shall submit documents establishing maintenance and use of the common areas of a proposed development and other required areas at the point in the development process set forth in Art. 11.D, Platting, or as required as a Condition of Approval by any decision making or administrative body of PBC. All documents shall be reviewed and approved by the County Attorney's office prior to recording in the public records. The recording of the documents and all associated fees shall be the responsibility of the developer. All documents shall be recorded as approved by the County Attorney's office, and copies of the recorded documents shall be submitted to the PBC when requested.

E. Documents Establishing Maintenance and Use
The type of document required to establish use rights and responsibility for maintenance of the common areas and private preserve areas of a development depends upon the nature of the development.

1. Developments Including a Subdivision of Five or More Lots
A POA shall be required. Developer shall submit a Declaration of Covenants and Restrictions, Articles of Incorporation, and By-Laws. If there are to be party walls within the development, the Declaration of Covenants and Restrictions shall include a Declaration of Party Wall. This requirement applies to both residential and non-residential developments.

2. Subdivisions of a Maximum of Four Lots
A POA may or may not be required depending upon the individual subdivision. The determination shall be made by the County Attorney's Office. If a POA is required, then the submittal requirement shall be as listed above. If a POA is not required, then the developer shall submit a Unity of Control. If there are to be party walls within the development, a Declaration of Party Wall shall be included in the submission.

3. Rental Projects
A Unity of Title shall be submitted for a development that will be owned and maintained by a landlord for the benefit of lessees residing on or occupying leaseholds on a Lot or Parcel.

F. Content Requirement for Documents
The following shall be the minimal content requirements for documents. Provisions which do not conflict with any PBC requirements may also be included.

1. Property Owners’ Association (POA) Documents
   a. Declaration of Covenants and Restrictions
      1) Legal Description
         a) For Master Property Owners’ Associations
            Where applicable, all property included within the Master Plan for a Development Order, regardless of how many phases, shall be subjected to the terms of the declaration at the time the first plat of the development is recorded. Property shall not be withdrawn from the terms of the declaration unless it is also withdrawn from the Master Plan. This shall also apply to any affected portion of an AGE Allocation Plan with a Development Order for a Rezoning, Conditional Use, or related Development Order Amendment subject to the requirements of the AGEO. [Ord. 2010-022] [Ord. 2017-007]
         b) For Sub-Associations
            All property included within a plat in which a sub-association is named in a dedication/reservation shall be subjected to the terms of the declaration for that sub-association at the time the plat is recorded.

      2) Definition
         There shall be a declaration in which, minimally, the following terms (or similar terms) are defined: association, common areas, member, properties, declarant/developer, unit/lot/parcel. The definition of association shall include the name of the POA responsible for maintaining the common areas of the development. The association named here must be the same association that accepts the dedications/reservations on any plat of the development. The association shall be a State of Florida corporation not for profit. The definition of common areas shall include the phrase "any area dedicated to or reserved for the association on any recorded plat or replat of the Properties." The definition of member shall reflect the requirement that all persons or entities holding title to any portion of the properties shall be voting members of the association. In the case of a master association, this may be accomplished either by direct membership by all owners or by the owners' sub-association membership with the sub-association(s) being the voting member(s) of the master association. The definition must specifically allow direct membership for any owner who is not a member of a represented sub-association.
         The definition of properties shall include all the property subject to the terms of the declaration including any added by amendment to the declaration. The definition of declarant/developer
shall include successors and assigns. The definition of unit/lot/parcel shall identify the division of property by which membership in the association is defined and shall be consistent with the terms used to define member in the declaration.

3) **Association Structure and Responsibilities**

There shall be provisions for the following:

a) All persons or entities owning any portion of the development shall automatically become members of the association;

b) All members of the association shall be entitled to vote on association matters;

c) The association shall have the authority to assess all members for association expenses including, but not limited to, the cost of maintaining the common areas;

d) All members of the association, except any governmental entity, which may own property in the development, shall be subject to assessments by the association. The developer shall either pay assessments or fund the deficit in the association's operating budget until he has turned over control of the association. After he has turned over control of the association, he shall pay assessments for any lot(s) he may still own;

e) The association shall have the authority to place a lien on a member's property for any unpaid assessment;

f) The developer may control the association while development is ongoing. He must, however, establish in the declaration a definite time by which he will turn over control of the association to the owners; and,

g) The declaration shall provide that the association shall be responsible for the maintenance of the common areas and private preserve areas. Maintenance responsibility may be delegated to a sub-association or to an individual lot owner (in the case of certain limited use areas), but the delegating association shall be responsible in the event the sub-association or the lot owner fails to maintain any portion of the common area or other required areas.

4) **Common Areas**

The common areas shall be defined to include any area dedicated to or reserved for the association on any recorded plat of the properties. The developer shall state at what point he will deed the common areas to the association.

5) **Easements**

The following easements shall be granted or confirmed if already established by recorded plat or grant of easement:

a) Ingress/egress easements for members, their guests, and licensees;

b) Utility easements for installation, maintenance, and repair by any utility company, including cable, servicing the development;

c) Drainage easements;

b) Maintenance easements for maintenance of the common areas. If the association will need access to an owner's property to fulfill its maintenance obligation, the easement should be granted here;

e) Encroachment easements for accidental encroachment onto the common area;

f) Common area easement for use by all members of the association and their guests;

g) Developer's easement to allow developer access as needed to complete construction of development;

h) Public service for police protection, fire protection, emergency services, postal service, and meter reading;

i) Zero Lot Line (ZLL) easement, if applicable. An easement with a minimum of two feet in width, and contiguous to the ZLL boundary shall be established for the purpose of incidental encroachment, access and maintenance; or, [Ord. 2013-001]

j) All easements, with the exception of the developer's easement, shall be perpetual.

6) **Architectural Control**

Any provisions included in the declaration regarding architectural control should be consistent with PBC regulations. It should be noted in the declaration that nothing in the declaration should be interpreted as an exemption from compliance with PBC regulations.

7) **General Provisions**

There shall be provisions for the following:

a) **Duration**

The declaration shall run with the land for a minimum of 20 years with provision for automatic renewal;
b) **Enforcement**
The association, the individual members, and the developer shall all have the ability to enforce the terms of the declaration;

c) **Amendment**
The method by which the declaration may be amended shall be established. If the developer is given a separate right for amending the declaration, his right shall not survive the turnover of control. No amendment that withdraws property from the terms of the declaration shall be recorded unless approved in writing by the County Attorney's office. No amendment inconsistent with the requirements of this Chapter shall be recorded unless approved in writing by the County Attorney's office. Nothing contained herein shall create an obligation on the part of the County Attorney's office to approve any amendment.

d) **Dissolution**
Any owner may petition the Circuit Court for the appointment of a receiver to manage the affairs of the association in the event of dissolution of the association.

b. **Articles of Incorporation**
1) All terms shall be consistent with the terms of the Declaration and By-Laws.
2) The POA shall be a State of Florida corporation not-for-profit with, minimally, the authority to maintain common areas or other required areas, assess members for operating costs, place liens on members' property for failure to pay assessments, and enter into agreements with governmental entities.

c. **By-Laws**
All terms shall be consistent with the terms of the declaration and articles of incorporation.

2. **Declaration of Party Wall**
A declaration of party wall shall be recorded whenever there are shared walls in a development. The declaration may be a part of a declaration of covenants and restrictions or it may be recorded as a separate instrument. It should address the following:
a. Repair of the wall is a joint obligation and expense unless damage is caused by the negligence of one party. In that case the cost of repair is the obligation of that party alone;
b. Repair or replacement of the wall shall be to its original construction;
c. Each party shall have the right to file a lien for the cost of repairs;
d. The mortgagee shall have the same rights as the mortgagor;
e. Structural changes in the wall are prohibited;
f. If there is a common roof, the same provisions shall apply;
g. If access and/or parking are to be shared, there should be an easement granted to accommodate that; and,
h. This shall be a covenant running with the land.

3. **Unity of Control**
A unity of control shall be recorded against a subdivision of a maximum of four lots if the County Attorney's Office has exempted the subdivision from the requirements for a POA. The unity of control shall contain the following:
a. Legal description of the property subject to the terms of the unity of control. This shall include all property included in the Master Plan for the development;
b. Creation of perpetual cross-access, parking, drainage, and utility easements for the benefit of all owners of the development;
c. Maintenance responsibilities for all common areas of the development and method by which maintenance costs shall be shared; and,
d. Establishment of these provisions as covenants running with the land.

4. **Unity of Title**
The owner of a rental project shall record against his property a unity of title. The unity of title, which shall be a covenant running with the land, shall provide that the property shall be considered one plot and parcel and that no portion of the property may be conveyed to another owner. The County Attorney's office, after consulting with the Zoning and Land Development Divisions, may agree to release the unity of title provided that covenants establishing maintenance and use are recorded in its place. The cost of recording the unity of title and/or a release shall be the responsibility of the owner.
Section 2  Easements

A. Easement Encroachments
   1. Minor Encroachments
      Minor encroachments of buildings and structures may be allowed within an easement in accordance
      with this Chapter.
   2. Major Encroachments
      Buildings or structures designed for human occupancy, screen enclosures, pools, or spas shall be
      prohibited within any easement. [Ord. 2010-005] [Ord. 2019-005]
   3. Incompatible Uses
      No construction shall be permitted within any easement where such construction is incompatible with
      the use for which the easement was established. If the terms of the easement, statute, law, ordinance,
      rule, regulation, or approval pursuant to which the easement was established prohibits or excludes the
      use, such use shall be considered incompatible. The burden shall be on the Applicant to demonstrate
      that the proposed construction is or will not become incompatible with the purpose for which the
      easement was established, or impair the rights of the easement holders and beneficiaries. The
determination of whether a use is incompatible with the purpose for which an easement was established
shall be made by the appropriate regulating agency(s) in accordance with this Chapter.

4. Application Process
   Buildings and structures, which are not prohibited pursuant to Art. 5.F.2.A.2, Major Encroachments,
   shall be subject to the following:
   a. If an application for a Building Permit includes construction in an easement, the application shall
      include consent from all easement holders and beneficiaries. The consent shall be specific to the
      proposed construction and in a form acceptable to PZB; and
   b. Prior to the issuance of the Building Permit, the Applicant shall record an executed removal and
      indemnification declaration. The removal and indemnification declaration shall inure to the benefit
      of the easement holders and beneficiaries.

5. All Other Approvals Required
   a. All other government permits, approvals, or consents necessary for the construction shall be
      obtained prior to commencement of the construction.
   b. Compliance with this Chapter shall not be construed to relieve the Applicant from obtaining any
      required approvals, if applicable, for encroaching into the affected easement.
   c. Nothing herein shall be construed as affecting any right to construct except to the limited and strict
      extent of any approval granted hereunder. An approval granted in accordance with this Chapter is
      for the limited purpose of complying with this Chapter only.

6. Accountability
   The Applicant is responsible for providing and representing true, accurate, and correct information.
   Except as specifically set forth herein, no PBC Official, employee, or agent shall have the duty of:
   a. searching the Official Records of the Clerk of the Circuit Court;
   b. conducting any other investigation to determine whether a permit application or request for PBC
      approval is inconsistent with the use for which an easement was established, whether an easement
      exists in the area within which a permit for construction/development is sought; or, [Ord. 2005-002]
   c. whether any other government or private approvals are required for construction or development
      for which the permit is sought. However, PZB, DEPW or any other department, official employee,
      or agent may undertake an investigation, search, or inquiry to determine the aforesaid. [Ord.
      2005-002]

7. Modifications
   a. If, upon inspection, the construction is found to be materially different than that which was approved
      by PBC, then the approval shall be of no force and effect and the construction shall be removed
      immediately, unless the modification is approved by the department having jurisdiction pursuant to
      this Chapter.

B. Drainage Easement Encroachments
   1. All construction in a drainage easement shall be subject to approval by the beneficiary of said
      easement. Further, the Land Development Division (LDD) shall approve all encroachments into
      easements which drain County roads. [Ord. 2010-005] [Ord. 2010-022]
   2. If a Building Permit is required, the Applicant shall obtain approval from the LDD or appropriate entity
      prior to submitting the Building Permit application to PZB. [Ord. 2010-005] [Ord. 2010-022]
   3. When approval is required from LDD, the Applicant shall submit a request to encroach a drainage
      easement in or on a form established by the LDD and include a copy of the recorded deed to the parcel
on which the easement is located; the document creating the easement; a certified sketch of survey of the easement; a sketch or plans showing the proposed construction in relation to the location of existing drainage improvements in the easement; and, such other documentation as the LDD reasonably deems appropriate [Ord. 2010-005] [Ord. 2010-022]

4. When encroachments are proposed in easements which drain County roads, the LDD may deny, approve, or approve with conditions the construction. [Ord. 2010-005] [Ord. 2010-022]

5. When approval is required from LDD, no approval shall be given before the LDD has received specific written consent from all easement holders, easement beneficiaries, and governmental entities or agencies having jurisdiction of the drainage easement. The LDD is hereby authorized to effect consent on behalf of PBC when PBC is the easement holder or beneficiary of a drainage easement. The LDD may require that consent be in or on a form established by the LDD. [Ord. 2010-005] [Ord. 2010-022]

6. For easements which drain County roads, the LDD shall also have executed in proper form, and shall cause to be recorded against the Applicant’s land involved, a removal and indemnification declaration (with the necessary consents) on a form approved by County Attorney’s Office. Said declaration shall provide that all direct and indirect costs related to removal shall be borne by the Property Owner, its heirs, successors, assignees, and grantees; that the aforesaid person(s) shall indemnify and hold PBC, its officers, employees, contractors, and agents harmless against any and all claims and liabilities of whatever nature (including personal injury and wrongful death) arising from any approval granted hereunder or the construction or installation approved hereunder. The removal declaration shall inure to the benefit of the easement holders and beneficiaries. It shall contain such other terms and covenants as the LDD or the County Attorney deems appropriate. Proof of the recording of the document shall be furnished to PZB with the application for a Building Permit. [Ord. 2010-005] [Ord. 2010-022]

7. Construction in or overlapping a drainage easement approved by the LDD shall comply with the provisions of Sections: 2.A.5, 2.A.6, and 2.A.7 of this Chapter. [Ord. 2010-005]

CHAPTER G DENSITY BONUS PROGRAMS

The WHP, AHP, or the TDR Programs are the required methods for increasing density above the maximum density permitted by a property’s FLUA designation within unincorporated PBC, unless a Site Specific FLUA Amendment is adopted pursuant to Art. 2.H, FLU Plan Amendments. [Ord. 2008-003] [Ord. 2010-005] [Ord. 2019-033]

Section 1 Workforce Housing Program (WHP)

A. General

1. Purpose and Intent

The WHP is intended to increase the supply of housing opportunities for persons employed in PBC in jobs that residents rely upon to make the community viable. The WHP implements Policies 1.1-o and 1.5-g of the Housing Element of the Comprehensive Plan, among others, by establishing an inclusionary WHP to provide Low, Moderate 1, Moderate 2, and Middle-Income housing. The program mandates the provision of workforce housing for all new developments in the Urban/Suburban Tier with a residential component of ten or more dwelling units; encourages the development of additional workforce housing through a density bonus and other incentives; encourages the equitable geographic distribution of workforce housing units; and, ensures a minimum affordability period. The WHP is implemented by the Planning Division of the Planning, Zoning and Building Department, and the Department of Housing and Economic Sustainability. [Ord. 2019-033]

2. Applicability

a. Conflicts

In cases of conflict between this Chapter and other Articles of this Code, the provisions of this Chapter shall apply. In cases of conflict between this Chapter and Conditions of Approval imposed by the Board of County Commissioners, the more restrictive shall apply. [Ord. 2019-033]

b. Thresholds

The WHP shall apply to all new developments with a residential component of ten or more dwelling units. [Ord. 2019-033]

c. Prior Approvals

For existing projects proposing ten or more additional dwelling units, the program shall apply to those units being added. [Ord. 2019-033]
d. Location
   1) Urban/Suburban Tier
      The WHP applies for all new developments with a residential component in the Urban/Suburban Tier, except as follows: [Ord. 2019-033]
      a) URA Priority Redevelopment Areas
         The WHP obligation for developments with a UC or UI FLU shall be met through the provision of a minimum of 15 percent of all new units, pursuant to Policy 1.2.2.-b of the Future Land Use Element of the Comprehensive Plan. The Limited Incentive Option shall not be available to these developments, nor any incentives offered through the WHP. All other applicable provisions of the WHP shall apply. [Ord. 2019-033]
      b) WCRA
         Developments in the WCRA shall be subject to the WHP for standard and maximum densities, and subject to the affordable and workforce provisions of the WCRAO for density obtained from the WCRAO Density Pool. All restricted units resulting from the WHP and WCRA shall be identified in the Restrictive Covenant, including timeframes and income categories. [Ord. 2019-033]

   2) Other Tiers
      The WHP may be required by the Board of County Commissioners in developments in other Tiers through Conditions of Approval. [Ord. 2019-033]

e. Exemptions
   1) Developments utilizing the AHP. [Ord. 2019-033]

f. Developments with Both WHP and AHP
   If a development includes both WHP and AHP units, the Planning Director or designee shall make a determination as to which program shall be followed, considering the affordable housing programmatic requirements of the governmental or other agency providing affordable housing funding. [Ord. 2019-033]

3. Program Standards
   a. Definitions
      1) Subject Development
         For the purposes of the WHP, the subject development is the boundaries of the overall project generating the WHP obligation, regardless of whether the required WHP units will be provided on that site. [Ord. 2019-033]
      2) Developer
         The developer of the subject development. [Ord. 2019-033]
      3) Exchange Builder
         The builder of the Exchange Project. [Ord. 2019-033]
      4) Exchange Project
         The development where the WHP units will be delivered through the Off-Site Construction/Exchange Builder Option. [Ord. 2019-033]

   b. Income Categories
      There are four targeted income categories in the WHP. Income categories are derived from the Median Family Income (MFI), also known as the Area Media Income (AMI), published annually for Palm Beach County by the U.S. Department of Housing and Urban Development as follows: [Ord. 2019-033]
      1) Low-Income (> 60 to 80 percent MFI); [Ord. 2019-033]
      2) Moderate 1 Income (> 80 to 100 percent of MFI); [Ord. 2019-033]
      3) Moderate 2 Income (> 100 to 120 percent of MFI); and, [Ord. 2019-033]
      4) Middle-Income (> 120 to 140 percent of MFI). [Ord. 2019-033]

   c. Pricing
      The Planning Director or designee shall annually set and publish WHP sale and rent prices for all income categories. [Ord. 2019-033]
      1) For-sale WHP units shall target the Low, Moderate 1, and Moderate 2 categories. The sale prices shall be derived as follows: Median Family Income for Palm Beach County (West Palm Beach/Boca Raton Metropolitan Statistical Area) published annually by the U.S. Department of Housing and Urban Development, multiplied by three, and adjusted to the midpoint of each of the income categories: Low (70 percent), Moderate 1 (90 percent), and Moderate 2 (110 percent). [Ord. 2019-033]
2) Rental WHP units shall target all four WHP income categories. Rent ranges shall be based on the monthly rent ranges published annually by Palm Beach County based on the Florida Housing Finance Corporation Multi-Family Rental Programs, by number of bedrooms, for the following income ranges: > 60 to 70 percent; > 70 to 80 percent; > 80 to 90 percent; > 90 to 100 percent; > 100 to 110 percent; > 110 to 120 percent; > 120 percent to 130 percent; and, > 130 to 140 percent of MFI. [Ord. 2019-033]

3) For the purposes of annual price updates, the WHP prices initially established for the for-sale unit’s income category at the time of approval of the subject development shall be the sales floor throughout the affordability period. No WHP unit is required to be sold at a price below the sales floor, though a seller may opt to do so. The WHP price initially established for the rental unit’s income category at the time of approval of the subject development shall be the rental floor throughout the affordability period. No WHP unit is required to be rented at a price below the rental floor, though an owner may opt to do so. [Ord. 2019-033]

d. Assignment of the Required WHP Units
WHP required units are intended to be distributed equally among all required income categories pursuant to Art. 5.G.1.B, Program Options or Conditions of Approval. When assigning units to income categories, units shall be assigned first to the highest income category, proceeding downward to low income. This does not prohibit a developer from providing higher numbers of lower-income units. [Ord. 2019-033]

e. Calculations
Calculations of the WHP density bonus and WHP obligation shall be performed using two decimal places, and standard rounding applied at the end. [Ord. 2019-033]

f. Unencumbered Units
Unless otherwise indicated, units used to meet a WHP obligation shall not be units, which are income restricted as a result of funding or other requirements of any other program. WHP units shall not be subject to restrictions beyond WHP income qualifications. [Ord. 2019-033]

g. Affordability Periods
1) For-Sale Units
All for-sale WHP units shall be income restricted for a period of fifteen years (recurring), from the date of the Certificate of Occupancy (CO) for each unit. In the event a unit is resold before the fifteen-year period concludes, a new fifteen-year period shall take effect on the date of resale. [Ord. 2019-033]

2) Rental Units
All rental WHP units shall be income restricted for a period of thirty years (non-recurring), from the date of occupancy of the first WHP unit. [Ord. 2019-033]

h. Design Standards
1) Compatible Design and Unit Features
a) The exteriors of WHP units shall be designed compatible with market rate units in the development. [Ord. 2019-033]

b) One of more of the following shall be provided: [Ord. 2019-033]
   (1) a representative WHP model at the WHP site; [Ord. 2019-033]
   (2) a representative WHP model at a different location in Palm Beach County; or, [Ord. 2019-033]
   (3) a market rate model with information delineating the differences between the market rate model and the WHP units. [Ord. 2019-033]

c) At minimum, all for-sale WHP units shall include a refrigerator, range, built-in microwave, dishwasher, washer, and dryer. [Ord. 2019-033]

2) Number of Bedrooms
a) For-Sale WHP Units
   (1) All for-sale WHP units shall have a minimum of two bedrooms, and 25 percent of the for-sale WHP units shall have a minimum of three bedrooms. [Ord. 2019-033]
   (2) All for-sale WHP units shall have a minimum bedroom size of 100 square feet. [Ord. 2019-033]

b) Rental WHP Units
   (1) No minimum number or size of bedrooms applies to rental WHP units. [Ord. 2019-033]
B. Program Options
The WHP offers the choice of either a “limited” or a “full” program option, which determines the amount of required workforce housing and the availability of other incentives. [Ord. 2019-033]

1. Limited Incentive Option
   a. Intent
      The Limited Incentive Option minimizes the WHP obligation, and allows only a limited density bonus as an incentive. [Ord. 2019-033]
   b. Incentives Available
      The only incentive available through the Limited Incentive Option shall be a density bonus; the density bonus shall not exceed 50 percent of the permitted density. [Ord. 2019-033]
   c. Amount of WHP Required
      The required percentage of WHP units shall be two and one-half percent of standard density; eight percent of maximum density; and, 17 percent of any WHP density bonus. The WHP obligation may be further modified by the disposition option selected, per Art. 5.G.1.C.4, Methods Available. The number of WHP units required shall be identified by the Planning Director or designee in a WHP Letter of Determination. [Ord. 2019-033]
   d. Pricing of Workforce Housing Units
      50 percent of the required WHP units shall be provided in the Low-Income category and 50 percent of the required WHP units shall be provided in the Moderate 1 Income category. [Ord. 2019-033]
   e. WHP Letter of Determination for Limited Incentive Developments
      Developments opting for the Limited Incentive Option are eligible for a density bonus of 50 percent of the permitted density. No additional incentives are available for the developments using the Limited Incentive Option. For the purposes of this Subsection, permitted density shall be the number of units allowed by the standard and maximum density pursuant to the Comprehensive Plan; TDR units or any other density bonus shall not be included as part of the permitted density for purposes of calculating the WHP density bonus. [Ord. 2019-033]

Upon request, the Planning Director or designee shall provide a WHP Determination Letter identifying the density bonus requested, and the total number of WHP units required. This WHP Determination Letter is to be submitted by the developer with the Zoning or Building Permit application. [Ord. 2019-033]

2. Full Incentive Option
   a. Intent
      The Full Incentive Option offers several incentives, including a density bonus, and requires an increased amount of workforce housing. [Ord. 2019-033]
   b. Incentives Available
      A development selecting the Full Incentive Option shall have available all applicable WHP incentives provided in this Section below, including a density bonus of up to 100 percent of the permitted density, pursuant to the Density Bonus process in Art. 5.G.1.B.2.e, Density Bonus Determination for Full Incentive Developments. [Ord. 2019-033]
   c. Amount of WHP Required
      For for-sale WHP units, the required percentage of WHP units shall be four and three-eighths percent of standard density; 14 percent of maximum density; and, 29.75 percent of any WHP density bonus used. For rental WHP units or in-lieu fee purposes, the required percentage of WHP units shall be five percent of standard density, 16 percent of maximum density, and 34 percent of any WHP density bonus used. The WHP obligation may be further modified by the disposition option selected, per Art. 5.G.1.C.4, Methods Available. The number of WHP units required shall be identified by the Planning Director or designee in a WHP Letter of Determination, pursuant to the Density Bonus process in Art. 5.G.1.B.2.e, Density Bonus Determination for Full Incentive Developments below. [Ord. 2019-033]
   d. Pricing of Workforce Housing Units
      Units shall be priced in all applicable income categories, pursuant to Art. 5.G.1.A.3.c, Pricing. [Ord. 2019-033]
   e. Density Bonus Determination for Full Incentive Developments
      Developments opting for the Full Incentive Option are eligible for a density bonus of up to 100 percent of permitted density. For the purposes of this Subsection, permitted density shall be the number of units allowed by the standard and maximum density pursuant to the Comprehensive Plan; TDR units or any other density bonus shall not be included as part of the permitted density for purposes of calculating the WHP density bonus. [Ord. 2019-033]
1) Full Incentive Developments Requesting a WHP Density Bonus up to and including 50 Percent
For Full Incentive Developments requesting a WHP density bonus of up to and including 50 percent, upon request the Planning Director or designee shall provide a WHP Determination Letter identifying the density bonus requested, and the total number of WHP units required. This WHP Determination Letter is to be submitted by the developer with the Zoning or Building Permit application. [Ord. 2019-033]

2) Full Incentive Developments Requesting a WHP Density Bonus Greater Than 50 Percent
For developments requesting a WHP density bonus of greater than 50 percent, the Planning Director or designee shall review the request pursuant to the following process: [Ord. 2019-033]
   a) Density Bonus Pre-Application Appointment
   Requests received for density bonuses greater than 50 percent shall be scheduled for the next available Pre-Application Appointment, which shall be conducted regularly by the Planning Division, according to a schedule published by the PZB Department. The developer shall be required to participate in the Pre-Application Appointment for the proposed development, to discuss the proposed development and unit types, characteristics of the site and surrounding area, and other relevant factors. [Ord. 2019-033]
   b) Factors for Consideration
   Staff shall consider the following factors in developing a maximum density and density bonus recommendation. [Ord. 2019-033]
      (1) The extent of which the proposed WHP units further County objectives: [Ord. 2019-033]
         (a) The intent to provide the workforce housing units on site; [Ord. 2019-033]
         (b) The intent to provide Single Family and for-sale workforce housing units; [Ord. 2019-033]
         (c) The proximity of the location where the WHP units are to be provided to employment centers; and, [Ord. 2019-033]
         (d) The concentration of households with incomes in the WHP income categories, in the location where the WHP units are to be provided. [Ord. 2019-033]
      (2) The potential impact of the proposed density bonus: [Ord. 2019-033]
         (a) The total number of units proposed, including any Transfer of Development Rights; and [Ord. 2019-033]
         (b) The compatibility with the character of the adjacent and surrounding area in the location of the subject development. [Ord. 2019-033]
   c) Density Bonus Recommendation
   Within ten days following the Pre-Application Appointment, the Planning Director or designee shall provide a written WHP Letter of Determination identifying the recommended maximum density bonus and the total number of WHP units required, subject to further limitations due to property development regulations and other factors in the development review process. The Planning Director or designee shall provide the WHP Letter of Determination to the developer, DRO, ZC, or BCC, whichever is appropriate and may include recommended Conditions of Approval for the resulting Development Order. [Ord. 2019-033]

f. Incentives Available under Full Incentive Option
1) Traffic Performance Standards Mitigation
   a) WHP Special Methodologies
   TPS mitigation shall be permitted for developments where the required WHP units are being provided in accordance with Policy 1.2-d(4) of the Transportation Element of the Comprehensive Plan. [Ord. 2019-033]
   b) WHP Traffic Concurrency Hall Pass
   TPS mitigation shall also include the option of applying for a WHP Traffic Concurrency Hall Pass separate from a Development Order application. The WHP Traffic Concurrency Hall Pass serves as a provisional traffic concurrency approval for a period of not more than 90 days, during which it must be merged into an application submitted for a Concurrency Reservation approval. The WHP Traffic Concurrency Hall Pass is described further in Art. 2.F., Concurrency (Adequate Public Facility Standards). [Ord. 2019-033]
2) Expedited Review
The following expedited review processes may apply to a development where the required WHP units are being provided: [Ord. 2019-033]
   a) Design Review
   Review of Multifamily or Townhouse structures by the Building Division and Fire-Rescue shall be allowed concurrent with Final DRO review, prior to permit application. [Ord. 2019-033]
   b) Platting
   (1) If only a boundary plat is required for an existing single lot, Building Permits may be issued after submittal of the Final Plat for recordation. [Ord. 2019-033]
   (2) If a subdivision plat is required, permits will be concurrently reviewed, but only issued at recording of the plat. [Ord. 2019-033]
   (3) Pursuant to Art. 3.E.1.H.1, Standards permits may be issued for sales offices, sales models, gatehouses, entry features, and utilities may be issued prior to the recording of the Final Plat. [Ord. 2019-033]

3) Flexibility in Property Development Regulations
   a) Purpose and Intent
   To provide flexibility from property development and other related regulations in order to provide greater opportunity for cost effective development of WHP units. These provisions are not intended to supersede deviations that are normally addressed through the variance process. These options shall only be granted at the time of approval for the entire development, and shall not be granted on a lot-by-lot basis. [Ord. 2019-033]
   b) Applicability
   Full Incentive Option developments providing all the required WHP units on site may utilize the flexibility in property development regulations listed herein. This flexibility shall be granted for all units of the same unit type as the WHP units, in all pods where WHP units are being provided. [Ord. 2019-033]
   c) Justification Report
   Use of these provisions shall not be granted by right, and shall require submittal of a justification report that demonstrates that deviations are the minimum needed to allow for the use of density bonus incentives. The report shall include the following: [Ord. 2019-033]
   (1) The regulations that are proposed to be modified. [Ord. 2019-033]
   (2) The amounts and specifics of the requested deviation(s). [Ord. 2019-033]
   (3) The areas within the development that the deviation(s) will be applied to. [Ord. 2019-033]
   (4) Graphic representations such as, but not limited to, site plans, elevations, perspectives, and typical examples, showing how the deviations will meet the intent of the district and WHP with emphasis on open space, privacy, maintenance, and public health, safety, and welfare. [Ord. 2019-033]
   d) Site Plan Approval
   Any deviations sought pursuant to this Subsection shall be reflected on site plans submitted for DRO approval. [Ord. 2019-033]
   e) Drainage
   Any reduction in lot size or open space area, or increase in building coverage shall be subject to approval of a drainage study demonstrating that reduced pervious surface area will not create adverse drainage issues. [Ord. 2019-033]
   f) Option 1 – RT District
   The zoning for parcels electing to use this option must be in compliance with Table 3.A.3.B, Future Land Use (FLU) Designation and Corresponding Standard Zoning Districts. [Ord. 2019-033]
   (1) RT PDR Deviations
   Deviations from the minimum PDRs for the RT district with an LR-2 or LR-3 FLU designation may be in accordance with Table 5.G.1.B, RT Deviations for WHP, only for those developments that exceed the standard density in the footnote in FLUE Table 2.2.1-g.1, Residential Future Land Use Designation Maximum Density, and utilize a minimum density bonus of 20 percent. [Ord. 2019-033]

Notes:
ND No deviation.

**g) Option 2 – TND Regulations**
Developments eligible for this option shall be permitted to utilize the PDRs of Table 3.F.3.D, TND Residential Lot Size and Setback Regulations, subject to meeting the requirements of Art. 3.F.3.D.5_Residential Uses and the following limitations: [Ord. 2019-033]

1. U/S Tier only; [Ord. 2019-033]
2. Development does not qualify to be a TND or use Option 1 or 3; and, [Ord. 2019-033]
3. If the development has an LR-1, LR-2, LR-3, or MR-5 FLU designation, the development shall meet all requirements for and be approved as a PDD. [Ord. 2019-033]

**h) Option 3 – Flexible Regulations**
Developments with MR-5, HR-8, HR-12, or HR-18 FLU designations, or if approved as a PDD or TDD, may deviate from the residential requirements of Table 3.D.1.A, Property Development Regulations (PDRs), or Table 3.D.2.B, ZLL Property Development Regulations, as follows: [Ord. 2019-033]

1. SFD units may be permitted up to a maximum ten-percent deviation for the following PDRs: lot size; width and frontage; building coverage; and, side and rear setbacks. [Ord. 2019-033]
2. SFD units limited to one floor with no loft or other similar feature, may be permitted up to a maximum 20-percent deviation for the following PDRs: building coverage; and front and side street setbacks. [Ord. 2019-033]
3. ZLL lots may be permitted up to a maximum lot width reduction of five feet, and ten-percent deviation from the minimum lot size, building coverage, and front setback for units with front loading garages. [Ord. 2019-033]

**i) Option 4 – PDD Open Space Reduction**
Developments which elect to utilize a density bonus of not less than 15 percent, may reduce the 40-percent open space requirement of Table 3.E.2.C, PUD Land Use Mix, to not less than 30 percent open space, provided the development incorporates common useable open space areas as defined in Art. 1.H.2.O.13, Open Space, Usable for WHP. [Ord. 2019-033]

**j) Option 5 – Internal Incompatibility Buffers**
Required Incompatibility Buffers between SFD and MF units within a development shall not be required. [Ord. 2019-033]

**k) Option 6 – Relocation of Units to Civic Tracts**
Residential units may be permitted in a Civic Pod subject to PREM approval. This may include collocating residential units with civic uses. The DRO shall have the following authority where PREM approval is obtained after BCC approval of the overall development: [Ord. 2019-033]

1. In the case of a civic site cash out, the deletion of the Civic Pod and increase in Residential Pod area; or [Ord. 2019-033]
2. The relocation of residential units to a Civic Pod, or the relocation of residential units where the Civic Pod is deleted. [Ord. 2019-033]

3. **Approval Process**
Subject developments requesting density bonuses greater than 50 percent are subject to a Class A Conditional Use approval; approval processes for developments with density bonuses up to and including 50 percent are determined by the applicable thresholds in Art. 3, Overlays and Zoning Districts and Art. 4, Use Regulations of the Code. [Ord. 2019-033]
C. Disposition of WHP Obligation

1. Declaration of Method to Meet WHP Obligation

   The developer is required to declare the selected method to meet the WHP requirement prior to certification for public hearing for approval of the proposed subject development, or at DRO if the subject development is not subject to public hearing. The declared method shall be included as a Condition of Approval. [Ord. 2019-033]

2. Change of Declared Method

   A change to the selected method cannot be requested after Building Permits have been issued for more than 25 percent of the units in the subject development. A change to the declared method shall be subject to the same approval process through which the subject development received approval.

   For developments subject to public hearing, approval of a change in declared method shall be at the discretion of the Board of County Commissioners. The developer may request Expedited Application Consideration for a Development Order Amendment pursuant to Art. 2, Application Processes and Procedures. Any necessary amendments to the recorded Master Covenant for the subject development as a result of the change of declared method shall be recorded by the developer no later than 60 days following the approval of the change. [Ord. 2019-033]

3. Recalculation

   A change to a subject development's unit total, unit type, or declared method or WHP unit location shall require a recalculation of the workforce housing obligation, and shall include reassessment of the density bonus pursuant to the process outlined in Art. 5.G.1.B.2.e, Density Bonus Determination for Full Incentive Developments. Any recalculation that reduces the number of units approved on the subject development's Final Site Plan may require that the Final Site Plan be amended to reflect the reduced unit count, or the purchase of Transfer of Development Rights in the amount of the reduction. [Ord. 2019-033]

4. Methods Available

   Several alternative methods are available for the disposition of a subject development's WHP obligation: [Ord. 2019-033]

   a. WHP On-Site Construction Option

      WHP units may be located on site. For Single Family or Townhouse for-sale developments using the Full Incentive Option, the number of required WHP units may be reduced by 20 percent if all required WHP units are to be provided as on-site, for-sale, Single Family units, or reduced by ten percent if provided as on-site, for-sale, Townhouse units. Prior to Final DRO approval, the developer shall identify on the plan the total number of WHP units proposed for the subject development within each pod or phase, as applicable. 50 percent of WHP units must receive Certificates of Occupancy prior to the issuance of 50 percent of market rate unit Building Permits in the subject development. All WHP units must receive Certificates of Occupancy prior to issuance of no more than 85 percent of the residential Building Permits in the subject development. [Ord. 2019-033]

   b. WHP Off-Site Options

      WHP units may be located off site using the options listed below. For-sale subject developments that opt to provide the required WHP units as off-site rental units through off-site construction, through the Purchase of Market Rate Units, or through an Exchange Builder, shall have a WHP obligation one and one-half times the number of WHP units required if developed on site not including the on-site reduction. Off-site options may be accommodated in municipalities located within Palm Beach County. When the obligation is to be met in a municipality, the developer shall provide written confirmation to the Planning Director or designee that the administrator or manager of the municipality has been notified that the WHP unit obligation is to be met in the municipality, prior to the issuance of the first WHP Building Permit; or prior to the recordation of a deed restriction or deed transfer to the County for a market rate unit pursuant to Art. 5.G.1.C.4.b.3), Off-Site Option 3 – Purchase of Market Rate Units. The enforcement of any requirements of Art. 5.G.1, Workforce Housing Program (WHP) for units provided in municipalities shall be the responsibility of Palm Beach County. For subject developments outside the Westgate Community Redevelopment Area Overlay that opt to locate WHP units in the WCRAO, no more than ten percent of the development’s WHP units to be located in the WCRAO shall be in the Low-Income category. The developer shall provide written confirmation to the Planning Director or designee that the WCRA has been notified that WHP units will be provided in the WCRAO. [Ord. 2019-033]

      1) Off-Site Option 1 – Off-Site Construction/Same Developer

      Prior to issuance of the first residential Building Permit or Final DRO approval for the subject development, whichever comes first, all contracts or related agreements for any off-site option
evidencing site control and necessary approvals shall be approved by the County Administrator, or designee. Certificates of Occupancy shall be issued for a minimum of 50 percent of the required WHP units to be constructed off-site prior to the issuance of no more than 50 percent of the Building Permits in the subject development. All off-site WHP units must receive Certificates of Occupancy prior to issuance of no more than 85 percent of the Building Permits in the subject development. The site plan, the Master Covenant, or other appropriate document shall be amended to reflect the number of WHP units, including the number in each applicable WHP income category, to be located on the receiving site(s). The Planning Director or designee shall determine the appropriate document and the timeframe for the modification, which shall be no later than the 85-percent threshold identified in this paragraph. [Ord. 2019-033]

2) Off-Site Option 2 – Off-Site Construction/Exchange Builder
The Off-Site Construction/Exchange Builder Option shall be evaluated and a report provided to the Board of County Commissioners no later than three years from the effective date of this Ordinance. Provision of required WHP units may be arranged by the developer of the subject development through an Exchange Builder who will provide them off-site, subject to the following: [Ord. 2019-033]

a) The exchange price shall be set by the County at 80 percent of the in-lieu fee associated with the subject development. [Ord. 2019-033]

b) A subject development which received a Development Order prior to the effective date of Ordinance No. 2019-033 may select the Exchange Builder Option as the subject development's disposition option, provided that: [Ord. 2020-021]
   (1) No residential Building Permits have been issued for the subject development; [Ord. 2020-021]
   (2) The Development Order for the subject development shall be revised through the Zoning Agency Review process to reflect the change in disposition, and shall include any necessary notes, condition changes, and amendments to previously approved plans; [Ord. 2020-021]
   (3) The exchange price shall be 80 percent of the applicable in-lieu fee in effect at the time of the Development Order for subject development; and, [Ord. 2020-021]

c) All exchange projects that propose to utilize other programs in addition to WHP exchange payments that will result in income restrictions on WHP units will require the approval of the Board of County Commissioners. This approval is required prior to the earlier of Final DRO or first Building Permit. [Ord. 2019-033]

d) Prior to issuance of the first residential Building Permit for the subject development, the developer of the subject development shall select one of the following two options: [Ord. 2019-033]
   (1) Demonstrate engagement of an Exchange Builder, who shall provide: [Ord. 2019-033]
      (a) Evidence of receipt of payment of the required exchange price; [Ord. 2019-033]
      (b) A detailed description of the proposed exchange project, including site location; the site's land use designation, zoning, and density bonus determination if applicable; the total number of proposed units by type, size, and income category; proposed exchange project layout including the number and type of buildings; proposed exchange project schedule; status of any development approvals; pro forma financial statements demonstrating the exchange project's financial viability; and, documentation evidencing availability of all sources of funding required for the exchange project development budget, including documentation from the financing source(s) providing a firm or a conditional commitment to financing and identifying all financing terms and conditions. [Ord. 2019-033]
      (c) Evidence of control of the proposed exchange project site, through a recorded deed or title, or an executed purchase agreement or purchase option, approved by the County Attorney for legal sufficienty and by the County Administrator or designee; [Ord. 2019-033]
      (d) A recorded Restrictive Covenant for the exchange project site; and, [Ord. 2019-033]
(e) Guarantee acceptable to Palm Beach County and approved by the County Attorney’s Office for an amount equal to 80 percent of the full in-lieu fee. The guarantee shall be for a term not to exceed 39 months, and of a type described in Article 11.B.2.A.6, Guarantees. [Ord. 2019-033]

(2) Provide guarantee acceptable to Palm Beach County and approved by the County Attorney’s Office, for an amount equal to 100 percent of the in-lieu fee. The guarantee shall be for a term not to exceed 39 months, and of a type described in Article 11.B.2.A.6, Guarantees. Prior to issuance of no more than 25 percent of the Building Permits in the subject development, the developer of the subject development shall have the option to replace the guarantee provided at first Building Permit with items meeting the requirements of paragraph (1) above. If at 25 percent of Building Permits the required information has not been provided or is not approved by the County Administrator or designee, the developer may pay the full in-lieu fees, and if not Palm Beach County shall file a claim against the guarantee for 100 percent of the in-lieu fees. Prepayment of the in-lieu fee by the developer shall not be allowed. [Ord. 2019-033]

e) Prior to the end of the 36th month of the guarantee, all WHP units shall be issued COs or a renewed guarantee shall be delivered by the Exchange Builder to Palm Beach County. The terms of the renewed guarantee shall be at the discretion of Palm Beach County, but in no case shall exceed an addition three months beyond the term of the original guarantee. The amount of the renewed guarantee shall be prorated to reflect any WHP units already issued Certificates of Occupancy. The Exchange Builder may request additional time beyond the three-month extension; approval of such a request will be at the discretion of the Board of County Commissioners and will require a renewed guarantee for the extension approved by the Board. If neither the required WHP units nor an acceptable renewed guarantee is delivered, Palm Beach County shall collect the guarantee. [Ord. 2019-033]

f) During the three-year evaluation period for the Off-Site Construction/Exchange Builder Option, County Administration shall provide the Board of County Commissioners with status reports annually or more frequently as needed, identifying the progress made by the Exchange Builders engaged under this option. [Ord. 2019-033]

g) The site plan, the Master Covenant, or other appropriate document shall be amended to reflect the number of WHP units, including the number in each applicable WHP income category, to be located on the exchange project(s). The Planning Director or designee shall determine the appropriate document and the timeframe for the modification, which shall be no later than the 85 percent threshold identified in paragraph d) above. [Ord. 2019-033]

3) Off-Site Option 3 – Purchase of Market Rate Units
Purchase of existing market rate units to be deeded to the County, sold to eligible households, and deed restricted, or retained by the developer subject to recordation of a deed restriction that meets the intent of this provision and subject to the conversion factor pursuant to Article 5.G.1.C.4.b, WHP Off-Site Options if applicable. Prior to issuance of the first residential Building Permit or Final DRO approval for the subject development, whichever comes first, all contracts or related agreements for any off-site option evidencing site control and necessary approvals shall be approved by the County Administrator, or designee. A minimum of 50 percent of the units must be purchased and deeded to the County or deed restricted prior to the issuance of no more than 50 percent of the residential Building Permits in the subject development. All market rate units shall be purchased and deeded to the County or deed restricted prior to issuance of no more than 85 percent of the residential Building Permits in the subject development. The market rate units shall be approved by the Department of Housing and Economic Sustainability, and must meet housing quality standards and criteria established by PBC. The site plan, the Master Covenant, or other appropriate document shall be amended to reflect the number of WHP units, including the number in each applicable WHP income category, to be located on the receiving site(s). The Planning Director or designee shall determine the appropriate document and the timeframe for the modification, which shall be no later than the 85-percent threshold identified in this paragraph. [Ord. 2019-033]

c. Donation of Buildable Land Option
Donation of developable land acceptable to the County in an amount equal to the buyout costs of the affected units. Donated land must be approved by the Property and Real Estate Management Division and deeded to the County prior to issuance of 50 percent of the residential Building Permits in the subject development. [Ord. 2019-033]
d. In-Lieu Fee Option

1) In-lieu fees shall be: 120,000 dollars for Single Family units, 100,000 dollars for Townhouse units, and 75,000 dollars for Multifamily units, as defined by Art. 4, Use Regulations of the ULDC. Beginning in September 29, 2021 the in-lieu fee amounts shall be adjusted annually in accordance with the annual All Items Consumer Price Index for All Urban Consumers (CPI-U) for the U.S. City Average, not seasonally adjusted, as published by the U.S. Bureau of Labor Statistics. [Ord. 2019-033]

2) The in-lieu fees assessed for a subject development shall be based on the unit type of the subject development. For subject developments with a mix of unit types, the in-lieu fees shall be calculated based on the unit type distribution in the subject development. [Ord. 2019-033]

3) Fees shall be paid prior to the issuance of 50 percent of residential unit Building Permits for the subject development. Fees shall be made payable to the Palm Beach County Board of County Commissioners and submitted to the Department of Housing and Economic Sustainability. The payment shall be deposited in the WHP Trust Fund maintained by the PBC Department of Housing and Economic Sustainability. [Ord. 2019-033]

5. Developments with Outstanding Obligations
Developments approved prior to September 29, 2019, which by that date have recorded a Master Covenant indicating that the WHP obligation will be met on site, received Certificates of Occupancy for at least 85 percent of approved units, and have an approved Master Plan reflecting the required WHP units on site, may request approval of the Board of County Commissioners to pay the in-lieu fee for a portion of the obligation. This option is available only for units that have not been previously offered for rent or sale as WHP units. The in-lieu amount shall be based on the applicable in-lieu fee in effect at the time of the issuance of the first residential Building Permit for the subject development, and shall include interest, calculated from the date of the first residential Building Permit, using the rate in effect at the time of election, as set by the Florida Chief Financial Officer pursuant to F.S. § 55.03(1) (2018). Upon approval by the Board and payment of the required amount, the County shall schedule BCC consideration of amendments to the Master Covenant to reflect the revised disposition of workforce obligation for the subject development. This provision shall sunset 90 days following the effective date. [Ord. 2019-033]

D. Delivery of WHP Units
Except as noted, the following Section applies to subject developments that opt to dispose of the WHP obligation through the following methods: On-Site Construction, Off-Site Construction/Same Developer, Off-Site Construction/Exchange Builder, or Purchase of Market Rate Units. Required WHP units may be delivered as for-sale or for-rent units. [Ord. 2019-033]

1. For-Sale Units
a. Master Covenant

1) Prior to first Building Permit on the subject development, the developer of the subject development shall record in the Public Records of Palm Beach County a Master Covenant binding the entire subject property, in a form provided by the County, which identifies the WHP unit requirement for the subject development and addresses the requirements of this Subsection. Developments for which the in-lieu fee has subsequently been paid to Palm Beach County as a result of the guarantee provided in the Exchange Builder Option, pursuant to Art. 5.G.1.C.4.b.2), Off-Site Option 2 – Off-Site Construction/Exchange Builder, and no units subject to WHP were provided prior to County receiving payment pursuant to the guarantee, many request that the Master Covenant be released. [Ord. 2019-033]

2) The Restrictive Master Covenant shall include but not be limited to restrictions requiring: that all identified WHP units shall be sold or resold only to a purchaser certified by the Department of Housing and Economic Sustainability, at or below the price established annually by Palm Beach County for the income category of the WHP unit, subject to the affordability requirements and provisions of this Article; that the County shall have the exclusive option to purchase WHP units that are unsold at day 150 of the required marketing period; that rental of units is permitted only under specific circumstances, for limited periods of time, and with prior approval by the Director of the Department of Housing and Economic Sustainability; that these restrictions remain in effect for 15 years recurring from the date of the CO for each unit; and, that in the event a unit is resold before the 15-year period concludes, a new 15-year period shall take effect on the date of resale. The Master Covenant shall further provide monitoring and compliance requirements including but not limited to those set forth below to ensure compliance with the WHP, and provide that every deed for sale of a WHP housing unit shall incorporate by
reference the Master Covenant and shall specify the income category associated with the unit. [Ord. 2019-033]

b. Process for Initial Sale of WHP Units

1) Pricing/Affordability

a) WHP units shall be sold at or below the current designated price for the unit’s income category. In the even that an income-certified purchaser seeks to purchase a WHP unit whose price has increased through annual price adjustments pursuant to this Article, the developer of that WHP unit shall honor the price in effect at the time of the purchaser’s income certification, provided that the purchaser enters into a purchase contract within one year of the date of income certification. [Ord. 2019-033]

b) Developers shall not be required to provide units in an income category when the category price is greater than the median sales price for the County. These units are eligible for the In-Lieu Payment pursuant to Art. 5.G.1.C.4.d, In-Lieu Fee Option, or can be distributed equally among the remaining income categories. [Ord. 2019-033]

c) The price of a for-sale WHP unit shall not be raised once a unit is under contract to a purchaser. Purchase price of the WHP unit, including all charges imposed by the seller, cannot exceed the maximum WHP price for the income category. Options selected by the purchaser, including but not limited to upgraded finishes or premium lots, shall not be reflected in the sales price of WHP units, but may be paid by the purchaser at the time of contract execution, or included as a line item on the closing/settlement statement. Earnest money deposit required of purchasers shall not exceed two percent of the sales price. [Ord. 2019-033]

d) Affordability restrictions remain in effect for 15 years recurring from the date of the CO for each unit; in the event a unit is resold before the 15-year period concludes, a new 15-year period shall take effect on the date of resale. [Ord. 2019-033]

e) Rental of for-sale units is permitted only under specific circumstances, for limited periods of time, to income-qualified renters, at or below the prices established annually by Palm Beach County for the unit’s designated income categories, and with prior approval by the Director of the Department of Housing and Economic Sustainability based on criteria established by the Department. [Ord. 2019-033]

2) Qualification and Certification for For-Sale Purchasers

WHP units shall be sold only to a purchaser certified by the Department of Housing and Economic Sustainability. HES shall qualify prospective purchases and issue a certification letter confirming eligibility to purchase the WHP unit. Palm Beach County retains the right to qualify purchasers for units in categories above or below their income category. When available, down payment assistance may be offered for all workforce housing purchasers; Palm Beach County shall not be obligated to provide down payment assistance to any purchaser. The amount of financial assistance, if any, that is available for purchase of the WHP unit shall be identified in the certification letter. The HES certification process shall be implemented according to procedures established and published by the Department. [Ord. 2019-033]

3) Closing

a) The process and requirements for closing of sales of WHP units shall be as set forth in County procedures. [Ord. 2019-033]

b) Every warranty deed documenting a sale of a WHP unit shall include a statement that a unit is subject to covenants, conditions, and restrictions including the Master Covenant, and shall include the date of recordation of the Master Covenant, and the Book and Page of the Official Record. [Ord. 2019-033]

4) Compliance Reporting during Initial Sales Period

Beginning with the commencement of sales of WHP units, until such time as all WHP units have been sold, the developer or Exchange Builder will provide to the County monthly reports detailing the number of WHP and market rate units built, the number under contract, and the number sold. The developer shall also provide notice to the Planning Director or designee if ownership of the subject development, or exchange project, has been transferred. [Ord. 2019-033]

5) Marketing of WHP Units

a) WHP Units Delivered through the Exchange Builder or Purchase of Market Rate Options

The marketing of WHP units delivered through an Exchange Builder, and the marketing of Purchase of Market Rate WHP Units which are intended to be sold by the developer, shall
be the responsibility of the developer or Exchange Builder. If requested, the County may provide, at the County’s sole discretion, a list of interested parties, WHP brochures, informational packets, or other information or assistance for the marketing of for-sale WHP units delivered through these options. [Ord. 2019-033]

b) **WHP Units Delivered through the On-Site Construction or Off-Site/Same Developer Options**

The County shall prepare and publish minimum marketing requirements applicable to WHP units provided through the WHP On-site Construction Option or Off-Site Construction by Same Developer Option. The marketing requirements shall address the following, at minimum: [Ord. 2019-033]

1. The intent that the developer will act in good faith to market and sell the WHP units in the same manner as the market rate units and for the same period of time. [Ord. 2019-033]

2. The marketing of WHP units shall commence concurrent with the marketing of market rate units, and shall continue until at least 75 percent of the for-sale market rate units have been issued Certificates of Occupancy, but not less than 180 days. [Ord. 2019-033]

3. Prior to commencement of sales, the developer shall obtain from the Director of HES or designee a list of interested parties, WHP brochures, and informational packets which provide the qualification standards, terms of the Restrictive Master Covenant, where to go to get qualified, and other relevant information regarding the WHP units. [Ord. 2019-033]

4. The developer shall provide notice of commencement of sales to the Planning Director or designee, the Director of HES, and the list of interested parties. The notice shall include the address where the WHP units are located, the address of the sales office, the hours of the sales office, the floor plan and construction specifications for the WHP units, and the pricing of the WHP units. The developer shall provide to the Planning Director or designee proof of notice to the interested parties list, in the form of a copy of the email or letter sent, and a copy of the distribution list. [Ord. 2019-033]

5. Within ten days of receipt, the County shall provide written acknowledgement of the notice of commencement of sales. [Ord. 2019-033]

6. The developer shall maintain in the sales office and in the sales office of the subject development if the WHP units are located off site, hard physical copies of the informational packets obtained from HES, available to any and all potential buyers. The developer shall also maintain hard physical copies of the County’s WHP brochure and prominent displays indicating that certain units are available for purchase for qualified households subject to the WHP provisions, and shall identify the location and availability timeframe for the WHP units. [Ord. 2019-033]

7. The developer shall attend all housing workshops, fairs, orientations, and other WHP events requested by HES during the marketing period, and shall present information about the WHP units and purchase options. [Ord. 2019-033]

8. The developer shall maintain publically accessible website landing pages for the WHP units that are prominently displayed on the subject development’s primary webpage, starting at the time of commencement of sales of the market rate units. [Ord. 2019-033]

9. The developer shall provide monthly documentation to the Planning Director or designee demonstrating that the required materials are available in the sales office and prominently displayed, that the developer is participating in County WHP events, that the website for the WHP units is active and easily accessed, and that marketing efforts for the WHP units are consistent with the marketing efforts for the market rate units. Documentation shall include photographs of the required materials and displays demonstrating a prominent location in the sales office, screenshots of webpages, copies of mailers, photos of billboards, proof of television, radio, newspaper, or online advertisements, for both market rate and WHP units, and shall include a log of visitors and callers interested in the WHP units. [Ord. 2019-033]

c) The County may conduct site visits and inspections to verify compliance with the requirements of this Section. [Ord. 2019-033]
6) **Release of Obligation**

Release of Obligation is available only for subject developments delivering WHP required units as for-sale units through the WHP On-Site Construction or the Off-Site Construction by Same Developer disposition options. It is not the intent of the WHP provisions to require a developer to commence construction on any WHP for-sale unit for which a valid and binding contract for purchase between developer and purchaser has not been executed. In the event WHP units have been marketed according to the requirements of this Article, then the WHP units are eligible to be released from the WHP obligations indicated in the Master Covenant pursuant to the process below. [Ord. 2019-033]

a) The developer shall provide a written notice to the Planning Director or designee requesting release of obligation and confirmation of the In-Lieu cash payment amount. The request shall include documentation demonstrating that at least 75 percent of the for-sale market rate units in the subject development have received Certificates of Occupancy. [Ord. 2019-033]

b) The County shall provide a written response to the developer, within ten business days of receipt, indicating the County's agreement/disagreement with request for release of obligation and confirming the amount of the required In-Lieu cash payment. [Ord. 2019-033]

c) Upon payment of the required In-Lieu cash payment, the WHP unit shall thereafter be released from any and all obligations of the WHP requirements of the ULDC and the County shall provide written confirmation that the unit has been released, inclusive from release from the Master Covenant. [Ord. 2019-033]

d) Should a developer wish to appeal the Planning Director’s determination that a subject development has not met the requirements for a release of obligation; the appeal shall be pursuant to Art. 2.A.14.C.2.d, Interpretations of the ULDC. [Ord. 2019-033]

c. **Process for Subsequent Sales**

1) **Pricing/Affordability**

a) Affordability restrictions remain in effect for 15 years recurring from the date of the CO for each unit; in the event a unit is resold before the 15-year period concludes, a new 15-year period shall take effect on the date of resale. [Ord. 2019-033]

b) An owner intending to sell a WHP unit during the affordability period must notify the Planning Director or designee in writing of the intent to sell, and request a resale price determination. The Planning Director or designee will determine the current maximum resale price based on the income category of the WHP unit and the current sales price for that category. The WHP price initially established for the for-sale unit’s income category at the time of approval of the subject development shall be the sales floor throughout the affordability period. No WHP unit is required to be sold at a price below the sales floor, though a seller may opt to do so. [Ord. 2019-033]

2) **HES Review**

a) **Qualification and Certification of For-Sale Purchasers**

WHP units shall be sold only to a purchaser certified by the Department of Housing and Economic Sustainability. Unit owners shall refer prospective purchasers to HES, who shall qualify prospective purchasers and issue a certification letter confirming eligibility to purchase the WHP unit. Palm Beach County retains the right to qualify purchasers for units above or below their income category. When available, down payment assistance may be offered for all workforce housing buyers; Palm Beach County shall not be obligated to provide down payment assistance to any purchaser. The amount of financial assistance, if any, that is available for purchase of the WHP unit shall be identified in the certification letter. The HES certification process shall be implemented according to procedures established and published by the Department. [Ord. 2019-033]

3) **Closing**

a) The process and requirements for closing of sales of WHP units shall be as set forth in County procedures. [Ord. 2019-033]

b) Every warranty deed documenting a sale of a WHP unit shall include a statement that a unit is subject to covenants, conditions and restrictions including the Master Covenant, and shall include the date of recordation of the Master Covenant, and the Book and Page of the Official Record. [Ord. 2019-033]
d. Annual Compliance Reporting
The owner of the WHP unit shall submit to the Planning Director or designee, on a form provided by the County, an annual report containing information and documentation to demonstrate continued compliance with the WHP. The County may conduct site visits at reasonable times, or perform other independent investigation to verify continued compliance with the WHP. [Ord. 2019-033]

2. Rental Units
   a. Master Covenant
      1) Prior to first Building Permit on the subject development, the developer of the subject development shall record in the Public Records of Palm Beach County a Master Covenant binding the entire project, in a form provided by the County, which identifies the WHP unit requirement for the subject development and addresses the requirements of this Subsection. Subject developments for which the in-lieu fee has subsequently been paid to Palm Beach County as a result of the guarantee provided in the Exchange Builder Option, pursuant to Art. 5.G.1.C.4.b.2), Off-Site Option 2 – Off-Site Construction/Exchange Builder, and no units subject to the WHP program were provided prior to the County receiving payment pursuant to the guarantee, may request that the Master Covenant be released. [Ord. 2019-033]
      2) The Master Covenant shall include but not be limited to restrictions requiring: that all required WHP units shall be rented only to an income-qualified household, in an income category corresponding to the WHP obligation of the subject development, at or below the prices established for the income category annually by Palm Beach County, subject to the affordability requirements and provisions of this Article; that these restrictions remain in effect for a period of 30 years (non-recurring) for each unit, from the date of occupancy of the first WHP unit; and that in the event a rental complex is resold before the 30-year period concludes, the new owner assumes the requirement for the number of remaining years; and the number of years remaining shall be determined by the Planning Director or designee; and shall take effect on the date of resale. The Master Covenant shall further provide monitoring and compliance requirements including but not limited to those set forth below to ensure compliance with the WHP. Every deed for a rental development with WHP housing units and every rental agreement for each WHP unit shall incorporate by reference the Master Covenant. [Ord. 2019-033]

   b. Pricing/Affordability
      1) All required WHP units shall be rented only in the designated income categories corresponding to the WHP obligation of the subject development, at or below the prices established by Palm Beach County. [Ord. 2019-033]
      2) Affordability restrictions remain in effect for a period of 30 years (non-recurring) for each rental unit, from the date of occupancy of the first WHP unit; in the event a rental complex is resold before the 30-year period concludes for all units, the new owner assumes the requirement for the remaining number of years; as shall be determined by the Planning Director or designee based on the date of resale. [Ord. 2019-033]
      3) The rent prices shall be updated annually by the Planning Director, or designee, based on the monthly rent ranges published annually for the Florida Housing Finance Corporation Multi-Family Rental Programs, by number of bedrooms, for the following income ranges: > 60 to 70 percent; > 70 to 80 percent; > 80 to 90 percent; > 90 to 100 percent; > 100 to 110 percent; > 110 to 120 percent; > 120 to 130 percent; and, > 130 to 140 percent of MFI. The WHP price initially established for the rental unit’s income category at the time of approval of the subject development shall be the rental floor throughout the affordability period. No WHP unit is required to be rented at a price below the rental floor, though an owner may opt to do so. [Ord. 2019-033]
      4) Owners of WHP rental units may choose to include one or more utilities for the unit in the base rental price. Units that do not include utilities must provide a utility allowance in the form of a rent reduction based on the number of bedrooms, according to a schedule established by the Planning Division. Utilities shall include, but not be limited to, water, sewer, gas, and electric. When one or more utility cost(s) are included within the WHP unit rent price, and reasonable, reliable, and verifiable documentation is provided that indicates the total utility cost included within the WHP unit rent price meets or exceeds the stated utility allowance cost, then the utility allowance requirement would be waived. If the utility costs are less than the prescribed utility allowance, the difference shall be credited to the WHP resident’s rent cost. [Ord. 2019-033]
c. Income Qualification of Tenants

WHP units shall be rented only to an income-qualified household. The verification of prospective
tenants as income qualified for the rental unit category, pursuant to the requirements of this Article,
is the responsibility of the rental unit owner or designated management company. [Ord. 2019-033]

d. Marketing of WHP Rental Units

Marketing of WHP rental units is the responsibility of the rental unit owner or designated
management company. [Ord. 2019-033]

e. Commencement of Rentals

The owner of the rental WHP unit(s) shall provide the Planning Director, or designee, with notice
of the date of occupancy of the first WHP unit. [Ord. 2019-033]

f. Compliance Reporting

The owner of the WHP unit shall submit to the Planning Director, or designee, on a form provided
by the County, an annual report containing information and documentation to demonstrate
continued compliance with the WHP. The County may conduct site visits at reasonable times, or
perform other independent investigation to verify continued compliance with the WHP. The owner
of the WHP units shall also provide notice to the Planning Director or designee of a change in
management company no later than 30 days after the change occurs. The owner of a WHP unit
may request approval from the Executive Director of the Planning, Zoning and Building Department,
or designee to rent the unit to a household having an income below 60 percent of Area Median
Income, at a price below the minimum rent for the Low-Income category. The request is to include
documentation of the owner’s efforts to market the unit in the WHP income categories and other
information demonstrating that current area market conditions do not support the rental of the unit
to households in the 60 to 80 percent Low-Income category. The Executive Director of the Planning,
Zoning and Building Department, or designee, in consultation with the Department of Housing and
Economic Sustainability, shall consider the documentation provided, the income characteristics of
the census block(s) or tract(s) where the development is located, and any other relevant information
in determining whether to grant the request. [Ord. 2019-033] [Ord. 2020-020]

g. Deed Restriction

The warranty deed documenting a sale of WHP rental units shall include a statement that the units
are subject to covenants, conditions, and restrictions including the Master Covenant, and shall
include the date of recordation of the Master Covenant, and the Book and Page of the Official
Record. [Ord. 2019-033]

E. Enforcement

The County may enforce the requirements of the WHP through any cause of action available at law or
equity, including but not limited to seeking specific performance, injunctive relief, rescission of any
unauthorized sale or lease, reclassification of a lesser unit to another income category, and tolling of the
15-year recurring term of for-sale units or the 30-year non-recurring term for rental units of the WHP. [Ord.
2019-033]

Section 2 Affordable Housing Program (AHP)

A. Purpose and Intent

The AHP implements HE Policies 1.1-o and 1.5-g of the Plan, among others, by establishing an AHP. The
AHP is a voluntary program used by an Applicant seeking additional density for an affordable housing
development. An AHP Applicant elects to provide at a minimum 65 percent of the total number of dwelling
units targeted to households at incomes of 60 percent of Area Median Income (AMI) and below. In any
proposal a maximum of 20 percent of all units will target incomes of 30 percent and below AMI. The program
ensures a minimum affordability period, and provides for a density bonus and other incentives. The program
is intended to increase the supply of housing opportunities for persons employed in PBC in jobs that
residents rely upon to make the community viable. Consideration may be given to developments requesting
income percentage targets that are different from those previously indicated, based on programmatic
requirements imposed by a governmental agency providing affordable housing funding or another entity
with different programmatic requirements, with the final determination made by the Executive Director of
Planning, Zoning and Building or designee. [Ord. 2009-040] [Ord. 2012-003]
B. Applicability
In cases of conflict between this Chapter and other Articles of this Code, the provisions of this Chapter shall apply. The AHP shall apply to developments with a residential component of ten or more dwelling units with all units being built on site. This shall include the expansion of existing projects that add ten or more dwelling units, where the program shall apply to those units being added. Requirements and limitations are further defined in Table 5.G.2.B, Affordable Housing Program. [Ord. 2009-040]

1. Exemptions
Congregate Living Facilities (CLFs); and Nursing or Convalescent Facilities. [Ord. 2009-040]

2. Limitation on Restrictions
AHP units shall not be subject to restrictions beyond income qualifications except those restrictions imposed by a governmental agency providing affordable housing financing. [Ord. 2009-040]

[Ord. 2009-040]

Notes:
1. Shall also apply to mixed use projects with applicable underlying FLU designations for Commercial and Industrial Mixed Use Development. [Ord. 2009-040]
2. A density bonus of > 30% shall be permitted subject to meeting the additional standards of Art. 5.G.1.H, Additional Requirements for greater than 30 percent Density Bonus. [Ord. 2009-040]
3. Percentages shall be rounded up to the nearest whole number. [Ord. 2009-040]

Affordability: A minimum of 65% of all units at 60% of AMI or below and a 20% maximum of all units at 30% and below AMI. [Ord. 2009-040]

C. Design Requirements
AHP units shall be designed to be compatible with the overall project, as follows: [Ord. 2009-040]
1. All AHP units shall be constructed on site; [Ord. 2009-040]
2. All units shall be designed to a compatible exterior standard as other units within the development or pod; and, [Ord. 2009-040]
3. AHP units may be clustered or dispersed throughout the project. [Ord. 2009-040]

D. AHP Incentives
All projects with ten or more residential units shall be eligible for AHP Incentives. [Ord. 2009-040]

1. Density Bonus
   Table 5.G.2.B, Affordable Housing Program, delineates the ranges of density bonus allowed for the AHP by land use category. For the purposes of this Section, permitted density shall be the number of units allowed by the standard density allowed by the Plan; or the maximum density allowed by the Plan, where developed as a PDD, TDD, or other density provision of the Plan. TDR units or any other density bonus shall not be included as part of the permitted density for purposes of calculating the AHP density bonus. To ensure compliance with the compatibility requirement of HE Objective 1.5 of the Plan, projects requesting a density bonus shall be subject to the requirements of Table 5.G.2.D, Review Process, and Art. 5.G.2.E, Additional Requirements for Density Bonus. [Ord. 2009-040]

[Ord. 2009-040] [Ord. 2017-025]

2. Traffic Performance Standards Mitigation
   a. AHP Special Methodologies
      TPS mitigation shall be permitted for AHP projects in accordance with County Comprehensive Plan Transportation Element Policy 1.2-d (4). [Ord. 2009-040] [Ord. 2011-016]
   b. AHP Traffic Concurrency Hall Pass
      TPS mitigation shall also include the option of applying for an AHP Traffic Concurrency Hall Pass separate from a Development Order application. The AHP Traffic Concurrency Hall Pass serves
as a provisional traffic concurrency approval for a period of not more than 90 days, during which it must be merged into an application submitted for a Concurrency Reservation approval. The AHP Traffic Concurrency Hall Pass is described further in Art. 2.F, Concurrency (Adequate Public Facility Standards). [Ord. 2009-040]

3. Expedited Review
The following expedited review processes may apply to a proposed AHP development: [Ord. 2009-040]

a. Design Review
Review of Multifamily or Townhouse structures by the Building Division and Fire-Rescue shall be allowed concurrent with Final DRO review, prior to permit application. [Ord. 2009-040]

b. Platting
1) If only a boundary plat is required for an existing single lot, Building Permits may be issued after submittal of the Final Plat for recordation. [Ord. 2009-040]
2) If a subdivision plat is required, permits will be concurrently reviewed, but only issued at recording of the plat. [Ord. 2009-040]
3) Pursuant to Art. 3.E.1.G.1.a, Permits, Building Permits for sales offices, sales models, gate houses, entry features, and utilities may be issued prior to the recording of a Final Plat. [Ord. 2009-040]

4. Density Bonus Development Options
a. Purpose and Intent
To provide flexibility from property development and other related regulations in order to provide greater opportunity for cost effective development of AHP units. These provisions are not intended to supersede deviations that are normally addressed through the variance process. These options shall only be granted at the time of approval for the entire project, and shall not be granted on a lot-by-lot basis. [Ord. 2009-040]

b. Applicability
Projects with ten or more units that utilize a density bonus incentive and are subject to the requirements of the AHP may utilize the Development Options listed herein. [Ord. 2009-040]

c. Justification Report
Use of Density Bonus Development Options shall not be granted by right, and shall require submittal of a justification report that demonstrates that deviations are the minimum needed to allow for the use of density bonus incentives. The report shall include the following: [Ord. 2009-040]
1) The regulations that are proposed to be modified. [Ord. 2009-040]
2) The amounts and specifics of the requested deviation(s). [Ord. 2009-040]
3) The areas within the development that the deviation(s) will be applied to. [Ord. 2009-040]
4) Graphic representations such as, but not limited to, site plans, elevations, perspectives, and typical examples, showing how the deviations will meet the intent of the district and AHP with emphasis on open space, privacy, maintenance, and public health, safety and welfare. [Ord. 2009-040]

d. Site Plan Approval
All projects requesting Density Bonus Development Options shall submit an application and site plan to the DRO for certification where applicable, and for Final Site Plan approval for all others. The site plan shall indicate in the tabular data all Development Options requested and where feasible, a Regulating Plan shall be included to provide typical examples. Approval shall be granted only for the minimum deviations needed to allow for the use of density bonus incentives and where the requirements of all applicable reviewing agencies have been met. [Ord. 2009-040]

e. Drainage
Any reduction in lot size or open space area, or increase in building coverage shall be subject to approval of a drainage study demonstrating that reduced pervious surface area will not create adverse drainage issues. [Ord. 2009-040]

f. Option 1 – AR, and RT Districts
The zoning for parcels electing to use this option must be in compliance with Table 3.A.3.B, Future Land Use (FLU) Designation and Corresponding Standard Zoning Districts. [Ord. 2009-040]

1) AR FAR Calculations
New SFD lots in the AR district shall be permitted to calculate FAR based on the acreage of the FLU designation. [Ord. 2009-040]

2) RT PDR Deviations
Deviations from the minimum PDRs for the RT district with an LR-2 or LR-3 FLU designation may be in accordance with Table 5.G.2.D, RT Deviations for AHP, only for those projects that
g. Option 2 – TND Regulations
Projects eligible for this option shall be permitted to utilize the PDRs of Table 3.F.3.D, TND Residential Lot Size and Setback Regulations, subject to meeting the requirements of Art. 3.F.3.D.5, Residential Uses and the following limitations: [Ord. 2009-040]
1) U/S Tier Only; [Ord. 2009-040]
2) Project does not qualify to be a TND or use Option 1 or 3; [Ord. 2009-040]
3) If the subject site has an LR-1, LR-2, LR-3, or MR-5 FLU designation, the project shall meet all requirements for and be approved as a PDD; [Ord. 2009-040]

h. Option 3 – Flexible Regulations
Projects with MR-5, HR-8, HR-12, or HR-18 FLU designations, or if approved as a PDD or TDD, may deviate from the residential requirements of Table 3.D.1.A, Property Development Regulations (PDRs), or Table 3.D.2.B, ZLL Property Development Regulations, as follows: [Ord. 2009-040]
1) SFD units may be permitted up to a maximum ten percent deviation for the following PDRs: lot size; width and frontage; building coverage; and, side, and rear setbacks. [Ord. 2009-040]
2) SFD units limited to one floor with no loft or other similar feature, may be permitted up to a maximum 20 percent deviation for the following PDR’s: building coverage; and front and side street setbacks. [Ord. 2009-040]
3) ZLL lots may be permitted up to a maximum lot width reduction of five feet, and ten-percent deviation from the minimum lot size, building coverage, and front setback for units with front loading garages. [Ord. 2009-040]

i. Option 4 – PDD Open Space Reduction
Projects which elect to utilize a density bonus of not less than 15 percent, may reduce the 40 percent open space requirement of Table 3.E.2.C, PUD Land Use Mix, to not less than 30 percent open space, provided the project incorporates common usable open space areas as defined in Art. 1.H.2.O.13, Open Space, Usable for AHP. [Ord. 2009-040]

j. Option 5 – Internal Incompatibility Buffers
Required Incompatibility Buffers between SFD and MF units within an AHP development shall not be required. [Ord. 2009-040]

k. Option 6 – Relocation of Units to Civic Tracts
Residential units may be permitted in a Civic Pod subject to PREM approval. This may include collocating residential units with civic uses. The DRO shall have the following authority where PREM approval is obtained after BCC approval of the overall project: [Ord. 2009-040]
1) In the case of a civic site cash out, the deletion of the Civic Pod and increase in Residential Pod area; or [Ord. 2009-040]
2) The relocation of residential units to a Civic Pod, or the relocation of residential units where the Civic Pod is deleted. [Ord. 2009-040]

E. Additional Requirements for Density Bonus
Projects requesting a density bonus shall comply with the following: [Ord. 2009-040]

1. Sector Analysis
AHP projects shall be equitably distributed so that there is no undue concentration of very-low and low-income housing throughout the County. Table 5.G.2.E, AHP Density Bonus Guide (Step 1) indicates the Step 1 density bonus permitted. The concentration of very-low and low-income housing within a sector will be taken into consideration when determining the Step 1 density bonus permitted. Additional density may be added in accordance with Table 5.G.2.E, AHP Density Bonus Multipliers (Step 2). This
Step 2 analysis considers the proposed development and its location to neighborhood amenities; a public transit option; employment and shopping opportunities; grocery store (excluding convenience store); public school; medical facilities; social services; and, public recreation facilities. Prior to submittal of an AHP pre-application, the Applicant shall meet with the Planning Director or designee to establish the sector within which the distribution analysis shall be conducted. The boundaries of the sector shall be approved by the Planning Director or designee. The maximum AHP density bonus, total Step 1 plus Step 2, not to exceed a 100-percent bonus as recommended by the Planning Director or designee. [Ord. 2009-040]

[Ord. 2009-040]

Notes:
* For each multiplier column, only one of the four options (the closest amenity) may apply.

a. The sector shall be proportional to the size and character of the proposed development. At a minimum, the sector shall consist of one or more neighborhoods that include features such as schools, shopping areas, an integrated network of residential and Collector Streets bounded by Arterial Roads, civic uses, localized shopping, and employment opportunities. For data and analysis purposes, the sector shall be adjusted to accommodate census tracts or census block groups but shall not extend beyond important physical boundaries that may include a major Arterial Roadway or a wildlife refuge. [Ord. 2009-040]

b. Housing characteristics, (such as household family incomes and affordable housing stock data) for the sector shall be derived from the most current available census data. The analysis of housing and demographic data within the sector shall be in a manner and form approved by the Planning Director. [Ord. 2009-040]

2. **Pre-Application**

An application for density bonus shall require the submittal of a pre-application prior to submittal of a Zoning or Building Permit application for purposes of establishing a density bonus determination. [Ord. 2009-040]

a. **Contents**

The pre-application shall be in a form established by the Planning Director, and made available to the public. [Ord. 2009-040]

b. **Sufficiency Review**

The pre-application shall be subject to the provisions of Art. 2.B.2, or Art. 2.C.2, Sufficiency Review. [Ord. 2009-040]
c. **Compliance**
The density bonus shall not be granted until the project is found in compliance with Policy HE 1.5.h. in the Plan. [Ord. 2009-040]

d. **Density Determination**
The Planning Director or designee shall provide a written density determination letter within ten working days of determining the pre-application is sufficient. The determination shall be based on the sector analysis, size, location and development characteristics of the project with consideration given towards affordability, accessibility, proximity to mass-transit or employment centers, compatibility, quality of design, pedestrian and vehicular circulation, open space, and resource protection. The Planning Director shall prepare a report for the Applicant, DRO, ZC, or BCC, whichever is appropriate, making a determination of compliance with this Chapter, consistency with the Plan and recommend approval, approval with conditions, or denial of the request. [Ord. 2009-040]

F. **Affordability Requirements**
1. **Sales and Rental Prices of AHP Units**
   All AHP units shall be offered for sale or rent at an attainable housing cost for the targeted AHP income range (60 percent of AMI or below). The sale and rent prices will be based on the AMI, and the household income limits for PBC (West Palm Beach/Boca Raton metropolitan statistical area) as published annually by HUD and based on the annual Florida Housing Finance Corporation Multi-Family Rental Figures. [Ord. 2009-040]

2. **Master Covenant**
   Prior to Final DRO approval, the Applicant shall record in the public records of Palm Beach County a Covenant binding the entire project, in a form provided for by the County, which identifies each AHP unit. An extension of up to 6 additional months to record the Covenant may be requested only in order to secure government funding for the proposed development. [Ord. 2009-040]
   a. **For-Sale Units**
      The Covenant shall include but not be limited to restrictions requiring: that all identified AHP units shall be sold or resold only to an income-qualified purchaser at an attainable housing cost for the targeted AHP income range (60 percent of Area Median Income (AMI) or below). The sale prices will be based on the AMI and the household income limits for PBC (West Palm Beach/Boca Raton metropolitan statistical area) as published annually by HUD; that these restrictions remain in effect for 15 years recurring from the date of the Certificate of Occupancy for each unit; and that in the event a unit is resold before the 15-year period concludes, a new 15-year period shall take effect on the date of resale. The Covenant shall further provide monitoring and compliance requirements including but not limited those set forth below to ensure compliance with the AHP. Every deed for each AHP for-sale housing unit shall incorporate by reference the controlling Covenant. [Ord. 2009-040] [Ord. 2011-001]

   b. **Rental Units**
      The Covenant shall include but not be limited to restrictions requiring: that all identified AHP units shall be rented only to an income-qualified renter at an attainable housing cost for the targeted AHP income range (60 percent of AMI or below). The rental prices will be based on the AMI and the household income limits for PBC (West Palm Beach/Boca Raton metropolitan statistical area) as published annually by HUD and based on the annual Florida Housing Finance Corporation Multi-Family Rental Figures; that these restrictions remain in effect for a period of 30 years (non-recurring) from the date of occupancy of the first AHP unit; and that in the event a rental complex is resold before the 30 year period concludes, the new owner assumes the requirement for the number of remaining years; and the number of years remaining shall be determined by the Planning Director or his designee; and shall take effect on the date of resale. The Covenant shall further provide monitoring and compliance requirements including but not limited to those set forth below to ensure compliance with the AHP. Every deed for a rental development with AHP housing units and every rental agreement for each AHP unit shall incorporate by reference the controlling Covenant. [Ord. 2009-040] [Ord. 2011-001]

3. **Monitoring and Compliance**
   At the time of sale, resale, or rent of any AHP unit established pursuant to this program, the seller shall provide the County Administrator, or designee, documentation sufficient to demonstrate compliance with the AHP. Such documentation shall include but not be limited to information regarding the identity and income of all occupants of the AHP unit. The owner or lessee of the AHP unit shall submit to the County Administrator, or designee, on a form provided by the County, an annual report containing information and documentation to demonstrate continued compliance with the AHP and a copy of any
monitoring information provided to and received from the appropriate funding agency/source. The County may conduct site visits at reasonable times, or perform other independent investigation to verify continued compliance with the AHP. [Ord. 2009-040]

4. Enforcement
The County may enforce the requirements of the AHP through any cause of action available at law or equity, including but not limited to seeking specific performance, injunctive relief, rescission of any unauthorized sale or lease, and tolling of the 15-year term (for-sale units) or the 30-year term (rental units) of the AHP, or the term required by the funding agency/source if more restrictive. [Ord. 2009-040]

5. Compatibility
The resulting development shall be compatible with surrounding residential land uses, as described herein. [Ord. 2009-040]

G. Annual Report
The Executive Director of PZB shall submit an annual report to the BCC indicating the status of the AHP. [Ord. 2009-040]

Section 3 Transfer of Development of Rights (TDRs) – Special Density Program

A. Purpose and Intent
The purpose of this Chapter is to provide for a TDR Program, including the establishment of a TDR Bank, to facilitate both the protection of environmentally sensitive lands, the preservation of agriculture on lands designated as AGR on the FLUA, and to promote orderly growth in PBC. This is accomplished by allowing development rights to be severed from environmentally sensitive lands and lands designated as AGR and transferred to sites where additional development can be accommodated. The TDR program is designed to redistribute population densities, or development potential, to encourage the most appropriate and efficient use of resources, services, and facilities. Further, it is the purpose and intent of this Chapter to provide an alternative to the development of environmentally sensitive lands and lands designated as AGR on the FLUA by establishing a mechanism to seek economic relief from the limitation of development imposed on these lands. TDR can mitigate inequities in the valuation of land by providing a means of compensating landowners whose property is restricted, by permitting the sale of development rights, and making landowners in more intensively developed areas pay for the right to develop beyond the existing density, by purchasing development rights. The TDR Program allows a Property Owner to achieve a density bonus by purchasing the increase in density from the PBC TDR Bank, or from a Property Owner with land in a designated sending area, without going through the land use amendment process. In order to increase density, the site must meet the requirements to become a designated receiving area and follow the procedures as described in this Chapter. After development rights have been transferred from the sending area to the receiving area, an appropriate conservation easement or an agricultural conservation easement shall be attached to the sending area and recorded in the Public Records of PBC, restricting future development potential. [Ord. 2005-002] [Ord. 2008-003]

B. Authority
The BCC has the authority to adopt this pursuant to Art. VIII, § 1, Fla. Const., the PBC Charter, F.S. § 125.01 et seq., and F.S. § 163.3161 et seq.

C. Applicability
This Chapter shall apply to property in unincorporated PBC which is located within designated sending areas, as defined in Art. 5.G.3.F. Sending Areas. Development rights may be transferred from sending areas pursuant to the procedures contained in this Chapter, to property which meets the qualifications to receive such density according to Art. 5.G. Density Bonus Programs, and the standards contained herein. The use of TDR shall be allowed in all residential zoning districts within the U/S Tier and shall be approved pursuant to this Chapter. TDR units may be utilized for all housing types. Additionally, TDR units may be converted to CLF beds subject to the provisions of Art. 4.B.1.C.1, Congregate Living Facility (CLF), whereby the total approved density, including TDR units, is utilized when calculating permissible CLF occupants per Art. 4.B.1.C.1.d.3), Type 3 CLF.

D. Previous Approvals
All previously approved transfers of development rights, as long as they remain in force, shall remain valid and shall not be affected nor changed by subsequent revisions to the TDR Program.
E. Administration

1. General
Except as otherwise specified, the TDR Program shall be administered by the Executive Director of PZB or designee. [Ord. 2010-005]

2. Responsibilities
The Executive Director of PZB shall be responsible for:
   a. Establishing, administering, and promoting PBC’s TDR Program;
   b. Establishing and administering the TDR Bank;
   c. Ensuring the orderly and expeditious processing of TDR applications under this Chapter;
   d. Executing contracts for sale and purchase of TDR units being purchased from the County’s TDR Bank, including related escrow or similar bonding agreements, and TDR deeds as part of the DRO approval process; [Ord. 2010-005]
   e. Ensuring the Contracts for Sale and Purchase of Development Rights are executed and all deeds and conservation easements are filed in the Public Records of PBC;
   f. Ensuring that the Property Appraiser’s Office is notified of all TDRs;
   g. Ensuring that the densities approved through the TDR Program are placed on the FLUA as notations following approval of the TDR receiving area; and, [Ord. 2008-003]
   h. Ensuring that the FLUA is amended by a Staff-initiated Site Specific Plan amendment to reflect an appropriate land use designation for land acquired by PBC whose units are placed in the TDR Bank. [Ord. 2008-003]

F. Sending Areas

1. General
Sending areas represent those areas of PBC that are designated by the BCC to warrant protection. The owner of property in a designated sending area may transfer the development rights to a parcel of land in a designated receiving area, subject to the provisions of this Chapter.

2. Eligible Sending Areas
   a. Lands designated RR-20 on the FLUA;
   b. Lands designated as priority acquisition sites by the Environmentally Sensitive Lands Acquisition Selection Committee (ESLASC) or the Conservation Land Acquisition Selection Committee (CLASC) that meet the criteria listed below:
      1) Rarity in PBC of native ecosystems present on the environmentally sensitive lands site;
      2) Diversity of the native ecosystems present on the environmentally sensitive lands site; or,
      3) Presence of species listed as endangered, threatened, rare, or of special concern by the U.S. Fish and Wildlife Service, the Florida Fish and Wildlife Conservation Commission, the Florida Committee on Rare and Endangered Plants and Animals, or the Florida Department of Agriculture.
   c. Lands designated AGR on the FLUA;
   d. Privately-owned lands designated CON on the FLUA; and,
   e. Other sites determined by the BCC to be worthy of protection, provided that the sites:
      1) Further the purpose of the TDR Program in keeping with the criteria listed above; or
      2) Further other PBC Goals, Objectives and Policies. At such a time that the BCC determines that a parcel of land is environmentally sensitive, or preservation of the site is in the public interest, the parcel is eligible to become a sending area. The site shall be designated by Resolution of the BCC.

3. Overlap in Sending Areas
In such cases where a parcel of land is both a priority acquisition site and designated RR-20 or AGR on the FLUA, all provisions in this Chapter pertaining to the priority acquisition sites shall prevail.
4. Transfer Rate
The owner of land which is designated as a sending area may elect to transfer development rights as provided in this Chapter. Development rights may be transferred from sending areas according to the following schedule. For the purposes of this Subsection, acres means gross acreage.

a. Development rights may be transferred from property designated RR-20 on the FLUA at the rate of one development right per five acres. The minimum land area eligible for the TDR as a sending area shall be ten acres.

b. Development rights may be transferred from property designated AGR on the FLUA at the rate of one development right per one acre. The minimum land area eligible for the Transfer of Development Rights as a sending area shall be 20 acres unless the sending area parcel is located adjacent to other preserved properties, in which case the minimum land area shall be five acres.

c. Development rights may be transferred from priority acquisitions sites (both residential and non-residential) located outside of the U/S Tier at a transfer rate of one development right per five acres. The minimum land area eligible for the TDR as a sending area shall be five acres.

d. Development rights may be transferred from privately-owned lands designated CON on the FLUA at a rate of one development right per ten acres. The minimum land area eligible for the Transfer of Development Rights as a sending area shall be ten acres.

e. Development rights may be transferred from all environmentally sensitive sites described in Art. 5.G.3.F.2, Eligible Sending Areas, at a rate which equals the maximum density permitted by the Future Land Use designation for the property. The minimum land area eligible for the Transfer of Development Rights as a sending area shall be determined by the BCC, upon a recommendation from PZB and ERM.

5. Computation of Development Rights
The number of development rights assigned to a sending area parcel of land shall be determined by the Executive Director of PZB pursuant to Art. 5.G.3.F.2, Eligible Sending Areas, and Art. 5.G.2.J, TDR – Sending Area Procedure, as calculated below:

a. All development rights shall be in whole numbers, no fractions shall be permitted. Any fractional residential unit that may occur during calculations shall be converted upward, if one-half or more of a whole unit, or downward, if less than one-half of a whole unit, to the nearest whole unit.

b. The amount of development rights assigned to a sending area parcel shall be reduced by one dwelling unit for every conforming residential structure situated on the property at the time of approval.

6. Restriction on Future Use
Upon BCC or DRO approval of the TDR transfer, a conservation easement or agricultural conservation easement shall be recorded in the Public Records of PBC. The BCC or DRO shall determine which easement is appropriate for the sending area as part of the approval of the TDR transfer. Prior to recordation of the easement, a legally enforceable maintenance plan providing for perpetual maintenance of the sending area shall be established by the Property Owner and approved by ERM. No further Development Permit or Development Order for the designated receiving area shall be issued by PBC until the applicable easement is recorded in the Public Records of PBC. The easement shall restrict the use of the sending area in perpetuity. In particular, a conservation easement shall require that the sending area be maintained in its natural state while an agricultural conservation easement shall restrict the use of the sending area to Bona Fide Agriculture, fallow land, or uses permitted in the Conservation Water Resources Area (WRA) Future Land Use category; all other development rights of the subject property shall be considered transferred in perpetuity.

7. Existing Uses
Conforming residential dwelling units which existed prior to making application to transfer development rights shall be permitted to remain as legal conforming uses. All other existing uses on the sending area shall cease.

8. Remaining Land Area
If all of the development rights assigned to a sending area are not transferred off the site, the remaining land, if proposed for development, shall be developed in accordance with this Code and in a manner which is compatible with the surrounding area. This provision shall not apply to sending areas designated AGR on the FLUA; these parcels are required to transfer all development rights off the site. If the owner of land in a sending area only transfers a portion of the development rights available for the property, PBC, upon a recommendation from PZB and ERM, reserves the right to determine which portion of the land is subject to the applicable conservation easement. The intent is to link environmentally sensitive land, to link agricultural land, and to link open space areas, when feasible, and allow compatible development to occur on the remainder of such sites.
G. Transfer of Development Rights (TDRs) Bank

1. General
   The purpose of this Chapter is to authorize the establishment of a TDR Bank. The TDR Bank is hereby created in order to, among other things, facilitate the Purchase and Transfer of Development Rights as hereinafter provided and maintain an inventory of those development rights purchased by PBC.

2. Establishment of Development Rights for the Bank
   Development rights for the TDR Bank shall be generated from environmentally sensitive lands purchased by PBC, including the priority acquisition sites meeting the criteria in Article 5, Eligible Sending Areas, through August 30, 1999. Priority acquisition sites in the unincorporated area of PBC which are not purchased as part of the acquisition program shall maintain the opportunity to transfer development rights on the private market. The TDR Bank shall be maintained by the Executive Director of PZB and shall be reviewed in accordance with the FLUE of the Plan to determine the need for additional units.

   Development rights in the TDR Bank generated under the TDR Program shall remain in the TDR Bank until sold by PBC, the TDR Bank is dissolved, or the units are otherwise disposed of.

3. Transfer Rate from the Purchase of Environmentally Sensitive Lands
   a. Land Purchased inside the U/S Tier
      The number of development rights within the bank shall equal the maximum density allowed by the FLU designation as established by the applicable PBC or municipal Comprehensive Plan.
   b. Land Purchased Outside the U/S Tier
      The number of development rights severed, or generated for the bank, shall equal the TDR transfer rate established in Article 5.G.3.F., Sending Areas.

4. The Application, Sale, and Value of Development Rights
   PBC may sell development rights to Property Owners who meet the receiving area criteria pursuant to this Chapter.
   a. A Property Owner seeking an increase in density must apply to become a receiving area and submit a draft Contract for Sale and Purchase of Development Rights. [Ord. 2011-001]
   b. The value and price of a development right shall be set annually by the BCC. No TDR price or price reduction other than those included in this Section shall be permitted. The County shall utilize the median sales price data established by the Realtors Association of the Palm Beaches, using data for the month of March to set the price each year: [Ord. 2011-001] [Ord. 2012-027]
      1) For Single Family units (Single Family, Zero Lot Line, and Townhouse) the price shall be ten percent of the median sales price of FRA Single Family existing homes data. [Ord. 2011-001]
      2) For Multifamily units the price shall be ten percent of the median sales price of FRA existing condominiums data. [Ord. 2011-001]
   c. For proposals including a mix of Single Family and Multifamily units the TDR units shall proportionally reflect the unit mix of the non-TDR units. [Ord. 2011-001]
   d. Additional prices for TDR units shall be as follows: [Ord. 2011-001]
      1) For TDR units located within an area that has a BCC accepted Neighborhood Plan, and the proposed density increase is identified within or supported by the Neighborhood Plan, the TDR price shall be 75 percent of full TDR price as established in Article 5.G.3.G.4.b.1) and 2) above; [Ord. 2011-001] [Ord. 2012-003]
      2) For TDR units located within a CCRT area the TDR price shall be 25 percent of full TDR price as established in Article 5.G.3.G.4.b.1) and 2) above; [Ord. 2011-001]
      3) Workforce Housing TDR units shall be five percent of full TDR price as established in Article 5.G.3.G.4.b.1) and 2) above; and, [Ord. 2011-001]
      4) Affordable Housing TDR units shall be one percent of full TDR price as established in Article 5.G.3.G.4.b.1) and 2) above. The dollar difference between the TDR price and the Affordable Housing TDR price can be used as a price waiver to be counted as part of the local government contribution for housing funding application purposes. [Ord. 2011-001]
   e. Applicants may request Workforce Housing TDR units at greater than the required percentage (34 percent), however in order to receive the Workforce Housing TDR price, those additional Workforce Housing TDR units (greater than 35 percent) must be priced for WHP Low-Income (60 to 80 percent of AMI) households only. [Ord. 2011-001] [Ord. 2019-033]

5. Revenue from the Sale of TDRs
   The revenue generated from the sale of development rights from the TDR Bank shall be allocated to the Natural Areas Fund administered by ERM for acquisition and management of environmentally sensitive lands and wetlands.
H. TDR Receiving Areas
Development rights shall only be transferred to those parcels which meet the qualifications for designation as receiving areas.

1. Eligible Receiving Areas
   a. PDDs and TDDs. The total density of the project, including the TDR units, shall be utilized for calculating the minimum PDD or TDD acreage threshold; and
   b. Residential Subdivisions which are not within a PDD or TDD.

2. Qualify as a Receiving Area
   a. Be located within the U/S Tier; [Ord. 2004-040] [Ord. 2008-003]
   b. Be compatible with surrounding land uses and consistent with the Plan;
   c. Meet all concurrency requirements;
   d. Meet all requirements as outlined in this Code; and,
   e. Be compatible with adjacent environmentally sensitive lands.

3. Compatibility with Adjacent Environmentally Sensitive Lands
A receiving area shall not degrade adjacent environmentally sensitive lands. Receiving areas, therefore, shall reduce the intensity/density of that portion of the development which is contiguous to any regionally significant natural resource as defined by the Treasure Coast Regional Planning Council, environmentally sensitive land as defined by the ESLASC or CLASC, or sites designated as preserve areas according to Art. 14.C, Vegetation Preservation and Protection, so that the development is compatible with, and does not negatively impact the environmentally sensitive area, by providing a buffer zone of native vegetation according to the following Table.

<table>
<thead>
<tr>
<th>Density of Adjacent Pod/Development Area</th>
<th>Required Buffer Zone of Native Vegetation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Net Density Less Than or Equal to 3 Units per Acre</td>
<td>50-foot buffer</td>
</tr>
<tr>
<td>Net Density Greater Than 3 and Less Than or Equal to 5 Units per Acre</td>
<td>100-foot buffer</td>
</tr>
<tr>
<td>Net Density Greater Than 5 Units per Acre</td>
<td>200-foot buffer</td>
</tr>
</tbody>
</table>

4. Applicability – TDR Increased Buffer and Setbacks for LR-1, LR-2, and LR-3 PDD
   The perimeter buffer and building setbacks for a TDR receiving area in a PDD with an LR-1, LR-2, or LR-3 FLU designation shall be upgraded where ZLL, TH, MFD, or SFD using RS PDRs are located within 125 feet of any SFD with a lot size of 14,000 square feet or greater, or any vacant parcels with an LR-1, LR-2, or LR-3 FLU designation. [Ord. 2008-037]
   a. Increased Buffer Widths
      Where applicable, the perimeter buffer shall be increased by 15 feet for projects having ZLL or SFD units, and 20 feet for TH and MFD units. [Ord. 2008-037]
   b. Upgraded Landscaping
      Where an increased buffer width is required, an additional native palm or tree shall be provided for each 30 linear feet, with a maximum spacing of 90 feet between clusters. [Ord. 2005-002] [Ord. 2008-037]
   c. Increased Setbacks
      Where applicable, when a development has a more intense housing classification, an additional ten-foot rear setback shall be required. For the purposes of this Section, housing classification shall be ordered from least intense to most intense, as indicated in Table 5.G.3.H, Housing Classification. [Ord. 2005-002] [Ord. 2008-037]

<table>
<thead>
<tr>
<th>Intensity by Group</th>
<th>Housing Type</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 – Low</td>
<td>Single Family residential (RT PDRs); or Zero Lot Line homes.</td>
</tr>
<tr>
<td>2 – Medium</td>
<td>Single Family residential (RS PDRs); Mobile Homes; Townhouses; or, Multifamily.</td>
</tr>
<tr>
<td>3 – High</td>
<td>Type 2 or 3 Congregate Living Facilities</td>
</tr>
</tbody>
</table>

[Ord. 2005-002] [Ord. 2008-037]
5. Prohibitions
Under no circumstances shall a receiving area contain a sending area as defined in Art. 5.G.3.F.2, Eligible Sending Areas. This shall not apply if the project is providing all of the units at prices attainable by persons making between 30 to 120 percent of AMI. The County shall establish the actual prices for each unit and each unit shall be deed restricted consistent with Art. 5.G.2.F, Affordability Requirements. [Ord. 2008-003]

I. TDR Density Bonus Limitations

1. WHP 34-Percent Requirement
In accordance with FLUE Policy 2.4-a.5 of the Plan, 34 percent of all TDR density bonus units shall be provided as WHP units. These units shall be constructed on site; comply with the affordability range requirements of this Chapter; and, Art. 5.G.1.A.1.3.h, Design Standards. The project shall only be eligible to apply for the following WHP incentives: Art. 5.G.1.B.2.f.1), Traffic Performance Standards Mitigation; Art. 5.G.1.B.2.f.2), Expedited Review; and, Art. 5.G.1.B.2.f.3), Flexibility in Property Development Regulations. [Ord. 2008-003] [Ord. 2011-001] [Ord. 2019-033]

2. AHP 100-Percent Requirement
When using the voluntary AHP, all TDR density bonus units shall be provided as AHP units. These AHP units shall be constructed on site; comply with the affordability range requirements of Table 5.G.2.B, Affordable Housing Program and Art. 5.G.2.F, Affordability Requirements; and, Art. 5.G.2.C, Design Requirements. The project shall only be eligible to apply for the following AHP incentives: Art. 5.G.2.D.2, Traffic Performance Standards Mitigation; Art. 5.G.2.D.3, Expedited Review; and, Art. 5.G.2.D.4, Density Bonus Development Options. [Ord. 2009-040]

3. WHP and AHP Units
Consideration may be given to developments requesting both WHP and AHP units within the proposal. In this instance, the Planning Director or designee will determine which program’s (WHP or AHP) density bonus criteria will be utilized based on the programmatic requirements imposed by a governmental agency providing affordable housing funding or another entity with programmatic requirements (e.g., Habitat for Humanity or a Community Land Trust). [Ord. 2009-040]

4. Permitted Density Ranges
The maximum number of development rights which may be transferred to the receiving parcel shall be determined in accordance with Art. 5.G.3.H, TDR Receiving Areas, Art. 5.G.3.K, TDR – Receiving Area Procedure, and the following: [Ord. 2008-003]

a. Standard Density Bonus
Approved receiving areas may receive a bonus density as follows: [Ord. 2008-003] [Ord. 2008-037]
1) Receiving areas in the U/S Tier west of Florida’s Turnpike: up to two dwelling units per acre; [Ord. 2008-003]
2) Receiving areas in the U/S Tier east of Florida’s Turnpike, but not in a Revitalization and Redevelopment and Infill Overlay: up to three dwelling units per acre; [Ord. 2008-003] [Ord. 2009-040]
3) Receiving areas in a Revitalization Redevelopment and Infill Overlay: up to four dwelling units per acre; or, [Ord. 2008-003] [Ord. 2009-040]
4) The bonus density may be less than the total bonus density indicated in paragraphs 1), 2), and 3) above when an additional WHP or AHP density bonus has also been utilized. (See paragraph d. below). [Ord. 2009-040]

b. Additional Density Bonus
Receiving areas meeting one or both of the following criteria shall be eligible for an additional one dwelling units per acre density bonus above the aforementioned density bonus ranges. [Ord. 2008-003] [Ord. 2008-037]
1) Receiving areas within one-fourth mile radius of a public park, (excluding golf courses), community commercial facility or mass transit facility within the U/S Tier; and [Ord. 2008-003] [Ord. 2009-040]
2) Receiving areas within one-fourth mile radius of a regional commercial facility or a major industrial facility within the U/S Tier. [Ord. 2008-003]

In order to be eligible for the additional one dwelling unit per acre density bonus, at least 25 percent of the receiving area must be located within the required radius. The density bonus shall apply to the entire receiving area. [Ord. 2008-003]

c. LR-1, 2, and 3 FLU Density Limitation
To mitigate any potential adverse impacts in low-density residential neighborhoods (as determined by residential FLU designation), the maximum TDR density bonus in the LR-1, LR-2, and LR-3 FLU
designations shall not exceed 100 percent of the standard or maximum density, exclusive of any other density bonus allowed on the subject site. Exceptions shall be permitted for any project that is located in the URA or entirely surrounded by one or more of the following: [Ord. 2008-037]

1) Parcels with an MR-5 or higher FLU designation; [Ord. 2008-037]
2) Parcels with a non-residential FLU designation or use; [Ord. 2008-037]
3) Open space 100 feet in width or greater; or, [Ord. 2008-037]
4) A major street. [Ord. 2008-037]

A development's WHP or AHP density bonus increase will be given consideration when assigning the number of TDR units recommended to the development. Other factors to be considered include: the location of the proposed development and its relationship to the study area; the housing type(s) proposed; if the development site is located within one-fourth mile radius of a public park (neighborhood or regional park, not a golf course); civic uses (schools/libraries); a mass transit facility; child care facilities; medical facilities; a supermarket; a community commercial facility; employment opportunities; and within one-half mile radius of social services; a regional commercial facility; an industrial facility; additional civic uses and employment opportunities. [Ord. 2009-040]

J. TDR – Sending Area Procedure

1. Sending Parcel Application
The Property Owner of lands which are designated sending areas as defined under Art. 5.G.2.F.2, Eligible Sending Areas, must make application to PZB for an administrative determination in order to be formally designated as a sending area. The purpose of this administrative determination is to ascertain the exact number of development rights the Property Owner is entitled to. The application shall include, at a minimum:
   a. Proof of ownership;
   b. A legal description of the property; and,
   c. Contract, or option, for the purchase and sale of development rights (unless requesting a TDR Certificate, as outlined in Art. 5.G.3.J.6, Development Rights Certificates). The application shall be submitted to the Executive Director of PZB. Applications for a sending area designation may be accepted for review and processing at any time.

2. Review Process
   a. Environmentally Sensitive Lands and Lands Designated RR-20 or CON on the FLUA
      Prior to the first scheduled DRO meeting to consider the TDR application, the Executive Director of PZB shall review the sending area application and make a determination regarding the number of units associated with the parcel. As part of review of the application, the Executive Director of PZB shall notify ERM of the application and request that a site check be conducted. ERM shall complete a site check to ensure that the site has not been altered and the site meets the criteria provided in Art. 5.G.3.F.2, Eligible Sending Areas. ERM shall complete a written recommendation to the Executive Director of PZB regarding the site.

   b. Land Designated AGR on the FLUA
      Prior to the first scheduled DRO meeting to consider the TDR application, the Executive Director of PZB shall review the sending area application and make a determination regarding the number of units associated with the parcel. As part of review of the application, the Executive Director of PZB shall complete a site check to ensure that the site is suitable for Bona Fide Agriculture or other open space purposes consistent with the AGR provisions in the Plan. Sending area applications which are not submitted in conjunction with a receiving area application shall be reviewed and acted upon within 25 days.

3. Written Determination
   The Property Owner shall receive a written determination from the Executive Director of PZB indicating how many development rights can be transferred from the property. The number of development rights for the site shall be documented and be kept on file in the PZB Department. The written document shall be valid for a period of 12 months. If any modifications or alterations are made to the property during the 12-month period, the Property Owner shall not be permitted to participate in the TDR Program.

4. Easement Agreement/Restriction
   Prior to site plan certification, the applicable conservation easement, in a form and content acceptable to the County Attorney shall be recorded in the public records of PBC. The easement shall restrict future use of the land consistent with the requirements in Art. 5.G.3.F.6, Restriction on Future Use. Prior to recordation of the easement, a legally enforceable Maintenance Plan providing for perpetual maintenance of the sending area shall be established by the Property Owner and approved by ERM.
5. **Re-Submittal of Application**
   The owner of a sending parcel may re-apply until all development rights have been severed from the property.

6. **Development Rights Certificates**
   Environmentally sensitive lands and lands designated as CON or RR-20 on the FLUA must be deeded to, and accepted by PBC, subject to the discretion of the BCC, before the Certificate can be issued. Environmentally sensitive lands and lands designated as CON or RR-20 on the FLUA deeded to, and accepted by PBC, shall be managed by PBC or its designee. AGR lands shall be managed by the Property Owner in perpetuity as provided in the Maintenance Plan.
   a. **Eligibility**
      Development Rights Certificates shall only be issued to Property Owners of ESL or RR-20 land that deed without compensation environmentally sensitive land to PBC or Property Owners of AGR land that record an agricultural conservation easement, and follow the procedures in this Chapter. The Development Rights Certificate shall require that restrictions be placed on the sending area prior to the sale of those development rights. A minimum transfer of five acres is required.
   b. **Issuance of the Certificate**
      Upon completion of the application process, and recordation of the deed transferring ownership of the property to PBC, or recordation of the agricultural conservation easement and approval by RM of a legally enforceable maintenance plan providing for perpetual maintenance of the sending area, the Property Owner shall be issued a Development Rights Certificate. The Certificate shall indicate the exact number of development rights which can be sold, transferred, or traded, by the holder of such Certificate. The Certificate shall remain in effect until applied to a TDR receiving area in accordance with provisions of this Chapter.
   c. **Unused Certificates**
      A Property Owner of AGR land, with an agricultural conservation easement recorded, may reassocciate development rights to the original sending parcel provided that no development rights have been sold. A written request to reassocciate the development rights shall be submitted to the Executive Director of PZB along with proof of ownership and a legal description of the property. Prior to approval of a request to the reassocciate development rights, the Applicant must petition and receive BCC approval to release the easement recorded against the sending area parcel.

7. **Limitations**
   The amount of development rights assigned to a sending area parcel, or indicated on a certificate, shall be reduced by one for every conforming residential structure situated on the property at the time of application.

K. **TDR – Receiving Area Procedure**
   1. **General**
      Receiving areas shall be approved concurrent with issuance of a Development Order for a PDD, TDD, or a residential subdivision. The following procedures shall be followed in order to become a receiving area to obtain the density bonus. [Ord. 2005-002] [Ord. 2010-005]
   2. **Pre-Application Conference**
      Prior to submittal of an application requesting a receiving area density bonus, the Applicant must attend a pre-application conference with the appropriate PZB staff, pursuant to Art. 2.A.5, Pre-Application Conference (PAC) or Pre-Application Appointment (PAA), to review the proposed development, and the requirements and procedures of the TDR Program.
   3. **Review Process**
      The review process for TDR applications is based upon the density and type of residential development proposed.
      a. The transfer of two units per acre or less to a residential subdivision is reviewed by the DRO and shall be subject to the provisions of Art. 2.C, Administrative Processes, except as provided below. Parcels which meet the minimum acreage thresholds for a PDDs or TDD shall not utilize this Chapter option;
      b. The transfer of more than two units per acre to a residential subdivision is reviewed as a Class A conditional use and shall be subject to the provisions of Art. 2.B, Public Hearing Processes, except as provided below. Parcels which meet the minimum acreage thresholds for a PDDs or TDD are allowed to utilize the option contained in this paragraph, provided the parcel meets the PDDs PDRs contained in Art. 3.E, Planned Development Districts (PDDs), or contained in Art. 3.F, Traditional Development Districts (TDDs);
      c. The transfer of any density to a planned development is reviewed as a Conditional Use and shall be subject to the provisions of Art. 3.E, Planned Development Districts (PDDs). A general
application by a Property Owner for receiving area status and a density bonus shall be accepted for review and processing; and, [Ord. 2005-002] [Ord. 2010-005] [Ord. 2017-007]
d. BCC approval is required for any project that is requesting a combined density increase/transfer through the WHP and TDR programs that exceeds two units per acre. [Ord. 2005-041]

4. Contents of Application
In conjunction with the general application for a Rezoning, Development Order Amendment, or Development Review Officer approval, an Applicant for receiving area status and a density bonus must submit a supplemental TDR Application. The application shall: [Ord. 2011-001]
a. be submitted in a form established by the Zoning Director of PZB; [Ord. 2011-001]
b. submit a Preliminary Plan; and, [Ord. 2011-001]
c. submit Preliminary Architectural Elevations for TDR applications that exceed DRO thresholds prior to certification of the application for public hearing pursuant to Art. 5.C.1.B, Threshold. Elevations shall not be required for Single Family dwellings or Multifamily dwellings less than 16 units as they are exempt from the provisions of Art. 5.C, Design Standards. However, the Applicant shall ensure these units are architecturally compatible with the other units in the development by using consistent colors, materials, layouts, etc. [Ord. 2011-001]

5. Standards
In addition to fulfilling the requirements of Art. 5.G.3.H, TDR Receiving Areas, to qualify as a receiving area and be eligible for an increase in density, all applications requesting receiving area designation shall comply with these standards:
a. The Transfer of Development Rights is by deed, and the deed shall be recorded before Final Site Plan approval;
b. The transfer is to a parcel of land which meets all the requirements of this Code and within which the transferred densities have been included and amended;
c. The proposed development meets all concurrency requirements at the level of impact calculated to include the TDR density;
d. If the transfer is between two private parties, at the time the transfer is approved, the sending area from which the transfer will occur shall be subject to a conservation easement and shall be identified on the Zoning Map. Pending recording of the conservation easement, no Development Order approvals shall be issued for the sending area or receiving area; [Ord. 2010-022]
e. If the transfer of rights is from the PBC TDR Bank, all rights have been accounted for and there are enough development rights in the bank to cover the project;
f. The proposed development and density are compatible with the surrounding area and land use; and,
g. The proposed development and density do not negatively impact adjacent environmentally sensitive lands.

6. Contract for Sale and Purchase of Development Rights
A Contract for Sale and Purchase of Development Rights is required. A deed of TDR shall also be required as part of the approval of a TDR transfer. The contract shall be executed prior to Final DRO approval of a TDR receiving area. 100 percent of the funds must be received by PBC prior to subdivision approval or issuance of first Building Permit, whichever occurs first. The deed must be recorded before issuance of the first Building Permit for a project designated as a receiving area. This paragraph shall not apply to Building Permits for sales models or temporary real estate sales and management offices permitted pursuant to this Code. [Ord. 2009-040] [Ord. 2011-001]

L. Notification to Property Appraiser’s Office
Upon recordation of the deed of transfer, the Executive Director of PZB shall notify, within 20 days, the Property Appraiser’s Office in writing that development rights have been transferred from the sending area or TDR Bank to the receiving area in perpetuity.

M. County Initiated Land Use Amendment
Following recording of the deed, the Planning Division, upon direction from the BCC, shall initiate a Site Specific Plan Amendment to designate the property with a CON designation or place a notation which reflects the use of the property as an Agricultural Reserve Preservation Area (AGR/P). Densities obtained through the TDR Program shall be placed on the FLUA as notations following approval of the TDR receiving area.

N. Overall Accounting System for TDR Density
PZB shall maintain an overall accounting system for monitoring density availability and density transfers in the TDR Program. The accounting system shall include both private development rights and development rights in PBC’s TDR Bank.
Density needed for the TDR Program may be derived from different sources including, but not limited to:
1. **Density Reduction**
   Approved Site Specific Plan Amendments since 1990 which resulted in a density reduction; and,

2. **PUD Unused Density**
   At such a time that the TDR Program, any subsequent density bonus programs, or amendments to the Plan requesting an increase in density, deplete the number of units available from previous amendments, PZB shall begin to monitor the PUD units which have been approved through the zoning process, but which have remained unused. The later units may at that time be considered as a source for density for the TDR Program.

### CHAPTER H MASS TRANSIT STANDARDS

#### Section 1 General

**A. Authority**
The Executive Director of Palm Tran shall be responsible for implementing, applying, interpreting, and modifying the standards of this Chapter. [Ord. 2008-003]

**B. Purpose and Intent**
The purpose and intent of this Chapter is to ensure adequate, and consistent mass transit infrastructure/facilities are available to accommodate development concurrent with their associated impacts. The specific objectives of this Chapter are as follows: [Ord. 2008-003]

2. Provide Mass Transit infrastructure/facilities in accordance with the objectives of the Transportation Element of the Plan. [Ord. 2008-003]
3. Ensure that necessary Mass Transit infrastructure/facilities will be provided concurrently with development. [Ord. 2008-003]

#### Section 2 Applicability and Standards

The standards of this Chapter shall apply to all residential and non-residential development or redevelopment in unincorporated PBC, as follows: [Ord. 2008-003]

**A. Modifications to Previous Approvals**
Modifications to previous approvals shall comply with this Chapter for un-built projects without an approved DRO plan, or to the greatest extent possible in the affected area without the loss of density, intensity or parking, for unbuilt projects with a DRO approved plan, built projects that have constructed less than 80 percent of approved density or intensity, structural renovations in excess of 75 percent or more of the current Improvement Value of the structure, and parking lot alternations or additions. [Ord. 2008-003] [Ord. 2013-001]

**B. Thresholds and Standards**
For the purposes of this Chapter, non-residential development shall be defined as all commercial, civic/public, recreation, and industrial uses that are open to the public. Unmanned or minimal commuter generating facilities, such as Commercial Communication Towers or Electric Transmission Substation, or as determined by Palm Tran shall be excluded from this definition. Where applicable, the requirements of this Chapter shall be approved by Palm Tran and shown on all Preliminary Development Plans, Preliminary Subdivision Plans, Preliminary Site Plans, Final Master Plans, Final Subdivision Plans and Final Site Plans, prior to DRO certification or approval. Palm Tran Transit Design Manual provides an understanding of transit operating criteria and, access requirements (www.pbcgov.com/palmtran/library). Section 810 of the ADA and ABA Accessibility Guidelines provides curbside ADA requirements for Transportation Facilities (www.access-board.gov/ada-aba/final.htm). FDOT Transit Facilities Guidelines provides more detail requirements for the location of transit infrastructure (www.dot.state.fl.us/transit/Pages/TRANSIT%20Facilities%20GUIDELINES.PDF). [Ord. 2008-003] [Ord. 2017-007]
1. **All Residential Developments of at Least 50 Units and All Non-Residential of at Least Five Acres or 50,000 Square Feet**

   All development exceeding this threshold shall provide a minimum 10-foot by 30-foot easement for Bus Stop Boarding and Alighting Area(s) spaced no less than 0.1 miles along all public R-O-W, or at intersections or recognizable landmarks. Easements shall be dedicated by plat in accordance with Art. 5.H.2, Applicability and Standards. [Ord. 2008-003]
a. Standards
The following types of bus stop and alighting areas may be used to meet the requirements of this Section. [Ord. 2008-003]

1) Near Side
Near Side Bus Stops are located immediately before an intersection. Associated Bus Stop Boarding and Alighting Areas are located before the intersection, no closer than 5-feet from the corner clip. The bus stop zone requires a minimum 100-foot no parking zone. The length of the Bus Stop Zone shall be increased by 50-feet in length for each additional bus expected to stop simultaneously. [Ord. 2008-003]

2) Far Side
Far Side Bus Stops are located immediately after an intersection. Associated Bus Stop Boarding and Alighting Areas are located after the intersection, no closer than 15-feet from the corner clip. The bus stop zone requires a minimum 90-foot no parking zone for a single bus. This is also applicable to far side bus stops after a turn. The length of the Bus Stop Zone shall be increased by 50-feet in length for each additional bus expected to stop simultaneously. [Ord. 2008-003]

3) Mid-Block/Landmark
Mid-Block/Landmark Bus Stops are located between intersections where distance or other restrictions limit intersection placement. Associated Bus Stop Boarding and Alighting Areas are located at landmarks that take advantage of perpendicular Wheel Chair Accessible Routes into the development. The bus stop zone requires a minimum 150-foot no parking zone. The length of the Bus Stop Zone shall be increased by 50-feet in length for each additional bus expected to stop simultaneously. [Ord. 2008-003]

b. Additional Site Specific Requirements
Where applicable additional street side infrastructure (bus bays, bulb outs, exclusive transit treatments) and curbside infrastructure (to meet ADA and other requirements) shall be specified by Palm Tran and shall be required at major intersections and mass transit traffic generators. [Ord. 2008-003]

Figure 5.H.2.B – Bus Bay with Typical Bus Shelter Alignment
2. Non-Residential Developments of 100,000 Square Feet or More
In addition to the above requirements, all non-residential development of 100,000 square feet or more shall provide a Mass Transit Circulation Plan prior to final DRO approval. Mass Transit Circulation Plans apply to an area inside a development designated for internal Mass Transit circulation, bus stop(s), bus access, bus recovery, and any or all of the above Mass Transit Infrastructure/Facilities on or adjacent to the development. Bus access or bus stops should include, at a minimum, provisions for a covered or sheltered bus boarding and alighting, continuous paved pedestrian and bicycle access from the bus stop to the use(s) it is intended to serve, and bicycle rack. Bus recovery area should accommodate all bus routes within a six to eight-mile radius including a 25-percent growth ratio factor. [Ord. 2008-003]

3. Development of Regional Impact (DRI)
In addition to the above requirements, an Intermodal Transfer Center requirement to promote public transportation shall be applicable to DRI projects. Prior to Final DRO approval, the Property Owner shall consult with Palm Tran to ensure a suitable Intermodal Transfer Center is provided on the Master Site Plan. In addition, provisions shall be made to fund any necessary improvements to accommodate Palm Tran specifications for the following:

a. When Design Guidelines are provided, the Property Owner shall describe the optimal characteristics of a fixed route transit (Palm Tran) and community based (shuttle/trolley) circulator system to include: [Ord. 2008-003]
   1) Bus stops with unrestricted pedestrian access within ¼ mile of all structures. [Ord. 2008-003]
   2) Community circulator service for movement within the site and interconnected with the fixed-route service and the Intermodal Transfer Center. [Ord. 2008-003]
   3) The location (spacing every one-tenth mile), timing, size, and appearance of bus stops and stations as well as details facilitating integration of bus stops with adjacent development. [Ord. 2008-003]

b. Construction of an Intermodal Transfer Center (typically two to three acres) shall commence with the first Building Permit and shall include, at a minimum, the following: [Ord. 2008-003]
   1) Park-N-Ride (typically 100-car capacity, convenient and adjacent commuter parking). [Ord. 2008-003]
   2) Accommodation for fixed route transit and community based circulator service for intermodal connections to include bus bays and access to major roadway(s). [Ord. 2008-003]
   3) Convenient and adjacent public restrooms (in accordance with Florida Building Code, Plumbing Sections 403.1 and 403.6, and Table 403.1.A-3). [Ord. 2008-003]
   4) Transit shelters (minimum 50 commuter accommodation). [Ord. 2008-003]
5) Kiosks for mass transit schedule information. [Ord. 2008-003]
6) Trash receptacles. [Ord. 2008-003]
7) Lighting. [Ord. 2008-003]
8) Bicycle storage. [Ord. 2008-003]
9) Other seating and related infrastructure. [Ord. 2008-003]
10) Adjacent newspaper and other vending facilities that no not impede commuter movements and connections. [Ord. 2008-003]

Section 3 Site Plan and Plat Dedication Language

A. Site Plan Language
All site plans meeting or exceeding the minimum thresholds identified in Section 2.C. above shall include the following language: [Ord. 2008-003]
1. Bus Stop Boarding and Alighting Area(s)
   "Proposed 10’x30’ Palm Tran Bus Stop Boarding & Alighting Area Easement" with arrow to designated area measuring 10 feet inside and perpendicular to the property line and 30-foot parallel and along the property line. [Ord. 2008-003]
2. Mass Transit Circulation Plan
   "Proposed Mass Transit Circulation Route" with arrow to the designated route identified by a dashed line "Palm Tran may exercise the right of Mass Transit Circulation, Bus Access, and or Bus Stops on or adjacent to major ingress/egress and building entrances" should also appear on the site plan. [Ord. 2008-003]

B. Plat Dedication Language
Prior to plat recordation or issuance of the first Building Permit, whichever occurs first, the Property Owner shall convey and/or dedicate to Palm Beach County an easement for Bus Stop Boarding and Alighting Area(s) in a form with terms and conditions approved by Palm Tran. Supporting documentation, shall include but not be limited to, a location sketch, legal description, affidavit of ownership, attorney title opinion and other related documents as deemed necessary by Palm Tran. All recorded plats meeting or exceeding the minimum thresholds identified in Section 1.C. above shall include the following language: The Mass Transit Easement as shown hereon is dedicated in perpetuity, by Owner, to the Board of County Commissioners of Palm Beach County, its successors and assigns (hereafter "County"), for the construction, installation, maintenance and use of a public transit boarding and alighting area, which use includes but is not limited to a public transit bus shelter, transfer station, and advertising. The Owner, its successors and assigns (hereafter "Owner"), shall maintain the easement area until such time as the County constructs improvements in the easement area for its intended use and purposes, at which time the County will assume maintenance of the easement area so long as the improvements are located thereon and County uses the easement area for its intended purposes. The maintenance obligation shall automatically revert to the Owner upon County’s temporary or permanent cessation of use of the improvements or removal of the improvements. [Ord. 2008-003]

C. Easement Language (If Dedicating as a Separate Document)
Standard Easement document language has been developed by PBC Attorney’s Office. Required supporting documentation includes an original signed and sealed legal description of the Bus Stop Boarding and Alighting Area consistent with the State of Florida Technical Standards for surveys and legal descriptions; an Opinion of Counsel letter from the Grantor’s legal counsel certifying title and authority; and an Affidavit of Managing Member of Limited Liability Company. Other supporting documentation may be required. [Ord. 2008-003]

D. Property Owned by Palm Beach County
All mass transit infrastructure/facilities shall be located, referenced and established in a form and manner that is mutually agreeable to Palm Tran and the applicable Palm Beach County Department(s). [Ord. 2008-037]

CHAPTER I MURALS

Section 1 Purpose and Intent
The purpose of this Chapter is to establish standards, and review and approval procedures for murals. Murals are intended to contribute to and advance: streetscape aesthetics; architectural features or character of a building; a unique identity; sense of place; civic pride; community interaction; or, the preservation of local history or culture. [Ord. 2013-021]
Section 2  Restrictions on Placement

A. Non-Residential Buildings and Structures
Murals shall be limited to non-residential buildings or structures supporting commercial, industrial, civic, recreation, cultural, or utility uses, as identified in the Use Matrices in Art. 4.B, Use Classification. [Ord. 2013-021]

B. Adjacent to Interstate Highways
Murals in the vicinity of any Interstate highways shall comply with the Federal Highway Beautification Act as implemented through Chapter 14-10, F.A.C., as amended. [Ord. 2013-021]

C. Adjacent to Residential
Murals shall not be located on a mural surface within 200 feet of any property line adjacent to a parcel with a residential use, district, or FLU designation, unless:
1. oriented so it cannot be seen from an adjacent residential parcel; [Ord. 2013-021]
2. the adjacent parcel supports non-residential uses; [Ord. 2013-021]
3. separated by a Collector or Arterial Street; or, [Ord. 2013-021]
4. separated from view by a building, structure, or Incompatibility Buffer. [Ord. 2013-021]

Section 3  Application Procedures

A. General
No murals may be placed on any buildings or structures unless in compliance with this Chapter, and approved by the County Administrator. [Ord. 2013-021]

B. Application Requirements
An application form and requirements shall be specified by the County Administrator, and shall include, but not be limited to, the following: [Ord. 2013-021]
1. Scale drawing depicting the proposed mural, including color and materials. [Ord. 2013-021]
2. A scale drawing of the site depicting which building or structure elevation(s) will act as the mural surface(s). [Ord. 2013-021]
3. A detailed written and graphic description of the method which will be used to securely affix the mural to the mural surface, including any drawings or specifications deemed necessary by the Building Official, or designee. [Ord. 2013-021]
   a. authorizing the placement of the mural on the building or structure; and, [Ord. 2013-021]
   b. stating that the owner of the property will maintain, repair or remove the mural if deemed necessary, in the event the artist fails to complete the installation of the mural, or due to deterioration or damage to the mural. [Ord. 2013-021]
5. A proposed timeline for completion of the mural, upon approval of a mural application (not to exceed six months). [Ord. 2013-021]

C. Review
Mural applications shall be reviewed in accordance with procedures established in the Public Art Committee Resolution No. R-2010-2092, as amended, and the following: [Ord. 2013-021]
1. Unless determined to be insufficient, within ten days of accepting a mural application, the Building Division shall forward to FDO for review by the Public Art Committee. [Ord. 2013-021]
2. FDO shall schedule a meeting of the Public Art Committee. [Ord. 2013-021]
3. The Public Art Committee shall conduct a public meeting and make a recommendation to the County Administrator, to approve, approve with conditions, continue pending submittal of additional materials or clarification, or deny, in accordance with the following: [Ord. 2013-021]
   a. Not less than ten or more than 60 days after submittal of a complete application, the Public Art Committee shall meet and review the application. Once the public meeting is scheduled, the following public notice requirements shall be satisfied: [Ord. 2013-021]
      1) Public Notice Boards
      The Applicant shall provide public notice of the meeting by the posting of the property with signs in the following fashion; [Ord. 2013-021]
      a) The subject property shall have notices posted by the Applicant with information provided by FDO regarding the public hearing on one or more signs at least 15 days in advance of any public meeting. One sign shall be posted for each 250 feet of frontage along a street up to a maximum of ten signs. All signs shall be: [Ord. 2013-021]
         (1) Evenly spaced along the street when more than one sign per property is required; [Ord. 2013-021]
(2) Setback no more than 25 feet from the property line; and, [Ord. 2013-021]
(3) Erected in full view of the public. [Ord. 2013-021]
Where the property does not have sufficient frontage on a street, signs shall be in a location acceptable to FDO. The Applicant shall submit photographs confirming the signs have been posted. The failure of any such posted notice to remain in place after it has been posted shall not be deemed a failure to comply with this requirement or be grounds to challenge the validity of any decision made by the approving authority. The Applicant shall also be required to ensure the signs have been removed no later than five days after the final meeting. [Ord. 2013-021]

b) Exceptions
Signs posted by a public agency or the BCC may be posted on the nearest street or at major intersections leading to and within the subject property. [Ord. 2013-021]
b. The Public Art Committee recommendation to the County Administrator shall be based upon the following findings: [Ord. 2013-021]
1) The mural will accomplish the stated Purpose and Intent of this Chapter; [Ord. 2013-021]
2) The artist is capable of completing the work in accordance with the plans and specification; [Ord. 2013-021]
3) The durability and expected maintenance requirements are appropriate; and, [Ord. 2013-021]
4) The materials to be used and the manner of application will not require excessive maintenance by its owner. [Ord. 2013-021]
c. In making its determination, the Public Art Committee may consider evidence and the opinions of the owners and occupants of affected properties. Absent favorable findings as required hereby, the Public Art Committee shall recommend that a mural permit not be issued by the County Administrator. [Ord. 2013-021]

4. Within 30 days of the Public Art Committee rendering a final recommendation, FDO shall forward the Committee's recommendation and application to the County Administrator for final action. The County Administrator shall approve, approve with conditions or deny the application based upon the completeness and accuracy of the application materials and the reasonableness of the Public Art Committee's findings. The Administrator shall have 30 days from receipt of Committee action to render a decision. The decision of the County Administrator shall be final. [Ord. 2013-021]

5. When a mural application is initiated by FDO, FDO staff shall forward the Public Art Committee's recommendation and application to the BCC on the Zoning Hearing agenda for final action. [Ord. 2013-021]

Section 4 Design Criteria

A. Placement
1. Murals may be located on any mural surface (except as limited in the following Subsections) of a building or structure; and [Ord. 2013-021]
2. Murals may wrap around from one side of a building to the next. [Ord. 2013-021]

B. Size
Murals may cover the entire plane of the side of a building or structure, but shall not extend beyond the edge of the façade surface or roofline. [Ord. 2013-021]

C. Obstructions
No mural may obstruct: [Ord. 2013-021]
1. The proper function of any exterior mechanical or electrical equipment; or [Ord. 2013-021]

D. Restrictions
Except as stipulated in provisions for Signs within Murals below, no mural shall contain the following: [Ord. 2013-021]
1. Any commercial content such as logos, icons, trademarks or brand name. [Ord. 2013-021]
2. Any moving, mechanical or electrical parts, or any material creating the illusion of movement or flashing. [Ord. 2013-021]
3. Any material projecting more than six inches from the vertical face of the mural surface. [Ord. 2013-021]
4. Any content that may be construed as a commercial message for the owner of the building or business, or the artist. The artist may sign the mural with their full name or initials, within an area limited to five percent of the area of the mural, excluding any imbedded signage, or up to four square feet in size, whichever is less. [Ord. 2013-021]
Section 5 Installation and Time for Completion of Mural

A. Installation
Murals shall be installed in compliance with the drawings and specifications reviewed by the Public Art Committee and approved by the County Administrator. [Ord. 2013-021]

B. Time for Completion
An Applicant shall adhere to the timeline approved by the County Administrator. Time for the completion and successful inspection of the mural shall not exceed six months from the issuance of the mural permit. After six months, the mural site improvement permit will expire, and the work may not continue, unless the Applicant requests, and is granted a mural permit renewal by the Building Division. In no case shall a mural permit be renewed more than one time without reconsideration of the renewal by the County Administrator. In the event the time for completion has exceeded the approved timeline, and a request for a renewal has not been requested and granted, the County Administrator may declare the approval of the mural void, and the project to be abandoned. If declared abandoned the surface(s) of the building shall be restored to a condition consistent with the PBC Property Maintenance Code. [Ord. 2013-021]

Section 6 Inspection

Upon completion of the mural, the Applicant shall contact FDO staff to arrange for an inspection for compliance with the drawings contained in the approved mural application. [Ord. 2013-021]

Section 7 Enforcement

In the event the County Administrator declares the project abandoned, or the mural as installed or maintained fails to materially comply with the drawings and specifications approved by the County Administrator, or with the permit or permit conditions, the owner of the property on which the mural is located shall be subject to enforcement proceedings before the PBC Code Enforcement Special Masters pursuant to Art. 10, Enforcement. Should the owner be found non-compliant, the Special Master may order the mural removed, or impose fines and penalties under Art. 10.B.3, Administrative Fines; Costs; Liens. The remedies contained in this Section shall be in addition to any other remedy available at law. [Ord. 2013-021]
A. Exemptions
1. Where pre-empted by State law, including but not limited to, the Right to Farm Act. Where applicable, documentation of implemented Best Management Practices or other method of pre-emption shall be required; [Ord. 2013-021]
3. The commercial application of fertilizer on non-agricultural property when in compliance with the Palm Beach County Fertilizer Ordinance (Ordinance No. 2012-039); [Ord. 2013-021]
4. Composted manure applied by a homeowner or tenant to residential lawns or gardens; and, [Ord. 2013-021]
5. Ten cubic yards per acre up to a maximum of 20 cubic yards in any 12-month period, with all requirements being met, as listed under Section 3 below. [Ord. 2013-021]

Section 3 Storage or Spreading of Livestock Waste

The storage or spreading of livestock waste that is received from off-site sources is prohibited, unless in compliance with the following: [Ord. 2013-021]

A. Storage
Storage areas shall be covered or contained to prevent run-off or seepage of liquids or materials from the storage area. Storage of livestock waste shall comply with the following: [Ord. 2013-021]
1. Shall not be located within five feet of any structure, unless placed within a structure intended for the storage or composting of such waste; [Ord. 2013-021]
2. Shall not be located within 25 feet of any property line, with exception to internal lot lines of parcels owned by the same entity; and, [Ord. 2013-021]
3. Shall not be within 100 feet of a potable water supply well, a storm drainage system, wetland, pond, canal, or other water body. [Ord. 2013-021]

B. Spreading
Livestock waste received from off-site sources shall be spread within 72 hours of delivery, except for less than ten cubic yards that is actively being composted, or as otherwise approved in a Nutrient Management Plan. Storage shall comply with any applicable livestock waste Storage and Separation requirements. Spreading of livestock waste shall comply with the following: [Ord. 2013-021]
1. Nutrient Management Plan
Prior to receiving livestock waste, an application shall be submitted to the Cooperative Extension Service (CES) for review. Upon completion of the review, the CES shall develop a Nutrient Management Plan which indicates whether application of any livestock waste is appropriate for the soil condition, and if so, in what amount. [Ord. 2013-021]
   a. Application Form and Requirements
      The application form and requirements shall be in a manner established by the CES. [Ord. 2013-021]
   b. Validity of Nutrient Management Plan
      The Nutrient Management Plan shall remain current for three years after its issuance by the CES. A current Nutrient Management Plan must be in place prior to receiving of livestock waste at any time. It shall be a violation of the ULDC, if livestock waste is stored or spread in a manner inconsistent with the current Nutrient Management Plan. [Ord. 2013-021]
2. Separation
   The spreading of livestock waste shall not occur: [Ord. 2013-021]
      a. Within 25 feet of any property line, with exception to internal lot lines of parcels owned by the same entity; and [Ord. 2013-021]
      b. Within 100 feet of a potable water supply well, a storm drainage system, wetland, pond, canal, or other water body. [Ord. 2013-021]

ARTICLE 6
PARKING, LOADING, AND CIRCULATION

CHAPTER A  GENERAL

Section 1  General

A. Purpose and Intent
The purpose and intent of this Article is to ensure the design and function, provisions of parking, loading, queuing, vehicular and pedestrian circulation, driveways, and access are in proportion to the demand created by each use and are efficient and safe. [Ord. 2020-001]

B. Applicability
The standards of this Article shall apply to all development in unincorporated PBC, or existing development that is modified to the extent that it includes uses or site design features that were not specifically shown on previously approved plans. All parking areas established by this Section shall be continuously maintained in accordance with this Article. Parking and loading spaces shall be provided in accordance with Table 6.B.1.B, Minimum Parking and Loading Requirements, unless stated otherwise below. [Ord. 2020-001]

1. Prohibitions
Parking and loading spaces are prohibited in the following: [Ord. 2020-001]
   a. Landscape buffers; and [Ord. 2020-001]
   b. Drainage District R-O-W or Easements, except additional parking in excess of the minimum required may be located in these areas with an agreement with the applicable district and subject to approval by the Zoning Director. [Ord. 2011-011] [Ord. 2020-001]

2. Exemptions
The following exemptions shall apply, unless the parcel is vacant. [Ord. 2007-013] [Ord. 2020-001]
   a. Commercial Vehicle
      One commercial vehicle of not over one ton rated capacity may be parked per dwelling unit, providing all of the following conditions are met:
      1) vehicle is registered or licensed;
      2) used by a resident of the premises;
      3) gross vehicle weight rating (GVWR) does not exceed 12,500 pounds;
      4) height does not exceed nine feet, including any load, bed, or box; and,
      5) total vehicle length does not exceed 26 feet. [Ord. 2005-041]
   b. Construction Vehicles
      Temporary parking of construction vehicles or equipment engaged in work on private land where construction is underway, for which a current and valid Building Permit has been issued by the Building Director and the Building Permit is displayed on the premises. [Ord. 2007-013]
   c. Delivery and Service Vehicles
      The routine deliveries by tradesmen, or the use of trucks in making service calls. [Ord. 2007-013]
   d. Emergency Repairs
      A situation where a motor vehicle becomes disabled and, as a result of such emergency, is required to be parked in a residential district longer than two hours. Any prohibited motor vehicle shall be removed from the residential district within 24 hours, regardless of the nature of the emergency.

3. Deviations for the PO Zoning District
Deviation(s) from the provisions of this Article may be permitted for development supporting government facilities within the PO Zoning District, subject to Art. 2 Application Processes and Procedures and PPM #ZO-O-063, as applicable and as amended. [Ord. 2007-013] [Ord. 2019-005]

C. Prior Approvals and Nonconformities

D. Definitions
CHAPTER B  PARKING AND LOADING

Section 1  Calculation

A. Computing Parking Standards
   1. Multiple Uses
      On lots containing more than one use, the total number of required parking spaces shall be equal to
      the sum of the required parking for each use as if provided separately, unless shared parking is
      approved pursuant to Art. 6.C.1.B, Shared Parking or is allowed pursuant to Art. 3.B, Overlays. [Ord. 2020-001]
   2. Fractions
      When calculation of the number of required parking spaces results in a fractional number, a fraction of
      less than one-half shall be disregarded and a fraction of one-half or more shall be rounded to the next
      highest whole number. [Ord. 2020-001]
   3. Floor Area
      Parking requirements that are based on square footage shall be computed using gross floor area
      (GFA), unless another measurement is specifically called for in this Section. [Ord. 2020-001]
   4. Occupants
      When the calculation of required parking spaces is based on the number of occupants, the calculation
      shall be based on the maximum number of persons legally residing on the premises at any one time.
   5. Bench Seating
      When the calculation of required parking spaces is based on the number of seats, each 22 linear inches
      of bench, pew, or similar bench seating facility shall be considered one seat.
   6. Gross Lot Area
      When the calculation of required parking spaces is based on gross lot area (GLA), the amount of lot
      area dedicated to parking shall not be included in the calculation. [Ord. 2020-001]
   7. Unlisted Land Uses
      In the event that parking requirements for a particular use are not listed in this Section, the requirements
      for the most similar use shall be applied. In making the determination, any evidence of actual parking
      demand for similar uses shall be considered as well as other reliable traffic engineering and planning
      information that is available. [Ord. 2020-001]
   8. Government Services and Government Facilities
      May be allowed alternative calculations based on evidence of actual parking demand for similar uses
      or reliable traffic engineering and planning information. [Ord. 2019-005] [Ord. 2020-001]
   9. Landscaping
      The landscape requirements for parking and interior vehicular use areas shall be calculated in
      accordance with Art. 7, Landscaping. [Ord. 2020-001]
   10. Reduction
      Refer to Art. 6.C.1, Requirements to Reduce or Increase Parking. [Ord. 2020-001]

C. Parking Spaces for Persons Who Have Disabilities

Pursuant to F.S. § 553.513, the provision of parking spaces and passenger loading areas for persons who have disabilities is governed by F.S. § 553.511, § 5041, and the current effective version of the Florida Building Code, Accessibility. [Ord. 2005-002] [Ord. 2011-016] [Ord. 2020-001]

Section 2 Location

A. On-Site Parking

1. Required Parking

All required parking, shall be provided on the same lot or project as the principal use(s), or as allowed pursuant to Art. 6.B.2.C, Off-Site Parking. The location of required parking spaces shall not interfere with normal traffic flow or with the operation of queuing and backup areas. Loading areas shall not obstruct pedestrian pathways. [Ord. 2020-001]

a. Distance from Building or Use

Unless otherwise provided in this Section, all required parking spaces shall not be located more than 600 linear feet from the nearest building or use it is intended to serve. This standard shall not apply to parking spaces provided for auditoriums, stadiums, assembly halls, gymnasiums, and other places of assembly, nor shall it apply to hospitals, large-scale retail, wholesale, and consumer services uses over 500,000 square feet or industrial, wholesaling, or manufacturing establishments. [Ord. 2020-001]
b. Location of Front, Side, and Rear Parking
A minimum of ten percent of the required parking spaces shall be located at the side or rear of each building it is intended to serve; however, development requiring 50 or less parking spaces shall be exempt. A public pedestrian walk shall connect the parking areas to a store entrance. Such pedestrian access way shall be a minimum of four feet in width, clearly marked, well lighted, and unobstructed. [Ord. 2005-041]

1) Large Scale Commercial Development
Developments with single tenants occupying 65,000 gross square feet or more shall locate parking in accordance with Figure 6.B.2.A, Location of Front, Side, and Rear Parking, as follows: [Ord. 2020-001]
a) A maximum of 75 percent of required parking shall be located at the front.
b) A minimum of 15 percent of required parking shall be located immediately fronting a side or secondary entrance. [Ord. 2020-001]
c) A minimum of 25 percent of the required parking spaces at the side or rear, as indicated in Figure 6.B.2.A, Location of Front, Side, and Rear Parking. [Ord. 2020-001]
d) Type 2 Waiver
The BCC may waive these requirements as a Type 2 Waiver if the Applicant demonstrates there is an unusual site configuration or unique circumstances, and the alternative site design clearly meets the intent of this provision, by increasing the proximity of parking spaces to public entrances, reducing the visual blight of large expanses of surface parking areas, and improving pedestrian connectivity. [Ord. 2005-002] [Ord. 2012-027]

<tr>
<td>Rear Parking ²</td>
</tr>
</tbody>
</table>

[Ord. 2005-002] [Ord. 2020-001]
1. A minimum of 15 percent of required parking shall be located immediately fronting a side or secondary entrance. [Ord. 2020-001]
2. A minimum of 25 percent of required parking shall be located on the side or rear. [Ord. 2005-002]

c. Garages and Carports
Space within a carport or garage may be used to satisfy residential parking requirements, provided that no Building Permit shall be issued to convert a carport or garage to a living area without a provision to provide the required parking spaces in the driveway or in a common parking lot. [Ord. 2020-001]
**d. Parking Fees**

Except as provided in Art. 6.B.3.A.1.d.3), Valet Parking, a fee or other form of compensation shall not be charged for the use of required parking spaces. Fees may be charged for the use of parking spaces that have been provided in excess of minimum standards. [Ord. 2020-001]

2. **Guest Parking**

Guest parking spaces shall be located within 300 feet of the use they are intended to serve. Guest parking may be grassed, as provided in Art. 6.B.3.B.2, Grass. All guest parking shall be prominently identified with an above-grade sign or marking on the wheel stop or curb.

B. **On-Street Parking**

On-street parking is prohibited unless stated below. [Ord. 2019-034]

1. **Residential**

On-street parking may be allowed as determined by the Land Development Division in subdivisions located in Standard Residential Zoning Districts or Residential Pods of a PDD when the following requirements are met: [Ord. 2019-034]
   a. parking spaces are located on an internal private street; [Ord. 2019-034]
   c. parking spaces shall not reduce the minimum fire department access width of 20 feet, pursuant to the Florida Fire Prevention Code, NFPA 1; [Ord. 2019-034]
   d. shall not be used to satisfy required parking; and, [Ord. 2019-034]
   e. not required to be shown on an approved Zoning Site Plan. [Ord. 2019-034]

2. Developments located in the WCRAO, IRO, URAO, or TDD Zoning Districts in accordance with the specific provisions in Art. 3, Overlays and Zoning Districts that allow on-street parking. [Ord. 2019-034]

C. **Off-Site Parking**

1. **Permanent**

The DRO may permit all or a portion of the required parking spaces to be located on a lot separate from the lot on which the principal use is located. Off-site parking shall be subject to the following standards: [Ord. 2020-001]
   
a. **Necessity**

The Applicant shall demonstrate that it is not feasible to locate all of the required parking on the same lot as the principal use.

b. **Ineligible Activities**

Off-site parking shall not be used to satisfy the minimum parking requirements for restaurants, lounges, Convenience Stores, and other high turnover-oriented uses. Required handicap parking spaces shall not be located off site. [Ord. 2020-001]

c. **Location**

Off-site parking shall not be located more than 600 linear feet from the building or use it is intended to serve. Off-site parking shall not be separated from the principal use by a street with a width of more than 80 feet. [Ord. 2005-002]

d. **Zoning**

Off-site parking areas shall require the same or a more intensive zoning classification than that required for the building or use served.

e. **Signs**

One sign shall be located at the off-site parking lot indicating the use that it serves, and one sign shall be located on the site of the use served, indicating the location of the off-site parking lot.

f. **Agreement for Off-Site Parking**

In the event that an off-site parking area is not under the same ownership as the principal use served, a written agreement or unity of control shall be required. A copy of the agreement among the owners of record shall be submitted to the DRO and reviewed and approved by the County Attorney. The agreement shall be filed in the deed records of PBC by the owner of record. Proof of recordation of the agreement shall be presented to the DRO prior to approval. The agreement shall:
   1) list the names and ownership interest of all parties to the agreement and contain the signatures of those parties;
   2) provide a legal description of the land;
   3) include a Site Plan showing the area of the use and parking parcel;
   4) expressly declare the intent for the covenant to run with the land and bind all parties and all successors in interest to the covenant;
   5) assure the continued availability of the spaces and provide assurance that all spaces will be usable without charge;
6) describe the obligations of each party, including the maintenance responsibility;
7) require that the Zoning Director be notified prior to the expiration or termination of an off-site parking area lease agreement;
8) be made part of the Site Plan/Final Subdivision Plan; and,
9) describe the method by which the covenant shall, if necessary, be revised.

2. Temporary
The Zoning Director may consider a ZAR process for temporary off-site parking. [Ord. 2017-007] [Ord. 2018-002] [Ord. 2020-001]

a. Off-site parking shall not be located more than 600 feet from the Temporary Use site, measured from access point to access point. The Zoning Director may approve a distance greater than 600 feet when the Applicant either demonstrates that the attendees or temporary use participants are transported to the site by other means or has contracted with law enforcement for traffic management and pedestrian crossing. [Ord. 2017-007] [Ord. 2020-001]

b. Parcels used for off-site parking shall include access for vehicles to enter and exit the site in a forward motion. [Ord. 2017-007]

c. Off-site parking shall not be separated by a street with a width of more than 80 feet, unless traffic assistance is provided to guide pedestrians or measures are in place to assist pedestrian safety. [Ord. 2017-007]

d. Required accessible parking spaces shall not be located off site. [Ord. 2017-007]

e. Pedestrian sidewalks shall be provided from the off-site parking to the Temporary Use site. [Ord. 2017-007]

f. The duration and dates of the temporary off-site parking shall be the same as the time allowed for the Temporary Use it is intended to serve. [Ord. 2017-007]

g. In the event an off-site parking area is not under the same ownership as the site of the Temporary Use site, a written agreement between the Applicant and all owners of record of the parking area shall be required prior to permit approval. A copy of the agreement shall be subject to review and approval of the Zoning Division, and at a minimum shall contain the following: [Ord. 2017-007] [Ord. 2018-002]

1) A list of names and ownership interest of all owners of the subject property; [Ord. 2017-007]

2) A legal description of the land to be used for off-site parking; [Ord. 2017-007]

3) Assurance by the owners of the subject property that all required off-site spaces will be available to the Applicant for the uses described in the Temporary Use application; [Ord. 2017-007] [Ord. 2020-001]

4) A statement of maintenance obligations of each party for the duration of the permit; and, [Ord. 2017-007]

5) A requirement that the Zoning Director receive notification in the event the off-site parking agreement is terminated prior to the termination of the Temporary Use Permit. [Ord. 2017-007]

h. Refer to Art. 6.B.3.B, Materials for parking surface types allowed. [Ord. 2020-001]

D. Commercial Parking Lot

1. General
A commercial parking lot shall not be contiguous to lands used or zoned for residential purposes. Parking spaces may be rented for parking. No other business of any kind shall be conducted on the lot, including repair, service, washing, display, or storage of vehicles or other goods. Review of parking lots and structures shall consider the proposed operation of the lot. The standards of this Article, including signage, maneuvering, and backup distances may be varied, based on the proposed operation.

2. Design Standards
The Site Plans for a commercial parking lot shall depict the layout of the street connection and access ways, drainage provisions, signs, surfacing, curbs or barriers, street connections and access ways of lands located contiguous and directly across the street, and the location and type of landscaping. [Ord. 2020-001]

3. Access
Ingress and egress shall be located to present the least interference with traffic and the least nuisance on any adjacent street. The location, size, and number of entrances and exits shall be subject to approval by the DRO.
E. Parking Structures
   1. General
      A parking structure may be constructed as a garage with or without a parking lift, and may be used to meet parking requirements for any use or combination of uses. Such structures shall be considered accessory to the principal use and shall be designed to meet or exceed the following standards. [Ord. 2020-001]
      a. Parking Garage
         Shall comply with the standards for surface parking lots with regard to marking, signage, striping, and minimum number of spaces to be provided. [Ord. 2020-001]
         1) Design Layout
            The Applicant shall submit a Site Plan that shows interior traffic circulation, access use of ramps, parking space and aisle dimensions, traffic control signs and pavement marking, safe and efficient vehicular and pedestrian operation, location of entrances and exits, sight distances at entrances and exits, and screening of the cars located in or on the parking structure from adjoining lands and from public streets. [Ord. 2020-001]
            a) Floor Width
               The unobstructed distance between columns or walls measured at any point between the ends of the parking aisle shall be as indicated in Table 6.B.2.E, Minimum Floor Width. [Ord. 2020-001]

<table>
<thead>
<tr>
<th>Angle</th>
<th>Parking on Both Sides of Aisle</th>
<th>Parking on One Side of Aisle</th>
</tr>
</thead>
<tbody>
<tr>
<td>90</td>
<td>60’ – One-or two-way aisle</td>
<td>43’ – One-or two-way aisle</td>
</tr>
<tr>

<td>40’ – One-way aisle</td>
</tr>
<tr>
<td>60</td>
<td>53’ – One-way aisle (1)</td>
<td>34’ – One-way aisle</td>
</tr>
</tbody>
</table>

Notes:
1. Requests for reductions of unobstructed distances will be considered if aisle and sight parking dimensions are met, and the columns are not located at the rear of the parking spaces, or interfere with the opening of doors.

b) Minimum Space Width
   The minimum parking space width shall be nine feet.

2) Parking Lifts
   a) May be used to stack two or three vehicles vertically in each parking space and shall be located within a parking garage or structure for the use they serve. [Ord. 2020-001]
   b) Shall not be subject to the minimum parking length and width dimensions. [Ord. 2020-001]
   c) Queuing is prohibited within any R-O-W. [Ord. 2020-001]
   d) Maximum sound levels shall not exceed applicable thresholds as stipulated in Table 5.E.4.B, Maximum Sound Levels. [Ord. 2020-001]
   e) Details of the interior traffic circulation, parking space, and aisle dimensions shall be shown on the Site Plan. [Ord. 2020-001]

Section 3 Design and Materials

A. Dimensions and Layout
   1. Dimensions
      The dimensions and geometrics of parking areas shall conform to the following minimum standards. [Ord. 2020-001]
      a. Residential
         1) Individual Parking Space
            Each parking space for dwelling units that do not share a common parking lot shall be a minimum of eight feet wide and 20 feet long. Parking spaces may be side to side, end to end, or not contiguous to each other.
         2) Common Parking Lots
            For dwelling units that share a common parking lot, parking spaces and aisles shall be subject to Table 6.B.3.A, Minimum Parking Dimensions for Non-Residential Uses and Residential Uses with Shared Parking Lots. [Ord. 2020-001]
b. **Non-Residential**

All non-residential uses and residential uses with shared parking lots shall provide parking spaces that comply with Table 6.B.3.A, Minimum Parking Dimensions for Non-Residential Uses and Residential Uses with Shared Parking Lots, and Figure 6.B.3.A, Typical Example of General Parking Schematic. Parking angles that are not illustrated in Table 6.B.3.A, Minimum Parking Dimensions for Non-Residential Uses and Residential Uses with Shared Parking Lots, or Figure 6.B.3.A, Typical Example of General Parking Schematic shall be interpolated from the Tables and approved by the DRO. For the purpose of applying the “Use” column in Table 6.B.3.A, Minimum Parking Dimensions for Non-Residential Uses and Residential Uses with Shared Parking Lots, the following rules shall apply: [Ord. 2020-001]

1) **General**

   The term “general” applies to parking spaces designated to serve non-residential uses and residential uses with shared parking lots. [Ord. 2016-042]

2) **Queuing Distance**

   In a parking lot a minimum queuing distance of 25 feet is required between the property line and the first parking space.

3) **Exception for Low Speed Electric Vehicles (LSEVs)**

   Where drive aisles in LSEV parking areas are not intended solely for use by LSEVs, the overall width and minimum aisle width may be increased to allow the aisle width permitted for standard-sized vehicles. [Ord. 2005-002]

Notes:
2. Where drive aisles in LSEV parking areas are not intended solely for use by LSEVs, the overall width and minimum aisle width may be increased to allow the aisle width permitted for standard-sized vehicles.
3. Angled parking with two-way traffic movement shall be a minimum of 24 feet wide except for some parking lots with 90-degree parking stalls, or unless stated otherwise herein. [Ord. 2012-027]
4. For a Retail Gas and Fuel Sales use, the drive aisles perpendicular to the fueling positions under the canopy shall have a minimum aisle width of 30 feet (see Figure 6.B.3.A, Retail Gas and Fuel Canopy). [Ord. 2019-005] [Ord. 2020-001]

Ord. 2012-027
Key:
A  Parking Angle  C  Space Depth  E  Curb Length
B  Space Width  D  Aisle Width (1)  F  Wall to Wall Width
Notes:
1. All angled parking with two-way traffic movement shall be a minimum of 24 feet wide except for some parking lots with 90-degree parking spaces, or unless stated otherwise herein.
2. Where drive aisles in LSEV parking areas are not intended solely for use by LSEVs, the overall width and minimum aisle width may be increased to allow the aisle width permitted for standard-sized vehicles.
c. **Parallel Parking**

Parallel parking spaces shall have a minimum length of 23 feet and a minimum width of ten feet.

![Figure 6.B.3.A – Parallel Parking](image)

![Figure 6.B.3.A – Parallel Parking Dimensional Standard](image)

Marking Option - 1

Marking Option - 2
d. Alternative Vehicle Parking

1) Motorcycle Parking

For any non-residential use providing 50 or more spaces, a maximum of three required on-site parking spaces per 50 spaces, may be reduced in size and redesigned to a minimum of four feet wide by nine feet long to accommodate parking of motorcycles. When provided, these parking spaces shall be identified by a sign. [Ord. 2020-001]

Figure 6.B.3.A – Motorcycle Parking

2) Golf Cart Parking

Residential developments with recreation areas such as Recreation Pods, Golf Courses, or recreational facilities designed and intended for use by occupants of residential developments or subdivisions, owned and operated by a POA, may accommodate golf carts or LSEVs subject to the following: [Ord. 2013-001]

a) Utilize a maximum of 30 percent of recreational uses required parking spaces. [Ord. 2013-001] [Ord. 2020-001]

b) Parking dimension may be reduced consistent with Low Speed Electric Vehicle (LSEV) minimum dimensions as indicated in Table 6.B.3.A, Minimum Parking Dimensions for Non-Residential Uses and Residential Uses with Shared Parking Lots. [Ord. 2013-001]
3) **Valet Parking**
   The DRO may approve the use of valet parking to satisfy required parking. Valet parking shall not cause customers or patrons who do not use the valet service to park off site or in the R-O-W, or cause queuing in a street, driveway, or drive aisle. The following additional standards shall apply to valet parking: [Ord. 2020-001]
   a) **Maximum Number**
      The maximum number of spaces reserved for valet parking shall not exceed 25 percent of the minimum number of required parking spaces for commercial uses over 20,000 square feet and 50 percent for all other uses. [Ord. 2020-001]
   b) **Location**
      Valet parking for commercial uses shall not be located within 200 feet of a public entrance to a building. Areas designated for valet parking shall not interfere with vehicular circulation or emergency access.

4) **Electric Vehicle Charging Parking Space (EVCPS)**
   A parking space that provides infrastructure that supplies electric energy for the charging of electric vehicles, without a fee, is associated with the principal use, and is part of the required number of parking spaces, shall be considered an EVCPS. Any parking space that requires a fee is subject to Art. 4.B.2.C.10, Electric Vehicle Charging Station Facility. [Ord. 2019-034]
   [Ord. 2020-001]
   a) **Non-Residential Uses**
      Shall not exceed a maximum of 20 spaces or ten percent of the total required parking spaces for the use or uses in the development, whichever is less. [Ord. 2019-034]
   b) **Residential Uses**
      An EVCPS is Permitted by Right. [Ord. 2019-034]
   c) **Design and Construction Standards**
      1) Each EV space shall be marked by a sign designating the parking space as an electric vehicle parking space, in accordance with Art. 8.B.2, Small Signs and the Manual on Uniform Traffic Control Devices (MUTCD) of the Federal Highway Administration. Each sign shall include the information pursuant to Art. 4.B.2.C.10.c.5(a), c], and d). Vehicles that are not capable of using the Electrical Vehicle Charging Station are prohibited from parking in this space; and [Ord. 2019-034]
      2) EV spaces shall be painted green, or shall be marked by green painted lines or curbs. [Ord. 2019-034]
2. Layout
   a. Access
      1) Ingress and Egress
         Each parking space shall have appropriate access to a street or alley. Legally platted lots that accommodate one or two units shall be allowed backward egress from a driveway onto a street. In all other cases, maneuvering and access aisle area shall be sufficient to permit vehicles to enter and leave the parking lot in a forward motion. [Ord. 2007-001]
      2) Dimensions
         Access ways, except those associated with a Single Family residential use, shall be subject to the following dimensional standards.

         | Minimum Width at Street | Feet (1) |
         |------------------------|----------|
         | One-Way                | 15       |
         | Two-Way                | 25       |
         | Two-Way with Median    | 40 (2)   |
         | Two-Way without Median | 35       |

         Right-Turn Radius (3)
         Minimum: 25
         Maximum: 30

         Notes:
         1. Widths exceeding these standards may be approved by the Zoning Director, the County Engineer, depending on the use or Fire-Rescue official, as necessary. [Ord. 2020-001]
         2. Width excludes median, 20-foot unobstructed pavement required on both sides of median, excluding guard houses, and landscape islands.
         3. Measured on side of driveway exposed to entry or exit by right-turning vehicles.

   3) Driveways and Access
      a) Access Connections
         For the purposes of this Section, an access connection means the point or points at which a proposed development’s traffic meets the existing right-of-way system. Access connections shall be subject to the following standards: [Ord. 2007-013]
         (1) Spacing
             (a) Local or Residential Access Streets
                 Access connections for lots located on local or residential access streets shall maintain a minimum setback from a side or rear lot line as follows: [Ord. 2007-013]
                 1) Single Family or Multifamily: 2 feet
                 2) Zero Lot Line: 1 foot
                 3) Townhouse: 1 foot
             (b) Arterial and Collector Streets
                 Access connection locations and spacing shall be in accordance with the PBC Access Management Standards. Provided, however, that access connections to any street which is part of the State Highway System, as defined in F.S. § 334.03, shall meet the permit requirements of FDOT for street connections, pursuant to F.S. ch. 335. [Ord. 2007-013]
         (2) Construction
             Access connections to streets under the jurisdiction of PBC shall be constructed in accordance with the standards established by the DEPW. [Ord. 2007-013]
         (3) Number of Access Connections
             (a) Local or Residential Access Streets
                 Lots located on local or residential access streets shall have a maximum of two access connections. [Ord. 2007-013]
(b) Arterial and Collector Streets

The number of access connections to serve a site shall be kept to a minimum. The County Engineer may restrict the number of access points or require construction of an additional access point(s) based upon the following criteria: [Ord. 2007-013]

1) Proposed development frontage on roadways shown on the Thoroughfare Right-of-Way Identification Map; [Ord. 2007-013]
2) The projected daily and Peak Hour Traffic impacts of the development; [Ord. 2007-013]
3) Proposed land use; [Ord. 2007-013]
4) Traffic operations and safety on the major roadway network; [Ord. 2007-013]
5) Existing or anticipated traffic volume along adjoining R-O-W; [Ord. 2007-013]
6) Access connections on contiguous land or land on the opposite side of the street; [Ord. 2007-013]
7) Median opening locations; and, [Ord. 2007-013]

b) Double Frontage Lots and Corner Lots

(1) Double Frontage Lots

Access to a double frontage lot shall be governed by provisions of Art. 11.E.2.A.4, Double Frontage Lots and Corner Lots and the number of access connections shall be governed by the following. When a double frontage residential lot is located adjacent to a Collector or an Arterial Road, it shall also be required to front and have access on a local or residential access street. A limited access easement shall be placed along the property line that abuts either the Collector or Arterial Road. [Ord. 2007-013] [Ord. 2020-001]

(c) Exceptions

The County Engineer shall have the authority to grant a permit for driveway and access plans with lesser or greater dimensions than designated in this Section, giving consideration to the following factors:

(1) Lot size;
(2) Lot configurations;
(3) Proposed land use;
(4) Traffic generation or anticipated traffic volume along adjoining R-O-W;
(5) Driveway locations on contiguous land or land on the opposite side of the street;
(6) Median opening locations; and,
(7) Safe sight distance.

b. Point of Service and Queuing Standards

In addition to meeting the minimum parking and loading standards of this Article, all drive-through establishments shall meet the following standards. [Ord. 2019-005] [Ord. 2020-001]
Figure 6.B.3.A – Queuing and By-Pass Standards for Dual Drive-Through
1) A point of service space shall be provided for all drive-through establishments. The dimensions for the point of service space shall be a minimum of nine by 20 feet. [Ord. 2019-005]

2) Queuing shall be provided for drive-through establishments described in Table 6.B.3.A, Minimum Queuing Standards. Each queuing space shall be a minimum of ten feet by 20 feet, clearly defined and designed so as not to conflict or interfere with other traffic using the site. Unless otherwise indicated below, queuing shall be measured from the front of the stopped vehicle located at the point of service to the rear of the queuing lane. One additional queuing space shall also be provided after the point of service for all uses. [Ord. 2005-041] [Ord. 2019-005]

3) A by-pass lane a minimum of ten feet wide shall be provided before or around the point of service. Subject to the Zoning Director's approval, a by-pass lane may not be required if the queuing lane is adjacent to a vehicular use area which functions as a by-pass lane. The by-pass lane shall be clearly designated and distinct from the queuing area.

4) The allowance for dual drive-through lanes converging to a single land with four spaces preceding each menu board is consistent with the ULDC queuing requirements. [Ord. 2020-001]

c. Circulation Standards

1) There shall be safe, adequate, and convenient arrangement of pedestrian pathways, bikeways, roads, driveways, and parking and loading spaces within parking areas. [Ord. 2020-001]

2) Streets, pedestrian walks, parking areas, and open space shall be designed as integral parts of an overall site design which shall be properly related to existing and proposed buildings, adjacent uses, and landscaped areas.

3) Parking lots shall be maintained in accordance with the paving and drainage permit issued authorizing construction.

Notes:
1. All uses: a by-pass lane shall be required if more than five queuing spaces are provided.
d. Pedestrian Circulation

1) Structures, vehicular circulation lanes, parking spaces, driveways, and open spaces shall be designed to provide logical, impediment-free pedestrian movement. The site shall be arranged so that pedestrians moving between buildings are not unnecessarily exposed to vehicular traffic.

2) Paved, landscaped, or comfortably-graded pedestrian walks shall be provided along the lines of the most intense use, particularly from building entrances to streets, parking areas, and adjacent buildings.

3) Where parking spaces directly face a structure, and are not separated by an access aisle from the structure, a paved pedestrian walkway shall be provided between the front of the parking space and the structure. The walkway shall be a minimum of four feet wide, exclusive of vehicle overhang, and shall be separated from the parking space by concrete wheel stops or continuous curbing. Single Family residential uses are exempt from this requirement. [Ord. 2020-001]

4) For non-residential developments, subject to the requirements of Art. 5.C, Design Standards, a continuous internal pedestrian walkway shall be provided from each adjacent perimeter public sidewalk to all customer entrances. The design of the walkway shall include all of the following: [Ord. 2009-040] [Ord. 2020-001]
   a) one native Canopy tree for each 25 linear feet with a maximum spacing of 50 feet between trees; [Ord. 2009-040]
   b) one bench every 200 feet between the public sidewalk and building; and, [Ord. 2009-040]
   c) walkways traversing vehicular use areas shall be accented with special pavers, bricks, decorative concrete, stamped concrete, or similar decorative pavement treatment. [Ord. 2009-040]

e. Drainage

1) Review and Approval by County Engineer
   The drainage design for all parking areas shall be reviewed and approved pursuant to Art. 11, Subdivision, Platting, and Required Improvements, prior to the issue of a Development Permit. [Ord. 2020-001]

2) Impervious Surface
   All surface parking areas, grassed or otherwise, shall be considered an impervious paved surface for the purpose of determining tertiary drainage system flow capacity and secondary stormwater management system runoff treatment/control requirements.

3) Runoff
   Runoff from vehicular use areas shall be controlled and treated in accordance with all applicable Agency standards in effect at the time an application is submitted.

f. Maintenance

All parking lots shall be maintained in good condition to prevent any hazards, such as cracked asphalt or potholes.
g. ** Striping Width Standards**
Except for parallel parking spaces, parking lots containing spaces for three or more vehicles shall delineate each space by single or double stripes on each side of the space. All stripes shall be painted in white paint except for handicapped spaces which shall have blue stripes. The width of the painted stripe shall be four inches. [Ord. 2020-001]
1) Single Striping parking space width shall be measured from the centerline of the stripe. [Ord. 2020-001]
2) Double striping separation from inside edge of stripe to inside edge of stripe shall be no less than eight inches and no more than 16 inches. The effective width of the double stripes shall range from 16 inches to 24 inches, measured from outside edge of stripe to outside edge of stripe. Parking space width shall be measured from the centerline of the set of stripes. 

**Figure 6.B.3.A – Striping Standards**

---

[Ord. 2011-016]
h. Signs
Traffic control signs and other pavement markings shall be installed and maintained as necessary to insure safe and efficient traffic operation in all vehicular use areas. Such signage and markings shall conform with the Manual on Uniform Traffic Control Devices, Federal Highway Administration, U.S. Department of Transportation, as adopted by the FDOT.

i. Landscaping
1) All new parking lots shall be landscaped in accordance with Art. 7, Landscaping.
2) Renovations to existing parking lots shall be landscaped in accordance with Art. 7, Landscaping.
   a) Exception
   Normal maintenance and repair, such as resurfacing, restriping, or the addition of curbing and wheel stops, to existing parking lots shall require landscaping in accordance with the original permit.

B. Materials
1. Paved
   Unless otherwise provided in this Article, all parking lots shall be improved with either: (1) a minimum of a six-inch shell rock or lime rock base with a one inch hot plant mix asphaltic concrete surface; or (2) a base and surface material of equivalent durability, as certified by an engineer.
   a. Shell Rock
   The uses listed below may construct surface parking lots with shell rock or similar material approved by the DRO, except for the required handicapped parking space(s). Parking areas connected to a public street, shall be paved. [Ord. 2019-039]
   1) Agricultural uses requiring less than 20 spaces.
   2) Communication towers.
   3) Accessory uses to a Bona Fide Agriculture use, such as Farm Workers Quarters.
   4) Wholesale Nursery, Retail Nursery, or Landscape Service collocated with a Nursery requiring less than 20 parking spaces, and the Outdoor Storage area of vehicles for the operation of the business. [Ord. 2019-039]
      a) Wholesale Nursery, Retail Nursery, or Landscape Service collocated with a Nursery requiring 20 or more parking spaces may contract surface parking lots with 50 percent of the required spaces as shell rock or other similar materials subject to Art. 6.B.3.B.1.a, Shell Rock, or grassed subject to Art. 6.B.3.B.2, Grass. [Ord. 2007-010] [Ord. 2019-039]
   5) Driveways in the RSA serving residential uses on unpaved roads.
   6) Uses in the C-51 Catch Basin when approved by the DRO.
   7) Government Facilities when limited to spaces that are not accessible to the general public. [Ord. 2020-001]
   8) Parks when provided to serve as overflow parking for event and/or peak parking. [Ord. 2020-001]
   b. Wheel Stops and Curbing
   Wheel stops or continuous curbing shall be placed two and one-half feet back from walls, poles, structures, pedestrian walkways, and landscaped areas.

2. Grass
   Grass parking is permitted, subject to approval by the DRO, pursuant to the following procedures and standards: [Ord. 2020-001]
   a. Application
   In addition to the application requirements for a Site Plan/Final Subdivision Plan, the Applicant shall submit the following:
   1) a Site Plan showing the area proposed for grass parking; [Ord. 2007-013]
   2) the proposed method of traffic control to direct vehicular flow and parking;
   3) description of the method to ensure that the grass parking surface will be maintained in its entirety with a viable turf cover; [Ord. 2007-013]
   4) a conceptual drainage plan for the entire parking area; and, [Ord. 2007-013]
   5) a written statement that the area proposed for grass parking shall be used for parking on an average of no more than three days or nights each week. [Ord. 2007-013]
b. Standards
The following standards shall apply to grass parking:
1) only parking spaces provided for peak demand may be allowed as grass parking; [Ord. 2007-013]
2) paved parking shall be provided for average daily traffic, including weekday employees and visitors;
3) a grass parking area shall not include any existing or proposed landscaped area, surface water management area, or easement, other than a utility easement;
4) handicap parking shall not be located in a grass parking area;
5) grass parking areas shall meet the landscape requirements in Art. 7, Landscaping. Grass parking areas shall not be counted toward meeting minimum landscape or open space standards; [Ord. 2007-013]
6) all access aisles or lanes shall either: [Ord. 2007-013]
   a) be paved and meet the same substructural and surface standards required for paved parking surfaces; or
   b) be surfaced with paver block or other semi-pervious coverage approved by the DRO and County Engineer; or [Ord. 2007-013]
   c) be stabilized with subbase underlayment subject to approval by Land Development. [Ord. 2007-013]
7) grass parking shall be located a minimum of 100 feet from the overland flow prior to entering into a body of water or water systems; and, [Ord. 2007-013]
8) materials utilized in the construction of grass parking shall be drought tolerant and subject to approval by Land Development. [Ord. 2007-013]

c. Permit
If at any time it is determined that a grass parking area does not meet the standards established in this Section, the Zoning Director shall require the restoration of the grass surface or the paving of the grass for parking.

CHAPTER C ALTERNATIVE DESIGN OPTIONS

Section 1 Requirements to Reduce or Increase Parking

A. Type 1 Waiver
1. Applicability
   a. Reduce Required Parking
   A Type 1 Waiver may be requested to reduce required parking no more than 15 percent, subject to the Standards as outlined in Art. 2.C.5.F. Type 1 Waiver and the following: [Ord. 2020-001]
   1) limited to uses that require 20 or more spaces; [Ord. 2020-001]
   2) submittal of a Parking Demand Statement that identifies the use or uses; and, [Ord. 2020-001]
   3) the Parking Demand Statement confirms the parking will not be negatively impacted if the Type 1 Waiver is granted. [Ord. 2020-001]
   b. PDD Parking Increase
   The Development Review Officer (DRO) may authorize an increase in the maximum allowed number of parking spaces in a PDD subject to a Type 1 Waiver. [Ord. 2020-001]
   1) Supplemental Application Requirements
   The Applicant shall submit a parking study and any additional documentation justifying the need for additional parking. The parking study shall include, the following:
   a) the location of the use(s) on the site requiring the additional parking;
   b) the size and type of use(s) and/or activity(s) requiring the additional parking; and,
   c) the rate of turnover and the anticipated peak parking demands.
   2) Maximum Increase
   a) Lots less than ten acres in size may apply for a 20-percent increase.
   b) Lots ten acres or greater in size may apply for a ten-percent increase.
B. Shared Parking
The DRO may authorize a reduction in the number of required parking spaces for multiple and mixed use projects and for uses that are in close proximity to one another that have different peak parking demands and operating hours. Shared parking shall be subject to the following standards: [Ord. 2020-001]

Figure 6.C.1.B – Shared Parking

1) Application
   A shared parking study shall be submitted in a form established by the Zoning Director.

2) Location
   All uses which participate in a shared parking plan shall be located on the same lot or on contiguous lots. The shared parking lot shall have access as though the uses were a single project.
3) **Shared Parking Study**

The shared parking study, shall clearly establish the uses that will use the shared spaces at different times of the day, week, month, or year. The study shall:

a) be based on the Urban Land Institute’s (ULI) methodology for determining shared parking, or other generally-accepted methodology;

b) address the size and type of activities, the composition of tenants, the rate of turnover for proposed shared spaces, and the anticipated peak parking and traffic demands;

c) provide for no reduction in the number of required handicapped spaces;

d) provide a plan to convert reserved space to required parking spaces; and,

e) be approved by the County Engineer prior to submittal, based on the feasibility of the uses to share parking due to their particular peak parking and trip generation characteristics.

4) **Reserved Space**

The Applicant shall account for 100 percent of the reduction granted through one of the following alternatives: reserved area; future parking garage; future rooftop parking; off-site parking; limitation of uses to adhere to parking regulations; or, shared parking. [Ord. 2011-001]

5) **Shared Parking Agreement**

A shared parking plan shall be enforced through written agreement or through a unity of control. A copy of the agreement between the Property Owner and PBC shall be submitted to the DRO and reviewed and approved by the County Attorney. The agreement shall be recorded with the Clerk of the Circuit Courts of PBC by the owner prior to issuance of a Certificate of Occupancy. Proof of recordation of the agreement shall be submitted prior to approval by the DRO. The agreement shall:

a) list the names and ownership interest of all parties to the agreement and contain the signatures of those parties;

b) provide a legal description of the land;

c) include a Site Plan showing the parking area and reserved area which would provide for future parking; [Ord. 2011-001]

d) describe the area of the parking parcel and designate and reserve it for shared parking unencumbered by any conditions which would interfere with its use;

e) agree and expressly declare the intent for the covenant to run with the land and bind all parties and all successors in interest to the covenant;

f) assure the continued availability of the spaces for joint use and provide assurance that all spaces will be usable without charge to all participating uses;

g) describe the obligations of each party, including the maintenance responsibility to retain and develop reserved areas for additional parking spaces if the need arises; [Ord. 2011-001]

h) incorporate the shared parking study by reference;

i) be made part of the Site Plan/Final Subdivision Plan; and,

j) describe the method by which the covenant shall, if necessary, be revised.

6) **Change in Use**

Should any of the uses in the shared parking study change, or should the Zoning Director or County Engineer find that any of the conditions described in the approved shared parking study or agreement no longer exist, the owner of record shall have the option of submitting a revised shared parking study in accordance with the standards of this Section or of providing the number of spaces required for each use as if computed separately.
CHAPTER D RESIDENTIAL PARKING STORAGE

Section 1 Storage

A. Applicability
1. Outdoor Storage
   A maximum of one recreational vehicle and any two or a maximum of three of the following, may be
   parked outdoors on a residential parcel with a residential unit: sports vehicle or marine vessel with
   accompanying trailers; and trailers may be parked outdoors in a residential district provided that the
   vehicles are: [Ord. 2007-013] [Ord. 2019-005] [Ord. 2020-001]
   a. owned and used by a resident of the premises;
   b. not parked in a required front setback or other area between the structure and the street, or on the
      street except for the purpose of loading or unloading during a period not to exceed two hours in
      any 24-hour period; [Ord. 2007-013]
   c. located in the side or rear yard and are screened from surrounding property and streets with an
      opaque wall, fence, or hedge a minimum of six feet in height;
   d. not used for living, sleeping, or housekeeping purposes;
   e. operative and currently registered or licensed, as required by State or Federal law;
   f. vehicles or marine vessels on navigable waterways are exempt; and, [Ord. 2007-013] [Ord. 2019-
      005]
   g) one vehicle which does not meet the requirements above may be approved through ZAR process
      upon demonstration that: [Ord. 2018-002]
      1) The Property Owner, family member, or legal tenant has a physical disability which requires a
      vehicle which cannot meet these requirements.

2. Unregistered or Unlicensed Vehicles
   One vehicle may be kept on site provided the vehicle is completely screened from view from adjacent
   roads and lots. [Ord. 2007-013] [Ord. 2020-001]

3. Indoor Storage
   Vehicles, marine vessels, and related trailers used for non-commercial purposes, whether licensed and
   operational or not, located in a fully-enclosed garage or permitted roofed structure. [Ord. 2007-013]
   [Ord. 2019-005]

4. Parking of Equipment, Vehicles, or Marine Vessels and Trailers in Residential Districts
   The following standards shall apply to the parking of equipment (including construction equipment),
   vehicles, recreational vehicles, sports vehicles, or marine vessels and trailers on residential parcels or
   adjacent streets in residential districts. For the purposes of this Section, legally established, non-
   residential uses in the AR district in lands designated Rural Residential in the Plan shall not be
   considered a residential district and is subject to Art. 5.B.1.A.3, Outdoor Storage and Activities, where
   a. General Prohibition
      1) On-Street
      No person shall park, store, or keep any equipment, commercial vehicle, recreational vehicle,
      marine vessel, trailer, or sports vehicle such as a dune buggy, jet skis, racing vehicle, off-road
      vehicle, air boat, canoe, or paddleboat, on any public street, or other thoroughfare or any R-O-
      W within a residential district for a period exceeding one hour in any 24-hour period, each such
      period commencing at the time of first stopping or parking. [Ord. 2007-013] [Ord. 2019-005]
      [Ord. 2019-034]
      2) On-Site
         a) It shall be unlawful for any owner of land in any residential district to park on, cause to be
            parked on, or allow to be parked on residentially-zoned land any unlicensed or unregistered
            vehicle or equipment, commercial vehicle, sports vehicle, recreational vehicle, marine
            vessel, or trailer for a period exceeding one hour in any 24-hour period, each such period
            commencing at the time of first stopping or parking, unless in compliance with Art.
            2019-034] [Ord. 2020-001]
         b) Vehicles shall only be parked on an improved surface in the Urban/Suburban Tier. [Ord.
            2019-034]
      3) Vacant Lot Prohibitions
         Parking shall be prohibited on all vacant properties in residential districts. [Ord. 2007-013]
CHAPTER E  LOADING STANDARDS

Section 1  General

A. Prohibitions
1. A street or driveway shall not be used for loading or unloading. [Ord. 2020-001]
2. A loading space shall not be used to satisfy parking requirements. [Ord. 2020-001]
3. The location of the loading area shall not interfere with the free circulation of vehicles in the parking lot. [Ord. 2020-001]
4. Repair Activities
   Only emergency repair service shall be permitted in a loading space. [Ord. 2020-001]

Section 2  Calculation

A. Loading Standards
1. Multiple Uses
   On lots containing more than one use, the total floor area shall be used to determine the number of spaces which are required. [Ord. 2016-042]
2. Fractions
   When calculation of the number of required loading spaces results in a fractional number, a fraction of less than one-half shall be disregarded and a fraction of one-half or more shall be rounded to the next highest full number. [Ord. 2016-042] [Ord. 2020-020]
3. Floor Area
   Loading standards that are based on square footage shall be computed using GFA. [Ord. 2016-042]
4. Unlisted Land Uses
   In the event that loading requirements for a particular use are not listed in this Article, the requirements for the most similar use shall be applied, in making the determination, any evidence of actual parking demand for similar uses shall be considered as well as other reliable traffic engineering and planning information that is available. [Ord. 2016-042]
5. Government Services and Government Facilities
   May request alternative calculations based on evidence of actual loading demand for similar uses or reliable traffic engineering and planning information. [Ord. 2020-001]

B. Minimum Loading Requirements
1. Standard “A”
   One space for GFA that is 10,000 square feet or greater, plus one space for each additional 40,000 square feet of GFA. [Ord. 2020-001]
2. Standard “B”
   One space for GFA that is 10,000 square feet or greater, plus one space for each additional 50,000 square feet of GFA. [Ord. 2020-001]
3. Type 1 Waiver – Reduction of Minimum Number of Required Loading Spaces
   An Applicant may apply for a Type 1 Waiver subject to submittal and approval of documentation such as: evidence of actual loading demand for the proposed use(s), as well as other available technical data, traffic engineering, and planning information. [Ord. 2007-001] [Ord. 2012-027] [Ord. 2016-042] [Ord. 2017-025] [Ord. 2020-001]

Section 3  Location

A. On Site
   Loading spaces shall be located adjacent to the building which it serves, and where required by Table 6.B.1.B, Minimum Parking and Loading Requirements, unless approved pursuant to Art. 6.E.3.C, Alternative Design Options. Loading spaces shall be proportionately distributed throughout the site. [Ord. 2008-037] [Ord. 2020-001]

B. Off Site or On Street
   Loading spaces shall be prohibited from being located off site or on street. [Ord. 2020-001]

C. Alternative Design Options
   Parking spaces and the drive aisle may be used in lieu of providing a designated loading space during non-business hours and shall be prohibited during the hours of operations. [Ord. 2020-001]
## Section 4  Design and Construction Standards

### A. Dimensions, Layout, and Screening

1. **Dimensions**
   a. **Loading Space**

### Table 6.E.4.A – Dimensions

<table>
<thead>
<tr>
<th>Standard “A” (12’ wide by 18.5’ long)</th>
<th>Square Footage of Gross Floor Area</th>
<th>Number of Required Loading Spaces</th>

<td>Each additional 50,000 sq. ft.</td>
<td>1</td>
</tr>
</tbody>
</table>

[Ord. 2020-001]

**Notes:**

1. The use of parking spaces and the drive aisle can be used in lieu of providing a designated loading space during off-business hours. [Ord. 2020-001]

2. Additional loading spaces adjacent to, and not separated from the first loading space may be reduced to a minimum of 12 feet in width. [Ord. 2005-041]

### Figure 6.E.4.A – Dimensions for Width and Length

[Ord. 2020-001]
b. **Maneuver Area**
An area equal to the width and length of the berth shall be provided for vehicle maneuvering directly behind the loading space it is intended to serve.

Figure 6.E.4.A – Vertical Clearance

c. **Vertical Clearance**
A vertical clearance of at least 15 feet shall be provided over the space and maneuvering apron, unless reduced by the DRO.
d. Type 1 Waiver – Reduction of Loading Space Width or Length
The minimum required width and length may be reduced for uses that require limited loading, to not less than 12 feet and 18.5 feet, respectively, subject to submittal and approval of documentation such as: evidence of actual loading demand for the proposed use(s), as well as other available technical data, traffic engineering, and planning information. [Ord. 2007-001] [Ord. 2016-042]

2. Layout
   a. Distance from Intersection
      1) Distance
         No loading space shall be located within 40 feet of the nearest point of the edge of pavement or curb of any two intersecting streets. [Ord. 2020-001]
      2) Setback
         Loading spaces shall be set back at least 20 feet from all front or side street property lines. When located at the rear of a building, a minimum five-foot setback from the property line shall be required.

   b. Access Marking
      Each loading space shall be provided with safe and convenient access to a street, without it being necessary to cross or enter any other required loading space. If any loading space is located contiguous to a street, ingress and egress to the street side shall be provided only through driveway openings. The dimension, location, and construction of these driveways shall be designed in accordance with this Article. In addition, loading spaces which have three or more berths shall have individual spaces marked, and spaces shall be so arranged that maneuvering to and from a loading space shall be on the same lot unless approved by the DRO. Maneuvering shall be permitted in an alley upon the approval of the DRO if surrounding uses are compatible with the subject use. [Ord. 2020-001]

3. Screening
   a. Bay Doors
      Bay doors shall be located and oriented away from residential property lines or set back a minimum of 50 feet and screened from view.
   b. Loading Area Screening
      Loading areas, which may include loading spaces, docks, and associated maneuvering areas, that are within 100 feet of a parcel with a residential FLU designation or use, or visible from a street R-O-W, shall be screened from view by buildings a minimum of 12 feet in height, or a wall in combination with landscape material, as follows: [Ord. 2008-037] [Ord. 2015-031]
      1) Options by Location
         a) In Between Loading Area and Property Line
            Unless located within a perimeter landscape buffer, the following shall be required: a 12-foot-high wall combined with foundation planting along the exterior side of the wall, in accordance with the façade standards of Table 7.C.3.B, Foundation Planting and Dimensional Requirements. [Ord. 2008-037] [Ord. 2015-031]
         b) Perimeter Buffers
            If located within a perimeter landscape buffer, minimum required wall or additional landscaping, shall be as follows: [Ord. 2015-031]
               (1) Within a Compatibility or Incompatibility Buffer: 12-foot wall; or [Ord. 2015-031]
               (2) Within a R-O-W Buffer: six-foot wall combined with an eight-foot-high hedge located on the exterior side of the wall. [Ord. 2015-031]
               (3) Minimum wall height required within perimeter buffers may be reduced when used in combination with a berm, provided that the total height does not exceed 12 feet. [Ord. 2015-031]
   c. Architectural Compatibility
      Walls shall be architecturally compatible with the adjacent structure. [Ord. 2015-031]
   d. Conflict with Other Applicable Regulations
      If a conflict exists between loading area screening and other Articles in this Code, the provisions above shall prevail except where superseded by State or Federal law. [Ord. 2015-031]
   e. Exemptions
      Loading area screening is not required if any of the following standards are satisfied: [Ord. 2015-031]
      1) the loading area is obstructed from view by an existing landscape buffer, a preserve, or a structure; [Ord. 2008-037]
      2) a structure or tenant consisting of 10,000 square feet or less; [Ord. 2008-037]
3) a single loading space; or, [Ord. 2008-037]
4) the WCRAO Executive Director may exempt a loading space from screening requirements for parcels located in the WCRAO, pursuant to Art. 3.B.14.I.2, Redevelopment Loading Option. [Ord. 2008-037]

ARTICLE 7
LANDSCAPING

CHAPTER A    GENERAL

Section 1    Purpose and Intent

This Article provides general direction and establishes minimum standards related to the following: [Ord. 2018-002]
A. Design principles to ensure compliance with the Managed Growth Tier System (MGTS); [Ord. 2018-002]
B. Review process and decision making standards for the evaluation of Landscape Plans; [Ord. 2018-002]
C. Requirements for buffers, interior, and other service areas of a property; [Ord. 2018-002]
D. Standards for plant materials and other landscape barriers or structures; [Ord. 2018-002]
E. Preservation of existing native vegetation, elimination of prohibited, and reduction of controlled plant species; [Ord. 2018-002]
F. Installation and continued maintenance; and, [Ord. 2018-002]

Section 2    MGTS Compliance

Landscape design shall comply with the relevant MGTS characteristics in both plant material selection and overall landscape composition. [Ord. 2018-002]
A. U/S Tier
   Landscaping in the U/S Tier should have a higher level of detail and more structure, such as pedestrian accents, formal or meandering arrangements in perimeter landscape buffers, street tree plantings, and inter-connections between pedestrian and vehicular areas. The WCRAO, IRO, and URAO, among others, serve to promote urbanized forms of development that accommodate walk-ability and other attributes of the urban environment. Greater flexibility and alternative landscape solutions are available to promote development within the boundaries of these areas. [Ord. 2010-005] [Ord. 2010-022] [Ord. 2014-025] [Ord. 2018-002]
B. AGR and Glades Tiers
   Landscaping in the AGR and Glades Tiers should consist of large open spaces with equestrian and agricultural elements, and an increased percentage of native plant species. [Ord. 2018-002]
C. Exurban and Rural Tiers
   Landscaping in the Exurban and Rural Tiers should incorporate more informal design patterns that include: reduced impervious areas; preservation of native vegetation; and, more naturalistic landscaped areas. Non-residential uses shall accommodate increased amounts of landscape materials in the parking areas and building foundation plantings. [Ord. 2009-040] [Ord. 2018-002]

Section 3.    Landscape Design Principles

This Section establishes standards for landscape design. It is the intent of this Article to encourage creativity in landscape design while providing general direction and criteria for the evaluation of a specific type of plan: Planting, Landscape, or ALP in order to issue a Landscape Permit. The following design principles are general standards to be applied by the Applicant, and used by the DRO and other County Agencies in evaluating whether the proposed Landscape Plans are in compliance with the requirements of this Article: [Ord. 2009-040] [Ord. 2018-002]
A. Appearance and Composition
   To improve the aesthetic appearance of development through creative landscaping that helps to enhance the natural and built environment. [Ord. 2018-002]
   The quality of landscape design is dependent upon the quantity, selection, and arrangement of plant materials. Landscape materials should be designed in a manner as to provide the following qualities and characteristics: [Ord. 2018-002]
   1. Texture
      Landscape designs should provide a textured appearance through the use of a variety of plant materials with varying leaf sizes, textures, and height. Formal landscape designs benefit from a uniform spacing of plants, whereas varied spacing and clustering of trees is more compatible with a naturalistic design. [Ord. 2018-002]
2. Color
Landscape designs should include a variety of plants that provide contrasting colors. Designs should include a mix of plants that flower throughout the year. [Ord. 2018-002]

3. Form
Landscape designs should consider the complete three-dimensional form of the landscaping, not simply the form of individual elements. The interrelationship of all landscape elements, whether they are plant materials, shade structures, pavement, and amenities should be considered so that the final design presents a coherent whole. Trees, shrubs, and hedges, especially those used for screening and buffering, should display a fullness at maturity that is typical of the species. [Ord. 2018-002]

B. Environmental Quality
To improve the environment by maintaining permeable land area essential to surface water management, reducing and reversing air, noise, heat, and chemical pollution through the biological filtering capacities of vegetation, promoting energy conservation through the creation of shade, and reducing heat gain in or on buildings or paved areas. [Ord. 2018-002]

1. Energy Conservation and Sustainable Design
Attention should be given to locating landscape elements in a manner that provides energy conservation benefits. Landscape designs should also consider natural drainage features and the use of pervious surfaces and areas to minimize runoff.

C. Water Conservation
To promote water conservation by encouraging: the installation of native and drought-tolerant plant materials in appropriate areas; the use of water conserving irrigation practices; and, the adherence to landscape installation standards and maintenance procedures that promote water conservation. [Ord. 2018-002]

1. Use of Native and Drought Resistant Plants
Landscape designs should feature native plant species, especially in areas adjacent to existing native vegetation. Where feasible, the re-establishment of native habitats should be incorporated into the landscape design. The use of drought-tolerant plants should enrich the existing landscape character, conserve water and energy, and provide as pleasant and varied a visual appearance as plants that require more water. [Ord. 2018-002]

D. Preservation of Existing Native Vegetation and Removal of Prohibited Plant Species
To encourage the preservation and planting of native vegetation as part of landscape design and eradicate prohibited species. [Ord. 2018-002]

1. Incorporation of Existing Vegetation
Landscape designs should incorporate and enhance existing specimen trees and native vegetation. Particular care should be given to preserve intact natural landscapes. Where previous landscaping has dramatically altered natural landscapes, new designs should seek to re-establish natural landscape patterns and plantings. Landscape designs should also include the eradication of prohibited plant species that have become nuisances because of their tendency to disrupt or destroy native ecosystems. [Ord. 2018-002]

E. Compatibility
To promote efficiency in the development of limited land resources by improving the compatibility of adjacent incompatible land uses, particularly residential development that is adjacent to non-residential development, through the use of landscape buffers. [Ord. 2018-002]

1. Buffering and Screening
Whenever possible landscape materials should be utilized to provide a spatial transition between different land uses, buffering between adjacent properties, and screening for parking, storage areas, or other service areas. Plants may be used with fences, walls, or berms to achieve the desired screening or buffering effect. Plant material should be mature enough at the time of planting to provide an effective buffer or screen, and should be planted in an appropriate location to allow for desired growth within a reasonable period of time. [Ord. 2018-002]

F. Quality Pedestrian Environment
In the U/S Tier, as well as pedestrian-oriented development types such as TDDs, landscape designs should give special attention to ensuring a safe and visually pleasant pedestrian environment. In high activity areas, such as commercial and workplace areas, benches, kiosks, artwork, and other streetscape elements should be incorporated into landscape designs. Pedestrian access to sidewalks or buildings should be considered in all landscape designs. Landscaping shall not obstruct pedestrian sightlines, especially at crosswalks. [Ord. 2018-002]
G. Enhancing Architecture
Landscape designs should be compatible with and enhance the architectural character and features of the buildings on site, and help relate the building to the surrounding landscape. Plant material shall be installed at an appropriate size and allowed to accomplish these intended goals. When foundation planting is required, plantings and planters should incorporate artistic elements and be compatible with a building’s architectural character. [Ord. 2018-002]

Figure 7.A. – Visual Interest for Pedestrian and Vehicular Traffic
Meandering sidewalks flanked by well composed curvilinear landscaping can add visual interest for pedestrian and vehicular traffic. [Ord. 2018-002]

Figure 7.A. – Streetscape Elements
Effective use of landscaping to frame the sidewalk and buffer the pedestrians from the street. Streetscape elements such as benches and potted plants enhance the pedestrian experience.

CHAPTER B APPLICABILITY AND APPROVAL PROCESS

Section 1 Applicability

The provisions of this Article shall be considered minimum standards and shall apply to all new development unless stated otherwise herein. [Ord. 2018-002]

Landscape requirements shall also be consistent with the standards of Art. 14.C, Vegetation Preservation and Protection, nothing in this Article shall be applied to contradict these requirements. [Ord. 2018-002]

B. Exemptions
The following developments are exempt from the standards and requirements of this Article:
1. Enlargement or repair of a Single Family dwelling unit, two-unit Townhouse, or two-unit Multifamily structure on a single lot.
2. Parking areas located within an enclosed parking structure.
3. Bona Fide Agriculture uses, unless stated otherwise in Art. 4.B.6, Agricultural Uses. Where the property has a use that is classified as Bona Fide Agriculture, with agricultural activities or accessory agricultural uses, the Property Owner shall provide a six-foot-high hedge along the frontage of the property where it is abuts a public street R-O-W. [Ord. 2018-002]
4. Uses such as airports, major utilities, and stockades which have planting requirements regulated by Federal or State law. Off-site planting of required landscaping may be approved in areas where there is a direct public benefit, such as in schools, parks, libraries, streets, and medians.
5. Projects in the Glades Area Economic Development Overlay (GAO) that have provided in-lieu funds to the Glades Thoroughfare Beautification Fund.
6. Community Vegetable Gardens located in the WCRAO or CCRT Areas, unless stated otherwise in Art. 4.B.6.C, Definitions and Supplementary Use Standards for Specific Uses. [Ord. 2019-005]

C. Public Park Exception or PO Deviations
Deviations or Exceptions from the minimum standards of this Article may be permitted as follows: [Ord. 2019-005]
2. Development supporting government facilities within the PO Zoning District, subject to Art. 2, Application Processes and Procedures and PPM #ZO-O-063, as applicable and as amended. [Ord. 2006-004] [Ord. 2007-013] [Ord. 2019-005]
D. Overlay Exceptions
Modifications of the requirements of this Article may be permitted pursuant to Art. 3.B.14.J, WCRAO Landscape Modifications, Art. 3.B.15.F.11, Landscape Standards in the IRO, and Art. 3.B.16.F.10, Landscape Standards in the URAO. [Ord. 2018-002]

Section 2 Definitions

Section 3 Approval Process for Landscape Plans
Approval process for Landscape Plans shall be subject to the requirements pursuant to Art. 2, Application Processes and Procedures. [Ord. 2016-042]

An Applicant may request review for compliance with this Article concurrent with an application that requires approval by the BCC, ZC, or DRO by submitting Preliminary or Final Landscape Plans. Final Landscape Plans shall be part of the Building Permit application unless a Condition of Approval requires Landscape Plans to be submitted at Final Approval by the DRO. An application for a Landscape Plan Review shall be submitted directly to the Zoning Division, and shall comply with the following requirements: [Ord. 2018-002]

A. Submittal Requirements
If the application is submitted at BCC, ZC, or DRO, the application shall consist of the appropriate forms as established by the Zoning Division, otherwise the application shall be included as part of the Building Permit application. The Plans shall be prepared in accordance with Art. 2, Application Processes and Procedures, the Zoning Technical Manual, and shall comply with applicable Code requirements and Conditions of Approval. [Ord. 2018-002]

B. Review of Landscape Plans
Landscape Plan applications shall be submitted to the DRO, and if applicable, the DRO will review in coordination with ERM and other County Agencies. [Ord. 2018-002]

C. Issuance of Landscape Permits
When all requirements are satisfied, the DRO shall issue a Landscape Permit referencing the approved Landscape Plan(s) associated with the permit in addition to any necessary inspections, Conditions of Approval, and maintenance obligations. The permit shall be maintained on site until the Final Landscape Inspection is signed off by the DRO. A copy of the Landscape Permit shall be maintained in the associated official Building Permit record, as well as the Zoning Division file. [Ord. 2009-040] [Ord. 2018-002]

D. Landscape Inspections
Unless otherwise stated in this Article, all developments subject to this Article may be inspected by PZB prior to and after installation of required landscaping. Required landscaping shall be approved by PZB prior to the issuance of a CO, or Certificate of Completion, whichever occurs first. Various types of Landscape Inspection shall be conducted at different stages of the development, as follows: [Ord. 2018-002]

1. Types of Landscape Inspection
   a. Preliminary Inspection – required to verify existing grades, vegetation, and necessary site preparation has been completed prior to any plant material being installed on the site to comply with the Landscape Permit; [Ord. 2009-040] [Ord. 2018-002]
   b. Final Inspection – required as part of the typical Building Permit process to ensure landscape material, irrigation, and Conditions of Approval on a Development Order are in compliance prior to final sign off that the landscape is completed and installed in accordance to the Landscape Permit. [Ord. 2009-040] [Ord. 2018-002]
   c. Annual Inspection – scheduled on the one-year anniversary date from the date of the Final Inspection noted on the Landscape Permit. Inspection shall be performed to ensure all landscape and irrigation continually complies with the Landscape Permit. If material or irrigation is missing, dead, or damaged the Property Owner shall be provided with a Notice to Correct, pursuant to Art. 10, Enforcement. [Ord. 2009-040] [Ord. 2018-002]
   d. Monitoring Inspection – performed in response to a complaint or Code Enforcement case as it relates to vegetation violations (e.g. missing or damaged plant material or changes to the landscape not previously approved in accordance with the Landscape Permit). [Ord. 2009-040] [Ord. 2018-002] [Ord. 2020-001]
E. Certification of Compliance
In addition to Final Inspection and certification by PZB, the Applicant shall submit a Certificate of Compliance to the PZB as a condition of issuance of a CO or Certificate of Completion. This Certificate shall be prepared and signed by a Landscape Architect licensed by the State of Florida and demonstrate that all of the provisions of this Article have been met. The certification statement, included in this Article, as Appendix B, Certification of Compliance, shall be made part of the documentation in the official Building Permit file. [Ord. 2009-040] [Ord. 2018-002]

1. Field Verification of Certification
PZB may elect to conduct a field inspection to verify the Certificate of Compliance. [Ord. 2018-002]

2. Acceptance of Certification
If no field verification is conducted by PZB within 30 days, the Certificate of Compliance shall be deemed to have been accepted provided it is complete with all the required information. Upon acceptance, the Certificate of Compliance shall be filed and maintained with the official records of the development. [Ord. 2018-002]

F. Optional Special Certification
In lieu of the Landscape Inspections and certification by PZB, the Applicant may submit a request for a Special Certificate of Compliance to the Zoning Director, and on a form established by the Zoning Division. [Ord. 2018-002]

1. Special Certification Procedures by the Applicant:
   a. The Applicant shall employ a Landscape Architect licensed in the State of Florida, or a qualified professional as authorized by F.S. ch. 481, pt. II, as amended. The Landscape Architect or qualified professional shall perform the following: [Ord. 2018-002]
      1) Be familiar with the Final Landscape Plans approved by the DRO; [Ord. 2018-002]
      2) Conduct inspections of the site; [Ord. 2018-002]
      3) Certify that landscaping was properly installed and meets all requirements of the Code or Conditions of Approval. The Certificate shall be signed and sealed by the Landscape Architect or qualified professional; [Ord. 2018-002]
      4) Understands that any misrepresentations or misstatements in the Special Certificate of Compliance shall constitute a violation of this Article and of State law; and, [Ord. 2018-002]
      5) Understands that any misrepresentations or misstatements in the Special Certificate of Compliance may also become the grounds for professional disciplinary action pursuant to State law. [Ord. 2018-002]

   b. The Applicant shall submit the completed Special Certification Form with the approved Landscape Plans to the PZB prior to issuance of a Building Permit, Paving Permit, a CO, or a Certificate of Completion, whichever is applicable. [Ord. 2018-002]

2. Verification of Special Certification by PZB
PZB may, at its option, conduct a Landscape Inspection to verify representation made in the Special Certificate of Compliance. [Ord. 2018-002]

3. Acceptance of Special Certification
If no verification is conducted by PZB, the Special Certificate of Compliance shall be deemed to have been accepted. Upon acceptance by PZB, the Certificate of Compliance shall be filed and maintained with the official records of the development. [Ord. 2018-002]
Section 4  Type 1 Waiver for Landscaping

An Applicant may seek minor modifications to the requirements of this Article that are identified in Table 7.B.4.A, Type 1 Waivers for Landscaping. Any requirements that are not listed herein may be eligible to be modified through other applicable processes pursuant to Art. 2, Application Processes and Procedures. The Applicant shall demonstrate in the Justification Statement and provide supporting documents that Art. 2.C.5.F.3, Standards for a Type 1 Waiver, and the applicable Criteria in the following Table have been met. [Ord. 2007-001] [Ord. 2016-042]  [Ord. 2018-002]

A. Applicability

Type 1 Waiver for Landscaping shall not be combined with other Variance requests for the same requirements. [Ord. 2018-002]

| Art. 7.C.2.C.1, Elimination of Incompatibility Buffer | Allow to eliminate the requirement of an Incompatibility Buffer for Residential Pods in a PDD or tracts within a residential subdivision. | The pod or tract is located adjacent to open space that is 100 feet or greater in width; or 
The site layout of the pod or tract will integrate recreational amenities with Multifamily units and CLFs. |
| Table 7.D.4.D, Location of Wall or Fence in a Landscape Buffer, Canopy Tree Planting for Incompatibility Buffer | Allow a reduction of 25 percent of required Canopy trees to be located on the exterior side of the wall or fence for Incompatibility Buffers. | The Applicant shall demonstrate in the request that the proposed wall or fence is an integral design component for security or aesthetic purpose. The required trees shall be located on both sides of the wall or fence. |
| **Berm** | | |
| Art. 7.D.6.A, Berm Tier Restrictions | Allow landscape berms within the Exurban, Rural, Agricultural Reserve, or Glades Tiers. | Berms are utilized to improve screening of loading, parking, or vehicular use areas, and to address compatibility issues. |
| **Foundation Planting** | | |
| Table 7.C.3.B, Foundation Planting and Dimensional Requirements – Façades to be Planted | Allow a 50 percent relocation of required foundation planting. | The foundation planting shall be relocated to another façade of the same building or structure, or to an expanded sidewalk that is located within 30 feet of the same building or structure; 
The relocated foundation planting shall have the minimum planting width; and, 
The overall total square feet for the foundation planting meets or exceeds the required foundation planting. |
| **Landscape Islands and Parking Structures** | | |
| Table 7.C.4.A, Landscape Island and Divider Median – Planting and Dimensional Requirements, Landscape Island Width | Allow the reduction of width of landscape island to five feet excluding curbs. | For infill sites with less than 25 parking spaces. |
| Table 7.C.4.A, Landscape Island and Divider Median – Planting and Dimensional Requirements, Divider Median Shrub Planting | Allow relocation of shrubs from divider medians to other areas of the site. | For industrial developments that do not have significant public visitation and the nature of the use does not benefit for interior plantings in parking areas. |
| Art. 7.C.4.A.1, Landscape Island Maximum Spacing | Allow to increase the number of spaces or distance to provide larger interior islands. | To allow existing vegetation to be preserved or existing vegetation to be relocated within parking areas. |
| Art. 7.C.4.F, Parking Structures | Allow perimeter planter requirement be altered if the planters are in conflict with the architectural design of the parking structure. | The Applicant is required to submit architectural elevations of the parking structure for Staff review and evaluation. The required planting for the planters shall be relocated to other areas of the same property where the parking structure is located. |
### Table 7.B.4.A – Type 1 Waivers for Landscaping

<table>
<thead>
<tr>
<th>Article/Table Reference and Title</th>
<th>Maximum Waiver</th>
<th>Criteria</th>
</tr>
</thead>
</table>
| Art. 7.C.5.A.1, Underground Easement – Relocation of Trees | Allow required trees to be relocated on the same site. [Ord. 2018-018] | • There is no reduction in the total quantity of the required trees; [Ord. 2018-018]  
• A maximum of ten percent of the required trees within the same buffer may be relocated; and, [Ord. 2018-018]  
• The Applicant shall identify on the Alternative Landscape Plan the new location of the tree(s) and whether root barrier will be utilized for the tree. [Ord. 2018-018] |
| Art. 7.C.5.B, Easements in On-Site Parking Areas – Existing Utilities | Allow existing easements to overlap the landscape islands. [Ord. 2018-018] | • The Applicant shall provide documentation from the utility easement holder that the easement(s) are recorded, and are not subject to a change in the location; [Ord. 2018-018]  
• The Applicant may utilize a small tree or a palm to satisfy the Canopy tree requirement. If the minimum separation between the tree and the utilities cannot be met, the required tree in the island may be relocated within the same site; [Ord. 2018-018]  
• The minimum percentage of Canopy tree pursuant to Table 7.C.4.A, Landscape Island and Divider Median – Planting and Dimensional Requirements, may be reduced to 50 percent and palms may be increased up to 50 percent, and, [Ord. 2018-018]  
• The Applicant shall identify on the Alternative Landscape Plan the new location of the tree(s) and whether root barrier will be utilized for the tree. [Ord. 2018-018] |

---

**B. Pre-Application Appointment (PAA) for a Type 1 Waiver**

The Applicant shall be required to schedule and attend a PAA with the Zoning Division Staff to review and discuss preservation of existing vegetation, possible design alternatives, and any Waivers that may be requested as part of the application. [Ord. 2007-001] [Ord. 2016-042] [Ord. 2018-002]

**C. Alternative Landscape Plan (ALP)**

The Applicant shall submit an ALP to the DRO to graphically depict the proposed Type 1 Waiver request(s). The DRO may allow the alternative designs or Waiver requests be incorporated on a Site or Subdivision Plan or any other types of Zoning Plan in lieu of the ALP. Upon the approval of the Type 1 Waiver(s), the Applicant shall finalize the ALP as Final Landscape Plans, and shall include it as part of the Building Permit Review, if applicable. [Ord. 2018-002] [Ord. 2020-001]

**Section 5 Vegetation Removal and Replacement**

For the purpose of this Section, the term vegetation shall include tree(s), palm(s), and pine(s). Vegetation that is required to be planted on a property per Code requirements or through a Condition(s) of Approval shall not be removed without first applying for and being issued a Vegetation Removal and Replacement Permit. Removal of vegetation without a valid permit shall be considered a violation of the Code or the DO, unless otherwise exempted by F.S. [Ord. 2019-005] [Ord. 2020-001]

**A. Exception**

The following exceptions shall apply to parcels with residential uses: [Ord. 2020-001]

1. No permit is required for a Single Family residence as long as the minimum required vegetation is maintained in accordance with standards set forth in Table 7.C.3.A, Interior Landscaping Requirements. [Ord. 2020-001]

2. Residential properties may be exempt from permitting requirements in accordance with F.S. § 163.045. Residential properties are properties that are developed with a residential use and may be located within either a residential or non-residential zoning district. [Ord. 2020-001]
B. Approval Process
An Applicant may request the removal of existing vegetation by submitting an application to the Zoning Division, and subject to the following procedures: [Ord. 2019-005] [Ord. 2020-001]

1. Pre-Application Site Meeting
Prior to the submittal of an application, the Applicant shall schedule an on-site meeting with Staff of the Permit/Landscape Review Section of the Zoning Division to discuss and inspect the vegetation that is proposed to be removed. Staff shall determine whether the vegetation is eligible for removal based on the standards listed below. If the vegetation is eligible for removal, Staff shall provide the Applicant a Vegetation Removal and Replacement Application to be completed for submittal. [Ord. 2019-005] [Ord. 2020-001]

2. Application Submittal Requirements
The Applicant shall submit the application to the Permit/Landscape Review Section. The application shall include a Justification Statement providing the reason for the proposed removal of the vegetation. The Applicant shall also submit either a Final Site, Subdivision, or Regulating Plan, or a Survey of the subject property. The Applicant shall identify the following: species, size, and location of the vegetation to be removed; and the required replacement of the vegetation and their proposed species, size, and location. [Ord. 2019-005] [Ord. 2020-001]

3. Application Review and Final Decision
Staff shall review the application utilizing the Standards for Removal that are listed below to consider whether to approve or deny the request. A Vegetation Removal and Replacement Permit shall be issued upon the approval of the application. The DRO may approve, approve with a Condition of Approval, or deny the request. [Ord. 2019-005] [Ord. 2020-001]

4. Standards for Removal and Replacement
In reviewing an application for Vegetation Removal and Replacement, Staff shall consider the following standards to determine whether the removal permit is granted: [Ord. 2019-005] [Ord. 2020-001]
   a. The Applicant’s justification for the removal; [Ord. 2019-005]
   b. The site condition of the area where the existing vegetation is located, and whether the location has easement overlap or proximity of the vegetation to the overhead electric utilities; [Ord. 2019-005] [Ord. 2020-001]
   c. The health condition of the vegetation; or, [Ord. 2019-005] [Ord. 2020-001]
   d. Any valid safety concerns that may arise if the removal of the vegetation is not allowed. [Ord. 2019-005] [Ord. 2020-001]

C. Replacement
All replacement of vegetation, shrubs, landscape barriers, and ground treatment shall be in compliance with Art. 7.E.3, Credit and Replacement, unless stated otherwise in Art. 7.B.1.B, Exemptions. [Ord. 2019-005] [Ord. 2020-001]

D. Timeline
Staff shall indicate the timeline of removal and replacement of the tree on the permit to ensure the replacement of the tree is done in accordance with the approval. The permit is valid for six months from the date of issuance. Failure to comply with the permit requirements, which include the established dates or any imposed Conditions of Approval, shall result in enforcement action, pursuant to Art. 7.G, Enforcement. [Ord. 2019-005] [Ord. 2020-001]

E. Inspection
The Applicant shall contact Staff when the trees are removed, and Staff shall schedule a site inspection to confirm that the trees have been removed, and that any required replacement of trees have been installed in conformance with the permit. [Ord. 2019-005]
CHAPTER C  LANDSCAPE BUFFER AND INTERIOR LANDSCAPE REQUIREMENTS

Section 1  General

Landscaping requirements shall include the perimeter and interior buffers, interior landscaping along the building façades, in parking lots, vehicular use areas, and any other pervious surface areas. This Chapter also addresses other requirements that may impact the establishment of a buffer or interior planting, which includes easement encroachment, retention areas, corner clips, and safe sight distances. In addition, specific requirements are established for Large Scale Commercial Development. [Ord. 2018-002]

Section 2  Types of Landscape Buffer

There are three types of landscape buffers: Right-of-Way (R-O-W); Compatibility, and, Incompatibility Buffers. Landscape requirements for each type of buffer shall be provided in accordance with the following standards, unless stated otherwise herein. [Ord. 2018-002]

Figure 7.C.2 – Buffer Type Detail

A. R-O-W Buffer

A R-O-W Buffer shall consist of Canopy trees, palms or pines, rows of shrubs, and groundcover. Palms or pines may be used as a substitute for Canopy trees. Clustering of plant materials and opening of tree planting are allowed to provide visibility for a wall sign or an architectural feature of the building, or to accommodate a walkway or an amenity. [Ord. 2018-002]

1. Applicability

R-O-W Buffers shall be provided along all public street R-O-W. This shall apply to those lots that are separated by a canal, lake, open space, or a combination thereof. [Ord. 2016-042] [Ord. 2018-002]

2. Exemptions

R-O-W Buffers are not required for the following: [Ord. 2018-002]

a. Where the R-O-W is an alley; [Ord. 2018-002]

b. A lot with a Single Family, Zero Lot Line, or Townhouse unit, [Ord. 2018-002]

c. A single lot with a single Cottage Home; [Ord. 2019-034]

d. Private streets internal to a PDD, TDD, a subdivision, or a lot. If trees are installed within the street R-O-W, installation of the trees shall be subject to the approval by the Engineering Department; and, [Ord. 2018-002]

e. Renewable Energy Solar Facility, within the Rural, Exurban, and Glades Tiers greater than 250 acres in size, shall comply with the requirements of Art. 4.B.7.C.8.d, Perimeter Buffers and Interior Tree Requirements, [Ord. 2019-023]
3. **Width**

The width of the R-O-W Buffer shall be determined by the width of the ultimate R-O-W pursuant to the Thoroughfare R-O-W Identification Map in the Plan, or as determined by the County Engineer. R-O-W widths for non-thoroughfare plan streets shall be determined by reference to **Art. 11.C.1.C.1, Access and Circulation Systems**. [Ord. 2018-002]

<table>
<thead>
<tr>
<th>Width of Ultimate R-O-W</th>
<th>Min. Width of Buffer</th>
</tr>
</thead>
<tbody>
<tr>
<td>≤ 40'</td>
<td>10'</td>
</tr>
<tr>
<td>41-99'</td>
<td>15'</td>
</tr>
<tr>
<td>≥ 100'</td>
<td>20'</td>
</tr>
</tbody>
</table>

[Ord. 2018-002]

a. **Width Reduction**

The required buffer width may be reduced by 50 percent where a project is separated from a R-O-W by a canal, lake, retention, open space area, or combination thereof, with a minimum width of 80 feet, and subject to the following requirements: [Ord. 2018-002]

1) The quantity of required Canopy trees, palms, or pines shall not be reduced; and [Ord. 2018-002]
2) No easement overlap in the buffer. [Ord. 2018-002]

b. **Shrub Reduction**

Required shrubs may be reduced by 50 percent if the reduction is sought concurrently with the width reduction of the same buffer, and subject to the following requirements: [Ord. 2018-002]

1) The percentage of shrub reduction shall be in proportion to the percentage of the width reduction of the buffer; and [Ord. 2018-002]
2) If the buffer is located adjacent to parking areas, the reduced shrubs shall still maintain an effective screening of the vehicle headlights from the street R-O-W. [Ord. 2018-002]

4. **Location**

R-O-W Buffers shall be located at the base building line, if applicable. [Ord. 2018-002]
5. Landscape Requirements

Planting for R-O-W Buffer shall be pursuant to Table 7.C.2.A, R-O-W Buffer Landscape Requirements, as follows: [Ord. 2018-002]

<table>
<thead>
<tr>
<th>Minimum Buffer Width Based on Width of Ultimate R-O-W</th>
<th>Quantity of Canopy Trees (1)(2)(3)</th>
<th>Quantity of Palms or Pines (1)(2)</th>
<th>Quantity of Shrubs (1)(2)(5)(6)</th>
<th>Landscape Barrier and Minimum Height (7)</th>
</tr>
</thead>
<tbody>
<tr>
<td>20 feet</td>
<td>1 Canopy tree per 25 linear feet.</td>
<td>1 palm or pine per 30 linear feet.</td>
<td>1 row of each: Groundcover – 1 per 1 linear foot; Small shrubs – 1 per 2 linear feet; and, Medium and large shrubs – 1 per 4 linear feet.</td>
<td>No</td>
</tr>
<tr>
<td>15 feet</td>
<td>1 Canopy tree per 25 linear feet.</td>
<td>1 palm or pine per 30 linear feet.</td>
<td>1 row of each: Groundcover and small shrubs – 1 per 2 linear feet; and Large shrubs – 1 per 4 linear feet.</td>
<td>No</td>
</tr>
<tr>
<td>10 feet</td>
<td>1 Canopy tree per 25 linear feet.</td>
<td>-</td>
<td>1 row of each: Small shrubs – 1 per 2 linear feet; and Medium shrubs – 1 per 5 linear feet.</td>
<td>No</td>
</tr>
</tbody>
</table>

Notes:
1. Linear feet is based on the property line where the landscape buffer is located. [Ord. 2018-002]
2. Width of pedestrian walkway and access points shall be deducted from the length of the property line when calculating the quantity of the plant materials. [Ord. 2018-002]
3. Palms or pines may substitute a Canopy tree pursuant to Art. 7.D.2.B.1 or Art. 7.D.2.C.1, Canopy Tree Substitute. [Ord. 2018-002]
4. Any areas of the buffer not planted with trees and shrubs shall be landscaped with ground treatment pursuant to Art. 7.D.7, Ground Treatment. [Ord. 2009-040] [Ord. 2018-002]
5. Groundcover shall not be allowed to substitute for shrubs. [Ord. 2018-002]
6. 100 percent of the buffer length shall be composed of a continuous opaque vertical landscape screen at least two feet in height if the R-O-W Buffer is located adjacent to parking areas of the same lot. [Ord. 2009-040] [Ord. 2018-002]
7. If walls or fences are provided in the R-O-W Buffer, the requirements shall be pursuant to Art. 7.D.4, Landscape Barriers. [Ord. 2018-002]

6. Clustering

Canopy trees, palms of same species, or pines may be clustered in R-O-W Buffers for non-residential development, and subject to the following standards: [Ord. 2018-002]

a. Shall comply with or exceed the total amount of required plant material; [Ord. 2018-002]

b. For the remainder of the required trees, palms, or pines that are not used for clustering, they shall be spaced evenly within the R-O-W Buffer to comply with the maximum openings, as follow: [Ord. 2018-002]

c. A maximum of four openings shall be allowed based on the lot frontage: [Ord. 2018-002]
   1) 300 linear feet to 600 linear feet – two openings; [Ord. 2018-002]
   2) 601 to 1,000 linear feet – three openings; and, [Ord. 2018-002]
   3) 1,001 linear feet and over – four openings. [Ord. 2018-002]

d. Openings shall not be wider than 40 linear feet measuring from: the center of each cluster or the center of the trunk of the outermost trees where the opening will be created; and, [Ord. 2018-002]

e. The minimum distance between two openings shall be 100 linear feet. [Ord. 2018-002]
B. Compatibility Buffer

A Compatibility Buffer shall consist of Canopy trees and rows of shrubs. Palms or pines may be used as a substitute for Canopy trees. [Ord. 2018-002]

1. Applicability

Compatibility Buffers shall be provided between all compatible uses or where a development or a lot is adjacent to lots with a compatible FLU designation, unless stated otherwise herein. [Ord. 2018-002]

2. Exemption

Compatibility Buffers shall not be required for the following: [Ord. 2018-002]

   b. Internal buffers within TDDs, unless specifically stated otherwise; [Ord. 2018-002]

   c. Where residential uses are not adjacent to other incompatible design elements such as roadways, usable open space areas, or where residential setbacks are less than adjacent residential development. [Ord. 2018-002]

   d. Renewable Energy Solar Facility, within the Rural, Exurban, and Glades Tiers greater than 250 acres in size, provided the site meets or exceeds the minimum 25-foot setback, and is adjacent to a parcel of land with agricultural or utility uses or a conservation FLU designation; or, [Ord. 2019-023]

   e. Renewable Energy Solar Facility, within the Rural, Exurban, and Glades Tiers greater than 250 acres in size, provided the site meets or exceeds a 50-foot setback, and is adjacent to a parcel of land with an existing landscape buffer. [Ord. 2019-023]

3. Width

The minimum width of a Compatibility Buffer is eight feet. All Compatibility Buffers that were approved with a five-foot width shall be considered as legal and conforming, and shall be vested if they are clearly shown on an approved Zoning Plan or a Development Permit. [Ord. 2018-002]
4. **Landscape Requirements**

Planting for a Compatibility Buffer shall be pursuant to Table 7.C.2.B, Compatibility Buffer Landscape Requirements, as follows: [Ord. 2018-002]

**Table 7.C.2.B – Compatibility Buffer Landscape Requirements (4)**

<table>
<thead>
<tr>
<th>Minimum Width</th>
<th>Quantity of Canopy Trees (1)(2)(3)</th>
<th>Quantity of Shrubs (1)(2)</th>

<td>No</td>
</tr>
</tbody>
</table>

[Ord. 2018-002]

Notes:
1. Linear feet is based on the property line where the landscape buffer is located. [Ord. 2018-002]
2. Width of pedestrian walkway and access points shall be deducted from the length of the property line when calculating the quantity of plant materials. [Ord. 2018-002]
3. Palms or pines may substitute a Canopy tree pursuant to Art. 7.D.2.B.1 or Art. 7.D.2.C.1, Canopy Tree Substitute. [Ord. 2018-002]
4. Any areas of the buffer not planted with trees and shrubs shall be landscaped with ground treatment pursuant to Art. 7.D.7, Ground Treatment. [Ord. 2018-002]
5. If walls or fences are provided in the R-O-W Buffer, the requirements shall be pursuant to Art. 7.D.4, Landscape Barriers. [Ord. 2018-002]

C. **Incompatibility Buffer**

An Incompatibility Buffer shall consist of Canopy trees, palms or pines, and rows of shrubs. Palms or pines may be used as a substitute for trees. In addition, an Incompatibility Buffer shall consist of a continuous, opaque landscape barrier. [Ord. 2009-040] [Ord. 2016-016] [Ord. 2018-002]

1. **Applicability**

Incompatibility Buffers shall be provided between all incompatible uses or incompatible pods in a PDD. [Ord. 2018-002]

   a. **Type 1 Waiver for Landscaping**

   An Incompatibility Buffer may not be required for Residential Pods of a PDD, or tracts within a residential subdivision subject to a Type 1 Waiver for Landscaping. [Ord. 2018-002]

2. **Types and Width of Incompatibility Buffers**

There are three types of Incompatibility Buffers, Types 1, 2, and 3, and shall be applied in accordance with Table 7.C.2.C, Incompatibility Buffer Types. The type of Incompatibility Buffer required shall be the most restrictive buffer type based on the use difference between adjacent uses. Where required between pods in a PDD, only one Incompatibility Buffer shall be required. [Ord. 2016-016] [Ord. 2018-002]

**Table 7.C.2.C – Incompatibility Buffer Types**

Notes:
1. Determination of use classification shall be consistent with Art. 4, Use Regulations. Where proposed development abuts vacant parcels, use classification shall be based upon Future Land Use (FLU) designation. [Ord. 2018-002]
2. Buffer for Minor Utilities or Electric Distribution Substation shall be determined by the DRO. [Ord. 2017-007] [Ord. 2018-002]
3. Shall also apply to a Type 2 CLF. [Ord. 2018-002]
a. **Width Reduction**
   The required buffer width may be reduced by 50 percent when a lot or a development is separated from another parcel of land that has an incompatible use or FLU designation by a canal, lake, retention, open space area with a minimum width of 100 feet, or combination thereof, or if the same type of buffer exists on the adjacent property, and subject to the following requirements: [Ord. 2018-002]
   1) The quantity of required Canopy trees, palms, or pines shall not be reduced; and [Ord. 2018-002]
   2) No easement overlap in the buffer. [Ord. 2018-002]

b. **Shrub Reduction**
   Required shrubs may be reduced by 50 percent if the reduction is sought concurrently with the width reduction of the same buffer, and subject to the following requirements: [Ord. 2018-002]
   1) The percentage of shrub reduction shall be in proportion to the percentage of the width reduction of the buffer; and [Ord. 2018-002]
   2) The required six-foot-high landscape barrier shall be provided. [Ord. 2018-002]

3. **Landscape Requirements**
   Landscaping for an Incompatibility Buffer shall be pursuant to Table 7.C.2.C.3, Incompatibility Buffer Landscape Requirements, as follows: [Ord. 2018-002]

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

[Ord. 2018-002]

Notes:
1. Linear feet is based on the property line where the landscape buffer is located. [Ord. 2018-002]
2. Width of pedestrian walkway and access points shall be deducted from the length of the property line when calculating the quantity of the plant materials (trees, shrubs and groundcover). [Ord. 2018-002]
3. Palms or pines may substitute a Canopy tree pursuant to Art. 7.D.2.B.1 or Art. 7.D.2.C.1, Canopy Tree Substitute. [Ord. 2018-002]
4. Substitute of the required wall may be requested through a Type 2 Waiver. [Ord. 2018-002]
5. The wall requirement shall not be required for a Type 3 Incompatibility Buffer in an AGR-PUD in accordance with Art. 7.C.2.C.4, AGR-PUD Landscape Buffer. [Ord. 2008-003] [Ord. 2018-002]
6. Any areas of the buffer not planted with trees and shrubs shall be landscaped with ground treatment pursuant to Art. 7.D.7, Ground Treatment. [Ord. 2018-002]
7. If walls or fences are provided in a Type 1 or Type 2 Incompatibility Buffer, the requirements shall be pursuant to Art. 7.D.4, Landscape Barriers. [Ord. 2018-002]

4. **AGR-PUD Landscape Buffer**
   a. A Type 3 Incompatibility Buffer shall be required between the Development Area and all adjacent properties zoned AGR, AP, SA, or AR, including Preservation Areas. The buffer shall be a minimum of 50 feet in width and a wall shall not be required. [Ord. 2006-004] [Ord. 2008-003] [Ord. 2018-002]
   1. **Buffer Width Reduction**
      The minimum 50-foot buffer width required along the perimeter of an AGR-PUD Development Area may be reduced for the following: [Ord. 2013-001] [Ord. 2018-002]
      a) **Abutting R-O-W, Open Space, or Another Buffer**
         A 50 percent reduction (minimum of 25 feet in width) shall be permitted if: [Ord. 2013-001] [Ord. 2018-002]
         a) the buffer is within a non-residential pod and adjacent to a R-O-W greater than 50 feet in width; [Ord. 2018-002]
b) the buffer is adjacent to another platted PUD buffer a minimum of 20 feet in width; or, [Ord. 2018-002]
c) the buffer is adjacent to open space (e.g. lake, canal, etc.) greater than 50 feet in width. [Ord. 2018-002]

b) Abutting a Rural Parkway

(1) A reduction to a minimum of 15 feet in width shall be permitted if the buffer is abutting a Rural Parkway a minimum of 100 feet in width. [Ord. 2013-001] [Ord. 2018-002]

b. A Lot with Split Zoning of IPF and AGR-PUD

No landscape buffer shall be required between the portion of the lot zoned IPF and AGR-PUD Zoning Districts, provided both areas are owned by Faith Farm Ministries or another single non-profit entity whose primary mission is residential treatment and recovery program. [Ord. 2020-019]

Section 3 Interior Landscaping

Interior landscaping shall include, but not limited to: foundation planting; landscape islands and medians; screening for loading areas; vehicular use areas; and, any pervious areas that could be utilized for additional planting. Interior landscaping shall consist of mainly Canopy trees and shrubs. Palms or pines and groundcover may also be utilized to enhance the interior landscaping. If palms or pines are used in lieu of Canopy trees, they shall be planted in accordance with Art. 7.D.2.B.1 and Art. 7.D.2.C.1, Canopy Tree Substitute for palms and pines. [Ord. 2018-002]

A. Calculation of Interior Landscaping

Planting in the perimeter buffers shall not be counted to satisfy the interior landscaping requirements. Interior quantities for trees and shrubs shall be calculated based on pervious areas, excluding Preservation Areas, lakes, retention areas, and perimeter landscape buffers. [Ord. 2009-040] [Ord. 2014-025] [Ord. 2016-042] [Ord. 2018-002]

Notes:
1. Tree and shrub planting requirement calculations for residential lots shall be based on the pervious surface areas of the lot. For Cottage Homes that have less than 1,250 square feet of lot size, a minimum of one flowering tree or palm shall be provided. [Ord. 2014-025] [Ord. 2018-002] [Ord. 2018-018]
2. No maximum for lots with Multi family units. [Ord. 2018-002]
3. Interior quantity of trees and shrubs shall be based on ten percent of the gross paved areas of the vehicular use area, excluding preservation, lakes, and retention areas. [Ord. 2018-002]
B. Foundation Planting

1. Applicability
   a. Foundation planting shall be provided along façades as required by Table 7.C.3.B, Foundation Planting and Dimensional Requirements for non-residential structures unless specifically exempted by this Article. Planting shall also be required at the base of freestanding ground-mounted signs. [Ord. 2018-002]

Notes:

1. The minimum length shall be calculated by the total length of the applicable side of the structure, excluding garage doors and loading bays. [Ord. 2018-002]

2. U/S Tier Standards may be applied to a PUD or a TDD with a village center, civic site, or suburban center, general or edge subarea. [Ord. 2010-022] [Ord. 2018-002]

3. Foundation Planting may be relocated to any façade of the same building or structure subject to Table 7.B.4.A, Type 1 Waiver for Landscaping. [Ord. 2018-002]

4. For Freestanding ATMs or Unmanned Retail Structure, the façade where the point of service is located shall be exempt from the Foundation Planting requirement. [Ord. 2018-002]

5. For Large Scale Commercial Development, 50 percent of the height of the trees shall be a minimum of two-thirds of the height of the façade of which the foundation planting is located. [Ord. 2018-002]

b. The Applicant shall identify on the Zoning Plan(s) the primary pedestrian entrance of each building. [Ord. 2018-002]

   1) For building(s) with a single tenant and multiple entrances, the façade where the primary pedestrian entrance is located will be considered as the front façade. [Ord. 2018-002]

   2) For a building with multiple tenants that has individual primary pedestrian entrance that serve each tenant, the front façade will be the façades where the primary pedestrian entrances are located. The rear façade shall be considered that side of the building where the loading area is located. [Ord. 2018-002]
Figure 7.C.3.B – Foundation Planting Requirements

[Ord. 2018-002]
2. Exemptions
   a. Agricultural or industrial buildings that are not visible from a public street or residential zoning district. [Ord. 2018-002]
   b. Buildings which are exempt from local Building Permits or government review pursuant to State or Federal Statutes. [Ord. 2018-002]
   c. Structures within a TDD, where a build-to-line is established along the sidewalk, except where required in TDD, LCC, IRO, and PRA DOs are exempt from foundation planting requirements for primary and secondary, or other similar types of building frontages, buildings along an alleyway or access way to a parking area, or where buildings front on a plaza or square. [Ord. 2005-002] [Ord. 2006-004] [Ord. 2010-022] [Ord. 2018-002]
   d. Properties where the required planting area would overlap a required buffer. [Ord. 2018-002]
   e. Accessory buildings and structures subject to Zoning Division approval. [Ord. 2018-002]

3. Establishments with Drive-Thru, Freestanding ATMs, and Unmanned Retail Structures
   Location of required foundation plantings may be modified if the planting and dimensional requirements are met in the relocated area. [Ord. 2013-021] [Ord. 2018-002]

Figure 7.C.3.B – Establishments with Drive-Thru, Freestanding ATMs, and Unmanned Retail Structure

- Urban/Suburban Tier
- AGR and Giades Tiers
- Exurban and Rural Tiers

   a. Walk Up
   Foundation planting areas may be relocated up to a maximum of ten feet away from the applicable façade to accommodate pedestrian walkways, access to the ATM or Unmanned Retail Structure, or as needed to comply with F.S. ch. 655, F.S. ch. 960, security lighting, or Crime Prevention Through Environmental Design (CPTED) guidelines. [Ord. 2013-21] [Ord. 2017-007] [Ord. 2018-002]

   b. Drive-Through
   Foundation planting areas may be relocated within 30 feet from the original required façades of the drive-through. [Ord. 2013-21] [Ord. 2017-007] [Ord. 2018-002]
C. Planting around Signs

A three-foot-wide planting area shall be required around the base of all ground-mounted signs. One shrub for each ten square feet of planting area shall be installed within the planting area and maintained at a minimum height of 18 inches. Monument signs six feet in height or less may be surrounded by ground cover on all sides instead of shrubs. Landscaping and trees that interfere with the visibility of signage may be relocated to the rear of the sign planting area, subject to approval by the Zoning Division. [Ord. 2018-002]

Section 4. Landscape Requirements for On-Site Parking

On-site parking and interior vehicular use areas shall be provided with landscape islands, divider medians, or where applicable, landscape diamonds, and subject to the following landscaping requirements. Planting within perimeter landscape buffers required by Art. 7.C.2, Types of Landscape Buffer, shall not be used to satisfy these requirements. [Ord. 2018-002]

A. Landscape Islands

Landscape islands shall be provided along the terminal of parking spaces, interior of the parking area, and along major internal driveways. Parking spaces shall not be terminated or abutting a drive aisle, driveway, or loading space without a landscape island. In addition, landscape islands shall be provided in accordance to the maximum spacing requirements for each Tier, and Table 7.C.4.A, Landscape Island and Divider Median – Planting and Dimensional Requirements. [Ord. 2018-002]

1. Maximum Spacing
   a. U/S Tier
      One landscape island per ten spaces (maximum 100 feet apart). [Ord. 2018-002]
   b. AGR and Glades Tiers
      One landscape island per eight spaces (maximum 80 feet apart). [Ord. 2018-002]
   c. Rural and Exurban Tiers
      One landscape island per six spaces (maximum 60 feet apart). [Ord. 2018-002]
2. **Increased Interval of Landscape Islands**  
   The distance between landscape islands may be increased to a maximum of 12 standard parking spaces for the U/S Tier, ten spaces for the AGR and Glades Tiers, and eight spaces for the Exurban and Rural Tiers. The width of abutting landscape islands, where the increased interval occurs, shall be increased by one foot for each additional space. **[Ord. 2018-002]**

   a. **Required Canopy Tree**  
      The required Canopy tree for each expanded island shall have a minimum height of 12 feet. No palm or pine substitute for Canopy trees is allowed. **[Ord. 2018-002]**

```
[Ord. 2018-002]
```

**Figure 7.C.4.A – Increase Intervals of Landscape Islands**

- **Urban/Suburban Tier**
  - 12 standard parking spaces
  - Width increased by 1 foot per additional space

- **AGR and Glades Tiers**
  - 10 standard parking spaces

- **Rural and Exurban Tiers**
  - 8 standard parking spaces
3. Type 1 Waiver for Maximum Spacing

Landscape islands may be increased in spacing to accommodate preservation of existing vegetation subject to a Type 1 Waiver for Landscaping. [Ord. 2018-002]

</table>

Minimum Tree Planting Requirements (2)
- Tree Planting – Landscape island: 1 tree per island
- Tree Planting – Divider Median: 1 tree per 30 linear feet
- Landscape Diamond: 1 palm per diamond

Minimum Shrub and Groundcover Planting Requirements
- Groundcover Planting – Landscape Island (3): Grass or appropriate Groundcover to be planted in island
- Shrub Planting – Divider Median (5): Medium Shrubs planted at 30 inches on center, and appropriate Groundcover
- Landscape Diamond: Appropriate Groundcover or Tree Grate

Notes:
1. Minimum width of islands shall exclude curbs, sidewalks, and utility easements. The width must be increased by the minimum amount necessary to meet the needs of the utility providers or to accommodate a sidewalk. [Ord. 2018-002]
2. A minimum of 75 percent of all trees required in the interior of vehicular use areas shall be Canopy trees. Palms may count as one required tree, not to exceed 25 percent of the total required trees. [Ord. 2018-002]
3. Apply to non-residential Planned Development only – Landscape islands facing major internal driveways shall provide a two-foot-high continuous hedge for a minimum of 60 percent of the island length. Hedge shall be maintained with a maximum height of 30 inches. [Ord. 2018-002]
4. Landscape islands shall not overlap landscape buffers. [Ord. 2018-002]
5. Required shrubs may be relocated subject to a Type 1 Waiver for Landscaping. [Ord. 2018-002]

Figure 7.C.4.A – Landscape Islands
B. Divider Medians

Divide medians shall be provided in parking lots with at least two or more vehicular parking aisles in the U/S, AGR, and Glades Tiers, or in vehicular use areas to channel traffic circulation, as follows: [Ord. 2018-002]

1. Locate between every third aisle or sixth row of parking spaces, and between all parking and vehicular use areas. Divider medians shall be provided in accordance to Table 7.C.4.A, Landscape Island and Divider Median—Planting and Dimensional Requirements. [Ord. 2018-002]

2. Adjacent to driveways where external access points are located for PDDs or TDDs. [Ord. 2018-002]

C. **Landscape Diamonds**
Landscape diamonds may be distributed throughout the interior of an on-site parking area as an alternative to divider medians for lots that are located in the WCRAO, IRO, or URAO. Landscape diamonds shall be located only at the common intersection of four parking spaces and spaced a maximum of four parking spaces apart. A raised curb is required around the entire landscape diamond when wheel stops are not used. [Ord. 2018-002]

Figure 7.C.4.C – Landscape Diamond Detail

D. **Vehicular Use Area**
Interior landscaping for the vehicular use area shall be landscaped to provide adequate screening of vehicular uses. A minimum of ten percent of the gross paved areas of the vehicular use area shall be designated for interior landscaping. [Ord. 2018-002]

1. If the vehicular use area is adjacent to a perimeter landscape buffer, the required plant materials may be designed as an integral part of the buffer, provided the minimum quantity for the interior landscaping and the perimeter buffer is not reduced. [Ord. 2018-002]

2. Interior landscaping may be in form of a divider median and implemented pursuant to Table 7.C.3.A, Interior Landscaping Requirements. [Ord. 2018-002]

   a. **Specialized Vehicular Areas Not Open to the Public**
   The required interior landscaping shall be allowed to be transferred to other interior landscaping areas or within the landscape buffers. [Ord. 2018-002]

E. **Landscape Protection Measures**
The landscape area adjacent to any on-site parking space or vehicular use area shall be protected from vehicular encroachment by the use of wheel stops or continuous concrete curbing. [Ord. 2018-002]
1. Curbing
All landscape areas subject to vehicular encroachment shall be separated from vehicular use areas by six-inch, non-mountable, FDOT Type “D” or FDOT Type “F,” concrete curbing. Curbing shall be machine-laid, formed-in-place, or integrally installed with the pavement. Landscaped areas adjacent to vehicular use areas shall be surrounded with a continuous raised curb. [Ord. 2010-022] [Ord. 2018-002]

   a. Exemptions
      1) Divider medians that abut parking spaces with wheel stops; or [Ord. 2010-022]
      2) Properties located in the AGR, AP, or AR Zoning Districts that support Bona Fide Agriculture uses. [Ord. 2010-022] [Ord. 2018-002]

2. Alternative to Curbing
   Alternative to curbing may be allowed for properties that are located in the following zoning districts and use subject to the requirements listed in Art. 7.C.4.E.1, Curbing: [Ord. 2018-002]
   a. AGR, AP, and PO;
   b. AR Zoning District in the AGR, Glades, Exurban, and Rural Tiers; and, [Ord. 2018-002]
   c. Cemeteries in all Tiers. [Ord. 2018-002]

3. Alternative Landscape Protection
   Alternative landscape protection may include, but not limited to: bollards; fences; hedges; or, planters. Details of these landscape protection measures shall be shown on the Regulating Plan approved by the DRO. [Ord. 2018-002]
   a. For properties located in the PO Zoning District, alternative landscape protection may be allowed when it can be demonstrated to the Zoning Director that the curbing will interfere measures may with the traffic circulation of the proposed use. [Ord. 2010-022] [Ord. 2018-002]

4. Wheel Stops
   Wheel stops shall have a minimum height of six inches above the finished grade of the parking area, properly anchored, and continuously maintained in good condition. The space between the wheel stop and the front end of the parking space may be paved for anchoring and maintenance purposes. Wheel stop anchor rods shall be set through the wheel stop and the pavement. The bottom of the wheel stop must rest fully on the pavement to prevent rocking. Public Parks in the PO Zoning District that are exempt from curbing requirements shall also be exempt from wheel stop requirements. [Ord. 2006-004] [Ord. 2018-002]

F. Parking Structures
Perimeter planters shall be provided along the exterior of parking structures located within 500 feet of a public R-O-W or residential zoning district. Planters shall provide a total of one-half square foot of planting area for each linear foot of façade per parking level. Planting areas may be arranged in linear fashion or clustered at intervals or on levels, and shall be provided with permanent irrigation to permit watering of plant materials. The perimeter planter requirement may be altered if in conflict with the architectural character of the structure, subject to a Type 1 Waiver for Landscaping. [Ord. 2018-002]

Section 5. Overlap in Landscape Buffers and On-Site Parking Areas
Underground, above ground, or overhead utility easements, private utilities without an easement, and drainage areas may overlap a landscape buffer provided the required planting has sufficient area for healthy plant growth, and the required quantity is not reduced. For the purpose of this Section, drainage areas may include: drainage easements, retention or detention areas, and swales, as determined by the Land Development Division. [Ord. 2020-001]

A. Overlap in a R-O-W and Incompatibility Buffers
   An easement, private utilities without an easement, drainage area, or a combination thereof may be permitted to overlap by a maximum of five feet, provided there are no Conditions of Approval that prohibit width reduction or easement encroachment into the landscape buffer. [Ord. 2020-001]

1. Underground Utilities
   If a wall with a continuous footer is proposed, a minimum of ten feet of clear planting area is required from the footer, and the buffer width shall be increased to accommodate the wall and the required planting. The landscape buffer may be traversed by easements or access ways as necessary to comply with the standards of this Article and Art. 11, Subdivision, Platting, and Required Improvements, and other PBC Codes. Easements shall be identified on the Zoning Plans prior to the application for Building Permit. [Ord. 2018-002] [Ord. 2018-018] [Ord. 2020-001]
2. Overhead Utilities

Vegetation that is planted within or abutting any easement with overhead utilities shall comply with the planting and maintenance requirements in FP&L’s publication “Right Tree, Right Place,” available from the Zoning Division. The Applicant shall take into consideration the mature height and spread of the species beneath or adjacent to overhead utilities. For the purpose of this Section, the term vegetation shall include, trees, palms, or pines. Where overhead utilities exist, trees shall be maintained so that the mature tree canopy is a minimum of ten feet from overhead lines. [Ord. 2019-005]

a. Planting near Overhead Electric Utilities

The setbacks shall be measured from the centerline of the trunk to the outer edge of the overhead utility lines. The following minimum setbacks shall apply: [Ord. 2019-005]

1) Vegetation that at a mature height may grow to 50 feet or greater shall be planted at least 50 feet away from overhead electric utility lines; [Ord. 2019-005]
2) Vegetation that at a mature height may grow to between 14 to 49 feet shall be planted at least 30 feet away from overhead electric utility lines; [Ord. 2019-005]
3) Palms shall be planted at least 20 feet plus the maximum palm frond length away from overhead electric utility lines; and, [Ord. 2019-005]
4) Only vegetation that at a mature height grow to less than 14 feet shall be permitted to be planted underneath or adjacent to overhead electric utility lines. [Ord. 2019-005]

Figure 7.C.5.A – Overhead Utilities and Setbacks for Trees, Palms, or Pines

b. Transformer Cabinet in the Overhead Electric Utilities Easement

Planting around transformer cabinet shall be set back from the cabinet a minimum of eight feet on the front and three feet on the sides and rear. [Ord. 2019-005]
3. Detention or Retention Areas, Swales, and Drainage Easements

Detention or retention areas, drainage easements, and swales, may overlap required landscape buffers. The required planting for the landscape buffer may be installed in the detention or retention areas, swales, or drainage easements subject to the mutual agreement and approval of the Directors of Zoning and Land Development Divisions, and any applicable Agencies or easement holders. [Ord. 2006-004] [Ord. 2016-042] [Ord. 2018-002] [Ord. 2020-001]

4. Type 1 Waiver for Landscaping

Required plants, which are overlapped by an easement, may be planted elsewhere on the same site subject to Art. 7.B.4, Type 1 Waiver for Landscaping. [Ord. 2018-002] [Ord. 2018-018] [Ord. 2020-001]

B. Easements in On-Site Parking Areas

1. Underground Utilities

Utility easements may encroach landscape islands provided there is a sufficient area for the growth of the required tree within the same island. The width and length of the island may be increased by the minimum amount necessary to meet the separation requirements of the utility providers, indicated below. [Ord. 2018-018]

   a. PBC Water Utilities Separation

      A minimum of ten feet shall be provided, by measuring from the outer edge of the pipes to the edge of the pit where the tree is to be planted. The Department of Water Utilities (WUD) may allow the separation distance be reduced to seven feet if tree root barriers are installed. [Ord. 2018-018] [Ord. 2019-005]

   b. Fire-Rescue Utility Separation

      A minimum of five feet shall be provided, measuring from the outer edge of the fire hydrant to the pit where the tree is to be planted. [Ord. 2018-018]

   c. Existing Utilities

      For sites where existing underground utilities are encroaching into landscape islands, and there is not a sufficient area for the growth of the required tree within the same island, the relocation of the required tree may be requested subject to a Type 1 Waiver for Landscaping. [Ord. 2018-018]

   d. Other Utility Authorities – Root Barrier and Separation Requirement

      Proposed landscaping near non-PBC utilities shall be subject to that utility’s separation requirements. [Ord. 2018-018]

Figure 7.C.5.B – Easements in On-Site Parking Areas

[Ord. 2018-018]
1. Planting may be allowed in the dry detention area if approved by the Land Development Division. [Ord. 2016-042] [Ord. 2018-002]

C. Lake Maintenance Easements (LME)
Planting of new trees or relocation of native, non-prohibitive, or specimen vegetation may occur in the LME subject to the approval by the ERM Department and Land Development Division. [Ord. 2016-042] [Ord. 2018-002]
Section 6  Corner Clips and Safe Sight Distances

Landscaping within corner clips and safe sight distances required by Art. 11, Subdivision, Platting, and Required Improvements, shall be subject to the following: [Ord. 2018-002]

A. An area of unobstructed visibility shall be maintained between 30 inches and eight feet above the crown of the adjacent roadway. [Ord. 2018-002]

B. Vegetation located adjacent to and within corner clip or safe sight distance areas shall be trimmed so that limbs or foliage do not extend into the required visibility area. [Ord. 2018-002]

C. All landscaping in a corner clip or safe sight distance shall be planted and perpetually maintained by the Property Owner, except where maintained by another entity such as a Homeowner's Association (HOA). [Ord. 2018-002]

Figure 7.C.6.C – Corner Clip and Visibility Requirements
Section 7       Large Scale Commercial Development

A. Perimeter Buffer
In addition to the requirements of this Code, developments with single tenants 65,000 gross square feet or more shall be subject to the following standards: [Ord. 2005-002] [Ord. 2018-002]
1. R-O-W Buffers
The width, berm, and planting requirements along streets, thoroughfares, and/or other means of vehicular access shall be upgraded as follows: [Ord. 2005-002] [Ord. 2018-002]
   a. U/S Tier
   b. Glades and Rural/Exurban Tiers
      1) A minimum 50-foot-wide buffer. If a lake/retention area is located along a R-O-W, the buffer may be split to border the perimeter of the lake, 25 feet along the street, and 25 feet along the interior side of the lake. [Ord. 2005-002] [Ord. 2018-002]

2. Compatibility Buffers
The width, berm, and planting requirements along property lines adjacent to compatible uses shall be upgraded as follows: [Ord. 2005-002] [Ord. 2018-002]
   a. U/S Tier
   b. Glades and Rural/Exurban Tiers

3. Incompatibility Buffers
The width, berm, and planting requirements along property lines adjacent to residential and other incompatible uses, and vacant properties with a residential FLU designation, shall be upgraded as follows: [Ord. 2005-002] [Ord. 2018-002]
   a. U/S Tier
   b. Glades and Rural/Exurban Tiers

B. Foundation Planting
Foundation planting shall meander along building façade, and shall not be entirely located at the base of the building. Dimensions and planting for the required foundation planting shall be based on the Tier of which the proposed development is located within, and subject to Table 7.C.3.B, Foundation Planting and Dimensional Requirements. [Ord. 2005-002] [Ord. 2018-002]

C. Encroachment
No easement encroachment shall be permitted in required perimeter buffers, except for bisecting utility easements and required safe sight distance easements not to exceed a maximum of 50 percent of the required buffer width. [Ord. 2005-002] [Ord. 2018-002]

D. Perimeter Sidewalk
A perimeter sidewalk a minimum of five feet shall be required in all R-O-W Buffers 50 feet in width, and shall meander through the buffer. [Ord. 2005-002] [Ord. 2018-002]
E. Berm

Berms shall be staggered, rolling, or offset, as indicated in Figure 7.C.7.E, Typical Example of Staggered, Rolling, or Offset Berm. [Ord. 2005-002] [Ord. 2018-002]

![Figure 7.C.7.E – Typical Example of Staggered, Rolling, or Offset Berm](image)

[Ord. 2005-002]

CHAPTER D  LANDSCAPE STANDARDS

Section 1  General

This Chapter provides the minimum standards for plant materials, which includes trees, palms, pines, shrubs, and ground treatment. It also addresses requirements for landscape barriers, which consist of hedges, walls, and fences. [Ord. 2018-002]

A. Plant Species

All plants shall comply with Grades and Standards for Nursery Plants, latest edition, prepared by the Florida Department of Agriculture and Consumer Services. A minimum of 60 percent of required plant material shall be selected from Appendix A, PBC’s Preferred Species List – Plant Materials Database, As Amended, published by the Zoning Division, or the list of native and drought-tolerant species in the most recent edition of the “SFWMD’s Waterwise Florida Landscapes.” A minimum of 60 percent of required plant materials shall be native species. [Ord. 2018-002]

Section 2  Trees, Palms, and Pines

A. Trees

The size of a Canopy tree shall include the height and caliper pursuant to the Shade Trees, Types One through Five Matrices of the Grades and Standards for Nursery Plant. The minimum size of a Canopy tree shall be 12 feet in height with a two and one-half-inch caliper at installation, unless stated otherwise below. [Ord. 2014-025] [Ord. 2016-042] [Ord. 2018-002] [Ord. 2019-005]

1. Average Height

   Required Canopy tree size may be achieved by utilizing the average height calculation.
a. Average height of total quantity of trees shall have a minimum of 12 feet. A maximum of 25 percent of the required trees shall be at a minimum height of eight feet. [Ord. 2018-002]

2. **Overhead Utilities with or without an Easement**
   a. May be exempt from the Average Height; [Ord. 2019-005]
   b. Shall be a minimum of eight feet in height at installation and comply with Article 7.C.5.A.2, Overhead Utilities; and, [Ord. 2019-005]
   c. Shall comply with FP&L’s publication “Right Tree, Right Place.” [Ord. 2019-005]

**B. Palms**
The size of a palm shall be measured by the height of the clear trunk or the grey wood pursuant to Figure 7.D.2.B, Palm Measurement Standards. The minimum overall height of a palm shall be 12 feet, and the minimum height for different species of palms shall be in accordance with Table 7.D.2.B, Palm Height Standards.

<table>
<thead>
<tr>
<th>Table 7.D.2.B – Palm Height Standards (1)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Minimum Height</td>
</tr>
<tr>

</tr>
<tr>
<td>6-foot grey wood for Royals and similar species</td>
</tr>
<tr>
<td>4-foot grey wood for Phoenixes, Canary, Bismarck, and similar species</td>
</tr>
</tbody>
</table>

**Notes:**
1. May be exempt from the minimum overall height, where there is an adjacent Overhead Utilities with or without an easement, and shall comply with FP&L’s publication “Right Tree, Right Place.” [Ord. 2019-005]

1. **Canopy Tree Substitute**
   Palms planted in groups of three or more may be counted as one required Canopy tree, up to a maximum of 25 percent of all trees required in each buffer, subject to the Standards in Table 7.D.2.B, Palm Height Standards. In the case of palm species, Paurotis or similar palm species, that characteristically grow in clumps, each clump may be counted as one Canopy tree. [Ord. 2018-002]
   a. **Exception**
      Royal, Bismarck, Phoenix, Canary, Date, or similar palm species determined to be acceptable by the Zoning Director may be counted as one required Canopy tree. These palms shall be spaced a maximum of 20 feet on center, and the clear trunk or grey wood shall be increased by 40 percent of the minimum requirements. [Ord. 2018-002]
C. Pines
The size of a pine shall include the height and the caliper of the pine. The minimum size of a pine shall be 12 feet in height with a two and one-half-inch caliper at installation. [Ord. 2014-025] [Ord. 2016-042]

1. Canopy Tree Substitute
   a. Three pines may substitute for one required Canopy tree, provided the overall accumulated height of the three pines is 24 feet or more; or [Ord. 2016-042]
   b. One pine with a minimum height of 14 feet. [Ord. 2016-042]

Pines may not be used in excess of 25 percent of the total number of required Canopy trees. When using pines in a perimeter buffer, refer to Art. 7.D.2.C, Pines. [Ord. 2014-025]

D. Tree Species Mix
When more than 15 trees are required to be planted to meet the standards of this Article, a mix of species is required. The number of species to be planted shall vary according to the overall number of trees that are required to be planted pursuant to Table 7.D.2.D, Tree Species Mix. Vegetation preserved in accordance with Art. 14.C, Vegetation Preservation and Protection, is exempt from the tree species mix requirement.

Section 3 Shrubs

A. Shrub Planting Requirements
Shrubs shall be installed according to Table 7.D.3.A, Shrub Planting Requirements and the quantity of shrubs for each type of buffer shall be established in accordance with the following: [Ord. 2018-002]

2. Height and spacing requirements pursuant to Table 7.D.3.A, Shrub Planting Requirements. [Ord. 2018-002]

[Ord. 2009-040] [Ord. 2018-002]

Notes:
1. Maximum height is established to maintain the hierarchical visual effect for landscape buffer. Height may be increased unless stated otherwise herein. [Ord. 2009-040] [Ord. 2018-002]

Section 4 Landscape Barriers

Landscape barriers consist of hedges, walls, or fences. They are utilized to provide continuous opaque screening, and are required for an Incompatibility Buffer. Landscape barriers may be installed in other types of landscape buffers; the requirement may be modified based on the site situations. [Ord. 2018-002]

A. Hedges

1. Height and Spacing at Installation
Hedge shall be planted at six feet in height with a maximum spacing of 24 inches on center at installation to achieve a continuous screening effect. Adjustment shall be based upon the type of plants utilized, with spacing not exceeding 36 inches on center. [Ord. 2005-002] [Ord. 2014-025] [Ord. 2018-002]
a. Single Family Residential Lot
Hedges may be planted and maintained along or adjacent to a residential lot line, as follows: [Ord. 2005-002] [Ord. 2014-025] [Ord. 2015-006] [Ord. 2018-002]
1) Hedges shall not exceed four feet in height when located within the required front setback. [Ord. 2005-002] [Ord. 2014-025] [Ord. 2018-002]
2) Hedges shall not exceed eight feet in height when located on or adjacent to the side, side street, or rear property lines. [Ord. 2005-002] [Ord. 2014-025] [Ord. 2018-002]

b. PDD and Nonresidential Perimeter Buffer Hedge Height
Hedges shall not exceed 12 feet in height. Height may be increased to a maximum of 20 feet for an Industrial PDD for the purpose of screening outdoor industrial activities. [Ord. 2005-002] [Ord. 2014-025] [Ord. 2018-002]

2. Hedge and Berm Combination
Hedges may be used in place of required shrubs in Compatibility and Incompatibility Buffers. Hedges, in combination with a berm, may be located on top of a berm in the landscape buffer if it is installed in a manner that provides the minimum height required for continuous solid opaque screen at time of planting. [Ord. 2018-002]

3. Height Measurement
The height shall be measured adjacent to the hedge from the lowest grade on either side of the hedge, unless stated otherwise below. [Ord. 2016-016]

a. Located on Berm
Height shall be measured from the elevation of the berm pursuant to Art. 7.D.6, Berms where the hedge is installed, unless in conflict with standards for Grade Change below. [Ord. 2016-016] [Ord. 2018-002]
b. Grade Change
Height may be increased when the hedge abuts a retaining wall, subject to the following: [Ord. 2016-016]
1) Residential
The height of the hedge located within the front, side, or rear setback of a lot supporting a Single Family dwelling unit, may be increased when located adjacent to a lot having a different grade when a retaining wall is installed along the property line, in accordance with the following: [Ord. 2016-016]
a) Grade Measurement
The difference in grade shall be determined by measuring the elevation of the retaining wall and the elevation of the abutting lot at the property line. [Ord. 2016-016]
b) Maximum Height Increase
The height of the hedge may be increased by the difference in grade up to a maximum of two feet, whichever is less, as follows: [Ord. 2016-016]
(1) Within the required front setback: Up to a maximum of six feet. [Ord. 2016-016]
(2) Within a side or rear setback: Up to a maximum of ten feet. [Ord. 2016-016]
(3) A guardrail shall be installed on the retaining wall if required by the Florida Building Code, subject to the height limitations for fences and walls. [Ord. 2016-042]
2) PDD or Nonresidential
Height may be increased when the hedge abuts a retaining wall subject to the requirements of Art. 7.D.5, Landscape Buffers with Grade Changes. [Ord. 2016-016]

4. PDD and Nonresidential Perimeter Buffer Hedge Height

5. Setback
Hedges shall be setback a minimum of two feet from the property line to allow for maintenance, or additional landscape material if required, unless stated otherwise herein. [Ord. 2016-016] [Ord. 2018-002]

6. Sight Distance
Hedges shall comply with Art. 11.E.9.C, Minimum Safe Sight Distance and Corner Clips at Intersection. [Ord. 2015-006]
B. Walls
Walls shall be composed of, but not be limited to: concrete panels, or concrete blocks with continuous footer. In the Exurban and Rural Tiers, walls shall be constructed from natural stone, concrete with a stone veneer, or embossed concrete with a natural stone or wood grain. Product samples shall be submitted to the Zoning Division for approval prior to submittal of the Building Permit for the wall. [Ord. 2018-002]

1. Architectural Treatment
Both sides of a wall shall be given a finished architectural treatment that is compatible and harmonious with adjacent developments. [Ord. 2007-013] [Ord. 2018-002]

2. Noise Mitigation Walls
Walls that abut Florida’s Turnpike or any public street and any portion of an attached wall required to comply with the Noise Study, may increase the height to be consistent with the noise analysis acceptable to the FDOT, provided there is a Condition of Approval recommended by Land Development and imposed by the ZC or BCC specifying the requirement for the noise mitigation wall. [Ord. 2018-002]
C. Fences
Fence material shall include, but not be limited to: wood, vinyl panel, or vinyl coated chain link. In the Exurban and Rural Tiers. The Applicant may submit a product alternative to the Zoning Division for approval prior to the issuance of the Building Permit for the fence. [Ord. 2018-002]

1. Chain Link Fences
   Chain link fences are prohibited in Incompatibility or R-O-W Buffers unless they are vinyl coated. Vinyl coated chain link fences are only permitted in a R-O-W or Incompatibility Buffer, and when installed behind an opaque six-foot-high hedge. [Ord. 2007-001] [Ord. 2007-013] [Ord. 2016-016] [Ord. 2018-002]
   a. Exception
      An electrified fence in accordance with Art. 5.B.1.A.2.e.2), Electrified Fences – Exceptions and Regulations, shall not be required to be vinyl coated. [Ord. 2013-018] [Ord. 2018-002]

D. Location of Wall or Fence in a Landscape Buffer
Walls or fences that are utilized in a landscape buffer should have sufficient area with minimum easement encumbrances for planting on both sides of the wall or fence. [Ord. 2018-002] [Ord. 2019-005]

1. Exception
   Electrified fencing in accordance with Art. 5.B.1.A.2.e.2), Electrified Fences – Exceptions and Regulations, shall not be required to provide shrubs or hedges on the inside of the electrified fencing or on the inside of the non-electrified fencing or wall which the electrified fencing is adjacent to. [Ord. 2013-018] [Ord. 2018-002]

<td>Shrubs shall be planted on both sides of the wall or fence.</td>
<td>Shrubs shall be planted on both sides of the wall or fence.</td>
<td>No percentage requirement.</td>
</tr>
</tbody>
</table>

Notes:

1. Unless waived or reduced by the County Engineer, provided there remains a minimum of seven and one-half feet clear for planting. [Ord. 2018-002]
2. No easement encumbrances. [Ord. 2018-002]
3. If a wall is installed, the minimum width of the landscape buffer shall be increased to have sufficient area for the required planting. [Ord. 2018-002]
4. Percentage of required trees to be located on the exterior side of the wall or fence may be reduced subject to a Type 1 Waiver for Landscaping. [Ord. 2018-002]

E. Conflict with Easements

If the placement of the wall or fence conflicts with an easement, the wall or fence shall not encroach upon the easement unless consistent with Art. 3.D, Property Development Regulations (PDRs). [Ord. 2007-013] [Ord. 2018-002]

Section 5 Landscape Buffers with Grade Changes

The height of a hedge, wall, or fence may be increased when located on a lot abutting a property with grade difference or in a landscape buffer where a retaining wall is used, subject to the following: [Ord. 2016-016] [Ord. 2018-002]

A. Grade Measurement

The difference in grade shall be determined by measuring the elevation of the retaining wall and the elevation of the abutting lot at the property line. [Ord. 2016-016] [Ord. 2018-002]

B. Compatibility Buffer – Maximum Height Increase

1. Fences

The height of a fence located on a retaining wall in a Compatibility Buffer may be increased by the difference in grade up to a maximum of four feet, whichever is less, as illustrated in Figure 7.D.5.B, Height Requirements for Compatibility Buffers with Grade Changes Using Retaining Walls. The fence shall be of the minimum height necessary to comply with Florida Building Code requirements for guardrails. [Ord. 2016-016] [Ord. 2018-002]

2. Hedges

Maximum permitted hedge height abutting a retaining wall may only be increased subject to the requirements of Art. 7.D.4.A.3, Height Measurement. A guardrail shall be installed on the retaining wall if required by the Florida Building Code, subject to the height limitations for fences and walls. [Ord. 2016-016] [Ord. 2018-002]
C. Incompatibility or R-O-W Buffer – Maximum Height Increase

The height of a fence, wall, or hedge located in an Incompatibility or R-O-W Buffer with a retaining wall may be increased by the difference in grade in accordance with Figure 7.D.5.C Height Requirements for Incompatibility or R-O-W Buffers with Grade Changes Using Retaining Walls, and the following: [Ord. 2016-016] [Ord. 2018-002]

1. Fences and Walls
   The height of a fence or wall located on a retaining wall setback a minimum of ten feet from the outer edge of the perimeter buffer may be increased by the difference in grade, up to a maximum overall height of 14 feet, whichever is less. The fence or wall shall be of the minimum height necessary to comply with Florida Building Code requirements for guardrails, or minimum required landscape barrier height. [Ord. 2016-016] [Ord. 2018-002]

2. Hedges
   The height of a hedge abutting a retaining wall setback a minimum of ten feet from the outer edge of the perimeter buffer may be increased by the difference in grade, up to a maximum height of 16 feet, whichever is less. A guardrail shall be installed on the retaining wall if required by the Florida Building Code, subject to the height limitations for fences and walls. [Ord. 2016-016] [Ord. 2018-002]
Section 6 Berms

Berms may be used as non-living landscape barriers only when used in conjunction with plant materials and where existing natural vegetation is not disturbed. Berms may be used in conjunction with fences, walls, or hedges to meet the total height requirements.

A. Tier Restrictions
Landscape berms are not allowed within the Exurban, Rural, Agricultural Preserve, or Glades Tiers, unless approved through a Type 1 Waiver or located along a Rural Parkway. [Ord. 2016-042]

B. Maximum Slope
The slope of a berm shall not exceed three-to-one. Runoff from berms shall be contained within the property, as illustrated in Figure 7.D.6, Berm Elevation and Drainage Requirements, or in a manner approved by the County Engineer. [Ord. 2018-002]

C. Height Measurement
Berm height shall be measured from the nearest adjacent top of the curb (parking lot) or the nearest adjacent crown of the road or the nearest adjacent finished floor elevation, whichever is higher. [Ord. 2005-002]

D. Incompatibility Buffer
Incompatibility Buffers, as illustrated in Figure 7.D.6, Berm Elevation and Drainage Requirements, provided that hedges and shrubs are installed at the height necessary to provide the total six-foot screen at the time of planting. [Ord. 2018-002]

E. Preservation Areas
Berms may be installed in Preservation Areas only where they will not affect the viability of preserved trees and vegetation. [Ord. 2018-002]
Section 7  Ground Treatment

The ground within required landscaped areas shall receive appropriate ground treatment at installation. Ground treatment shall not be required in Preservation Areas. Mulch that originated from a plant species that will create an environmental impact shall be discouraged for application. Sand, gravel, shell rock, or pavement is not considered appropriate ground treatment. The following standards shall apply to the installation of ground treatment: [Ord. 2016-042] [Ord. 2018-002]

A. Ground Cover

Containerized Ground cover shall provide a minimum of 50 percent coverage immediately upon planting and 100 percent coverage within six months. Seeded ground cover such as native wildflowers, shall provide a minimum of 50 percent coverage after six months of planting and 50 percent coverage within one year. 100 percent coverage shall be achieved at the second year of planting. [Ord. 2016-042] [Ord. 2018-002]

B. Mulch

Mulch shall be installed and maintained at all times in all planted areas not containing ground cover. All mulch material shall be free of seeds and weeds to prevent tree sprouting and regrowth. The application of Cypress mulch shall be discouraged. [Ord. 2016-042] [Ord. 2018-002]

C. Alternative Materials

Alternative materials such as pebbles, egg rocks, or decorative sand may be used up to a maximum of ten percent of ground coverage and only in areas needed to accommodate limited roof water runoff. [Ord. 2018-002]

D. Lawn and Turf

Grassed areas shall be planted with species suitable as permanent lawns and shall reach 100 percent coverage within six months of planting. Grassed areas may be sodded, plugged, sprigged, or seeded. However, grass shall be required between landscape buffers and swales and in other areas subject to erosion. In areas where grass seed is used, millet or rye shall also be sown. These areas shall be properly maintained to ensure complete coverage. Because of their drought resistant characteristics, it is recommended that Bahia grass species be used. Use of drought-tolerant ground cover instead of lawn and turf grass is encouraged. Undeveloped parcels shall be planted as required in Art. 7.F.3.C, Maintenance of Vacant Lots. [Ord. 2016-042] [Ord. 2018-002]

E. Artificial Turf

Artificial turf may be installed in the interior, terminal, or divider medians of a bull pen vehicle storage area. The Applicant shall receive product approval from the Zoning Director, prior to indicating in on the Landscape Plan or installation. [Ord. 2016-042] [Ord. 2018-002]
CHAPTER E  EXISTING NATIVE VEGETATION, PROHIBITED, AND CONTROLLED PLANT SPECIES

Section 1  Purpose

To establish standards and requirements for the preservation of existing native vegetation, removal of prohibited species, and reduction of controlled species. For the purpose of Article 7, existing native vegetation includes native trees, palms, and pines and are required to be incorporated in the site for any application that is subject to a DO. Existing native vegetation may satisfy the landscape requirements in this Article, in total or in part. In determining whether native vegetation satisfies the requirements of this Article and the goals of Art. 14.C, Vegetation Preservation and Protection, either one or both of the following shall be considered: [Ord. 2018-002]

A. The effectiveness of utilizing the existing vegetation as visual screening and re-establish a natural habitat for the existing vegetation; or [Ord. 2018-002]

B. The quality and species of the vegetation being preserved. [Ord. 2018-002]

Section 2  Authority and Review Procedures

The Zoning Director shall have the authority to require the preservation of vegetation on-site that is not covered under Art. 14.C, Vegetation Preservation and Protection, subject to the following: [Ord. 2016-016] [Ord. 2018-002]

A. Pre-application Appointment (PAA)

The Applicant shall meet with the Zoning Division and the Department of Environmental Resources Management (ERM) prior to the submittal of the application. Staff shall coordinate with the Applicant to address the preservation of native vegetation in the early stage of development review, and to resolve design issues without impacting the timeline for certification or approval of the application. Staff may request a site visit with the Applicant to determine whether the existing vegetation is worthy of preservation, and inform the Applicant of the necessary application requirements, including a Vegetation Survey to be submitted as part of the Zoning application. [Ord. 2018-002]

B. Review and Permit Procedures

The Zoning Division and ERM shall collaborate on the review of all applications that require preservation of existing vegetation through: PAA; site visits; site design to maximize preservation; and when appropriate, Conditions of Approval shall be imposed to ensure the requirements are being monitored at Land Development review and Building Permit stages. [Ord. 2018-002]

1. Application Submittal

   a. In addition to all the required forms and related documents pursuant to Art. 2, Application Processes and Procedures, the Applicant shall include a description of the proposed site development, and indicate any proposal for preservation of existing native vegetation in the Justification Statement; [Ord. 2018-002]

   b. The Applicant shall submit a Vegetation Survey with estimated preliminary finished grade of the areas where the proposed preservation of vegetation is located; and, [Ord. 2018-002]

   c. Any preservation or relocation of vegetation shall be shown on the applicable Zoning Plan(s) with a Vegetation Disposition Chart pursuant to Title 3, Landscaping, Chapter C, Existing Native Trees and Vegetation – Preservation of the Zoning Technical Manual for the template and notes. [Ord. 2018-002]

2. Site Visit

   If a PAA is not requested by the Applicant prior to the submittal of the Zoning application, Staff shall conduct a site visit to determine if a Vegetation Survey and a Vegetation Disposition Chart are required. If necessary, the requirement shall be listed as a certification issue at the issuance of the first set of DRO comments. [Ord. 2018-002]

3. Agreement on Preservation

   a. Staff shall set up an appointment with the Applicant to discuss the recommendations related to the site design and preservation. If the recommendations require a redesign of the site layout, the Applicant shall address issues related to the preservation and relocation of vegetation before certification of the application for Public Hearings or Final Approval by the DRO. [Ord. 2018-002]

   b. Prior to the certification or approval of an application, the Applicant shall agree to the specific requirements which includes, preservation, relocation, mitigation, replacement of the existing native vegetation, and shall be shown on the Plan(s) and Vegetation Disposition Chart. [Ord. 2018-002]

   c. The Zoning Director shall have the authority to impose Conditions of Approval on the Development Order to require the incorporation of existing vegetation into the site design. [Ord. 2016-016] [Ord. 2018-002]
4. **ERM Vegetation Protection**
For applications that are approved by the ZC or BCC, the Applicant shall submit a Protection of Native Vegetation application to ERM prior to Final Approval by the DRO. For applications that are approved by the DRO, the Applicant shall submit the Protection of Native Vegetation Approval application concurrent with the Vegetation Barricade Permit. A Vegetation Permit shall be issued by ERM if the requirements are consistent with the approved Zoning Plans, Conditions of Approval, or in compliance with Code. [Ord. 2018-002]

5. **Vegetation Barricade Permit**
   a. Prior to any land clearing activity, removal of vegetation, or issuance of any other Building Permits for the site, the Applicant shall: [Ord. 2018-002]
      1) Submit a Vegetation Barricade Permit application to the Building Division; [Ord. 2018-002]
      2) Tag all existing vegetation as identified on the approved plans and Vegetation Disposition Chart to ensure there are no discrepancies between the approved documents and the site situations; and, [Ord. 2018-002]
      3) Install all barricades around tagged vegetation that is to be preserved or relocated on the site. [Ord. 2018-002]
   b. The Vegetation Barricade Permit application shall be reviewed by the Zoning Division and ERM. Staff shall schedule inspections for the installation of the tags and barricades prior to the approval of the Permit. [Ord. 2018-002]
   c. PZB shall inspect the site for compliance with the Vegetation Barricade Permit to ensure all barricades are properly installed around the vegetation to be preserved or relocated. Once the final inspection for the Vegetation Barricade Permit is signed off by the Zoning Division, other permits for the property may be issued. [Ord. 2018-002]

### Section 3 Credit and Replacement

This Section clarifies when existing vegetation can be utilized to satisfy Art. 7.C, Landscape Buffer and Interior Landscaping Requirements and Art. 7.D, Landscape Standards. In addition, this Section also establishes requirements for quantity and size for replacement. Replacement of vegetation may be required due to injury, damage, or removal, which includes: improper pruning; hatracking; or, other actions that render existing vegetation unable to achieve its natural and intended form. The quantity and the size of the replaced vegetation is based on the size of the individual vegetation at the time when the vegetation was injured, damaged, or removed. For the purpose of this Section, the term Vegetation shall include trees, palms, or pines. [Ord. 2018-002] [Ord. 2019-005]

A. **Vegetation Credit**
Credit to satisfy Art. 7.C, Landscape Buffer and Interior Landscaping Requirements and Art. 7.D, Landscape Standards shall be granted for on-site preservation of existing vegetation when accompanied by an approved Vegetation Survey with a Vegetation Disposition Chart, and indicated on the Final Landscape Plan or Final ALP. [Ord. 2018-002] [Ord. 2019-005] [Ord. 2020-001]

1. **Approval**
The credited vegetation shall be approved by both the Department of ERM and the Zoning Division. The Vegetation Survey, Vegetation Disposition Chart, and Final Landscape or Final ALP shall clearly identify which vegetation is being preserved to satisfy the requirements of this Article. [Ord. 2020-001]

2. **Excluded from Credit**
Credits shall not be permitted for vegetation: [Ord. 2018-002] [Ord. 2019-005]
   a. Required for preservation by Art. 14.C, Vegetation Preservation and Protection (i.e. located in required Preservation Areas, heritage, or champion trees);
   b. Irreparably damaged during the construction process; [Ord. 2018-002]
   d. Dead, dying, diseased, or infested with harmful insects; or, [Ord. 2018-002]
   e. Located in a sub-area of a planned development that is not intended to be developed for residential, commercial, or industrial use, such as a Golf Course on an adjacent open space parcel. [Ord. 2018-002]
B. Replacement

Required vegetation, landscape barriers, or ground treatment that become damaged, diseased, removed, or are dead shall be immediately replaced, and where specified, are subject to the Vegetation Removal and Replacement Permit process. Replacement shall comply with the following: [Ord. 2005-002] [Ord. 2018-002] [Ord. 2019-005] [Ord. 2020-001]

1. Trees shall be in accordance with Table 7.E.3.C, Vegetation Credit and Replacement, and subject to Art. 7.B.5, Tree Removal and Replacement Permit. [Ord. 2019-005] [Ord. 2020-001]

2. Shrubs shall be in accordance with the original size as required under each type of buffer consistent with this Article or Conditions of Approval. [Ord. 2019-005]

3. A wall or fence shall be in accordance with the original height, and the same construction material as required under each type of buffer consistent with this Article or Conditions of Approval, and subject to a permit approval process. [Ord. 2019-005]

4. A hedge shall be in accordance with the original height as required under each type of buffer consistent with this Article or Conditions of Approval, where applicable. [Ord. 2019-005]

5. Ground Treatment shall be in accordance with Art. 7.D.7, Ground Treatment or Conditions of Approval, where applicable. [Ord. 2019-005]

C. Vegetation Credit and Replacement Formula

Existing vegetation that is given credit towards required vegetation, or for the purpose of a replacement shall be subject to the following Table. In addition, the size of the credited or replaced vegetation shall be in compliance with the size requirements pursuant to Art. 7.D.2, Trees, Palms, and Pines. [Ord. 2019-005]

Notes:

1. Fractional measurements shall be rounded in accordance with Art. 1.C.1.A.2, Interpretation and Application. [Ord. 2018-002] [Ord. 2020-001]

2. Pines with a diameter of six inches or more, measured at a height of four and one-half feet above grade shall be subject to preservation, mitigation, or replacement. [Ord. 2019-005]

3. Quantity: replacement of palms shall be one for one. [Ord. 2019-005]

4. Replacement of vegetation for sites found in violation with irreparable or irreversible harm shall be pursuant to Art. 7.G.3.C, Corrective Actions. [Ord. 2020-001]

1. Natural Disaster Replacement

The replacement standards of vegetation damaged by natural disaster, as determined by the Executive Director of PZB, pursuant to Art. 7.G.2, Temporary Suspension of Landscape Standards, shall be subject to the following, unless exempt by F.S. § 163.045. [Ord. 2020-001]

a. Each tree, palm, or pine that has been damaged by a natural disaster, and impacts the life of the vegetation, shall be replaced by a similar tree, palm, or pine, and subject to the following: [Ord. 2019-005] [Ord. 2020-001]

1) Quantity – one for one; [Ord. 2019-005] [Ord. 2020-001]

2) Size – pursuant to Art. 7.D.2, Trees, Palms, and Pines, or a size specified pursuant to DO Conditions of Approval; [Ord. 2019-005] [Ord. 2020-001]

3) Timing – replacement shall be completed in accordance with the dates established by the Executive Director of PZB, pursuant to Art. 7.G.2, Temporary Suspension of Landscape Standards; and, [Ord. 2020-001]

4) Documentation shall be provided by an Applicant when utilizing these reduced standards, or if there are any modifications from the previously approved Final Landscape Plan or Final ALP, and shall be indicated on a revised Planting or Landscape Plan, whichever is applicable. [Ord. 2020-001]
Section 4 Prohibited Plant Species

The planting or installation of the following plant species is prohibited. Each Planting Plan, Landscape Plan, or ALP shall include a program to eradicate and prevent the reestablishment of these species. [Ord. 2018-002]

Section 5 Controlled Plant Species

The following species may be planted or maintained under controlled conditions: [Ord. 2018-002]

A. Black Olives and Mahogany
   Black Olives and Mahogany shall not be installed within 15 feet of any vehicular use area, sidewalk, paved pathway, or bike lane. [Ord. 2018-002]

B. Ficus Species
   Ficus species may be planted under the following conditions but shall not exceed a maximum of ten percent of the total number of required trees. [Ord. 2018-002]
   1. Planted as individual trees provided they are no closer than 30 feet from any structure or utility; [Ord. 2018-002]
   2. Contained in a planter or root barrier; or, [Ord. 2018-002]
   3. Maintained in accordance with the restrictions for hedges pursuant to Art. 7.D.4.A, Hedges. Ficus hedges in interior landscape areas shall not exceed a maximum of 12 feet in height, measured from the lowest grade adjacent to the hedge. [Ord. 2005-002] [Ord. 2018-002]

C. Silk Oak and Rosewood
   Silk Oak and Rosewood trees shall not be planted within 500 feet of a Preserve Area. [Ord. 2018-002]

D. Trees
   Citrus trees shall not qualify as a required tree, except for Single Family lots. [Ord. 2018-002]

Section 6 Artificial Plants

No artificial plants or vegetation shall be used to meet any standard of this Article. [Ord. 2018-002]
CHAPTER F    INSTALLATION AND MAINTENANCE

This Chapter establishes standards for the installation and maintenance of plant material. [Ord. 2009-040]

Section 1    Plant Quality

Plants installed pursuant to this Article shall conform to or exceed the minimum standards for Florida Number 1, as provided in the most current edition of Florida Grades and Standards for Nursery Plants, as amended, prepared by the Florida Department of Agriculture and Consumer Services. All plants shall be clean and free of noxious pests and/or diseases. [Ord. 2018-002]

Section 2    Installation

All landscaping shall be installed according to acceptable nursery practices in a manner designed to encourage vigorous growth. Soil improvement measures may be required to ensure healthy plant growth. Before planting, a plant or tree's growth characteristics shall be considered to prevent conflicts with views, lighting, infrastructure, utilities, or signage. Proposed infrastructure, lighting, and signage plans shall be submitted concurrent with Landscape Plans prior to issuance of a Building Permit.

A. Planting Specifications

Required trees and palms may be securely guyed, braced, and/or staked at the time of planting until establishment. All plants shall be installed so that the top of the root ball remains even with the soil grade. The top one-third of burlap shall be removed from the root ball at planting. If used, nylon strapping and wire cages shall be completely removed at installation. All guys and staking material should be removed when the tree is stable and established but in no case more than one year after initial planting of tree. Construction debris shall be kept clear from the planting area. [Ord. 2018-002]

B. Phasing

Required landscaping may be installed in phases, and if designated on the approved Zoning plan, as follows: [Ord. 2018-002]

1. Developments with Phasing

The required plant materials shall be installed in accordance with the approved phasing of a planned development. The quantity of the required plant materials for each development phase shall be a proportion of the total number of plant materials required to be planted in the overall planned development. This proportion shall be determined by comparing the area of the plan to the area of the entire planned development as shown on the approved plan. Areas of vegetation required to be preserved shall be excluded from this calculation. R-O-W Buffers along the development frontage shall be installed under Phase One. [Ord. 2018-002]

2. Developments without Phasing

The perimeter landscaping shall be installed prior to the issuance of the first CO.

   a. Developments with Multiple Buildings

      R-O-W Buffers along the development frontage shall be installed prior to the issuance of the first CO for the first building. [Ord. 2018-002]

   b. PO Zoning District and Public Civic Pods of a PUD

      Installation of a proportion of the required plant materials shall be permitted subject to the approval of a Phasing Plan by the DRO. The Phasing Plan shall indicate the affected area of each Building Permit application and general location of plant material that will be installed. [Ord. 2007-013]

3. Suspended Phasing

Required installation may be phased into a project for up to one year from the initial occupancy, subject to the approval of an installation schedule by the DRO. [Ord. 2018-002]
Section 3 Maintenance

A. General

PBC is responsible for the care and maintenance of the trees and vegetation on PBC-owned property, unless provided for otherwise by DO Condition of Approval. For all other properties, which includes vegetation required to be installed under a DO, or existing preserved vegetation, the Property Owner or successors in interest, contractor, or agent, if any, shall be jointly and severally responsible for the requirements of this Section. Maintenance of the Premises shall also be subject to the Palm Beach County Property Maintenance Code, Chapter 14, Article I of the PBC Code. [Ord. 2018-002]

1. Regular maintenance of all landscaping is required. All landscaping shall be free from disease, pests, weeds, and litter. Maintenance shall include weeding, watering, fertilizing, pruning, mowing, edging, mulching, or any other actions needed, consistent with acceptable horticultural practices.

2. Regular maintenance, repair, or replacement of landscape barriers and focal points, including landscape structures (e.g., walls, fences, fountains, and benches) in order to keep them in a structurally sound condition.

3. Perpetual maintenance to prohibit the reestablishment of prohibited and non-native invasive species within landscape and Preservation Areas.

4. Periodic maintenance to remove diseased or damaged limbs, or remove limbs or foliage that present a hazard. All trees and palms shall be allowed to grow to their natural mature height and to full canopy. [Ord. 2018-002]

5. Landscape areas, which are required to be created or preserved by this Article, shall not be used for temporary parking or the storage/display of materials or sale of products or services.

B. Maintenance of Vacant Lots

Vacant lots and vacant residential parcels shall be maintained by the Property Owner, and shall be subject to the requirements as listed below. [Ord. 2018-002]

1. Vacant Lots or Parcels with Demolition Permits

a. Demolition Permits

Demolition Permits for Vacant Lots or Parcels shall be subject to the review and sign off by the Zoning Division. The Building Division shall not issue the Demolition Permit until a Planting Plan is approved by the Zoning Division unless the Property Owner signs an affidavit in accordance with the requirements below. [Ord. 2005-002] [Ord. 2008-037] [Ord. 2018-002]

1) Planting Plan

The Property Owner shall submit a Planting Plan indicating the proposed method of ground treatment, preservation of existing native trees and if applicable, replacement of trees, and irrigation simultaneously with the application for a Demolition Permit. [Ord. 2005-002] [Ord. 2008-037] [Ord. 2018-002]

a) Review of Planting Plan

The DRO shall determine if the Planting Plan is sufficient and includes the information necessary to evaluate the plan within five days of receipt. The DRO shall approve, approve with conditions, or deny the plan within ten days of the determination of sufficiency. If necessary, the DRO or Environmental Resources Management Department shall conduct a site visit as part of the Plan Review. [Ord. 2005-002] [Ord. 2008-037] [Ord. 2018-002]

b) Standards

The DRO shall consider the following criteria in reviewing the Planting Plan; whether or not the ground treatment and other landscape materials are consistent with the established character of the neighborhood; and, whether or not alternative or temporary irrigation methods such as hand-watering are acceptable. [Ord. 2005-002] [Ord. 2008-037] [Ord. 2018-002]

c) Plant Installation, Maintenance, Pruning, and Irrigation

The Vacant Lot shall be subject to the requirements or Conditions of Approval as indicated in the Planting Plan related to installation and maintenance. Native vegetation, or ground treatment shall be installed, maintained, pruned, and irrigated in accordance with the requirements of this Section. Temporary irrigation methods may be approved for native vegetation only, subject to a maintenance/replacement agreement. [Ord. 2005-002] [Ord. 2008-037] [Ord. 2018-002]
2) **Vacant Lot Maintenance and Planting Requirements**

Native vegetation shall be preserved if required by ERM and ground treatment shall be installed and maintained, in accordance with the requirements of this Section. [Ord. 2005-002] [Ord. 2008-037] [Ord. 2018-002]

a) **Ground Treatment**

Vacant Lots or Parcels shall be cleared of construction materials and debris, and must be planted with sufficient ground treatment to cover the entire Lot or Parcel in accordance with one of the choices pursuant to Art. 7.D.7, Ground Treatment. Existing ground treatment may be used to meet the requirements of this Section. The clearing and installation of ground treatment must be completed within 120 days of the completion of demolition, within 120 days of the effective date of this Section, or within 30 days of approval of a Planting Plan, whichever is later. Slab foundations or other structural features remaining from demolished houses, or from other demolished structures, must also be removed from Vacant Lots and Parcels. [Ord. 2005-002] [Ord. 2008-037] [Ord. 2018-002]

b) **Existing Vegetation**

All existing native vegetation shall be preserved, and Prohibited and Controlled Species shall be eliminated pursuant to Art. 7.E, Existing Native Vegetation, Prohibited, and Controlled Plant Species. [Ord. 2018-002]

c) **Irrigation**

Temporary irrigation methods may be approved for native vegetation only, subject to a maintenance or replacement agreement. [Ord. 2018-002]

2. **Vacant Lots or Parcels with Pending Redevelopment Permits**

A Property Owner shall initiate redevelopment of a Vacant Lot or Parcel within 120 days of demolition, or shall actively proceed in good faith to redevelop based on submittal of a Building Permit application or other applicable Development Permit application. The Applicant shall submit evidence demonstrating good faith efforts to redevelop within 120 days of completion of the demolition, or shall submit a Planting Plan within 30 days of the expiration of the 120-day period. The Property Owner shall execute an affidavit in conjunction with the Demolition Permit on a form established by the Zoning Division. [Ord. 2005-002] [Ord. 2008-037] [Ord. 2018-002]

**Section 4 Pruning after Installation**

Pruning is permitted after installation to allow for healthy growth, to promote safety considerations, and enhance the aesthetic value of plant material. Trees that conflict with views, signage, or lighting shall not be pruned more than the maximum allowed. Trees shall not be pruned in a manner that reduces the canopy spread to less than 20 feet. Pruning practices shall comply with the guidelines in American National Standards Institute (ANSI) A300, and the provisions of this Chapter. The Zoning Director may suspend the provisions of this Chapter upon recommendation from County Landscape Staff additional pruning is necessary for plant growth, safety, or aesthetics. [Ord. 2018-002] [Ord. 2020-001]

**A. General Pruning Requirements**

1. A maximum of one-fourth of the tree canopy may be removed from a tree within a one-year period, provided that the removal conforms to the standards of crown reduction, crown cleaning, crown thinning, crown raising, vista pruning, and crown restoration pruning techniques. All pruning shall comply with the most recent published version of the American National Standards Institute, ANSI A300 provisions related to tree, shrub, and other woody plant maintenance, as amended. The crown of a tree required by this Code or Condition of Approval shall not be reduced below the minimum spread or height requirements of Art. 7.D.2.A, Trees, or specific Conditions of Approval. A tree which is pruned in excess of these requirements shall be replaced with a tree that meets the minimum requirements of Art. 7.D.2.A, Trees, and Table 7.E.3.C, Vegetation Credit and Replacement. [Ord. 2014-025] [Ord. 2020-001]

2. If other than the mature height and spread is desired for any required tree, the size and shape shall be indicated on an approved site plan, Planting Plan, Landscape Plan. Shaping of a tree shall be permitted if the tree is to be used as an accent, focal point, or as part of an overall landscape design. A maintenance program shall be clearly outlined on the approved Landscape Plan to explain the care and upkeep of a shaped tree.

3. When cutting back trees, care shall be taken to promote the shape and form typical of the tree’s species in similar settings in PBC.

4. Tree topping (hatracking) is prohibited.
5. No large or medium Canopy tree shall be pruned before it has reached a minimum 20-foot canopy height and spread.

B. Palm Pruning Requirements
1. No more than one-third of fronds shall be removed.
2. No pruning above the horizon line, except for dead or diseased fronds.

C. Pruning Exemptions
The following are exempt from these pruning standards: [Ord. 2020-001]
1. Vegetation affected by FAA and airport safety regulations, to the extent required to comply with these regulations. [Ord. 2020-001]
2. Vegetation that interfere with corner clips, utility lines, or utility structures, to the extent required to comply with regulations for these areas or structures. [Ord. 2020-001]
3. Vegetation that have insect or disease damage, crown dieback, or decay greater than one-third of the tree canopy. [Ord. 2020-001]
4. Vegetation that have suffered damage due to natural or accidental causes. [Ord. 2020-001]
5. Vegetation on Single Family lots unless pruned by a commercial tree service business, landscape company, lawn service business, or other related businesses. [Ord. 2020-001]
6. Vegetation in botanical gardens or botanical research centers. [Ord. 2020-001]
7. Vegetation under DOT, DEPW, and FP&L management. [Ord. 2020-001]
8. Vegetation pruned in accordance with F.S. § 163.045. [Ord. 2020-001]

Section 5 Irrigation

The licensed professional or irrigation contractor responsible for the installation of irrigation shall demonstrate compliance with the irrigation standards. Landscaped areas shall be irrigated to maintain required plant materials in good and healthy condition. Irrigation systems shall comply with the following standards:
A. All landscaped areas requiring irrigation shall be provided with an automated irrigation system that provides 100 percent coverage. Areas requiring minimal irrigation to establish plants shall use drip irrigation.
B. Irrigation systems shall be designed to apply water to shrub and tree areas on a less frequent schedule than lawn areas. A rain-sensor switch shall be installed on systems with automatic controllers.
C. Irrigation systems shall be designed as not to overspray water impervious areas. All irrigation systems shall be continuously maintained in working order.
D. Where feasible, irrigation systems shall not be installed or maintained on areas adjacent to a public street which causes water from the system to spray onto the roadway or strike passing pedestrian or vehicular traffic.
E. The use of irrigation quality or re-used water is encouraged for parks and recreation facilities:
1. Within the Irrigation Quality (IQ) effluent water service area of the PBCWUD; or
2. Where irrigation quality or re-used water is available and where such reuse is approved by the regulatory agencies.
F. Permanent irrigation systems are not required for areas set aside on approved site development plans for preservation of existing native vegetation.
G. Temporary irrigation systems installed pursuant to acceptable xeriscape practices may be used to meet the standards of this Section, upon approval of the Zoning Division.

CHAPTER G ENFORCEMENT

Section 1 Purpose
This Chapter establishes enforcement procedures to ensure compliance with the ULDC and applicable DOs. [Ord. 2019-005]

Section 2 Temporary Suspension of Landscape Standards
The Executive Director of PZB may temporarily suspend the standards of this Article and establish timeframes and guidelines to replace destroyed or damaged landscape material through a Departmental PPM in the following situations: a hurricane; a freeze resulting in unavailability of landscape materials; a period of drought resulting in restrictions on water usage imposed by a governmental authority; or a similar event. [Ord. 2005-041]

A. Performance Surety
If the landscape standards of this Article are suspended pursuant to this Article, the Property Owner may enter into an agreement with PBC to allow issuance of the permit or CO or Certificate of Completion.
provided the Property Owner includes as part of this agreement adequate guarantee or surety that the terms of this Article will be met after the suspension period has been lifted. The guarantee shall consist of a performance bond or other surety agreement approved by the County Attorney in an amount equal to 110 percent of the direct costs of materials and labor and other costs incidental to the installation of the required landscaping completion agreement. Performance bonds or other guarantees required pursuant to this Subsection shall name PBC as a beneficiary and specify the time-frame for the completion of the landscape standards of this Article. [Ord. 2005-041]

B. Application Requirements
An application for a temporary suspension of landscape standards shall be accompanied by a Landscape Plan identifying the plantings that have been postponed, the proposed planting schedule, and the costs of the suspended planting. Planting cost estimates may be independently verified by PBC.

Section 3 Enforcement
Failure to install or maintain landscape requirements, or when vegetation has irreparable or irreversible harm, shall constitute a violation of the Code or a DO. PZB may issue a Cease and Desist Order or withhold a CO or Certification of Completion until the provisions of this Article have been met. In the alternative, PZB may refer any violation of this Article to Code Enforcement for corrective action or penalties set forth in Art. 10, Enforcement. [Ord. 2019-005] [Ord. 2020-001]

A. Violations
The following deficiencies shall be considered a separate and continuing violation of this Article or a DO: [Ord. 2019-005]
1. Each required tree, palm, pine, or other vegetation not properly installed or maintained shall be considered a separate and continuing violation of the ULDC or applicable DO. Each row of shrubs and ground treatment shall be considered as a separate and continuing violation. Each wall or fence not properly installed or maintained shall be considered a separate and continuing violation. [Ord. 2019-005]
2. Each required tree, palm, pine, or other vegetation that has irreparable or irreversible harm. [Ord. 2020-001]
3. Each day in which required vegetation is not properly installed or properly maintained on site as required by this Section or by the order of the Special Master. [Ord. 2018-002] [Ord. 2019-005] [Ord. 2020-001]

B. Determining Extent of the Violation
1. Code Enforcement Staff receives a complaint of noncompliance of the Code or DO; [Ord. 2020-001]
2. Zoning Division Staff shall conduct a site inspection with the Code Enforcement Staff to assess if there is a violation of the Code or any DO, which may include Conditions of Approval that requires vegetation to be installed at a larger size, or a previously approved Landscape Plan or ALP. The assessment will confirm if the violation is reparable or if there is irreparable or irreversible harm pursuant to the definition of Art. 1.H.2.I.33, Irreparable or Irreversible Harm; and, [Ord. 2020-001]
3. If it is determined by Staff that there is a violation, then the Zoning Staff shall provide a recommendation for compliance and Code Enforcement Staff shall issue a Notice of Violation (NOV) to the Property Owner to correct the violation. [Ord. 2020-001]

C. Corrective Actions
PBC shall determine appropriate corrective actions, including, but not limited to Code Enforcement proceedings, the requirement to obtain an after-the-fact permit(s), the replacement of landscape material, and the requirement to amend the applicable Landscape Plan or DO pertaining to the property. [Ord. 2019-005] [Ord. 2020-001]

1. Reparable
For improper pruning or hatracking violations that are deemed reparable, the corrective action shall be based upon Staff inspection of the site and assessment of the violation and damage. The violation shall be corrected by implementing proper pruning practices in accordance to ANSI A300 standards. One or more monitoring site inspections may be required to confirm the damaged vegetation is being properly pruned over time to ensure prior balance in re-growth of the canopy or form. Repeated violations shall be processes pursuant to Art. 10.B, Enforcement by the Code Enforcement Special Masters. [Ord. 2020-001]
2. Irreparable/Irreversible Harm

For a violation that is deemed irreparable or irreversible damage to the vegetation, the violation shall be corrected by the removal of the damaged vegetation and stump, and replacement of the vegetation utilizing one or a combination of the following two options: [Ord. 2020-001]

a. Additional Quantity Option

Utilize Table 7.G.3.C, Violation of Vegetation Replacement to establish the quantity and the individual replacement size pursuant to Art. 7.D.2, Trees, Palms, and Pines. This option may require planting additional trees, palms, or pines. [Ord. 2020-001]

1) If the property has a prior approved Landscape Plan, ALP, or a DO that depicts the location of the vegetation, the approval shall be revised to show the new location of the additional vegetation. [Ord. 2020-001]

2) If the property is subject to Conditions of Approval requiring larger size trees, palms, or pines, the size of the replacement vegetation shall be in compliance with the Conditions, and the vegetation shall be installed in the same or approximate location where the original vegetation was shown on the approved Landscape Plan or ALP. If additional vegetation is required to be planted on the property as a result of this option, then additional sanctions will be placed. [Ord. 2020-001]

3) If a tree or pine is removed with only the stump remaining, the following formula shall be utilized to determine the size of the removed tree or pine. [Ord. 2019-005]

a) measure the diameter of the tree or pine stump and reduce the measurement by 25 percent; and [Ord. 2019-005]

b) replacement of the quantity of the tree or pine shall be based on the reduced diameter measurement, and subject to, the requirements of Table 7.G.3.C, Violation of Vegetation Replacement for estimating the number of trees or pines to be replaced. [Ord. 2019-005] [Ord. 2020-001]

[Ord. 2020-001]

Notes:
1. Fractional measurements shall be rounded in accordance with Art. 1.C.1.A.2, Interpretation and Application. [Ord. 2020-001]
2. Pines with a diameter of six inches or more, measured at a height of four and one-half feet above grade shall be subject to preservation, mitigation, or replacement. [Ord. 2020-001]
3. Quantity: replacement of palms shall be one for one. [Ord. 2020-001]

b. Same Quantity and Larger Size Option

The option allows the Property Owner to install larger size vegetation to replace irreparable or irreversible vegetation. The replacement quantity may be one for one only if the size of each replacement tree, palm, or pine exceeds the minimum size by 20 percent of the size indicated in Art. 7.D.2, Trees, Palms, and Pines. If there are prior Conditions of Approval requiring larger size vegetation, then the replacement vegetation shall comply with the Conditions. [Ord. 2020-001]

D. Additional Sanctions

PBC may take any appropriate legal action, including, but not limited to requiring replacement of landscape material which has been hattracked, damaged, and rendered unable to achieve its natural and intended form, administrative action, requests for temporary and permanent injunctions, and other sanctions to enforce the provisions of this Section. [Ord. 2005-002]

E. Follow-Up Compliance

A follow-up compliance monitoring inspection from Landscape Staff may be required to confirm the vegetation violation has been satisfied. [Ord. 2020-001]

ARTICLE 8
SIGNAGE

CHAPTER A   GENERAL

Section 1 General

A. Purpose and Intent
The purpose of this Section is to establish standards for the placement and use of signs and other advertising consistent with State of Florida and Federal law. These standards are designed to protect the health and safety of PBC and to assist in the promotion of tourism, business and industry. More specifically, this Section is intended to:

1. Identification
   Promote and aid in the identification, location, and advertisement of goods and services, and the use of signs for free speech;

2. Aesthetics
   Preserve the beauty and the unique character of PBC, protect PBC from visual blight, and provide a pleasing environmental setting and community appearance which is deemed vital to the continued economic development of PBC;

3. Land Values
   Protect property values by assuring compatibility with surrounding land uses;

4. Safety
   Promote general safety and protect the general public from damage or injury caused by, or partially attributed to, the distractions, hazards, and obstructions that result from improperly designed or located signs; and

5. Compatibility
   Make signs compatible with the overall design objectives of the Plan and the Managed Growth Tier System (MGTS); ensure signs are compatible with the character of adjacent architecture and neighborhoods, and to provide the essential identity of, and direction to, facilities in the community.

B. General Design Principles
The following principles are general design guidelines that should be considered in the design of all signs. Signs which enhance a project are encouraged, and signs should make a positive contribution to the aesthetic appearance of the street or commercial area where they are located.

1. Visibility
   A sign shall be conspicuous and readily distinguished from its surroundings.

2. Legibility
   The size and proportion of the elements of the sign's message, including logos, letters, icons and other graphic images, shall be selected based on the average distance and average travel speed of the viewer. Sign messages oriented towards pedestrians may be smaller than those oriented towards automobile drivers. Colors chosen for the sign text and/or graphics shall have sufficient contrast with the sign background in order to be easily read during both day and night hours.

3. Readability
   A sign message should be easily recognized and designed in a clear, unambiguous and concise manner, so that a viewer can understand or make sense of what appears on the sign. Excessive use of large areas of several colors can create competition for the eye and significantly reduce readability.

4. Architectural Compatibility
   A sign (including its supporting structure, if any) shall be designed as an integral design element of a building's architecture, and shall be architecturally compatible, including color and scale, with any building to which the sign is to be attached and with surrounding structures. A sign which covers a window, or which spills over "natural" boundaries or architectural features and obliterates parts of upper floor of buildings is detrimental to visual order and may not be permitted.

5. Consistency with Area Character
   A sign should be consistent with distinct area or district characteristics and incorporate common design elements such as sign materials or themes. In Traditional Development Districts (TDD'S) projecting signs are encouraged and should be located and sized to be viewed by people on foot.
Where signs are located in close proximity with a residential area, the sign should be designed and located so they have little or no impact on adjacent residential neighborhoods.

Figure 8.A.1.B – Visibility and Legibility

C. Applicability
The provisions of this Section shall apply to all signs in unincorporated PBC, unless exempt by Art. 8.B, EXEMPTIONS.

1. Nonconforming Signs
Previously permitted signs that do not meet the current standards of this Code are nonconforming structures, subject to Art. 1.F.3, Nonconforming Structure. A nonconforming sign may not be enlarged, structurally altered, or moved unless the entire sign is brought into compliance with this Section. A sign face on a nonconforming sign may be replaced but not enlarged.

2. Billboards and Off-Site Signs
There shall continue to be a prohibition on billboards and similar off-site signs, however, this prohibition does not restrict the repair, maintenance, relocation, or replacement of billboards constructed consistent with applicable codes and permit procedures prior to November 15, 1988, and included within the billboard stipulated settlement agreement and billboard survey (approved February 6, 1996). The stipulated settlement agreement referred to herein shall be the primary source of information for implementing the intent and purpose of the regulations governing billboards and similar off-site signs.

Where there is a conflict between the text and a graphic in this Section, the more restrictive provision shall prevail. Where other sign or outdoor advertising regulations are in effect and are more restrictive than the provisions of this Section, the more restrictive provisions shall prevail.

Section 2 Definitions
See ART. 1.I, DEFINITIONS AND ACRONYMS.

CHAPTER B EXEMPTIONS
The following signs or murals shall comply with the following requirements, but shall be exempt from the review and approval process of this Code, and may be constructed or attached without a Building permit, except as prohibited in Art. 8.C., Prohibitions. An electrical permit shall still be required for signs using electrical service. [Ord. 2005 - 002] [Ord. 2006-036] [Ord. 2018-002]

Section 1 Change of Ownership Signs
A temporary attachment or covering of wood, plastic, or canvas over a permanent sign may be displayed no longer than 30 days following the change of ownership or activity for which the sign is intended, or up to 90 days
following issuance of a building permit. The sign shall be no larger than the previously permitted permanent sign. [Ord. 2006-036] [Ord. 2018-002]

Section 2 Small Signs

Small signs shall include but not be limited to the following types of temporary or permanent signage: equipment; real estate sale or rental; freedom of speech; campaign, provided they are removed within ten days after the election date; public warning; official government; and commemorative plaques. Sign location shall comply with the provisions indicated in Art. 8.F.1 – Minimum Setbacks. The size and height of the signs shall comply with the following: [Ord. 2008-003] [Ord. 2018-002]

A. Signs located on residential parcels five acres or less in size shall not exceed eight square feet of sign face area and eight feet in height. [Ord. 2008-003] [Ord. 2018-002]

B. Signs located on any non-residential parcel and residential parcels greater than five acres in size shall not exceed 32 square feet of sign face area and ten feet in height. [Ord. 2006-036] [Ord. 2008-003] [Ord. 2018-002]

Section 3 Transportation-Related Signs

Signs on public transportation vehicles regulated or licensed by federal, state, PBC or municipal officials or organizations, including public buses and taxicabs; and all off-premises signs incorporated into PBC owned, controlled, or operated bench, bus shelter, or waste receptacle attached to a bench or shelter, pursuant to the PBC contract dated August 22, 1989, as may be amended.

Section 4 Window Signs

Window signs not exceeding 20 percent coverage of each glass window or glass door to which the sign is attached. Any sign either hung within two feet of a window or attached to a display located within two feet of a window is considered a window sign.

Figure 8.B.4 - Window Signs
Section 5  Ground Mounted Signs Damaged during Natural Disaster

In the event of a natural disaster, which destroys or damages legally permitted ground-mounted signs, a temporary sign may be erected or an existing sign modified subject to the following limitations and requirements: [Ord. 2006-036]

A. Temporary Sign Certificate
A temporary sign certificate shall be issued by the Building Division in conjunction with a complete building permit application for the replacement of the damaged sign. This certificate will allow a temporary sign, as stated above, for a period no more than six months from the date of issuance. A copy of the temporary sign certificate shall be provided to Code Enforcement. [Ord. 2006-036]

B. Damaged Sign Face
A temporary attachment or covering of plastic, or canvas may be installed over an existing sign, which was damaged during a natural disaster. The attachment shall be no larger than the previous legally permitted permanent sign. [Ord. 2006-036]

C. Damaged Structure
A temporary sign may be installed, in place of a previously permitted sign, not more than 32 square feet in sign face area and not more than five feet in height. The temporary sign shall meet the minimum setback requirements, as stated in this Article or any conditions of approval, whichever is more restrictive. [Ord. 2006-036]

Section 6  Murals

Unless otherwise specified, Murals approved in accordance with Art. 5,I, Murals, shall be exempt from all other standards of Art. 8, Signage. [Ord. 2013-021]

CHAPTER C  PROHIBITIONS

The following prohibitions apply to all signs and structures, notwithstanding the provisions in Art. 8.B, EXEMPTIONS:

Section 1  Banners, Streamers, Pennants, or Inflatable Signs

Banners, streamers, pennants, inflatable signs, and other signs made of lightweight fabric, plastic or similar material unless stated otherwise in this Article. [Ord. 2007-001] [Ord. 2007-013] [Ord. 2008-003] [Ord. 2018-002]

Section 2  Emissions

Signs that produce noise or sounds capable of being heard, excluding voice units at drive-thrus, and signs that emit visible smoke, vapor, particles, or odor.

Section 3  Movement

Signs with visible moving, revolving, or rotating parts, caused by forced air, mechanical equipment, or by any other means. [Ord. 2018-002]

Section 4  Mobile Signs

Any sign not permanently attached to a wall or the ground or any other approved supporting structure, or a sign designed to be transported, such as signs transported by wheels, mobile billboards, "A-frame" or sandwich type, sidewalk or curb signs, blank copy signs, and unanchored signs, except where otherwise stated in this Article. [Ord. 2008-003]
Section 5  Motion Picture or Video

Motion picture and video mechanisms used in such a manner as to permit or allow-images to be visible from any street.

Section 6  Obscenities

Signs that depict, describe, or relate to “specified sexual activities” or “specified anatomical areas” as defined in Art. 4.B.2.C.1, Adult Entertainment. [Ord. 2018-002]

Section 7  Obstruction of Fire Fighting Equipment

Signs erected, constructed, or maintained so as to obstruct any fire fighting equipment; unless approved by the Fire Marshall.

Section 8  Obstructions to Driver Visibility

Signs in corner clips and safe sight distance in accordance with PBC standards that do not meet the visibility requirements in accordance with PBC standards. [Ord. 2018-002]
Section 9  Roof Signs

Signs erected above the roofline or parapet, and signs on rooftop structures, such as penthouse walls or mechanical enclosures. Signs on a sloped roof, a mansard roof or a parapet located a minimum of six inches below the roof deck or top of the parapet are allowed, subject to the standards for building mounted signs in Art. 8.G.1, Building Mounted Signs.

Figure 8.C.9 - Roof Signs

Section 10  Signs Creating Traffic Hazards

Signs that may be confused with any authorized traffic sign, signal, or device; or which makes use of the words "stop," "look," "danger," or any other word, phrase, symbol, or character that interferes with, misleads, or confuses vehicular drivers.

Section 11  Signs On Public Bus Shelters

Any sign placed upon a bench, bus shelter or any waste receptacle attached to a bench or shelter, except as exempted by Art. 8.B.3, Transportation-Related Signs, and authorized by PBC or approved by Palm Tran. [Ord. 2018-002]

Section 12  Signs On Water Vessels

Any nonexempt sign painted on or attached to a vessel, for the purpose of displaying advertisements, which is docked or anchored in the coastal waterways of PBC. This restriction does not apply to vessels passing through PBC on the Intracoastal Waterway. [Ord. 2006-036]

Section 13  Snipe Signs

All off-site signs, tacked, nailed, posted, pasted, glued, or otherwise attached to trees, poles, stakes, fences, trailers, or other supporting structures, except where otherwise stated for in this Article.

Section 14  Vehicle Displays

Unless there is only one row of parking between a building and the street, motor vehicles with business names, business addresses, telephone numbers, contractor certification numbers, logos and similar information painted or embossed on vehicle surfaces shall not park or be stored in the row of parking or any area within 25 feet of the front property line longer than four hours in a 24-hour period. This prohibition does not apply to vehicles with advertising, where the vehicles are making deliveries to that business (e.g. U.S. Postal Service, UPS, Federal Express, DHL, Airborne, etc.) or vehicles used in conjunction with a special promotion with a valid permit, vehicles with advertising signs with letters less than eight inches in heights and eight square feet in area, public transportation vehicles, and vehicles in industrial zones parked in vehicle use area.
CHAPTER D  TEMPORARY SIGNS

Signs that are intended to be used for a specific purpose for a limited time, may be permitted as set forth in this Chapter. These signs may be in ground or building mounted, banner or balloon form. Temporary signs may be sought for those Uses pursuant to Art. 4.B.11, Temporary Uses. Other temporary signs may be allowed subject to the requirements in Table 8.D.2 – Temporary Sign Standards. [Ord. 2018-002]

Section 1  Approval

Temporary signs shall be approved through the ZAR process, or in the alternative, may be approved as part of a Master Sign Plan or an Alternative Sign Plan pursuant to Art. 8.E.3 or Art. 8.E.4 of this Article as appropriate. [Ord. 2018-002]

Section 2  Signs Sought in Conjunction with Temporary Uses, and Other Temporary Signs

All temporary signs shall be permitted subject to the following Table. Additional regulations specific to residential development signs, non-residential development signs, and balloons area shall also be applied. [Ord. 2018-002]

<table>

Notes:

1. Temporary signs shall not be illuminated. [Ord. 2018-002]

2. In no event shall signs installed in conjunction with a Temporary Use exceed the time limitations allowed pursuant to Art. 4.B.11.C [Ord. 2018-002]

3. All temporary signs not removed within the time limit shall be removed subject to the provisions of Art. 8.I.4, Removal of Signs in Violation [Ord. 2018-002]

A. Residential Development

A maximum of two temporary residential development signs shall be permitted per frontage for up to three years or until 95 percent of the development has received a CO, whichever occurs later. An additional sign shall be permitted for each 660 feet of frontage in excess of 1,320 feet. [Ord. 2008-037] [Ord. 2018-002]

B. Non-Residential Development

For projects with DRO approval, no more than one temporary development sign shall be permitted, per frontage, for up to two years or until the development has received a CO. [Ord. 2018-002]

C. Balloon

Balloon signs are allowed in the CG, PO, CRE, IL, IG or PDD zoning districts, subject to the standards listed in the Table below. Only cold air shall be used in the balloon. Balloons shall not be located within any required vehicular use area. [Ord. 2018-002]

[Ord. 2018-002]
1. **Permit Requirements**
   The following information shall be provided to the Zoning Division with the application when applying for a temporary sign. No project shall be issued more than two balloon permits in any calendar year. The maximum duration of any permit shall be for ten days. There shall be a minimum of 30 days from the day the first balloon is removed before a second permit for a balloon may be issued. [Ord. 2018-002]
   a. Legal description, property control number (PCN) and address of location;
   b. Written permission of property owner or owner's designated agent;
   c. Cold air balloon installation business tax receipt; [Ord. 2007-013]
   d. Evidence of installer's liability and property damage insurance;
   e. Site plan or survey showing location of balloon and centerline of adjacent R-O-W demonstrating compliance with these regulations; and
   f. A photograph of the balloon.

2. **Prohibitions in the WCRAO**
   Balloon type signs are prohibited in the WCRAO. [Ord. 2006-004]

**CHAPTER E PROCEDURES FOR SIGNAGE**
All signs, except signs exempted by Art. 8.B, EXEMPTIONS, shall receive a building permit prior to construction, erection, attachment or placement from PBC. Non-exempt signs not erected or repaired pursuant to a valid permit are considered illegal. No sign shall be structurally altered, enlarged, or relocated except in conformity with this Article. The repair or changing of movable parts, sign copy, display, or graphic material is not deemed an alteration.

**Section 1 Required Permits and Approvals**
All development requiring DRO, ZC, or BCC approvals, shall submit an approved MSP pursuant to Art. 8.E, Procedures For Signage. [Ord. 2005 – 002]

**Section 2 Required Tag**
A. Every sign for which a building permit is required shall be plainly marked with the corresponding permit number issued for the sign. The permit number shall be marked on permanent material with a contrasting color in numbers at least one inch in height.

B. Tags shall be displayed on signs or at the base of the structure in a visible location. Tags for freestanding signs must be located on the structure between one and three feet above grade. [Ord. 2005-041]

C. The absence of the required tag shall be evidence that the sign is in violation of this Article.

**Section 3 Master Sign Program Plan**
A. **Purpose and Intent**
   The purpose and intent of a MSP is to provide a unified record of signs and to promote coordinated signage for all development subject to DRO, ZC, BCC approval or architectural review. MSP also may be required as a condition of approval. The MSP shall demonstrate how the intent of this Section is met in whole or in part, in regard to the following objectives:
   1. Improves the safety and welfare of the general public by minimizing distractions, hazards, and obstructions from sign design or placement;
   2. Provides for sign design or placement appropriate with the MGTS tier in which the signs are located;
   3. Incorporates sign design and placement related to architectural and landscape features on site; and
   4. Incorporates sign design, scale, and placement oriented to pedestrian traffic.

B. **Submittals**
   1. **Preliminary Master Sign Plan (PMS) Plan**
      A PMSP shall be submitted to the Zoning Division at the time of initial application, and shall be subject to the same review and approval process as the development itself. The initial PMSP shall include the total number of all proposed signs or sign types, the location of sign types on a plan and general building elevations, drawings, sketches of generic sign types, a computation of the total allowable sign area for each sign and sign type (the sign budget), the height of each sign, and the proposed location of each sign on a plan or general building elevations. A PMSP shall also describe proposed public artwork that would be exempt from sign area calculations. Subsequent development orders for Zoning approval or building permits, submitted following the initial approval of a
development without a Final Master Sign Plan, shall only be required to submit signage information related to the affected area.  [Ord. 2009-040]

2. Final Master Sign Plan (FMSP)

A FMSP shall be reviewed and approved, approved with conditions, or denied at Final DRO. The specific requirements for the FMSP shall be prepared pursuant to the requirements in the Technical Manual. In addition, the DRO shall make the following determinations: [Ord. 2009-040]

a. The proposed signs are compatible in style and character with any building to which the sign is to be attached, any surrounding structures, and any adjoining signage on the site; [Ord. 2009-040]

b. Future tenants will be provided adequate opportunities to construct, erect or maintain a sign for identification; and [Ord. 2009-040]

c. Directional signage and building addressing is adequate for pedestrian and vehicular circulation and emergency vehicle access. [Ord. 2009-040]

C. Conditions of Approval

The DRO, ZC or BCC, may impose conditions necessary to carry out the intent of the MSP while still permitting each sign user opportunities for effective identification and communication. These conditions may include reductions in the allowable number of signs, total sign face area, location of signs, and types of signs allowed.

Section 4 Alternative Sign Plan (ASP)

An applicant may demonstrate the intent of this Section provision can be exceeded, in whole or in part, through an ASP. The ASP shall be prepared in accordance with the design principles set forth below and shall clearly detail the modifications being requested from the provisions of this Section and how they enhance the design principles.

A. Design Principles

To qualify for consideration, an ASP shall demonstrate compliance with the following principles:

1. Innovative use of materials and design techniques in response to unique characteristics of the specific MGTS tier and site;

2. Placement of sign preserves or incorporates existing native vegetation;

3. Integrates architectural features and pedestrian facilities in a manner compatible with the tier in which the development is located. In the U/S Tier and in TDD’s, this may include pedestrian-oriented signage;

4. Consistency with approved neighborhood plans, studies, area plans or special planning or design studies; and

5. Preservation of historic signs based on the following criteria:

   a. signs 40 years or older;

   b. signs which are particular unique in character, design, or history; or

   c. signs that are part of the historic character of a building, business, or district.

B. Applicability

An ASP may be submitted for any of the following:

1. PDD’s;

2. TDD’s; or

C. Allowable Modifications to Standards

Subject to approval, an ASP may provide for the following modifications to the standards of this Section:

1. Transfer up to 20 percent of the total sign area allowed for building mounted signs to another sign type;

2. Decrease the minimum separation required for signs within properties under common ownership;

3. Transfer freestanding sign area to building mounted signs;

4. Adjust the standards of this Section to allow for the preservation of historic signs; and

5. Vary the geometry and rules used in the measurement of sign area to allow for creative and unique sign shapes.

D. Submittals and Approvals

In addition to the requirements of a MSP, an ASP shall be submitted in conjunction with a Zoning application, subject to the following requirements:

1. Submittal Requirements

   The ASP shall be submitted with a supplemental application and justification form to include project information, specific code references and proposed alternatives. The ASP shall require approval of
the requested deviations from the requirements of this Section by the ZC or BCC and may be subject to conditions of approval.

CHAPTER F    GENERAL PROVISIONS FOR ALL SIGN TYPES
This Section establishes the physical standards and requirements applicable to all signs and the districts in which they are located. More detailed standards applicable to specific types of signs follow this Section.

Section 1    Minimum Setbacks

Unless otherwise specified in this Section, signs shall be setback as follows:

   A. Temporary Signs
      Five feet from the property line.

   B. Permanent Signs
      Five feet from the base building line. If the PBC Engineer waives the requirement that the setback be measured from the base building line, the setback shall be measured from the property line.

   C. WCRAO Exemption
      Properties fronting on Okeechobee Boulevard, Military Trail, Congress Avenue and Belvedere Road are excluded from the five-foot minimum setback, for properties that have been altered by eminent domain takings for R-O-W expansions. [Ord. 2006-004]

Section 2    Computation of Maximum Sign Area

The methodology for computing the sign area for all sign types shall be as follows:

   A. Single-faced Signs
      Single-faced signs shall measure the sign area to include the entire area within a single continuous perimeter composed of squares or rectangles that enclose the extreme limits of all sign elements including, but not limited to, sign structures or borders, written copy, logos, symbols, illustrations, and contrasting colored background and materials, unless stated otherwise herein. Supporting structures such as poles, sign bases, decorative elements, details, columns are not included in the sign area calculation provided no lettering or graphics except for addresses or required tags. [Ord. 2006-036]
      1. Channel Letters, Including Neon Channel Letters and Individual Letters
         20 percent may be added to the calculation of the maximum area of a sign comprised solely of channel letters or neon channel letters or other individual freestanding letters, for developments that require a MSP. [Ord. 2005 – 002]

   B. Double-faced Signs
      Double-faced signs shall be counted as a single faced sign. Where the faces are not equal in size, the larger sign face shall be used as the bases for calculating sign area.

   C. Multi-faced Signs
      Signs with three or more sign faces, or signs with two sign faces with a distance greater than three feet apart or an interior angle greater than 45 degrees, shall calculate the sign area as the sum of all the sign faces.

   D. Three-dimensional Signs
      Signs that consist of, or have attached to them, one or more three-dimensional objects (i.e., balls, cubes, clusters of objects, sculpture, or statue-like trademarks), shall have a sign area of the sum of all areas using the four vertical sides of the smallest cube that will encompass the sign.

Section 3  Building Wall

For the purpose of this Section, a building’s wall is considered continuous if projections or recesses in a building wall do not exceed ten feet in any direction. For the purpose of Art. 5.C.1.I, Large Scale Commercial Development, a building’s wall is considered continuous if projections or recesses in a building does not exceed 25 feet.  [Ord. 2009-040] [Ord. 2012-027]

Figure 8.F.3 – Building Wall

< 10 FT

Building wall is considered continuous if projections or recesses are less than 10 feet.

< 10 FT

Building wall is considered continuous if projections or recesses are less than 10 feet.

[Ord. 2009-040] [Ord. 2012-027]

(This space intentionally left blank)
Section 4  Materials

Paper, cardboard, or other material subject to rapid deterioration shall be limited to signs displayed for no more than 30 days.

Section 5  Illumination

Signs, other than temporary signs, may be illuminated subject to the following standards: [Ord. 2018-002]

A.  General Requirements
   1. Ground-mounted and building-mounted signs adjacent to a residential zoning district or residential use shall be illuminated only during hours when the establishment is open for business; [Ord. 2017-025]
   2. External lighting shall be properly shielded to prevent glare on adjacent streets or properties; [Ord. 2017-025]
   4. Electronic Message Signs shall be exempt from AGR, Exurban, Rural or Glades Tier prohibitions on internally illuminated signage. [Ord. 2017-025]

B.  U/S Tier Requirements
   1. Signs may be illuminated by silhouette, internal and external lighting, except where located in or oriented towards the NRM or NG Sub-areas of the WCRAO; and [Ord. 2006-004]
   2. Neon signs are allowed in the U/S Tier, except where located in or oriented towards the NRM or NG Sub-areas of the WCRAO, as part of a wall sign or window sign only. The sign area for a neon sign shall not exceed eight square feet. [Ord. 2006-004]

C.  AGR Tier Requirements
   1. Signs may be illuminated by external or silhouette lighting only, with exception to the following: [Ord. 2017-025]
      b. Signs on properties with a commercial future land use designation. [Ord. 2017-025]
   2. All sign lighting is restricted to the hours of operation of the entity or establishment with which the sign is associated.
   3. Neon signs are allowed as a window sign only. The sign area shall not exceed six square feet.

D.  Exurban, Rural, and Glades Tier Requirements
   2. All sign lighting is restricted to the hours of operation of the entity or establishment with which the sign is associated.

(This space intentionally left blank)
Section 6  Changeable Copy

Changeable copy shall cover no more than 20 percent of the total sign area, except for the following uses which are exempt from this restriction: all public and civic uses, Theaters and Performance Venue, fuel price signs, and signs that flash the time and temperature subject to Art. 8.G.3.B, Electronic Message Signs.  [Ord. 2014-025] [Ord. 2017-007]

A.  Unless exempt, signs and supporting structures shall be installed in accordance with the Building Code;
B.  All signs and supporting structures, shall be maintained in the condition originally permitted; and
C.  If a sign is removed from its supporting structure for longer than 90 days, the supporting structure shall be removed pursuant to the procedures in Art. 8.I.4, Removal of Signs in Violation of this Article.

Section 7  Abandoned Signs

Sign faces with commercial messages shall be removed within 60 days after the activity, product, business, service or other use which was being advertised has ceased or vacated the premises. Any commercial message not removed or replaced with a site-related message within this time may be removed pursuant to the removal procedures set forth in Art. 8.I.4, Removal of Signs in Violation of this Article.

Section 8  Substitution of Sign Message

Any sign authorized by this Section may contain non-commercial copy in lieu of any other copy.

Section 9  Encroachment into Public Street or Sidewalk

Any sign projecting over a public street or sidewalk requires approval of the Department of Engineering and Public Works (DEPW) or other applicable agency.

Section 10  Required Address Signs

One address sign, between eight and 12 inches in height, is required for each freestanding building, and at least one freestanding sign if parcel has freestanding signs, subject to the following provisions:  [Ord. 2005 – 002]

A.  Where a multi-tenant building has a freestanding sign, the building address shall be posted on that sign in a contrasting color with letters of sufficient size to be plainly visible and legible from the roadway;
B.  Where a building has multiple addresses, the address range shall be posted;
C. Numbers posted on signs shall be in a contrasting color and shall be proportionate to the total sign area. Address numbers shall not be including in the sign face measurement; and
D. Where multiple address signs are provided in a development, they shall be of uniform size and color.

CHAPTER G   STANDARDS FOR SPECIFIC SIGN TYPES

Section 1   Building Mounted Signs

Building mounted signs consist of wall signs, awning and canopy signs, projecting signs, and marquee signs. There is no limit on the maximum number of wall signs and awning and canopy signs provided that the total size of all such signs does not exceed the total maximum signage area permitted for wall signs. Projecting signs over a pedestrian sidewalk and not under a canopy, awning, or arcade, and marquee signs are not included in the maximum sign area calculation for building mounted signs.

A. Wall Signs
Wall signs, including signs mounted on a mansard roof or parapet, are subject to the standards in Table 8.G.1.A, Wall Sign Standards. No wall sign may cover wholly or partially any required wall opening.

(This space intentionally left blank)

Notes:

1. For projects that are not subject to an MSP approval under Art. 8.E.3, Master Sign Plan, the maximum wall sign area for the storefront shall be one and a half times the length of the storefront wall, building bay, or tenant space occupied by the retail business. This provision shall not apply to Freestanding ATMs or Unmanned Retail Structures. [Ord. 2005-002] [Ord. 2013-021] [Ord. 2017-007]

2. Signs that project more than 24 inches are considered projecting signs, subject to Art. 8.G.1.C, Projecting Signs.

3. This provision does not apply to a building separated from residential by a 110 feet R-O-W; buildings completely screened from view from another building of similar height; or a civic pod, a recreational pod or open space greater than 110 feet in width. [Ord. 2012-027]

4. This standard shall not apply to Freestanding ATMs or Unmanned Retail Structures, which shall be limited to "Maximum Sign Area" standards above. [Ord. 2013-021] [Ord. 2017-007]

B. Awning and Canopy Signs Standards

Awning and canopy signs are included in the maximum allowable signage area for wall signs. Awning and canopy signs are permitted on the ground floor of buildings and shall be made of durable, long-lasting fabric and designed to fit the storefront. Awning and canopy signs shall be subject to the standards in Table 8.G.1.B, Awning and Canopy Signs Standards. [Ord. 2006-004]

Table 8.G.1.B - Awning and Canopy Sign Standards

(This space intentionally left blank)
1. WCRAO Overlay
   Awning signs shall be prohibited in the NRM, NG and NC Sub-areas of the WCRAO. [Ord. 2006-004]

2. Gas Station Canopies
   No more than two canopy signs per station may be allowed in addition to the maximum allowable
   signage area for wall signs. Gas station canopy signs shall not exceed 18 inches in height. [Ord. 2006-004]

C. Projecting Sign
   Projecting signs under canopies or covers in conjunction with pedestrian walkways are not included in the
   maximum allowable signage area for wall signs; however are subject to the standards in Table 8.G.1.C.
   Projecting Signs Standards, shall be placed perpendicular to the building façade and not project above
   the roof line. Projecting signs over a public sidewalk are included in the maximum allowable signage for
   wall signs. Projecting signs may include banners provided the sign and sign area conforms to the

D. Marquee Signs
   Marquee signs are allowed for theaters, stadiums, auditoriums, and similar uses subject to Class A
   Conditional Use approval. Marquee signs are not subject to wall sign area limits, but the maximum sign
   area shall not exceed one square foot for each foot of building wall. Marquee signs may be electronic
   message signs, subject to Art. 8.G.3.B, Electronic Message Signs, and have changeable copy. A
   marquee sign may project a maximum of six feet above the cornice of a building provided that it is

(This space intentionally left blank)
Section 2  Ground Mounted Signs

Ground mounted signs consist of freestanding signs such as monument signs, outparcel identification signs, and entrance signs.

A. Freestanding Signs

1. Prohibitions
Freestanding signs shall be prohibited in the NRM, NG and NC Sub-areas of the WCRAO. [Ord. 2006-004]

2. Minimum Separations
Freestanding signs shall have a minimum separation of 75 feet from a residential zoning district or freestanding signs on abutting parcels. Freestanding signs in the same project, shall have a minimum separation of 50 feet.

(This space intentionally left blank)

3. R = residentially zoned parcel.
4. S = Standard District.
5. PDD = Planned Development District.

3. Limitations in Median
Freestanding signs erected in a median within a driveway to a development shall not be located in corner clips or safe sight distance unless they are less than 30 inches high and shall be set back a minimum of five feet from the face of curb, or from the edge of adjacent pavement where no curb exists. Signs that overhang a driveway shall be a minimum of 13.5 feet above the adjacent pavement. [Ord. 2018-002]

Figure 8.G.2.A - Limitation In Median

4. Relationship of Sign Base to Sign Width
The total width of the sign base for signs shall be at least 30 percent of the width of the sign.

B. Outparcel Identification Signs
One freestanding outparcel identification sign may be allowed for each out parcel, subject to the standards in Table 8.G.2.B, Freestanding Outparcel Identification Signs, in addition to freestanding signs for PDDs and TDDs. This sign is excluded from the standards of Table 8.G.2.A, Freestanding Sign Standards. [Ord. 2005-002]

</table>
| Additional Residential Sign Face Area Option | If a decorative background element such as tile, stucco, or other building material or color is used, the maximum sign face area for such decorative treatment may be expanded 24 inches measured from the sign face area in each cardinal direction.
| Maximum Height | 8 ft. |
| Additional Residential Height Option | The maximum sign height, excluding the height of the structure to which the sign is attached may be increased up to ten feet for a R-O-W > 80 or = to 110 feet in width, or 12 feet for a R-O-W > 110 feet, subject to a 25 foot setback or the district setback, whichever is greater.
| Maximum Projection | 24 inches from surface of wall |
| Location | Attached to a wall, fence or project identification feature located at or within 100 feet of the entrance to a development. |
| Sign Copy and Graphics | Shall be limited to the name and address of the development. |

[Ord. 2006-036]

Notes:
1. The maximum sign height, excluding the height of the structure to which the sign is attached may be increased up to 20 feet for signs fronting on the Rural Parkway in the AGR zoning district. [Ord. 2006-036]

Figure 8.G.2.C - Entrance Signs

[Ord. 2006-036]
Section 3  Other Sign Types

The following signs are permitted subject to their own specific maximum allowable sign area and standards.

A. Mobile Signs

“A” frame type signs are allowed at business entrances on arcaded sidewalks in the U/S tier and in front of commercial or mixed-use buildings in TDD’s.

B. Electronic Message Signs

1. Applicability and Approval Process

Electronic message signs shall only be allowed as follows: [Ord. 2015-031]

<table>
<thead>
<tr>
<th>Sign Type</th>
<th>Permitted Content</th>
<th>Approval Process</th>
</tr>
</thead>
<tbody>
<tr>
<td>Type 1</td>
<td>At regional facilities as defined in Art. 1, to include events or activities scheduled.</td>

</tr>
</tbody>
</table>

Notes:

1. Unless exempt under Art. 8.B, EXEMPTIONS
2. Signs approved pursuant to the provisions of the Type 2 Electronic Changeable Copy Message Sign (PRA Pilot Program) shall be considered conforming, where in compliance with all of the standards established for the Pilot Program in Ord. 2016-020.

2. Prohibited Elements

a. Electronic message signs in windows and externally visible; [Ord. 2014-025]

b. Message units that change copy, light, intensity, words or graphics more than once per eight seconds for Type 1 or Type 3 Electronic Message Signs. Any change in message shall be completed instantaneously. There shall be no special effects in-between messages; [Ord. 2014-025] [Ord. 2016-020] [Ord. 2017-025] [Ord. 2018-002]

c. Reflectorized lamps; [Ord. 2015-031]

d. Lamps, light-emitting diodes or bulbs in excess of the amount and intensity of light generated by a 30-watt incandescent lamp or 300 lumens, whichever is less; and, [Ord. 2014-025] [Ord. 2015-031]

e. The message shall be static. There shall be no animation, flashing, scintillating lighting, movement, or varying of light intensity during the message. Messages shall not scroll, undulate, pulse, blink, expand, contract, bounce, rotate, spin, twist, or otherwise give the appearance of optical illusion or movement as it comes onto, is displayed on, or leaves the sign board. [Ord. 2014-025] [Ord. 2015-031] [Ord. 2016-020]

3. General Standards

Electronic message signs are subject to the following: [Ord. 2014-025] [Ord. 2015-031]

a. Each sign shall have a light sensing device that automatically adjusts brightness as ambient light conditions change in order to ensure that the message meets the standard for maximum brightness; [Ord. 2014-025]

b. The maximum brightness shall be 0.2 foot candles above ambient light measured 150 feet perpendicular from the sign face area from a height of six feet. No sign shall display light of such intensity to cause glare or otherwise impair the vision of a driver, or interferes with the effectiveness of an official traffic sign, signal or device; [Ord. 2014-025]

c. The sign shall be equipped with a default mechanism or setting that will cause the sign to turn off or show a full black or similar image if a visible malfunction or failure occurs; and, [Ord. 2014-025] [Ord. 2015-031]
4. Standards for Type 1 Electronic Message Signs

a. Height, Sign Face Area and Setbacks

Type 1 Electronic Message Signs are subject to the height standards for freestanding signs in Table 8.G.2.A, Freestanding Signs: Maximum Height, and the following: [Ord. 2015-031]

<table>
<thead>
<tr>
<th>Maximum Sign Area</th>
<th>The total sign face area, including electronic and static signage, shall not exceed the allowable freestanding sign area (Table 8.G.2.A, Freestanding Sign Standards)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Minimum Setback: Front</td>
<td>15 feet</td>
</tr>
<tr>
<td>Minimum Setback: Side and Rear</td>
<td>30 feet</td>
</tr>
<tr>
<td>Minimum Setback: Side Street</td>
<td>50 feet</td>
</tr>
</tbody>
</table>

b. Location

A Type 1 electronic message sign may be located in the following areas and subject to the following provisions: [Ord. 2014-025] [Ord. 2015-031]
1) In a CG, CRE, PO, or IL zoning district or in a non-residential planned development.
2) Shall not be located within 100 feet of a residential zoning district, undeveloped property with a residential FLU designation, or residential use. [Ord. 2014-025]
3) Adjacent to roadways classified as arterials or expressways; [Ord. 2014-025] [Ord. 2018-002]
4) A minimum of 1,000 feet from any signalized intersection or existing electronic message signs; [Ord. 2018-002]
5) No more than one electronic message sign shall be permitted per frontage; and, [Ord. 2014-025] [Ord. 2018-002]
6) Type 1 electronic message signs are prohibited in the WCRAO. [2006-004] [Ord. 2014-025] [Ord. 2015-031]

b. Additional Standards for Approval

In addition to the Standards of Art. 2.B.7.B.2, Conditional Uses and Official Zoning Map Amendment (Rezoning) to a PDD or TDD, when considering a Class A Conditional Use for a Type 1 Electronic Message Sign, the BCC shall consider whether or not the following standards have been met: [Ord. 2014-025] [Ord. 2015-031] [Ord. 2017-025]
1) The sign will not create confusion or a significant distraction to passing motorists;
2) The sign (including its supporting structure, if any) is consistent with Art. 8.A.1.B, General Design Principles; [Ord. 2017-025]
3) The sign will not be a nuisance to occupants of adjacent and surrounding properties; and
4) The sign is accessory to a use regional in scale and attraction that, by its nature, demonstrates a unique need to communicate more information than is ordinarily needed for an attraction. [Ord. 2017-025]

c. Conditions of Approval

In reviewing an application for a Type 1 electronic message sign, the BCC may impose conditions to assure the sign is compatible with and minimizes adverse impacts on the area surrounding the proposed sign. [Ord. 2014-025] [Ord. 2015-031]

5. Standards for Type 3 Electronic Message Signs

a. Non-residential Zoning Districts

The following signs may be located in a freestanding or outparcel identification sign in non-residential Zoning districts, including the Commercial Pod of a PUD, but shall not be located within 100 feet of a residential zoning district, undeveloped property with a residential FLU designation, or residential use. [Ord. 2014-025] [2015-031]
1) Time and Temperature

Signs that only display time or temperature where the message unit is 50 percent of the sign face area, not to exceed more than 20 square feet in sign face area, whichever is less; [Ord. 2014-025] [Ord. 2015-031] [Ord. 2016-020]

(This space intentionally left blank)
2) Fuel Prices
   Signs that only display words for cash or credit, fuel grades, and numerals for fuel prices.
   [Ord. 2014-025] [Ord. 2015-031]

b. PUD Informational Sign
   Signs that are owned and maintained by a Property Owner Association (POA) to provide notice to
   residents of upcoming events, may be allowed within a PUD, subject to the following: [Ord. 2015-
   031]
   1) Freestanding signs shall be monument style only with a maximum height of six feet; [Ord.
      2015-031]
   2) Maximum sign face area per side: 24 square feet; [Ord. 2015-031]
   3) Shall not be located within 100 feet of any residential structure or lot line, unless approved as
      a Type 1 Waiver where it is demonstrated that the sign is either oriented away from, or
      screened from view of the affected residential uses; [Ord. 2015-031]
   4) Shall not be visible from outside of the PUD, including any public roadways that bisect the
      development; and, [Ord. 2015-031]
   5) Shall not advertise any information, services or activities relating to any product or
      commercial activity external to the development. [Ord. 2015-031]

6. Building Permit Requirements
   All building permit applications that include electronic message signs shall include the following: [Ord.
   2014-025] [Ord. 2015-031]
   a. Manufacturer’s cut sheets that provide a description of all devices and compliance with the
      Prohibited Elements and General Standards listed above; and, [Ord. 2014-025] [Ord. 2015-031]
   b. A Certificate of Compliance signed and sealed by a licensed engineer, architect or landscape
      architect. [Ord. 2014-025] [Ord. 2015-031]

7. Type 2 Waivers for Electronic Message Signs
   An Applicant may apply for waivers for Electronic Message Sign standards in accordance with Art.
   2.B.7.D, Type 2 Waiver, in accordance with Table 8.G.3.B, Type 2 Waivers for Electronic Message
   Signs, below. The Applicant shall demonstrate in the Justification Statement and provide supporting
   documents that all applicable criteria in the following Table have been met. [Ord. 2016-020] [Ord.
   2018-002]

D. On-Site Directional Signs

Directional signage within developments and subdivisions shall be for communicating directions and facility information including on-site services. Directional signage shall contain no advertising copy other than the project logos, and shall be of a similar type and style throughout the development. Directional signs shall be subject to the standards in Table 8.G.3.D, On-Site Directional Sign Standards.

(This space intentionally left blank)

1. **Large Developments**
   Developments with more than 250,000 square feet, 1,500 dwelling units, 2200 ft frontage or having a combination of these uses that exceed these thresholds on a proportional basis\(^1\), may be allowed an unlimited number of direction signs up to ten feet in height, provided all signs are a minimum of 200 feet from the perimeter of the project.

\(^1\) If half of the total floor area in a mixed use development is non-residential, then the proportional threshold is 125,000. Similarly, if half of the total floor area is residential, then the proportional threshold is 750 units.

---

### Figure 8.G.3.D - Multiple Direction Signs

---

**E. Project Identification Signs**

Project identification signs are allowed for residential projects for the purpose of identifying the limits of the project. Project identification signs shall be subject to the standards in Table 8.G.3.E, Project Identification Sign Standards, and the following:

1. Project identification signs shall be attached to a buffer wall or project identification feature.
2. Project identification signs shall contain no advertising copy other than the project name or logo.
3. Project identification signs shall be permitted at the project corners only.

(This space intentionally left blank)
CHAPTER H  OFF-SITE SIGNS
Off-site signs are allowed subject to the following standards.

Section 1  Off-Site Directional Signs Standards

Off-site, freestanding directional signs are allowed to communicate directional information, provided they meet the following requirements and the standards in Table 8.H.1, Off-site Directional Sign Standards. Off-Site directional signs are permitted only for parcels that have access to, but no frontage on arterial or collector streets.

Figure 8.H.1 - Off-Site Directional Sign

A. Structure Type
Off-site directional signs shall be completely independent, freestanding structures and not attached to any other structure, nor shall any structure, including other signs, be attached to an off-site sign.

B. Locations
Off-site directional signs shall be located in the following areas:
1. On a parcel abutting the parcel identified on the directional sign;
2. On a parcel subject to a recorded document insuring ingress and egress to the parcel identified on the directional sign;
3. On a parcel adjacent to an arterial or collector street;
4. Within 50 feet of the point of ingress;
5. A minimum of five feet from all base building lines; and
6. Not in a public R-O-W or public easement.

Section 2 Billboards

A. Purpose and Intent

It is the purpose and intent of the BCC to restrict billboards and similar off-site signs in order to improve the aesthetic appearance of unincorporated PBC and minimize the visual and aesthetic degradation caused by these structures and to achieve the goal of an aesthetically improved built environment. It is the purpose and intent of this Section to leave the regulations that were adopted consistent with the Billboard Stipulated Settlement Agreement in place after the expiration of the agreement. Existing billboards with valid billboard registrations permits may be relocated or replaced subject to the requirements of this Section. No new billboards are permitted in unincorporated Palm Beach County other than those relocated or replaced pursuant to this Section. [Ord. 2016-016]

B. WCRAO Prohibitions

Billboard signs are prohibited in the WCRAO unless existing as of January 10, 2004 and the subject of a valid billboard registration issued pursuant to this Section. Billboards may not be relocated within the WCRAO. [Ord. 2006-004] [Ord. 2016-016]

C. Annual Billboard Registration Renewal

The 1998 Billboard inventory of registered billboards is required to be renewed annually by the respective owner(s) in compliance with the terms of this Section. [Ord. 2016-016]

1. Renewals for billboard registrations shall be submitted by the Billboard Owners at least 60 days prior to expiration date of the existing registration. The Owners have the responsibility to notify the County of any billboards that have been annexed or are otherwise removed from the registration list in a format acceptable to the Zoning Director. [Ord. 2016-016]

2. PBC may establish a fee by resolution in the Official Schedule of Fees to be charged for the renewal of each registered Billboard. This fee may be increased by the BCC from time to time. [Ord. 2016-016]

3. Billboard registration shall be transferable if ownership of the billboard or Billboard Company changes. [Ord. 2016-016]

4. This billboard registration system shall not require “tagging” of the billboard structure by the owner. [Ord. 2016-016]

5. Violations

a. If a registration holder fails to submit fees required by this Section prior to or upon the annual expiration date, PZB shall: [Ord. 2016-016]

   1) Immediately issue a notice of violation as specified below; and
   2) Suspend acceptance of any new applications for Special Permit for demolition, relocation, replacement, or maintenance of billboards from the same registration holder. No new Special Permit applications shall be accepted from the same permit holder until final resolution of any disputes arising from the PZB's actions. [Ord. 2016-016]

b. In the event that disputes arise regarding the amount of annual license fees charged, the permit holder may establish an escrow account into which he/she shall pay an amount equal to that portion of fees and other charges assessed by PZB which is in dispute. PZB shall be named as the beneficiary of the escrow account. This escrow account shall be established prior to the annual expiration date and shall remain in effect until final resolution of the dispute. Affected billboards shall continue to be treated as illegal signs; however, as long as the escrow account remains in effect, they shall not be removed as provided in this subsection. [Ord. 2016-016]

c. The notice of violation in accordance with Art. 10.B.1.A, Issuance of Notice of Violation shall be sent by certified mail, return receipt requested. At a minimum, it shall:

   1) Indicate the total amount of annual fees due.
   2) Indicate that the registration holder has 30 days from the date of mailing in which to pay the total fee due. [Ord. 2016-016]
   3) Assess an additional delinquency fee equal to 25 percent of the amount due.
4) Inform the registration holder that failure to pay all required fees within the time allowed shall constitute a violation of this Section and his/her billboard shall thereupon be considered to be illegal. [Ord. 2016-016]
5) Inform the registration holder of the process established by this chapter for the removal of illegal signs. [Ord. 2016-016]
6) Inform the registration holder of his right to appeal the action of PZB, as provided in this subsection. [Ord. 2016-016]
d. A copy of the notice of violation may also be prominently affixed to each billboard. [Ord. 2016-016]

D. Demolition, Relocation, Replacement or Maintenance of Billboards
Billboard maintenance requiring building permits, and billboard demolition, relocation, or replacement shall be subject to the provisions indicated below: [Ord. 2016-016]

1. Submittal Process
A billboard company shall submit an application for a Special Permit to the Zoning Division requesting its intent for demolition, relocation, replacement, or maintenance of a billboard in the format acceptable to the Zoning Director. The application shall be submitted at least 30 days prior to the requested date for the Special Permit. Each Special Permit application shall include the registration issued in 1998 that is associated with the subject billboard. [Ord. 2016-016]

2. Demolition
a. For each billboard demolition Special Permit issued by the Zoning Division, the billboard owner shall also submit an application to the Building Division requesting a demolition permit. The application shall include the Zoning Division’s Demolition Special Permit. Upon demolition of the billboard, a Certificate of Completion of Demolition issued by the Building Division shall act as the verification of the demolition. A copy of the Certificate of Completion shall be submitted to the Zoning Division. [Ord. 2005 – 002] [Ord. 2016-016]
b. Each billboard demolished subject to this Section may be relocated. The combination of a proof of billboard registration from the Zoning Division, a billboard demolition Special Permit from the Zoning Division, and a Certificate of Completion of Demolition from the Building Division shall be required prior to submitting application for a billboard relocation Special Permit. [Ord. 2005 - 002] [Ord. 2016-016]
c. A billboard relocation Special Permit application shall be submitted within four years from the issuance of the Certificate of Completion of demolition from the Building Division. The relocation of the billboard shall be confirmed with a Building Department Certificate of Completion submitted to the Zoning Division no later than the end of the fifth year. Failure of the applicant to submit to the Zoning Division the Certificate of Completion from the Building Division for the relocation of the billboard by the end of the fifth year, or by date specified in a condition of approval in the Special Permit, shall result in the relocation Special Permit becoming null and void. [Ord. 2005 - 002] [Ord. 2016-016]

3. Relocation
a. A billboard relocation Special Permit shall allow construction of a billboard with the same or lesser number of faces as contained on the demolished billboard. Two relocated single face, single billboard structures may be combined into a new two-face billboard structure. [Ord. 2016-016]
b. A relocated billboard may be constructed only within the following comprehensive plan land use categories: “CH” (Commercial High), “CL” (Commercial Low), or “I” (Industrial).
c. Within the CH, CL, and I future land use plan categories, a relocated billboard may only be located within the following zoning districts: CG, CC, IL, IG, MUPD, and PIPD.
d. Any billboard proposed for relocation within a conditional use, planned development, or similar project with an approved signage plan shall obtain approval for the relocation from the BCC, which shall retain the same discretion it exercised when granting the original development approval. If the billboard relocation requires modification of a signage plan that does not require BCC approval, the relocation shall be approved by the DRO, subject to the requirements of this Section. [Ord. 2016-016]
e. Relocation of a billboard to a PDD shall comply with the height and setback requirements for structures approved in the master plan. If modification of signage located within a PDD does not require BCC approval, such modification of signage shall be approved by the DRO.
f. A relocated billboard shall not be relocated on property assigned a residential, agricultural, or conservation zoning designation. For the purposes of this Section, residential, agricultural, and conservation zoning districts are the corresponding zoning districts to the residential, agricultural, or conservation FLU designations as indicated in Table 3.A.3.B and, Table 3.A.3.C of the ULDC.
For purposes of this Section, Traditional Development Districts are considered residential districts. Billboards may not be relocated to property assigned a Traditional Development District. Billboards may not be relocated to the residential, recreational and civic pods of a PIPD. [Ord. 2016-016]

g. All relocated billboards shall be located within an area containing a front dimension containing at least 500 linear feet. This linear dimension may include property abutting a public R-O-W.

h. The height of any relocated billboard shall not exceed 40 feet above finished grade, excluding temporary embellishments.

i. A relocated billboard shall comply with the setbacks listed below:
   1) Front: the lesser of 15 feet or the required district setback.
   2) Side: the lesser of the billboard's previous setback or the required district setback.
   3) Rear: the lesser of the billboard's previous setback or the required district setback.
   4) Side corner: the lesser of the billboard's previous setback or the required district setback. If applicable, the required district side corner setback may be reduced to 15 feet when the specific lot configuration makes relocation of the sign structure impossible based on application of the required district setback.

j. A relocated billboard shall not be constructed within a lateral distance of at least 250 feet of any residential zoning district located on the same side of the street. The lateral distance shall be measured along the street R-O-W, and shall include public R-O-W. This requirement shall supersede any other setback requirements established by this Section.

k. When a relocated billboard will be placed on a public R-O-W which:
   1) is designated by PBC for an ultimate width of 120 feet less, and,
   2) abuts a residential zoning district across the street, then a residential "clear zone" shall be established.

l. The "clear zone" shall extend at least 170 feet from the front setback of the billboard. The "clear zone" shall be the public R-O-W. Any portion of the "clear zone" located within the abutting residential district shall not contain any existing or proposed residential use.

m. When a relocated billboard will be placed on a public R-O-W which:
   1) is designated by PBC for an ultimate width of more than 120 feet but less than 170 feet, and,
   2) abuts a residential zoning district across the street;
   3) then a residential "clear zone" shall be established;
   4) the "clear zone” shall extend at least 170 feet from the front setback of the billboard. The "clear zone" shall include the public R-O-W. Any portion of the "clear zone" located within the abutting residential district shall not contain any existing or proposed residential use.

n. When a relocated billboard will be placed on a public R-O-W which:
   1) is designated by PBC for an ultimate width of more than 170 feet, and;
   2) abuts a residential zoning district across the street, then a residential "clear zone" is not required.

o. For the purposes of this Section, a residential "clear zone" may include such uses as landscaping, perimeter buffers, vegetation preservation areas, drainage facilities, roads, recreational areas, and similar nonresidential uses.

p. A relocated billboard shall not be placed within 120 feet of any residential zoning district located from, but not directly abutting, a public R-O-W. For the purposes of this Section, the 120 feet distance shall be measured from the rear of the billboard to the nearest point of the residential zoning district.

q. For relocated billboards, the setback shall be measured from the property line.

r. A billboard shall not be relocated to a site on a road with an R-O-W width of less than 80 feet.

s. A minimum separation of at least 500 feet from any other existing or relocated billboard that is not on the same structure must be maintained.

4. Replacement

A replacement for an existing billboard may be constructed consistent with the provisions of this Section.

a. Shall be located within the permitted billboard location.

b. A replacement billboard shall remain on the same side of the public R-O-W.

c. Existing billboard or the setbacks provided by the zoning district.

d. For replacement billboards, the front setback shall be measured from the property line.

e. A replacement billboard may be constructed at the same or lesser height of the existing billboard.

f. The sign face or faces of the replacement billboard shall not exceed the size of the sign face or faces of the existing billboard.
g. A replacement billboard shall contain the same number, or lesser number, of sign faces as the existing billboard.

h. When an existing billboard is located on property that is being or has been acquired for public road R-O-W purposes, the billboard location criteria of this Section may be waived subject to approval of a Type 1 Waiver. The DRO may approve the Type 1 Waiver for billboard location criteria when the width of the R-O-W to be acquired will not allow billboard replacement consistent with the intent of this Section. [Ord. 2012-027]

1) Supplemental billboard regulations.
   a) Roof-mounted billboards are prohibited.
   b) Billboards shall not be relocated to a site on a road with an R-O-W width of less than 80 feet.
   c) Billboard illumination shall be directed only towards the billboard face.
   d) Billboards with valid registration shall be legal, conforming structures, and may be repaired and maintained as provided by the applicable building codes of PBC. [Ord. 2016-016]
   e) Registered billboards may be sold, transferred, or exchanged. [Ord. 2016-016]

E. Repair and Maintenance of Billboards
   All billboards shall be maintained in good repair. Repair and maintenance of billboards shall be exempt from the limitations of Art. 1.F, NONCONFORMITIES. Repair and maintenance of billboards shall not include any improvement which increases the height, size, or number of billboard faces. Temporary embellishments may be included as part of normal maintenance and repair of billboards.

F. Effect of Annexation
   1. Any billboard that is annexed shall not be eligible for relocation into the unincorporated area. [Ord. 2016-016]
   2. Any registered billboard that is annexed shall be void upon annexation. [Ord. 2016-016]

G. Appeals
   Appeals of any decision by the Zoning Director or Building Director regarding interpretation or implementation of this Section shall be made to a Hearing Officer in accordance with Art. 2.A.14, Appeal of the ULDC. [Ord. 2016-016].

CHAPTER I  ADMINISTRATION AND ENFORCEMENT

Section 1  Zoning Division Review

The Zoning Division shall complete its review of all final approvals required by this Article within 30 days from the date of a fully completed application for a building permit, as determined by the Zoning Division, that has been submitted for Zoning Division review. For the purposes of this Article, final approval shall mean approval from the Zoning Division issued in conjunction with a building permit for the ultimate placement and construction of a sign. The Zoning Division shall either approve or deny the application within this review period. Upon expiration of this review period, the applicant may demand the required approval and proceed with the building permit approval process as though the Zoning Division approval required under this Article has been granted. If a building permit is issued, the applicant may display the sign until the Zoning Division either grants the required approval, or notifies the applicant of a denial of the application and states the reasons for the denial.

Section 2  Enforcement

PBC may enforce the provisions of this Article by all means available to it including but not limited to enforcement proceedings before the PBC Code Enforcement Special Masters pursuant to Art. 10, ENFORCEMENT, imposition of fines under Art. 10.B.3, Administrative Fines; Costs; Liens, and initiation of any civil or administrative proceeding to prevent, restrain or abate any act prohibited by the Article.

Section 3  Persons Responsible for Compliance

Persons who will be charged with violations of this Article are:

A. The owner, agent, lessee, tenant, contractor, or any other person using the land, building, or premises where such violation has been committed or exists; and

B. Any person who knowingly commits, takes part or assists in such violation.
Section 4  Removal of Signs in Violation of this Article

Any sign, banner, or sign structure not constructed or located in conformance with this Code is an illegal sign and is subject to the following procedure for notification, removal, and storage:

A. Tagged Notice
   If a sign is erected, constructed or located in violation of this Code, PBC shall attach a notice to the sign stating the violation and any corrective measures needed to bring the sign into compliance with this Article. The notice shall further specify that the sign may be removed after ten days have lapsed from the date the tagged notice was placed on the sign, if the specified corrective measures have not been taken.

B. Storage and Removal
   If corrective measures have not been complied with after ten days of placement of the tag on the sign, PZB may remove and store the sign in an appropriate storage facility at the expense of the sign owner. The storage period shall be for at least 30 days.

C. Mailed Notice
   Upon removal and storage of the sign by PZB, a Notice of Violation and Removal and Storage shall be sent directly to the named owner of the sign, if the owner's address can be readily ascertained from the sign or the address where the sign was located. The notice shall also provide information as to where the sign is stored, how the sign may be reclaimed, and the owner’s right to appeal.

D. Return or Destruction
   Any sign which has been removed from private property pursuant to the above provisions may be claimed by and returned to the property owner. Release of any sign shall be by written authorization of the Director of Code Enforcement upon proof of ownership and payment of a sum appropriate to compensate PBC for the expense of locating, tagging, mailing notice, removing, and storing the sign. Any sign that remains unclaimed after 30 days from the date of removal shall become the property of PBC and may be disposed of in any manner deemed appropriate by PBC.

E. Destruction and Unpaid Fees
   Destruction of the illegal sign shall not extinguish any claim for payment of unpaid fees. Any cost associated with removal of an illegal sign, including cost of collecting unpaid permit, may also be assessed to the sign owner. No new sign permit application will be accepted from the owner of an illegal sign until all fees and costs associated with removal and storage of any illegal sign(s) are paid.

F. Illegal Signs in Public R-O-W
   Illegal signs in the public R-O-W may be immediately removed by PBC. Such signs need not be stored and may be immediately disposed of in any manner deemed appropriate by PBC. However, if the approximate value of the sign or other structure is determined to be greater than $500.00 and the sign bears the name of the owner, the sign owner shall be notified and the sign shall be removed, stored, or returned, as the case may be, in accordance with the procedures in this Section. [Ord. 2008-003]

Section 5  Appeals

An aggrieved person has the right to immediately appeal a denial of an application for a permit or other approval required by this Article, or any notice of intent to remove or destroy a sign in violation of this Article, to the Circuit Court in the Fifteenth Judicial Circuit of the State of Florida. Any such appeal to the Circuit Court shall be filed within thirty days of the mailing of the written notice of a denial of a permit or other approval contemplated by this article, or within 30 days of the mailing of a notice of violation and removal and storage issued pursuant to this Article.

ARTICLE 9
ARCHAEOLOGICAL AND HISTORIC PRESERVATION

CHAPTER A Archaeological Resources Protection

Section 1 General

A. Purpose and Intent

It is hereby declared that the protection, enhancement and examination of significant archaeological resources is in the interest of the health, safety and welfare of the people of PBC. It is acknowledged that within PBC there exist sites which are of significant archaeological value as prehistoric, historic and cultural resources. A map identifying known archaeological sites, potential archaeological sites and archaeological conservation areas has been prepared by a qualified archaeologist and is adopted as part of this Article. [Ord. 2005 – 002]

1. Establish a procedure for review of development proposals on lands which have been identified as containing archaeological resources and archaeological conservation areas; [Ord. 2005 – 002]

2. Establish a method to review the potential archaeological and paleontological value of previously unidentified sites after the discovery of prehistoric and historical artifacts, skeletal or fossilized human remains, or non-human vertebrate fossils during development; [Ord. 2005 – 002]

3. Establish a mechanism to protect, when appropriate, resources of significant archaeological value identified pursuant to this Article that are deemed important by a qualified archaeologist to the prehistory or history of PBC, the County, the State or Nation; and,

4. Facilitate protection and documentation of resources of significant archaeological value without substantially delaying development. [Ord. 2005 – 002]

B. Applicability

This Article is applicable in the unincorporated area of PBC and regarding PBC owned property in municipalities unless otherwise regulated by municipal archaeological protection regulations and shall apply to:

1. All parcels of land which are identified as archaeological sites on the map entitled "Map of Known Archaeological Sites" and "Archaeological Conservation Areas"; [Ord. 2005 – 002]

2. A parcel on which previously unidentified artifacts, archaeological human remains, archaeological sites or features, or vertebrate fossils of significant archaeological and paleontological value is found during site development or during any other activity which may disturb an archeological site; and,

3. All applications for Type 3 Excavation, pursuant to Article 4.B.10, Excavation Uses. [Ord. 2005-002]

4. All parcels of land within Palm Beach County that are identified as a known resource in the records of the Florida Master Site File or from documentation from the State Historic Preservation Officer or State Archaeologist. [Ord. 2008-037]

5. All parcels of land which are not identified on the “Map of Known Archaeological Sites and Archaeological Conservation Areas” but other resources, documents, conditions and reasonable accounts indicate there is an increased probability that they contain previously undocumented historic resources. [Ord. 2008-037]

6. All parcels of land that are within 300 feet of a parcel depicted on the “Map of Known Archaeological Sites and Archaeological Conservation Areas” shall be considered to have a high probability of containing previously undocumented historic resources. [Ord. 2008-037]

7. The Planning, Zoning & Building departments may require a CTD/COA for any property that has a high probability of containing previously undocumented historic resources. [Ord. 2008-037]

Section 2 Development Subject to Archaeological Review

A. Development Subject to Archaeological Review

Development shall be subject to this Article as follows:

1. Parcels on Identified Sites

Parcels on the Map of Known Archaeological Sites and Archaeological Conservation Areas and proposals for Type 3 Excavation. Owners of parcels located on the Map of Known Archaeological Sites and Archaeological Conservation Areas or owners of parcels requesting approval for Type 3 Excavation...
Excavation must receive a Certificate to Dig prior to issuance of a development order. [Ord. 2005 – 002] [Ord. 2017-007]

2. Parcels with Previously Unidentified Sites

Previously unidentified archaeological sites discovered during development. When one or more artifacts archaeological human remains, or vertebrate fossils are found on a parcel during development or during other activity disturbing the site, all development or disruptive activity directly over the find shall cease. Before any further development or disruptive activity continues, the following procedure shall apply: [Ord. 2005 – 002]

a. The area directly over the find shall be staked by the property owner or agent of the property owner, contractor or subcontractor, or other party discovering the potential find;

b. Within one working day of discovering the potential find, the Department and, if applicable, the property owner shall be notified;

c. Within three days, the County Archaeologist shall inspect and evaluate the site for the purpose of determining whether artifacts or human skeletal or vertebrate fossils are located on the parcel. If the qualified archaeologist determines a significant archaeological resource is on or likely to be on the parcel, the Director of PZB shall issue an order suspending construction and define the area where the order suspending construction applies, based upon the archaeologist's assessment. Such order does not have the effect of a stop work order and shall not stop construction activity not directly impacting the defined potential archaeological or paleontological site: [Ord. 2005 – 002]

d. The County Archaeologist shall evaluate the significance of the archaeological find and send a written Archaeological Evaluation Report to the property owner and Executive Director of the PZB postmarked within seven working days from issuance of the suspension order;

e. In the Archaeological Evaluation Report, the County Archaeologist shall require an application for a Certificate to Dig be prepared if the archaeologist determines the site contains artifacts of significant archaeological value. If the County Archaeologist determines that there is no reasonable possibility that artifacts of significant archaeological value are contained on the site, the archaeologist shall make such a finding to the Department in the Archaeological Evaluation Report and PZB shall immediately lift the suspension order;

f. In order to encourage individuals to bring potential significant archaeological discoveries to PBC’s attention, private citizens engaged in disruptive activity which does not require a development order or permit and uncover a potential artifact, fossil, or remains, may request a waiver of application fees and shall not be subject to the timeframes required in this subsection. [Ord. 2005 – 002]

3. Sites Containing Human Skeletal Remains

If human skeletal remains are found, then F.S. §872.05, (1989), as amended from time to time, controls.

Section 3 Procedures

A. Historic Designation Procedures

1. Nomination and Designation Procedure

The Historic Resource Review Board (HRRB) and County Archaeologist will have the authority to nominate areas, places, buildings, structures, landscape features, archaeological and paleontological sites as being significant to Palm Beach County's history. All nominations will be sent to the BCC for final approval, official designation and listing on Palm Beach County’s Register of Historic Places. [Ord. 2008-037]

2. Criteria for Evaluating Significances of Historic Resources

Historic resource significances will be determined by meeting one or more of the following criteria/conditions: [Ord. 2008-037]

a. are associated with distinctive elements of the cultural, social, political, economic, scientific, religious, prehistoric, paleontological and architectural history that have contributed to the pattern of history in Palm Beach County, the State of Florida, the nation; or [Ord. 2008-037]

b. are associated with the lives of persons significant in our past; or [Ord. 2008-037]

c. embody the distinctive characteristics of a type, period, style, or method of construction or work of a master; or that possess high artistic value; or that represent a distinguishable entity whose components may lack individual distinction; or [Ord. 2008-037]

d. have yielded or are likely to yield information in history or prehistory; [Ord. 2008-037]

e. is listed on the National Register of Historic Places (NRHP). [Ord. 2008-037]
B. Map of Known Archaeological Sites
A Map of Known Archaeological Sites and Archaeological Conservation Areas shall be maintained by the County Archaeologist and Planning Director. The above referenced map shall consist of Florida Master Site File (FMSF) data provided by the Florida Department of State, Division of Historical Resources. The map shall be revised by PBC whenever updated information is provided by the FMSF. At a minimum, the map and the FMSF, shall be reviewed annually by department staff and the County Archaeologist to ensure the map is consistent with FMSF data. [Ord. 2005 – 002] [Ord. 2008-037] [Ord. 2018-018]

C. Certificate to Dig
1. Application
Owner of parcels required by Art. 9.A.1, General, and Art. 9.A.2, Development Subject to Archaeological Review, Parcels on the Map of Known Archaeological Sites, Archaeological Conservation Areas and proposals for Type 3 Excavation, and Previously Unknown Archaeological Sites discovered during development, to make application for a Certificate to Dig to the PZB for review shall make such application prior to the issuance of a development order. The application for the Certificate to Dig shall be made on a form available from the PZB. Only one Certificate to Dig shall be required to develop a site unless additional resources not addressed in the initial Certificate to Dig are found during site development. The department shall determine whether the application is a standard or special Certificate to Dig. A special Certificate to Dig will be required for any application that will potentially alter or destroy more than ten percent of any known or previously recorded archeological site. All special Certificates to Dig will be forwarded by the department to the Palm Beach County Historic Resources Review Board (HRRB) for review. All standard Certificates to Dig will be reviewed by the department staff and the County Archaeologist. [Ord. 2005 – 002] [2008-037] [Ord. 2017-007]

D. Certificate to Dig Procedures
1. Preliminary Testing Consultation Meeting:
The cultural resource management firm or archaeologist contracted to assess the presence of historic resources and develop mitigation plans to address adverse effects to a historic resource is required to meet with the County Archaeologist to discuss testing strategies prior to the start of the project. [Ord. 2008-037]

2. Joint in Field Consultation:
The County Archaeologist will be available for field consultations should the need arise during the testing phase of the project. If previous testing strategies prove to be ineffective all parties can request that the testing strategy be modified. [Ord. 2008-037]

3. Certificate to Dig Report Requirements
A report prepared by a qualified archaeologist shall be prepared with the application of a certificate and as requirement of the Certificate to Dig. The report shall at minimum contain a documented search of the Florida Master Site File (FMSF), a brief history of the area, an archaeological survey and field inspection performed in a professionally acceptable manner, an assessment of the archaeological significance of the site, and a proposed plan for archaeological management, which in some instances, may include recommendations for monitoring of proposed developmental activities by a qualified archaeologist. All reports submitted to the PZB on properties determined to be of archaeological significance shall include the preparation of a FMSF form, which shall be forwarded by the PZB to the Division of Historical Resources of the Florida Department of State. [Ord. 2005 – 002] [Ord. 2008-037]

4. Standards for Issuance of a Certificate to Dig
Within three working days of receiving an application, the Department shall make a determination of the completeness of the application and whether it shall be processed as a Special or Standard Certificate to Dig. A Special Certificate to Dig will be required if the application is for a previously recorded site where more than ten percent of the known or potential site surface or volume will be adversely affected by the proposed development or improvements. A Standard Certificate to Dig will be required if the application is for a previously recorded site where less than ten percent of the known or potential site surface or volume will be altered or destroyed by the proposed development. A Standard Certificate to Dig will be required for any application within an archaeological conservation area that is not the location of a previously recorded site. If the application is determined to be incomplete, the Department shall request additional information by certified mail. When the application is complete, if the Certificate to Dig is determined by the Department to be a Special Certificate to Dig the Department shall forward the application to the HRRB. The HRRB shall hold a public hearing within 30 days of the date of receipt of the application by the HRRB. The Department shall prepare its evaluation of the application and notify the applicant of its findings at least ten
working days prior to the public hearing. Evaluation of the application by the Department and the HRRB shall be based upon guidelines in this Section, recommendations included in the archaeologist's report, and the recommendation of the County Archaeologist, if required. If the Department determines that the application is a Standard Certificate to Dig, then a Certificate to Dig will be issued to the applicant within 30 days of the date of receipt of the application by the Department. The HRRB's or Department's evaluation shall do one of the following: [Ord. 2005 – 002] [Ord. 2008-037]

a. In the Archaeological Evaluation Report, the County Archaeologist shall require an application for a Certificate to Dig be prepared if the archeologist determines the site contains artifacts or cultural remains of significant archaeological value. If the County Archaeologist determines that there is no reasonable possibility that artifacts of significant archaeological value are contained on the site, the County Archaeologist shall make such a finding to the Department in the Archaeological Evaluation Report and the Department shall immediately lift the suspension order. [Ord. 2005 – 002] [Ord. 2008-037]

b. If the property is determined to contain or potentially include a site of significant archaeological value, the HRRB or the Department shall issue a Certificate to Dig with conditions that are deemed necessary to protect or mitigate any part of the site determined to be of significance, including conditions regarding development design. In order to protect archaeological resources of significant value, the HRRB or the Department may require the applicant to do one or more of the following as part of receiving the Certificate to Dig: [Ord. 2005 – 002] [Ord. 2008-037]

1) preserve part or all of the archaeological site within open space of the development; [Ord. 2008-037]

2) re-design the development to accommodate preservation of all or a portion of the archaeological site; [Ord. 2005 – 002] [Ord. 2008-037]

3) the property owner may voluntarily fund or seek funding for excavation of the resource, if agreed to by PBC. [Ord. 2008-037]

c. The Department shall charge a fee covering the direct and indirect costs associated with reviewing an Application for a Certificate to Dig, issuing the certificate and monitoring compliance with the certificate. Fees for the issuance of a Certificate to Dig shall be added to the Department Fee Schedule by resolution approved by the BCC. [Ord. 2005 – 002] [Ord. 2008-037]

E. Single Family Homeowner Certificate to Dig

1. Application

A Single-Family Homeowner Certificate To Dig (SFHCTD) will be issued to individuals whose properties are depicted in the Map of Known Archaeological Sites and Archaeological Conservation Areas or when previously unknown archaeological or historic resources are encountered during construction or other means of exposure. There is no fee associated with this certificate and the County Archaeologist will perform the initial investigation at no charge upon receiving the permit for review. [Ord. 2018-018]

Single-family homeowners of parcels required by Art. 9.B.1, General, or Art.9.A.2, Development Subject to Archaeological Review, Parcels on the Map of Known Archaeological Sites, Archaeological Conservation Areas and Previously Unknown Archaeological Sites discovered during development shall apply for a SFHCTD to the PZB for review, and shall make such application prior to the issuance of a development order or building permit. The application for the SFHCTD shall be made on a form available from the PZB. Only one SFHCTD shall be required to develop a site unless additional resources not addressed in the initial Certificate are found during site development. All single-family homeowner certificates to dig will be reviewed by the Department staff and the County Archaeologist. The County Archaeologist will perform initial investigation upon receiving the permit for review at which time the proposed project will be classified as either ground disturbing or non-ground disturbing: [Ord. 2008-037]

a. Ground Disturbing Activities

These include excavating soil for the placement of pilings, footers, telephone poles, fence posts, pools, septic tanks, in ground water features, extensive grading of virgin soil, drainage ditches and the placement of water/sewer lines. [Ord. 2008-037]

b. Non-Ground Disturbing Activities

These include slab on grade construction techniques, driveway placement, shed installation, sprinkler irrigation systems, on grade patios, above ground pools, landscaping, placement of fill soil, placement of underground conduit two inches in diameter or less and building on an existing foundation.

If a permit including only non-ground disturbing activities is submitted, approval is immediate.
If ground-disturbing activities are indicated, the County Archaeologist will review the proposed plan by comparing it to known archaeological site locations, previously tested properties, geological/ ecological features and areas of significant soil disturbance. If conditions warrant a field investigation, the County Archaeologist or designee will begin the process within ten working days of original notice. If a significant historic resource(s) as those defined by this Chapter is encountered during the field investigation, a suspension of work order will be issued for the area of impact. During this time one or more of the following may occur depending on the nature and size of the resource. [Ord. 2008-037]

1) The homeowner will be responsible for securing and financing the services of a professional archaeologist or archaeological firm to mitigate the adverse impacts to the resource. [Ord. 2008-037]

2) For simple non-midden resources less than 6 x 6 feet (2 x 2 meters) in size and less than two feet in depth the County Archaeologist or the offices designee will monitor/mitigate ongoing construction. [Ord. 2008-037]

3) The homeowner, contractor(s), and appropriate county departments, will discuss, develop and implement methods to avoid adverse impact to the historic resource. [Ord. 2008-037]

If the resource is determined not to be significant as defined by this Chapter, approval to proceed will be issued within three working days of the initial site visit.

If a significant historic resource as defined by this Chapter is discovered the location and nature of the resource will be listed with the county and state offices of historic preservation and possibly the National Register of Historic Places. [Ord. 2008-037]

2. Single-Family Homeowner Certificate To Dig Report Requirements

A report shall only be required if significant historic resources as defined by this Chapter are recovered. The report shall at minimum contain a documented brief history of the area, an archaeological survey and field inspection performed in a professionally acceptable manner, an assessment of the archaeological significance of the site, and a proposed plan for archaeological management, which in some instances, may include recommendations for monitoring of proposed developmental activities by a qualified archaeologist. All reports submitted to the PZB on properties determined to be of archaeological significance shall include the preparation of a FMSF form, which shall be forwarded by the PZB to the Division of Historical Resources of the Florida Department of State.

Regardless if significant historic resources are recovered or not the Map of Known Archaeological Sites and Archaeological Conservation Areas will be modified to reflect the actual status of the property. [Ord. 2008-037] [Ord. 2018-018]

3. Hearings of Findings

Only CTD or SFHCTD that encountered significant historic resources as defined by this Article will be discussed with the Historic Resource Review Board (HRRB). These discussions shall take place within 45 days after completion of the application at which time the resident or developer will be allowed to comment on the findings of either the CTD or the SFHCTD. [Ord. 2008-037]

4. Appeals

Within 30 days of a written decision by the HRRB regarding an application for a Certificate to Dig or Single-Family Homeowner Certificate to Dig, an aggrieved party may appeal the decision by filing a written notice of appeal and pay a filing fee established by the BCC, with the Clerk of the BCC. A copy of the notice of appeal shall be filed with the Executive Director of Planning, Zoning and Building, PZB. The notice of appeal shall state the decision which is being appealed, the grounds for the appeal, and a brief summary of the relief which is sought. Within 45 days of the filing of the appeal or the first BCC meeting which is scheduled, whichever is later, in time, the BCC shall conduct a public hearing at which time they may affirm, modify or reverse the decision of the HRRB or PZB. The applicant shall be notified by certified mail, return receipt requested, of the date, time, and place of such hearing. At this hearing, the party shall set forth the alleged inconsistencies or non-conformities with procedures or criteria set forth in this Code; however, no new materials or evidence shall be presented to or considered by the BCC. The BCC shall vote to approve, modify or overrule the decision of the HRRB or PZB. The decision of the BCC shall be in writing and a copy of the decision shall be forwarded to the appealing party. An applicant may appeal a final decision of the BCC within 30 days of the rendition of the decision by filing a petition for Writ of Certiorari in Circuit Court of the Fifteenth Judicial Circuit in and for Palm Beach County, Florida. [Ord. 2005 – 002] [Ord. 2008-037]

5. Procedure for Addressing Violations, Hearing and Penalties

Upon detection by PBC that a property owner, agent of property owner, contractor or subcontractor has violated this Section, PBC shall notify the violator(s) and the property owner, if applicable, that a
hearing has been set before the Code Enforcement Special Master. The notice, hearing and fines shall occur pursuant to Art. 10.B, Enforcement by Code Enforcement Special Masters. Further, if the Code Enforcement Board finds that a willful violation of this Article has occurred, PBC shall fine the violator a fine of up to $500.00 per day or impose imprisonment in the PBC jail not to exceed 60 days or both fine and imprisonment as provided in F.S. § 125.69. In addition to the sanctions contained above, PBC may take any other appropriate legal action, including, but not limited to, requests for temporary and permanent injunctions to enforce the provisions of this Section. It is the purpose of this Section to provide additional cumulative remedies. [Ord. 2008-037]

Section 4 Definitions

See Article 1.I, Definitions and Acronyms

CHAPTER B Historic Preservation Procedures

Section 1 General

The purpose and intent of this Article is to promote the health, safety and welfare of existing and future residents of PBC by protecting, enhancing and examining the historic resources of PBC. It is recognized that there are within unincorporated PBC and on PBC owned property in municipalities historic sites worthy of preservation and concentrations of historic buildings worthy of designation as historic districts. This Article provides mechanisms to promote historic preservation in PBC by the designation of historic sites and districts, and the regulation of construction and demolition of historic sites and within historic districts.

Section 2 Historic Sites, Structures and Districts

A. Register of Historic Places

1. If the BCC approves the nomination of a property for designation as a historic site or group of properties for designation as a historic district, said site or district shall be listed on the PBC Register of Historic Places and recorded in the official records of PBC. The PBC Register of Historic Places shall be administered by the BCC.

2. The BCC shall issue an official Certificate of Historic Significance to the owner of properties listed individually on the PBC Register of Historic Places or judged as contributing to the character of a historic district listed on the PBC Register of Historic Places. The County Administrator, or his/her appointee, is authorized to issue and place official signs denoting the geographic boundaries of each historic district listed on the PBC Register of Historic Places.

B. Criteria for Designation of Historic Site(s)/Structure(s) and District(s)

1. To qualify as a designated historic site(s)/structure(s) or historic district(s), individual properties, structures, sites or buildings, or groups of properties, structures, sites or buildings, the proposed site or district shall meet one or more of the following criteria: [Ord. 2008-037]
   a. is associated in a significant way with the life or activities of a major person important in PBC, the State or National history, (i.e., the homestead of a local founding family); or
   b. is the site of a historic event with significant effect upon PBC, the State or Nation; or
   c. is associated in a significant way with a major historic event whether cultural, economic, military, or political; or
   d. exemplifies the historic, political, cultural, or economic trends of the community in history; or
   e. is associated in a significant way with a past or continuing institution which has contributed to the life of PBC; or
   f. portrays the environment in an era of history characterized by one or more distinctive architectural styles; or
   g. embodies those distinguishing characteristics of an architectural style, period or method of construction; or
   h. is a historic or outstanding work of a prominent architect, designer, landscape architect, or builder; or
   i. contains elements of design, detail, material or craftsmanship of outstanding quality or which represented, in its time, a significant innovation or adaptation to the South Florida environment.

2. A building, structure, site, or district will be deemed to have historic significance if, in addition to, or in the place of the previously mentioned criteria, the building, structure, site, or district meets the historic development standards as defined by and listed in the regulations of and criteria for the National
3. Properties not generally considered eligible for designation include cemeteries, birthplaces or graves of historic figures, properties owned by religious institutions or used for religious purposes, structures that have been moved from their original locations, buildings or sites primarily commemorative in nature, reconstructed historic buildings, and properties that have achieved significance less than 50 years prior to the date the property is proposed for designation. However, such properties will qualify if they are integral parts of districts that do meet the previously described criteria or if they fall within one or more of the following categories.
   a. A religious property deriving primary significance from architectural or artistic distinction of historic importance.
   b. A building or structure removed from its location but which is primarily significant for architectural value, or is the surviving structure most importantly associated with an historic event or person.
   c. A birthplace or grave of a historic figure of outstanding importance if there is no other appropriate site or building directly associated with his/her productive life.
   d. A cemetery which derives its primary significance from graves of persons of transcendent importance, from age, distinctive design features, or from association with historic events.
   e. A property primarily commemorative in nature if design, age, tradition or symbolic value have invested it with its own historic significance.
   f. A building, structure, site or district achieving significance less than 50 years from the date it is proposed for designation if it is of exceptional historic importance.

Section 3 Procedures

A. Application for Historic Site or District Designation
   1. Applications for historic site or district status may only be initiated by the BCC, the HRRB or the property owner of an individual site. A neighborhood or community association may initiate an application for historic district status. Application for historic district or historic site status for public property may also be initiated by any resident of PBC.
   2. Upon receipt of an application for historic or district site status, the Department shall conduct a preliminary evaluation of the application to determine whether or not it has sufficient information to process the application. The Department shall make the determination that an application is sufficient within ten working days of receipt of an application. If the application is not sufficient to process, the Department shall specify what additional information is necessary.
   3. In the event the application as submitted is sufficient, the Department shall prepare a Designation Report for consideration at the next schedule HRRB meeting which shall contain the following information:
      a. Proposed legal boundaries of the historic building, archaeological site, structure, or district; and,
      c. Any conditions beyond the standards contained in the Code or conditions based on the standards of Article 9.B.4.A, Development Standards For Historic Districts and Sites.
      d. An analysis of historic significance and character of the nominated property; and,
      e. An analysis of public historic interiors for those buildings and structures with interior features of exceptional architectural, aesthetic, artistic or historic significance of those buildings which have public access.

B. Public Hearings Required for Historic Site or District Designation
   1. After the Department prepares its Designation report, the HRRB shall conduct a public hearing to evaluate and receive comments regarding the application.
   2. The Department shall transmit, by certified mail, a copy of the designation report and a notice of public hearing to the property owner(s) of record as of the date of nomination. This notice shall serve as notification of the intent of the HRRB to consider designation and must be mailed at least 30 calendar days prior to the public hearing. In addition, all property owners within a 300 foot radius of the nominated site or district shall be sent courtesy notice of the public hearing. However, failure to receive such courtesy notice shall not invalidate the hearing. Notice shall also be provided by publishing a copy thereof in a newspaper of general circulation in PBC at least ten calendar days prior to the date of the hearing. All interested parties shall be given an opportunity to be heard at the public hearing.
   3. After a public hearing, the HRRB shall vote on the designation within 45 calendar days at a public meeting. [Ord. 2008-037]
4. The BCC shall hold a public hearing at the next available meeting to consider the recommendation of the HRRB regarding the designation of historic sites and districts.

5. At the conclusion of the public hearing the BCC shall consider the application, all relevant support materials, the Designation Report, the recommendations of the HRRB and the standards contained in Article 9.B.4.A, Development Standards For Historic Districts and Sites, thereby adopting a resolution enacting or denying the historic district or site designation. The resolution designating a historic site shall be approved or denied by not less than a majority of the quorum present unless an affected property owner objects to the designation of a historic site, in which case a majority of the total membership of the BCC is required to approve the designation. The BCC shall take no action upon a proposed district designation if a majority of property owners in the proposed district or the owners of a majority of the land area in the proposed district object in writing filed with the BCC before the hearing. The identity of the property owners shall be determined by PBC property tax roll. The resolution designating the historic site or historic district shall be recorded in the public records of PBC, Florida. The designation shall be noted on the Official Zoning Atlas by placing the designation H on the appropriate atlas page and indicating the boundaries of the historic district or site on the Zoning Atlas.

6. Any agency with authority to issue demolition permits shall be notified of all historic site or district designations. No later than 18 months after the first property or district is designated pursuant to this Code, PBC shall amend the Plan to include an inventory of historic district boundaries and historically significant structures designated pursuant to this ordinance. Subsequent to the initial inclusion of the historic inventory in the Plan, the inventory shall be updated consistent with provisions for evaluation and appraisal of the Plan as provided in F.S.§ 163.3191, and submitted to the Florida Department of State for inclusion into the FMSF.

C. Review Guidelines for Certificate of Appropriateness

1. The HRRB shall utilize the most recent U.S. Secretary of the Interior's Standards for Rehabilitation as the standards by which applications for Certificate of Appropriateness are to be evaluated.

2. Applications for Certificates of Appropriateness must be made on forms approved and provided by the HRRB. Applications must be accompanied by appropriate site plans, scaled drawings, architectural drawings, photographs, sketches, descriptions, renderings, surveys, documents or any other pertinent information the HRRB may require to understand the applicant's planned alteration, construction, reconstruction, relocation, restoration, renovation, or demolition.

3. The application shall be submitted to PZB for review by the HRRB with a non-refundable application fee that is established by the BCC from time to time to defray the actual costs of processing the application.

4. An applicant may request a pre-application conference with the HRRB or appropriate PBC staff members to obtain information and guidance regarding the application process. The HRRB may designate subcommittees of at least one member to hold these conferences with potential applicants.

5. If or when the application is determined sufficient, the Executive Director of PZB shall place the application on the agenda of the next available meeting of the HRRB. The HRRB shall receive an application at least 30 days prior to the public hearing. If no meeting of the HRRB is scheduled within 60 days of the date an application is determined sufficient, a special meeting shall be scheduled by the chairperson.

6. If it is determined that the application is not sufficient, written notice shall be delivered to the applicant specifying the deficiencies. The Executive Director of PZB shall take no further action on the application until the deficiencies are remedied. If the applicant fails to correct the deficiencies within 20 working days, the application shall be considered withdrawn.

7. The HRRB shall act upon the application within 60 days of the determination of an application sufficiency. Nothing herein will prohibit a continuation of a hearing on an application which the applicant requests or to which the applicant consents.

8. The HRRB may advise the applicant and make recommendations in regard to the appropriateness of the application. The HRRB may delay final action until its next regularly scheduled meeting, or, if the HRRB so chooses and the applicant agrees, until a special meeting to be held within 14 calendar days of the meeting at which the application was first considered. In no case will the HRRB delay...
taking action by approving, denying, or deferring any application more than 30 calendar days after such application is formally brought before the HRRB.

9. The HRRB may approve, modify or deny an application for a Certificate of Appropriateness. For purposes of granting a Certificate of Appropriateness, the HRRB shall have access to the designated site. If the HRRB approves the application, a Certificate of Appropriateness shall be issued. The issuance of a Certificate of Appropriateness shall not relieve the applicant from obtaining other Development Permits, Orders and Approvals required by PBC. A Development Permit shall be invalid if it is obtained without the Certificate of Appropriateness required for the work. Construction for which a Certificate of Appropriateness is issued shall commence within 18 months from the date of issuance, and said certificate shall expire if 25 percent of the approved improvements have not been completed within 24 months from the date of issuance. The HRRB may not approve extensions for Certificates of Appropriateness. If the HRRB denies the application, a Certificate of Appropriateness shall not be issued. The HRRB shall state its reasons for denial in writing and present these written reasons to the applicant within ten calendar days of the HRRB’s denial. [Ord. 2010-022]

10. Within 30 days of a written decision by the HRRB regarding an application for a Certificate of Appropriateness, an aggrieved party may appeal the decision by filing a written notice of appeal and pay a filing fee, established by the BCC, with the Clerk of the BCC. A copy of the notice of appeal shall be filed with the Executive Director of PZB. The notice of appeal shall state the decision which is being appealed, the grounds for the appeal, and a brief summary of the relief which is sought. Within 45 days of the filing of the appeal or the first BCC meeting which is scheduled, whichever is later in time, the BCC shall conduct a public hearing at which time they may affirm, modify or reverse the decision of the Department. The applicant shall be notified by certified mail, return receipt requested, of the date, time, and place of such hearing. At this hearing, the appealing party shall set forth the alleged inconsistencies or non-conformities with procedures or criteria set forth in this Code; however, no new material or evidence shall be presented to or considered by the BCC. The BCC shall vote to approve, modify or overrule the decision of the HRRB. The decision of the BCC shall be in writing and a copy of the decision shall be forwarded to the appealing party. An applicant may appeal a final decision of the BCC within 30 days of the rendition of the decision by filing a petition for writ of certiorari in Circuit Court of the Fifteenth Judicial Circuit in and for PBC, Florida.

Section 4 Regulations Affecting Historic Sites

A. Development Standards For Historic Districts and Sites

1. For the purpose of this Ordinance, exterior architectural features shall include those characteristics as defined in this Article.

2. A historic building, structure, appurtenance, site or district shall only be moved, reconstructed, altered or maintained in accordance with this ordinance in a manner that will preserve the historic and architectural character of the historic building, structure, appurtenance, site or district.

3. In considering proposals for alterations to the exterior of historic buildings and structures and in applying development and preservation standards, the documented, original design of the building may be considered, among other factors.

4. A historic site, building, structure, archaeological site, improvement, or appurtenance either within a historic district or individually designated, shall only be altered, restored, preserved, repaired, relocated, demolished, or otherwise changed in accordance with the Secretary of the Interior’s Standards for Rehabilitation, as same may be amended from time to time.

5. Relocation of historic buildings and structures to other sites shall not take place unless it is shown that their preservation on their existing or original sites is inconsistent with the purposes of this Ordinance or would cause undue economic hardship to the property owner. Relocation of any structures shall not affect the designation of an underlying archaeological site.

6. Demolition of historic sites, or buildings, structures, improvements and appurtenances within historic districts shall be regulated by the HRRB in the manner described in Article 9.B.4.D, Demolition of Designated Historic Sites and Within Historic Districts, of this Code.

7. The construction of new buildings or structures, or the relocation, alteration, reconstruction, or major repair or maintenance of a non-contributing building or structure within a designated historic district shall meet the same compatibility standards as any material change in the exterior appearance of an existing contributing building. Any material change in the exterior appearance of any existing non-contributing building, structure or appurtenance in a designated historic district shall be generally compatible with the form, proportion, mass, configuration, building material, texture, color and location...
of historic buildings, structures, or sites adjoining or reasonably proximate to the contributing building, structure or site.

8. All improvements to buildings, structures and appurtenances within a designated historic district shall be visually compatible. Visual compatibility shall be defined in terms of the following criteria:
   a. **Height**
      The height of proposed buildings or modifications should be visually compatible in comparison or relation to the height of existing structures and buildings.
   b. **Front Facade Proportion**
      The front facade of each building or structure should be visually compatible with and in direct relationship to the width of the building and to the height of the front elevation of other adjacent or adjoining buildings within a historic district.
   c. **Proportion of Openings - Windows and Doors**
      The openings of any building within a historic district should be visually compatible with the openings exemplified by the prevailing historic architectural styles within the district. The relationship of the width of windows and doors to the height of windows and doors among buildings within the district should be visually compatible.
   d. **Rhythm of Solids to Voids - Front Facades**
      The relationship of solids to voids in the front facade of a building or structure should be visually compatible with the front facades of historic buildings or structures within the district.
   e. **Rhythm of Buildings on Streets**
      The relationship of building(s) to open space between it or them and adjoining building(s) should be visually compatible with the relationship between historic sites, buildings or structures within a historic district.
   f. **Rhythm of Entrance and/or Porch Projections**
      The relationship of entrances and porch projections to the sidewalks of a building should be visually compatible with the prevalent architectural styles of entrances and porch projections on historic sites, buildings and structures within a historic district.
   g. **Relationship of Materials, Texture and Color**
      The relationship of materials, texture and color of the facade of a building should be visually compatible with the predominant materials used in the historic sites, buildings and structures within a historic district.
   h. **Roof Shapes**
      The roof shape of a building or structure should be visually compatible with the roof shape(s) of a historic site, building or structure within a historic district.
   i. **Walls of Continuity**
      Appearances of a building or structure such as walls, wrought iron, fences, evergreen landscape masses, or building facades, should form cohesive walls of enclosure along a street to insure visual compatibility of the building to historic buildings, structures or sites to which it is visually related.
   j. **Scale of a Building**
      The size of a building, the building mass in relation to open spaces, windows, door openings, balconies and porches should be visually compatible with the building size and building mass of historic sites, buildings and structures within a historic district.
   k. **Directional Expression of Front Elevation**
      A building should be visually compatible with the buildings, structures and sites in its directional character: vertical, horizontal or non-directional.

B. **Waiver of the Code Provisions**
   1. **General**
      The HRRB may recommend that the BCC approve a waiver of Code requirements for designated historic resources or contributing properties to a designated historic district. The waiver may occur concurrently with the designation process or may be requested regarding any property subject to the historic site or district designation. Waivers may include setbacks, lot width, depth, area requirements, height limitations, open space requirements, vehicular requirements, design compatibility requirements, nonconforming provisions pursuant to Article 1.F.1.B.4, Exemption for all Designated Historic Sites/Structures by the BCC and other similar development regulations other than changes in permitted uses, density increases, or waiver of environmental or health standards. [Ord. 2010-022]
   a. **Findings**
      Before granting a waiver of Code requirements, the HRRB shall recommend and the BCC shall make a finding that all of the provisions 1 thru 5 have been satisfied: [Ord. 2010-022]
1) that the waiver will be in harmony with the general appearance and character of the community; [Ord. 2010-022]
2) that the waiver will not be injurious to the area involved or otherwise detrimental to the public health, safety or welfare; [Ord. 2010-022]
3) that the project is designed and arranged on the site in a manner that minimizes aural and visual impact on the adjacent properties while affording the owner(s) a reasonable use of their land; and [Ord. 2010-022]
4) the waiver is the minimum necessary to allow reasonable use of the property while maintaining the historic attributes of the property. [Ord. 2010-022]
5) existing uses and structures proposing maintenance, renovation and natural disaster damage repair shall receive special consideration from the nonconforming limitations when maintaining a designated historic site or building. [Ord. 2010-022]

2. In approving a waiver, the BCC may prescribe any appropriate conditions necessary to protect and further the interests of the area and abutting properties, including but not limited to:
   a. landscape materials, walls and fences as required buffering;
   b. modifications of the orientation of any openings; and
   c. modifications for site arrangements.

3. The waiver shall be incorporated into the resolution designating the historic site or district with conditions and standards applicable to the property or district. If the waiver process occurs separately from the designation process, the notification and public hearings procedures required for historic designation shall be followed and a resolution approving the waiver shall be recorded in the public records of PBC, Florida.

C. Certificate of Appropriateness

1. Activities Requiring Certificate of Appropriateness
   a. No building, structure, appurtenance, improvement or landscape feature within PBC, which has been designated a historic site, pursuant to Article 9.B.2.B, Criteria for Designation of Historic Sites and Districts, shall be erected, altered, restored, renovated, excavated, relocated, or demolished until a Certificate of Appropriateness regarding any exterior architectural features, landscape feature, or site improvements has been issued by the HRRB pursuant to the procedures of this Ordinance.
   b. A Certificate of Appropriateness shall be required for the erection, alteration, restoration, renovation, excavation, relocation, or demolition of any building, structure or appurtenance within any historic district established by PBC.
   c. A Certificate of Appropriateness shall be required for any material change in existing walls, fences and sidewalks, change of color, or construction of new walls, fences and sidewalks.
   d. Landscape features. Landscape features and site improvements shall include, subsurface alterations, site regrading, fill deposition, paving, landscaping walls, fences, courtyards, signs, and exterior lighting.
   e. Plan approval required. No Certificate of Appropriateness shall be approved unless the architectural plans for said construction, reconstruction, relocation, alteration, excavation, restoration, renovation, or demolition has been approved by the HRRB.

2. Certificate Not Required
   a. A Certificate of Appropriateness shall not be required for general and occasional maintenance and repair of any historic building, structure or site, or any building or structure within a historic district, except where proscribed or regulated by archaeological considerations.
   b. A Certificate of Appropriateness shall not be required for any interior alteration, construction, reconstruction, restoration or renovation. General and occasional maintenance and repair shall include lawn and landscaping care and minor repairs that restore or maintain the historic site or current character of the building or structure. General and occasional maintenance and repair shall also include any ordinary maintenance which does not require a building permit from the County. General and occasional maintenance and repair shall not include any of the activities described in Article 9.B.4.C.1, Activities Requiring Certificate of Appropriateness, above, nor shall it include exterior color change, addition or change of awnings, signs, or alterations to porches and steps or other alterations which require excavation or disturbance of subsurface resources.

D. Demolition of Designated Historic Sites and Within Historic Districts

1. Public agencies having the authority to demolish unsafe structures shall receive notice of designation of individual sites, districts, pursuant to Article 9.B, Historic Preservation Procedures. The HRRB shall be deemed an interested party and shall be entitled to receive notice of any public hearings conducted by said public agency regarding demolition of any designated property. The HRRB may
make recommendations and suggestions to the public agency and the owner(s) relative to the feasibility of and the public interest in preserving the designated property.

2. A Certificate of Appropriateness for demolition shall not be required when a building, structure or appurtenance designated as a historic site, or a contributing building, structure or appurtenance within a designated historic district, has been condemned by PBC. A demolition permit shall not be issued unless the HRRB has been notified of the proposed demolition and provided an opportunity to provide input as provided in Article 9.B.4.D, Demolition of Designated Historic Sites and Within Historic Districts.

3. In the event the HRRB determines that a historic site is in the course of being demolished by neglect, it shall notify the owner of record of such preliminary finding stating the reason therefore and shall give the owner of record 30 calendar days from the date of notice in which to commence work rectifying the evidences of neglect cited by the HRRB. Such notice shall be accomplished in the following manner:
   a. by certified mailing to the last known address of the owner of record, or
   b. in the event the procedure outlined in Article 9.B.4.D, Demolition of Designated Historic Sites and Within Historic Districts above is not successful, then by attaching such notice to the historic site twice within a week.
   c. upon the owner of record's failing to commence work within 30 calendar days of such notice, the HRRB shall notify the owner of record in the manner provided above to appear at the next public hearing of the HRRB. The HRRB shall cause to be presented at said public hearing the reasons for the notice, and the owner of record shall have the right to present any rebuttal thereto. If, thereafter, the HRRB shall determine that the historic site is being demolished by neglect, the HRRB shall forward a complaint to the Code Enforcement Division for action.

4. When an applicant seeks a Certificate of Appropriateness for the purpose of demolition of a non-condemned, contributing building, structure or appurtenance, the applicant must satisfactorily demonstrate to the HRRB the applicant's plans to improve the property.

5. The HRRB's refusal to grant a Certificate of Appropriateness for the purpose of demolition will be supported within 15 calendar days by a written statement describing the public interest that the HRRB seeks to preserve.

6. The HRRB may grant a Certificate of Appropriateness for demolition which may provide for a delayed effective date of up to six months from the date of HRRB's action. The effective date of the certificate will be determined by the HRRB based on the relative significance of the structure and the probable time required to arrange a possible alternative to demolition. The HRRB may delay the demolition of designated historic sites and contributing buildings within historic districts for up to six months, while demolition of non-contributing buildings within historic districts may be delayed for up to three months.

7. During the demolition delay period, the HRRB may take such steps as it deems necessary to preserve the structure concerned. Such steps may include, but not be limited to, consultation with community groups, public agencies, and interested citizens, recommendations for acquisition of property by public or private bodies or agencies, and exploration of the possibility of moving one or more structures or other features.

8. In connection with any Certificate of Appropriateness for demolition of buildings, structures or appurtenances as defined in this Article, the HRRB may request the owner, whether public or private, at the owner's expense, to salvage and preserve specified classes of building materials, architectural details and ornaments, fixtures, and the like for reuse in the restoration of other historic properties. The HRRB may require, at the owner's expense, recording of the historic resource's details for archival purposes prior to demolition by an interested, qualified, non-profit group(s) selected by the HRRB. The recording may include, but will not be limited to, photographs, documents, and scaled architectural drawings. The HRRB may also require the owner, at the owner's expense, to excavate, record, and conserve archaeological resources threatened by the alterations so permitted. With the owner's consent, an interested, qualified, non-profit group selected by the HRRB may salvage and preserve building materials, architectural details and ornaments, textures and the like at their expense respectively.

9. The HRRB shall consider, at a minimum, the guidelines listed below in evaluating applications for a Certificate of Appropriateness for demolition of designated historic sites or buildings, structures or appurtenances within designated historic districts:
   a. Is the structure of such interest or quality that it would reasonably fulfill criteria for designation for listing on the National Register?
   b. Is the structure of such design, texture, material, detail, size, scale, or uniqueness of location that it could be reproduced only with great difficulty and/or economically unreasonable expense?
c. Is the structure one of the few remaining examples of its kind in the neighborhood, PBC or designated historic district?
d. Would retaining the structure promote the general welfare of PBC by providing an opportunity to study local history, architecture and design, or by developing an understanding of the importance and value of a particular culture and heritage?
e. Are there definite plans for immediate reuse of the property if the proposed demolition is carried out, and what effect will those plans have on the architectural, historic, archaeological, or environmental character of the surrounding area and district?
f. Does the building or structure contribute significantly to the historic character of a designated historic district and to the overall ensemble of buildings within the designated historic district?
g. Have reasonable measures been taken to save the building from further deterioration, collapse, arson, vandalism or neglect?
h. Has demolition of the designated building or structure been ordered by the appropriate public agency due to unsafe conditions?

10. Notice of application for demolition shall be posted on the premises of the building, structure or appurtenance proposed for demolition in a location and manner clearly visible from the street by the applicant using sign provided by PZB. Such notice shall be posted within three working days of receipt of the application for demolition by the HRRB.

11. Notice of demolition shall also be published in a newspaper of general circulation at least three times prior to demolition, the final notice of which shall not be less than 15 calendar days prior to the date of the issuance of the demolition permit. The first notice shall be published not more than 15 calendar days after the application for a Certificate of Appropriateness for demolition is filed with the HRRB.

E. Relocation of Historic Resources
The HRRB shall consider the following criteria for applications for Certificates of Appropriateness for the relocation of all historic resources and contributing properties or historic resources and contributing properties located within a designated historic district.
1. The historic character of the building or structure contributes to its present setting.
2. The reasons for the proposed move.
3. The proposed new setting and the general environment of the proposed new setting.
4. Whether the building or structure can be moved without significant damage to its physical integrity, or change in or loss of significant characteristics. Elements removed in order to move the building or structure shall be replaced following relocation.
5. Whether the proposed relocation site is compatible with the historical and architectural character of the building or structure.
6. When applicable, the effect of the move on the distinctive historical and visual character of a designated historic district.
7. The effect of relocation on subsurface resources.

F. Amendments to Designations
Applications for amendments to existing designated historic sites or designated historic districts shall be processed according to the provisions and procedures, of Article 9.B.3, Procedures, of this Code. Where the HRRB has issued a Certificate of Appropriateness for demolition or relocation, the historic designation classification shall only be changed through the amendment process as described herein.

G. Undue Economic Hardship
No decision of the HRRB shall result in undue economic hardship for the property owner. The HRRB shall have the authority to determine the existence of such hardship in accordance with the criteria for undue economic hardship set forth in this Code. In any instance where there is a claim of undue economic hardship as defined in the Code, the property owner may submit, by affidavit, to the HRRB, at least 15 calendar days prior to the public hearing, the following information.
1. For all property:
   a. the amount paid for the property, the date of purchase, or other means of acquisition, such as gift or inheritance, and the party from whom purchased;
   b. the assessed value of the land and improvements thereon, according to the two most recent assessed valuations;
   c. real estate taxes for the previous two years;
   d. annual debt service, or mortgage payments, if any, for the previous two years;
   e. all appraisals, if any, obtained within the previous two years by the owner(s) or applicant(s) in connection with the purchase, financing or ownership of the property; and
f. any information that the property is not marketable or able to be sold, considered in relation to any listing of the property for sale or rent, price asked, and offers received, if any, within the previous two years, including testimony and relevant documents regarding:
   1) any real estate broker or firm engaged to sell or lease the property;
   2) reasonableness for the price or rent sought by the applicant; and
   3) any advertisements placed for the sale or rent of the property.

g. Any information regarding the infeasibility of adaptive or alternative uses for the property that can earn a reasonable economic return for the property as considered in relation to the following:
   1) a report from a registered professional engineer in the State of Florida or an architect with experience in rehabilitation as to the structural soundness of any structures on the property and their suitability for rehabilitation;
   2) an estimate of the cost of construction, alteration, demolition, or removal, and an estimate of any additional cost that would be incurred to comply with the recommendation and decision of the HRRB concerning the appropriateness of the proposed alterations;
   3) the estimated market value of the property in the current condition, after completion of the demolition, after completion of the proposed construction, and after renovation of the existing property for continued use;
   4) in the case of a proposed demolition, the testimony of an architect, developer, real estate consultant, appraiser, or other real estate professional experienced in rehabilitation as to the economic feasibility of rehabilitation or use of the existing structure on the property;
   5) financial documentation of the ability to complete the replacement project which may include but is not limited to a performance bond, a letter of credit, or letter of commitment from a financial institution; and
   6) the current fair market value of the property, as determined by at least two independent certified appraisals.

h. Any State or Federal income tax returns relating to the property for the past two years; and

i. Any other information the applicant feels is relevant to show extreme economic hardship.

2. For income property (actual or potential):
   a. annual gross income from the property for the previous two years, if any;
   b. depreciation, deduction and annual cash flow, if any, for the previous two years before and after debt service;
   c. status of leases, rentals or sales for the previous two years;
   d. itemized operating and maintenance expenses for the previous two years, including proof that adequate and competent management procedures were followed; and
   e. any other information, including the income tax bracket of the owner, applicant, or principal investors in the property, considered necessary by the HRRB to a determination as to whether the property does yield or may yield a reasonable return to the owners.

3. The applicant shall submit all necessary materials to the HRRB staff by the closing date for the next scheduled HRRB hearing in order that staff may review the documentation. The staff comments shall be forwarded to the HRRB for review and made available to the applicant for consideration prior to the hearing.

4. In the event that any of the required information is not reasonably available to the property owner and cannot be obtained by the property owner, the property owner shall file with his/her affidavit, a statement of the information which cannot be obtained and the reasons why such information cannot be reasonably obtained. Where such unobtainable information concerns required financial information, the property owner will submit a statement describing estimates which will be as accurate as are feasible.

5. The HRRB may require that an applicant furnish such additional information as the HRRB believes is relevant to the HRRB’s determination of any alleged undue economic hardship. The HRRB may also require, in appropriate circumstances, that information be furnished under oath.

Section 5 Enforcement Penalties

A. Enforcement of Maintenance and Repair Provisions
Where the HRRB determines that any improvements within the exterior of a designated historic site, or within a designated historic district, are endangered by lack of ordinary maintenance and repair, or of deterioration, or that other improvements in visual proximity to a designated site or designated historic district are endangered by lack of ordinary maintenance and repair, or of deterioration, to such an extent that it detracts from the desirable character of the designated historic site or designated historic district,
the HRRB shall request appropriate officials or agencies of the PBC government to require correction of such deficiencies under the authority and procedures of applicable ordinances, laws, and regulations.

B. General Enforcement Procedures

Violators of this Article shall be subject to a hearing before the PBC Code Enforcement Special Master. The Code Enforcement Special Master may require any person deemed to be in violation of this Ordinance to repair or cause to be repaired, or otherwise restore, the subject improvement, building, site structure, appurtenance, landscape or design feature to its appearance as it existed prior to the action taken by the violator which caused the violation. Further, if the Code Enforcement Special Master finds that a willful violation of this Code has occurred, PBC shall fine the violator a fine of up to $500.00 per day or impose imprisonment in the county jail not to exceed 60 days or by both fine and imprisonment as provided in F.S. §125.69. Stat. In addition to the sanctions contained above, PBC may take any other appropriate legal action, including, but not limited to, requests for temporary and/or permanent injunctions to enforce the provisions of this Article.

(This space intentionally left blank)
ARTICLE 10
ENFORCEMENT

CHAPTER A  GENERAL
The provisions of this Code shall be enforced by: (1) the Code Enforcement Special Master pursuant to the authority granted by F.S. § 162.01 et seq., as may be amended; (2) the Environmental Control Hearing Board (ECHB) pursuant to the PBC Environmental Control Act, Chapter 77-616, Special Acts, Laws of Florida; (3) the Groundwater and Natural Resources Protection Board (GNRPB), an alternate code enforcement board created pursuant to the authority granted by F.S. § 162.03(2) et seq., as may be amended; (4) the Board of County Commissioners (BCC) through its authority to enjoin and restrain any person violating the Code; or (5) PBC through the prosecution of violations in the name of the State of Florida pursuant to the authority granted by F. S. § 125.69 as may be amended. The powers of each are described in Art. 2.G, Decision Making Bodies.

CHAPTER B  ENFORCEMENT BY CODE ENFORCEMENT SPECIAL MASTERS
The Code Enforcement Special Master, (herein after also referred to as Special Masters) shall have the jurisdiction and authority to hear and decide alleged violations of the Codes and Ordinances enacted by PBC including, but not limited to the following codes: building, electrical, fire, gas, landscape, plumbing, sign, zoning and any other similar type codes which may be passed by PBC in the future which regulate aesthetics, construction, safety, or location of any structure on real property in PBC. Further, any violation(s) of this Code may be prosecuted pursuant to the following standards and procedures.

Section 1  Procedure
Alleged violation of any PBC Codes or Ordinances as described herein may be filed with the Code Enforcement Division by citizens or those administrative officials who have the responsibility of enforcing the various Codes or Ordinances.

A. Issuance of Notice of Violation
Except as set forth in Art. 10.B.1.B, Repeat Violation, and Art. 10.B.1.C, Public Health, Safety and Welfare Violations, if a violation(s) of a Code or Ordinance is believed to exist, the Code Enforcement Division shall specify a reasonable time to correct the violation(s). Should the violation(s) continue beyond the time specified for correction, the Code Enforcement Division shall give notice to the alleged violator that a Code Enforcement hearing will be conducted concerning the alleged violation(s) as noticed. The notice shall state the time and place of the hearing, as well as the violation(s) which is alleged to exist. If the violation is corrected and then repeated or if the violation is not corrected by the time specified for correction by the code inspector, the case may be brought for hearing even if the violation has been corrected prior to hearing, and the notice of violation shall so state. If the code enforcement officer has reason to believe a violation or the condition causing the violation presents a serious threat to the public health, safety and welfare or if the violation is irreparable or irreversible in nature, the code officer shall make a reasonable effort to notify the violator and may immediately notify the Special Master and request a hearing.

B. Repeat Violation
If a repeat violation is identified, the code inspector shall notify the violator but is not required to give the violator reasonable time to correct the violation. The code inspector, upon notifying the violator of a repeat violation, may request a hearing. The Code Enforcement Division shall give notice to the alleged violator as set forth in Art. 10.B.1.A, Issuance of Notice of Violation. The case may be brought for hearing even if the repeat violation has been corrected prior to hearing, and the notice shall so state. For the purposes of this Chapter, the term "repeat violation" shall mean a violation of a provision of a Code or Ordinance by a person who has been found through a Code Enforcement Special Master or any other quasi-judicial or judicial process within the prior five years to have violated or who has admitted violating the same provision notwithstanding the violations occur at different locations.

C. Public Health, Safety and Welfare Violations
If the Code Enforcement Officer has reason to believe a violation or the condition causing the violation presents a serious threat to the public health, safety, and welfare or if the violation is irreparable or irreversible in nature, the Code Enforcement Officer shall make reasonable effort to notify the violator and may immediately request a code enforcement hearing.
D. Persons Charged with Violations
Persons charged with such violation(s) may include:
1. The owner, agent, lessee, tenant, contractor, or any other person using the land, building, or premises where such violation has been committed or shall exist.
2. Any person who knowingly commits, takes part or assists in such violation.
3. Any person who maintains any land, building, or premises in which such violation shall exist.

E. Transfer of Property
If the owner of the property which is subject to a code enforcement proceeding transfers ownership of such property between the time the notice of violation was served and the time of the hearing, such owner shall:
1. Disclose, in writing, the existence and the nature of the proceeding to the prospective transferee.
2. Deliver to the prospective transferee a copy of the notices and other materials relating to the code enforcement proceeding received by the transferor.
3. Disclose in writing to the prospective transferee that the new owner will be responsible for compliance with the applicable Code and with orders issued in the code enforcement proceeding.
4. File a notice of the transfer of the property with the Code Enforcement Division with the identity and address of the new owner and copies of the disclosures made to the new owner, within five days of the date of the transfer.

A failure to make the disclosure described in Art. 10.B.1.E, Transfer of Property, before the transfer creates a rebuttable presumption of fraud. If the property is transferred before the hearing, the hearing shall not be dismissed, but the new owner shall be provided a reasonable period of time to correct the violation before the hearing is held.

Section 2 Hearings

A. Convene Hearing
Upon request of the Code Enforcement Officer, or at such other times as may be necessary, a hearing before the Special Master may be convened. Minutes shall be kept of all Code Enforcement hearings, and all hearings shall be open to the public.

B. Burden of Proof
At the hearing, the burden of proof shall be upon the Code Enforcement Division to show by a preponderance of the evidence that a violation(s) does exist.

C. Absence of Alleged Violator
Where proper notice of the hearing has been provided to the alleged violator as provided for herein, a hearing may proceed even in the absence of the alleged violator. Proper notice shall be assumed where a notice of violation has been mailed to the alleged violator by certified mail and the alleged violator, his or her agent, or other person in the household or business has accepted the notice of violation, or where a Code Enforcement Officer, under oath testifies that he/she did hand deliver the notice to the alleged violator, or as otherwise provided in Art. 10.B.6, Notices.

D. Testimony
All testimony shall be under oath and shall be recorded. The formal rules of evidence shall not apply but fundamental due process shall be observed and shall govern the proceedings. Upon determination of the Special Master, irrelevant, immaterial or unduly repetitious evidence may be excluded, but all other evidence of a type commonly relied upon by reasonably prudent persons in the conduct of their affairs shall be admissible, whether or not such evidence would be admissible in a trial in the courts of the State of Florida. Any part of the evidence may be received in written form.

E. Witnesses
The Special Master may inquire of or question any witness present at the hearing. The alleged violator (hereinafter also referred to as respondent), his/her attorney, Code Enforcement Officers or attorney representing the Division shall be permitted to inquire of or question any witness present at the hearing. The Special Master may consider testimony presented by Code Enforcement Officers, the respondent or any other witnesses.

F. Decision
At the conclusion of the hearing, the Special Master shall orally render his or her decision (order) based on evidence entered into the record. The decision shall then be transmitted to the respondent in the form of a written order including findings of fact, and conclusions of law consistent with the record. The order shall be transmitted by mail to the respondent within ten days after the hearing. The order may include a
notice that it must be complied with by a specified date and that a fine and costs may be imposed and, under the circumstances set forth in Art. 10.B.1.C, Public Health, Safety and Welfare Violations, the cost of repairs or other corrective action may be included along with the fine if the order is not complied with by said date. A certified copy of such order may be recorded in the public records of PBC and shall constitute notice to any subsequent purchasers, successors in interest, or assigns if the violation concerns real property, and the findings therein shall be binding upon the violator and, if the violation concerns real property, any subsequent purchasers, successors in interest, or assigns. If an order is recorded in the public records pursuant to this paragraph and the order is complied with by the date specified in the order, the Special Master shall issue an order acknowledging compliance that shall be recorded in the public records. A hearing is not required to issue such an order acknowledging compliance.

G. Powers
Special Master shall have the power to:
1. Subpoena alleged violators and witnesses to its hearings. Subpoenas may be served by a Sheriff or other authorized persons consistent with Rule 1.410(d), Florida Rules of Civil Procedure upon request by the Special Master.
2. Subpoena records, surveys, plats and other documentary materials.
3. Take testimony under oath.
4. Issue orders having the full force and effect of law to command whatever steps are necessary to bring a violation into compliance.
5. Assess fines, Lien Property and assessment costs pursuant to Art. 10.B.3, Administrative Fines, Costs, Liens; Costs; Liens of this Article, including costs relating to the prosecution of cases before the Special Master in those cases where the governing body prevails.

Section 3 Administrative Fines; Costs; Liens

A. Assessing Fines
The Special Master, upon notification by the code inspector that a Code Enforcement Order has not been complied with within the set time, or, upon finding that a repeat violation has been committed, may order the violator to pay a fine in an amount specified in this Section for each day the violation continues past the date for compliance set forth in the order, or in the case of a repeat violation, for each day the repeat violation continues, beginning with the date the repeat violation is found to have occurred by the Code Enforcement Officer. In addition, if the violation is a violation described in Art. 10.B.1.C, Public Health, Safety and Welfare Violations, the Special Master shall notify the BCC, which may make all reasonable repairs or other corrective actions which are required to bring the property into compliance and charge the violator with the reasonable costs of the repairs or other corrective actions along with the fine imposed pursuant to this section. Making such repairs does not create a continuing obligation on the part of the local governing body to make further repairs or to maintain the property and does not create any liability against the local government body for damages to the property if such repairs were completed in good faith. If a finding of a violation or a repeat violation has been made as provided in this part, a hearing shall not be necessary for issuance of the order imposing the fine.

B. Recovery of Costs
If PBC prevails in prosecuting a case before the Special Master, it shall be entitled to recover all costs incurred. Whether and to what extent such costs are imposed shall be within the discretion of the Special Master but shall not exceed the costs incurred.

C. Amount of Fines
A fine imposed pursuant to this Section shall not exceed $1,000 per day for a first violation and shall not exceed $5,000 per day for a repeat violation, and, in addition, may include all costs of repairs pursuant to Art. 10.B.3.A, Assessing Fines. If, after due notice and hearing, the Special Master finds a violation to be irreparable or irreversible in nature, he or she may impose a fine not to exceed $15,000 per violation or as otherwise authorizes by Florida State Statute. In determining the amount of fine, if any, the Special Master shall consider the following factors:
1. the gravity of the violation;
2. any actions taken by the violator to correct the violation; and
3. any previous violations committed by the violator.

D. Modification of Fines
The Special Master may reduce a fines imposed pursuant to this Section in accordance with the procedures and conditions set forth in a resolution adopted by the BCC. The Special Master may authorize the Code Enforcement Division to propose a Consent Order which sets forth agreed terms for
payment of any fine. The Special Master may in his or her discretion adopt such Consent Order in lieu of
execution or foreclosure as set forth in Art. 10.B.3.F, Foreclosure.

E. Lien
A certified copy of an order imposing a fine, or a fine plus repair costs, may be recorded in the public
records in the Office of the Clerk of the Circuit Court in and for PBC, Florida. Once recorded, the certified
copy of an order shall constitute a lien against the land on which the violation(s) exists and upon any
other real or personal property owned by the violator; and it shall be enforceable in the same manner as a
court judgment by the Sheriffs of this State, including execution and levy against the personal property of
the violator, but such order shall not be deemed to be a court judgment except for enforcement purposes.
A fine imposed pursuant to this Section shall continue to accrue until the violator comes into compliance
or until judgment is rendered in a suit to foreclose on a lien, filed pursuant to this Section, whichever
comes first. Once recorded, the lien shall be superior to any mortgages, liens, or other instruments
recorded subsequent to the filing of the code enforcement lien.

F. Foreclosure
After three months from the filing of any such lien which remains unpaid, PBC may foreclose the lien in
the same manner as mortgage liens are foreclosed. Such lien shall bear interest at the rate allowable by
law from the date of compliance set forth in the recorded order acknowledging compliance. The local
government body shall be entitled to collect all costs incurred in recording and satisfying a valid lien. No
lien created pursuant to the provisions of this Ordinance may be foreclosed on real property which is a
homestead under Art. X, Sec. 4, of the Florida Constitution.

Section 4 Other Legal Remedies

A. Legal Remedies
In addition to the criminal penalties and enforcement procedures provided herein the BCC may institute
any lawful civil action or proceeding to prevent, restrain or abate:
1. the unlawful construction, erection, reconstruction, alteration, rehabilitation, expansion, maintenance
   or use of any building or structure; or
2. the occupancy of such building, structure, land or water; or
3. the illegal act, conduct, business, or use of, in or about such premises.

B. Administrative Remedies
1. Cease and Desist Orders
   The Executive Director of PZB shall have the authority to issue cease and desist orders in the form of
   written official notices given to the owner of the subject building, property, or premises, or to his
   agent, lessee, tenant, contractor, or to any person using the land, building or premises where such
   violation has been committed or shall exist.

Section 5 Appeal
Any aggrieved party may appeal an order of the Special Master, including PBC, to the Circuit Court of PBC. Such
appeal shall not be a hearing de novo, but shall be limited to appellate review of the record created before the
Special Master. Any appeal filed pursuant to this Article shall be considered timely if it was filed within 30 days of
the execution of the order to be appealed. PBC may assess a reasonable charge for the preparation of the record
to be paid by the petitioner in accordance with F. S. § 119.07.

Section 6 Notices
All notices required by this ordinance shall be by certified mail, return receipt requested, or by hand delivery by a
Code Enforcement Officer. Notice may also be provided by publication, posting, or any other method consistent
with the provisions of F. S. § 162, as may be amended from time to time. Notice placed shall contain at a minimum,
the date, and time of the scheduled meeting of the Special Master during which time the alleged violator is
required to appear; the name and address of the alleged violator; the address or legal description of the property
wherein the alleged violation(s) has occurred; and those codes or provisions of a code for which the alleged
violator has been cited.

CHAPTER C GROUNDWATER AND NATURAL RESOURCES PROTECTION BOARD
ERM may refer alleged violations of Art. 14, Environmental Standards, or Art. 4.B.10, Excavation Uses, of this
Code to the Groundwater and Natural Resources Protection Board (GNRBP) for prosecution pursuant to the
following standards and procedures. [Ord. 2017-007]
Section 1 Procedures

A. Warning of Violation
   If an alleged violation is found, the Director of ERM shall notify the alleged property owner or violator and give the alleged property owner or violator reasonable time to correct the violation.

B. Issuance of Violation Citation
   Should the violation continue beyond the time specified for correction, or irreparable or irreversible harm has occurred, or the violation presents a serious threat to the public health, safety, and welfare, the Director of ERM shall make a reasonable effort to notify the violator and may immediately notice the GNRPB and request a hearing.

C. Notice Content
   The Notice of Hearing shall contain a statement of the time, place and nature of the hearing before the GNRPB.

   1. Notice Delivery
      a. All notices required herein shall be provided to the alleged violator by:
         1) Hand delivery; or
         2) Certified mail (return receipt requested). If such notice is sent under this paragraph to the owner of the property in question at the address listed in the tax collector’s office for tax notices, and at any other address provided to PBC by such owner and is returned as unclaimed or refused, notice may be provided by posting as described below or by first class mail directed to the addresses furnished to PBC with a properly executed proof of mailing or affidavit confirming the first class mailing; or
            a) Leave the notice at the alleged property owner’s or violator’s usual place of residence with any person residing therein who is above 15 years of age and informed of the contents of the notice; or
            b) In case of commercial premises, leaving the notice with the manager or other person in charge.
         3) In addition to providing notice as set forth in Art. 10.C.1, Procedures, at the option of the GNRPB, notice may also be served by publication or posting, as follows.
            a) In lieu of notice as described in Art. 10.C.1, Procedures, notice may be posted at least ten days prior to the hearing, or prior to the expiration of any deadline contained in the notice, in at least two locations, one of which shall be the property upon which the violation is alleged to exist and the other of which shall be at the front door of the courthouse in PBC.
            b) Proof of posting shall be by affidavit of the person posting the notice, which affidavit shall include a copy of the notice posted and the date and places of its posting.
         4) Evidence that an attempt has been made to hand deliver or mail notice as provided in Art. 10.C.1, Procedures, together with proof of posting as provided in Art. 10.C.1, Procedures, shall be sufficient to show that the notice requirements of this Article have been met, without regard to whether or not the alleged violator actually received such notice.

Section 2 Correction of Violation

If the alleged violation is corrected and then recurs, or if the violation is not correct by the time specified for correction, the Director of ERM may issue a Violation Citation and a Notice of Hearing to the alleged property owner or violator and schedule a hearing. The GRNPB may hear the alleged violation in this instance, even if it has been corrected prior to the GRNPB hearing and every notice shall so state.

Section 3 Transfer of Property

If the owner of property which is subject to a code enforcement proceeding transfers ownership of such property between the time the notice of violation was served and the time of the hearing, such owner shall:

   A. Disclose, in writing, the existence and the nature of the proceeding to the prospective transferee.
   B. Deliver to the prospective transferee a copy of the notices and other materials relating to the GNRPB proceeding received by the transferor.
   C. Disclose, in writing, to the prospective transferee that the new owner will be responsible for compliance with the applicable Code and with orders issued in the GNRPB proceeding.
   D. File a notice with the Department of ERM of the transfer of the property, with the identity and address of the new owner and copies of the disclosures made to the new owner, within five days of the transfer.
A failure to make the disclosures described in paragraphs above before the transfer creates a rebuttable presumption of fraud. If the property is transferred before the hearing, the hearing shall not be dismissed, but the new owner shall be provided a reasonable period of time to correct the violation before the hearing is held.

Section 4 Hearings

Alleged violations of any of the Sections described herein may be filed with the GNRPB by citizens or those officials who have the responsibility of enforcing such Sections.

A. The GNRPB shall proceed to hear the cases on the agenda for that day. All testimony shall be under oath and shall be recorded. Each case before the GNRPB shall be presented by the Director of ERM. The GNRPB shall take testimony from PBC staff, if relevant, the alleged violator or property owner, and other relevant testimony. Formal rules of evidence shall not apply, but fundamental due process shall be observed and govern the proceedings. Upon determination of the chairperson, irrelevant, immaterial or unduly repetitious evidence may be excluded, but all other evidence of a type commonly relied upon by reasonably prudent persons in the conduct of their affairs shall be admissible, whether or not such evidence would be admissible in a trial in the courts of the State of Florida. The burden of proof shall be upon the Director of ERM to show by a preponderance of the evidence that a violation does exist.

B. Any member of the GNRPB, or the attorney representing the GNRPB, may inquire of or question any witness before the GNRPB. Any member of the GNRPB, an alleged violator (hereinafter also referred to as respondent) his/her attorney, or Code Officers shall be permitted to inquire of any witness before the GNRPB. The GNRPB may consider testimony presented by ERM, the respondent or any other witnesses.

C. At the conclusion of the hearing, the GNRPB shall orally render its decision (order) based on evidence entered into the record. The decision shall be by motion approved by the affirmative vote of those members present and voting, except that at least four members of the GNRPB must vote for the action to be official. The GNRPB's decision shall then be transmitted to the respondent in the form of a written order including finding of facts, and conclusions of law consistent with the record. The order shall be transmitted by certified mail or hand delivery to the respondent within ten days after the hearing. The order may include a notice that it must be complied with by a specified date and that a fine and costs may be imposed and under the circumstances set forth in Art. 10.C.5, Administrative Fines Costs Liens. The cost of repairs or other corrective action may be included along with the fine if the order is not complied with by said date. A certified copy of such order may be recorded in the public records of PBC and shall constitute a notice to any subsequent purchasers, successors in interest, or assigns if the violation concerns real property, and the findings therein shall be binding upon the violator, and if the violation concerns real property, any subsequent purchasers, successors in interest, or assigns. If an order is recorded in the public records pursuant to this paragraph and the order is complied with by the date specified in the order, the GNRPB shall issue an order acknowledging compliance that shall be recorded in the public records. A hearing is not required to issue such an order acknowledging compliance.

If PBC prevails in prosecuting a case before the GNRPB, it shall be entitled to recover all costs incurred. Whether and to what extent such costs are imposed shall be within the discretion of the GNRPB but shall not exceed the costs incurred.

Section 5 Administrative Fines; Costs; Liens

A. Whenever one of the GNRPB's orders has not been complied with by the time set for compliance, or upon finding that a repeat violation has been committed, the GNRPB may order the violator to pay a fine in an amount specified in this Section for each day the violation continues past the date for compliance set forth in the order, or in the case of a repeat violation, for each day the repeat violation continues, beginning with the date the repeat violation is found to have occurred by the code inspector. In addition, if the violation is a violation described in Art. 10.C.1.B, Issuance of Violation Citation, the GNRPB shall notify the BCC, which may make all reasonable repairs or other corrective actions which are required to bring the property into compliance and charge the violator with the reasonable costs of the repairs or other corrective actions along with the fine imposed pursuant to this Section. Making such repairs does not create a continuing obligation on the part of PBC to make further repairs or to maintain the property if such repairs were completed in good faith. If a finding of a violation or a repeat violation has been made as provided in this part, a hearing shall not be necessary for issuance of the order imposing the fine. A repeated violation shall mean a violation of this Ordinance by a person who, within five years prior to the
violation, has been previously found by the GNRPB to have violated or who has admitted violating the same provision within five years prior to the violation, notwithstanding the violations occurred at different locations.

Persons charged with such violation(s) may include:
1. The owner, agent, lessee, tenant, contractor, or any other person using the land, building, or premises where such violation has been committed or shall exist.
2. Any person who knowingly commits, takes part or assists in such violation.
3. Any person who maintains any land, building, or premises in which such violation shall exist.

B. A fine, imposed pursuant to this Section, shall not exceed $1,000 per day for a first violation and shall not exceed $5,000 per day for a repeat violation, and in addition, may include all costs of repairs pursuant to Art. 10.C.5.A. Whenever one of the GNRPB. For violations deemed irreparable or irreversible by the GNRPB, the GNRPB may impose a fine not to exceed $15,000 per violation, pursuant to F. S. §162.09, as may be amended. In determining the amount of a fine, the GNRPB shall consider the following factors: (a) the gravity of the violation(s); (b) any actions taken by the violator to correct the violation(s); and (c) any previous violations committed by the violator. Notwithstanding the foregoing, penalties and fines imposed for violation of the Petroleum Storage Systems Ordinance or Petroleum Contamination Cleanup Criteria Ordinance, as either Ordinance may be amended, shall be imposed as set forth in F.S. § 403.121, as amended periodically, pursuant to the agreement approved by the Palm Beach County Board of County Commissioners (R2001-941) on June 19, 2001 and June 12, 2010 (R2010-0095). [Ord. 2013-021]

C. The Director of ERM may record a certified copy of an order imposing a fine, or a fine plus repair costs, in the public records in the Office of the Clerk of the Circuit Court in and for PBC, Florida. Once recorded the certified copy of an order shall constitute a lien against the land on which the violation(s) exists, and upon any other real or personal property owned by the violator; and it may be enforced in the same manner as a court judgment, by the Sheriff, including levy against the personal property of the violator. Once recorded the lien shall be superior to any mortgages, liens, or other instruments recorded subsequent to the filing of the GNRPB lien.

D. After six months from the filing of any such lien which remains unpaid, PBC may foreclose the lien in the same manner as mortgage liens are foreclosed. Such lien shall be superior to all other liens except liens for taxes, and shall bear interest at the rate of ten percent per annum from the date recorded. No lien created pursuant to the provisions of this ordinance may be foreclosed on real property which is a homestead under Art. X, of the Florida Constitution.

Section 6 Appeal

Any aggrieved party may appeal an order of the GNRPB, including PBC, to the Circuit Court of PBC, Florida. Such appeal shall not be a hearing de novo, but shall be a petition for Writ of Certiorari and the Court shall be limited to appellate review of the record created before the GNRPB. Any appeal filed pursuant to this Article shall be considered timely if it was filed within 30 days of the execution of the order to be appealed after the hearing at which the order was announced. The County may assess a reasonable charge for the preparation of the record to be paid by the petition in accordance with F. S. § 119.07.

Section 7 Irreparable or Irreversible Harm

A. A tree resource is irreparably harmed when an action alters the resource as a whole so that it cannot be restored to or returned to its original or pre-disturbance condition in a reasonable time. A non-renewable resource (such as groundwater, sea turtles, etc.) is irreparably harmed when it is destroyed, removed or consumed. [Ord. 2006-036]

B. A renewable resource is irreparably harmed when it is destroyed, removed or consumed without reasonable provision for the renewal of the resource. [Ord. 2006-036]

C. Injury is not remote or speculative but actual or imminent. [Ord. 2006-036]

D. The injury must be of a peculiar nature, (such as a specimen tree) so that a monetary award is not adequate compensation or cannot atone for the harm done. This may include damage to the surrounding habitat (worms, birds, squirrels, etc.) and/or damage to the quality of life (shade, beauty, etc.). [Ord. 2006-036]

E. The damage may be incalculable. [Ord. 2006-036]
F. Further judicial action (appeal/injunction) is incapable of preventing the injury. A remedy at law is not full, complete, and adequate because the resource cannot be restored. No fair and reasonable redress may be had in a court of law. [Ord. 2006-036]

G. The harm must be substantial in extent, duration or magnitude. [Ord. 2006-036]

H. The resource being harmed must constitute an environmental resource. [Ord. 2006-036]

I. Irreparable harm will not be found where mitigation measures can substantially restore or replace the benefits provided by the resource. PBC has the burden of proving irreparable harm by the preponderance of evidence - a determination that a greater amount of credible evidence supports one side of an issue more than the other. The maximum penalty the BCC can impose is $15,000 per violation. In determining the fine, the BCC shall consider: [Ord. 2006-036]

1. The gravity of the violation; [Ord. 2006-036]
2. Any actions of the violator to correct the violation; and [Ord. 2006-036]
3. Any previous violations committed by the violator. [Ord. 2006-036]

CHAPTER D  ENVIRONMENTAL CONTROL HEARING BOARD

Any alleged violation of Art. 15.A, (Environmental Control Rule I) - Onsite sewage treatment and, or Art. 15.B, Environmental Control rule II Drinking Water Supply Systems, (Health, Sewage Treatment, or Drinking Water) may be prosecuted by the Environmental Control Hearing Board (ECHB). In addition, ERM may refer any alleged violation of Wetlands Protection to ECHB for prosecution.

Section 1  Procedure

A. Warning Violation

If an alleged violation of Art. 15.A, (Environmental Control Rule I) - Onsite sewage treatment and, or Art. 15.B, Environmental Control rule II Drinking Water Supply Systems is determined by the PBC Health Department (PBCHD), the PBC Health Director shall issue a formal notice of violation to the property owner or violator. The notice shall specify the corrective actions and a reasonable period of time to correct the violation.

B. Show Cause

Should the violation continue beyond the specified time for correction or if an activity was conducted without a required permit/approval or if the violation creates a health threat, the PBC Health Director shall refer the matter to the Environmental Control Office for enforcement. The Environmental Control Officer shall request the ECHB to issue a Order to Show Cause to the property owner or violator.

C. Notice of Hearing

If the ECHB issues a show cause order, the subject order along with the notice of hearing, shall be made in the same way as the Florida Rules of Civil Procedure provide for service of process of initial pleadings. Subsequent notices of hearing may be mailed.

Section 2  Hearings

A. Procedure at Hearings

The ECHB shall proceed to hear the cases scheduled for the day. All testimony shall be under oath and shall be recorded. Each case will be presented by the Environmental Control Officer with testimony and evidence from PBCHD staff. The property owner or violator may be represented by an attorney and the formal rules of evidence shall not apply, but fundamental due process shall be observed and govern the proceedings.

B. Action by ECHB

At the conclusion of the Hearing, the ECHB shall issue findings of fact, based on evidence in the record, and conclusions of law and shall issue an order consistent with powers granted in Chapter 77-616, Special Acts, Laws of Florida. The order may include a notice of corrective action that must be completed by a specified date and the amount of fine to be paid by a specified date. The order shall have the force of law to command whatever steps are necessary to bring a violation into compliance. The findings shall be by motion approved by a majority of those present and voting, except that a quorum of at least three members shall be present for the action to be official.

C. Notification of Action

Notification of the ECHB action including findings of fact and conclusions of law (order) consistent with the record shall be delivered (mailed) to the ECO, petitioner, respondent, and to every person who filed an answer or who appeared as a party at the hearing mailed within 15 days of ECHB action.
Section 3 Administrative Fines and Liens

A. Fine
The ECHB may order the property owner or violator to pay a fine of up to $500/day for each violation.

B. Fine Constitutes Lien
If the fine imposed by the ECHB is not paid within the time specified in the Board Order, a certified copy of the order may be recorded in the public records of the office of the Clerk of the Circuit Court for PBC, Florida and thereafter shall constitute a lien against the land on which the violation exists.

Section 4 Appeal

Any person aggrieved by any action of the ECHB may seek judicial review as provided by F. S. § 120.68. No action shall be taken to collect fines imposed for violation of this act until judgment becomes final.

CHAPTER E REMEDIES

Section 1 Administrative Remedies for Art. 14, and Art. 4.D, Excavation

In order to provide an expeditious settlement that would be beneficial to the enforcement of the provisions of Art. 14, Environmental Standards and Art. 4.B.10, Excavation Uses, and be in the best interest of the citizens of PBC, the Director of ERM is authorized to enter into voluntary consent (settlement) agreements with alleged violators. Any such agreement shall be a formal written agreement between the Director of ERM on behalf of PBC and any such alleged violators, and shall be approved as to form and legal sufficiency by the County Attorney's Office.

[Ord. 2017-007]

A. Conditions
Such consent agreements may be conditioned upon a promise by the alleged violator to:
1. Restore, mitigate, or maintain sites; or
2. Remit payment of a monetary settlement not to exceed the maximum amount allowed per violation, as set forth in the applicable act, delegated authority or Code, such monies to be deposited in the PBC Pollution Recovery Trust Fund; or
3. Remit payment for compensatory damages and nonperformance penalties and costs and expenses of PBC in tracing the source of the discharge, in controlling and abating the source of the pollutants and the pollutants themselves, and in restoring the waters and property, including animal, plant and aquatic life, of PBC to their former conditions; and costs of PBC for investigation, enforcement, testing, monitoring, and litigation; such monies to be deposited in the PBC Pollution Recovery Trust Fund; or
4. Any other remedies or corrective action provided for in the applicable act, delegated authority or Code, deemed necessary and appropriate by the Director of ERM to ensure compliance with such act or Code.

Section 2 Agreements

Such consent agreements shall not serve as evidence of a violation of any applicable act or Code, and shall expressly state that the alleged violator neither admits nor denies culpability for the alleged violations by entering into such agreement. In addition, prior to entering into any such consent agreement, each alleged violator shall be apprised of the right to have the matter heard in accordance with the provisions of the applicable act or Code, and that execution of the agreement is not required.

Section 3 Validity

Such consent agreements shall be valid and enforceable in a court of competent jurisdiction in PBC and shall abate any enforcement proceedings available to the Director of ERM for so long as the terms and conditions of such agreement are complied with. In the event an alleged violator fails to comply with the terms and conditions set forth in the executed agreement, the Director of ERM may either:
A. Consider the consent agreement void and pursue any remedies available for enforcement of the applicable provisions of the Code; or
B. Initiate appropriate legal proceedings for specific performance of the consent agreement.
Section 4 Civil Remedies

The BCC or any aggrieved or interested person shall have the right to apply to the Circuit Court of PBC, to enjoin and restrain any person violating the provisions of this Code, and the Court shall, upon proof of the violation of same, have the duty to forthwith issue such temporary and permanent injunctions as are necessary to prevent the violation of same.

Section 5 Criminal Remedies

Pursuant to F. S. §125.69(1), violations of county ordinances shall be prosecuted in the same manner as misdemeanors are prosecuted. Any person violating any of the provisions of this Code or who shall fail to abide by and obey all orders and resolutions promulgated as herein provided, shall, upon conviction, be punished by a fine not to exceed $500 or imprisonment for not more than 60 days, or both for each violation, and payment of all costs and expenses involved in prosecuting the offense. Each day that a violation continues shall constitute a separate violation.

ARTICLE 11
SUBDIVISION, PLATTING, AND REQUIRED IMPROVEMENTS

CHAPTER A GENERAL REQUIREMENTS

Section 1 General Provisions

A. Applicability
B. Purpose and Intent

Section 2 Interpretation

A. Minimum Requirements
B. Relationship to Other Agency Requirements
C. Conflicting Requirements

Section 3 General Requirements

A. Platting Requirement
B. Required Improvements Installation Requirement
C. Standards and Responsibility for Required Improvements
D. Conformity with Land Use, Density, and Concurrency Regulations
E. Site Suitability

Section 4 Application of Ordinance

A. General Application
B. Building Permits and Other Approvals

Section 5 Previously Approved or Platted Subdivisions

A. Active Subdivision Development
1. Subdivision Developments Which Are Committed Developments or Deemed Vested
2. Modifications to an Active Subdivision Plan or Preliminary Plat
3. Fees Waived for Applications by the County Engineer
B. Non-Conforming Subdivisions
1. Vacate Non-Conforming Plats
C. Subject to Vacation by the Board
1. Public Hearing Required
2. Legal Access to Be Maintained
D. Not Subject to Vacation
1. Streets
2. Positive Drainage

CHAPTER F  VARIANCES ..................................................................................................................... 45

Section 1  Variances ............................................................................................................................... 45
ARTICLE 11

SUBDIVISION, PLATTING, AND REQUIRED IMPROVEMENTS

CHAPTER A GENERAL REQUIREMENTS

Section 1 General Provisions

A. Applicability
The regulations set forth in this Article shall be applicable to all subdivision of land in unincorporated PBC, Florida, or as hereafter established. Pursuant to Art. 2.G.4, Staff Officials, the Director of Land Development shall be responsible for review and rendering interpretations on behalf of the County Engineer. Deviations from the provisions of this Article may be permitted for development supporting government facilities within the PO Zoning District, subject to approval by the County Engineer utilizing the following standards: [Ord. 2007-013] [Ord. 2018-018]
1. the proposed deviation(s) creates no hindrances, restraints, or incompatibilities for the uses, structures, and lands surrounding and in the vicinity of the land proposed for development; [Ord. 2007-013]
2. the proposed deviation(s) maintains proper and adequate access to the land proposed for development; [Ord. 2007-013]
3. the proposed deviation(s) allows for development in a logical, timely, and functionally adequate manner; [Ord. 2007-013]
4. special or unique circumstances or factors exist that are applicable to the land proposed for development; [Ord. 2007-013]
5. the proposed deviation(s) allows for reasonable or practical use of the land proposed for development; [Ord. 2007-013]
6. approval of the deviation(s) is consistent with the purpose, goals, policies, and objectives of the Plan and this Code; and, [Ord. 2007-013]
7. approval of the deviation(s) is not injurious to the surrounding area or otherwise detrimental to public health, safety, and general welfare. [Ord. 2007-013]

B. Purpose and Intent
The specific provisions of this Article shall be applied and interpreted in a manner consistent with PBC’s purpose and intent to:
1. Establish procedures and standards for the subdivision of real estate;
2. Ensure proper legal description, identification, monumentation, and recording of subdivisions;
3. Aid in the coordination of land development in accordance with orderly physical patterns;
4. Implement the Plan with respect to installation of on-site improvements for new development, which improvements are necessary to meet or maintain the levels of service required under the Concurrency Management System of the Plan;
5. Ensure provision of safe, convenient legal and physical access to and circulation among lots for vehicular and pedestrian traffic;
6. Ensure provision of adequate utilities to support development of each lot;
7. Regulate the subdivision and associated development of lands subject to seasonal or periodic flooding, and provide for adequate stormwater management to minimize adverse impacts of development on water resources while ensuring acceptable levels of protection from inundation for residents and improvements;
8. Ensure that the citizens and taxpayers of PBC will not have to bear the costs resulting from haphazard subdivision of land or failure by the developer to provide adequate and necessary physical improvements of lasting quality; and,
9. Assure the purchaser of land in a subdivision that necessary infrastructure improvements have been provided in accordance with PBC Standards for design and construction, and that associated rights and obligations have been established for the use and maintenance of said improvements.
Section 2 Interpretation

A. Minimum Requirements
In their interpretation and application, the requirements of this Article shall be deemed to be the minimum requirements necessary for the promotion of public health, safety, and general welfare.

B. Relationship to Other Agency Requirements
The requirements of this Article are intended to complement and expand upon rules, regulations, and permit requirements of other State, regional, and local agencies applicable to the design, construction, and/or operation of facilities for access and circulation of vehicles and pedestrians, construction of streets and related facilities, power and communication services, wastewater and water services, and stormwater management and flood protection in PBC. Compliance with the requirements of this Article shall not relieve the developer from the necessity to comply with all requirements and obtain all permits required by the regulations of such other agencies.

C. Conflicting Requirements
In the event of conflict between a specific requirement of this Article and that of another agency's rule, compliance with this Article shall be interpreted by the County Engineer to avoid the conflict where such avoidance is not inconsistent with the general purposes and intent of this Article and is affirmatively demonstrated as necessary to meet the purposes and intent of the conflicting rule. However, if the difference between said requirements is solely a matter of degree, the more restrictive requirement shall prevail and no conflict will be considered to exist.

Section 3 General Requirements

A. Platting Requirement
Any developer planning to subdivide land shall record a Final Plat in accordance with the requirements of this Article unless such requirement is specifically waived by the County Engineer in accordance with the provisions of Art. 11.A.8, Exceptions to General Requirements, [Ord. 2011-016] [Ord. 2012-003]

B. Required Improvements Installation Requirement
The adequacy of necessary public or private facilities and services for traffic and pedestrian access and circulation, solid waste, wastewater disposal, potable water supply, stormwater management, and similar facilities and services, and potential adverse impacts on adjacent land uses and facilities shall be considered in the review of all development proposals. No Final Plat or certified boundary survey shall be recorded until all required improvements set forth in Art. 11.E.1, Required Improvements, except those specifically waived pursuant to Art. 11.A.8.F, Exceptions to Installation of Improvements Requirement, are either completed in accordance with the requirements of Art. 11.B.5, Construction of Required Improvements, or are guaranteed to be completed by the developer in accordance with the provisions of Art. 11.B.2.A, Land Development Permit Application Submittal, [Ord. 2011-016] [Ord. 2014-025]

C. Standards and Responsibility for Required Improvements
All required improvements shall be designed pursuant to the standards and specifications as prescribed in this Article and PBC Standards, or as otherwise required by the County Engineer, in accordance with acceptable standards of engineering principles. All such improvements shall be installed by and at the expense of the developer in conformance with approved construction plans as referenced by the applicable Land Development Permit.

D. Conformity with Land Use, Density, and Concurrency Regulations
Prior to consideration of any subdivision for approval under the terms of this Article, the land proposed to be subdivided shall:
1. Be of sufficient land area to comply with the density and consistency requirements and provisions of the Administration and Land Use Elements of the Plan;
2. Be in the proper zoning district and have the necessary zoning approvals required for the intended use; and,
3. Have received a Concurrency Approval, non-expired Concurrency Exemption, or Concurrency Exemption Extension, pursuant to Art. 2.F, Concurrency (Adequate Public Facility Standards).

E. Site Suitability
Subdivision of land unsuitable for the proposed type or extent of development shall not be approved unless adequate methods of correction or mitigation are formulated and approved in accordance with the provisions of this Article. The County Engineer may determine that land is unsuitable for subdivision due to unstable or poorly drained soils, frequent inundation, existence of environmentally sensitive or protected areas, inadequate legal or physical access to the proposed subdivision, or conditions or features deemed to be harmful to the health, safety, and general welfare of future residents or the public.
Section 4 Application of Ordinance

A. General Application
No person shall create a subdivision or develop any lot within a subdivision in unincorporated PBC except in conformity with this Article. No Final Plat or certified boundary survey of any subdivision shall be recorded unless such subdivision meets all applicable provisions of this Article, the provisions of other applicable PBC Ordinances, and the applicable laws of the State of Florida. However, the subdivision of contiguous lands shall not be subject to compliance with the provisions of this Article where the lands are under single ownership with none of the resulting lots being less than 40 acres or where the remaining land is part of a development being platted in phases in accordance with a Master Plan approved by the DRO, unless such compliance is required as a specific condition of a Development Order for a Conditional Use or special use approved pursuant to Art. 2, Application Processes and Procedures. [Ord. 2011-016] [Ord. 2014-025] [Ord. 2020-001]

B. Building Permits and Other Approvals
1. Except as provided in this Section, or elsewhere in the Code, no Building Permit shall be issued for any structure on any lot created by subdivision of land in violation of this Article unless and until such lot is shown on a plat or certified boundary survey, as applicable, recorded in the manner prescribed in this Article. [Ord. 2011-016] [Ord. 2014-025]
2. Temporary structures, permanent structures having a temporary use, model homes, and ancillary structures such as fences, buffer walls, and guardhouses may receive a Building Permit prior to recordation of the Final Plat for the property only when the use and location have been approved by the DRO and shown on the approved Final Subdivision Plan. Such approval, however, shall not in any way relieve the developer from the obligation to correct any and all non-conforming setbacks, separations, or encroachments due to inconsistencies between the location of said structures and lot, street, or easement boundaries as established by the applicable recorded plat. [Ord. 2014-025]

Section 5 Previously Approved or Platted Subdivisions

A. Active Subdivision Development
All active subdivision developments and all modifications to previously platted subdivisions shall be subject to the requirements of this Article in accordance with the provisions of Art. 1.E, Prior Approvals.
1. Subdivision Developments Which Are Committed Developments or Deemed Vested
Any development which constitutes a committed development under the Plan and the Concurrency Exemption Ordinance (Ordinance No. 89-35), or which has otherwise been deemed vested under State of Florida law, is hereby deemed an active Subdivision Plan or Preliminary Plat, as applicable.
2. Modifications to an Active Subdivision Plan or Preliminary Plat
Modifications to an active Subdivision Plan or Preliminary Plat shall subject the development to the requirements of this Article when:
   a. The modification of an active Subdivision Plan for a planned development cannot be approved by the DRO if it exceeds threshold of Art. 2.C.5.C, Administrative Modifications to Prior DOs; or [Ord. 2018-018]
   b. The modification of an active Subdivision Plan or Preliminary Plat constitutes more than a minor deviation such that, in the opinion of the County Engineer, the construction plans for the required improvements require a new submittal and review.
3. Fees Waived for Applications by the County Engineer
Any fee required for an application made pursuant to this Section is hereby waived for all applications made by the County Engineer.

B. Non-Conforming Subdivisions
The Official Records of PBC contain plats recorded prior to February 5, 1973. Such plats show areas within PBC which have been platted as subdivisions, but which have either been partially improved or developed or remain unimproved or undeveloped. These areas, if developed or improved further as platted, would not conform to the objectives and policies of the Plan for such areas.
1. Vacate Non-Conforming Plats
The BCC shall have the power, on its own motion, to order the vacation and reversion to acreage of all or any part of a subdivision within unincorporated PBC, including the vacation and abandonment of streets or other parcels of land dedicated for public purposes and the vacating of streets and other parcels of land reserved for the use of the owners, including lands maintained by a Property Owners’ Association, when:
   a. The subdivision plat was recorded as provided by law prior to February 5, 1973; and
b. within the subdivision plat or part thereof proposed to be reverted to acreage, not more than ten percent of the total number of platted lots have been sold to individual owners by the original subdivider or his successor in title.

C. Subject to Vacation by the Board
The owner or owners of a subdivision subject to vacation and reversion to acreage by motion of the BCC may either abandon the subdivision or portion thereof in accordance with the procedures of the Board, or may improve undeveloped or partially improved streets and drainage facilities at their cost and expense, provided such improvements shall comply with the provisions of this Article.

1. Public Hearing Required
Prior to ordering such a vacation and reversion to acreage, the BCC shall hold a public hearing relative to the proposed vacation and reversion to acreage, with prior notice thereof being given by publishing in a newspaper of local circulation the date of and the subject matter of the hearing once within 14 calendar days prior to the date of such public hearing. At such public hearing, the vacation and reversion to acreage of subdivided land must be shown to either conform to the Plan or reduce the non-conformity with the Plan.

2. Legal Access to Be Maintained
No owner of any parcel of land in a subdivision vacated and returned to acreage or abandoned by the owners shall be deprived, by reversion to acreage or abandonment of any part of the subdivision, of reasonable access to such parcel nor to reasonable access to existing facilities to which such parcel has theretofore had access. Such access remaining or provided after such vacation and reversion or abandonment may not necessarily be the same as theretofore existing, but shall be reasonably equivalent thereto.

D. Not Subject to Vacation
The improvement of non-conforming subdivisions not subject to vacation and reversion to acreage by motion of the BCC shall comply with the requirements of this Article and the following:

1. Streets
The existing R-O-W for a Local Street shall be considered sufficient provided it is at least 50 feet wide and the improvements conform to the 50-foot typical section or 60 feet wide and the improvements conform to the 60-foot typical section for Local Street construction as contained in PBC Standards. If the existing R-O-W is less than 50 feet wide, additional R-O-W shall be provided to make a total width of not less than 50 feet.

2. Positive Drainage
Positive drainage shall be established or its existence proven, meeting all requirements for connection to a point of legal positive outfall. Easements for proper drainage shall be provided where necessary at a width adequate to accommodate the drainage facilities, but in no case shall said easement width be less than 12 feet. Where canals or ditches are permitted, the easement width shall be adequate to accommodate the full width of drainage facilities plus 20 feet on one side to permit access by equipment for maintenance purposes.

Section 6 Planned Developments

A. General
Any planned development which is to be subdivided shall comply with the requirements of this Article after approval of a Final Subdivision Plan by the DRO pursuant to Art. 2.C, Administrative Processes. For the purpose of this Article, “Planned Development” shall mean any development within a Planned Development District as defined by this Code and regulated pursuant to Art. 3.D, Property Development Regulations (PDRs).

B. Subdivision of Commercial and Industrial Sites
A building site which constitutes all or a portion of a pod or lot designated for commercial or industrial use within a planned development, and for which the detailed development configuration and Building Permit issuance are subject to prior approval by the DRO of a Final Site Plan, may be exempted by the County Engineer from the subdivision recordation requirement of Art. 11.A.4.B.1, and may be subdivided by fee title conveyance of individual internal lots. Such exemption may be granted by the County Engineer provided that: [Ord. 2014-025] [Ord. 2019-034]

1. Legal access to each interior lot is provided by a common parking lot in full compliance with all requirements of Art. 11.E.2.A.2.c;

2. The layout, location, and construction limits of structures within the building site are regulated by required separation distances between structures rather than by setbacks from interior lot lines;
3. Individual interior lots are not subject to requirements for minimum area or dimensions under the property development regulations of Art. 3.D, Property Development Regulations (PDRs), applicable to the building site;

4. A statement of the developer’s intent to subdivide the property pursuant to the platting exemption of this Art. 11.A.6.B, Subdivision of Commercial and Industrial Building Sites, and proposed subdivision lines with bearings and distances are included on the approved Final Site Plan for the building site, in which case said site plan shall constitute the approved Final Subdivision Plan for purposes of compliance with this Article; [Ord. 2011-001]

5. All lands within the perimeter of the building site are subject to a common recorded unity of control or other such maintenance and use covenants for access, parking, stormwater management, and other required common areas or facilities, as approved by the County Attorney pursuant to Art. 5.F, Legal Documents; and,

6. The building site is delineated within a single platted lot. [Ord. 2019-034]

Section 7  Phased Developments

A. Phasing Plan
The property encompassed by a Master Plan or Final Subdivision Plan may be developed in two or more phases pursuant to the terms of this Section and applicable phasing provisions of Art. 2.E.2.C, Time Limitations for Commencement. Construction plans and Preliminary Plats shall coincide with their respective phases as shown on the Final Subdivision Plan or Master Plan. [Ord. 2014-025]

B. Improvements
The improvements of each phase shall be capable of operating independently of any unconstructed phase with respect to drainage, access, utilities, and other required improvements, except as provided herein. A dependent phase may be platted only if the foundation phase plat has been recorded and required improvements have been completed or are under construction pursuant to a Land Development Permit and are secured pursuant to a guarantee posted for completion of required improvements. A dependent phase shall not be acknowledged as completed until the improvements in the foundation phase are acknowledged as completed; provided, however, that such acknowledgment of completion may occur simultaneously and provided that the County Engineer may permit the posting of a guarantee to ensure the installation at a later time of those required improvements which are not deemed necessary to provide drainage, access, or utilities to such dependent phases. [Ord. 2014-025]

C. Sequence of Phases
When the Preliminary Subdivision Plan is to be constructed in phases, the following sequence must be adhered to:
1. All required recreation areas and facilities to serve the entire development shall be platted or otherwise provided pursuant to the procedures and phasing provisions of Art. 5.F, Legal Documents; and [Ord. 2015-006]
2. Where all or any portion of a water management tract is required to serve a proposed phase of development, and has not been previously recorded and constructed, said water management tract and its associated lake maintenance easement(s) shall be included and constructed in their entirety as part of the plat and required improvements for that phase.

Section 8  Exceptions to General Requirements

A. Authority
The County Engineer is hereby empowered to make certain exceptions to the platting requirement of Art. 11.A.3.A, Platting Requirement, and required improvements installation requirement of Art. 11.A.3.B, Required Improvements Installation Requirement, in accordance with the standards and procedures set forth in this Section.

B. Legal Lots of Record
1. A lot that was created pursuant to one of the options below will be considered a Legal Lot of Record and shall not be subject to future subdivision approval: [Ord. 2019-034]
   a. The lot is depicted in its entirety on either a plat of record, affidavit of exemption, affidavit of waiver, plat waiver, or lot combination; or [Ord. 2019-034]
   b. The lot existed prior to February 5, 1973 in its current configuration; or [Ord. 2019-034]
   c. The lot was created after February 5, 1973 and before June 16, 1992 by subdivision of a legal lot or lots into no more than two lots. [Ord. 2019-034]
2. Legal Access
   The lot has legal access that ultimately connects to a right-of-way currently identified on the PBC Thoroughfare R-O-W Identification Map, as follows: [Ord. 2007-001] [Ord. 2013-001]
   a. In accordance with this Article, Table 11.E.2.A-1, Chart of Access Hierarchy; or [Ord. 2007-001]
   b. For existing Legal Lots of Record for a Single Family home from a recorded easement exclusively for the purposes of ingress and egress access, a minimum of 20 feet in width, granting the owner, its successors, and assigns a perpetual right of usable access across all properties lying between said lot and a street. [Ord. 2007-001] [Ord. 2013-001] [Ord. 2019-034]

C. Certified Abstracted Boundary Survey
   When approved by the County Engineer, a certified abstracted boundary survey may constitute the Subdivision Plan and when the subdivision is not encompassed by a Final Subdivision Plan approved by the DRO. [Ord. 2014-025]

D. Plat Waiver with Certified Boundary Survey
   If, after review of the Preliminary Subdivision Plan, the County Engineer determines that the proposed subdivision meets one of the conditions specified in Art. 11.A.8.D.1, Application for Plat Waiver, the requirement to file a plat may be waived and an abstracted boundary survey shall be recorded in lieu of a plat along with an affidavit documenting approval of said waiver and restrictive covenants applicable to the subdivision, as prescribed by this Article. [Ord. 2011-016] [Ord. 2014-025]

1. Application for Plat Waiver
   In order to determine whether platting may be waived, the developer shall submit a certified abstracted boundary survey or Preliminary Subdivision Plan, together with a statement demonstrating that the subdivision meets at least one of the following conditions: [Ord. 2014-025]
   a. The division is for the purpose of constructing not more than one Townhouse building in compliance with applicable use regulations and standards pursuant to Art. 3.C, Standard Districts;
   b. The division is to create no more than three contiguous lots and all of the following circumstances apply:
      1) Dedications or reservations are not required for the installation or maintenance of the required improvements; and
      2) The improvements and dedications existing on the land are substantially in accordance with the requirements of this Article.
   c. The division is of a contiguous land area not exceeding 80 acres into lots of at least ten acres each and which area meets all of the following additional conditions:
      1) The area to be subdivided has existing legal access via a street of Local or higher classification, accepted for maintenance by a local governmental agency, a special district, or a legally incorporated Property Owners’ Association (POA);
      2) Legal access to the proposed lots exists or will be established and dedicated to and be maintained by a POA or a special district; and,
      3) Legal positive outfall exists and the appurtenant drainage easements are dedicated to, maintained and accepted by either a POA or water control district.
   d. The division consists of a change in lot lines for the purpose of combining lots or portions thereof, shown on a record plat, into no more than three contiguous lots where each of the resulting lots meets the requirements of the Plan and this Code or reduces the degree of non-conformity to the requirements of the Plan and this Code, as applicable, and the establishment of streets or installation of improvements either would not be required pursuant to this Article or would be required and their installation would be guaranteed by the developer pursuant to the provisions of this Article. Provided, however, that any application hereunder for lands shown on a record plat recorded after February 5, 1973, shall be limited to those changes necessary to correct errors in the record plat or to make a lot line adjustment to accommodate an isolated instance of error in construction of a dwelling unit or other building. In such cases, the improvements shall be in compliance with the standards in effect at the time of recording the plat or with any approved Variance to such standards;
   e. The lot or lots were created as part of an antiquated subdivision and the County Engineer finds that the subdivision substantially complies with the intent, purposes, and requirements of this Article. In making such determination, the County Engineer shall consider the following factors and any other information he deems appropriate:
      1) The total area of land encompassed by the antiquated subdivision;
      2) The number of lots created within the antiquated subdivision;
      3) The prior and subsequent subdivision of the area encompassed by the antiquated subdivision and whether such subdivision was platted or otherwise surveyed and placed of record;
4) The need for dedications or reservations to ensure installation and continued maintenance of
the required improvements;
5) The extent of deviation from the requirements of this Article;
6) The extent of ownership fragmentation, including the number of lots sold and the number of
lots developed;
7) The degree of compliance with other PBC land development regulations, including but not
limited to the Plan and this Code;
8) The number of lots to be created; and,
9) The extent of development in the surrounding area.
f. The combination or recombination of lots is required in order for the new lot or lots to meet the
density requirements of the Plan.

2. Decision by County Engineer
In determining if platting may be waived, the County Engineer shall make a determination of the
agencies required for review, distribute to these agencies accordingly and consider recommendations
received from the agencies regarding conformance with requirements of their respective regulations
and program responsibilities. The agencies that may be considered for review by the County Engineer
are: [Ord. 2010-022]
a. The Directors of the Land Development and Traffic Divisions, and Survey Section of the
Engineering Department;
b. The Directors of the Planning and Zoning Divisions; [Ord. 2006-004]
c. The Director of Environmental Resources Management;
d. The County Health Director;
e. The Director of Water Utilities; and,
f. The County Attorney. [Ord. 2006-004]

3. Effect of Approval
The granting of a plat waiver in no manner reduces or waives the requirements of Art. 11.B.1, Technical
Compliance through Art. 11.B.5, Construction of Required Improvements, governing construction plan
approval, Land Development Permit issuance, and installation of the required improvements. Failure
by the Applicant to submit all documents required for the recordation of the affidavit of waiver within six
months of approval by the County Engineer shall void said approval. [Ord. 2011-016] [Ord. 2014-025]

E. Lot Combination with Abandoned Right-of-Way and Combination of Lots
Right-of-way abandoned by Resolution of the BCC may be combined into an adjoining lot of record. A lot
may also be combined with an adjoining lot or lots resulting in an overall decrease in the number of lots
provided that there are no interior easements along the common lot line(s) that prevent the combination of
the lots and that the new lot configuration decreases any existing non-conformities. The revised single lot
of record may be created by one of the following: [Ord. 2010-022] [Ord. 2014-025]
1. The Property Owner may record a revised abstracted boundary survey into the Public Records of PBC,
if approved by the Director of Land Development. In determining whether this process is acceptable,
the revised abstracted boundary survey must be submitted for review to the Director of Land
Development. The agencies that may be considered for review of the revised abstracted boundary
survey are Land Development, Survey, and Zoning. The abstracted boundary survey shall be prepared
by a State of Florida-licensed surveyor and mapper. The document recorded in the Public Records
shall include the approval from Director of Land Development. In determining eligibility for creation of
a new single lot of record through this option, the Director of Land Development and reviewing agencies
shall consider the following criteria at a minimum: [Ord. 2010-022] [Ord. 2014-025]
a. Designated zoning of lots to be combined; [Ord. 2010-022]
b. Existence of landscape tracts, buffers, or easements along property lines; and, [Ord. 2010-022]
c. Existence of utility easements along property lines; or [Ord. 2010-022]
2. The Property Owner may record a waiver of plat in accordance with Art. 11.A.8, Exceptions to General
Requirements. [Ord. 2010-022]
3. The Property Owner may record a plat in accordance with Art. 11.D, Platting. [Ord. 2010-022]

F. Exceptions to Installation of Improvements Requirement
If, after review of the Preliminary Subdivision Plan, the County Engineer determines that certain
improvements already existing on the proposed subdivision site are adequate to meet the intent of the
required improvements requirement of this Article, the installation of those required improvements may be
waived.
1. Application for Required Improvement Installation Waiver
The developer shall submit a Preliminary Subdivision Plan, or when approved a certified abstracted
boundary survey, together with a statement demonstrating that the applicable improvement(s) and
associated dedications existing on the land and serving the proposed lot(s) are substantially in accordance with the requirements of this Article. [Ord. 2014-025]

2. Effect of Approval

The granting of a required improvement(s) installation waiver in no manner reduces or waives the requirement of this Article to file a plat and to comply with applicable provisions of Art. 11.B.1, Technical Compliance, through Art. 11.B.5, Construction of Required Improvements, with regard to all required improvements not specifically waived. [Ord. 2014-025]

G. Contents of Applications

Applications made pursuant to this Article shall be submitted in a form established by the County Engineer, prescribed in the Land Development Forms Manual, and made available to the public. [Ord. 2014-025]

H. Administration of Exceptions to General Requirements

The County Engineer shall review and act on applications for exceptions to this Article pursuant to Art. 11.A.8, Exceptions to General Requirements. Such authority shall include the power to:

1. Waive compliance with the procedures of Art. 11.B.1, Technical Compliance, through Art. 11.B.5, Construction of Required Improvements, when the County Engineer finds that compliance with such procedures is unnecessary because:
   a. The proposed subdivision has been granted both a plat waiver and a waiver for all required improvements for the property; or
   b. The proposed subdivision has been granted both a plat waiver and a waiver for some of the required improvements and installation of the remaining improvements will be assured by one of the following methods:
      1) contribution of cash; or
      2) construction of the required improvements will occur at the time of building construction and the installation of such improvements can be monitored as part of the Building Permit process or other PBC permitting process. Such improvements include, but are not limited to, drainage improvements requiring lot grading only, and installation of well and/or septic tank; or
      3) a combination of 1) and 2) above.

2. Review any and all restrictive covenants applicable to a subdivision under review for a plat waiver;

3. Require additional information or reviews deemed necessary for its consideration. Such information may include, but is not limited to, written and oral statements with respect to the nature, condition, and maintenance responsibility of the streets, stormwater management facilities, or other required improvements, and reviews by other PBC and State of Florida agencies, and any information necessary to assure that the proposal would conform to the Plan or reduce the degree of nonconformity to the Plan; and,

4. Upon determining the facts of each application, determine whether the proposal makes adequate provisions for public requirements, including safe and convenient vehicular and pedestrian circulation, access, stormwater management, utilities, water supply, and wastewater disposal. [Ord. 2014-025]

Section 9 Standard Forms

A. General

The forms and formats contained in the Land Development Forms Manual have been approved as standard by the County Attorney and the County Engineer, as appropriate. All specific agreements, guaranties, certifications, and other legal documents are subject to the approval of the County Attorney. Alternate form(s) may be approved for use pursuant to this Article, provided the County Attorney has first approved such alternate form(s) in writing.

B. Dedications and Reservations

Dedications and reservations shall be specified in accordance with the substantive requirements of Art. 11.D.1.B.15, Certification and Approvals, and shall be subject to approval by the County Attorney prior to plat recordation.

Section 10 Definitions

CHAPTER B  SUBDIVISION REQUIREMENTS

Section 1 Technical Compliance

A. Purpose
The purpose of Technical Compliance is to provide a multi-agency review of the proposed subdivision plat and all applicable required improvement construction plans for conformance with technical and legal requirements of this Article, other applicable provisions of this Code, PBC Standards, and the approved Final Subdivision Plan or certified abstracted boundary survey (including any special conditions of approval) prior to application by the developer for issuance of a Land Development Permit and submittal of the Final Plat for recordation. [Ord. 2014-025]

B. Application
Prior to the expiration of the Final Subdivision Plan approval, where applicable, and prior to commencing construction of required improvements, the developer shall have prepared and shall submit to the County Engineer an application for Technical Compliance review, which shall be accompanied by the required fee and the required number, as established by the County Engineer, of the following documents and information, as applicable to the subdivision or approved phase thereof. Within three days of receipt of an initial application submittal for Technical Compliance, the County Engineer shall review the submittal for completeness and shall send written notification to the Applicant if the submittal is determined to be incomplete. Failure by the Applicant to complete the application submittal within 60 days of the date of said notification shall be considered an abandonment of the application and any subsequent submittal shall require a new Technical Compliance application. [Ord. 2014-025]

1. Preliminary Plat
The developer shall submit the preliminary plat meeting the requirements of Art. 11.D.1.A, Preliminary Plat.

2. Certified Abstracted Boundary Survey
The developer shall submit a certified abstracted boundary survey meeting the requirements of Art. 11.B.7, Requirements for Certified Abstracted Boundary Survey. [Ord. 2011-016] [Ord. 2014-025]

3. Construction Plans and Supplemental Engineering Reports
Except for those required improvements have been specifically waived pursuant to Art. 11.A.8.F, Exceptions to Installation of Improvements Requirement, construction plans and supporting design information for all the required improvements shall be submitted for each subdivision. Construction plans and required engineering reports shall comply with the requirements of Art. 11.B.4, Construction Plans and Supplemental Engineering Information. [Ord. 2005-002] [Ord. 2014-025]

4. Certified Opinion of Cost
The developer's engineer shall prepare and submit a certified opinion of cost, which shall include the cost of installing all required improvements required pursuant to Art. 11.E.1.A, Minimum Required Improvements for All Subdivisions. In the alternative, the County Engineer may, at his sole discretion, accept the contract price received by the developer for the construction of the required improvements.

C. Review of the Technical Compliance Submittal

1. Agency Comments
The County Engineer shall forward copies of appropriate submittal documents to the following agencies for written comments regarding conformance with requirements of their respective regulations and program responsibilities: [Ord. 2014-025]

a. Director, Land Development Division of DEPW: construction plans and preliminary plat;

b. Director, Traffic Division of DEPW: construction plans and preliminary plat;

c. Director, Survey Section of DEPW: preliminary plat;

d. Director, Zoning Division of PZB: preliminary plat;

e. Addressing Section, Administration Division of PZB: preliminary plat;

f. Director, Parks and Recreation Department: preliminary plat;

g. Director, Roadway Production Division of DEPW: construction plans and preliminary plat; [Ord. 2018-018]

h. Director, Environmental Resources Management: preliminary plat;

i. Florida Department of Transportation: preliminary plat for lands abutting State roads;

j. Local water control district: preliminary plat for lands abutting water control district facilities, easements, or R-O-W;

k. County Attorney: preliminary plat; and,

l. Director of Property and Real Estate Management: preliminary plat.
The County Engineer shall have up to five calendar days to forward the submittal to the review agencies. Said agencies shall be given up to 20 calendar days to forward comments to the County Engineer. Within five days of the end of this 20-day period, the County Engineer shall forward all comments to the developer in writing, with a copy to the developer's engineer, or other authorized agent. [Ord. 2014-025]

2. Submittal Fails to Meet Requirements
When the County Engineer determines that the Technical Compliance application submittal does not meet the provisions of this Article, the written statement shall reference the specific Section or standard with which the submittal does not comply. Within 60 days of receipt of the comments letter, the developer shall cause all corrections or revisions referenced in the comments letter to be made, and shall resubmit the required documents and information. Failure to resubmit within the required time shall be deemed an abandonment of the application and any subsequent submittal shall require a new Technical Compliance application.

3. Submittal Meets Requirements
When the County Engineer determines that the Technical Compliance application submittal meets the provisions of this Article, the submittal shall be deemed to technically comply with the provisions of this Article and a written statement of Technical Compliance shall be issued.

D. Technical Compliance Approval
The statement of Technical Compliance shall be in writing and furnished to the developer and the developer's engineer. The statement shall contain the following conditions and information:
1. The name of the documents reviewed;
2. The amount of guarantee for the construction of required improvements, established in accordance with Art. 11.B.2.A.6, Guarantees; [Ord. 2014-025]
3. The amount of recording fees due for recordation of the Final Plat or certified boundary survey, which fees are payable to the Clerk of the Circuit Court of PBC; [Ord. 2011-016]
4. A requirement to submit with the Land Development Permit application a copy of all applicable Property Owners' Association documents; and,
5. Requirements for submittal of supplementary documentation deemed necessary by the County Engineer, such as deeds, easements, covenants, and other recorded instruments creating rights or obligations for access, drainage, or utility services, which rights or obligations could not be established through dedications or reservations on the plat.

E. Expiration of Technical Compliance
The statement of Technical Compliance shall expire six months after its date of issuance. Failure to make a Land Development Permit application submittal prior to the expiration of the statement of Technical Compliance shall void the Technical Compliance approval and any subsequent submittal shall require a new Technical Compliance application unless the County Engineer has granted an extension to the Technical Compliance expiration. [Ord. 2014-025]

F. Effect of Changes to Final Subdivision Plan
Any change to a Final Subdivision Plan, however approved, which would either increase or decrease the number of units in, or would, in the opinion of the County Engineer, cause a substantial change or revision to any preliminary plat or associated construction plans under review or approved for Technical Compliance, shall void any approvals issued for same pursuant to this Article and shall require a new submittal and fee for such plat and construction plans unless a modification to such plan and construction plans is approved by the County Engineer. [Ord. 2014-025]

Section 2 Land Development Permit

A. Land Development Permit Application Submittal
A Land Development Permit shall be required prior to commencement of construction of any required improvement. The effective date of the Land Development Permit shall be the date the County Engineer signs it. The Land Development Permit shall expire not more than 21 months from the effective date, unless extended pursuant to Art. 11.B.5.B, Time of Completion of Required Improvements. Except when the installation of all required improvements has been waived pursuant to Art. 11.A.8.F, Exceptions to Installation of Improvements Requirement, the Final Plat or certified boundary survey, as applicable, shall not be recorded until the developer has either installed the improvements or has guaranteed the installation of the improvements pursuant to the requirements of Art. 11.B.2.A.6, Guarantees, below. As the final step in the review procedures to obtain development approval under this Article, the developer shall have prepared and shall submit, prior to expiration of the Technical Compliance, an application for Land Development Permit. The application for Land Development Permit shall be accompanied by the required...
fee and the required number, as determined by the County Engineer, of the following documents applicable to the subdivision or approved phase thereof: [Ord. 2011-016] [Ord. 2014-025]

1. **Final Plat**
   The developer of a subdivision for which plat recordation is required shall submit the Final Plat complying with Art. 11.D.1.B, Final Plat, and a check for the plat recordation, payable to the Clerk of the Circuit Court of PBC, in the required amount.

2. **Certified Abstracted Boundary Survey**
   The developer of a subdivision for which the requirement to plat has been waived pursuant to this Article shall submit a check payable to the Clerk of the Circuit Court of PBC for the recordation of the certified boundary survey. When construction plans are not required, the certified abstracted boundary survey may be recorded without further review; provided, however, that the County Engineer shall review any documents submitted in compliance with Art. 11.B.2.A.3, Maintenance and Use Documents. [Ord. 2011-016] [Ord. 2014-025]

3. **Maintenance and Use Documents and Other Documents**
   A copy of the maintenance and use covenants and any other documents required by the County Engineer as a condition of Technical Compliance shall be submitted. The maintenance and use covenants shall indicate the maintenance responsibility for all common areas and improvements within the subdivision, and shall comply with all applicable requirements as specified in Art. 5.F, Legal Documents.

4. **Construction Plans and Supplemental Engineering Information**
   Construction plans shall conform to the plans which received Technical Compliance or, if modified, shall be accompanied by a written statement from the Developer's engineer which details, explains, and justifies the modifications. Construction plans shall comply with the requirements of Art. 11.B.4, Construction Plans and Supplemental Engineering Information, and prior to issuance of a Land Development Permit, shall have received all applicable approvals of requisite governmental agencies. [Ord. 2014-025]

5. **Developer's Acknowledgment of Responsibility for Construction of Required Improvements**
   The application shall indicate whether the required improvements are to be constructed prior to recordation or after recordation of the plat or certified boundary survey. When the required improvements are to be constructed after recordation, the Developer shall submit a statement acknowledging responsibility for completion of said required improvements. The statement shall be in the form contained in the latest version of the Land Development Forms Manual and shall be executed by all owners shown on the applicable Final Plat. The statement shall be accompanied by a guarantee for completion of required improvements, pursuant to Art. 11.E.1.A, Minimum Required Improvements for All Subdivisions. Said guarantee shall meet the applicable requirements of Art. 11.B.2.A.6, Guarantees. [Ord. 2011-016] [Ord. 2014-025]

6. ** Guarantees**
   All guarantees required pursuant to Art. 11.E.1.A, Minimum Required Improvements for All Subdivisions, shall be in one of the forms prescribed in the Land Development Forms Manual or in an alternate form approved by the County Attorney. The initial guarantee shall be in an amount equal to 110 percent of the construction cost of the required improvements. The guarantee shall be in one of the following types: [Ord. 2014-025]
   a. **Cash Bond**
      Completion of the required improvements may be secured by cash deposited by the developer with PBC or in an account subject to the control of PBC in accordance with an agreement on such deposit or account. The developer shall be entitled to receive any interest earned on such deposit or account.
   b. **Letter of Credit**
      Completion of the required improvements may be secured by a clean irrevocable letter of credit issued to PBC in accordance with the PBC Letter of Credit Policy. The expiration date of the letter of credit shall be at least three months after the completion date for construction of required improvements pursuant to the initial Land Development Permit or any subsequent extension thereto.
   c. **Performance or Surety Bond**
      Completion of the required improvements may be secured by a performance or surety bond obtained from a company acceptable to PBC in accordance with the PBC policy on performance bonds. It shall guaranty that all work will be completed in full accordance with the approved Land Development Permit.
d. Escrow Deposit
Completion of the required improvements may be secured by an executed escrow agreement, between the Developer, a bank approved by PBC, and PBC as the third party beneficiary. The escrow agreement shall require that release of the funds, or any part thereof, shall be subject to PBC approval.

B. Action by the County Engineer
The County Engineer shall examine the submittal for completeness in compliance with this Article. Within 30 days of receipt of a complete submittal, the County Engineer shall review the submittal for conformity with this Article and shall advise the developer of his findings in writing, with a copy to the developer's engineer.

1. Submittal Fails to Meet Ordinance
When deficiencies exist, the County Engineer shall reference in writing the specific Section or standard with which the Land Development Permit submittal does not comply. The developer shall correct such deficiencies within 30 days of receipt of the written report. Failure to respond within the given time shall deem the submittal abandoned and any subsequent submittal shall require a new application and submittal for a Land Development Permit.

2. Submittal Meets Ordinance
When the submittal meets the provisions of this Article, the County Engineer shall sign the Land Development Permit and, if applicable, shall sign and seal the Final Plat and submit said approved plat to the Clerk of the Circuit Court for recordation.

Section 3 Substitution of Developers

A. Voluntary Substitution of Developers
When there is a voluntary substitution of developers after the Land Development Permit has been issued but before PBC has acknowledged completion of the required improvements, it shall be the responsibility of both developers to transfer the rights and responsibilities from the original developer to the succeeding developer. The original and succeeding developers shall make a joint application to the County Engineer for a transfer of the original developer's Land Development Permit. If the original developer posted a guarantee with PBC for completion of required improvements, the succeeding developer must post a substitute guarantee in the current amount of the original developer's guarantee and in a form acceptable to PBC. The application for transfer shall include the executed acknowledgment of responsibility for completion of required improvements pursuant to Art. 11.B.2.A.5, Developer's Acknowledgment of Responsibility for Construction of Required Improvements. [Ord. 2014-025]

B. Involuntary Substitution of Developers
When a developer becomes the succeeding developer through foreclosure or some similar action and it is not possible to obtain the original developer's signature on a joint application for transfer of the Land Development Permit, the succeeding developer must comply with all provisions of Art. 11.B.3.A, Voluntary Substitution of Developers, except that, in lieu of said original developer's signature, the succeeding developer shall submit a current certification of title, foreclosure judgment, or other proof of ownership of the lands encompassed by the plat referred to in the Land Development Permit. [Ord. 2014-025]

Section 4 Construction Plans and Supplemental Engineering Information

A. Duties of Developer's Engineer
When the development is to be engineered by more than one firm, the developer shall appoint a single engineering firm or engineer to coordinate submission of the construction plans and construction of the required improvements.

B. Submittal Requirements
Construction plans and supplemental engineering information shall be submitted under separate cover for each of the categories of improvements listed in this Section. Plan sets shall be submitted in the number required in the Land Development Forms Manual. [Ord. 2014-025]

1. Required Improvements
The following construction plans, signed and sealed by the preparing engineer, shall be submitted for the required improvements set forth in Art. 11.E.1, Required Improvements, when applicable:
   a. paving, grading, and drainage;
   b. bridges; and,
c. water and sewer systems:
   1) for Technical Compliance submittal: the proposed plans submitted for PBC Health Department approval;
   2) for Land Development Permit submittal: construction plans stamped with PBC Health Department approval.

2. Submittals for Other Improvements

Construction plans shall be submitted for the following additional improvements which the developer may be required to install or otherwise elect to provide:
   a. Landscaping within streets;
   b. Guardhouse, gates, or other structures within streets;

C. Completeness of Construction Plans

All construction plan submittals shall be so complete as to be suitable for contracting and construction purposes. Design data, calculations, and analyses shall be submitted to address important features affecting design and construction and shall include, but not be limited to, those for design high water, drainage facilities of all kinds, subsurface soil data, alternate pavement and subgrade types, and any proposed deviation from PBC standard design requirements.

D. Format and Content of Construction Plans

All construction plan submittals for the installation of required improvements shall consist of and contain, but shall not be limited to:
1. A cover sheet showing the applicable plat name, sheet index, category of improvements, and vicinity sketch;
2. Typical sections;
3. Construction details showing compliance with PBC Standards, or with any alternate design approved by the County Engineer pursuant to Art. 11.B.6.C, Alternate Design, Construction Standards, and Types of Materials.
4. Special profile sheets as required to show special or unique situations;
5. Benchmark, based on NAVD88; and, [Ord. 2010-022]
6. Notes regarding special conditions and specifications applicable to the construction, addressing:
   a. required compliance with construction requirements of this Article and PBC Standards;
   b. required compliance with State standards applicable to the work;
   c. minimum standards for materials;
   d. test requirements for compaction or stabilization of subgrade, base, and backfill;
   e. required installation of underground utilities and storm drainage located within the streets prior to construction of subgrade for street pavement; and,
   f. special construction or earthwork requirements for site work in areas of impervious or unstable soils, or to cope with unsuitable soil conditions.

E. Final Stormwater Management Plan

The Technical Compliance application shall include the final stormwater management plan, based upon and consistent with the preliminary stormwater management plan, in separate report form detailing the design of all secondary and tertiary stormwater management facilities, including, as a minimum, the following design data and information:
1. Pre-development and post-development drainage basin maps showing site topography, drainage basins, catchment areas, and stormwater inflow/outflow locations for the site;
2. Pre-development and post-development site characteristics affecting runoff such as ground cover, soil profile, wet season mean high water table elevations, and recurring high water elevations in receiving watercourses or waterbodies;
3. Individual catchment area characteristics used for design, including area, times-of-concentration, runoff factors, and quantitative breakdown of pervious/impervious areas;
4. A statement of applicable design and/or performance assumptions and criteria for each part of the system providing drainage, treatment, or discharge control;
5. Evidence of existing access to legal positive outfall(s);
6. Complete hydrologic and hydraulic calculations for design of storm sewers, retention/detention area, and discharge structures;
7. Identification of standard methods and/or proprietary models used for hydrologic and hydraulic analysis, noting that methods or models other than those of the Department of Transportation, SFWMD, SCS, the rational method, the SBUH method, the Puls method, or common modifications of such methods, may require additional documentation;
8. A listing of specific PBC and SFWMD requirements used as the design basis for street drainage, lot grading, finished floor elevations, floodplain storage compensation, retention/detention volumes, and discharge limits; and,

9. Requirements for construction and maintenance of any temporary or phased stormwater management facilities necessary to ensure proper stormwater control and treatment during site development.

F. Soils Report

The Technical Compliance application shall include a soils report describing soil profiles of the work site to such depth and extent necessary to determine special design or construction needs. In lieu of Art. 11.B.4.F.4 and Art. 11.B.4.F.5, the Developer may submit as part of the report a certified statement from an engineer that he has investigated the subsurface conditions of the site and has determined that such conditions are suitable for the work as shown on the construction plans. The soils report shall include: [Ord. 2014-025]

1. A map, drawn to stated scale, showing boring, penetrometer, and/or test pit locations;
2. Results of each boring or other soil test, keyed to the map;
3. Soil profiles with horizons described according to the USDA, ASTM, or Unified standard soils classified system;
4. Location and extent of muck, hardpan, marl, or other deleterious materials which may require special consideration in design or construction; and,
5. A description of groundwater conditions which may require special consideration in design or construction.

Section 5 Construction of Required Improvements

A. Developer's Duty

Upon issuance of the Land Development Permit, the developer shall coordinate the construction with the County Engineer.

B. Time of Completion of Required Improvements

1. The time of completion of all required improvements shall not exceed 21 months from the date of issuance of the Land Development Permit unless an extension is granted pursuant to this Section. For government facilities within the Public Ownership (PO) Zoning District, the completion of required improvements shall be permitted to: [Ord. 2007-013]
   a. coincide with a Certification of Occupancy (CO) for the first building on a parcel of land that adjoins a required street improvement; or [Ord. 2007-013]
   b. be phased to coincide with a (CO) for the first building within each phase of development that is accessed by a required street improvement. [Ord. 2007-013] [Ord. 2014-025]

2. A one-year time extension may be granted by the County Engineer after review of the written application for extension of the developer. The developer should submit the application for extension, including but not limited to a statement of justification and proof that an acceptable guarantee will remain in place for the duration of the extension, not less than two months prior to expiration of the Land Development Permit. The County Engineer shall review and advise the developer in writing of his decision within 30 calendar days of receipt of the application. [Ord. 2014-025]

C. Completion Prior to Plat Recordation

When the developer elects to complete required improvements prior to recording of the Final Plat or certified boundary survey, the following procedures shall apply, as applicable. [Ord. 2011-016]

1. Upon approval of the Final Plat and acknowledgment of completion of the required improvements pursuant to Art. 11.B.5.G, Acknowledgment of Completion and Maintenance of Required Improvements, the plat shall be submitted to the Office of the Clerk of the Circuit Court for recordation. [Ord. 2014-025]

2. When the County Engineer finds that the certified boundary survey and completion of the required improvements are in compliance with all requirements of this Article, he shall cause the certified boundary survey to be recorded in the Office of the Clerk of the Circuit Court. [Ord. 2011-016]

D. Completion after Plat Recordation

When the developer elects to guaranty the construction of the required improvements in order to complete same after recordation, the County Engineer may approve reductions of the amount of the guaranty and release the guaranty in accordance with the requirements and procedures prescribed in this Subsection. All requests for reduction shall be by application to the County Engineer. A complete application shall include, at a minimum, a certified cost estimate from the developer's engineer for both the completed and the remaining required improvements. The County Engineer shall have the right to reduce the amount of any requested reduction based on his review of the application and required improvements. The County
Engineer shall also have the right to refuse to approve any requested reduction so long as the developer fails to be in compliance with any of the terms and conditions of this Article, the plat, or the plans and specifications for the required improvements. The County Engineer shall give written notification to the developer and the surety of his decision on the application within one month of the application being deemed complete. Any approval under this Section shall be conditioned upon the surety providing, within one month of receipt of the County Engineer's written notification, written confirmation of the reduction in a form acceptable to the County Attorney.

1. Frequency of Reductions in Amount of Guaranty
   Reductions in the amount of the guaranty may be approved by the County Engineer in accordance with the following schedule.
   a. Cash Deposits and Escrow Agreements
      The deposit or account may be reduced as installations progress at stages of construction established by the County Engineer, but not more frequently than monthly.
   b. Letters of Credit and Performance or Surety Bonds
      Quarterly during the process of construction and upon request by the developer, the County Engineer may reduce the dollar amount of the guaranty.

2. Amount of Reductions in Guarantee
   The County Engineer shall not reduce the amount of any guarantee below 20 percent of the original cost estimate amount. In addition to this limitation, no reduction in the dollar amount of the guarantee shall be made unless sufficient funds will remain to complete the remaining required improvements and the cost of required improvements installed equals or exceeds the amount of the request. To ensure that sufficient funds remain for completion of the remaining required improvements, the County Engineer shall release not more than 90 percent of the dollar amount of required improvements certified as completed during the period for which a reduction is requested, provided the amount is not reduced to less than 20 percent of the original cost estimate amount. [Ord. 2014-025]

3. Release of Guarantee
   The guarantee shall only be released upon acknowledgment of completion of the required improvements pursuant to Art. 11.B.5.G, Acknowledgment of Completion and Maintenance of Required Improvements. Two weeks prior to the release of the guarantee, the County Engineer shall notify the appropriate District Commissioner of intent to release. [Ord. 2014-025]

E. PBC Use of Funds; Failure of Developer to Complete
   The County Engineer, as the authorized agent of the Board, shall have the right to any funds available under the guarantee to secure satisfactory completion of the required improvements in the event of default by the developer or failure of the developer to complete such improvements within the time required by Art. 11.B.5.B, Time of Completion of Required Improvements. The County Engineer shall send the developer a courtesy written notice of PBC's intent to expend any drawn funds or demand performance, as applicable. Such notice shall be sent at least 30 calendar days prior to said expenditure or demand, and shall be mailed to the last known address of the developer or his authorized agent according to the Land Development Permit records on file with the County Engineer. [Ord. 2014-025]

F. Administration of Construction
   1. Construction Standards
      Construction standards shall be those prescribed in the current PBC Standards.
   2. Inspections, Reports, and Stop Work Orders
      The County Engineer shall be notified in advance of the date of commencement of construction pursuant to the Land Development Permit, and of such points during the progress of construction for which joint review by the County Engineer and developer's engineer are required.
      a. Construction shall be performed under the surveillance of, and shall at all times be subject to, review by the County Engineer; however, this in no way shall relieve the developer of the responsibility for ensuring close field coordination and final compliance with the approved plans, specifications, and the requirements of this Code.
      b. The developer's engineer shall provide progress reports of the construction of the required improvements to the developer. The developer's engineer may also be required to submit construction progress reports directly to and at points of progress prescribed by the County Engineer. The developer's engineer shall coordinate joint reviews of the construction with the County Engineer at points specified by the County Engineer. [Ord. 2014-025]
      c. The County Engineer and his or her designee shall have the right to enter upon the property for the purpose of reviewing the construction of required improvement during the progress of such construction. The County Engineer shall have the authority to stop the work upon failure of the
developer or his engineer to coordinate the construction of the required improvements as required by this Subsection. [Ord. 2014-025]

3. **Measurements and Tests**
   During construction, the developer's engineer shall make or cause to be made such measurements, field tests, and laboratory tests necessary to certify that the work and materials conform with the approved development plans and the provisions of this Article. The County Engineer may require, at his discretion, specific types and locations of tests and measurements which he deems necessary to demonstrate conformance with approved plans and specifications.

4. **Engineer's Certificate of Completion**
   The required improvements shall not be considered complete until a Certificate of Completion, certifying to construction in conformance with the approved plans, and the final project records have been submitted to, reviewed, and approved by the County Engineer. The certificate shall be signed and sealed by the developer's engineer and shall be in a form established by the County Engineer, as prescribed in the Land Development Forms Manual. Said certificate shall make specific reference to, and be accompanied by copies of measurements, tests and reports made on the work and materials during the progress of construction, along with a Record Drawing copy of each of the construction plans, showing the original design in comparison to the actual finished work with all material deviations noted thereon. [Ord. 2018-018]

G. **Acknowledgment of Completion and Maintenance of Required Improvements**

1. **Developer's Warranty on Workmanship and Material**
   The developer shall execute and submit a warranty guarantying the required improvements against defect in workmanship and material for a period of one year after acknowledgment of completion pursuant to this Section. Said warranty shall be submitted to the County Engineer along with the completion certificate and project records. The warranty shall be in a form approved by the County Attorney and prescribed in the Land Development Forms Manual.

2. **Acknowledgment of Completion by County Engineer; Release of Guarantee**
   Upon submittal of the documents and records required by **Art. 11.B.5.F.4, Engineer's Certificate of Completion**, and **Art. 11.B.5.G.1, Developer's Warranty on Workmanship and Material**, and recorded copies of the approved Maintenance and Use Covenants, the County Engineer shall determine the completeness of the required improvements in accordance with the provisions of this Article and the Land Development Permit. When the County Engineer determines that the required documentation is acceptable and the required improvements have been installed as required by this Article, he shall acknowledge completion of the required improvements and, when a guarantee has been posted, release the guarantee in accordance with the following: [Ord. 2014-025]
   a. **If the Final Plat Has Been Recorded**
      When the applicable plat has already been recorded, the County Engineer shall issue a written statement to the Developer acknowledging completion of required improvements and releasing the guaranty.
   b. **If the Final Plat Has Not Been Recorded**
      When the Final Plat has not been recorded, at the time of acknowledgment of completion the County Engineer shall review said Final Plat for conformance with current certification and approval requirements. Upon determining that the Final Plat meets said requirements, the County Engineer shall approve the plat and submit it to the Clerk of the Circuit Court for recordation.
   c. **Effect of Release**
      Issuance of the statement acknowledging completion and, when applicable, releasing the guarantee shall relieve the developer of his obligations for construction of required improvements but shall not relieve the developer of his obligations under the warranty for required improvements required under **Art. 11.B.5.G.1, Developer's Warranty on Workmanship and Material.** [Ord. 2014-025]

3. **Acceptance of Dedications and Maintenance of Improvements**
   The acceptance by the Board of any dedication to the Board of public space, parks, R-O-W, easements, or the like on a plat shall not in itself constitute an acceptance by PBC of any responsibility to construct or maintain improvements within the dedicated area. Acceptance of dedications and maintenance responsibility for improvements within areas dedicated to the Board shall be made as follows:
   a. **Acceptance of Dedications**
      The recordation of a Final Plat, subsequent to the County Engineer's approval of said Final Plat for recordation, shall constitute acceptance by the Board of any and all dedications to the Board as stated and shown on the plat.
b. Acceptance of Dedications of Real Property

For those dedications to the Board of real property, including rights-of-way, parks, and other tracts, an executed deed transferring title to such lands, plus such documentation of title and absence of encumbrances as required pursuant to PBC policy for acceptance of deeds, shall be submitted to the County Engineer at the time of submittal of the applicable Final Plat for recordation. Said deed(s) shall be on a form approved by the County Attorney, and shall be recorded by PBC subsequent to recordation of the applicable Final Plat.

c. Acceptance of Improvements for PBC Maintenance

At such time as the County Engineer has issued a statement acknowledging completion of the required improvements and the applicable plat has been recorded, the County Administrator or the County Engineer, on behalf of PBC, shall accept maintenance responsibility for the required improvements to streets and to such other areas dedicated to the Board in accordance with the dedications shown on said record plat, and shall issue a written statement confirming acceptance of said maintenance responsibility.

4. PBC Completion in Recorded Subdivisions

PBC may complete the required improvements, under the guaranty provided by the developer, when the corresponding plat has been recorded and the developer fails to complete the required improvements as required by this Article. In such case, the County Engineer shall call upon the guaranty to secure satisfactory completion of the required improvements. Notice of said call shall be deemed upon posting via certified mail. Upon the completion of such action, the County Engineer shall report to the Board and the Board may accept by resolution the dedication and maintenance responsibility as indicated on the plat. In such cases, the remaining guaranty posted by the developer shall be retained for a period of one year after completion in lieu of the agreement. Any defects occurring during this period shall be repaired using funds remaining in the guaranty.

5. Developer's Failure to Complete Improvements in Unrecorded Subdivisions

Where a developer has elected to install the required improvements prior to recordation of the plat and fails to complete such improvements within the time limits prescribed in Art. 11.B.5.B, Time of Completion of Required Improvements, all previous approvals applicable to the proposed subdivision shall be deemed void. [Ord. 2014-025]

Section 6 Supplemental Procedures

A. Construction and Landscaping in Lake Maintenance Easements and Water Management Tracts

1. Purpose

It is the purpose of this Subsection to allow for the construction or placement of structures and plants adjacent to, or over, water bodies within water management tracts or areas established for associated maintenance access, while taking measures to ensure that such structures or plants shall not interfere with the proper functioning of the stormwater management system nor be otherwise detrimental to the health, safety, welfare, or convenience of the public or of persons responsible for or affected by a water body within a water management tract.

2. Prohibition

The placement or construction of trees, shrubs, or structures within any water management tract established for purposes of wet detention/retention in an open water body, or easement or berm adjacent thereto established for purposes of access for maintenance of the water body or water management tract or structures and facilities therein is hereby prohibited, except in strict conformance with the provisions of this Subsection.

3. Application Requirements for Bulkheads, Docks, or Piers

Persons desiring to construct bulkheads, docks, or piers over or along a water body contained within a water management tract shall apply to the Director of ERM in accordance with the applicable provisions of Art. 4.B.10, Excavation Uses. [Ord. 2017-007]

4. Application Requirements for Structures or Plantings in LME

Persons desiring to place trees or shrubs or construct or place structures within a LME shall apply to the County Engineer. Approval by the County Engineer shall be required prior to installation when said planting or construction is to encroach a lake maintenance easement within a plat for which the associated required improvements have not been acknowledged as complete, pursuant to the applicable Land Development Permit and Art. 11.B.5.G, Acknowledgment of Completion and Maintenance of Required Improvements, or when the County Engineer determines that there is a continuing PBC or public beneficiary interest in said easement. Prior to granting such approval, the County Engineer shall ensure that adequate conditions are imposed, and appropriate documents are
executed and, if appropriate, recorded to ensure compliance with the provisions of this Subsection and approvals granted pursuant to this Article. [Ord. 2014-025]

5. **Structures or Plantings**

The provisions herein shall be applied to required approvals by the County Engineer for the installation of structures or plantings in, on, or over lake maintenance easements. The following criteria shall apply to the installation of such structures and plantings:

a. No structure or above grade construction, except that which may be easily removed, shall be permitted in lake maintenance easements. Examples of impermissible structures are houses, garages, screened enclosures, concrete block walls, concrete decks, affixed permanent sheds, and pools. Examples of permissible structures are thatch sheds, wood decks, and non-concrete fences, contingent on said structures not being structurally affixed to the ground;

b. Trees or shrubs shall not be planted, nor structures placed, in the lake maintenance easement where the planting or placement of such would obstruct access by equipment to outfalls or water control structures;

c. A removal declaration in a form acceptable to the County Attorney shall be recorded, at the expense of the Property Owner;

d. The POA consent to the specific structure(s), tree(s), or shrub(s) shall be required where a POA has responsibility for lake maintenance. If any other entity has a beneficiary interest in the easement or a responsibility for lake maintenance, that entity's consent shall be required; and,

e. Trees or shrubs planted pursuant to this Subsection shall be limited to those species permitted under **Art. 7, Landscaping, Appendix A, PBC's Preferred Species List – Plant Materials Database, As Amended**, and shall not include any portion of the minimum site landscaping required pursuant to **Art. 7.C, Landscape Buffer and Interior Landscaping Requirements**. [Ord. 2018-018]

6. **Repair, Replacement, or Modification**

Any repair, replacement, or modification, except ordinary maintenance, to any planting or structure approved pursuant to this Subsection, shall be done only after being approved as new planting or construction pursuant to this Subsection.

B. **Dredge, Fill, and Construction in Waters of the State**

1. **Applicability**

Subdivision of lands containing or abutting existing or proposed waters of the State, including canals, lakes, streams, and wetlands, shall comply with and conform to the requirements of this Subsection.

2. **Easements or Rights-of-Way (R-O-W)**

Where land within a proposed subdivision abuts existing or proposed waters of the State, there shall be provided a floodway or floodplain easement or a drainage R-O-W conforming substantially with the lines of such watercourse or water body and of such further width or construction or both as will be adequate for the purpose. Additional easement or R-O-W width may be required where necessary for maintenance, safety, and convenience. Each required easement and R-O-W shall be deeded or dedicated to an appropriate public agency. Maintenance responsibility and use limitations applicable to said easements and rights-of-way, or any facilities placed therein, shall be in accordance with all applicable permit conditions and shall be stated or referenced by note on the appropriate plat(s).

3. **Permits**

Where proposed dredging or filling affects waters of the State of Florida or sovereign land, said activities shall be approved by the governing agency having jurisdiction in such matters. Prior to the construction of any seawall, bulkhead, dock, or pier, a construction permit shall be obtained from the Building Department in addition to all required permits or expressed exemption from permitting for construction in waters of the State of Florida.

C. **Alternate Design, Construction Standards, and Types of Materials**

1. **Applicability**

Alternate designs, construction standards, and types of materials which, in the opinion of the County Engineer, are equal or superior to those specified may be approved in accordance with this Subsection.

2. **Contents of Application**

The application shall be submitted in a form established by the County Engineer, prescribed in the Land Development Forms Manual, and made available to the public. Said application shall be accompanied by written data, calculations and analyses, and drawings which are necessary to show, by accepted engineering principles, that the proposed alternates are equal or superior to those specified, or are necessary due to environmental considerations. Within 45 days of receipt of such application, the County Engineer shall either approve or deny the application and shall advise the Developer's Engineer and the Developer in writing of the decision.
3. Environmental Considerations
In the interest of the preservation of existing trees and other natural features at the developer's request, or as required by other regulations, the County Engineer may vary the design and construction requirements upon presentation by the developer of substantial evidence that environmental conditions will be enhanced, that proper performance of the approved stormwater management system will not be impaired, and that safety, stability, and design life of structural improvements will not be compromised.

Section 7 Requirements for Certified Abstracted Boundary Survey

A. General
The County Engineer shall adopt and amend, from time to time, the criteria for the certified boundary survey. At a minimum, the certified boundary survey shall meet the requirements for boundary surveys established by the Minimum Technical Standards set forth by the Florida Board of Professional Surveyors and Mappers in Rules 5J-17.050-.052, F.A.C., pursuant to F.S. § 472.027. [Ord. 2011-016]

B. Alternatives
The County Engineer shall reserve the right to require a certified sketch and legal description in lieu of a certified boundary survey. The certified sketch and legal description shall meet the requirements for certified sketches and descriptions set forth by Rules 5J-17.050-.052, F.A.C., pursuant to F.S. § 472.027, as amended, and the PBC Description Checklist pursuant to policies and procedures established by the County Engineer and made available to the public. [Ord. 2011-016]

C. Recordation
The certified boundary survey or sketch and legal description shall not require approval of the Board prior to recordation. [Ord. 2011-016]

CHAPTER C RURAL SUBDIVISIONS

Section 1 Alternate Designs for Rural Subdivisions

A. Applicability
This Section provides for a means of establishing a rural subdivision, as defined by this Code, in harmony with the character of surrounding development while meeting the general purpose and intent of this Article. Due to the rural nature of proposed development, standard requirements for certain required improvements may be deemed inappropriate and alternative standards for such improvements may be approved under this Section.

B. Application Requirements
Upon submission of the subdivision plan, and an application for a rural subdivision designation, the DRO may approve the application for election to comply with this Section. A rural subdivision shall meet the platting requirement of this Article.

C. Exceptions to Requirements
All requirements of this Article shall apply except that the following required improvement design options shall be allowed under this Section.

1. Access and Circulation Systems
Local Streets may be developed without a wearing surface but shall otherwise conform to the standards specified by this Article. All other streets of higher classification, as defined in this Article, shall be constructed to meet or exceed PBC Standards. Streets constructed without a wearing surface shall be privately maintained and shall not be considered for dedication or acceptance as public streets until paved, reconstructed, and tested, as necessary, to meet PBC Standards. Costs of maintenance and further development of the Local Streets in a rural subdivision shall be borne solely by the owners of the property within the subdivision. Sidewalks and bike paths shall not be required when Local Streets are constructed without a wearing surface. The developer and any subsequent owner/seller shall fully disclose to the purchaser the method of payment of costs of maintenance and improvements of Local Streets developed without a wearing surface. The developer shall adequately warrant, by recorded covenant, that PBC will not be liable for cost of maintenance or further development of Local Streets constructed without a wearing surface. The method and form of said disclosures and covenants shall be subject to approval by the County Attorney, prior to recordation of a Final Plat for such subdivision.

2. Wastewater System
Rural subdivisions may utilize an individual system in accordance with Art. 11.E.1.A.4, Wastewater System.
3. **Potable Water System**
Rural subdivisions may utilize an individual system in accordance with Art. 11.E.1.A.5, Potable Water System.

4. **Utilities Installation**
Utilities may be installed above ground in rural subdivisions.

### CHAPTER D  PLATTING

#### Section 1 Requirements for the Preliminary and Final Plat

A. **Preliminary Plat**
The preliminary plat shall meet the requirements of the Final Plat, except that it shall be submitted without the required signatures and seals. It may also be submitted without maintenance and use covenants, condominium documents, deeds, or other legal documents not related to the boundary survey or engineering design of the project. [Ord. 2011-016]

B. **Final Plat**
The plat shall be prepared in accordance with the provisions of F.S. ch. 177, as amended, and shall conform to the requirements of this Section.

1. **Material**
The plat shall be drawn or printed on 24-inch by 36-inch stable base film made by photographic processes from a film scribing tested for residual hypo testing solution to assure permanency, or other approved material. [Ord. 2010-022]

2. **Preparation**
The plat shall be prepared by a surveyor and mapper, and is to be clearly and legibly drawn with black permanent drawing ink or veritype process to a scale of not smaller than one inch equals 100 feet, or as otherwise determined by the County Engineer.

3. **Name of Subdivision**
The plat shall have a name acceptable to PBC. When the plat is a new subdivision, the name of the subdivision shall not duplicate or be phonetically similar to the name of any existing subdivision. When the plat is an addition to or replat of a recorded subdivision, it shall carry the same name as the existing subdivision followed by a suitable phase designation or similar modifier, when applicable.

4. **Title**
The plat shall have a title printed on each sheet in bold legible letters containing:
   a. The name of the subdivision, printed above and in letters larger than the balance of the title;
   b. The name of the County and State;
   c. The section, township, and range as applicable or if in a land grant, so stated;
   d. When the plat is a replat or addition to an existing plat of record, the words “section,” “unit,” “replat,” etc.; and,
   e. When the plat encompasses lands in a planned unit development, the abbreviation “PUD.” Likewise, all other planned developments shall contain the appropriate abbreviation for such designation within the title.

5. **Description**
There shall be lettered or printed upon the plat a full and detailed description of the land embraced in the plat. The description shall show the section, township, and range in which the lands are situated or if a land grant, so stated, and must be so complete that from it without reference to the map the starting point can be determined and the boundaries run.

6. **Index**
If more than one sheet is required for the map, the plat shall contain an index map on the first page, showing the entire subdivision and indexing the area shown on each succeeding map sheet. Each map sheet shall contain an index delineating that portion of the subdivision shown on that sheet in relation to the entire subdivision. When more than one sheet must be used to accurately portray the lands subdivided, each sheet must show the particular number of that sheet and the total number of sheets included, as well as clearly labeled match lines between map segments.

7. **Survey Data**
The plat shall show the length of all arcs together with central angles, radii, and points of curvature. Centerlines shall include chord and chord bearing to the above mentioned. Sufficient survey data shall be shown to positively describe the boundary of each lot, block, R-O-W, street, easement, and all other areas shown on the plat and all areas shall be within the boundary of the plat as shown in the description. The plat shall also include the following items in the manner described below:
a. The scale, both stated and graphically illustrated, shall be shown on each sheet;
b. A prominent north arrow shall be drawn on every sheet included showing any portion of the lands subdivided. The bearing or azimuth reference shall be clearly stated on the face of the plat in the notes or legend;
c. The point of beginning shall be boldly shown together with the letters “P.O.B.” in bold letters;
d. All intersecting street lines shall be joined to form required corner clips pursuant to PBC Standards, and all dimensions shall be shown;
e. All adjoining property shall be identified by a subdivision name, plat book, and page or, if unplatted, the land shall be so designated;
f. Permanent reference monuments shall be shown in the manner prescribed by F.S. ch. 177, as amended or as otherwise required by the County Engineer. All information pertaining to the location of “P.R.M.s” shall be indicated in note form on the plat. Permanent Control Points, Permanent Reference Monuments, and Monuments shall be designed and set as prescribed by F.S. ch. 177, as amended or as otherwise required by the County Engineer. It is the responsibility of the surveyor and mapper to furnish the Clerk and Comptroller of Palm Beach County with their certificate that the “P.C.P.s” and all monuments according to F.S. § 177.091(9), have been set and the dates said “P.C.P.s” and monuments were set;
[Ord. 2010-022]
g. There shall be reserved on each sheet of the plat a three-inch by five-inch space in the upper-right hand corner to be used by the Clerk and Comptroller of Palm Beach County for recording information and each sheet shall reserve three inches on the left margin and a half-inch margin on all remaining sides; [Ord. 2010-022]
h. The map shall mathematically close within 0.01 foot and shall be accurately tied to all PBC or reestablished township, range, and section lines occurring within the subdivision by distance and bearing; [Ord. 2010-002]
i. The initial point in the description shall be accurately tied to the nearest quarter section corner or section corner or government corner. Each government corner being used shall be identified. If the subdivision being platted is a re-subdivision of a previously recorded subdivision, then a tie to a Permanent Reference Monument from the parent plat is sufficient. If the subdivision is a re-subdivision of a part of a previously recorded subdivision, sufficient ties to controlling lines appearing on the parent plat must be provided to permit an overlay. The position and orientation of the plat shall conform to the Florida State Plane Coordinate System in the manner established by the County Engineer and prescribed in the Land Development Forms Manual; [Ord. 2010-022]
j. The cover sheet or first page of the plat shall show a vicinity sketch, showing the subdivision's location in reference to other areas of PBC; [Ord. 2010-022]
k. A complete legend of abbreviations shall be shown;
l. All lettering on the plat shall be at a minimum 0.10 of an inch in height;
m. The plat boundary and all parcels shown on subdivision plats intended to be conveyed in fee title shall be delineated by solid lines;
n. Lines intersecting curves shall be noted as radial or non-radial as the case may be;
o. A note addressing any abandoned underlying lands or easements, including record information, shall be shown; and,
p. Tabulation of Survey Data:

1) The use of tangent tables is not permitted. However, at the discretion of the County Engineer on a case-by-case basis, the use of a tangent table to reflect corner clip chords, centerline chords, and chord bearings may be permitted if deemed necessary to meet requirements of neatness and clarity of the plat. Scale factors shall not be considered. Such tables, when permitted, must appear on the map sheet to which they refer and tangents shall be numbered consecutively through the entire presentation.

The possible exception noted above shall be limited to use on plats and shall not be carried into any other survey documents submitted for approval to the County Engineer.

2) Curve data may be tabulated subject to the following conditions or exceptions:
a) External boundary data may not be tabulated;
b) Where data is tabulated, a minimum of the arc length and the curve designation number or letter will be shown on site; and,
c) Curve tables reflecting the tabulated data will appear on the map sheet on which the curves appear.
8. **Lot and Block Identification**
   Each lot and block shall be numbered or lettered. All lots shall be numbered or lettered by progressive numbers or letters individually throughout the subdivision or progressively numbered or lettered in each block. Blocks in each incremental plat shall be numbered or lettered consecutively throughout a subdivision.

9. **Street Names**
The plat shall show the name of each street as shown on the Final Subdivision Plan and conforming with **Art. 11.E.2.A.20, Street Names**.

10. **Not Included Parcels**
    Not included or excepted parcels must be marked “not a part of this plat.” Where a not included parcel is completely surrounded by areas included within the plat, sufficient easements or rights-of-way to provide necessary access, utilities, and drainage to the not included parcel shall be provided. No parcel of land shall be reserved by the owner unless the same is sufficient in size and area to be of some particular use or service. The intended use of all reserved areas shall be shown on the plat in note form on the cover sheet.

11. **Streets and Easements**
    All street, R-O-W, and easement widths and dimensions shall be shown on the plat. Easements are to be tied at both ends at intersecting boundary, lot, or R-O-W lines. The plat shall show the name, location and width of all existing or recorded streets intersecting or contiguous to the boundary of the plat, accurately tied to the boundary of the plat by bearings and distances.

12. **Maintenance and Use Documents**
    Maintenance and use covenants, as required by **Art. 5.F.1, Maintenance and Use Documents**, shall be submitted with the Final Plat and approved by the County Attorney prior to recordation of the Final Plat. All areas of the plat that are not to be sold as individual lots and all easement shall be dedicated or reserved in accordance with the terms of the maintenance and use covenants, and their purposes shall be clearly stated on the plat.

13. **Streets**
    All streets and their related facilities which are designed to serve more than one lot or dwelling unit shall be dedicated to the Board for public use, unless otherwise required or permitted by this paragraph or elsewhere in this Article. Any street which is to be reserved, as a private street shall be identified as a tract for private street purposes. Such street tracts shall be reserved in accordance with **Art. 11.D.1.B.15.a, Dedication and Reservation**. Private streets may only be permitted when such streets are subject to a recorded declaration of covenants subjecting the streets to the jurisdiction and control of all lot owners deriving access from such streets, their successors, and assigns. When parking areas are required to be constructed by **Art. 11.E.2, Access and Circulation Systems**, they shall be reserved to and shall be the perpetual maintenance responsibility of a POA, which association shall have jurisdiction over the parking area and the lots. Such parking areas shall be clearly identified and reserved as tracts for parking and access purposes.

14. **Restriction on Obstruction of Easements**
    The plat shall contain a statement that no buildings or any kind of construction or trees or shrubs shall be placed on any easement without prior written consent of all easement beneficiaries and all applicable PBC approvals or permits as required for such encroachment or as otherwise exempted for ZLL maintenance and overhang easements in accordance with **Art. 3.D.2.B.3.e, Access, Maintenance, and Roof Overhang Easement**. [Ord. 2015-031]

15. **Certification and Approvals**
    The plat shall contain on any of the title pages the following certifications and approvals, acknowledged as required by law, all being in the form set forth below. However, the County Engineer’s approval certification and seal shall be contained on the face or first page. [Ord. 2014-025]

   a. **Dedication and Reservation**
      All areas dedicated for public use shall be dedicated by the owner of the land at the time the plat is recorded. Such public areas include, but are not limited to: civic sites, parks, R-O-W for streets or alleys, however the same may be designated; easements for utilities; R-O-W and easements for drainage purposes; and, any other area, however designated. All areas reserved for use by the residents of the subdivision shall be reserved by the owner of the land at the time the plat is recorded. All dedications and reservations shall be perpetual and shall contain:
      1) The name of the recipient or beneficiary of the dedication or reservation (including successors and assigns);
      2) The purpose of the dedicated or reserved area; and,
3) The name of the entity responsible for the perpetual maintenance of the dedicated or reserved area (including successors and assigns). In the event PBC is not the recipient or beneficiary of the dedication or reservation, the statement of maintenance responsibility shall include the phrase “without recourse to the County.”

If so required, certain dedications or reservations shall grant PBC the right but not the obligation to maintain. The dedications and reservations shall be executed by all owners having a record interest in the property being platted. The acceptance on the plat of the dedications or reservations shall be required of any entity to whom a dedication or reservation is made, except the Board. All dedications, reservations, and acceptances shall be executed in the same manner in which deeds are required to be executed according to Florida Statutes. Although the term “dedication” is meant to imply a public use while the term “reservation” is meant to imply a private use, the terms may inadvertently be used interchangeably. Inadvertent misuse shall not invalidate any PBC requirement or plat dedication or reservation.

b. Mortgagee's Consent and Approval
All mortgages along with the mortgagee's consent and approval of the dedication shall be required on all plats where mortgages encumber the land to be platted. The signature(s) of the mortgagee or mortgagees, as the case may be, must be witnessed and the execution must be acknowledged in the same manner as mortgages are required to be witnessed and acknowledged. The form for the mortgagee's consent shall be as prescribed in the Land Development Forms Manual.

c. Certification of Surveyor and Mapper
The Final Plat shall contain the signature, registration number, and official seal of the surveyor and mapper, certifying that the plat is a true and correct representation of the land surveyed under his responsible direction and supervision and that the survey data compiled and shown on the plat complies with all of the requirements of F.S. ch. 177, as amended, and this Article. If the surveyor and mapper is part of a legal entity, the name, address, and certificate of authorization number of said entity shall be shown. The certification shall also state that permanent reference monuments (“P.R.M.s”) have been set in compliance with F.S. ch. 177, as amended, and this Article. When the permanent control points (“P.C.P.s”) and monuments according to F.S. § 177.091(9), are to be installed after recordation, the certification shall also state that the “P.C.P.s” and said monuments will be set under the direction and supervision of the surveyor and mapper under the guaranty posted for required improvements within the plat. When required improvements have been completed prior to the recording of a plat, the certification shall state that “P.C.P.s” and monuments have been set in compliance with the laws of the State of Florida and Ordinances of PBC. The form for the surveyor's certificate shall be as prescribed in the Land Development Forms Manual. [Ord. 2010-022]

d. PBC Approval
Signing and sealing of the Final Plat by the County Engineer shall constitute PBC approval of the plat for recordation. The plat shall contain the approval and signature block for the County Engineer in the form prescribed in the Land Development Forms Manual. Upon approval of the plat, the County Engineer shall present the plat to the Clerk and Comptroller of Palm Beach County for recording. [Ord. 2010-022]

e. Certification of Title
The title sheet of the plat shall contain a title certification. The title certification must be an opinion of an attorney at law licensed in the State of Florida, or the certification of an abstractor or a title insurance company licensed in the State of Florida, and shall state that:

1) The lands as described and shown on the plat are in the name, and apparent record title is held by the person, persons, or organizations executing the dedication;

2) All taxes have been paid on said lands as required by F.S. § 197.192, as amended;

3) All mortgages on the land are shown and indicated by their Official Records Book and Page number;

4) There are no encumbrances of record on said lands that would prohibit the creation of the proposed subdivision; and,

5) All Palm Beach County special assessment items and all other items held against said lands have been satisfied. [Ord. 2010-022]

The form for the title certification shall be as prescribed in the Land Development Forms Manual.

f. Preparing Surveyor and Mapper
The name and address of the natural person who prepared the plat shall be shown on the plat in the form prescribed in the Land Development Forms Manual.
C. Mobile Home, Recreational Vehicle, and Manufactured Housing Subdivisions

Areas to be subdivided for the purpose of a mobile home, recreational vehicle, or manufactured housing development shall also comply with this Subsection. Except as to the lots indicated for other purposes, the dedications and reservations on the plat of a mobile home subdivision shall include the following additional provisions or wording equal thereto: “Said owner(s) hereby reserve(s) the lots shown on the plat exclusively for mobile home, recreational vehicle, or manufactured housing, parking and uses incidental thereto, and, except as to these lots, mobile home or trailer parking is prohibited elsewhere.” Areas indicated as parks or playgrounds are to be reserved for the use of the owners of the lots shown on the plat.

CHAPTER E  REQUIRED IMPROVEMENTS

Section 1 Required Improvements

A. Minimum Required Improvements for All Subdivisions

Except when waived pursuant to Art. 11.A.8.F, Exceptions to Installation of Improvements Requirement, the improvements set out herein shall be the minimum required improvements for all subdivisions in order to provide the physical improvements necessary to implement certain performance standards, objectives, and policies of the Capital Improvement Element and other Elements of the Plan. These required improvements shall be installed prior to recordation of the corresponding plat or certified boundary survey unless the developer furnishes a guarantee assuring their installation in accordance with the provisions of this Article. Except as provided in this Section, the cost of all required improvements shall be guaranteed.

1. Access and Circulation Systems

All streets and required sidewalks, and, when required under Art. 11.E.2, Access and Circulation Systems, parking areas shall be constructed by the developer in accordance with the design and construction requirements of Art. 11.E.2, Access and Circulation Systems. The guaranty for these requirements shall be as follows:

   a. The cost of installing all street improvements shall be guaranteed.

   b. The cost of installing parking areas need not be guaranteed since the plat establishes legal access and such areas are required to be installed prior to issuance of the Certificate of Occupancy (CO).

   c. The cost of installing all sidewalks and paths pursuant to the approved pedestrian circulation system shall be guaranteed, except that the required guarantee may be waived by the County Engineer for portions of Local Streets abutting residential lots when the paving, grading, and drainage plans contain a note, acceptable to the County Engineer, stating that such sidewalks or paths will be constructed concurrent with construction of the dwelling unit for such abutting lot. Installation of sidewalks and paths in streets abutting open space, common areas, recreation areas, water management tracts, and other areas which will not have a dwelling unit constructed thereon shall be guaranteed.

2. Land Preparation

The developer shall grade and fill the land pursuant to Art. 11.E.3, Clearing, Earthwork, and Grading.

3. Stormwater Management System

The developer shall install the secondary and tertiary stormwater systems for the development in accordance with Art. 11.E.4, Stormwater Management. On lots intended for building construction, the final grading of each lot, consistent with Art. 11.E.4, Stormwater Management, or the applicable approved grading plan, shall be done in conjunction with and pursuant to the Building Permit for said construction.

4. Wastewater System

The developer shall install the required wastewater collection and/or disposal system for the development in accordance with Art. 11.E.5, Wastewater Systems.

5. Potable Water System

The developer shall install the required potable water distribution system for the development in accordance with Art. 11.E.6, Potable Water Systems.

6. Utilities

The developer shall satisfy the requirements for underground installation of utility services and for utility site location, when applicable, of Art. 11.E.7, Utilities.

7. Fire-Rescue Services

The developer shall comply with the requirements of Art. 11.E.8, Fire-Rescue Services. The cost of installing the required hydrants may be included in the cost for the central water system.
8. Subdivision Design and Survey Requirements
The developer shall install all required permanent control points in accordance with Art. 11.E.9, Subdivision Design and Survey Requirements. When the permanent control points are to be installed after plat recordation, the cost of installing permanent control points shall be guaranteed.

B. General Design Requirements
The design of the required improvements shall be in accordance with acceptable engineering principles. The design and construction of required improvements shall, at a minimum, be in accordance with current PBC Standards, including those contained in this Article. Should the developer elect to provide improvements of a type or design proposed to equal or exceed the minimum requirements, standards for design and construction of such improvements shall be evaluated for adequacy on an individual basis. All such alternatives shall be submitted for approval by the County Engineer in accordance with Art. 11.B.6.C, Alternate Design, Construction Standards, and Types of Materials.

Section 2 Access and Circulation Systems

A. Vehicular Circulation Systems

1. Required Improvement to be Constructed by Developer
All streets, required alleys, and related facilities required to serve the proposed development shall be constructed by the developer. Construction shall consist of, but not be limited to, grading, base preparation, surface course, and drainage. All streets, whether intended for dedication to the BCC or reservation for private use and maintenance, shall be constructed to the minimum standards established by this Article and PBC Standards. Additionally, the developer shall construct any parking tracts which provide access to any lots that do not have direct, primary access from a Local Street or Residential Access Street. Construction of such parking tracts shall be completed prior to issuance of any CO for any dwelling unit located on a lot served by such parking tract. Construction of the parking tract may be done in conjunction with building construction on the lot the tract is to serve; provided, however, that such construction shall be noted on the approved paving, grading, and drainage plans in a form acceptable to the County Engineer. When the parking tract is to be completed in conjunction with building construction, the developer shall execute a Certificate of Compliance on a form approved by the Building Director prior to issuance of the CO for any dwelling unit or building served by such parking tract. Said Certificate of Compliance shall state that the parking tract was completed in accordance with the requirements of Art. 6, Parking, Loading, and Circulation.

2. Minimum Legal Access Requirement
There is hereby established a hierarchy of legal access as shown on Table 11.E.2.A-1, Chart of Access Hierarchy. Except as provided below, each lot shall abut a street of suitable classification to provide said lot with legal access consistent with the standards set forth in Table 11.E.2.A-2, Chart of Minor Streets.
   a. A 32-foot Residential Access Street may, with prior approval by the County Engineer, be utilized for legal access to a group of not more than four abutting lots where said lots would otherwise have no reasonable means of obtaining direct access to or required frontage on an adjacent street. Said Residential Access Street shall be delineated and reserved on the applicable plat for purposes of perpetual access to the lots served. [Ord. 2014-025]
   b. A common parking lot may be utilized for legal access to individual lots created by subdivision of a shopping center or similar building site developed solely for commercial or industrial uses where all lots within the boundary of such subdivision are served by said access and are subject to recorded shared access, maintenance, and use covenants approved by the County Attorney pursuant to Art. 5.F.1, Maintenance and Use Documents. Where such access is utilized, direct lot access on any street adjacent to the boundary of the subdivision shall be prohibited except at common access points approved for the subdivision as a whole.
   c. Traditional Development Districts shall utilize special access streets as defined in Art. 3.F, Traditional Development Districts (TDDs).

3. General Design Considerations
The proposed street layout shall be integrated with PBC’s traffic circulation network, and shall be coordinated with the street system of the surrounding area. Streets shall be classified and designed in accordance with the Transportation Element of the Plan, Table 11.E.2.A-2, Chart of Minor Streets, as applicable, and PBC Standards. Consideration shall be given to:
   a. The need for continuity of existing and planned streets;
   b. Barriers imposed by topographical conditions and their effect on public convenience or safety;
   c. The proposed use of the land to be served by such streets;
d. The need for continuation of existing Local Streets in adjoining areas not subdivided;
e. The proper projection of Non-Plan Collector and Plan Collector Streets;
f. The feasibility of extending the proposed street system to the boundary of the proposed subdivision
to promote reasonable development of adjacent lands and to provide continuity of street systems;
and,
g. Discouraging through traffic in the design of Local and Residential Access Streets.

4. Double Frontage Lots and Corner Lots
Where a lot has two frontage lines, legal access to the lot shall be restricted as follows:
   a. Residential Lots
      Where a lot abuts both a street of Non-Plan Collector or higher classification and a Local Street, access to said lot shall be by the Local Street. [Ord. 2014-025]
   b. Non-Residential Lots
      Where a lot abuts streets of Local or higher classification, access to the lot shall be by the street of lower classification, unless otherwise permitted by this Code; provided, however, that access shall not be permitted on a Local Residential or Residential Access Street as prescribed on Table 11.E.2.A-2, Chart of Minor Streets, unless the street cross section is improved to meet Local Commercial standards. [Ord. 2018-018]

5. Construction in Muck or Clay Areas
Construction in muck or clay areas shall be done in accordance with PBC Standards.

6. Street Intersections and Street Jogs
The centerline intersections of Local or Residential Access Streets with Non-Plan or Plan Collector Streets shall be spaced a minimum distance of 200 feet, as measured along the centerline of the Collector Street, or as otherwise required by the County Engineer. Connection of Local Streets to Arterial Streets may be permitted by the County Engineer only where other access is unavailable. Local Street connections with centerline offsets of less than 125 feet are prohibited, unless the offset is to allow through lanes to align and is approved by the County Engineer. [Ord. 2014-025]

7. Through and Local Traffic
Through traffic shall be directed along Non-Plan Collector Streets within the subdivision. Local Streets shall be laid out to accommodate local or neighborhood traffic and to discourage their use by through traffic.

8. Railroads in or Abutting Subdivisions
When a subdivision borders on or contains a railroad R-O-W, a street approximately parallel to and on each side of such right-of-way may be required at a distance suitable for an appropriate use of the intervening land.

9. Alleys
Alleys may be allowed in subdivisions when they are necessary, in the opinion of the County Engineer, for the safe and convenient movement of traffic and pedestrians. Alley intersections and sharp changes in alignment shall be avoided and alleys shall be constructed in accordance with the following:
   a. Residential Areas
      Alleys shall be paved ten feet wide in a minimum 12-foot R-O-W, with appropriate radii for the intended use.
   b. Commercial and Industrial Areas
      Alleys shall be paved 18 feet wide in a minimum 20-foot right-of-way, with appropriate radii for the intended use.

10. Bridges and Culverts
Bridges or culverts shall be provided as necessary to facilitate the proposed vehicle and pedestrian system. The bridge or culvert requirement is subject to approval by the agency having jurisdiction over the facility being crossed. Bridges shall be designed in general accord with the current Department of Transportation practices and shall include planning for utility installation. They shall be reinforced concrete, unless, other low-maintenance materials are approved by the County Engineer. Bridges shall have a clear roadway width between curbs two feet in excess of the pavement width in each direction, and shall have sidewalks six feet wide on each side. All bridge structures shall be designed for HL-93 and all Florida Legal Loads, incorporating adequate corrosion protection for all metal work and erosion protection for associated shorelines and embankments. [Ord. 2014-025]

11. Street Markers
Street markers shall be provided at each intersection in the type, size, and location required by the current PBC Standards. Street name signs shall carry the street name shown on the plat of record and shall be in compliance with the current PBC Standards.
12. Traffic Control Devices
The developer shall install traffic control devices and, where warranted, traffic signals on roads within and interfacing with the subdivision. A traffic impact analysis meeting the approval of the County Engineer shall be used to assist in establishing the need for such signals.

a. Pavement Markings or Lane Delineators
Pavement markings and/or lane delineators meeting the requirements of PBC shall be installed on all Arterial and Collector Streets. Pavement markings or delineators may be required on other streets such as project entrances, as determined by the County Engineer.

b. Design
The design of traffic control devices shall be in accordance with the Manual for Uniform Traffic Control Devices and the applicable PBC Standards.

13. Pavement Widths
Pavement widths for streets shall be in accordance with Table 11.E.2.A-2, Chart of Minor Streets. [Ord. 2018-018]

14. Dead End Streets
Dead end streets shall be designed and constructed with an appropriate terminal turnaround in accordance with the PBC Standards. Dead end streets shall not exceed 1,320 feet in length, except where natural geographic barriers exist necessitating a greater length.

15. Materials and Construction
Pavement construction shall consist of, at a minimum, a subgrade, base, and wearing surface. All materials and construction shall be in accordance with the current PBC Standards.

16. Shoulders
All unpaved shoulders shall be constructed and grassed in accordance with the PBC Standards. Grassing, with seed and mulch or with solid sod, as required, shall be completed prior to acknowledgment of completion of the required improvements by the County Engineer. No time extensions to any contract for the construction of required improvement will be granted on the basis of incomplete shoulder treatment.

17. Street Grades
The longitudinal grade of street pavement shall be parallel to the design invert slope of the adjacent roadside drainage swale or gutter. Minimum longitudinal and transverse grades shall be in accordance with PBC Standards. Street grades shall be shown on the construction plans by indicating the direction and percent of slope. The horizontal distance along the centerline between, and pavement elevation at all points of vertical intersection shall also be shown.

18. Non-Conforming Streets
Streets which do not meet the design and construction standards of this Article and the PBC Standards shall not be permitted except where satisfactory assurance is provided for dedication of the remaining part of the street or reconstruction of the street in accordance with current standards. Whenever a tract to be subdivided abuts an existing partial street, the other part of the street may be required to be dedicated and constructed within such tract. A proposed subdivision that includes an existing street which does not conform to the minimum street width requirements of these regulations shall provide for the dedication of additional land for such street along either one or both sides of said street so that the minimum cross section dimension requirements of these regulations can be met. PBC shall not accept non-conforming streets for ownership or maintenance through the procedures established by this Article.

19. Limited Access Easements
Limited access easements five feet in width may be required along Non-Plan Collector Streets and major streets in order to control access to such streets from abutting property, when necessary. Easements for controlling access to Local and Residential Access Streets may also be required by the County Engineer in order to ensure continued control of access to such streets from abutting property. All limited access easements shall be conveyed or dedicated to PBC. [Ord. 2013-001] [Ord. 2014-025]

20. Street Names
Proposed streets which are in alignment with existing named streets should bear the name of the existing street. All street names shall have a suffix and in no case, except as indicated in the preceding sentence, should the name of the proposed street duplicate or be phonetically similar to existing street names. All proposed street names shall be submitted to the Executive Director of the PZB for approval prior to submittal of the Final Subdivision Plan application.
21. Alignment, Tangent, Deflection, Radii
Streets shall be laid out to intersect as nearly as possible at right angles. Intersections involving the junction of more than two streets shall be prohibited. The point of curvature of any Local Street or Residential Access Street shall not be closer than 100 feet to any intersection, measured along the centerline from the extension of the intersecting street lines unless the Engineer of Record provides documentation assuring adequate safe sight distance is provided as prescribed in the most recent FDOT or the Florida “Green Book.” Reverse curves shall be prohibited. Reversals in alignment shall be connected by straight tangent segment at least 50 feet in length. All intersections shall be designed to provide at least the minimum stopping and turning sight distances, in accordance with criteria prescribed in the most recent edition of the FDOT Manual of Uniform Minimum Standards for Design, Construction and Maintenance for Streets and Highways. When the centerline of a Local Street deflects by more than ten degrees, it shall be curved with a radius adequate to assure safe sight distance and driver comfort. [Ord. 2014-025]

22. Street Lighting
If street lighting is installed it shall be maintained by a POA and said association should not be created exclusively for the purpose of maintaining street lighting. Unless street lighting installation conforms to the standards of the requisite utility company, street lights shall be placed outside of R-O-W, road tracts, or any other areas designated for road purposes. Streets lighting shall be wired for underground service except where aerial service is permitted pursuant to Art. 11.C.1.C, Exceptions to Requirements, or Art. 5.C, Design Standards.

23. Median Strips
Median strips which are part of a public street may not be utilized for any purpose other than by PBC or public utility. However, a developer or Property Owner may install landscaping in a median strip or within shoulders in accordance with requirements as established by the County Engineer pursuant to the PBC Streetscape Standard Manual. [Ord. 2014-025]

24. Subdivision Entranceways
Subdivision entranceways consisting of signs, walls, fences, gates, rock piles, or other entrance features are not permitted within the median strip or other areas in a public street. Decorative entranceways must be constructed in compliance with applicable PBC Codes and placed so as not to constitute a traffic hazard. [Ord. 2014-025]

25. Guardhouses
A guardhouse, located so as not to create a traffic hazard, may be constructed in the median of an entrance to a subdivision having only private streets. The minimum setback to a guardhouse shall be 150 feet, measured from the extension of the intersecting street lines, unless waived by the County Engineer. Two lanes shall be required on each side of the median in the area of the guardhouse.

26. Access Waiver for Collocated Landscape Service in the AR Zoning District
The dimensional requirement pursuant to Table 11.E.2.A-2, Chart of Minor Streets shall be allowed if Standards a through c of Art. 2.B.7.D, Type 2 Waiver and the following is met: [Ord. 2020-007] a. The Waiver shall not be injurious to the area involved or otherwise detrimental to the public welfare. [Ord. 2020-007]
### Table 11.E.2.A-1 – Chart of Access Hierarchy

**Major Streets:** Streets which constitute the traffic circulation network as contemplated under the Comprehensive Plan. Listed from highest to lowest category:

</table>

#### Notes:

1. An “X” under the Commercial or Residential column indicates the corresponding street classification is allowed as legal access.
2. Street width refers to standard R-O-W or private street tract width.
3. Pavement width represents two travel lanes of equal width and does not include the additional width of paved shoulder where required.
4. Allowed as legal access for any type of residential provided that the maximum allowable AD is not exceeded. Also, Streets within a rural subdivision shall be at least 60 feet wide when they are to be constructed without a wearing surface. [Ord. 2018-018]
5. Use is restricted to streets providing access to up to four lots. [Ord. 2014-025] [Ord. 2019-034]
6. Collocated Landscape Service in the AR/RSA and AR/USA shall have legal access from a Local Commercial or higher classification street, unless a lesser width is granted by a Type 2 Waiver. [Ord. 2020-007]
B. Pedestrian Circulation System
   1. Requirement for Sidewalks
      Except as provided in this Section, sidewalks shall be constructed on both sides of all streets. For
      frontage roads and streets with a width of less than 50 feet and greater than 32 feet, a sidewalk on one
      side at a minimum dimension of five feet is required. No sidewalk is required in streets with a width of
      32 feet or less. Required sidewalks shall be constructed by the developer except as provided in Art.
   2. Maintenance Responsibility of Sidewalks and Paths
      The control, jurisdiction, and maintenance obligation of paths not located wholly within a street and of
      sidewalks within private streets shall be placed with a Property Owners’ Association or an improvement
      district. Where such control and maintenance obligation is to be placed with an improvement district,
      the district shall expressly accept said obligation upon the plat or by a separate instrument filed in the
      Public Records.

C. Reduction of Street Width
   When pedestrian circulation is to be accomplished solely by paths constructed outside the streets, the
   County Engineer through the DRO may approve a concurrent request by the developer to reduce Local
   Street widths from those required pursuant to Art. 11.E.2.A.2, Minimum Legal Access Requirement, by no
   more than eight feet if such reduction would neither reduce the vehicular carrying capacity and safety of
   the streets nor compromise the safety of pedestrians. [Ord. 2014-025]

D. Crosswalks
   When the block length exceeds 660 feet, a pathway between streets may be required where deemed
   essential by the County Engineer to provide convenient pedestrian circulation or access to schools,
   playgrounds, shopping centers, transportation, and other community facilities.

Section 3 Clearing, Earthwork, and Grading

A. Minimum Required Improvement
   The developer shall be required to clear all R-O-W and to make all grades for streets, parking tracts, lots,
   and other areas proposed to be developed, compatible with on-site tertiary drainage patterns established
   by the approved drainage design.

B. Unsuitable Materials
   The developer shall remove and replace unsuitable materials, as determined pursuant to Art. 11.A.3.E, Site
   Suitability, and Art. 11.B.4.F, Soils Report. Replacement of unsuitable materials within streets and proposed
   public areas shall be satisfactory to and meet with the approval of the County Engineer, who shall require
   such soil tests of the backfill and the underlying strata at the cost of the developer as may be deemed
   necessary to ascertain the extent of required removal, suitability of replacement material, and acceptability
   of the proposed method of placement.
Section 4  Stormwater Management

A. Minimum Required Improvement
The following shall be the minimum required improvement for all developments to implement the level of protection under the Utilities Element of the Plan.

1. A complete, fully functional tertiary stormwater drainage system, including necessary lot grading, ditches, canals, swales, storm sewers, drain inlets, manholes, headwalls, endwalls, culverts, and other appurtenances, shall be required for the positive drainage of stormwater runoff in conformance with the approved drainage plans.

2. A complete and fully functional secondary stormwater system shall be required in conformance with the approved stormwater management plan.

3. A means to convey all stormwater discharge from the development site to at least one point of legal positive outfall shall be provided as an integral part of the required stormwater management system, including construction of all necessary conveyance facilities and establishment of appropriate easements for operation and maintenance of said off-site facilities.

4. Adequate physical and legal means shall be provided to ensure the continued conveyance of all pre-development flow of surface waters into or through the development site from adjacent lands. Unless otherwise specified by ordinance, regulation, or condition of development approval, such conveyance may be accomplished by incorporating the inflow into the on-site stormwater management system or diverting the inflow to its pre-development location of outflow from the development site, including construction of all necessary conveyance facilities and establishment of appropriate easements to accommodate said inflow.

5. All facilities necessary to meet requirements for stormwater treatment, off-site discharge control, and conveyance of existing inflows applicable to that portion of the site under construction must be in place and operational at the time of commencement of construction of required improvements, and shall be maintained by the developer until such time that all required improvements are acknowledged as complete.

B. General Criteria
Secondary and tertiary stormwater facilities for each subdivision, and for each lot, street, and other development site within the subdivision, shall be designed and constructed so as to:

1. Prevent flooding and inundation to a degree consistent with levels of protection adopted by the Plan for buildings, streets, lots, parking areas, recreational areas, and open space;

2. Maintain stormwater runoff rates at levels compatible with safe conveyance and/or storage capacities of drainage facilities and established legal limits applicable to receiving waters at the point of discharge;

3. Mitigate degradation of water quality and contravention of applicable State water quality standards in surface and groundwaters receiving stormwater runoff;

4. Provide facilities for conveyance to legal positive outfall of all allowable discharges of stormwater runoff from each development site without causing or contributing to inundation of adjacent lands;

5. Provide for continued conveyance of pre-development stormwater runoff and surface waters that flow into or through the development site from adjacent lands;

6. Provide for long-term, low maintenance, low cost operation by normal operating and maintenance methods;

7. Provide for necessary maintenance of the pre-development range of groundwater levels to prevent adverse impacts on land uses and water resources of the development site and adjacent lands; and,

8. Promote percolation, recharge, and reuse of stormwater.

C. Hydrologic Design Data
Unless otherwise specified by a particular design or performance standard, or approved by the County Engineer based on justification submitted by the developer’s engineer for an individual case, hydraulic and hydrologic data used in design of stormwater management facilities shall be based on:

1. Rainfall intensity-duration-frequency curves for FDOT-Zone 10;

2. Rainfall hyetographs of 24-hour total rainfall as published in SFWMD – Management and Storage of Surface Waters Permit Information Manual – Volume IV;

3. Rainfall quantity (or intensity) vs. time distributions in accordance with those published by SFWMD or FDOT, or the SCS – Type II (South Florida Modified) distribution;

4. Post-development runoff characteristics, such as slopes, available soil storage, runoff coefficients, ground cover, channelization, and overland flow routing, applicable to the development site and contributory off-site areas after complete development has occurred; or,

5. Maximum operating tailwater elevations at the outlet of each conveyance or discharge facility, determined as the maximum hourly average receiving water surface elevation resulting from a 24-hour
duration rainfall with a return period equal to that of the design storm applicable to the facility, or as otherwise established by the agency having operational jurisdiction over the receiving water elevation.

D. Design Flood Elevation Determination

Unless otherwise specified by a particular design or performance standard, the 100-year flood elevation applicable to a development site shall be determined as the highest of:

1. The base flood elevation specified for the area of development located within zones designated A, AH, or A1-30 as delineated on the appropriate FIRM;
2. The wind or current driven wave elevation specified for the area of development located within zones designated V1-V30 as delineated on the appropriate FIRM;
3. The inundation elevation obtained by adding the depth of shallow flooding to the area-weighted mean pre-development elevation of the area of development located within zones designated A0 as delineated on the appropriate FIRM;
4. The 100-year inundation elevation established by SFWMD within specific sub-areas of the C-51 Canal and C-18 Canal watersheds pursuant to Chapter 40E-41, F.A.C., and as amended; or, [Ord. 2018-018]
5. Where not otherwise established by Chapter 40E-41, F.A.C., as amended, or by a PBC drainage plan adopted pursuant to the Plan, the maximum inundation elevation resulting from the total on-site storage of runoff produced by the 100-year, three-day rainfall event assuming fully developed site conditions and no discharge of surface water from the development site. [Ord. 2018-018]

E. Tertiary Stormwater System Design and Performance

The tertiary system shall consist of all drainage features and facilities such as storm sewerage, swales, gutters, culverts, ditches, erosion protection, and site grading necessary for the immediate drainage and rapid removal of stormwater from building sites, streets, and areas of other land uses subject to damage or disruption by inundation in accordance with acceptable levels of service as established by the Plan.

1. Lot and Building Site Drainage

In order to provide for such levels of service, tertiary drainage for lots and buildings shall meet the following minimum requirements:

a. The minimum finished floor elevation of the principal building(s) to be constructed on a lot or portion thereof shall be at or above the 100-year flood elevation applicable to the building site.

b. Site grading immediately adjacent to the perimeter of each building shall be sloped so as to drain away from the structure.

c. Each Single Family residential lot shall be graded to drain along or within its property lines to the street or parking area providing immediate access, unless adequate common drainage facilities in expressed drainage easements with an established maintenance entity are provided to accommodate alternative drainage grading.

d. Each residential lot with gross area of one-quarter acre or less shall have a finished grade not lower than the maximum water surface elevation produced by the three-year, 24-hour rainfall event in any detention or retention facility receiving stormwater runoff from the lot.

e. Each residential lot with a gross area greater than one-quarter acre shall have a finished grade as specified in Art. 11.E.4.E.1.d within 20 feet of any principal building site, unless alternate construction methods such as stemwalls are approved by the County Engineer. The remainder of the lot shall be graded at sufficient elevation to ensure that inundation does not persist for more than eight hours following cessation of the three-year, 24-hour rainfall event, unless such area is designated for stormwater management purposes and included in an expressed easement for drainage, floodplain, or the like. [Ord. 2014-025]

2. Minor Street Drainage

Except as provided in Art. 11.E.4.E.3. Non-Plan Collector Street Drainage, minor streets shall have tertiary drainage meeting or exceeding the following minimum requirements.

a. The minimum edge of pavement elevation of any street segment shall be no lower than two feet above the control elevation of any detention or retention facility receiving runoff from that segment.

b. Roadside swales shall conform to applicable PBC Standards and shall be designed and constructed such that:

1) The flowline gradient is at least 0.30 percent, but not greater than 2.5 percent unless approved erosion protection is provided;

2) The flowline gradient is equal to or slightly exceeds the longitudinal gradient of adjacent pavement;

3) The water surface elevation of swale flow resulting from peak runoff based on the three-year rainfall event shall not exceed the adjacent edge of pavement at any point along the swale run. However, at least one storm sewer inlet or other acceptable discharge facility shall be provided
for every 600 linear feet of swale, and no single swale run shall exceed 400 feet to an inlet; and,
4) The soil adjacent to each inlet is protected from local scour by installation of a four-foot-wide perimeter apron of sod or concrete.

c. Curb and gutter drainage shall conform to applicable PBC Standards and shall be designed and constructed such that:
   1) The flowline gradient is at least 0.20 percent;
   2) The water surface elevation of flow resulting from peak runoff based on the three-year rainfall event shall not exceed the adjacent centerline elevation of pavement at any point. However, at least one storm sewer inlet or other acceptable discharge facility shall be provided for every 600 linear feet of pavement, and no single gutter run shall exceed 400 feet to an inlet; and,
   3) Surface flow of runoff across street intersections is prevented by provision of corner inlets and cross drains or by grading of gutters to flow away from the intersection.

3. **Non-Plan Collector Street Drainage**
   Non-Plan Collector Streets shall have tertiary drainage meeting all appropriate requirements for minor streets except that:
   a. Conveyance capacity of road drainage facilities shall be based on peak runoff resulting from the five-year rainfall event; and
   b. The water surface elevation of gutter flow resulting from peak runoff based on the five-year rainfall event shall not exceed the adjacent centerline elevation of the outermost travel lane at any point.

4. **Parking Tract and Parking Area Drainage**
   Each residential parking area serving three or more dwelling units and all non-residential parking areas shall have a finished grade elevation not lower than the maximum water surface elevation produced by the three-year, 24-hour rainfall event in any retention, detention, or conveyance facility receiving stormwater runoff from the lot. However, where detention or retention is provided by subsurface exfiltration systems the finished grade shall be no lower than the maximum storage elevation produced by the five-year, 24-hour event.

5. **Storm Sewerage**
   Storm sewerage shall be designed and constructed so as to meet or exceed the following requirements:
   a. Where not otherwise specified, all storm sewer system capacity design shall, at a minimum, provide for conveyance of peak inflow from the applicable catchment, based on the three-year rainfall event, such that the hydraulic gradient elevation does not exceed the grate or cover elevation at any inlet or manhole under tailwater conditions pursuant to Art. 11.E.4.C.5.
   b. Inlet times assumed for determining required street drainage system capacity shall not exceed ten minutes, unless adequate justification for use of longer times is submitted.
   c. Storm sewer pipe shall have a nominal diameter of not less than 15 inches, or equivalent oval pipe size. However, for stormwater sewerage systems to be maintained by PBC, storm sewer pipe shall have a nominal diameter of not less than 18 inches, or equivalent oval pipe size, unless otherwise approved by the County Engineer. The storm sewer pipe minimum diameter size may be reduced when the pipe is not within a right-of-way or Residential Access Street, subject to County Engineer approval. [Ord. 2013-001]
   d. Storm sewerage shall be designed to attain design flow velocities of not less than two and one-half feet per second in all pipe runs serving two or more inlets, nor greater than ten feet per second in any pipe run.
   e. A suitable access structure such as a manhole, junction box, or inlet must be installed at each junction or change in pipe size, slope, or direction.
   f. The maximum pipe run between access structures shall be:
      1) 300 feet for 15-inch and 18-inch pipe.
      2) 400 feet for 24-36-inch pipe.
      3) 500 feet for 42-inch and larger pipe.
   g. All pipe used in the storm sewer system shall be either reinforced concrete or metal, or as otherwise approved by the County Engineer, and covered by and conforming to current ASTM, AASHTO, or ANSI standard specifications for materials and fabrication of barrel and joints, and shall meet current FDOT standard specifications and policies applicable to the intended use. [Ord. 2011-001]
   h. Concrete pipe shall have gasket joints.
   i. Metal pipe shall not be used beneath pavement within a street. [Ord. 2013-001]
   j. Drainage pipe shall be fitted with headwalls, endwalls, inlets, and other appropriate terminating and intermediate structures. Structure design shall meet or exceed FDOT standard specifications and policies applicable to the intended use. [Ord. 2013-001]
F. Secondary Stormwater System Design and Performance

The secondary system, including all facilities and appurtenant structures for detention, retention, discharge, and conveyance to legal positive outfall, shall be designed and constructed to provide the degree of treatment and control of all stormwater runoff discharged from a development site necessary to meet the requirements of the agency having jurisdiction over receiving waters at each point of legal positive outfall.

1. In addition to requirements expressly stated herein:
   a. Secondary facilities for development subject to permitting by individual or general permit from SFWMD pursuant to Chapter 40E-4, F.A.C., Chapter 40E-40, F.A.C., or Chapter 40E-41, F.A.C., shall meet all requirements for issuance of the applicable permit; and
   b. Secondary facilities for each residential, commercial, and industrial development exempt from SFWMD permitting pursuant to Chapter 40E -4, F.A.C., except an individual residential lot containing not more than two dwelling units, shall be designed and constructed on site, or otherwise be provided through authorized connection to off-site secondary facilities, so as to limit the discharge rate at the point of legal positive outfall to not more than the peak runoff rate produced by the site under pre-development conditions for both the three-year, one-hour and the 25-year, 72-hour rainfall events, and either:
      1) Detain the greater of the first one inch of runoff or the total runoff from the three-year, one-hour rainfall event; or
      2) Retain the initial portion of runoff in an amount equal to one-half of that required to be detained.

2. No discharge of stormwater runoff resulting from rainfall up to and including the 25-year, 72-hour event shall take place from a development site except by means of one or more approved control structures, other than those existing inflows from off-site for which separate, approved means of conveyance through the site have been provided. Further, the overflow weir within the approved discharge structures shall be set with an invert at the 25-year, 72-hour event unless otherwise permitted by the authority having jurisdiction over the property's point of legal positive outfall. [Ord. 2014-025]

3. Facilities for conveyance of discharge to each point of legal positive outfall shall be designed and constructed with adequate capacity to accommodate the combined flow from the applicable discharge structure(s) and all inflows from other contributory areas resulting from the 25-year, 72-hour rainfall event without overflow to adjacent lands.

4. Except where bulk heading is approved in accordance with Art. 4.B.10, Excavation Uses, each wet detention/retention facility designed for storage of stormwater runoff in an open impoundment shall have: [Ord. 2017-007]
   a. Side slopes no steeper than four(H): one(V) extending to a depth of at least two feet below the design control elevation;
   b. Side slopes no steeper than two(H): one(V) from two feet below control elevation to the bottom of the facility; and,
   c. For properties requiring a Land Development Permit in accordance with Art. 11.B.2, Land Development Permit, a continuous berm, at least 20 feet wide with a cross-slope no steeper than eight(H): one(V), graded adjacent to the shoreline. Where said berm abuts any residential lot, it shall be graded at an elevation not lower than the maximum design water surface elevation resulting from the three-year, 24-hour rainfall event. Along portions of the impoundment where the design water surface is less than 40 feet wide at control elevation a berm shall be required on only one side, provided that adequate legal and physical access is established from a minor street to each separate segment of the remaining berm. [Ord. 2014-025]

5. Dry detention/retention facilities designed for storage in open impoundments shall have side slopes no steeper than four(H): one(V), except where bulk heading is approved. [Ord. 2018-018]

6. All normally exposed side slopes and maintenance berms of open impoundments shall be fully grassed or otherwise protected from erosion.

7. Each piped inlet to an open impoundment shall have a concrete or sand-cement rip-rap endwall designed and constructed with suitable foundation for installation on the slope or bed of the impoundment as applicable. However, the endwall may be eliminated on inlets to wet detention impoundments where the pipe is installed with the crown at least two feet below the control elevation and with the pipe invert protruding at least two feet beyond the side slope.

8. Stormwater runoff from pavement, roofs, and unpaved areas of compacted soil surfaces with no significant vegetative cover shall be directed over grassed, pervious soil surfaces as diffused flow prior to entering wet detention/retention facilities or dry detention facilities in order to promote infiltration, particulate deposition, nutrient removal, and interception of debris or other undesirable materials which may overload, pass through, cause nuisance conditions in, or increase maintenance needs of said facilities.
9. In order to protect against overdrainage of surrounding lands, no control elevation shall be lower than the pre-development average annual mean water table elevation of the detention facility site. In areas with variable water table elevations, the County Engineer may require soil testing or additional information to determine on-site water table elevations. [Ord. 2014-025]

10. A perimeter berm with a top elevation equal to or greater than the stage for the on-site 25-year, 72-hour event shall be provided on-site within a minimum of three feet from the property line such that all required grading occurs on-site unless written approval is obtained from abutting Property Owners. Perimeter berms established on site greater than three feet from the property line shall include drainage provisions to prevent off-site stormwater discharge. [Ord. 2014-025]

11. If exfiltration trench is utilized for on-site water storage, the County Engineer may require stormwater stage calculations for the relationship between the exfiltration trench and rising water table. [Ord. 2014-025]

G. Stormwater Management and Maintenance Access Rights

1. Each secondary system facility for detention or retention of stormwater runoff in an open impoundment shall be placed entirely within a water management tract dedicated or deeded to an acceptable entity responsible for operation and maintenance of the stormwater management system.

2. Except as otherwise provided pursuant to this Article, there is hereby required around each water management tract established for purposes of wet detention or retention in an open impoundment a lake maintenance easement a minimum of 20 feet in width and graded at a slope no steeper than eight(H): one(V). The width of the easement shall be measured from the point at which the grade is not steeper than eight(H): one(V). Lake maintenance from an abutting Local Street may be permitted by the County Engineer in accordance with good engineering practices. Access to a lake maintenance easement from at least one minor street shall be established as part of said easement or, when necessary, by separate express easement or other instrument of record. A lake maintenance easement shall be required on only one side of the water body or water management tract where the water surface at control elevation does not exceed 40 feet in width; provided, however, that elimination of said easement does not isolate any remaining lake maintenance easement from proper access. If the water surface at the control elevation is greater than 40 feet wide, a lake maintenance easement shall be required on both sides. No lake maintenance easement shall be required behind bulkheads; provided, however, an easement not less than ten feet in width shall be provided behind bulkheads where necessary to provide access to outfalls and, further, that elimination of said portion of lake maintenance easement does not result in isolating any remaining lake maintenance easement from required access. In residential subdivision, lake maintenance easements, including required access, shall be established over common areas only, and shall not encroach residential lots.

3. Easements shall be provided where necessary at a width adequate to accommodate the stormwater management facilities. A minimum width of 12 feet shall be provided for underground storm drainage installations. Where swales are used, the width shall be adequate to accommodate the entire design section between tops of slope. Where canals or ditches are permitted, the width shall be adequate to accommodate drainage facilities plus 20 feet on one side for maintenance purposes. Drainage easements shall be provided to accommodate existing drainage of surface waters from off-site contributory areas. When a subdivision is traversed by existing canals, watercourses, streams, drainage ways, or channels, there shall be provided a drainage easement or R-O-W conforming substantially with the lines of such watercourse and of such further width or construction or both as will be adequate for access, maintenance, and floodplain purposes.

H. Certificate of Compliance for Lots

When the finished lot grading required by Art. 11.E.4.E.1, Lot and Building Site Drainage, Art. 11.E.4.E.4, Parking Tract and Parking Area Drainage, is to be completed in conjunction with building construction, prior to issuance of the Certificate of Occupancy the developer shall submit to the Building Director a Certificate of Compliance from a State of Florida registered professional surveyor and mapper, engineer, or landscape architect. Such statement shall be in a form approved by the Building Department and shall state that lot grading was done in accordance with either the approved grading plan for the subdivision or, in the absence of such plan, in accordance with the applicable requirements of Art. 11.E.4.E.1, Lot and Building Site Drainage, and Art. 11.E.4.E.4, Parking Tract and Parking Area Drainage. [Ord. 2010-022]
Section 5  Wastewater Systems

A. General Requirement
Except in rural subdivisions, or where otherwise approved pursuant to Art. 11.E.5.B.2, a sewage collection/transmission system with appropriate service connection to each lot shall be provided for connection to a central sewer system. Such system shall be designed and installed in accordance with the Department of Environmental Protection (DEP) requirements, applicable permits or approvals obtained from the utility responsible for the central sewer system, and the appropriate permits secured from the PBCHD.

B. Individual System
1. In rural subdivisions, a septic tank system is an acceptable method of sewage disposal for each lot, when permitted by the PBCHD as per the standards prescribed in Art. 15.A, PBC Environmental Control Rule I – Onsite Sewage Treatment and Disposal Systems.
2. In subdivisions other than rural subdivisions, and in which each lot has an area of at least one acre, a septic tank system is an acceptable method of sewage disposal for each lot, conditioned upon the following:
   a. The subdivisions maximum build-out is 20 acres.
   b. The applicable central wastewater system Utility Service Provider approving the use of septic tanks, based upon the Utilities determination that provision of central wastewater service to the subdivision would require all of the following:
      1) the installation of a wastewater lift station and force main; and
      2) the installation of more than half a mile of wastewater force main from an existing available public wastewater collection system to the nearest boundary of the subdivision.
   c. The PBCHD permitting the use of septic tanks per the standards prescribed in Art. 15.A, PBC Environmental Control Rule I – Onsite Sewage Treatment and Disposal Systems.

Section 6  Potable Water Systems

A. General Requirement
Except in rural subdivisions, a potable water distribution system with appropriate service connection to each lot shall be provided for connection to a central water system. Such system shall be designed and installed in accordance with the DEP requirements, applicable permits or approvals obtained from the utility responsible for the central water system, and the appropriate permits secured from the PBCHD.

B. Individual System
In rural subdivisions, or where otherwise allowed, an individual well system is an acceptable method of providing potable water for each lot, when permitted by the PBCHD pursuant to the standards prescribed in Art. 15.B, PBC Environmental Control Rule II – Drinking Water Supply Systems.

Section 7  Utilities

A. Required Improvement
All utilities, including power and light, telephone and telegraph, cable television, wiring to street lights, and gas shall be installed underground, unless such requirement is waived by the County Engineer, as provided in this Section. Utilities shall be constructed in easements as prescribed by this Section. The developer shall make arrangements for utilities installation with each entity furnishing utility service involved. [Ord. 2014-025]

B. Easements
Utility easements 12 feet wide shall be provided where necessary for the particular development or for continuity purposes to accommodate all required utilities across lots and shall have convenient access for maintenance. Where possible, utility easements shall be centered on lot lines and should be provided for underground utilities across the portion(s) of the lot abutting a street or parking area. When a utility easement is to abut a street, the width may be reduced as approved by the County Engineer. Additional utility easements may be required by PBC when, in the opinion of the County Engineer, such easements are necessary for continuity of utility service between subdivisions or other development and where necessary for maintenance and service. Utility easements and drainage easements shall not be combined. Where crossings occur, drainage easements shall take precedent. Easements shall be coordinated with requisite utility authorities and shall be provided as prescribed by this Article for the installation of underground utilities or relocating existing facilities in conformance with the respective utility authority's rules and regulations. [Ord. 2013-001]
C. Exceptions to Underground Installation

1. Applicability
   This Section shall apply to all cables, conduits, or wires forming parts of an electrical distribution or communications system, including service lines to individual properties and main distribution feeder electrical lines delivering power to local distribution systems. This Section shall not apply to wires, conduits, or associated and supporting structures whose exclusive function is to transmit or distribute electricity between subdivisions, generating stations, substations and transmission lines of other utility systems, or perimeter lines located adjacent to a subdivision.

2. Standard Exception for Appurtenant, on the Ground Facilities
   Appurtenances such as transformer boxes, pedestal mounted terminal boxes, meter cabinets, service terminals, telephone splice closures, pedestal type telephone terminals, or other similar “on the ground” facilities normally used with and as a part of the underground distribution system may be placed above ground, but shall be located so as not to constitute a traffic hazard.

3. Exceptions Requiring Approval of County Engineer
   All other proposals for above-ground installation of utilities shall be submitted to the County Engineer at the time of the preliminary submittal. Such request shall be made in writing and noted on the construction plans. The County Engineer shall, at the time of the preliminary review, consider the request and all pertinent information, including but not limited to the construction plans, existing installations, and other information the County Engineer deems necessary. Any approval or denial pursuant to this Subsection shall be set forth in writing, which may be by separate statement to the developer and the developer’s engineer or may be part of the County Engineer’s response to the preliminary review.

4. Convertibility
   Any new service which, by virtue of an approved waiver granted pursuant to this Section, is allowed to be supplied by overhead utilities shall be connected to a service panel that is convertible for underground utility service at a future date.

D. Installation in Streets
   After the subgrade for a street has been completed, and before any material is applied, all underground work for the water mains, sanitary sewers, storm sewers, gas mains, telephone, electrical power conduits and appurtenances, and any other utility shall be installed completely through the width of the street to the sidewalk area or provisions made so that the street will not be disturbed for utility installation. All underground improvements installed for the purpose of future service connections shall be properly capped and backfilled.

Section 8 Fire-Rescue Services

A. Required Improvement
   Fire hydrants shall be provided where central water systems are provided. Fire hydrants shall be provided in the manner prescribed in this Section.

B. Single Family Developments of Less than Five Units per Acre
   Fire hydrants shall be spaced no greater than 600 feet apart and not more than 300 feet to the center of any lot in the subdivision and shall be connected to mains no less than six inches in diameter. The system shall provide capability for fire flow of at least 700 gallons per minute in addition to a maximum day requirement at pressures of not less than 20 pounds per square inch. The system shall have the capability of sufficient storage or emergency pumping facilities to such an extent that the minimum fire flow will be maintained for at least four hours or the current recommendations of the insurance services office, whichever is greater.

C. Multifamily Developments of over Five Dwelling Units per Acre, Commercial, Institutional, Industrial, or Other High Daytime or Nighttime Population Density Developments
   In these areas fire hydrants shall be spaced no greater than 500 feet apart and the remotest part of any structure shall not be more than 300 feet from the hydrant and shall be connected to mains no less than six inches in diameter. Fire flow shall be provided at flows not less than 1,200 gallons per minute in addition to a maximum day requirement at pressures of not less than 30 pounds per square inch.

D. Charges for Use
   Charges made for the use of the fire hydrant or water consumed there from when a fire protection authority uses the fire hydrant in the performance of its official duty shall be as regulated by the Public Service Commission.
**Section 9  Subdivision Design and Survey Requirements**

**A. Maximum Length of Blocks**
Block lengths shall not exceed 1,320 feet between intersecting streets. Provided, however, that greater lengths may be approved by the County Engineer on an individual basis after considering such factors such as but not limited to, lot size, the ADT, number of through streets, street layout, emergency vehicle accommodations, and other engineering considerations, in accordance with acceptable engineering practices. [Ord. 2014-025] [Ord. 2018-018]

**B. Lots**
All lots shall have the area, frontage, width, and depth required by this Code or applicable zoning approval for the prevailing or approved use zone wherein said lots are located.

1. **Existing Structures**
   When a subdivision is proposed upon land with existing structures that are proposed to be retained, lots are to be designed so as not to cause said existing structures to become nonconforming.

2. **Lots Abutting Major Streets**
   a. Residential – When lots are platted abutting a major street or Non-Plan Collector Street, access shall be provided by and limited to Local Streets or Residential Access Streets. No access from individual lots shall be permitted directly to a major street. [Ord. 2018-018]
   b. Non-Residential – When lots are subdivided abutting a major street, no access from individual lots shall be permitted directly to a major street. This does not apply to lots in the Planned Development zoning district that have multiple uses sharing common access drives to major streets. [Ord. 2018-018]

3. **Through Lots with Street Frontage on Two or More Sides**
   Multiple frontage lots or through lots shall be avoided except where essential to provide separation of residential development from major streets or to overcome specific disadvantages of topography or orientation. [Ord. 2018-018]

**C. Minimum Safe Sight Distance and Corner Clips at Intersections**
Street lines at the intersection of two streets shall be connected by a diagonal line in accordance with current PBC Standards for corner clips. Corner lots shall be designed to facilitate a safe intersection with respect to minimum stopping and turning sight distances in accordance with criteria prescribed in the most recent edition of the FDOT Manual of Uniform Minimum Standards for Design, Construction and Maintenance for Streets and Highways. A restriction shall be placed on the plat prohibiting structures or landscaping over 30 inches high within any additional safe sight area required to be established over an individual lot in order to accommodate unusual conditions in the design of the lot or alignment of adjacent streets, said height being measured from the street crown elevation at the intersection.

**D. Survey Requirements**
1. **Permanent Reference Monuments (P.R.M.s)**
   Where monuments occur within street pavement areas, they shall be installed in a typical water valve cover as prescribed in the current PBC Standards.

2. **Permanent Control Points (P.C.P.s) and Monuments**
   Permanent control points and monuments according to F.S. § 177.091(9), shall be installed as follows.
   a. **Installation Prior to Plat Recordation**
      Where required improvements are constructed prior to recordation, the permanent control points and monuments shall be set prior to submission of the Final Plat and certified by the surveyor and mapper in accordance with Art. 11.D.1.B.15.c, Certification of Surveyor and Mapper. [Ord. 2010-022]
   b. **Installation after Plat Recordation**
      Where required improvements are constructed after recordation, the permanent control points shall be set under the guaranties as required by Art. 11.E.9, Subdivision Design and Survey Requirements. In such case, the surveyor and mapper's certificate shall comply with Art. 11.D.1.B.15, Certification and Approvals. The signing surveyor and mapper shall provide the County Engineer with a copy of the recorded certification required by Art. 11.D.1.B.7.f, as to his placement of the permanent control points and monuments. [Ord. 2010-022]
CHAPTER F   VARIANCES

Section 1   Variances

A Variance from the literal or strict enforcement of the provisions of this Article may be granted in accordance with the provisions set forth in Art. 2, Application Processes and Procedures. [Ord. 2011-001]

ARTICLE 12
TRAFFIC PERFORMANCE STANDARDS

CHAPTER A  GENERAL

Section 1  Intent and Authority

A. Intent
The BCC finds that safe, convenient, and orderly flow of vehicular traffic is necessary for the health, safety, welfare, and convenience of the public. It is the intent of this Article to ensure that roadways are in place and adequate to provide a Level of Service (LOS) that will provide safe, convenient, and orderly traffic flow.

It is the intent of this Article to implement the goals, objectives, policies, and standards of the Plan by amending and readopting the TPS Ordinance No. 90-40.

The BCC finds that the safe, convenient, and orderly flow of traffic will be achieved by the standards set forth herein.

Nothing in this Article shall preclude the BCC or other authority with the responsibility of issuing Development Orders from considering traffic, roadway, or Project conditions not specifically required by this Article or which are peculiar to the location, size, configuration, use, or relationship to the area of the proposed Project or the proposed Project itself; and to impose conditions necessary to serve the public interest.

B. Authority
The BCC has the authority to adopt this Article pursuant to Art. VII, § 1(g), Fla. Const. and to Art. VIII, § 1, Fla. Const., the PBC Charter, F.S. § 125.01 et seq., F.S. § 163.3161, and F.S. § 163.3202 et seq. [2019-005]

Section 2  Definitions

A. Other Definitions
1. For purposes of this Article, except as specifically provided herein or unless the context clearly indicates otherwise, the terms defined in the Code of PBC, Florida, and the Plan shall have the meaning therein. In the event of a conflict between the Code and the Plan, the Plan shall prevail. The capitalization of defined terms herein is for the reader's convenience only. Failure to capitalize shall not be construed as an intent not to use the term in its defined meaning.

Section 3  Applicability

A. General
1. Unless otherwise provided herein, this Article shall apply to all Site Specific Development Orders or any other official action of a Local Government having the effect of permitting the development of land.

2. Applicability to Incorporated Areas
The PBC Charter provides authorization to the BCC to adopt this Article for roads which are "not the responsibility of any municipality." The major thoroughfare system identified in the Plan includes some roads which are the responsibility of a Municipality. The Charter precludes the applicability of this Article to roads that, while being on the Major Thoroughfare system, are the responsibility of a Municipality. Accordingly, in the case of setting the LOS this Article shall not apply so as to restrict the issuance of Development Orders adding traffic to roads which are the responsibility of a Municipality.

B. Credits Against Project Traffic
This Section establishes a method for calculating credits against Project Traffic that may apply when seeking to amend a Previously Approved Development Order, or when applying for a Site Specific Development Order on property, which has an existing use. The burden shall be on the Applicant to demonstrate the eligibility and the amount of credit for a proposed Project. [Ord. 2011-016]
1. Any proposed amendment to a Previously Approved Development Order shall receive a credit for Project Traffic subject to the provisions of this Section. The credit shall be calculated by applying current trip generation rates and pass-by rates to the land use or uses previously approved by the Site Specific Development Order. The credit shall be adjusted as necessary to account for changes in traffic distribution resulting from modifications to the Previously Approved Development Order. The credit shall be reduced as applicable based on any subsequent reduction of square footage or number of units built pursuant to Master Plan or Site Plan amendment, and in accordance with any subsequent amendment to applicable Municipal rules, policies, or land development regulations.

2. Any application for a Site Specific Development Order on property on which there is an existing use shall receive a credit against Project Traffic subject to the provisions of this Section. The credit shall be calculated by applying current trip generation rates and pass-by rates that would be generated by the most recent existing use at the time of application. The credit shall be adjusted as necessary to account for changes in traffic distribution as a result of the proposed Project. A proposed Project shall not be eligible for an existing use credit if the structure or land on the property has been discontinued or abandoned for more than five years prior to the time of application.

3. A Project shall be eligible for a 100-percent credit against Project Traffic if the Previously Captured non-residential Project has received CO for interior tenant improvements for at least 80 percent of the gross leasable area for more than five years or the Previously Captured residential Project has received Building Permits for 80 percent of the units as set forth in the Master Plan or Site Plan as applicable.

4. An urban redevelopment project located within a defined and mapped existing urban service area shall not be subject to the standards of Art. 12.B, Standard for up to 110 percent of the traffic generation of the previously existing development. The credit shall be calculated by applying current trip generation rates and pass-by rates that would be generated by the most recent existing use at the time of application. The credit shall be adjusted as necessary to account for changes in traffic distribution as a result of the proposed Project. A proposed Project shall not be eligible for an existing use credit if the structure or land on the property has been discontinued or abandoned for more than five years prior to the time of application.

C. Non-Applicability

1. Local Government Applications
The standards of this Section shall not apply to Local Government-initiated district boundary changes as part of an area-wide review and district boundary-change program, or any district boundary changes to conform with the Local Government Plan which does not authorize development.

2. Development Order Time Limit Criteria
This Section shall not apply to PBC-initiated petitions to lower density/intensity under Development Order Time Limit Criteria in Art. 2.E, Monitoring of Development Orders (DOs) and Conditions of Approval, of the Code. Nothing herein shall preclude the review of approvals under Development Order Time Limit Criteria, for consistency with this Section.

3. Entitlement
The standards of this Section shall not apply to Site Specific Development Orders not exceeding entitlement densities/intensities established in the Plan or Art. 12.E, Entitlement.

4. Special Events
The standards of this Section shall not apply to Site Specific Development Orders issued for special events as described below:

a. For purposes of this Section, a special event is an activity which does not exceed three consecutive weeks a year, occurs no more frequently than once a year, and is open to the general public. It includes auto races, Fourth of July activities, parades, and festivals. It does not include recurring events such as baseball games, football games, concerts, races, and the like held in stadiums, amphitheaters, or other permanent facilities even if such facilities are used for special events. Each special event shall constitute a separate special event for purposes of calculating the number of weeks of the event. If the Plan is amended to provide more stringent provisions as to this exception, the Plan shall control.

b. For the purposes of this Section, a special part-time demand event is a development that does not have more than 200 scheduled events during any calendar year and does not put traffic on the roadway system during the 100 highest traffic hours.
   1) The 100 highest traffic hours for the area of the special part-time demand shall be determined by the County Engineer based on information from permanent count stations.
2) The development shall not be permitted if the daily traffic generated during a scheduled event has an impact that exceeds five percent of the LOS D Standard Volume on a roadway on the Florida Intrastate Roadway System.

3) The development shall be restricted to areas identified as urban infill, urban redevelopment, existing urban service, or downtown revitalization areas in the Local Government’s Comprehensive Plan.

4) A traffic report shall be prepared that identifies the trip generation of the development, the modal split (if any), the location of the development, and the month and time of day of scheduled events. The Development Order for the development shall include monitoring and enforcement provisions restricting the development to the number and timing of the events.

5. Subsequent or Amendments to Development Orders
   a. Subsequent Implementing Development Orders
      The standards of this Article shall not apply to Site Specific Development Orders which are subsequent implementing Development Orders to Previously Approved Site Specific Development Orders which were captured by this Section or Ord. No. 90-6 (Traffic Performance Standards Municipal Implementation Ordinance), but which are required by Local Government as part of the development approved under the captured or Previously Approved Site Specific Development Order. Examples of these subsequent implementing Site Specific Development Orders are subdivision approvals and Building Permits issued in a Planned Unit Development (PUD) where the PUD is a Previous Approval or met the requirements of this Article (either directly or through the Traffic Performance Standards Municipal Implementation Ordinance).

   b. Amendments to Previously Captured Approvals
      Amendments to Site Specific Development Orders which were captured by this Article or Ord. No. 90-6 (Traffic Performance Standards Municipal Implementation Ordinance) which do not increase the captured Site Specific Development Order’s Net Trips or Net Peak Hour Trips on any Link or Major Intersection (including increases resulting from redistribution) shall not be subject to the standards of this Article. For purposes of this determination, the generation rates and capture rates of the captured Site Specific Development Order shall be updated to current generation and capture rates, if applicable, and shall be used to calculate whether there is any increase. If there is an increase, Net Trips shall be subject to the standards of this Article. In making this determination, all parcels or lots in their entirety taken together of any Previously Captured Approval shall be considered if it was approved as a single Project. [Ord. 2010-022]

6. Vested Rights
   Notwithstanding the provisions of this Article to the contrary, the requirements of this Article shall not apply in any manner to impair vested rights established pursuant to Florida law, to the extent that any Project, or portion thereof, is vested as against the requirements of this Article.

7. Exceptions
   The standards of this Article shall not apply to Site Specific Development Orders for the Coastal Residential use as set forth in Art. 12.I, Coastal Residential Exception and the special events, as set forth in Art. 12.A.3.C.4, Special Events. [Ord. 2011-016]

8. Requirements
   The exceptions to the standards of this Article (LOS Standards) do not obviate the requirement to report the Site Specific Development Order, or provide the Traffic Impact Study (where required), to the County Engineer.
D. Municipal Determination of Previous Approval

1. Validity
   Only Valid Site Specific Development Orders which meet the definition of Previous Approval shall be considered Valid Previous Approvals.

2. Procedures
   The Municipality shall establish procedures for determining what Previous Approvals have been granted. The procedures shall be at the sole discretion of the Municipality. The Municipality shall send its determination as to each Previous Approval to the Traffic Division of the County Engineer within 15 days of its determination.

3. Timing
   The County Engineer shall have ten working days, exclusive of tolled days, from the receipt of the determination of the Municipality to review and determine if additional information is required.

4. Additional Information
   If the County Engineer requests additional information, he shall have 30 days, exclusive of tolled days, from the receipt of the additional information to notify the Property Owner and Municipality as to, and file, an action for judicial review.

5. Period to File
   The Municipality's determination shall not be effective, and the period to file an action shall not commence, until either: (1) the County Engineer has not requested additional information within the ten day period or, (2) if additional information is requested, the County Engineer has received all additional information requested.

6. Delivery

7. Appeals
   The appeal or review shall be to a Court of competent jurisdiction and may be filed by any substantially affected person, including any Local Government.

8. Limitation on PBC's Review/Appeal
   b. Clerical errors in long-standing otherwise Valid Site Specific Development Orders on which development commenced prior to February 1, 1990 shall not be grounds for appeal or review.
   c. Any Municipal determination that there is a Previous Approval on a Lot upon which building construction or infrastructure improvements have been made within the last three years which are consistent with the Development Order considered to be the Previous Approval shall not be appealed by PBC.
   d. Any Municipal determination that a Valid Site Specific Development Order (as determined by PBC) issued prior to February 1, 1990, and within three years prior to February 1, 1990, is a Previous Approval and shall not be appealed by PBC.

9. Completion of Previous Approvals
   The Municipality shall complete its review and determination of all properties within its jurisdiction as to Previous Approvals by July 1, 1991.

E. Municipal Concurrency Management System
   A Municipality may, with the consent of PBC, enter into an intergovernmental agreement with PBC whereby the Municipality, by a concurrency management ordinance, implements the standards and requirements of this Article at different points in the land development approval process than those set forth in this Article. The agreement and ordinance shall ensure that all development is subject to the standards and requirements of this Article, and that data is forwarded to PBC for capacity management and review consistent with this Article.
SECTION 1  General

There is hereby established a TPS for all Major Thoroughfares within PBC. Except as specifically provided in this Article, no Site Specific Development Order shall be issued for a proposed Project which would violate this standard. This standard consists of two tests. The first test relates to the Buildout Period of the Project and requires that the Project not add Traffic in the Radius of Development Influence which would have Total Traffic exceeding the Adopted LOS at the end of the Buildout Period. The second test relates to the evaluation of traffic five years in the future and requires that the Project not add Traffic in the Radius of Development Influence which would have Total Traffic exceeding the Adopted LOS at the end of the Five-Year Analysis Period. Total Traffic for Test 2 is based in part upon Background Traffic information from the TPS Database. Where a CRALLS service volume has been adopted, those volumes shall apply. Where a CRALLS service volume has been adopted for one or more of the LINKS that constitute the legs of the intersection, the allowable service volume for the intersection shall be calculated as follows: Allowable CRALLS intersection volume = [sum of CRALLS Link volume(s) or Link LOS D volumes (for those LINKS without CRALLS), whichever is applicable, for all legs of intersection / (sum of Link LOS D volume(s) for all legs of intersection)] x 1,400. For Test 2 purposes, LOS E volumes and a 1,500 critical sum shall be used in the preceding formula for determination of the allowable CRALLS intersection volumes. [Ord. 2006-043] [Ord. 2007-013] [Ord. 2009-040]

SECTION 2  Project Buildout/Five-Year Standard

A. Buildout Test – Test 1, Part One and Two

No Project shall be approved for Site Specific Development Order unless it can be shown to satisfy the requirement of Parts One and Two of Test 1 as outlined below. [Ord. 2009-040]

1. Part One – Intersections

This Part requires analysis of Major Intersections, within or beyond the Radius of Development Influence, where a Project’s traffic is significant on a Link within the Radius of Development of Influence. For purposes of this Part One, Major Intersections also includes intersections of a Major Thoroughfare and a non-thoroughfare road or other point of access where: (1) the intersection is signalized or where projected traffic volumes warrant a signal; and (2) the non-thoroughfare approach is projected to carry at least 200 two-way, peak hour trips; and (3) the non-thoroughfare approach represents 20 percent or more of the intersection critical sum volume. [Ord. 2005-002]

a. The following Major Intersections shall be analyzed: [Ord. 2007-013]

1) The Major Intersections in each direction nearest to the point at which the Project’s Traffic enters each Project Accessed Link, and where the Project Traffic entering or exiting the intersection from/to the Project Accessed Link is significant. The intersections analyzed shall not exceed two intersections per Project Accessed Link. [Ord. 2007-013] [Ord. 2011-016]

2) For the Projects on Southern Boulevard, the Urban Interchange(s) when it is the nearest Major Intersection to the point at which the Project’s Traffic enters the Project Accessed Link and when the Project Traffic entering and exiting the intersection is significant. For purposes of determining significance of the traffic entering and exiting the interchange, the traffic entering and exiting the ramps shall be considered against a directional ramp LOS D Service Volume of 2,100 vehicles per hour per lane. [Ord. 2007-013] [Ord. 2009-040] [Ord. 2014-025]

3) All Major Intersections where the Project Traffic comprises ten percent or more of the Total Traffic on at least one approach. [Ord. 2005-002] [Ord. 2007-013]

b. For signalized intersections that are not part of the SIS, SIS Connectors, FIHS, TRIP-funded facilities, or grade-separated interchanges, analyze the Major Intersections using the Highway Capacity Manual (HCM) 1985 Planning Methodology (CMA). In the event that one or more intersections exceed the Critical Volume threshold identified in Table 12.B.2.C-2 1B, LOS D Intersection Thresholds, are grade-separated interchanges, or the intersections are part of the SIS, SIS Connectors, FIHS, or TRIP-funded facilities, the Applicant shall conduct the intersection analysis of those intersections using the HCM Operational Analysis using the most recent version of the HCM. [Ord. 2007-013] [Ord. 2009-040] [Ord. 2011-016]

1) The HCM CMA and Operational Analysis shall comply with the default input values published by the County Engineer no more frequently than twice per year. Revisions to the input values may be made subject to approval by the County Engineer to reflect actual or projected field conditions where substantial differences from the published values can be demonstrated. [Ord. 2009-040]
2) If the intersection average total delay or the Critical Volume is at or below the thresholds identified in Table 12.B.2.C-2 1B, LOS D Intersection Thresholds, the Project passes Part One of Test 1 and continues with the Part Two – Link Analysis. If the intersection average total delay or the Critical Volume exceeds the thresholds identified in Table 12.B.2.C-2 1B, LOS D Intersection Thresholds, the Project fails Part One of Test 1. [Ord. 2007-013] [Ord. 2009-040]

c. For unsignalized Major Intersections, the intersections shall be analyzed using the most recent version of the HCM Unsignalized Intersection Analysis and all minor movements of Rank 2 or higher shall operate at LOS E or better. In addition, a signal warrant analysis with Total Traffic for the intersection may be required by the County Engineer. [Ord. 2009-040]

1) If a minor movement is not projected to operate at LOS E or better, then the Applicant may make intersection improvements in accordance with applicable Palm Beach County or FDOT Design Standards to satisfy the LOS standard. If these improvements require signalization of the intersection and if signalization is expected to be warranted at any time up to 24 months after the Project’s final certificate of occupancy, then the Project may also be required to fund signalization. If, with these improvements, all minor movements of Rank 2 or higher will operate at LOS E or better, the Project passes Part One of Test 1. [Ord. 2009-040]

2) If no geometric intersection improvements are determined to be feasible by the County Engineer, then the Applicant shall agree to fund signalization of the intersection if warranted at any time up to 24 months after the Project’s final Certificate of Occupancy. If the Applicant is not willing to agree to fund signalization of the intersection if warranted, the Project fails Part One of Test 1. [Ord. 2009-040]

2. Part Two – Links
a. This Part requires analysis of Links and Major Intersections as necessary within or beyond the Radius of Development Influence, where a Project’s traffic is significant on a Link within the Radius of Development Influence. The Total Traffic in the peak hour on the Link shall be compared to applicable thresholds in Table 12.B.2.C-1 1A, LOS D Link Service Volumes, Peak Hour Traffic; Peak Direction volume threshold. The applicable facility class for each Link shall be determined on the basis of the number of traffic signals per mile anticipated by the County Engineer to be in place by the buildout time frame of the proposed Project being evaluated. Additionally, for all Links where the Total Traffic peak hour directional volumes exceed the applicable threshold and for all Links where the uninterrupted flow service volume has been utilized, the Major Intersections on each end of the Link shall be analyzed. If the Link is on Southern Boulevard, the at-grade intersection created by an Urban Interchange shall not be considered the intersection at the end of the Link since the intersection is actually not on Southern Boulevard. The Project shall include the next intersection with Southern Boulevard for analysis and compliance. [Ord. 2010-022]

The project shall pass Part Two of Test 1 if: [Ord. 2010-022]

1) The Total Traffic peak hour directional volume on the Link is less than the applicable thresholds in Table 12.B.2.C-1 1A, LOS D Link Service Volumes; and [Ord. 2007-013] [Ord. 2010-022]

2) For Links utilizing the uninterrupted flow service volume, the intersections are below the 1,400 Critical Volume or below the Delay Threshold in Table 12.B.2.C-2 1B, LOS D Intersection Thresholds. [Ord. 2010-022]

For Links not utilizing the uninterrupted flow service volumes: where the Total Traffic peak hour directional volumes exceed the applicable threshold, where the Buildout Period is five years or fewer, and where the intersections at the end of the failing Link are less than or equal to the 1,400 Critical Volume or less than or equal to the Delay Threshold in Table 12.B.2.C-2 1B, LOS D Intersection Thresholds a more detailed analysis as outlined in the Optional Analysis may be completed to demonstrate compliance with Part Two. [Ord. 2010-022]

For Links not utilizing the uninterrupted flow service volumes: where the Total Traffic peak hour directional volumes exceed the applicable threshold and where the Buildout Period is greater than five years or where the intersections at the end of the failing Link are greater than the 1,400 Critical Volume or greater than the Delay Threshold in Table 12.B.2.C-2 1B, LOS D Intersection Thresholds, the Project fails Part Two of Test 1. [Ord. 2010-022]

For Links utilizing the uninterrupted flow service volumes, where the Total Traffic peak hour directional volumes exceed the applicable threshold, the Project fails Part Two of Test 1. [Ord. 2005-002] [Ord. 2007-013] [Ord. 2010-022]

b. Optional Analysis – The HCM Arterial Analysis Operational methodology shall be conducted. For these Links, the Project shall demonstrate that the Total Traffic peak hour directional volumes do not result in an average speed on the Segment that is lower than the speed thresholds for LOS D as defined in Table 12.B.2.C-3 1C, LOS D Speed Thresholds. If the speed is equal to or higher
B. Five-Year Analysis – Test 2

No project shall be approved for a Site Specific Development Order unless it can be shown to satisfy the requirements of Test 2. This test requires analysis of Links and Major Intersections as necessary within or beyond the Radius of Development Influence, where a Project’s traffic is Significant on a Link within the Radius of Development Influence. This analysis shall address the Total Traffic anticipated to be in place at the end of the fifth year of the Florida Department of Transportation Five-Year Transportation Improvement Program in effect at the time of traffic analysis submittal. The existing road network and State and County Five-Year Road Program improvements with construction scheduled to commence before the end of the Five-Year Analysis Period shall be the Test 2 Road Network assumed in the analysis. [Ord. 2006-043] [Ord. 2010-022]

1. The Total Traffic peak hour directional volumes shall be compared to the applicable thresholds in Table 12.B.2.C-4 2A, LOS E Link Service Volumes. The applicable facility class for each Link shall be determined on the basis of the number of traffic signals per mile anticipated to be in place at the five-year analysis time frame. Additionally, for all Links where the Total Traffic peak hour directional volumes exceed the applicable threshold and for all Links where the uninterrupted flow service volume has been utilized, the Major Intersections on each end of the Link shall be analyzed. If the Link is on Southern Boulevard, the at-grade intersection created by an Urban Interchange shall not be considered the intersection at the end of the Link since the intersection is actually not on Southern Boulevard. The Project shall include the next intersection with Southern Boulevard for analysis and compliance. The Project shall pass Test 2 if: [Ord. 2006-043] [Ord. 2007-013] [Ord. 2010-022]
   a. the Total Traffic peak hour directional volume on the Link is less than the applicable thresholds in Table 12.B.2.C-4 2A, LOS E Link Service Volumes; and [Ord. 2006-043] [Ord. 2010-022]
   b. For Links utilizing the uninterrupted flow service volume, the intersections are below the 1,500 Critical Volume or below the Delay Threshold in Table 12.B.2.C-5 2B, LOS E Intersection Thresholds. [Ord. 2010-022]
      For Links not utilizing the uninterrupted flow service volumes, where the Total Traffic peak hour directional volumes exceed the applicable threshold but the intersections at the end of the failing Link are below the 1,500 Critical Volume or below the Delay Threshold in Table 12.B.2.C-5 2B, LOS E Intersection Thresholds a more detailed analysis as outlined in the Optional Analysis may be completed to demonstrate compliance with Test 2. Otherwise, the Project fails Test 2. [Ord. 2010-022]

2. Optional Analysis – The HCM Arterial Analysis Operational methodology shall be conducted. For these Links, the project shall demonstrate that the Total Traffic peak hour directional volumes do not result in an average speed on the Segment that is lower than the speed thresholds for LOS E as defined in Table 12.B.2.C-6 2C, LOS E Speed Thresholds. If the speed is lower than LOS E, then the project fails Test 2. If the speed is equal to or higher than the LOS E speed threshold, then the project shall pass Test 2. [Ord. 2006-043] [Ord. 2007-013] [Ord. 2010-022]

3. The Applicant may make Link or intersection improvements in accordance with published Palm Beach County or Florida Department of Transportation Design and Traffic Engineering Standards, as applicable, in order to satisfy Test 2. [Ord. 2010-022]

C. Level of Service Standard

1. The LOS D Standard Service Volumes as to Average Daily Traffic, Peak Hour Traffic two-way and Peak Season, Peak Direction (Test 1 for Links are set forth in Table 12.B.2.C-1 1A, LOS D Link Service Volumes. The LOS D thresholds relative to intersections are set forth in Table 12.B.2.C-2 1B, LOS D Intersection Thresholds. The LOS D threshold associated with the HCM arterial analysis in terms of speed is provided in Table 12.B.2.C-3 1C, LOS D Speed Thresholds.

2. The LOS E Standard Service Volumes for Average Daily Traffic, Peak Hour Traffic two-way and Peak Season, Peak Direction (Test 2 for Links) are set forth in Table 12.B.2.C-4 2A, LOS E Link Service Volumes. The LOS E thresholds relative to intersections are set forth in Table 12.B.2.C-5 2B, LOS E Intersection Thresholds. The LOS E thresholds associated with the HCM arterial analysis in terms of speed are provided in Table 12.B.2.C-6 2C, LOS E Speed Thresholds. [Ord. 2006-043]

3. For roads on the SIS, SIS Connectors, FIHS, and TRIP-funded facilities, the LOS standard shall be LOS D in Urban Areas, LOS C in Transitioning Urban Areas, Urban Areas, or Communities; and LOS
B in Rural Areas as adopted by the FDOT. This standard must be met for roadways on a Peak Hour, Peak Direction basis, in accordance with the methodologies specified in FDOT Rule 14-94. [Ord. 2007-013]

4. A different service volume may be adopted for a specific road or intersection as part of the Plan as a CRALLS. A required roadway improvement that is the subject of a Development Order condition may not be necessary due to the adoption of a CRALLS. An Applicant with a Project that has a Development Order condition for a roadway improvement or is phased to the unnecessary roadway improvement may request the appropriate governing body to remove the applicable roadway phasing condition. The application may be approved provided that the Concurrency Reservation (for Unincorporated Projects) or determination of the County Engineer (for Municipal Projects) has been amended to delete the applicable roadway phasing condition. If a Project has relied upon a CRALLS volume on a roadway and/or intersection to meet the standard, the subsequent subdivision of that Project into separate lots shall still require all parcels or lots in their entirety taken together of that subdivision to be addressed against the standard and any required CRALLS mitigation for the overall Project to be completed by the developers of the separate lots. [Ord. 2010-022]

[Ord. 2006-043]

1. For Test 1, a Project must address those Links within the Radius of Development Influence on which its Net Trips are greater than one percent of the LOS D of the Link affected on a peak hour peak direction basis AND those Links outside the Radius of Development Influence on which its Net Trips are greater than five percent of the LOS D of the Link affected on a peak hour peak direction basis up to the limits set forth in Table 12.B.2.C-1 1A, LOS D Link Service Volumes. Provided, in all cases, I-95 and Florida’s Turnpike shall be addressed only if Net Trips on these facilities are greater than five percent of the LOS D of the Link affected on a peak hour peak direction basis up to the limits set forth in Table 12.B.2.C-1 1A, LOS D Link Service Volumes. [Ord. 2006-043] [Ord. 2007-013] [Ord. 2010-022]

2. For Test 2, a Project must address those Links within the Radius of Development Influence on which its Net Trips are greater than three percent of the LOS E of the Link affected on a peak hour peak direction basis up to the limits set forth in Table 12.B.2.C-4 2A, LOS E Link Service Volumes AND those Links outside the Radius of Development Influence on which its Net Trips are greater than five percent of the LOS E of the Link affected on a peak hour peak direction basis up to the limits set forth in Table 12.B.2.C-4 2A, LOS E Link Service Volumes. Provided, in all cases, I-95 and Florida’s Turnpike shall be addressed only if Net Trips on these facilities are greater than five percent of the LOS E of the Link affected on a peak hour peak direction basis up to the limits set forth in Table 12.B.2.C-4 2A, LOS E Link Service Volumes. [Ord. 2006-043] [Ord. 2007-013] [Ord. 2010-022]

3. Pursuant to F.S. § 163.3180(6), any Project which is below the significance level identified in Table 12.B.2.D-9 3C, Test 1 Levels of Significance on a Link within its Radius of Development Influence that has been identified as ineligible for de minimis exception by the Florida Department of Community Affairs (DCA) must still meet the requirements of Test 1 for that Link. This Subsection shall not apply to a Project that consists of one Single Family home on an existing lot. [Ord. 2007-013] [Ord. 2008-003]
E. Phasing

Phasing may be utilized by the Applicant to establish compliance with this standard if all of the following conditions are met:

1. The proposed Project is able to comply with all the other Concurrency Requirements of the Plan in the Unincorporated Area.
2. The proposed phasing results in the proposed Project complying with the standards set forth in this Chapter.
3. The proposed phasing comports with the extent and timing of the Assured Construction.
4. The County Engineer confirms that construction is in fact Assured Construction.
5. For any Assured Construction which is to be completed by the Applicant as to the Unincorporated Area, the Applicant must agree in writing prior to approval of the Traffic Impact Study that a Condition of Approval must be imposed or an Agreement executed and sufficient Performance Security must be required; and as to the Incorporated Area either an Agreement must be executed by all parties prior to or concurrent with the issuance of the Site Specific Development Order, or the Site Specific Development Order must have as a condition the completion of the Assured Construction and timely posting of Performance Security. [Ord. 2007-013]
6. Building Permits for that portion of a Project approved with phasing which if standing alone would be the Entitlement phase of the Project may be issued notwithstanding the standards in this Chapter.
7. Conditions of the Development Order are imposed or an Agreement is entered which ensure permits are restricted in accordance with the phasing.
8. Phasing shall be controlled by the non-issuance of Building Permits. Phasing may not occur by issuing Building Permits for any of the phased units or square feet and withholding the CO, inspections, or other items subsequent to the issuance of Building Permits. Local Government may control phasing by a means prior to the issuance of Building Permits.
9. For any Project that has an approved buildout time frame of 20 years or greater (including buildout time extensions) and is required to phase to intersection improvements more than three miles from the Project site, the Level of Service at the intersection may be reevaluated in light of existing and projected turning movement volumes from the TPS Database after the Project has received Certificates of Occupancy for development generating more than 50 percent of its Approved Trips on a peak hour basis. If it is projected that the adopted LOS can be maintained at buildout of the Project, then the Project may continue to pull Building Permits past the intersection improvement phasing threshold and the improvement no longer needs to be assured. The Project shall be required to monitor the intersection on a biennial basis until two years after the final Certificate of Occupancy to determine the need for any improvements to maintain the adopted Level of Service. If subsequent monitoring shows that the originally-required intersection improvement or an alternative improvement is necessary to maintain the adopted LOS at the originally-required intersection, then the phasing condition in the Project Development Order for the intersection improvement shall be administratively amended to include the new phasing threshold, after which no Building Permits may be issued until construction of the improvement has commenced. Construction of the intersection improvement shall be assured within six months of the date of the amended Project Development Order. If, however, it is a DRI with a Project Buildout of more than five years, then construction of the improvement shall be assured no less than three years prior to the date of the new phasing threshold. [Ord. 2010-022]

F. Reliance on Assured Road Construction

If a Project is approved or phased based on Assured Construction, Building Permits shall be granted for the phase or portion of the Project approved based on the Assured Construction no sooner than the award of a contract by a governmental agency for the construction of the improvement, or commencement of construction, subject to the following:

1. If intersection improvements are required to meet Test 1 and there is a scheduled road construction Project which would incorporate all or a portion of such intersection improvements, then the County Engineer, in his/her sole and exclusive discretion, may require payment for the cost of such intersection improvement provided all other requirements of the TPS have been satisfied. In that event, upon receipt of the payment, Building Permits shall be granted for a portion of the Project which is phased to such intersection improvements. The payment shall be based on a certified engineering estimate accepted by the County Engineer.

2. If the Assured Construction is in PBC’s Five-Year Road Program Ordinance as construction, or the FDOT’s Adopted Work Program for construction, and was relied upon for the issuance of the Site Specific Development Order and the construction is subsequently deleted from the PBC Five-Year Road Program Ordinance, or the FDOT’s Adopted Work Program, Building Permits for development that was phased to that Assured Construction shall be issued, but not sooner than the end of the fiscal year construction was to commence. For purposes of this paragraph, “deleted” shall mean the elimination of the construction project, the material reduction in the scope of construction work or funding thereof (as it affects the construction project), the postponement of the construction project for more than two years (one year for projects approved prior to June 16, 1992) beyond the year the construction was originally programmed in PBC’s Five-Year Road Program or the FDOT’s Adopted Work Program. [Ord. 2007-013]

3. Three-Year Grace Period notwithstanding the requirements in this Subsection, a Project may receive a Building Permit if the required roadway improvements are in the first three years of PBC’s Five-Year Road Program, and the Project is one of the following:
   a. located in the residential exception area per Transportation Element Policy 1.2-a;
   b. located in the Glades communities, delineated as the areas in the Urban/Suburban (U/S) Tier immediately east of Lake Okeechobee, and the areas with urban densities in the rural towns of Lake Harbor and Canal Point;
   c. located in the Redevelopment and Revitalization Overlay; or,
   d. the Project is a facility that is wholly owned and operated by State or Local Government, or a public or private school as defined in the Introduction and Administration Element of the Plan.

G. Development of Regional Impact (DRI)

Development Orders for a DRI with a Project Buildout of more than five years may meet Test 1 based on Development Order conditions that phase Building Permits to the commencement of Assured Construction for the first five years of the Project and the construction of identified roadway Links in the 2020 Plan Network beyond the first five years of the Project. Any roadway improvement required beyond the first five years must be Assured Construction not less than three years before the date that the roadway improvement is required. No Building Permits within the DRI that are phased to a roadway improvement may be issued until the roadway improvement that the Building Permits are phased to is under construction.
Notwithstanding the provisions above, any Project which is a DRI, located east of I-95, which is phased to any single roadway Project costing in excess of 15 million dollars, may consider that roadway project to be under construction for the purpose of issuing Building Permits if the roadway project is in the first three years of an adopted work program. The DRI Development Order must include a condition that the roadway project must be under construction no more than three years after the CO (or functional equivalent) for the portion of the development that precipitated the need for the roadway project.

CHAPTER C TRAFFIC IMPACT STUDIES

Section 1 Traffic Impact Study

A. Scope

B. Criteria
The following criteria shall be addressed:

1. Level of Service (LOS)
The Adopted LOS for Test 1 and Test 2, as applicable, for all Major Thoroughfares within the applicable Radius of Development Influence shall be used.

2. Radii of Development Influence
The traffic study shall use the Radius of Development Influence for Test 1 and Test 2. [Ord. 2007-013]

3. Projected Buildout Period

a. Assumption
The Buildout Period of the Project shall be set forth in the Traffic Impact Study and shall be subject to the review and approval of the County Engineer, based on the following criteria: [Ord. 2007-013]
   1) The size, type, and location of the proposed Project. [Ord. 2007-013]
   2) Customary Buildout Periods for Projects of similar size, type, and location. [Ord. 2007-013]
   3) Any other factors or conditions relevant to the specific Project, including special market conditions and schedules of Assured Construction. [Ord. 2007-013]

b. Enforcement
For enforcement purposes, the Buildout Period of the Project shall be deemed complete if any of the following is true: [Ord. 2007-013]
   1) In the case of a non-residential project, final COs have been issued for interior tenant improvements for 80 percent of the gross leasable area. [Ord. 2007-013]
   2) In the case of residential projects with: [Ord. 2007-013]
      a) a Development Order issued on or before August 27, 2007; [Ord. 2007-013]
      b) a Project Buildout Condition of Approval in the Development Order; and, [Ord. 2007-013]
      c) 80 percent or more of the total lots platted not more than four years after the expiration of the Project Buildout Condition of Approval in the Development Order; the completion of the proposed project shall be issuance of Building Permits for 50 percent plus one of the total project units as set forth in the Master Plan or Site Plan as applicable. [Ord. 2007-013]
   3) In the case of residential projects with: [Ord. 2007-013]
      a) a Development Order issued on or before August 27, 2007; [Ord. 2007-013]
      b) a Project Buildout Condition of Approval in the Development Order; and, [Ord. 2007-013]
      c) less than 80 percent of the total lots platted no more than four years after the expiration of the Project Buildout Condition of Approval in the Development Order, the completion of the propose project shall be issuance of Building Permits for 80 percent of the total project units as set forth in the Master Plan or Site Plan as applicable. [Ord. 2007-013]
   4) In the case of residential projects with: [Ord. 2007-013]
      a) a Development Order issued on or before August 27, 2007; [Ord. 2007-013]
      b) that do not have a Project Buildout Condition of Approval in the Development Order; and, [Ord. 2007-013]
      c) that have received Building Permits for 80 percent of the total project units as set forth in the Master Plan or Site Plan as applicable the project shall be deemed complete for the purposes of this Section. [Ord. 2007-013]
   5) In the case of residential projects with: [Ord. 2007-013]
      a) a Development Order issued after August 27, 2007; and [Ord. 2007-013]
b) a buildout Condition of Approval in the Development Order, the completion of the proposed project shall be the issuance of Building Permits for 80 percent of the total project units as set forth in the Master Plan or Site Plan as applicable. [Ord. 2007-013]

6) For the purpose of implementing the aforementioned rules: [Ord. 2007-013]
   a) residential projects which have received Building Permits for 50 percent or less of the total project units (as set forth in the Master Plan or Site Plan as applicable) as of the date of expiration of the buildout Condition of Approval shall not receive any additional Building Permits until such time as a time extension for the buildout Condition of Approval is approved by the County Engineer based upon an approved traffic study which complies with Mandatory Traffic Performance Standards in place at the time of the request; [Ord. 2007-013]
   b) residential projects which have received Building Permits for 80 percent or more of the total project units (as set forth in the Master Plan or Site Plan as applicable) as of the date of expiration of the buildout Condition of Approval shall be considered complete; [Ord. 2007-013]
   c) residential projects which have received Building Permits for at least 50 percent plus one, but less than 80 percent, of the total projects units (as set for in the Master Plan or Site Plan as applicable) as of the date of expiration of the buildout Condition of Approval shall not receive any additional Building Permits until either: [Ord. 2007-013]
      (1) 80 percent or more of the total lots have been platted no more than four years after the expiration of the Project Buildout Condition of Approval in the Development Order, in which case the project shall be deemed complete; [Ord. 2007-013]
      (2) a time extension for the buildout Condition of Approval is approved by the County Engineer based upon an approved traffic study which complies with Mandatory Traffic Performance Standards in place at the time of the request. [Ord. 2007-013]

4. Project Phasing
   The traffic study may reflect a proposed phasing schedule for the development of the proposed Project. This schedule shall address the time at which each phase will place traffic impacts on the Major Thoroughfares within the Radius of Development Influence and shall include the following:
   a. Generation
      Project Traffic figures and assignments for each proposed phase; and
   b. Assured Construction
      Where the evaluation of phased traffic impact includes the effect of Assured Construction, sufficient information regarding the proposed construction to ensure that the roadways realistically will be constructed at the times stated.

5. Peak Hours
   Generally, the study shall address the a.m. and p.m. peak hours, total Peak Hour Traffic, unless traffic characteristics dictate that only one of the peak hours is analyzed. In some cases, the County Engineer, may still require analysis of other peak hours where indicated by accepted traffic engineering principles. The total peak hours analyzed shall not exceed two in number.
   a. The afternoon peak hour between four and seven p.m. during the Peak Season shall be studied in all cases. Generally, the morning peak hour between six and nine a.m. during the Peak Season shall be also studied, unless higher volumes occur outside of the six to nine a.m. period at the intersection are observed. In that case other peak hours outside of the six to nine a.m. period during the Peak Season shall be used.
   b. Each a.m. and p.m. peak hour shall be the highest sum of the volume on the approaches to the intersection. It shall be the highest sum of four continuous 15-minute periods.
   c. Once the a.m. and p.m. peak hours are established, the Peak Hour Net Trips shall be assigned to the Major Intersection and Link for the peak hours studied.

6. Off-Peak to Peak Season Factors
   Off-Peak to Peak Season factors shall be established by the County Engineer for various areas of PBC based upon the best available data and generally accepted traffic engineering principles. Other factors based on generally accepted traffic engineering principles shall be used to update data where newer data cannot be obtained.

7. Compliance
   The analysis must demonstrate compliance with the standards contained in Test 1 and Test 2.

8. Professional Services
   The traffic study shall be prepared, sealed, and signed by a qualified professional engineer, licensed to practice in the State of Florida and practicing traffic engineering.
9. List
A list of Municipalities within the proposed Project's Radius of Development Influence.

10. Site-Related Improvements
In addition to the Link and intersection standards and studies, all peak hour(s) turning movements (including Pass-by Trips) shall be shown and analyzed for all points where the Project’s traffic meets the Project Accessed Links and other roads where traffic control or geometric changes may be needed, as determined by the County Engineer. Recommendations shall be made concerning signalization, turn lanes, or other improvements. PBC may require such improvements in the Unincorporated Areas to ensure the safe and orderly flow of traffic.

C. Traffic Volume Components
The Traffic Impact Study shall address the Total Traffic volumes at the Project Buildout Year and the Five-Year Analysis Period as outlined for Test 1 and Test 2. [Ord. 2006-043] [Ord. 2007-013]

1. Existing Traffic (Peak Season Peak Hour Traffic)
Peak Hour Traffic, two-way and directional shall be counted by PBC during the Peak Season as defined in this Article. Where current data (collected no more than 30 months prior to submittal of the Traffic Impact Study) are not available the Project shall conduct counts or upon approval by the County Engineer may establish the Peak Hour Traffic using approved K and D factors. [Ord. 2007-013]

a. Counts
The Applicant may provide traffic counts in accordance with accepted traffic engineering principles. Counts shall be made during any continuous two-hour period on a weekday between 6:00 a.m. and 9:00 a.m. for any a.m. counts and 4:00 p.m. and 7:00 p.m. for p.m. counts. There shall be no counts on Fridays and legal holidays, unless otherwise authorized or required by the County Engineer, in accordance with accepted traffic engineering principles. All data are subject to review and acceptance by the County Engineer based upon accepted traffic engineering principles.

b. Factors
Where a Peak Season, Off-Peak Season, or directional traffic count is not readily available, the count for the Link or Intersection may be established using factors established by the County Engineer for various areas of PBC based on the best available data and generally accepted traffic engineering principles. [Ord. 2007-013]

2. Traffic Generation
Traffic generated by the Project shall be computed in the following manner:

a. Rates
To estimate daily and peak hour trips generated from the Project, trip rates published on the PBC Traffic Engineering website shall be used. If the use in the proposed Project is not listed in the PBC Traffic Engineering website Trip Generation tables, then the latest available Trip Generation Manual published by the Institute of Transportation Engineers (ITE) shall be used. A prior consultation with the County Traffic Engineer is required before using trip rates, other than that published on the PBC Traffic Engineering website. If the Applicant feels that any other method to estimate trips would provide more realistic trip estimate for the proposed Project, prior consultation and approval from the County Engineer is required. [Ord. 2014-025]

b. Local Conditions
The County Engineer shall publish, and update from time to time, trip generation rates for local conditions and, if applicable, these rates shall be used instead of the ITE rates.

c. Similar Developments
Actual traffic counts which establish the generation rate at three similar developments located in similar areas as the one proposed may be used if approved by the County Engineer in accordance with accepted traffic engineering principles. These counts shall be made for the weekdays (excluding legal holidays) as set forth in Art. 12.C.1.B.5, Peak Hours, for each site and averaged.

d. Internal Traffic
It is acknowledged that some trips generated by mixed use Projects do not exit the Project or enter the Major Thoroughfare system. Unless approved by the County Engineer, credit against the trip generation of a proposed Project shall not exceed ten percent of the gross trip generation of the Project, not including internalization between Service Station and Convenience Store uses. Additionally, credit for any individual land use within the proposed Project shall not exceed ten percent of the gross trip generation for the land use, except as provided herein. Internalization between Service Station and Convenience Store uses is established at 32 percent of the gross trip generation of the Convenience Store use.
e. **Pass-by Trips**

It is acknowledged that some trips generated by a proposed non-residential Project are from existing traffic passing the proposed Project and are not newly-generated trips. Credit against the trip generation of the proposed Project may be taken for these trips as published on the PBC Traffic Engineering website Trip Generation tables or in the latest Trip Generation Handbook, published by the Institute of Transportation Engineers (ITE), or as approved by the County Engineer. The study must detail: (1) all traffic generated from the Project; and (2) the number of Pass-By Trips subtracted from the traffic generated by the Project during the Buildout Period of the Project. Pass-by rates for uses other than those listed in the PBC Traffic Engineering website or the ITE Trip Generation Handbook, and any percentage credit proposed to be taken in excess of that mentioned in this Article, must be justified based on accepted traffic engineering principles to the satisfaction of the County Engineer as part of the required traffic study, based upon the peculiar characteristics and location of the proposed Project. Factors which should be considered in determining a different pass-by rate include type and size of land use, location with respect to service population, location with respect to competing uses, location with respect to the surrounding Major Thoroughfare system, and existing and projected traffic volumes. In no case shall the number of Pass-By Trips exceed 25 percent of Existing Traffic plus Background Traffic on the Link, unless demonstrated otherwise to the satisfaction of the County Engineer based on generally accepted traffic engineering principles. [Ord. 2014-025]

### 3. Traffic Assignment

Total Traffic shall be computed, and traffic assignments of the Net Trips made, for each Link and Major Intersection within the Projects Radius of Development Influence and Test 2 Radius of Development Influence in conformity with accepted traffic engineering principles for both Test 1, and Test 2. The assignments shall address phasing and cover the Buildout Period of the Project for Test 1 and a five-year period for Test 2. [Ord. 2006-043]

### 4. Background Traffic

a. **General**

Existing traffic volumes will likely change during the Buildout Period of the proposed Project and during the five-year Test 2 analysis period. The traffic study must account for this change in traffic based on Background Traffic during the Buildout Period of the proposed Project and five-year Test 2 analysis periods. The Projection of Background Traffic shall generally be based upon the information set forth in the TPS Database, and shall be established in accordance with the requirements set forth in this Article and accepted engineering principles. It is recognized that errors and omissions may occur in the TPS Database which may need to be accounted for in a traffic study. The traffic study shall be amended to include any correction of errors or omissions in the TPS Database, so long as either the engineer preparing the traffic study or the County notifies the other party within 30 days of the initial submission of the traffic study and the error or omission should have been included in the database prior to the date of the initial submission of the traffic study. This change in traffic shall be shown as it relates to the proposed phasing. The Projection of Background Traffic during the Buildout Period of the proposed Project and five-year Test 2 analysis period shall generally be based upon the TPS Database, and subject to the review and approval of the County Engineer, using the following criteria: [Ord. 2006-043] [Ord. 2011-016]

1) Historical growth shown on tables of County Engineer;
2) Characteristics of growth in the Radius of Development Influence;
3) Extent of existing, approved, and anticipated development in the Radius of Development Influence;
4) Types and sizes of development in the area;
5) Traffic circulation in the area;
6) Major Projects’ impact;
7) New and assured road construction.

b. **Historical Growth Tables**

Using the Historical Traffic Growth Tables of the County Engineer, the study shall forecast the change in traffic volumes based on Background Traffic within the proposed Project's Radius of Development Influence during the Buildout Period of the proposed Project. The Historical Growth Tables shall be based on historical daily traffic volumes. However, this change shall be applied on an average peak hour basis and a Peak Season, Peak Hours, Peak Direction basis if optional analyses are selected. The effect of residential and non-residential projects shall be considered in projecting the increase or decrease in traffic volumes so as to ensure that there is no double counting or omission in Background Traffic. In using the Historical Growth Tables, engineering
judgment shall be used to take into account special circumstances such as the opening of a parallel road or a high traffic generation that may distort the growth trend. For Projects with a lengthy buildout time (five years or more) an area-wide growth rate using a number of locations in the tables may be appropriate. No growth rate less than zero percent may be used without approval of the County Engineer when the growth rate is a negative. Zero percent shall be used unless approved by the County Engineer. [Ord. 2006-043] [Ord. 2007-013]

c. TPS Database
Using the TPS Database, all traffic from the unbuilt portion of Projects which have received a concurrency reservation prior to the County Engineer's approval of the proposed Project's traffic study which will add significant trips to any Link within the proposed Project's Radius of Development Influence during the Buildout Period of proposed Project shall be specifically accounted for in projecting Traffic for Test 1. For Major Intersections, the TPS Database shall specifically account for all Project Traffic volumes if at least one approach to the intersection has a Project Traffic volume greater than or equal to one percent of the adopted LOS D. No double counting of trips shall occur. For Test 2, only the traffic generated from the unbuilt portions of the Projects as set forth above which are projected to be built during the Five-Year Analysis Period shall be considered. [Ord. 2005-002] [Ord. 2006-043] [Ord. 2009-040]

5. Assured Construction
Assured Construction shall be considered completed as scheduled at the time of submittal of the Traffic Impact Study for the purpose of preparation of the study. Whether it is in fact Assured Construction and the timing of the Assured Construction shall be subject to the confirmation of the County Engineer. The Traffic Impact Study shall specifically identify the need for phasing based on Assured Construction. [Ord. 2007-013]

Section 2 Conditions
The Concurrency Reservation or Site Specific Development Order shall contain such conditions as are necessary to ensure compliance with this Article. The Local Governments, including the legislative and administrative boards, the DRO, and officials, issuing Concurrency Reservations or Site Specific Development Orders are authorized to, and shall, impose such conditions. The Local Governments including the legislative and administrative boards, the DRO, and officials shall require where necessary to ensure compliance with this Section that an Agreement be executed prior to the issuance of the Site Specific Development Order. Performance Security shall be required to ensure compliance with the conditions or performance under the Agreement or Condition of Approval. The Agreement or Conditions of Approval shall be binding on the owner, its successors, assigns, and heirs; and it, or notice thereof, shall be recorded in the Official Records of the Clerk of the Circuit Court in and for PBC, Florida.

CHAPTER D PROCEDURE

Section 1 Required Submission of Impact Study

A. Application Procedure
Prior to acceptance of any application for a Site Specific Development Order in the Unincorporated Area, or issuance of a Site Specific Development Order in the Incorporated Area, a non-refundable application fee established by the BCC from time to time to defray the actual cost for processing the application, shall be submitted along with the Traffic Impact Study or documentation sufficient to establish that the application is not subject to the standards of this Article.

In order to receive a time extension pursuant to Art. 2.E, Monitoring of Development Orders (DOs) and Conditions of Approval, the Applicant shall be required to submit either: [Ord. 2007-013]
1. A new Traffic Impact Study that meets the standards of this Article in effect at the time the extension is requested; or [Ord. 2007-013]
2. Documentation sufficient to establish that the Project with the additional time provided by the extension meets the standards of this Article in effect at the time the extension is requested. [Ord. 2007-013]

B. Review by County Engineer
The County Engineer or Municipal Engineer, as applicable, shall review the information submitted pursuant to this Article and determine whether the proposed Project complies with this Article. In the Unincorporated Area the County Engineer shall coordinate with the Planning Division whether the Site Specific Development Order meets the other Concurrency Requirements of the Plan. The procedures set forth in the Adequate Public Facilities Chapter, shall control; except as to any appeals from this Article, in which
case Art. 12.F, Appeals, of this Article shall control. Nothing herein or in the Adequate Public Facilities Chapter shall preclude direct informal communication between the County Engineer and the Applicant or his agents. In the Unincorporated Area, a statement that an application for a Site Specific Development Order is being considered shall be sent to any Municipality within the proposed Project's Radius of Development Influence 30 days prior to the issuance of the Site Specific Development Order for all proposed Projects generating more than 100 Gross Peak Hour Trips. The statement shall be sent by U.S. Mail, or hand delivered.

C. No Study Needed

1. Residential
   New residential Projects generating fewer than or equal to 20 Gross Peak Hour Trips based on PBC’s adopted trip generation rates shall not be required to submit a Traffic Impact Study. The Net Trips shall be distributed over the Major Thoroughfare system by the County Engineer in accordance with generally accepted traffic engineering principles.

2. Non-Residential
   Non-residential Projects generating less than or equal to 20 Gross Peak Hour Trips based on PBC’s adopted trip generation’s rates shall not be required to submit a Traffic Impact Study. The Net Trips shall be distributed over the Major Thoroughfare system by the County Engineer or in accordance with generally accepted traffic engineering principles.

3. Amendments
   Projects generating less than or equal to 20 Gross Peak Hour Trips based on PBC’s adopted trip generations rates shall not be required to submit a Traffic Impact Study for an amendment, provided the total Project, including the amendment, does not exceed 20 Gross Peak Hour Trips. The Net Trips shall be distributed over the Major Thoroughfare system by the County Engineer in accordance with generally accepted traffic engineering principles.

Section 2 Review of Traffic Impact Study

A. County Engineer Review
   On all proposed Projects having more than 100 Gross Peak Hour Trips, the County Engineer shall have sole authority for reviewing Traffic Impact Studies for purposes of determining compliance with this Article.

B. Municipal Review
   On all other proposed Projects the Municipality shall perform such review unless the Municipality provides in writing, delivered to the County, that the Municipality elects to require review by the County Engineer. If the Municipality elects to perform the review, it shall be done by a Municipal Engineer. The review shall be in accordance with the requirements of this Article. In the case of Municipal review, 30 days prior to approval of the application for the Site Specific Development Order, the Traffic Impact Study, along with the determination of the reviewing traffic engineer, shall be sent to the County Engineer, c/o Traffic Division, 2300 North Jog Road, West Palm Beach, Florida, 33411. A statement that the Municipality is considering an application for a Site Specific Development Order shall also be sent to any Municipality within the Project's Radius of Development Influence involved 30 days prior to issuance of the Site Specific Development Order for all proposed Projects generating more than one 100 Gross Peak Hour Trips. All documents under this Article shall be sent by U.S. Mail, or hand delivered.

C. Prohibitions
   1. In the case of all Site Specific Development Orders issued by the DRO, no application shall be certified for inclusion on the DRO agenda if issuance of the Site Specific Development Order would be prohibited by this Article.
   2. In the case of all other Site Specific Development Orders in the Unincorporated Area, no application shall be accepted if issuance of the Site Specific Development Order would be prohibited by this Article.
   3. In all cases in the Unincorporated Area if the Site Specific Development Order does not meet the other Concurrency Requirements of the Plan, no application shall be certified for inclusion on an agenda of a reviewing body or accepted, as the case may be, except as otherwise provided by Art. 2.F, Concurrency (Adequate Public Facility Standards).
   4. In the case of all Site Specific Development Order in the Incorporated Area, no Site Specific Development Order shall be issued if such issuance would be prohibited by this Article. In no case shall the Site Specific Development Order be issued prior to 30 days following delivery of the notice in accordance with Art. 12.D.2.B, Municipal Review.

D. Appeals
   Determinations of the County Engineer or Municipal Engineer must be in writing and any denial shall state the reasons thereof. Determinations of denial may be appealed pursuant to Art. 12.F, Appeals.
Section 3 Approval of Traffic Impact Study

When the County Engineer has found the proposed Traffic Impact Study to comply with the requirements of this Article, the County Engineer shall issue an approval letter to the Applicant with copies to the appropriate local governing bodies. This approval letter shall contain, at a minimum, a summary of the project, its impacts on the surrounding roadway network, and any Conditions of Approval necessary to ensure compliance with this Article. The approval letter shall be valid no longer than one year from date of issuance, unless an application for a Site Specific Development Order has been approved, an application for a Site Specific Development Order has been submitted, or the approval letter has been superseded by another approval letter for the same property. [Ord. 2007-013] [Ord. 2009-040]

CHAPTER E ENTITLEMENT

Section 1 General

The BCC recognizes that a reasonable and beneficial economic use of property should be afforded a Property Owner. This Section is intended to implement the provisions in the Plan that allows a reasonable and beneficial economic use of property while minimizing trip generation.

Section 2 Unincorporated Area

As to the Unincorporated Area, a Site Specific Development Order may be issued for a Project not exceeding entitlement density or intensity set forth in the Plan, provided the order is otherwise consistent with the requirements of the Plan and land development regulations of PBC.

Section 3 Incorporated Area

As to the Incorporated Area, a Site Specific Development Order may be issued for a Project not exceeding entitlement density or intensity as set forth in the Plan. As to residential land uses it shall be based on the densities set forth in Figure 2 of the Land Use Element of the Plan, that correspond to the Municipal density in its Comprehensive Plan, with any density exceeding 18 dwelling units per acre receiving the entitlement level set forth in the five to 18 dwelling unit-per-acre range. As to commercial and industrial, entitlement shall be two and one-half percent of the maximum square footage of floor area allowed under the land use category or zoning district of the Municipality.

Section 4 Discretion of Board

The BCC may exceed the limitations set forth in the Plan upon a determination by the Board that the limitations permitted by the Article would likely constitute a taking of land for public use for which compensation would have to be paid pursuant to law. This Section may only be exercised upon the special petition of the Property Owner to the BCC which affirmatively demonstrates by substantial competent evidence that no other economically-feasible land use which would generate less traffic for the subject property is available because of: (1) this Article; (2) the nature of the land uses in the area; (3) the size and configuration of the property; and, (4) other relevant factors. The BCC shall receive the advice of the County Attorney and the County Administrator, and any other person it deems appropriate in exercising its discretion under this Section. If the subject lot is in the Incorporated Area, the BCC shall consider the advice, if any, of the Municipality in which the lot is located.

CHAPTER F APPEALS

Section 1 Board

Except as specifically provided in this Article, appeals from the decisions of the County Engineer or Municipal Engineer, and from all traffic engineering decisions made pursuant to this Article, shall be taken to the TPSAB. Appeals may be brought by the Applicant, any Municipality within the Project's Radius of Development Influence, and the County. The TPSAB shall consist of the Director of the MPO, a professional traffic engineer employed by a Municipality as a traffic engineer, a professional traffic engineer employed by another Florida county, a professional traffic engineer employed by the FDOT, District IV, and a professional traffic engineer who generally represents developers. Any individual serving on the TPSAB shall not be a person who participated in the decision being appealed, or who works for or is retained by a party to the appeal or a person who would be directly affected by the matter being appealed or the proposed Project to which the appeal relates. [Ord. 2011-016]
Section 2  Request/Notice

The appeal shall be requested in writing within 30 days of the decision of the County Engineer or Municipal Engineer, as applicable. The written request for the appeal shall state the grounds for objection. The appellant shall be given written notice of the date, time, and place of the TPSAB’s consideration of the appeal. The appeal shall be limited to the issues raised in the objection.

Section 3  Hearing

A. Burden of Proof
The appellant shall present all relevant information to the TPSAB. The appellant shall have the burden of affirmatively demonstrating that the decision of the County Engineer or Municipal Engineer was in error. The County Engineer or Municipal Engineer shall be entitled to present information.

B. Reimbursement
Members shall serve without compensation but shall be reimbursed in accordance with PBC rules and regulations.

C. Quorum
A quorum shall consist of three members and a decision shall be made by affirmative vote of a majority of the members.

D. Decision
The TPSAB shall base its decision on the requirements of this Section and accepted traffic engineering principles. It shall state the reasons for the decision. A decision shall be rendered within 60 days of receipt of the written request for appeal.

Section 4  Appeal from the TPSAB

The decision of the TPSAB may be appealed by Petition for Writ of Certiorari to the Fifteenth Judicial Circuit Court by either the Applicant or a Local Government within 30 days of the decision. Consideration shall be limited to the record established before the TPSAB.

Section 5  No Impairments of Judicial Rights or Remedies

Nothing in this Section shall be construed as a limitation on the rights or remedies of any person. Appeals from decision of persons other than the County Engineer or Municipal Engineer, and traffic engineering decisions, shall be by appropriate action to a court of competent jurisdiction, except as provided otherwise by law, including this Section.

CHAPTER G  CONSTRAINED FACILITIES

Section 1  Purpose and Intent

It is recognized by the BCC that some Links and Major Intersections are not planned to be widened to width, laneage, or geometrics that can accommodate Traffic from the density/intensity and location of land uses at the Generally Adopted LOS. The BCC may determine that additional traffic impacts from new development should be permitted on these Constrained Links and Major Intersections which are improved (or presumed to be improved under Test 2) to their ultimate width, laneage, and geometrics as contemplated by the Thoroughfare R-O-W Identification Map, Future Roadway System by Number of Lanes Map, and/or MPO Cost Feasible Long-Range Plan. In some cases, the BCC may designate a Link or Major Intersection as a temporary CRALLS in order to allow development to occur prior to a planned roadway improvement project. When the BCC makes a determination that a reduced LOS is appropriate on a Constrained Facility, it shall be designated a Constrained Roadway at Lower Level of Service (CRALLS). A County amendment to consider a CRALLS designation will rely upon, as appropriate, the data and analysis provided by the Local Government requesting the CRALLS designation. This Section establishes the procedures by which a proposed CRALLS amendment is reviewed in order to ensure an appropriate level of review. [Ord. 2011-016]

Section 2  Procedure

A. General
Constrained Facilities shall not automatically receive a reduced LOS. Determinations of whether a reduced LOS shall be set on a Constrained Facility, and what that LOS should be, shall be made by the BCC as
part of a text amendment to the Transportation Element of the Comprehensive Plan. The BCC may adopt a reduced LOS and shall specifically establish the LOS on the Constrained Facility, if reduced. The CRALLS may be available for all Project Applicants to utilize, or it may be limited for use by a Project or Projects specified by the BCC. Implementation of mitigation strategies shall be a requirement for use of the CRALLS by a Project. Any proposed reduction in the LOS on a SIS or FIHS Roadway shall be reviewed and approved by the State if required by Florida law, and the applying Local Government shall be responsible for coordinating with and obtaining State approval that may be required. [Ord. 2011-016]

**B. Letter of Intent**

Local Governments shall request a reduced LOS on a Constrained Facility by letter of intent up to 60 days and no later than 30 days prior to the window closing date for the applicable Amendment Round. At least ten days prior to delivering the letter of intent, the Local Government shall provide written notice to the County Commissioner for the Commission District in which the Facility is located. Proof of such written notice provided to the District Commissioner, and the letter of intent, shall be delivered to the County Engineer and Planning Director and shall contain supporting information relating to the Determination Criteria of this Section. Upon receiving the letter of intent, the Planning Director shall schedule a pre-application conference prior to the Planning Commission meeting at which initiations for the next Comprehensive Plan Amendment Round will be discussed. [Ord. 2011-001] [Ord. 2011-016]

C. Pre-Application Conference

Representatives from the following agencies shall be invited to attend the pre-application conference: (1) Local Government making application; (2) County including the Planning Division and County Engineering; (3) FDOT, District IV; (4) Treasure Coast Regional Planning Council; (5) MPO; and, (6) Other Impacted Local Governments as determined by the County Engineer. Other interested governmental agencies may also attend the pre-application conference at their option. The purpose of the pre-application conference shall be to identify the issues for consideration, the likely impact of the proposal, the assumptions and changes made in socio-economic data (including justification for such), the application requirements (including which should be waived, if any), and to coordinate review. [Ord. 2011-016]

D. Amendment Review

Within 30 days after BCC initiation, the applying Local Government shall, unless it has already done so, submit a complete CRALLS application, including data and analysis which addresses the Determination Criteria listed herein. The level of data and study needed for existing and Future Land Use to review an application for a CRALLS designation shall be determined in the pre-application conference. The decision shall be made by the County Engineer based upon the Major Thoroughfare Links and Major Intersections involved, (whether they are or will be Collectors, minor Arterials, or principal Arterials), the extent of the proposed lowering of the LOS, the size of the area affected, the extent to which the affected area is built out to its ultimate FLU, and the amount and quality of existing data and planning. The application shall be forwarded to all affected Local Governments, the County Engineer, the FDOT, District IV, in the case of State Highways, and the MPO for review. The advice of the MPO shall be considered by the PLC and the BCC when considering an application for a reduced LOS. [Ord. 2011-016]

**Section 3 Determination Criteria**

In determining whether a Constrained Facility shall have a reduced LOS and, if so, what that LOS should be, and any conditions that shall be imposed, the Applicant, PLC, and the BCC shall consider the following public policy criteria. The Application and Amendment staff report shall include an analysis of the proposed CRALLS against these criteria: [Ord. 2011-001] [Ord. 2011-016]

A. Cause of the constraint; e.g., whether the laneage or geometrics are insufficient to accommodate projected traffic as a result of concerns relating to physical limitations, fiscal limitations, environmental areas, aesthetics, historically-significant development, or the character-of-area or neighborhood and the impact of adding lanes or changing the geometrics on such concerns. [Ord. 2011-016]

B. When more than one cause is identified, the extent to which each contributes to the constraint shall be considered.

C. Existence of, or proposed, “reliever” facilities and the proximity and continuity of such, and the extent to which they presently, or are projected to, relieve the Constrained Link.

D. The existing and projected volume-to-capacity ratio given the adopted FLUE of Local Governments’ Comprehensive Plans.

E. The extent of vested Development Orders, and non-vested land use, zoning district designations, or Development Orders.
F. The impact on the ability of Local Governments to allow development consistent with their comprehensive plans; and the interjurisdictional compatibility of the various Local Government Comprehensive Plans as related to the Constrained Facility.

G. The practicability of adjusting land uses, zoning districts, and uses therein.

H. The impact on the ability of the overall Major Thoroughfare system in the area affected to function at the Generally Adopted LOS.

I. The length of the Constrained Link(s).

J. The option of modifying the Plan, including the Thoroughfare R-O-W Identification Map, or other regulations to add lanes, improve geometrics or reliever facilities.

K. Whether modifications can be made that would add capacity, and how much capacity would be added.

L. A description of mitigation measures required to be implemented by the Project(s) that would benefit from the proposed CRALLS. These include vehicular and non-vehicular travel options to alleviate traffic congestion that is anticipated to result from exceedance of the adopted LOS on the CRALLS Link or Major Intersection. [Ord. 2011-016]

CHAPTER H MODIFICATION OR ELIMINATION OF LINK OR INTERSECTION

Section 1 Application to Modify or Eliminate Adopted Link or Intersection

A. Who May Apply
Only a Local Government may apply to the BCC to amend the adopted width, proposed geometrics, or number of lanes of, or to eliminate a Link or Major Intersection improvements. [Ord. 2011-016]

B. Contents
The application shall contain a detailed and comprehensive traffic evaluation of all affected Links and Major Intersections, taking into account existing, committed, and FLU development. [Ord. 2011-016]

C. Criteria
The following criteria shall be considered by the BCC in considering whether a Link's lanes, proposed geometrics, a Major Intersection's proposed geometrics, or the R-O-W width adopted in the Plan should be amended or a Link should be eliminated: [Ord. 2011-016]

1. Whether improvements are proposed to the Link or Major Intersection under consideration. [Ord. 2011-016]

2. Whether improvements are proposed to reliever Links or Major Intersections and the extent that such a reliever would impact traffic on the Link under consideration. [Ord. 2011-016]

3. The physical characteristics of the property adjacent to the Link or Major Intersection under consideration. [Ord. 2011-016]

4. The character of the area businesses or neighborhood adjacent to the Link or Major Intersection under consideration, and the extent of impact on such. [Ord. 2011-016]

5. The projected cost of adding additional capacity to the Link or Major Intersection, or reliever facilities and the amount of capacity that would be added. [Ord. 2011-016]

6. The existing and projected volume-to-capacity of the Link and the surrounding Major Thoroughfares before and after the proposed modification. [Ord. 2011-016]

7. The projected revenue for improving the Major Thoroughfare system and the likely priority of various improvements to the Major Thoroughfare system. [Ord. 2011-016]

8. Environmental character and the extent of impact on such. [Ord. 2011-016]

9. Historical significance and the extent of impact on such. [Ord. 2011-016]

10. Aesthetics and the extent of impact on such. [Ord. 2011-016]

D. Procedure/Extraordinary Vote
1. When an application is made to eliminate a Link, narrow the adopted width of a Link, modify the proposed geometrics of a Link, or Major Intersection, in a manner that would reduce capacity, or reduce the number of lanes in the Plan, and that elimination, narrowing, modification, or reduction would materially impede: (1) the ability to achieve the Adopted LOS on the particular Link or Major Intersection, or the Major Thoroughfare system; or (2) the ability of Local Governments to allow development consistent with their FLU Elements of their plans; the BCC shall require a review and determination of whether a reduced LOS (CRALLS designation) should be set on the Link or other Links before the BCC's eliminating the Link, narrowing the R-O-W width, modifying the proposed geometrics, or reducing the number of lanes. In such a case, eliminating the Link, narrowing the width or reducing the number of lanes shall require a majority-plus-one vote of the members of the BCC. No
elimination of the Link, narrowing of the width, or modifying of the proposed geometrics in a manner that would reduce capacity, or reducing the number of lanes on a Link shall be effected until any necessary adjustments are made to: (1) the Major Thoroughfare system (including capacity improvements or lower the levels of service, as appropriate); (2) or the land uses have been made to accommodate the elimination, narrowing, modification, or reduction. [Ord. 2011-016]

2. If it is clear that no impediment to: (1) achieving the adopted LOS; or (2) Local Governments allowing development consistent with the FLUE of their plans would result, the BCC may, by a majority vote of its members narrow the adopted width, modify the proposed geometrics of a Link, or Major Intersection, or reduce the number of lanes in the Plan without PLC review. Nothing herein shall require CRALLS review, application to the PLC, or notice to any Local Government for minor modifications to the proposed Major Thoroughfare system which do not reduce capacity of the Link, Major Intersection, or Major Thoroughfare System. Nothing herein shall require PLC review for waivers of expanded intersection requirements or R-O-W protection pursuant to Policy 2-d of the Transportation Element of the Plan. [Ord. 2011-001] [Ord. 2011-016]

CHAPTER I  COASTAL RESIDENTIAL EXCEPTION

Section 1  Intent

The Coastal Residential exception to the LOS requirements of this Article promotes urban infill and deters urban sprawl. It also promotes redevelopment. It provides closer proximity of residential uses to commercial uses and employment bases, thereby reducing the impact on the overall Major Thoroughfare system, pollution, the use of fossil fuels and other resources, and the travel time and needs of the public. Because it applies only to the Incorporated Area, it also promotes annexation of Unincorporated Areas. Therefore, the public benefits of an uncrowded and efficient road system promoted by this Article are also promoted generally (but not necessarily on a specific Link or Major Intersection) by the creation of a Coastal Residential exception to the LOS requirements of this Article. The Coastal Residential exception may also result in more integration in the PBC School system.

Section 2  Creation

Because of these public benefits, there is hereby established pursuant to Policy 1.2-a of the Transportation Element of the Plan a Coastal Residential exception which shall be within the Incorporated Area east of I-95, north of the Broward County line, west of the Atlantic Ocean (excluding the barrier island), and south and east of a boundary from I-95 along PGA Boulevard to Prosperity Farms Road, then north to the western prolongation of the northern boundary of Juno Isles, then east to a point 600 feet west of U.S. Highway One, then north to the northern boundary of Juno Beach, then east to the Atlantic Ocean. It shall also be the Incorporated Area bounded on the south by the north boundary of the Jupiter Hospital, and its eastern and western prolongation between the Atlantic Ocean and Military Trail; bounded on the west by Military Trail and its northern prolongation to the North Fork of the Loxahatchee River, then meandering northwest along the northeast shore of the North Fork of the Loxahatchee River to the Martin County Line; bounded on the north by the Martin County Line; and, bounded on the east by the Atlantic Ocean, excluding the barrier island. It shall allow such residential Projects, and the residential portion of mixed use Projects that otherwise meet the standards of this Article, in Incorporated Areas to receive a Site Specific Development Order notwithstanding the standards of this Article. The Coastal Residential Exception shall not apply to conditions or limitations placed on residential Projects or the residential component of mixed use projects that are located within the boundaries of a Transportation Concurrency Exemption Area as designated pursuant to Art. 12.L, Transportation Concurrency Exemption for Projects That Promote Public Transportation. [Ord. 2005-002]

Section 3  Traffic Impact Study Information

The Applicant shall submit a traffic study providing Traffic Generation, Assignment throughout the Test 1 Radius of Development Influence, and Projections of future traffic at the site access. Traffic Impact Studies for mixed use Projects must provide separate distributions and assignments for the residential and non-residential components.

Section 4  Municipal Levels of Service

Nothing in this Article shall be construed as derogating the requirement under F.S. ch. 163 that Municipalities set the LOS on PBC and State roads consistent with the PBC and State LOS to the maximum extent feasible. [Ord. 2019-005]
CHAPTER J   TRANSPORATION CONCURRENCY MANAGEMENT AREAS (TCMA)

Section 1   Intent

The purpose and intent of this optional alternative transportation concurrency approach is to promote infill development within selection portions of urban areas in a manner that supports the provision of more efficient mobility alternatives, including public transit. As a coordinated approach to land use and transportation development, the use of an area-wide LOS standard and an accommodation and management of traffic congestion may be employed. A TCMA is a compact geographic area within existing or proposed multiple, viable alternative travel paths, or modes for common trips.

Section 2   Area-Wide Level of Service

An area-wide LOS standard may be established for specific facilities in common corridors within a TCMA. The area-wide Level of Service standard must be maintained, as a basis for the issuance of Development Orders and permits within the TCMA. The area-wide LOS standard may only be established for facilities on common corridors with similar functions, serving common origins and destinations.

A. The designation of a TCMA and the establishment of an area-wide LOS standard must be supported by data and analysis which:
   1. Demonstrate that the TCMA is compatible with and furthers the various portions and Elements of the Plan. When in a Municipality, the data and analysis shall also demonstrate that the TCMA is compatible with and furthers the various portions and elements of the Local Government's Comprehensive Plan.
   2. Provide justification for the size and boundary of the TCMA for consistency with the purpose of promoting the stated purpose of a TCMA.
   3. Demonstrate that the TCMA contains an integrated and connected network of roads and provides multiple, viable alternative travel paths, or modes for common trips.
   4. Demonstrate the basis for establishing the area-wide LOS standard and determine the existing and projected transportation facilities and services requirements that will support the requested area-wide LOS standards.
   5. Demonstrate that the area-wide LOS standard and other transportation services and programs will support infill development and redevelopment.
   6. Demonstrate that the planned roadway improvements and other transportation services and programs will accomplish mobility within and through the TCMA. The programs may include, but not be limited to Transportation System Management (TSM), Transportation Demand Management (TDM), and incentives to promote public transit such as parking policies and provisions for intermodal transfer.
   7. Identify the impacts on other Local Governments, if any.

B. The Local Government shall establish and maintain an internally consistent transportation, land use, and capital improvement planning program. These programs shall be sufficient to meet and maintain the established area-wide LOS standard.

Section 3   Procedure

A. At least 30 days prior to a Local Government submitting a Plan Amendment for a TCMA, a pre-application conference shall be held. This pre-application meeting will be coordinated with the Planning Director. It will include representatives from the Local Government initiating the Plan Amendment, the County Traffic Division and Planning Division, the MPO, the FDOT, District IV, and the Treasure Coast Regional Planning Council.

B. Another conference shall be held with the representatives identified above within 30 days of receipt by the initiating Local Government of the State planning agency’s Objection, Recommendation and Comments Report.

C. The TCMA shall not become effective until the following actions are taken:
   1. The BCC finds the designation of the TCMA to be consistent with the Plan.
   2. The BCC finds the area-wide LOS standard to be appropriate, and can be maintained.
   3. The BCC adopts an amendment to the Plan establishing the TCMA.
   4. A Final Order is issued by the DCA finding the amendment or amendments in compliance.
CHAPTER K TRANSPORATION CONCURRENCY EXCEPTION AREAS (TCEA)

Section 1 Intent

The purpose and intent of this flexible transportation concurrency option approach is to reduce the adverse impact transportation concurrency may have on urban infill development and redevelopment and the achievement of other goals and policies of the State comprehensive plan, such as promoting the development of public transportation. Under limited circumstances, it allows exceptions to the standards of this Article in defined urban areas. The exceptions provide flexibility for concurrency management in order to encourage the application of a wide range of planning strategies that correspond with the local circumstances of a specific geographic area. The exceptions apply to all land uses and development and types of facilities within the expressly excepted area.

Section 2 Area Types

A Local Government must designate a TCEA in its comprehensive plan. A TCEA will be allowed only in one of the following areas:

A. A specific geographic area delineated in the Local Government Comprehensive Plan for urban infill development. Such an area shall meet the following requirements:
   1. The area shall contain no more than ten percent developable vacant land. Developable vacant land shall not include water bodies and land designated for conservation use, natural reservations, public road R-O-W, public recreation sites, or other areas or uses designated in the Local Government's Comprehensive Plan as unavailable for development.
   2. For areas where residential uses are the dominant types of uses, comprising greater than 60 percent of the developed land, the average residential density shall be at least five dwelling units per gross residentially developed acre of land.
   3. For areas where non-residential uses are the dominant types of uses, comprising greater than 60 percent of the developed land, the average non-residential intensity shall be at least a FAR of 1.0 per gross non-residentially developed acre of land.
   4. If neither residential nor non-residential uses comprise more than 60 percent of the developed land, then both the existing residential uses and non-residential uses shall meet the appropriate density and intensity criteria prescribed in Art. 12.K.2.A.2 and Art. 12.K.2.A.3 above. The term “gross developed acre” shall include all uses associated with the predominant land use including roads, parking, drainage, open space, landscaping, and other support facilities.

B. A specific geographic area delineated in the Local Government Comprehensive Plan for urban redevelopment. The urban redevelopment area must be within an urban infill area or within an existing urban service area that does not contain more than 40 percent developable land.

C. A specific geographic area delineated in the Local Government Plan for downtown revitalization within the designated central business district.

Section 3 Criteria

A. The designation of a TCEA must be supported by data and analysis which:
   1. Demonstrate that the TCEA is compatible with and furthers the various portions and Elements of the Plan. When in a Municipality, it shall also demonstrate that the TCEA is compatible with and furthers the various portions and elements of the Local Government's Plan.
   2. Provide justification for the size and boundary of the TCEA for consistency with the purpose of promoting the stated purpose of a TCEA.
   3. Identify the impacts on other Local Governments, if any.

B. To implement the TCEA, the Local Government's Comprehensive Plan must contain guidelines and policies which specify programs to meet the transportation needs of the TCEA. The guidelines may contain a wide range of strategies that include: timing and staging plans, parking control and pricing policies, TSM, TDM, incentives to promote public transit, and the utilization of creative financing tools for the provision of transportation services and facilities.

C. The guidelines and policies and programs to implement the TCEA must demonstrate by supporting data and analysis, including short and long-range traffic analysis, that consideration has been given to the impacts of the proposed development within the TCEA on the FIHS and SIS. [Ord. 2009-040]
Section 4 Procedure

A. At least 30 days prior to a Local Government transmitting a Plan Amendment for a TCEA to the DCA, a pre-application conference shall be held. This pre-application meeting will be coordinated with the Planning Director. It will include representatives from the Local Government initiating the Plan amendment, PBC Traffic Division and Planning Division, the MPO, the FDOT, District IV, and the Treasure Coast Regional Planning Council.

B. Another conference shall be held with the representatives identified above within 30 days of receipt by the initiating Local Government of the State planning agency's Objection, Recommendation and Comments Report.

C. The TCEA shall not become effective until the following actions are taken:
   1. The BCC finds the designation of the TCEA to be consistent with the Plan.
   2. The BCC adopts an amendment to the Plan establishing the TCEA.
   3. A Final Order is issued by the DCA finding the amendment or amendments in compliance.

Section 5 Traffic Impact Study Information

A traffic study providing Traffic Generation, Assignment throughout the Test 1 Radius of Development Influence and Projections of future traffic at the site access must be submitted to PBC for proposed Project within the limits of a TCEA.

CHAPTER L TRANSPORTATION CONCURRENCY EXEMPTION FOR PROJECTS THAT PROMOTE PUBLIC TRANSPORTATION

Section 1 Intent

The purpose and intent of this Chapter is to allow a Local Government to grant an exception from the concurrency requirements for transportation facilities for Projects which promote public transportation. F.S. § 163.3164(28) defines Projects that promote public transportation as those that “directly affect the provisions of public transit, including transit terminals, transit lines and routes, separate lanes for the exclusive use of public transit services, transit stops (shelters and stations), office buildings or projects that include fixed-rail or transit terminals as part of the building, and projects which are transit oriented and designed to complement reasonably proximate planned or existing public facilities.” Under limited circumstances, it allows exceptions to the standards of this Article in defined urban areas. The exception requires that Projects establish meaningful facilities and programs that promote public transportation.

Section 2 Project Types

This exception is limited to Projects that meet the requirements of Art. 12.L.2.A and Art. 12.L.2.B, below:

A. The Project must be determined to be a Project which promote economic development through job creation. At a minimum, the Project shall be 200 acres in size, and create, at Project Buildout, not less than 5,000 jobs at the Project site.
   1. For a Project located in the Unincorporated Area, the BCC shall make a determination that the jobs created shall be of a type and within a salary range that promote economic development.
   2. For a Project located in the Incorporated Area, the BCC shall make a determination that the jobs created shall be of a type and within a salary range that promote economic development.

B. The Project must be developed, owned, and operated by a not-for-profit agency. The Project and agency shall provide essential public services. At a minimum, the Project shall be 20 acres in size, and create, at build-out, not less than 2,000 jobs at the Project site.
   1. For a Project located in the Unincorporated Area, the BCC shall make a determination that the Project and agency provide essential public services.
   2. For a Project located in the Incorporated Area, the BCC and the Municipal Commission shall make determinations that the Project and agency provide essential public services.

C. A Project that meets the requirements of Art. 12.L.2.A or Art. 12.L.2.B above may be a mixed use Project, incorporating residential and/or commercial components. However, in no event shall residential and/or commercial retail uses combine to comprise more than 45 percent of the square footage of the GFA.
Section 3  Project Location

This exception is limited to Project that meet the following location criteria:

A. The Project shall not be located within the Coastal High Hazard Area.
B. All Projects must be located within PBC’s U/S Tier and be adjacent to (i.e., abutting or separated only by other public or governmental R-O-W) the Tri-County Commuter Rail Authority line, or be adjacent to a street which is served by Palm Tran.

Section 4  Required Provisions to Promote Public Transportation

All Projects shall, at a minimum, provide all of the following transportation amenities:

A. The Project shall provide a site to Tri-Rail at the Project site, adjacent to the Tri-Rail tracks, for a station platform, ticket booth, and parking for at least 400 automobiles. When a Project is not adjacent to Tri-Rail, it shall provide a bus stop facility capable of handling two or more Palm Tran buses at a time with a covered waiting area of sufficient size to accommodate at least two percent of its employees.
B. The Project shall provide a financial incentive in the form of a subsidy of at least 50 percent of the annual ticket cost to at least five percent of the persons employed at the Project site for riding Tri-Rail and/or Palm Tran to and from the Project site for a minimum of 200 working days per year. As an alternative, the development may provide equivalent funds directly to Palm Tran to subsidize this service.
C. The Project shall provide a ridesharing information service to persons employed at the Project site.
D. The Project shall provide emergency transportation to those employees using mass transit, ridesharing, or other alternative modes of transportation (i.e. bicycles or pedestrian).
E. The Project shall apply access management techniques along all roadways fronting the Project.
F. The Project shall provide external pedestrian access to the Project, as well as an internal pedestrian system, accommodating persons with disabilities, as well as persons using alternative modes of transportation to the automobile.

Section 5  Required Traffic Study

Projects utilizing this exemption will submit a traffic study that is consistent with all of the provisions of this Article. They shall also provide a transportation analysis that illustrates their impact on the FIHS and SIS to ensure that those impacts are considered in the approval process. [Ord. 2009-040]

Section 6  Required Roadway Improvements

Projects utilizing this exemption may be required to provide roadway, intersection, and/or signalization improvements to minimize their impact on the road network. These improvement will be determined by the County Engineer.

Section 7  Parking

Projects meeting the above requirements may apply for parking reductions pursuant to applicable codes.

CHAPTER M  FIVE-YEAR ROAD PROGRAM

Section 1  Intent

The BCC of PBC Florida finds that the 1990 Traffic Performance Code adopted by Art. 12.A. General, through Art. 12.L. Transportation Concurrency Exemption for Projects That Promote Public Transportation is premised on PBC’s commitment to adhere to and implement the adopted PBC Five-Year Program Ordinance, referred to as “Five-Year Road Program” in this Article and the 1989 PBC Plan, as amended, (referred to as “Plan” in this Section). PBC’s failure to maintain its commitment to adhere to and implement its adopted Five-Year Road Program as set forth in this Section, shall result in a review and reconsideration of the adopted LOS contained in this Article, and in the Plan.
Section 2 Description of Five-Year Road Program

The Five-Year Road Program was adopted by the BCC of PBC by Ord. No. 85-40. In that Ordinance, as amended, and in the Plan, PBC adopted a reasonably attainable program of roadway construction for a five-year period and matched the construction of Projects with projected funding. Ord. No. 85-40, as amended, further provides that prior to December of each year, the BCC shall consider the Ordinance to modify the list of Projects to create a viable list of funded Projects for the succeeding five years. The modification to the Five-Year Road Program shall continue to include, at a minimum, a description of the Road Project, the type of road construction required, and the amount of money to be spent each fiscal year for plan preparation, R-O-W acquisition, and actual construction.

Section 3 Modification of Five-Year Road Program

A. Semi-Annual Modification of Five-Year Road Program
The deletion of construction Projects from the Five-Year Road Program may be done no more frequently than twice a year. For purposes of this Section, “deletion of a construction Project” shall mean the elimination of the construction Project, the failure to let a road construction contract, the removal of or failure to establish funding of the construction Project, the material reduction in the scope of work or funding (as it affects the construction Project), or the postponement of the construction Project in the Five-Year Road Program for more than two years beyond the year the construction was originally programmed in the 1988-92 Five-Year Road Program or in the Five-Year Road Program in which the construction was first added after 1987. It does not include delays associated with R-O-W acquisition as a result of judicial decision, redesign after the contract has been let, construction, or other delays not under the control of PBC.

B. Findings Required Prior to Deletion in the Adopted Five-Year Road Program
Prior to approving the deletion of any construction Project from the County’s Five-Year Road Program, the BCC must find; (1) that the deletion of the construction Project will not result in any Link or intersection on the road network operating at greater than the Adopted LOS as defined in this Article if such Link would not have operated at greater than the Adopted LOS as defined in this Article had the Project been constructed as originally programmed in the adopted Five-Year Road Program; and (2) that no Project which was approved and phased based upon such Assured Construction would be denied Building Permits because of the deletion of the construction. If both findings can be made, then the construction Project may be eliminated by a majority vote except, if the Project is in the current fiscal year, in which case a majority plus one vote is required. If only the second finding can be made, then a Project not in the current fiscal year could be deleted by a majority plus one vote. However, in no case may a Project be deleted when the second finding cannot be made.

Notwithstanding the above, a Project may be deleted if an equivalent substitute Project replaces the original Project, in the same fiscal year. An equivalent substitute Project is a roadway Project in the same area that will serve substantially the same trips as the original Project. This substitution may be made by a majority plus one vote.

Section 4 Standards Five-Year Road Program
Concurrent with the adoption of the annual Five-Year Road Program, the BCC shall determine whether PBC has adhered to and implemented its Five-Year Road Program. In order to make the determination that PBC has adhered to and implemented its adopted Five-Year Road Program, the BCC must find the following based upon substantial competent evidence:

A. Funding
The amount of funding of the current fiscal year of the Five-Year Road Program is, at a minimum, as contemplated in the Plan and the Five-Year Road Program.

B. New Fifth Year
The new fifth year being added to the Five-Year Road Program with Projects added to the Five-Year Road Program at a rate contemplated in the Plan.

C. Projects on Schedule
Fewer than 20 percent of the programmed road construction Projects (on a line-item basis) from the preceding fiscal year over which PBC has control are more than 12 months behind schedule.
Section 5  Effect of Failure of County to Adhere to and Implement its Adopted Five-Year Road Program

If the BCC does not continue to fund the Five-Year Road Program in accordance with the Plan, or does not continue to add Projects to the Five-Year Road Program at a rate contemplated in the Plan, as corrected, updated, or modified as permissible in F.S. § 163.3177(3)(b); or construction Projects consisting of 20 percent or more of the programmed construction Projects (on a line-item basis) from the preceding fiscal year over which PBC has control are more than 12 months behind schedule as determined after the effective date of this Section, above, the BCC shall review the adopted LOS to determine whether it is realistic, adequate, and financially feasible.

CHAPTER N  METHOD OF PRIORITIZING THROUGHFARE IMPROVEMENTS

PBC shall undertake data collection and review of such regarding Major Intersection capacity and peak hour Link capacity, along with ADT capacity. It shall use this information in programming Major Thoroughfare system improvements in the Five-Year Road Program.

The objective shall be to effectively spend available funds so as to maximize capacity, balancing the amount of capacity added, the cost of improvements, the time the improvements will be utilized, and the “expandability” of those improvements to the ultimate section of road. Volume to ADT capacity ratios shall be the preliminary criterion for prioritizing funding of improvements. Due consideration shall be given to the amount of area opened up for development as a result of the various improvements. Deferral or elimination of Link improvements made unnecessary as a result of: (1) other Major Thoroughfare system improvements, such as intersection improvements; or (2) refined capacity analysis, shall not be considered the deletion of a road improvement, unless the deletion is of a Project scheduled for construction of the first year of the Five-Year Road Program or was scheduled for construction in the first year of a previous Five-Year Road Program. When evaluating whether a particular improvement should be deleted from the Five-Year Road Improvement Program, due consideration shall be given to previous reliance of improvements scheduled in the Five-Year Road Program.

In addition, the analysis shall identify improvements to relieve traffic demands on all deficient facilities which are not included in the Five-Year Road Program. PBC shall estimate traffic volumes to be on the roadway network at the end of the last year in the Five-Year Road Program and determine what additional improvements will be needed to meet those future traffic demands. These plans will be developed initially in 1991 and presented to the BCC annually in conjunction with the review and approval of the Five-Year Road Program, beginning in 1992. Consideration will be given to staging improvements by constructing intersection improvements or other spot roadway improvements such that maximum roadway system and funding efficiency are achieved. These improvements shall be included in the analysis but will not be required to be identified for construction in a certain year.

CHAPTER O  PROJECT AGGREGATION

Section 1  Applicability

This Chapter concerning Project aggregation shall apply only to a Lot in existence on or after March 31, 2003 or to a Project with a Development Order, an Agreement, or both, approved after March 31, 2003 that is subject to a Condition of Approval that expressly provides for Project aggregation. This Subsection shall not apply to Developments located within a designated Community Redevelopment Area (CRA) or “urban infill” area as defined in F.S. § 163.3164.

Section 2  Aggregation Criteria

Two or more land uses, or group of land uses, or land development activity or activities, or amendment(s) thereto (hereafter “Developments”), which require a Development Order(s), represented by their owners or developers to be separate Developments, shall be aggregated and treated as a single Project when each of the following criteria in paragraphs (1) through (3) is met.

A. The Developments generate more than 500 peak hour, two-way trips when aggregated.

B. The same Person owns or has a significant legal or equitable interest or an option to obtain significant legal or equitable interest in each Development. A “significant legal or equitable interest” means that the same Person has an interest or an option to obtain an interest of more than 25 percent in each Development for the following types of interests: (1) a fee simple estate; (2) a leasehold estate of more than 30 years duration; (3) a life estate, or (4) similar equitable, beneficial, or real property interests in the Developments. A lessor’s interest in a lease of more than 30 years is not a significant legal or equitable interest.
C. The Developments are part of a unified plan of development as evidenced by meeting at least two of the following:

1. There is a period of two years or less between the issuance of the first Building Permit, or issuance of a Development Order if the first Building Permit has not been issued, for one Development and subsequent traffic concurrency application for another Development. This subparagraph shall apply only if any portion of the parcels that contain the Developments: a) presently share a common boundary; or b) previously shared a common boundary or existed as a single parcel within two years from the date the earliest of the Developments received traffic concurrency approval.

2. The Developments are physically proximate to one other. Two or more Developments shall be considered “physically proximate” when any portion of two or more Developments is contiguous or separated by a road R-O-W or public canal easement of 140 feet or less.

3. A Master Plan or series of plans or drawings exists covering the Developments sought to be aggregated which have been submitted to a local general-purpose government, SFWMD, local drainage or improvement special district, the Army Corps of Engineers, the FDEP, or the Division of Florida Land Sales, Condominiums, and Mobile Homes for authorization to commence development. The existence or implementation of a utility's master utility plan required by the Public Service Commission or general-purpose Local Government or a master drainage plan shall not be the sole determinant of the existence of a Master Plan which aggregates Developments; or,

4. The voluntary sharing of infrastructure that is indicative of a common development effort or is designated specifically to accommodate the Developments sought to be aggregated, except that which was implemented because it was required by a local general-purpose government, SFWMD, local drainage or improvement special district, the Army Corps of Engineers, the FDEP, the Division of Florida Land Sales, Condominiums, and Mobile Homes, or the Public Service Commission. “Sharing of infrastructure” means the voluntary joint use by two or more Developments of internal roadways, internal recreational facilities or parks, amenities, or water, sewage, or drainage facilities specifically constructed to accommodate the Developments sought to be aggregated. Shared infrastructure does not include:
   a. Any joint or shared use of private or public infrastructure specifically required under an established policy of general applicability as set forth under a comprehensive plan adopted pursuant to F.S. ch. 163, an adopted Local Government ordinance or resolution, State Statute, or by adopted rule of regional or State regulatory agencies;
   b. Any joint or shared use of public recreational facilities or parks so long as they were not conveyed by a person with a significant legal or equitable interest in the Developments sought to be aggregated;
   c. Any joint or shared use of publicly financed drainage or stormwater management facilities, roadways, or water or sewer facilities which were not constructed or financed specifically to accommodate the Developments considered for aggregation;
   d. Design features, financial arrangements, donations, or construction that is specified in and required by an Agreement between PBC and two or more Developments; or,
   e. Cross access or shared driveways.

5. There is a common advertising scheme or promotional plan in effect for the Developments sought to be aggregated. “Common advertising scheme or promotional plan” means any depiction, illustration, or announcement which indicates a shared commercial promotion of two or more Developments as components of a single Development and is designed to encourage sales or leases of property.

Section 3 Exceptions

This Chapter concerning Project Aggregation is intended to prevent the division of one large Project into several smaller Projects in order to circumvent the purpose of this Article, not to aggregate separate and discrete Projects. Certain activities and circumstances, including the following, shall not be used by the County Engineer to aggregate two or more Developments:

A. Activities undertaken leading to the adoption or amendment of any Plan element described in F.S. ch. 163, pt. II.

B. The sale of unimproved parcels of land, where the seller does not retain significant legal or equitable interest in the future development of the parcels.

C. The fact that the same lender has a financial interest, including one acquired through foreclosure, in two or more parcels, so long as the lender is not an active participant in the planning, management, or development of the parcels in which it has an interest.
D. Drainage improvements that are not designed to specifically accommodate the Developments sought to be aggregated.
E. Use of the same real estate broker to market and sell two or more Developments.
F. Agreements to authorize owners or developers to pool impact fees or impact fee credits, or to enter into front-end agreements or other financing arrangements by which they collectively agree to design, finance, donate, or build such public infrastructure, facilities, or services.
G. Nothing herein shall prevent the development of a portion of a parcel owned by one Person where no unified plan of development for the remainder of the parcel, or portion thereof, is evidenced.

Section 4 Procedure

A. In order to aggregate two or more Developments pursuant to this Chapter, the County Engineer shall provide written notice of intent to aggregate. This notice shall be delivered by certified mail to all affected Applicants seeking traffic concurrency approval. The notice of intent to aggregate shall: identify the Developments sought to be aggregated; explain the effect of aggregation on the Developments in the event a final determination has been made by PBC to aggregate the Developments; and, indicate that an affected current owner may appeal the decision of the County Engineer pursuant to Art. 12.D, Procedure, of this Article.

B. If the County Engineer’s notice of intent to aggregate is not appealed, or if the TPSAB, or a court of competent jurisdiction, ultimately affirms the decision of the County Engineer to aggregate, the Developments shall be considered a single Project for the purposes of traffic concurrency. Once aggregated, the Applicant or Applicants seeking traffic concurrency approval shall prepare and submit to the County Engineer a single Traffic Impact Study that analyzes the aggregated Developments as a single Project. The Traffic Impact Study shall be subject to the review and procedural standards set forth in Art. 12.A.1.A, Intent, of this Code. Such review and procedural standards shall not affect the terms and conditions of an already approved Development Order, a prior Agreement, or both, related to traffic concurrency approval of an aggregated Development.

Section 5 Traffic Impacts

This Chapter shall be applied only for the purpose of evaluating the traffic impacts of a Project pursuant to the requirements of this Article.

Section 6 Traffic Concurrency

The application materials used for traffic concurrency approval shall be amended to require an Applicant to state whether or not the Project is subject to aggregation as set forth in this Chapter.

Section 7 Aggregation

Portions of this Chapter concerning aggregation are based on the aggregation regulations for DRI, codified in F.S. § 380.0651. Unless the context clearly indicates otherwise, the terms used in this Chapter shall have the same meaning and application as those terms that are provided for in the State regulation.

CHAPTER P OKEECHOBEE BOULEVARD CRALLS POINT SYSTEM

Section 1 Purpose and Intent

The purpose of the Okeechobee Boulevard CRALLS Point System is to provide a means for approving new land development/redevelopment projects that will have significant traffic impacts on Okeechobee Boulevard, but will provide acceptable mitigation for those impacts. In the case of Okeechobee Boulevard, there are few undeveloped properties without development approvals that could still have significant traffic impact on the roadway. To allow for reasonable and beneficial economic use of these properties, the PBC BCC has determined that Okeechobee Boulevard from Military Trail to Jog Road is a constrained roadway facility where significant traffic impacts from new development can be evaluated at a lower LOS standard than what is normally allowed. The mitigation of impacts for Okeechobee Boulevard by the Strategies contained in this Point System will be accomplished in the following ways: [Ord. 2006-036] [Ord. 2010-022]

A. Reduction of single-occupant vehicle trips by encouraging ridesharing, diversion to alternate travel modes, and telecommuting. [Ord. 2006-036]

B. Reduction of peak hour vehicle trips by shifting these trips to other time periods. [Ord. 2006-036]
C. Reduction of land use densities and intensities for proposed development/redevelopment. [Ord. 2006-036]
D. Increase in land use densities and intensities for proposed development/redevelopment only in cases where land use mix maximizes internal trip capture and promotes feasibility of mass transit modes. [Ord. 2006-036]

Section 2 Application

In addition to the standards imposed by this Article, all proposed Projects with significant Project Traffic on the Okeechobee Boulevard corridor from Jog Road to Military Trail shall be subject to the Okeechobee Boulevard CRALLS Point System. [Ord. 2006-036] [Ord. 2010-022]

Section 3 Procedure

A. General

Applicants must choose from 14 mitigation strategies set forth in this Chapter to accumulate points necessary for Development Order approval. Point totals shall be calculated pursuant to the Point System methodology. Applicants meeting the minimum required point totals will receive traffic concurrency approval provided all of the other standards of this Article have been met. [Ord. 2006-036]

B. Application Requirements

Applications must include a traffic study demonstrating compliance with Test 1 and Test 2 of this Article. Applications must also include a study identifying the mitigation strategies to be used by the Project, and a calculation of total points earned as a result. Applications shall initially be submitted to the County Engineer for review and comment to determine completeness. An application shall be found complete if it contains sufficient and accurate data and analysis for the County Engineer to determine whether or not the application complies with this Chapter. Any deficiencies in the completeness of an application identified by the County Engineer must be corrected and resubmitted in order for the application to be considered. [Ord. 2006-036]

C. Conditions of Approval

PBC shall impose Conditions of Approval and the recording of restrictive covenants as necessary to ensure compliance with the requirements of this Chapter. All Conditions of Approval shall be made part of the traffic concurrency and Development Order approved by the County or Municipality, as the case may be. [Ord. 2006-036]

D. Condition Monitoring

Development Order conditions imposed upon projects in the Unincorporated Area will be monitored by the County Engineer. For Development Orders imposed upon projects within Municipalities, monitoring reports with prescribed format and documentation shall be submitted to the relevant Municipality, as well as the County Engineer as required in Art. 12.P, Mitigation Strategies. Failure to meet the requirements of any strategy, any Condition of Approval imposed pursuant to this Chapter, or any monitoring report required by this Chapter, may result in enforcement action including but not limited to Code Enforcement actions and actions to modify or revoke the concurrency approval, Development Order, or both. [Ord. 2006-036]

E. Substitution of Alternative Strategies or Alteration of Existing Strategy at a Later Date

If the Property Owner wishes to alter an existing strategy or substitute another mitigation strategy or strategies after receiving initial Development Order Conditions of Approval for qualification under the Point System, then an application for a Development Order Amendment must be filed for approval by PBC. For Projects located in Municipalities, alteration or substitution of alternative strategies must be reviewed and approved by the County Engineer before the application for Development Order Amendment is submitted to the Municipality. If an approvable mitigation strategy of equivalent or greater points is substituted, or if the County Engineer determines that an alteration of an existing strategy provides mitigation equal to or greater than originally approved, the development will not need to qualify again for approval under the Point System. [Ord. 2006-036]

F. Time Limits

Each approval shall be subject to specific time limitations. Expiration of the concurrency or failure to commence development as set forth in Art. 2.E.2.C, Time Limitations for Commencement, will result in actions to modify or revoke the concurrency approval, Development Order, or both. If revoked, the capacity reserved will be returned to the system. [Ord. 2006-036]
G. Municipal Review
Notwithstanding the peak hour trip threshold set forth in Art. 12.D. Procedure, projects located in Municipalities that require the Okeechobee Boulevard CRALLS in order to meet the County Traffic Performance Standards shall be subject to the requirements of this Chapter. Additional land use regulations may be imposed by the Municipality in conjunction with Point System review. [Ord. 2006-036]

Section 4 Mitigation Strategies

A. Strategy 1. Mixed Use Development around Transit Corridors

1. Applicability
This strategy consists of providing a mixed use development near a transit corridor. (This strategy cannot be combined with Strategy 2, Mixed Use Development around Transit Centers.) [Ord. 2006-036]

2. Qualifying Criteria
   a. The transit corridor must be no more than one-quarter mile walking distance from the nearest building entrance, and must include ADA accessible pedestrian pathways and provide access to transit services and adjoining uses. [Ord. 2006-036]
   b. Off-street parking areas shall be located and designed in a manner that supports and does not conflict with pedestrian activity. [Ord. 2006-036]
   c. A Master Plan or Site Plan must be developed to show how parcels will integrate with one another, and to dictate the build-out timeframe. [Ord. 2006-036]
   d. Uses must be identified within the Master Plan or Site Plan. [Ord. 2006-036]
   e. The Master Plan or Site Plan shall be approved as part of the Development Order. [Ord. 2006-036]
   f. Minimum floor area ratio must be 0.5 per net acre. [Ord. 2006-036]
   g. Minimum residential floor area must equal 60 percent of total and net residential trips must constitute at least one-quarter of total net a.m. or p.m. trips for the development. [Ord. 2006-036]
   h. Non-residential land uses shall include retail or a combination of retail and office or industrial, with retail constituting a minimum of ten percent of the total floor area for all land uses. Retail uses shall constitute a limited commercial facility of a convenience nature, serving residential neighborhoods within a one-half mile radius, located on a Local, Collector, or Arterial Street. [Ord. 2006-036]

3. Implementation Timeframe
The implementation timeframe will be defined as part of the Master Plan/Development Order. Master Plans and Development Orders for phased developments must include interim qualifying criteria consistent with the above criteria. At each phase of development, before CO will be granted, the interim criteria must be met. [Ord. 2006-036]

4. Monitoring and Enforcement
   a. At the conclusion of each phase of development, the County Engineer must confirm that the interim or final criteria are met prior to issuance of the first CO for the following phase. [Ord. 2006-036]
   b. As part of the development approval process, a restrictive covenant must be recorded against all parcels of the development indicating the minimum and maximum percentages allowed for each land use. PBC shall be granted the authority to enforce the covenants, along with other parties, if any, to be determined during development review. PBC shall not allow the conversion of uses that would result in a project’s failure to meet specified requirements. [Ord. 2006-036]
   c. By April 1 of each year, starting April 1 after the first full year after the first CO, the developer, or their agent, must supply a service report to the County Engineer as well as Municipality if applicable, identifying the uses on site and the percentage or square footage each use encompasses. [Ord. 2006-036]
   d. Two years following Project Buildout, the developer, owner, or agent as appropriate may request alteration of existing strategy or substitution of alternative strategies pursuant to Art. 12.P.3.F. Time Limits. [Ord. 2006-036]

5. Credit Factor
   a. 0.4 for FAR 0.5 or higher per net acre, and at least 60 percent of the total square footage must be dedicated to residential use; [Ord. 2006-036]
   b. 0.6 for FAR 0.75 or higher per net acre, and at least 70 percent of the total square footage must be dedicated to residential use; or, [Ord. 2006-036]
   c. 0.8 for FAR 1.0 or higher per net acre, and at least 80 percent of the total square footage must be dedicated to residential use. [Ord. 2006-036]
B. Strategy 2. Mixed Use Development around Transit Centers

1. Strategy
   This strategy consists of developing a mixed use project near a transit center located on a transit corridor as either a unified or parcelized development. This strategy cannot be combined with Strategy 1, Mixed Use Development around Transit Corridors. [Ord. 2006-036]

2. Qualifying Criteria
   a. The transit center must be no more than one-quarter mile walking distance from the nearest building entrance, and must include ADA accessible pedestrian pathways and provide access to transit services and adjoining uses. [Ord. 2006-036]
   b. Off-street parking areas shall be located and designed in a manner that supports and does not conflict with pedestrian activity. [Ord. 2006-036]
   c. A Master Plan must be developed to show how parcels will integrate with one another, and to dictate the build-out timeframe. [Ord. 2006-036]
   d. Uses must be identified within the Master Plan. [Ord. 2006-036]
   e. Minimum floor area ratio must be 0.5 per net acre. [Ord. 2006-036]
   f. Minimum residential floor area must equal 60 percent of total and net residential trips must constitute at least one-quarter of total net a.m. or p.m. trips for the development. [Ord. 2006-036]
   g. Non-residential land use shall include retail or a combination of retail and office or industrial, with retail constituting a minimum of ten percent of the total floor area for all land uses. Retail uses shall constitute a limited commercial facility of a convenience nature, serving residential neighborhoods within a one-half mile radius, located on a Local, Collector, or Arterial Street. [Ord. 2006-036]

3. Implementation Timeframe
   The implementation timeframe will be defined as part of the Master Plan or Development Order. Master Plans and Development Orders for phased developments must include interim qualifying criteria consistent with the above criteria. At each phase of development, before CO will be granted, the interim criteria must be met. [Ord. 2006-036]

4. Monitoring
   a. At the conclusion of each phase of development, the County Engineer must confirm that the interim or final criteria are met prior to issuance of the first CO for the following phase. [Ord. 2006-036]
   b. As part of the development approval process, a restrictive covenant must be recorded against all parcels of the development indicating the minimum and maximum densities and intensities allowed for each land use. PBC shall be granted the authority to enforce the covenants, along with other parties, if any, to be determined during development review. PBC shall not allow the conversion of uses that would result in a project’s failure to meet specified requirements. [Ord. 2006-036]
   c. By April 1 of each year, starting April 1 after the first full year after the first CO, the developer, or their agent, must supply a service report to the County Engineer as well as Municipality if applicable, identifying the uses on site and the percentage or square footage each use encompasses. [Ord. 2006-036]
   d. Two years following Project Buildout, the developer, agent, or Property Owner as appropriate may request alteration of existing strategies or substitution of alternative strategies pursuant to Art. 12.P.3.F, Time Limits. [Ord. 2006-036]

5. Credit Factor
   a. 0.6 for FAR of 0.5 or higher per net acre, and at least 60 percent of the total square footage must be dedicated to residential use; [Ord. 2006-036]
   b. 0.8 for FAR of 0.75 or higher per net acre, and at least 70 percent of the total square footage must be dedicated to residential use; or, [Ord. 2006-036]
   c. 1.0 for FAR of 1.0 or higher per net acre, and at least 80 percent of the total square footage must be dedicated to residential use. [Ord. 2006-036]

C. Strategy 3. Feeder Transit Service to Rail Stations or Multi-Modal Transit Centers; New Commuter Bus Service; Local Bus/Shuttle Service; Employee Transit Passes

1. Strategy
   This strategy consists of providing feeder service between the project site and a rail station or multi-modal transit center, providing new commuter bus service between the project site and residential areas, providing local or shuttle bus service between the project site and major employers in the Okeechobee Boulevard corridor, or offering all employees free transit passes for commuting to and from work. [Ord. 2006-036]

2. Qualifying Criteria
   a. Developers must specify dedicated funding commitments to provide for direct costs of feeder services or transit passes for a minimum of two years, or make a fair-share contribution to be
determined by and paid to the appropriate local transit agency for new or expanded services. [Ord. 2006-036]
b. Vehicles must be classified as either buses or minibuses. [Ord. 2006-036]
c. The transit service must be no more than one-quarter mile walking distance from the nearest building entrance. [Ord. 2006-036]
d. The Project Site Plan must include provisions for transit service infrastructure, including pick-up/drop-off areas, and transit circulation plans. Additionally, pedestrian connectivity between the transit stop infrastructure and the primary use of the development that complies with ADA criteria must be specified. [Ord. 2006-036]
e. Off-street parking areas shall be located and designed in a manner that supports and does not conflict with pedestrian activity. [Ord. 2006-036]
f. Combining this strategy with Strategy 4, Parking Management, is encouraged. [Ord. 2006-036]
g. Proposed route(s) shall be subject to approval by PBC in consultation with Palm Tran. [Ord. 2006-036]
h. Proposed service associated with a non-residential site shall be operated at a minimum during the a.m. and p.m. peak hours during which the majority of site employees commute to and from work on all weekdays that the business(es) at the project site is open. Proposed service associated with a residential site shall be operated at a minimum during the highest a.m. peak hour and highest p.m. peak hour on all weekdays that major employment centers along the Okeechobee corridor are open. [Ord. 2006-036]

3. Implementation Timeframe
   This strategy must be in place one year from date of issuance of final Certificate of Occupancy for a single-building project and one year from date of issuance of Certificate of Occupancy equaling 50-percent completion of a multiple-building project. [Ord. 2006-036]

4. Monitoring and Enforcement
   a. The transit service is specified as part of a Master Plan or Site Plan, and the Development Order. Annual documentation of marketing efforts, funding, and participation for the free transit pass program shall be provided to the Palm Beach County Engineer. [Ord. 2006-036]
   b. Two years following Project Buildout, the project’s developer, owner, or agent as appropriate, may request alteration or substitution of the strategy pursuant Art. 12.P.3.F, Time Limits. [Ord. 2006-036]
   c. By April 1 of each year, starting April 1 after the first full year after initiation of the transit service, the developer, or their agent, must supply a report to the County Engineer as well as Municipality if applicable, identifying average daily and weekly ridership, the number of employees from the project using the service, fees charged and revenues collected, and an evaluation of service operation with potential recommendations to increase the use of the service. [Ord. 2006-036]

5. Credit Factor
   a. 0.05 for subscription bus service that operates with at least 50-percent employer subsidy; [Ord. 2006-036]
   b. 0.05 for feeder service/transit passes on routes with 30-minute peak hour headways; [Ord. 2006-036]
   c. 0.10 for feeder service/transit passes on routes with 20-minute peak hour headways; [Ord. 2006-036]
   d. 0.15 for feeder service/transit passes on routes with 10-minute peak hour headways; or, [Ord. 2006-036]
   e. A 50-percent credit bonus will be given for feeder service that is operated with a peak headway as shown above and at least one-hour non-peak hour headways for a total period of at least 12 hours each weekday. The credit will double for feeder services offered free to the general public (not just site employees or residents). [Ord. 2006-036]

D. Strategy 4. Parking Management
   Parking Management Strategy applies only to employee parking for non-residential projects of at least 50,000 square feet of building area and mixed use projects with non-residential components of at least 50,000 square feet of building area. This strategy consists of the following: [Ord. 2006-036]

1. Qualifying Criteria
   a. Parking lot must clearly identify separate parking areas for employees and customers, if any. Separate parking areas, including areas for employee preferred parking, shall be delineated on the Site Plan. [Ord. 2006-036]
b. Notwithstanding Art. 6, Parking, Loading, and Circulation, or other jurisdiction parking requirements, at least ten percent of the minimum number of parking spaces required by the applicable County or Municipal code must be eliminated from the portion of the lot reserved for employees. [Ord. 2006-036]

c. Employees who drive to work must pay a daily fee of six dollars to park in the lot. The parking spaces for these employees must be located at the most remote point from the nearest building entrance relative to all other parking spaces. Employees who fail to pay the fee or park in an unauthorized space shall be subject to penalties including a fine equal to double the daily fee imposed, and in cases of repeated violations, towing. [Ord. 2006-036]

d. All fees and penalties collected from the employees who pay to park must be deposited in a separate parking fee fund. Moneys in the fund shall be used to reduce traffic impacts by offering payments to employees who use public transportation or Vanpools in accordance with Strategy 5, Ridesharing Programs, offering payments to provide or fund in part shuttle service for employees in accordance with Strategy 3, Feeder Transit Service to Rail Stations or Multi-Modal Transit Centers; New Commuter Bus Service; Local Bus/Shuttle Service; Employee Transit Passes, or both. [Ord. 2006-036]

e. Employees who rideshare do not pay a daily fee to park and may park in spaces designated for ridesharing participants. Because of the above relationships, this Strategy should be combined with Strategy 5, Ridesharing Programs. [Ord. 2006-036]

f. Applicant must specify a dedicated funding commitment from a source other than the parking fee to provide on-site monitoring and parking fee fund management. [Ord. 2006-036]

2. Implementation Timeframe
Parking lot configuration must be in place at the time of CO for any phase of the project. Implementation timeframes for parking fees and use of parking fees to reduce traffic impacts shall be specified in the Development Order but in no event shall full implementation occur more than six months after Project Buildout. [Ord. 2006-036]

3. Monitoring
a. Beginning April 1 after the first full year of program, and every April 1 thereafter, the Applicant, or successor in interest, must provide to the County Engineer an annual report. The annual report shall at a minimum contain monthly and cumulative statistics providing: [Ord. 2006-036]

1) The number of total employees employed during each month and average number for the calendar year; [Ord. 2006-036]
2) The number of employees who paid parking fees; [Ord. 2006-036]
3) The number of employees who participated in ridesharing or shuttle programs; [Ord. 2006-036]
4) The amount of fees collected; [Ord. 2006-036]
5) A report on the expenditure of the fees and fund balance at the end of each month and calendar year; [Ord. 2006-036]
6) An on-site monitoring report providing average number of rideshare vehicles and paid parking vehicles in the lot each month, and the number of vehicles cited for improperly parking or parking without paying a fee per month. The report shall also include copies of all materials used in the project informing employees of the strategy including lot regulations, daily fees, and opportunities for ridesharing, public transportation, and shuttle service as appropriate. [Ord. 2006-036]

b. Two years following Project Buildout, the developer, owner, or agent as appropriate may request alteration of existing strategy or substitution of alternative strategies pursuant to Art. 12.P.3.F, Time Limits. In the event a substitution is authorized, all funds collected under this Strategy shall be deposited in the Okeechobee Boulevard Mitigation Fee Trust Fund established in Strategy 14, Additional Mitigation Fee Payment. [Ord. 2006-036]

4. Credit Factor
Credit factor shall be calculated in accordance with Table 12.P.4.D-13, Strategy 4 Credit Factor Calculation.

Table 12.P.4.D-13 – Strategy 4 Credit Factor Calculation

<table>
<thead>
<tr>
<th>Credit Factor = 10 x (√(S))</th>
</tr>
</thead>
<tbody>
<tr>
<td>P = number of parking spaces eliminated by parking management</td>
</tr>
<tr>
<td>S = total size of non-residential building area in 1,000 sq. ft.</td>
</tr>
</tbody>
</table>

[Ord. 2006-036]
E. Strategy 5. Ridesharing Programs
Ridesharing Programs shall apply only to non-residential projects and non-residential portions of mixed use projects with 20 or more employees. [Ord. 2006-036]

1. Qualifying Criteria
   a. At least 15 percent of the project employees must participate in ridesharing within nine months of Project Buildout or as otherwise specified in the Master Plan. The Master Plan shall specify an alternate, backup mitigation strategy or corrective/incentive plan to be implemented if after nine months, 15 percent of the project employees do not participate in ridesharing. [Ord. 2006-036]
   b. Projects must identify and fund a ridesharing coordinator to assist participants, promote, and facilitate the Ridesharing Program, and track performance of the Ridesharing Program for monitoring purposes. As an alternative, the Project may elect to participate in the existing South Florida Commuter Services Ridesharing Program by paying an annual membership fee. [Ord. 2006-036]
   c. Applicants must identify a dedicated funding commitment to fund all aspects of the Ridesharing Program. This funding commitment shall include a commitment to provide at least a 50-percent subsidy of the out-of-pocket cost of any employee vanpool utilizing the South Florida Vanpool Program. [Ord. 2006-036]
   d. Preferential parking must be allocated for Ridesharing Program participants. Preferential parking spaces must be located closest to building entrances, with the exception of reserved spaces required by the ADA and delineated on the Site Plan. [Ord. 2006-036]
   e. Combining this strategy with Strategy 4, Parking Management, is encouraged. [Ord. 2006-036]
   f. No credit shall be received for Strategy 5, Ridesharing Programs, for those employees qualifying for credit under the non-peak hour work hours part of Strategy 13, Compressed Work Week/Non-Peak Hour Work Hours. [Ord. 2006-036]

2. Monitoring
   a. Beginning April 1 after the first full year of program, and every April 1 thereafter, the Applicant, or successor in interest, must provide to the County Engineer an annual report. The annual report must be certified by an independent financial auditor and shall at a minimum contain monthly and cumulative statistics providing: [Ord. 2006-036]
      1) The number of total employees employed during each month and average number for the calendar year; [Ord. 2006-036]
      2) The number of employees who participated in ridesharing; [Ord. 2006-036]
      3) The number of days each employee participated in ridesharing per reporting period; and, [Ord. 2006-036]
      4) An accounting detailing the amount expended to fund the Ridesharing Program, including coordinator salary and amounts spent on promoting and monitoring the Ridesharing Program. The report shall also include copies of all materials used in promoting the Ridesharing Program. [Ord. 2006-036]
   b. Two years following Project Buildout, the developer, owner, or agent as appropriate may request alteration or substitution of strategies pursuant to Art. 12.P.3.F, Time Limits. [Ord. 2006-036]

3. Implementation Timeframe
   This Strategy must be fully implemented within nine months of Project Buildout, or as otherwise set forth in the Master Plan or Site Plan. [Ord. 2006-036]

4. Credit Factor
   Credit factor shall be calculated in accordance with Table 12.P.4.E-14, Strategy 5 Credit Factor Calculation.

Table 12.P.4.E-14 – Strategy 5 Credit Factor Calculation

<table>
<thead>
<tr>
<th>Credit Factor =</th>
<th>E x 2 x D / 5</th>
</tr>
</thead>
<tbody>
<tr>
<td>E</td>
<td>number of on-site employees that are required to participate</td>
</tr>
<tr>
<td>D</td>
<td>number of weekdays per week that employees are required to participate</td>
</tr>
<tr>
<td>S</td>
<td>number total size of non-residential building area in 1,000 sq. ft.</td>
</tr>
</tbody>
</table>

[Ord. 2006-036]

F. Strategy 6. Telecommuting Programs
1. Strategy
   This strategy applies only to larger employers implementing formal policies, based on specific criteria, to allow and encourage employees to telecommute. [Ord. 2006-036]
2. Qualifying Criteria
   a. Project must be an employer of at least 20 people. [Ord. 2006-036]
   b. Project must develop a formal policy and contract between employees and managers. The Policy shall identify which job categories are suitable for telecommuting, and what employees must do to participate. [Ord. 2006-036]
   c. Employees must participate in the telecommuting program an average of at least two weekdays per week. [Ord. 2006-036]
   d. The projected level of participation, i.e., the number of employees participating and days per week telecommuting, must be established in the Master Plan or Site Plan and maintained. [Ord. 2006-036]
   e. Combining this strategy with Strategy 5, Ridesharing Programs, is encouraged. [ Ord. 2006-036]

3. Implementation Timeframe
   One year from Project Buildout to meet projected level of participation, or as otherwise specified in the Master Plan or Site Plan. [Ord. 2006-036]

4. Monitoring
   a. By April 1 of each year, starting April 1 after the first full year after initiating the program, the owner, developer, or their agent, must supply a service report to the County Engineer, identifying the number of employees from the development participating in the program and the number of days each employee telecommutes. This monitoring report shall also include a copy of the telecommuting policy and copies of each of the signed telecommuting contracts entered during the reporting period. [Ord. 2006-036]
   b. Two years following initiation of this strategy, the project's developer, owner, or agent as appropriate, may request alteration or substitution of the strategy pursuant Art. 12.P.3.F, Time Limits. [Ord. 2006-036]

5. Credit Factor
   Credit factor shall be calculated in accordance with Table 12.P.4.F-15, Strategy 6 Credit Factor Calculation.

   Table 12.P.4.F-15 – Strategy 6 Credit Factor Calculation
   \[
   \text{Credit Factor} = \frac{E \times 2 \times D / 5}{50 \times (\sqrt{S})}
   \]
   - \(E\) = number of on-site based employees that telecommute
   - \(D\) = number of weekdays per week that employees telecommute
   - \(S\) = number total size of non-residential building area in 1,000 sq. ft. [Ord. 2006-036]

G. Strategy 7. Bicycle Parking Facilities
1. Strategy
   This strategy consists of providing secure bicycle parking at residential and non-residential developments. [Ord. 2006-036]

2. Qualifying Criteria
   Minimum requirements for bicycle parking facility shall be in accordance with the Table below:

   Table 12.P.4.G-16 – Minimum Requirements for Bicycle Parking Facility
   \[
   \begin{array}{|c|c|}
   \hline
   \text{Use Type} & \text{Number of Parking Spaces} \\
   \hline
   \text{Commercial, Retail, and Institutional} & 1 \text{ bicycle space per 25 vehicle parking spaces} \\
   \text{Multifamily and Mixed Use Development} & 1 \text{ bicycle space per 4 dwelling units} \\
   \hline
   \end{array}
   \]
   [Ord. 2006-036]

   a. The secure bicycle parking facility must be provided within 75 feet of the entrance to buildings that cyclists will most likely use. Where there is more than one building on a site, or where a building has more than one main entrance, the parking must be distributed to serve all buildings or main entrances. All bicycle parking facilities shall be covered and may be fully enclosed. [Ord. 2006-036]
   b. Combining this strategy with Strategy 4, Parking Management, is encouraged. [Ord. 2006-036]

3. Implementation Timeframe
   Secured bicycle facility must be completed prior to issuance of the first CO. [Ord. 2006-036]
4. **Monitoring and Enforcement**  
When this strategy is used, the provision of bicycle facilities, including the number and general location, shall be included in the Development Order/Master Plan. [Ord. 2006-036]

5. **Credit Factor**  
Credit factor shall be calculated in accordance with **Table 12.P.4.G-17, Strategy 7 Credit Factor Calculation**, below:

<table>
<thead>
<tr>
<th>Credit Factor</th>
<th>[ \frac{0.5 (P_B)}{2 (P_T) + 9 (R_U)} ]</th>
</tr>
</thead>
<tbody>
<tr>
<td>(P_B)</td>
<td>number of bicycle parking spaces created per above qualifying criteria a) and b)</td>
</tr>
<tr>
<td>(P_T)</td>
<td>total number of non-residential parking spaces</td>
</tr>
<tr>
<td>(R_U)</td>
<td>total number of residential housing units</td>
</tr>
</tbody>
</table>

[Ord. 2006-036]

H. **Strategy 8. Provide Access Between Developments**

1. **Strategy**
   a. This strategy applies to vehicle and pedestrian connections between adjacent Projects and encourages the use of such interconnections to reduce the need to access abutting roadways. The credit factor is based on the standard internalization criteria used by the Traffic Division. [Ord. 2006-036]
   
   b. For projects on a CRALLS roadway, the credit will be based on the reduction of trips on the CRALLS roadway. Projects not directly on a CRALLS roadway will receive one-half the credit amount. [Ord. 2006-036]

2. **Qualifying Criteria**
   a. The connection between the adjacent parcels must be conveniently located and designed to accommodate both vehicles and pedestrians. [Ord. 2006-036]
   
   b. The pedestrian connection must be ADA accessible. [Ord. 2006-036]
   
   c. Pedestrian connections between adjacent parcels or between building clusters within a single parcel shall be provided at a minimum of every 500 feet of building frontage or property line, and should be designed and located to maximize access to roadway corridors, transit stops, and parking areas. [Ord. 2006-036]
   
   d. The cross-access easement shall be shown on the parcel’s plat, or recorded as a restrictive covenant, to ensure the access will remain should redevelopment of the site occur. A letter of agreement from the adjacent Property Owner shall be provided at the time of application in order to initially qualify for use of this strategy. If the Project is subsequently approved conditioned upon implementation of this strategy, the condition shall require a reciprocal cross-access easement at the same location on the adjacent property be recorded prior to the issuance of the first CO for the Project. Pedestrian crossings should incorporate treatments that provide the highest degree of visibility and safety for pedestrians. Recommended treatments include countdown signals, in-pavement lighting at crosswalks, raised pedestrian crosswalks, curb bulb-outs, and other traffic calming measures. These treatments should be applied where suitable, with special emphasis given in locations where pedestrians will cross Collector and Arterial roadways, and in parking and circulation areas of large developments. [Ord. 2006-036]
   
   e. The cross access must be provided in addition to any other cross access required by government land development regulations or driveway permit conditions. [Ord. 2006-036]
   

3. **Implementation Timeframe**
   The precise timetable shall be determined as part of the Development Order approval process but the cross-access easements on both properties must be in place, as depicted on the plat or in the restrictive covenant, prior to issuance of the first CO for the Project. [Ord. 2006-036]

4. **Monitoring and Enforcement**
   Since providing access between developments is part of the Development Order/Master Plan, Code Enforcement or the Metropolitan Planning Organization Bicycle/Pedestrian Coordinator, or other County Departments, as appropriate, shall be able to inspect the cross-access connection at any time. [Ord. 2006-036]
5. **Credit Factor**
   a. Project where the first directly accessed Link is a CRALLS roadway: [Ord. 2006-036]
      1) 0.1 of smaller retail for retail to retail; [Ord. 2006-036]
      2) 0.1 of residential for residential to retail; [Ord. 2006-036]
      3) 0.1 of office for office to retail; and, [Ord. 2006-036]
      4) 0.05 of office for office to residential [Ord. 200-036]
   b. Project where the first directly accessed Link is not on CRALLS roadway: [Ord. 2006-036]
      1) 0.05 of smaller retail for retail to retail; [Ord. 2006-036]
      2) 0.05 of residential for residential to retail; [Ord. 2006-036]
      3) 0.05 of office for office to retail; and, [Ord. 2006-036]
      4) 0.025 of office for office to residential [Ord. 2006-036]
   c. The credit factor for pedestrian-only connections shall be one-tenth of the above numbers. [Ord. 2006-036]

I. **Strategy 9. Provide Access to More Than One Road**

   1. **Strategy**
      a. This strategy applies to properties that have access to two or more thoroughfare roadways, either directly, via non-thoroughfare roadways, or via shared access with an adjacent property. It is intended to allow better distribution of traffic onto the major roadway system as compared to projects with single access. [Ord. 2006-036]
      b. For Projects that directly access a CRALLS roadway, the credit is associated with the reduction of trips on the CRALLS roadway. The secondary access must be an alternative to access to a CRALLS roadway. For Projects that do not directly access a CRALLS roadway, the access must be on two or more thoroughfare roadways. These projects will receive a lesser credit. [Ord. 2006-036]

   2. **Qualifying Criteria**
      a. Secondary access must be at an existing median opening to qualify for the full credit. If there is no median opening, the credit will be 50 percent less. Full credit shall be given if a median opening will be established concurrent with development. [Ord. 2006-036]
      b. The secondary access must be designed to accommodate both vehicles and pedestrians. [Ord. 2006-036]
      c. The secondary access for the pedestrian connection must be ADA accessible. [Ord. 2006-036]
      d. The access easement should be shown on the parcel’s plat, or recorded as a restrictive covenant, to ensure the access will remain should redevelopment of the site occur. [Ord. 2006-036]
      e. The secondary access must be provided in addition to any secondary access required by government land development regulations or driveway permit. [Ord. 2006-036]
      f. For projects not on CRALLS roadways, the secondary access will not necessarily reduce traffic on the CRALLS roadway, but will better distribute Project Traffic on the roadway system. The credit factor is reduced by 50 percent in these cases. [Ord. 2006-036]
      g. Secondary access shall meet the access management requirements of the Municipality, County, or FDOT, as applicable; if not, then it must have been granted a variance from the access management requirements prior to qualifying for credit. [Ord. 2006-036]
      h. The secondary access may be an access point onto the CRALLS roadway that aligns with another thoroughfare and thus allows dispersion of some Project Traffic without impacting the CRALLS roadway except at the intersection. [Ord. 2006-036]

   3. **Implementation Timeframe**
      The precise timetable shall be determined as part of the Development Order approval process but the easement must be in place, as depicted on the plat or in the restrictive covenant, no later than issuance of the first CO for the Project. [Ord. 2006-036]

4. **Monitoring**
   The project’s developer, owner, or agent as appropriate, may request alteration or substitution of the strategy pursuant [Art. 12.P.3.F, Time Limits]. [Ord. 2006-036]

5. **Credit Factor**
   a. 1.0 at median opening for access to thoroughfare secondary to CRALLS roadway; [Ord. 2006-036]
   b. 0.5 not at median openings for access to thoroughfare secondary to CRALLS roadway; [Ord. 2006-036]
   c. 0.2 at median opening to another thoroughfare for projects not on CRALLS roadway; [Ord. 2006-036]
   d. 0.1 not at median opening to another thoroughfare for projects not on CRALLS roadway; or, [Ord. 2006-036]
e. 0.4 for access onto CRALLS roadway that aligns with full median opening with another thoroughfare. [Ord. 2006-036]

J. Strategy 10. Low Generation Traffic Sensitive Uses

1. Strategy
   This strategy consists of developing the project with a low generation traffic sensitive use, with the intent of reducing traffic congestion. [Ord. 2006-036]

2. Qualifying Criteria
   a. Credit will be given for this Strategy only if credit is also earned from one of the following Strategies: 1, 2, 3, 4, 5, 6, 7, 8, or 9. [Ord. 2006-036]
   b. Restrictive covenants on the parcel shall be filed describing the uses and associated densities and intensities that are allowed. [Ord. 2006-036]
   c. The Master Plan or Site Plan shall identify, on a building and parcel basis, the building areas allocated to specific land uses for the development. [Ord. 2006-036]

3. Implementation Timeframe
   Determined during concurrency review. [Ord. 2006-036]

4. Monitoring
   By April 1 of each year, starting April 1 after the first full year after occupying the site, the developer, or their agent, must supply a use report to the County Engineer, identifying uses, and their densities and intensities, active on the site.
   Two years following Project Buildout, the project’s developer, owner, or agent as appropriate, may request alteration or substitution of the strategy pursuant Art. 12.P.3.F, Time Limits. [Ord. 2006-036]

5. Credit Factor
   a. Credit shall be determined by multiplying by three the percent reduction (expressed as a decimal) in two-way peak hour trips as compared to the typical average net external two-way peak hour trips per gross acre for development in the area per the land use designation as of the effective date of adoption of this Section. The typical development density and intensities based on an analysis of existing developments in area of CRALLS are as follows: [Ord. 2006-036]
      1) Residential: as per maximum allowable under land use designation. [Ord. 2006-036]
      2) Retail Commercial: 0.18 gross lot area coverage by buildings. [Ord. 2006-036]
      3) Office: 0.16 gross lot area coverage by buildings. [Ord. 2006-036]
      4) Industrial: 0.22 gross lot area coverage by buildings. [Ord. 2006-036]
      5) Institutional: 0.09 gross lot area coverage by buildings. [Ord. 2006-036]
   b. It is further assumed that, for purposes of calculation and comparison, the typical gross lot area coverage intensities are based upon single-story buildings occupying the parcels. Also, for purposes of comparison, the typical density/intensity for the land use designations listed above shall be calculated using the general trip generation rate for that designation as published by PBC Engineering and Public Works Department/Traffic Division, whereas the proposed Project shall be calculated using the specific trip generation rate for the proposed use if it is a Conditional Use under the applicable zoning district. [Ord. 2006-036] [Ord. 2017-007]
   c. Credit factor shall be calculated in accordance with Table 12.P.4.J-18, Strategy 10 Credit Factor Calculation, below:

<table>
<thead>
<tr>
<th>Table 12.P.4.J-18 – Strategy 10 Credit Factor Calculation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Credit Factor = 3 x (T&lt;sub&gt;A&lt;/sub&gt; - T&lt;sub&gt;P&lt;/sub&gt;) / T&lt;sub&gt;A&lt;/sub&gt;</td>
</tr>
<tr>
<td>T&lt;sub&gt;A&lt;/sub&gt; = average net external 2-way peak hour trips per gross acre in area for applicable land use designation</td>
</tr>
<tr>
<td>T&lt;sub&gt;P&lt;/sub&gt; = project net external 2-way peak hour trips per gross acre</td>
</tr>
</tbody>
</table>

[Ord. 2006-036]

6. Example
   a. Proposed self-storage development of 60,000 square feet on ten-acre parcel with industrial land use designation = 0.14 gross lot area coverage [Ord. 2006-036]
   b. Average industrial gross lot area coverage = 0.22 [Ord. 2006-036]
   c. Project net external two-way p.m. peak hour trips per gross acre = (60 x 0.26) / 10 = 1.56 trips/gross acre [Ord. 2006-036]
   d. Average net two-way p.m. peak hour trips per gross acre = 0.98 x (0.22 x 10 x 43,560/1,000) / 10 = 9.39 trips/gross acre [Ord. 2006-036]
   e. Credit Factor = 3 x [(9.39 - 1.56) / 9.39] = 2.5 [Ord. 2006-036]
K. Strategy 11. Intersection Modifications

1. Strategy
   This strategy consists of improvements to signalized intersections on the CRALLS roadway. The intersection modification can include additional turn lanes or additional through lanes. [Ord. 2006-036]

2. Qualifying Criteria
   a. This strategy applies only to intersections projected to exceed a critical sum of 1,200 during either the a.m. or p.m. peak hour by Project Buildout. [Ord. 2006-036]
   b. Credit will only be given for this Strategy if a credit is also earned from one of the following Strategies: 1, 2, 3, 4, 5, 6, 7, 8, or 9. [Ord. 2006-036]
   c. Credit will not be given for that portion of the intersection modification that is required to mitigate just the traffic impacts of the proposed development. [Ord. 2006-036]

3. Methodology for Analyzing Improvement
   The intersection will be analyzed using the “sum of critical movements” approach as detailed in Art. 12.B. Standard. [Ord. 2006-036]

4. Implementation Timeframe
   Determined during Site Plan review. [Ord. 2006-036]

5. Monitoring and Enforcement
   When this strategy is used, the provision of intersection modifications shall be included in the Development Order as well as the Master Plan or Site Plan. The project’s developer, owner, or agent as appropriate, may request alteration or substitution of the strategy pursuant Art. 12.P.3.F, Time Limits. [Ord. 2006-036]

6. Credit Factor
   Equal to five times the percentage reduction (expressed as a decimal) of the “sum of critical movement” in the operation of the intersection during either the a.m. or p.m. peak hour. The reduction in the critical movement sum is calculated without considering the component of traffic attributable to the proposed development itself. Credit factor shall be calculated in accordance with Table 12.P.4.K-19, Strategy 11 Credit Factor Calculation, below:

   \[
   \text{Credit Factor} = 5 \times (1 - \frac{\text{CS}_M}{\text{CS}_E})
   \]

   where:
   \[\text{CS}_M = \text{the existing sum of critical movements for the intersection}\]
   \[\text{CS}_E = \text{the sum of critical movements for the intersection after the modification}\]

   [Ord. 2006-036]

7. Pooling Improvement by Multiple Developments
   Multiple developments may pool their resources to implement an intersection improvement if the combined trips from the developments do not exceed the improvement to the intersection. In this case, the credit will be given proportionately according to each development’s contribution. [Ord. 2006-036]

8. Example
   An intersection has an existing “sum of critical movements” of 1,500. A proposed improvement will result in a “sum of critical movements” of 1,350. The improvement is 5 \times \left[1 - \frac{(1,350}{1,500}\right] = 5 \times (1 - 0.9) = 0.5. [Ord. 2006-036]

L. Strategy 12. Grade Separated Interchange Improvement

1. Strategy
   This strategy consists of dedicating R-O-W for a proposed grade separated interchange or interchange modification. [Ord. 2006-036]

2. Qualifying Criteria
   a. The interchange improvement must be approved by the Florida Department of Transportation District 4, PBC and/or Florida’s Turnpike District, as appropriate. [Ord. 2006-036]
   b. Credit will only be given for this Strategy if a credit is also earned from one of the following Strategies: 1, 2, 3, 4, 5, 6, 7, 8, or 9. [Ord. 2006-036]
   c. The dedication of R-O-W must be in addition to what is required by government land development regulations and must not be site-related. [Ord. 2006-036]

3. Implementation Timeframe
   Determined during Site Plan review. [Ord. 2006-036]

4. Monitoring and Enforcement
   When this strategy is used, the provision of grade-separated interchange improvements shall be included in the Palm Beach County Comprehensive Plan on either the Thoroughfare Right-of-Way...
Identification Map or Adopted Long Range Plan Map and the area to be dedicated shall be designated in the project’s Development Order/Master Plan. The project’s developer, owner, or agent as appropriate, may request alteration or substitution of the strategy pursuant to Art. 12.P.3.F, Time Limits. [Ord. 2006-036]

5. Credit Factor
(Percentage of total required grade separated interchange improvement R-O-W dedicated by developer expressed as a decimal). [Ord. 2006-036]

M. Strategy 13. Compressed Work Week/Non-Peak Hour Work Hours

1. Strategy
A work site policy implementing a work schedule for full-time (i.e. working at least 35 hours per week) employees for a less than five-day work week by extending hours of work during the remaining work days, with start and end work times that fall outside the normal a.m. (seven to nine a.m.) and p.m. (four to six p.m.) peak hours. [Ord. 2006-036]

2. Qualifying Criteria
a. 20 percent or more of on-site employees must be working the compressed work week schedule. [Ord. 2006-036]
b. Either the start or end work time or both must fall outside the normal a.m. and p.m. peak hours of on-street traffic. [Ord. 2006-036]
c. The work schedules for the affected on-site employees need to be documented on an annual basis. [Ord. 2006-036]
d. Projects must include an on-site coordinator to assist participants in the program, as well as to facilitate program performance tracking and reporting. [Ord. 2006-036]
e. Project must develop a formal policy and contract between employees and managers that shall identify which job categories are eligible for the compressed work week/non-peak work hours option. [Ord. 2006-036]
f. Project must be an employer of 20 or more people. [Ord. 2006-036]
g. For those employees qualifying for credit under the non-peak hour work hours part of Strategy 13, Compressed Week/Non-Peak Work Hours, no credit shall be received for Strategy 5, Ridesharing Programs. [Ord. 2006-036]

3. Implementation Timeframe
One year from date of issuance of the first CO for the Project. [Ord. 2006-036]

4. Monitoring and Enforcement
a. By April 1 of each year, starting April 1 after the first full year after initiating the program, the owner, developer, or their agent, must supply a report to the County Engineer identifying the number of employees from the development participating in the program and the total number of employees employed during the reporting period, and the work schedules of each participant. This monitoring report shall also include a copy of the compressed work week policy and copies of each of the signed compressed work week contracts entered during the reporting period. The County Engineer shall analyze the data for compliance with the Development Order. If the program fails to meet the plan’s specified criteria within one year of Project Buildout, the owner, developer, or agent shall undertake remedial action, or institute an alternate mitigation strategy. [Ord. 2006-036]
b. Two years following initiation of the strategy, the project’s developer, owner, or agent as appropriate, may request alteration or substitution of the strategy pursuant Art. 12.P.3.F, Time Limits. [Ord. 2006-036]

5. Credit Factor
Credit factor shall be calculated in accordance with Table 12.P.4.M-20, Strategy 13 Credit Factor Calculation, below:

<table>
<thead>
<tr>
<th>Table 12.P.4.M-20 – Strategy 13 Credit Factor Calculation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Credit Factor =</td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td>E =</td>
</tr>
<tr>
<td>D =</td>
</tr>
<tr>
<td>H =</td>
</tr>
<tr>
<td>S =</td>
</tr>
</tbody>
</table>

[Ord. 2006-036]
N. Strategy 14. Additional Mitigation Fee Payment

1. Strategy
This strategy involves the payment of mitigation fees in excess of the amount required by the Code for Road Impact Fees. These fees shall be deposited in a separate Okeechobee Boulevard Mitigation Fee Account and shall be used by the BCC to fund road improvements or other Programs designed to improve traffic flow in the Okeechobee Boulevard corridor. [Ord. 2006-036]

2. Qualifying Criteria/Implementation Timeframe
a. Prepayment of the additional mitigation fees shall be required prior to issuance of the first Building Permit. [Ord. 2006-036]
b. Credit will only be given for this Strategy if a credit is also earned from one of the following Strategies: 1, 2, 3, 4, 5, 6, 7, 8, or 9. [Ord. 2006-036]

3. Credit Factor
Credit factor shall be calculated in accordance with Table 12.P.4.N-21, Strategy 14 Credit Factor Calculation, below:

<table>
<thead>
<tr>
<th>Table 12.P.4.N-21 – Strategy 14 Credit Factor Calculation</th>
</tr>
</thead>
<tbody>
<tr>
<td>0.001 x (additional amount of payment in $1,000s) + 0.005 x (percentage excess payment above required impact fee expressed as whole number - up to a maximum of 100 percent)</td>
</tr>
<tr>
<td>[Ord. 2006-036]</td>
</tr>
</tbody>
</table>

4. Example
A project with a Road Impact Fee of 132,000 dollars agrees to pay 100 percent of its fee as an additional mitigation fee payment. The project will thus qualify for a credit factor of (0.001 x 132) + (0.005 x 100) = 0.632. [Ord. 2006-036]

Section 5 CRALLS Mitigation Strategies: Point System Methodology

The following section outlines the methodology for a preliminary Point System to be used in conjunction with CRALLS Mitigation Strategies. This system operates within the context of PBC’s Traffic Performance Standards, in that it assigns trips impacting CRALLS facilities as part of the overall trip generation function. CRALLS Facilities Assigned Trips are defined to include the highest number of Project Net Trips that pass through any single point (intersection or Link) along the Okeechobee Corridor that is within the Project’s Radius of Development Influence (RDI). For example, this would include Project trips assigned to all approaches to an Okeechobee intersection that lies within the RDI, including U-turn movements that must occur at the intersection. Once those assigned trips are understood and classified, a weighting factor can be applied to reflect the intensity of mitigation required by the developer. The “credit factor” used in this system corresponds to the sum of the credit factors derived from the mitigation strategies utilized. [Ord. 2010-022]

<table>
<thead>
<tr>
<th>CRALLS Facilities Assigned Trips (Net 2-way peak hour trips)</th>
<th>Weighting Factor</th>
<th>Minimum Points Needed to Fulfill Mitigation (divide assigned trips by 10)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1-100</td>
<td>5</td>
<td>≤ 10</td>
</tr>
<tr>
<td>101-200</td>
<td>10</td>
<td>11-20</td>
</tr>
<tr>
<td>201-400</td>
<td>20</td>
<td>21-40</td>
</tr>
<tr>
<td>401-800</td>
<td>40</td>
<td>41-80</td>
</tr>
<tr>
<td>801-1,000 (1)</td>
<td>80</td>
<td>81-100</td>
</tr>
<tr>
<td>[Ord. 2006-036]</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Notes:
1. Net 2-way peak hour trips in excess of this number shall be categorized and assigned weighting factors in a proportionate manner to the above Table. [Ord. 2006-036]

A. Calculation to Determine Mitigation
The method of calculation to determine mitigation shall be in accordance with Table 12.P.5.A-23, Calculation to Determine Mitigation, below:
Table 12.P.5.A-23 – Calculation to Determine Mitigation

<table>
<thead>
<tr>
<th>Number of assigned trips ( \times ) credit factor</th>
<th>Points earned</th>
</tr>
</thead>
<tbody>
<tr>
<td>Weighting factor</td>
<td><strong>Table</strong></td>
</tr>
</tbody>
</table>

Notes:
1. The assigned trips include only those trips that are impacted by the specific mitigation strategy.

All credit factor calculations for each strategy are to be rounded off to the nearest one-hundredth prior to summing them to derive total points. [Ord. 2006-036]

B. Example Calculation

1. Impact
   a. Development will impact 100 trips onto CRALLS facility. [Ord. 2006-036]
   b. Developer needs 10 points to achieve CRALLS mitigation. [Ord. 2006-036]

2. Mitigation Examples
   a. Developer chose to implement an access to thoroughfare secondary to CRALLS roadway: [Ord. 2006-036]

\[
\begin{array}{c}
100 \times 0.10 \\
0.5 \\
\text{[Ord. 2006-036]}
\end{array}
\]

   = 20 points

b. Developer chose to implement a feeder route with 30-minute headways: [Ord. 2006-036]

\[
\begin{array}{c}
100 \times 0.05 \\
0.5 \\
\text{[Ord. 2006-036]}
\end{array}
\]

   = 10 points

CHAPTER Q PROPORIONATE SHARE PROGRAM

Section 1 Purpose and Intent

The purpose of this Chapter is to establish a program that meets the requirements of to F.S. § 163.3180(5)(h), as may be amended, by allowing an Applicant to satisfy the traffic concurrency requirements of the ULDC and Plan by entering into a binding agreement to pay for or construct its proportionate share of required improvements [Ord. 2006-043] [Ord. 2018-018]

Section 2 Applicability

The Proportionate Share Program shall apply to all Projects that fail to meet the standards of this Article on a Collector or Arterial Road that is not the responsibility of a Municipality, or that fail to meet the standards of this Article on a transportation facility maintained by FDOT. The Proportionate Share Program does not apply to Developments of Regional Impact (DRIs) using proportionate share under to F.S. § 163.3180(12), or to Projects exempted from this Article. [Ord. 2006-043] [Ord. 2018-018]

Section 3 General Requirements

A. An Applicant may satisfy the transportation concurrency requirements of Palm Beach County by making a proportionate share contribution, pursuant to the following requirements: [Ord. 2006-043] [Ord. 2018-018]

1. The proposed development is consistent with the comprehensive plan and applicable land development regulations. [Ord. 2006-043]

2. Any improvement project proposed to meet the developer’s share obligation must meet Palm Beach County’s design standards for locally-maintained roadways and those of the FDOT for the State highway system. [Ord. 2006-043] [Ord. 2018-018]

3. The proportionate share contribution is applied toward one or more mobility improvements that will benefit a regionally significant transportation facility. [Ord. 2018-018]

4. For Projects located within a Municipality, any Proportionate Share Agreement required by an Applicant in order to meet traffic concurrency must be entered into by the Applicant and PBC prior to receiving a
DO from the Municipality. The County Engineer may rescind a traffic concurrency approval in the event the Project receives a Municipal DO prior to entering into a Proportionate Share Agreement with PBC. [Ord. 2018-018]

Section 4 Intergovernmental Coordination

Pursuant to policies in the Intergovernmental Coordination Element of the Plan, Palm Beach County shall coordinate with affected jurisdictions, including FDOT, regarding mitigation to impacted facilities not under the jurisdiction of the Local Government receiving the application for proportionate share mitigation. An interlocal agreement may be established with other affected jurisdictions for this purpose. [Ord. 2006-043] [Ord. 2018-018]

Section 5 Application Process

A. In the event of a lack of capacity to satisfy transportation concurrency, the Applicant shall have the opportunity to satisfy transportation concurrency through the Proportionate Share Program pursuant to the requirements of Art. 12.Q.3, General Requirements. [Ord. 2006-043] [Ord. 2018-018]
B. Eligible Applicants shall submit an application to the County Engineer. The County may establish an application fee that does not exceed the cost to the County of reviewing the application. [Ord. 2006-043] [Ord. 2018-018]
C. The County Engineer shall review and evaluate the application as part of the Traffic Impact Study as set forth in Art. 12.D, Procedure. [Ord. 2006-043] [Ord. 2018-018]
D. When an application is deemed sufficient, complete, and eligible, a proposed proportionate share obligation and binding agreement will be prepared by the County Engineer or the Applicant and delivered to the appropriate parties for review. [Ord. 2006-043] [Ord. 2018-018]
E. No Proportionate Share Agreement will be effective until approved by the County. [Ord. 2006-043] [Ord. 2018-018]

Section 6 Determining Proportionate Share Obligation

A. Proportionate share mitigation for concurrency impacts may include, without limitation, separately or collectively, private funds, and construction and contribution of facilities. [Ord. 2006-043] [Ord. 2018-018]
B. A Project eligible for participation under the Proportionate Share Program shall not be required to pay more than its proportionate share. The fair market value of the proportionate share mitigation for the impacted facilities shall not differ regardless of the method of mitigation. [Ord. 2006-043] [Ord. 2018-018]
C. The methodology used to calculate a Project’s proportionate share obligation shall be as provided for in F.S. § 163.3180(5)(h), as follows: [Ord. 2018-018]

| The cumulative number of trips from the proposed development expected to reach roadways during peak hours from the complete build-out of a stage or phase being approved, divided by the change in the peak hour maximum service volume (MSV) of roadways resulting from construction of an improvement necessary to maintain the adopted LOS, multiplied by the construction cost, at the time of developer payment, of the improvement necessary to maintain the adopted LOS. OR

| Proportionate Share = Σ [((Development Trips) / (SV Increase))] x Cost]

| Where:
| Development Trips = Those trips from the stage or phase of development under review that are assigned to roadway segment “i” and have triggered a deficiency per TPS.
| SV Increase = Service volume increase provided by the eligible improvement to roadway segment “i” per Art. 12.Q.3, General Requirements.
| Cost = Adjusted cost of the improvement to segment “i.” Cost shall include all improvements and associated costs, such as design, right-of-way acquisition, planning, engineering review, inspection, administration, and physical development costs directly associated with construction at the anticipated cost, including contingencies, in the year it will be incurred. [Ord. 2006-043] |
D. For the purposes of determining proportionate share obligations, the County Engineer shall determine costs of the improvement at the time of application, but shall be subject to an adjustment calculation to account for changes in road development costs that may occur between the date of Proportionate Share Agreement and the date each Proportionate Share Payment is due. The method of calculating said adjustment and appropriate Producer Price Index for Commodities shall be included in the Proportionate Share Agreement. [Ord. 2006-043] [Ord. 2018-018]

E. If the County has accepted an improvement proposed by the Applicant, then the value of the improvement shall be based on an engineer’s certified cost estimate provided by the Applicant and approved by the County Engineer or other method approved by the County Engineer. [Ord. 2006-043]

Section 7 Impact Fee Credit for Proportionate Share Mitigation

A. Proportionate share contributions shall be applied as a credit against impact fees to the extent that all or a portion of the proportionate share mitigation is used to address the same capital infrastructure improvements contemplated by Art. 13, Impact Fees. [Ord. 2006-043] [Ord. 2018-018]

B. Impact fee credits for the proportionate share contribution will be determined when the transportation impact fee obligation is calculated for the proposed development. Impact fees owed by the Applicant will be reduced per the Proportionate Share Agreement as they become due pursuant to Art. 13, Impact Fees. Once the credit has been exhausted, payment of Road Impact Fees shall be required for each permit issued. The impact fee credit shall be established when the proportionate share contribution is received by the County, or when the share amount is secured by Performance Security. [Ord. 2006-043] [Ord. 2018-018]

C. The proportionate share obligation is intended to mitigate the transportation impacts of a proposed Project. As a result, any Road Impact Fee credit based upon proportionate share contributions for a proposed Project cannot be transferred to any other Project. [Ord. 2006-043] [Ord. 2018-018]

Section 8 Proportionate Share Agreements

A. Upon execution of a Proportionate Share Agreement (“Agreement”), the Applicant shall receive a certificate of concurrency approval. Should the Applicant fail to apply for a Development Permit within 12 months, then the Agreement shall be considered null and void, and the Applicant shall be required to reapply. [Ord. 2006-043] [Ord. 2018-018]

B. Payment of the proportionate share contribution shall be non-refundable. [Ord. 2006-043] [Ord. 2018-018]

C. In the event an Agreement requires the Applicant to build one or more road improvements, all such improvements must be commenced prior to issuance of a Development Permit and assured by a binding agreement that is accompanied by a Performance Security sufficient to ensure the completion of all required improvements. It is the intent of this Section that any required improvements be completed before issuance of Certificates of Occupancy. [Ord. 2006-043]

D. Any requested change to a development Project subsequent to a Development Order may be subject to additional proportionate share contributions to the extent the change would generate additional traffic that would require mitigation. [Ord. 2006-043]

E. Applicants may submit a letter to withdraw from the Proportionate Share Agreement at any time prior to the execution of the Agreement. The application fee and any associated advertising costs paid to Palm Beach County will be non-refundable. [Ord. 2006-043] [Ord. 2018-018]

F. Palm Beach County may enter into Proportionate Share Agreements for selected corridor improvements to facilitate collaboration among multiple Applicants on improvements to a shared transportation facility. [Ord. 2006-043] [Ord. 2018-018]

ARTICLE 13
IMPACT FEES

CHAPTER A  GENERAL

Section 1  Intent, Authority, and Findings

A. Intent
This Article is intended to implement and be consistent with the Comprehensive Plan and to regulate the use and development of land. It is the intent of PBC that new development shall bear a proportionate share of the cost of capital expenditures necessary to provide park, fire-rescue, library, law enforcement, public building, schools, and road capital facilities in PBC as is contemplated in the Plan. Impact fees shall not be used to collect more than is necessary to fund such capital facilities. The impact fees in this Article are based on the Impact Fee Report, as amended, which establish a fair and equitable allocation of costs and recognize past and future payments from new development, as well as credits for in-kind contributions, and municipal provision of like facilities under certain circumstances. Funds collected from impact fees shall not be used to replace existing capital facilities or to fund existing deficiencies, but only to provide for new capital facilities which are necessitated by new development.

B. Authority
The provisions of this Article are authorized by Art. VIII, § 1(g), Fla. Const., F.S. § 125.01 et seq., F.S. § 163.3161 et seq., F.S. § 163.31801, F.S. § 1011.19, and F.S. § 380.06, Sec. 1.3(2), the PBC Charter, and the Capital Improvement Element of the Plan. In addition, the provisions of this Article are necessary for the implementation of the Plan. The inclusion of certain capital facilities in these impact fees shall not be construed as a limitation on the authority of PBC to impose impact fees for additional capital facilities consistent with Florida law. [Ord. 2005-047] [Ord. 2014-025]

C. Findings
PBC finds that the provisions of this Article are land development regulations which are: necessary for the implementation of the Plan; needed to ensure that developments of regional impact are assessed impact fees under F.S. § 380.06; innovative land development regulations authorized by F.S. § 163.3202(3); necessary to ensure the coordination of new development and the provision of capital facilities, especially sites for new schools; a mandatory responsibility of PBC under the Local Government Comprehensive Planning and LDR Act, F.S. § 163.3161 et seq.; consistent with the requirements in F.S. § 163.31801; and, necessarily and reasonably related to the public health, safety, and welfare. [Ord. 2014-025]

D. Definitions

Section 2  Applicability

This Article shall apply to the unincorporated area of PBC and to the municipalities in PBC to the extent permitted by the PBC Charter and Art. VIII, § 1(g), Fla. Const., unless otherwise expressly stated in this Article.

Section 3  Exemptions

The following development shall be exempt from payment of respective impact fees, as applicable:

A. Any development that results in no new impact on a capital facility for which the impact fee is assessed.

B. The construction of accessory buildings or structures which will not produce new additional impact on a capital facility over and above that produced by the principal building or use of the land.

C. For the purpose of School Impact Fees, the construction of adult only residences that meet the Fair Housing Act exemption codified at 42 U.S.C. 3607, as may be amended; provided, however, that the feepayer files a Declaration of Restrictive Covenants prepared and signed by the Impact Fee Coordinator which prohibits persons 19 years of age or younger from residing in the residence for more than 60 days per calendar year. The School Impact Fee Declaration of Restrictive Covenants must be filed with the Clerk of the 15th Judicial Circuit Court. [Ord. 2005-047]

D. The construction of publicly owned and operated governmental buildings or facilities.

All applications for exemption must be approved by the Impact Fee Coordinator. A final decision of the Impact Fee Coordinator may be appealed pursuant to Art. 13.A.6.G, Appeal. All applications for exemption must be made in writing to the Impact Fee Coordinator prior to Building Permit issuance. In the event that the feepayer wishes to
obtain Building Permits prior to the Impact Fee Coordinator’s final approval, the feepayer may apply for the exemption and deposit the required impact fee assessment into an escrow account, pursuant to an escrow agreement in a form provided for by the Impact Fee Coordinator. PBC may assess a reasonable fee not to exceed its actual cost in processing the escrow agreement to be paid by the feepayer.

Section 4 Imposition of Fee

A. New Land Use

Any new land development creating an impact on any public facility as defined in this Code shall be required to pay impact fees in the amount and manner set forth in this Article to help regulate the new land development's impact on those public facilities. No Building Permit for any land development requiring payment of an impact fee pursuant to this Article shall be issued until the impact fee has been paid by the feepayer. No Building Permit for any land development requiring payment of an impact fee pursuant to this Article shall be renewed or extended until the impact fee in effect at the time of the renewal or extension has been paid by the feepayer; provided, however, that additional impact fees will not be required where the development has completed and passed all applicable rough inspections for the proposed Building Permit. For those land uses that do not require a Building Permit, the impact fee shall be paid prior to issuance of a Development Order that initiates impact on public facilities. Payment of the impact fee shall not relieve the feepayer from the obligation to comply with Art. 2.F, Concurrency (Adequate Public Facility Standards), or any other portion of this Code. [Ord. 2005-047]

B. Expansion, Replacement, or Change of Use of Existing Land Uses

Any existing land use that is expanded, replaced, or changed shall be required to pay impact fees based on the new or additional impact as a result of the expansion, replacement, or change of use. The feepayer may be eligible for credit for the existing land use pursuant to Art. 13.A.11.A.1, Submission of Application.

Section 5 Computation of Impact Fee

A. General

At the option of the feepayer, the amount of the impact fee may be determined either by the Impact Fee schedules for each impact fee component as provided for in this Article, or by an independent calculation pursuant to Art. 13.A.6, Independent Fee Calculation Study. If the amount of the impact fee for the land use is not determined in the Impact Fee schedule and the feepayer opts not to conduct an independent calculation, the impact fee shall be determined by the Impact Fee Coordinator as described in this Article. [Ord. 2005-047]

B. Impact Fee Schedule

The impact fees in the Impact Fee schedules have been calculated using the data and methodologies described in the Impact Fee Report, as amended. Impact fees are applicable to new development in unincorporated PBC and the municipalities within PBC, and the impact fee schedules establish impact fees based on the proportional impacts of, and benefits to, new development on and from capital facilities provided by PBC and the School Board.

C. Land Uses Not Specified in Impact Fee Schedule

Except for Road Impact Fees, if the type of land development for which a Building Permit or other appropriate permit is applied, is not specified on the impact fee schedule, the Impact Fee Coordinator shall use the impact fee applicable to the most nearly comparable type of land use on the fee schedule. For Road Impact Fees, the Impact Fee Coordinator shall select the most comparable type of land use from the most current edition of Trip Generation, a publication of the Institute of Transportation Engineers (ITE). The Impact Fee Coordinator shall follow the procedure pursuant to Art. 13.A.6, Independent Fee Calculation Study. [Ord. 2005-047]

D. Mixed Use

For mixed use development where there is a Development Order expressly identifying the type and proportion of uses within the development, the impact fee shall be determined by applying the fee schedule to the uses and proportions of use specified in the Development Order. For mixed use development where there is no Development Order specifically limiting the type and proportion of uses within the development, the impact fee shall be determined using the fee schedule for the most intense use.

E. Errors and Omissions

Errors and omissions, including computational and clerical errors, identified within four years of Building Permit issuance may be subject to correction by the affected parties, including the feepayer. Computational or clerical errors do not excuse the affected parties, including the feepayer, from paying all impact fees due. [Ord. 2005-047]
F. Biennial Review  
Biennially beginning in January 1994, the Impact Fee Coordinator shall recommend to the BCC whether any changes should be made to the fee schedules to reflect changes in the factors that affect the fee schedules. This recommendation shall be as a result of a review of the data from which the fee schedules are calculated. The purpose of this review is to evaluate the level of service for each impact fee component to determine whether it should be adjusted based on changed conditions, to analyze the effects of inflation and other cost factors on the actual costs of capital facilities, to assess any changes in credits and generation rates, and to ensure that the impact fee charged new land use activity impacting capital facilities will not exceed its pro rata share for the reasonably anticipated costs of capital facilities necessitated by the new land development.

Section 6 Independent Fee Calculation Study

A. General  
If a feepayer opts not to have the impact fee determined according to the fee schedule, then the feepayer shall, at the feepayer's expense, prepare and submit to the Impact Fee Coordinator an independent fee calculation study for the proposed land use. An independent fee calculation study for Road Impact Fees shall be submitted simultaneously to the Impact Fee Coordinator and the County Engineer. The independent fee calculation study shall follow the methodologies used in the Impact Fee Report. The independent fee calculation study shall be conducted by a professional in impact analysis. An independent fee calculation study for Road Impact Fees shall be conducted by a professional in Road Impact Fee analysis or by a registered engineer. The burden shall be on the feepayer to provide the Impact Fee Coordinator all relevant data, analysis, and reports which would assist the Impact Fee Coordinator in determining whether the impact fee should be adjusted.

B. Submission of Application  
The application for an independent calculation study shall be submitted to the Impact Fee Coordinator, except that an independent calculation study for Road Impact Fees shall be submitted simultaneously to the Impact Fee Coordinator and the County Engineer. In the event that the feepayer wishes to obtain Building Permits prior to the Impact Fee Coordinator's final approval, the feepayer may submit an application and deposit impact fees as set forth in the impact fee schedule into an escrow account, pursuant to an escrow agreement in a form provided by the Impact Fee Coordinator. A feepayer failing to submit an independent fee calculation study, or, if necessary, an executed escrow agreement to the Impact Fee Coordinator prior to permit issuance is deemed to have waived the right to an impact fee adjustment based on the independent fee calculation study.

C. Contents of Application  
The application shall be in a form established by the Impact Fee Coordinator and made available to the public. The independent fee calculation study shall follow the methodologies used in the Impact Fee Report. A feepayer wishing to perform an independent fee calculation study for Road Impact Fees shall prepare a traffic impact analysis, which shall include, as appropriate, documentation of:
1. Trip generation rates appropriate for the proposed land use;
2. Trip distribution and traffic assignments;
3. Trip length data appropriate for the proposed land use;
4. Any other trip data employed in the independent fee calculation that is appropriate for the proposed land development; and,
5. Economic documentation included, but not limited to:
   a. Costs for roadway construction, including the cost of right-of-way, design, and engineering appropriate for the necessary road improvements.
   b. Credits attributable to the proposed land use for roadway improvements which can be expected to be available to replace the portion of the service volume used by the traffic generated by the proposed land development.
   c. The shortfall when the credits attributable to the proposed land use are considered.

D. Determination of Sufficiency  
The Impact Fee Coordinator shall determine if the application is sufficient within five working days of its receipt. If the Impact Fee Coordinator determines the application is not sufficient, a written notice shall be mailed to the applicant specifying the deficiencies. No further action shall be taken on the application until the deficiencies are remedied.
E. Action by Impact Fee Coordinator

1. Impact Fees Other Than Roads
   For other than Road Impact Fees, within ten working days after the application is determined to be sufficient, the Impact Fee Coordinator shall review the application, and if the application clearly demonstrates by the methodology described in the Impact Fee Report that the proposed land will use capital facilities less than that projected in the impact fee component, the Impact Fee Coordinator shall appropriately adjust the impact fee.

2. Road Impact Fees
   For Road Impact Fees, within 15 working days after the application is determined to be sufficient, the County Engineer shall review the application and, if the application clearly demonstrates (using the formulae described in this Article) that the proposed land use will create fewer trips than projected in the Road Impact Fee component, the County Engineer shall make a written recommendation to the Impact Fee Coordinator on adjusting the Road Impact Fee. If the Impact Fee Coordinator concurs, the Impact Fee Coordinator shall appropriately adjust the impact fee within five working days of receipt of the County Engineer's recommendation. [Ord. 2005-047]

3. Responsibility of Feepayer
   The burden shall be on the feepayer to provide all relevant data, analysis and reports which would assist the Impact Fee Coordinator and, in the case of roads, the County Engineer in making a determination of the appropriate impact fee. The analysis and report must be based on generally accepted methods and the formulas for the specific impact fee component in the Impact Fee Report, or in the case of roads, the methods and formulas described in this Article and below in Art. 13.H, Road Impact Fees. A feepayer wishing to provide additional information after submitting the initial independent fee calculation study must do so no later than 30 days after the date of the Impact Fee Coordinator's determination of sufficiency. The Impact Fee Coordinator will not accept additional information relevant to an independent fee calculation study after this deadline. If the impact fee is adjusted the feepayer shall provide a copy of the Impact Fee Modification Certificate at the time of permit issuance. Failure to provide a copy of the certificate at the time of permit issuance shall constitute a waiver of any adjusted impact fee. [Ord. 2005-047]

4. Decision in Writing
   The decision of the Impact Fee Coordinator to adjust or to refuse to adjust the impact fee shall be in writing and shall be transmitted to the applicant by certified mail within five days of the decision. An approved adjustment shall be issued in the form of an “Impact Fee Modification Certificate” which shall include information regarding:
   a. project location and name if available;
   b. square footage of project;
   c. adjusted trip generation; and, d. property control numbers.

F. Covenant Running with the Land
   The Impact Fee Coordinator shall require that a covenant running with the land be executed and recorded in the official records of the Clerk of the Circuit Court on the development's land before the Building Permit is issued in cases where:
   1. The independent fee calculation is based on a use of land having a lesser impact than set forth in the impact fee schedule; or
   2. The development could be put to a use having a greater impact than that proposed in the independent fee calculation study without being required to secure a permit or approval for the use; or
   3. For such other reasons that make a covenant necessary to ensure compliance with this Article.

G. Appeal
   1. Hearing Officers, as established in Art. 2.G.3.G, Hearing Officers, are hereby authorized to hear and decide appeals of decisions by the Impact Fee Coordinator concerning independent fee calculations and interpretations of the Article. [Ord. 2014-025]
   2. An applicant shall file an appeal with the Impact Fee Coordinator by filing a letter of appeal within 15 working days of a decision by the Impact Fee Coordinator. The letter of appeal must state with specificity the reasons for the appeal and shall contain such data and documentation upon which the applicant seeks to rely. The Impact Fee Coordinator may establish a reasonable fee to be paid by the applicant upon filing an appeal. This fee shall not exceed the cost to the County in processing the appeal. [Ord. 2005-047] [Ord. 2014-025]
   3. The Impact Fee Coordinator shall schedule a hearing before the Hearing Officer no later than 90 working days after an appeal has been filed. The Impact Fee Coordinator shall notify the applicant of the hearing date at least 15 working days in advance of the hearing and invite the applicant or the
applicant’s representative to attend the hearing. Any of the time limitations set forth in this paragraph may be waived upon mutual agreement of the Impact Fee Coordinator and the party filing the appeal. [Ord. 2014-025]

4. At the hearing, the Hearing Officer shall provide the applicant and the Impact Fee Coordinator an opportunity to present testimony and evidence, provided such information was part of the review before the Impact Fee Coordinator. The Hearing Officer shall reverse the decision of the Impact Fee Coordinator only if there is substantial competent evidence in the record that the Impact Fee Coordinator erred from the standards in this Chapter. [Ord. 2011-016] [Ord. 2014-025]

5. Any aggrieved party, including PBC, may appeal an order of the Hearing Officer to the Fifteenth Judicial Circuit Court of PBC. Such appeal shall not be a hearing de novo, but shall be a petition for Writ of Certiorari and the Court shall be limited to appellate review of the record created before the Hearing Officer. PBC may assess a reasonable fee for the preparation of the record to be paid by the Petitioner in accordance with F.S. § 119.07, as amended from time to time. [Ord. 2011-016] [Ord. 2014-025]

Section 7 Collection and Administrative Fees

A. Timing and Collection of Payment

1. Collected at Building Permit or Other Development Order
   The person applying for issuance of a Building Permit shall pay the impact fee to the PZB Department, or to the person designated by a municipality to collect the fee (if the municipality is collecting the fee), prior to the issuance of a Building Permit, or if a Building Permit is not required, prior to issuance of the Development Order that authorizes development which places impact on capital facilities for which impact fees are charged.

2. Municipality May Require Direct Payment to County
   A municipality reviewing its own applications for Development Permits may opt to have PBC collect the impact fees, pursuant to interlocal agreement. If PBC is the permitting authority for the municipality by interlocal agreement, no additional interlocal agreement is necessary for PBC to collect impact fees for permits issued for that municipality. If PBC collects the impact fees, the municipality shall not be entitled to the administrative fee. PBC shall not charge the municipality for collecting the impact fee. The municipality shall be responsible for ensuring that all impact fees are paid before issuing any Building Permit or other permit. One municipality may opt to have a second municipality review Development Permits and collect impact fees on behalf of the municipality, provided the municipality that collects impact fees maintains separate records to account for the collection and remittance of the impact fees to PBC in accordance with this Article. [Ord. 2010-018] [Ord. 2012-003]

3. Municipalities are Collecting Agents
   Municipalities collecting impact fees under this Section are acting only as collecting agents for PBC. Such municipalities shall be responsible to PBC for the proper collection and remittance of impact fees, but shall not be liable for the inadvertent miscalculation of impact fee amounts.

B. Administrative Fees
   The local government collecting the impact fee shall be entitled to retain 3.4 percent of the funds collected as an administrative fee not to exceed the costs associated with the collection of the impact fees. [Ord. 2008-015]

C. Fees Transferred to Trust Funds

1. Fees Collected by County
   All impact fees collected by the County, less the administrative fee, shall be properly identified by benefit zone for each impact fee component and transferred daily for deposit in the appropriate impact fee trust fund to be held in separate accounts for each impact fee component and each benefit zone. [Ord. 2010-018]

2. Fees Collected by Municipalities
   a. On-Time Remittance
      All impact fees collected by the municipalities, less the administrative fee, shall be remitted to the County Finance Department within 15 calendar days following the month in which the impact fees are collected. One draft may be used to remit the funds to PBC. Funds received from the municipalities shall be deposited promptly in the appropriate impact fee trust fund. [Ord. 2008-015]
b. **Late Remittance**
In the event a municipality fails for two or more consecutive months or for any three months in a calendar year period to remit impact fees by the 25th calendar day of the month following the end of the month in which the impact fees are collected, the municipality shall pay simple interest at the statutory rate on the entire amount collected but not yet remitted to PBC. Interest shall accrue beginning the first day of the month following the end of the month in which the affected impact fees were collected by the municipality. For the purposes of this Section, funds shall be considered to have been remitted to PBC on the date postmarked, if transmitted by certified mail with the proper postage. [Ord. 2005-047]

c. **Transfer of Receipts**
If receipts are transferred in accordance with this Section, the municipalities may retain any interest earned on impact fees collected prior to the transfer of the funds to PBC in addition to the administrative fee to offset the costs of collecting, remitting, and accounting for the funds. [Ord. 2005-047] [Ord. 2008-015]

D. **Record Keeping**
Records shall be maintained by all local governments to ensure proper accounting controls. PBC shall have the authority to audit the records of any municipality to ensure the procedures and standards of this Section are being met by the municipality. Public reports on impact fees shall be provided by the Impact Fee Coordinator on at least an annual basis and distributed to each municipality. Such reports will account for receipts of impact fees for each impact fee, by benefit zone and municipality, and encumbrances and expenditures of the funds by benefit zone.

E. **Impact Fee Coordinator to Furnish Information and Advice to the Municipalities**
The Impact Fee Coordinator shall furnish such information and advice to the municipalities necessary to ensure proper collection, remittance, accounting, controls, and auditability.

Section 8 **Benefit Zones and Trust Funds**

A. **Establishment of Benefit Zones**
One or more impact fee benefit zones are hereby established for each impact fee component, as set forth in this Article. [Ord. 2005-047]

B. **Establishment of Trust Funds**
Separate impact fee trust funds for each impact fee benefit zone for each impact fee component are hereby established for the purpose of earmarking all impact fees so that all expenditures of impact fees sufficiently benefit new development in the benefit zone from which the impact fees were collected.

Section 9 **Use of Impact Fees**

A. **Investment in Interest Bearing Accounts**
All impact fees on deposit in the trust funds shall be invested in interest bearing sources, and the income derived shall be applied to the applicable trust fund.

B. **Limitation within Benefit Zones**
Impact fees collected shall be used exclusively for new capital facilities for the impact fee component within the impact fee benefit zones from which the impact fees were collected, except that if an impact or traffic analysis made by a professional experienced in impact analysis and approved by the Impact Fee Coordinator demonstrates that a planned development substantially impacts the need to expand the capacity of specific public capital facilities in another benefit zone, then impact fees paid by that planned development may be expended on those specific capital facilities in another benefit zone.

C. **Expenditures Shall Benefit New Development**
Impact fees shall be used only for capital facility costs for which the impact fees are levied and which add capacity needed to serve new development.

D. **Non-Lapsing**
The respective trust funds shall be non-lapsing.

E. **Annual Capital Facility Programs**
Annually, the County Administrator shall present to the BCC a proposed capital improvement program for each public facility for which an impact fee is charged, assigning funds, including any accrued interest, from the several impact fee trust funds to specific improvement projects and related expenses. Monies, including any accrued interest not assigned in any fiscal period shall be retained in the same impact fee trust funds until the next fiscal period, except as provided by the refund provisions of this Article.
A. General

1. Non-Commencement of Construction

If a Building Permit or other permit requiring payment of an impact fee expires or is canceled or revoked, the structure has not been completed, and no certificate of occupancy has been issued, or if the permit is modified prior to completion of construction so as to change the land use or structure to one of lower impact than that on which the permit was originally issued, then the feepayer, or if the property has been conveyed after payment of the fee, the successor in interest to the real property, shall be entitled to a refund provided: an application for refund is submitted within three years of the payment of the impact fee; within one year of the permit's expiration, cancellation, revocation, or modification, or of the event giving rise to the refund; and the impact fee paid for approval of the permit has not been encumbered or spent by PBC or the School District as applicable. PBC shall retain an additional 3.4 percent of the impact fee to offset the costs of administering the refund. [Ord. 2010-018] [Ord. 2014-025]

2. Untimely Encumbrance

a. Untimely Encumbrance

Notwithstanding Art. 13.A.10.A.1, Non-Commencement of Construction, above, if PBC fails to encumber the impact fees paid by the feepayer by the end of the calendar quarter immediately following six years from the date the impact fees are paid, and fails to spend the impact fee within nine years of the end of the calendar quarter in which the impact fees are paid, the feepayer, or if the property has been conveyed after payment of the fee, the successor in interest to the real property, shall be entitled to a refund except that PBC shall retain an additional 3.4 percent of the impact fee to offset the costs of refund. The feepayer, or if the property has been conveyed after payment of the fee, the successor in interest shall submit an application for refund to the Impact Fee Coordinator, within one year following the end of the calendar quarter in which the right to a refund occurs. In determining whether the impact fee paid by the feepayer has been encumbered or spent, monies in the trust funds shall be considered to be expended on a first in, first out basis; that is, the first impact fees paid shall be considered the first monies withdrawn. [Ord. 2010-018] [Ord. 2014-025]

b. Notification of Potential Refund

If more than five percent of the impact fees collected in any fiscal year within any trust fund are unencumbered after the end of the sixth fiscal year following the fiscal year in which the impact fees were collected, PBC shall notify the present owners of lands for which the unencumbered impact fees were paid of the possibility of a refund. Any claim for a refund of impact fees shall be deemed waived if application for a refund is not received within six months of the mailing or delivery of such notice.

3. Computational or Clerical Errors and Omissions

During the period of time specified in this Article for the correction of errors and omissions, the feepayer or a successor in interest to the real property against which an impact fee was incorrectly assessed through computational or clerical error may request a refund from the Impact Fee Coordinator in the manner set forth in paragraph b of this Section. [Ord. 2005-047]

B. Procedure to Obtain Refund

1. Submission of Application

An application for refund shall be submitted to the Impact Fee Coordinator on a form provided by the Impact Fee Coordinator.

2. Contents of Application

The application shall be in a form established by the Impact Fee Coordinator and made available to the public, and shall contain the following:

a. Receipt

A copy of the dated receipt issued for payment of the impact fee;

b. Permit

If the refund is requested due to non-commencement of construction, and the permit was issued by PBC, the Building Permit or other permit for which the impact fees were paid;

c. Evidence

If the refund is requested due to non-commencement of construction, evidence that the applicant is the feepayer or a successor in interest to the feepayer;
d. **Documents**
If the refund is requested, a notarized sworn statement that the applicant is the current owner of the land for which the impact fee was paid, a certified copy of the current deed, and a copy of the most recent ad valorem tax bill; If refund is requested due to computational or clerical error, evidence sufficient to demonstrate overpayment including but not limited to receipt indicating payment, Building Permit application, Impact Fee Tables in effect at the time of payment, and such other evidence deemed appropriate by the Impact Fee Coordinator; 

```
```

e. **Cancellation of Permit**
If relevant, proof from the municipality that the permit has been canceled, and a copy of the permit issued by the municipality; and, 

```
[Ord. 2008-015]
```

e. **Date Fund Forwarded**
If relevant, the date on which the municipality forwarded the funds to PBC.

3. **Determination of Sufficiency**
The Impact Fee Coordinator determines if the application is sufficient within five working days.

a. **Sufficiency**
If the Impact Fee Coordinator determines the application is not sufficient, a written notice shall be mailed to the applicant specifying the deficiencies. No further action shall be taken on the application until the deficiencies are remedied.

b. **Notification**
If the application is determined sufficient, the Impact Fee Coordinator shall notify the applicant, in writing, of the application's sufficiency and that the application is ready for review pursuant to the procedures and standards of this Article.

4. **Action by Impact Fee Coordinator**
Within 45 working days after the application is determined sufficient, the Impact Fee Coordinator shall review and approve or deny the application based upon the standards in Art. 13.A.10, Refunds. The decision of the Impact Fee Coordinator may be appealed pursuant to Art. 13.A.6.G, Appeal.

```
[Ord. 2008-015]
```

Section 11 **Credits**

A. **General**
Credit against impact fees shall be given to the feepayer, or if the property has been conveyed after payment of the fee, the successor in interest to the property for the following, as limited or permitted by specific provisions of this Section. 

```
[Ord. 2014-025]
```

1. **Submission of Application**
All applications for credit must be approved by the Impact Fee Coordinator. An application for credit shall be on a form provided by the Impact Fee Coordinator. In the event that the feepayer wishes to obtain Building Permits prior to the Impact Fee Coordinator's final approval, the feepayer may submit an application and deposit impact fees as set forth in the impact fee schedule into an escrow account, pursuant to an escrow agreement in a form provided for by the County. A final decision of the Impact Fee Coordinator may be appealed pursuant to Art. 13.A.6.G, Appeal.

2. **Redevelopment of Existing Building/Change in Land Use**

a. **Determination**
Where alteration, expansion, or replacement of a building or unit, or a change in land use which involves any increase in the number of units or square footage, or a change in use resulting in new impacts on a capital facility for which the impact fee is assessed, existing use credit shall be given for the number of existing units or square footage based upon the previous land use and applied against impact fees otherwise due. The burden of verifying the previous land use and units or square footage as applicable shall be on the feepayer.

b. **Certification**
The feepayer shall provide to the local government issuing the Building Permit a certification of an architect, engineer, surveyor, contractor, or the building official having jurisdiction, setting forth the square footage of the existing building. In the case of an addition to an existing residential building, the feepayer, at the feepayer's sole option, may pay the impact fee for the addition as if it alone were a new building rather than provide the certification setting forth the square footage of an existing building.
c. Abandoned Use
A use of a structure or land which has been abandoned shall be considered existing for the purposes of calculating existing use credit pursuant to this Section. The burden of verifying the previous land use and units or square footage as applicable shall be on the feepayer.

3. Special District Assessments
Where, upon prior approval by PBC, the same new capital facility is provided by a special district rather than PBC and the feepayer is assessed for the new capital facility, the County shall by interlocal agreement with the special district, apply the impact fees collected from the benefited property to retire debt issued by the district to finance the capital facility.

4. In-Kind Contributions
In-kind contributions made by a development to PBC shall be credited against the development's impact fees, but only to the impact fee component for which the in-kind contribution is made. For example, credits received for a park contribution may be applied only against Park Impact Fees and not against Fire-Rescue Impact Fees. Civic site dedications accepted by the County shall be eligible for a Public Buildings Impact Fee credit in the event a particular use is not identified by the County at DRO certification. No credit shall be given for in-kind contributions that are not new capital facilities or which were not made for capital facilities costs. [Ord. 2008-015]

a. Time for Giving of Credit
Credit shall be given for land at such time as marketable title in fee simple absolute is conveyed to the County, free of encumbrances with such documentation and requirements set by the BCC or the County Administrator for the acceptance of real property. Credit shall be given for personal property at such time as a bill of sale absolute and, where applicable, title for such property is delivered to PBC. Credit shall be given at such time as the funds are delivered to PBC. In the case of in-kind road facility contribution, credit will be given when the construction is completed and accepted by PBC. Credit against Road Impact Fees may be given before completion of the specified roadway construction if the feepayer posts security in form and amount acceptable to the County Engineer. In no event shall the amount of credit given exceed the actual cost of the construction determined by the County Engineer and the Impact Fee Coordinator to be eligible for Road Impact Fee credit. [Ord. 2005-047]

b. In-Kind Contributions for Road Facilities Prior to March 1, 1989
In-kind contributions for road facilities from developments in municipalities not previously subject to Road Impact Fees shall be apportioned according to the provisions in Art. 13.A.11.A.4.b, In-Kind Contributions Made Prior to October 1, 1989, for Facilities Other Than Roads, except that the effective date for apportionment of the credit shall be March 1, 1989.

c. In-Kind Contributions Made after October 1, 1989, Except Road Facility Contributions
The standards of this Section shall apply to the valuation of any in-kind contribution made after October 1, 1989, except as provided elsewhere in this Article.

d. Valuation of In-Kind Road Facility Contribution
If the value of the in-kind contribution increase (as evidenced by an increase in Road Impact Fee rates) between the time of the in-kind contribution and the time of the issuance of a Building Permit, the developer may apply for additional credit by submitting an independent calculation to the Impact Fee Coordinator, for review by the PBC Engineering Department. Such application must be made within six months of the effective date of a Road Impact Fee increase, or this right shall be waived. The independent calculation must be prepared by a state registered engineer or a professional in impact analysis and must demonstrate that the current cost of reproducing the road construction has increased and therefore the value of the in-kind contribution has correspondingly increased. Any additional credit shall not exceed the percentage of increase of the Road Impact Fee.

5. Credits for Contributions to Local Governments Other Than PBC
Contributions of or for new capital facilities to a local government other than PBC or by a special district may be given only upon an application to the Impact Fee Coordinator. Approval of the Impact Fee Coordinator must be obtained prior to the contribution. The Impact Fee Coordinator, after consultation with the agency charged with supervising the provision of the new capital facility, shall determine whether the contribution shall receive a credit based on the following standards. [Ord. 2005-047]

a. Consistency
Consistency with the Plan as to the cost, location, and size of the facility and its timing.

b. Amount
The amount that would be spent by PBC if it were to construct the same new capital facility.
c. **Extent**  
The extent to which the new capital facility provides the same or similar functions as the new capital facility for which the credit is sought.

d. **Continuity**  
The extent of control that PBC has in ensuring that the new capital facility will continue to provide the same or similar functions.

e. **Availability**  
Whether the new capital facility is open or available to all persons regardless of residency.

f. **Plans**  
The short and intermediate-range plans of the agency which would receive the impact fee funds regarding the timing, location, cost, and size of the new capital facility.

g. **Impact**  
The impact of encouraging new development in the area that would be served by the new capital facility or the ability of local government or the special district to provide other needed infrastructure and services.

h. **Pattern**  
The pattern of development and its relationship to other development, infrastructure, and resources that could result from encouraging new development.

i. **Budget**  
The budget of PBC and other local governments, and the allocation of revenues within those local governments.

6. **Special Provisions for Park Credits**

No credit shall be given for park contributions or dedications required by Art. 5.D.2.B, Community and Neighborhood Park Recreation Standards. No such contribution or dedication shall be used for County District, Regional, or Beach Parks. Contributions for County parks resulting from Art. 2.F, Concurrency (Adequate Public Facility Standards), shall be credited as provided above. In-kind contributions of capital facilities which are not County District, Regional, or Beach Parks, if accepted by the County, shall be provided partial credit as follows: [Ord. 2005-047]

   a. **40 to 60 Acres**  
   75 percent of the value at the time of conveyance, dedication, construction, placement, delivery, or remittance shall be credited in accordance with the other provisions of this Section for contributions for or of County parks less than 60 acres but equal to or more than 40 acres;

   b. **20 to 40 Acres**  
   50 percent of the value at the time of conveyance, dedication, construction, placement, delivery, or remittance shall be credited in accordance with the other provisions of this Section for contributions for or of County parks less than 40 acres but equal to or more than 20 acres;

   c. **20 Acres or Less**  
   25 percent of the value at the time of conveyance, dedication, construction, placement, delivery, or remittance shall be credited in accordance with the other provisions of this Section for contributions for or of County parks less than 20 acres.

7. **Special Provisions for School Credits**

   a. **General**  
   Dedications of land for use as school may, if accepted by the School Board, be credited against School Impact Fees. The School Board or the Superintendent shall have responsibility for evaluating, according to the standards contained herein, a proposed dedication under this Subsection. An application for a dedication credit shall be in a form prescribed by PBC, and shall contain such information as to guide the School Board and Superintendent in reviewing the application for consistency with these standards. If any credit against any School Impact Fees is given, the dedication shall be credited in an amount equal to its full fair market value at the time of dedication, and shall not exceed the full dedication cost. The proposed dedication shall comply with, and be reviewed considering, the following standards.

   1) **Location**  
   The proposed dedication shall be located so as to provide the greatest access to students. If a single development will not generate sufficient students to fill a school, it should be located so as to be easily accessible to students from neighboring areas.

   2) **Distance**  
   The proposed dedication shall create an appropriate distance between existing or planned schools: one mile for elementary schools, two miles for middle schools, and three miles for high schools.
3) **Hazards**
   The proposed dedication and surrounding areas shall be free from health or safety hazards and shall be protected against noise, air pollution, and/or odors.

4) **Access**
   The proposed dedication shall be accessible from two different streets, with one street preferably a Collector Street. This standard shall be waived for elementary or middle schools if access is available on one street from two directions. Dedications should not be located on Arterial Roads; however, if such dedications are proposed, they may be considered if provision is made for the construction of overpasses or pedestrian lights. The construction of median cuts, left turn lanes, and storage lanes shall be practicable to facilitate access to the proposed dedication by buses and automobiles.

5) **Safe Transit**
   The proposed dedication shall be located so as to facilitate safe transit to neighboring areas by sidewalks, walkways, and/or bike paths.

6) **Services**
   The proposed dedication shall be evaluated for the availability of central water and sewer, electricity and phone services, and for its proximity to fire hydrants.

7) **Entrances**
   All proposed dedications shall allow at least two separate entrances for school buses and staff; high school dedications shall also provide separate entrances for students and parent drop off. All dedications shall allow for adequate parking for buses; elementary and middle school dedications shall allow for parking for 120 staff automobiles, high school dedications shall allow for 225 staff and 425 student parking spaces.

8) **Minimum Size/Dimensions**
   In addition to providing sufficient area to accommodate on site retention of stormwater, proposed school dedications shall be of the following minimum sizes and shall have the following minimum dimensions: elementary schools shall have a minimum site size of 15 acres, with a minimum 780 feet of frontage and 840 feet of depth; middle schools shall have a minimum site size of 25 acres, with a minimum frontage of 800 feet and a depth of 1,360 feet; high schools shall have a minimum site size of 50 acres, with a minimum frontage of 1,200 feet and a depth of 1,800 feet.

9) **Bus Stops**
   When the school dedication is located within a residential development, provision of a circulation system or turnaround area with a 90-foot diameter shall be available so that buses need not back up to leave the development. Bus stop locations, preferably located adjacent to a public area such as a park, shall be provided so that buses do not have to enter the development.

10) **Consistency**
    The dedication shall be examined for consistency of the proposed use with applicable comprehensive plans, land development regulations, and concurrency provisions.

b. **Consideration and Acceptance by School Board**
    All applications for a school credit shall be reviewed and a response issued by the Superintendent or the School Board within 60 working days of the submission of the application. If the request is approved, the Superintendent shall notify the Impact Fee Coordinator, and if other than PBC, the local government issuing the Development Permit. The Impact Fee Coordinator shall determine the value of the credit. No credit shall be given until the dedication is conveyed to the School Board in accordance with this Section. [Ord. 2005-047]

c. **Conveyance to the School Board**
    To convey dedications to the School Board, the feepayer shall provide, at no cost to the School Board and in a form approved by the School Board's attorney, the following documents.

1) **Abstract of Title**
   A complete and current abstract of title together with a title insurance commitment to insure the property in a sum agreed to by the School Board, such to be delivered to the School Board;

2) **Warranty Deed**
   A warranty deed, along with sufficient funds to record the deed, to be delivered to the School Board or the title insurance agent.

3) **Taxes**
   Evidence that taxes for the current year have been placed in escrow pursuant to F.S. § 196.295, as amended, or that the taxes have been paid.
4) Insurance
   A completed title insurance policy issued subsequent to the recording of the deed and the escrow of taxes.

d. Return of School Dedication
   In the event that a dedication accepted by the School Board is not utilized within ten years of its conveyance, the grantor may request that the dedication be reconveyed by the School Board to the grantor, in which case the School Board shall reconvey the dedication.

8. Special Provisions for Road Credits
   a. General
      The feepayer may elect to propose construction of a portion of the major road network system in addition to any required site related improvements. The feepayer shall submit the proposed construction along with a certified engineer's cost estimate to the Impact Fee Coordinator, with a copy to the County Engineer. The County Engineer shall determine if the proposed construction is eligible for Road Impact Fee credit, based on the following criteria:
      1) The proposed road construction must be on the major road network;
      2) The proposed road construction must not be site-related improvements; and,
      3) The proposed road construction must be required to meet the requirements of TPS for the development as defined in [Art. 12, Traffic Performance Standards].
      Exceptions to criterion 3) above may only be made upon approval of the BCC. No exceptions shall be made to criteria 1) and 2). If the proposed road construction meets the criteria for credit, the County Engineer shall determine the amount of credit to be given, and the timetable for completion of the proposed construction, and shall recommend the approval and the amount of credit to the Impact Fee Coordinator.
   b. Credits for Construction within Site
      Where a proposed major road network runs through a development and where the feepayer is required to construct two lanes of the road, the feepayer may elect, upon submission of a certified cost estimate to the Impact Fee Coordinator and upon the recommendation of the County Engineer and the approval of the Impact Fee Coordinator, to construct more than two lanes and receive credit for the additional cost of the additional lanes constructed. In addition to all other site-related improvements, the primary two lanes within the site's boundaries shall be considered site-related.
   c. Other Costs Credited
      1) Off-Site Right-Of-Way Acquisition
         The cost of major road network rights-of-way acquired at the cost of the feepayer shall be credited where the right-of-way is outside of the site, and not site related. The costs shall be approved by the County Engineer and the Impact Fee Coordinator based upon the appraised value of the land acquired. The credit shall not exceed the appraiser's approved value, except in the event that a settlement of, or in lieu of, condemnation results in payment in excess of the appraiser's value, in which case credit shall not exceed the amount paid. Cost incurred by PBC in acquiring such off-site right-of-way which are paid for by the feepayer shall be credited to the feepayer.
      2) Plan Preparation
         Costs of plan preparation for major road network construction shall be credited if approved by the County Engineer and the Impact Fee Coordinator based upon reasonable costs associated with the preparation of such plans.
      3) Costs Creditable
         Credit shall be given only for the cost of plans preparation, off-site R-O-W acquisition, and/or construction.

9. Application of Credits
   The credit shall be applied to the respective full impact fee associated with the first Building Permits issued for the development for which complete application was made on or after October 1, 1989, or if the credit is for roads, the date upon which the Road Impact Fee was effective within the development, until the credit is exhausted. After such exhaustion the remainder of the impact fee for which a credit was obtained shall be paid in full. The credit shall be calculated and applied in dollar amounts and not in number of permits. No credit may be assigned, delegated, or otherwise conveyed to any development outside the boundaries of the development that originally received the credit. [Ord. 2014-025]
10. Special Allocation of Credits

Provided that the conditions of this Subsection are satisfied, the feepayer making an in-kind contribution, or its heirs, assigns, or successors in interest, may have all or some portion of the resulting credit allocated to specific parcels within the development that originally received the credit. [Ord. 2014-025]

a. Past Administrative Practices to Continue

Notwithstanding any other provisions of this Subsection, if fair share contributions have been prorated or assigned to a portion of a development through past practices, no application for a special allocation need be made, provided that a covenant is executed in accordance with Art. 13.A.11.A.10.e, Covenant, below.

b. Application for Special Allocation

Unless expressly prohibited by a Development Order, any feepayer who makes an in-kind contribution may petition the BCC for a special allocation of the respective impact fee credit by filing an application with the Impact Fee Coordinator. Only one special allocation shall be made for each in-kind contribution made by the feepayer. [Ord. 2005-047]

1) Parcels Identified

The application shall state the purpose for which the special allocation is desired and shall clearly identify by legal description the specific parcel or parcels of land within the development to which the credit is allocated; and

2) Notice Requirements

a) Mailing

Prior to scheduling the application for a Special Allocation for consideration by the BCC, the Applicant shall, at its own cost, provide appropriate courtesy notice to all owners of record of any undeveloped land within the affected development. The courtesy notice shall be by certified mail, return receipt requested, to the person whose name appears in the last approved ad valorem tax records of the PBC Property Appraiser’s Office. The notice shall briefly state the nature of the Special Allocation application and request the recipient to submit, to the Impact Fee Coordinator within no more than 15 days of receipt, any relevant information the recipient may have bearing on the Applicant's right to a Special Allocation.

b) Advertisement

In addition, the Applicant at its own cost shall place a notice of the proposed Special Allocation in a newspaper of general circulation within PBC. Such notice shall appear no later than ten days prior to a final decision by the BCC to grant or deny the application. The costs of advertisement shall be borne by the Applicant.

c. The Approval Process

The BCC shall approve the application for a special allocation provided that.

1) No Bona Fide Claim Presented

No substantial, competent evidence is presented by a third party that would constitute prima facie evidence of a bona fide claim to any portion of the impact fee credit assigned to the affected development.

d. Application Fee Provided

The BCC may establish a reasonable fee for processing of applications for special allocations. Any such fee duly established by the BCC shall be paid at the time the application for special allocation is submitted.

e. Covenant

The applicant shall execute a covenant supported by separate consideration from PBC. This covenant shall provide that the applicant, its heirs assigns and successors in interest shall indemnify hold harmless, and defend PBC against any and all claims for credits not received by other owners or developers of undeveloped land within the planned development. A joinder and consent of the mortgagee of the land benefited by the special allocation, if any, supported by separate consideration shall also be executed in recordable form acceptable to the County Attorney. The Impact Fee Coordinator shall, at the sole expense of the applicant, record the instruments in the official records of the Clerk of the Circuit Court in and for PBC.

B. Appeal

The decision of the Impact Fee Coordinator may be appealed pursuant to Art. 13.A.6.G, Appeal.
C. Time to Claim Credit – Responsibility of Feepayer
Any claim for credit as established in Art. 13.A.11, Credits, must be made by submitting application for credit, or, if necessary, executing an escrow agreement with the County no later than at the time of Building Permit issuance. Any claim not so made shall be deemed waived.

Section 12 Covenants
Where necessary to ensure compliance with the provisions of this Article, the Impact Fee Coordinator shall require that a covenant be executed by the fee payer holding the fee simple interest in the land, and mortgagee as appropriate. The covenant shall recite this Article and the facts and reasons underlying its execution. It shall set forth restrictions on the land and the terms and conditions under which it may be released.

Section 13 Vesting
Only the existence of a Building Permit that has not been rendered invalid and voidable shall vest a feepayer against any changes in the amount of impact fees exacted. No vesting against changes in the amount of impact fees shall result from the issuance of any Development Order, other than as set forth in this Subsection.

Section 14 Action if Impact Fees are Unpaid
A. Negotiable Instrument is Invalid
In the event impact fee funds which were paid by check, draft or other negotiable instrument do not clear, the Building Permit or Development Order authorizing the development for which impact fees were paid shall be suspended. The local government which issued the Building Permit or Development Order shall send by certified mail notice to the applicant using a form provided by the County. If the impact fees, together with any charges for the checks not clearing, are not paid within ten working days following mailing of the notice, the Building Permit or Development Order shall be of no further force and effect for purposes of this Code and a stop work order shall be issued and not lifted until such time as the fair share fees are paid.

B. Lien
If through error, omission, or intent, impact fees are not paid in full, PBC may file a lien against the land containing the development for which the impact fees are due in an amount equal to the amount unpaid, together with statutory interest accruing from 30 calendar days following the date written notice by certified mail, return receipt requested, is sent to the developer, Permittee, or the then present Property Owner. Notice of the lien shall be recorded in the official records of the Clerk of the Circuit Court for PBC. The lien shall have priority over all liens, mortgages, and encumbrances, except taxes. No lien shall be recorded later than three years following the date on which the Building Permit is issued for the development against which impact fees are due, although the debt shall remain. If the lien remains unpaid for more than 30 calendar days following the recording of the notice, it may be foreclosed in the manner provided by State law for the foreclosure of mortgages on real property. [Ord. 2005-047]

C. Withholding Development Orders
In the event that any impact fee is unpaid, no further Development Order shall be issued for the land for which the impact fees remain unpaid, and no Development Order shall be issued until any previously owed impact fees, together with day interest owing, along with any current impact fees, are paid.

D. Notification Construction Industry Licensing Board
In the event that any Building Permittee who is a contractor certified by the PBC Construction Licensing Board fails to pay an impact fee for which the Permittee is responsible, the County Attorney shall file a verified written complaint with the PBC Construction Licensing Board recommending disciplinary action as is provided by F.S. ch. 489, as amended. The verified complaint shall contain a summary of the fees owed and the efforts made by PBC to collect the impact fees.
CHAPTER B  COUNTY DISTRICT, REGIONAL, AND BEACH PARKS IMPACT FEES

Section 1  Imposition of Fee

Impact fees are imposed upon all land uses creating an impact on County District, Regional, and Beach Parks in accordance with Art. 13.A.4, Imposition of Fee, and this Chapter. [Ord. 2005-047]

Section 2  Schedule of Lower Fees for Municipalities

Special provisions establishing a schedule of lower fees for municipalities providing like capital facilities are set forth in this Section pursuant to Article I, the PBC Charter. For purposes of this Section, "like capital facilities" is broadly construed so as to include partial "credits" for municipal parks which are not district, regional, or beach parks but which perform a similar function. Municipal schedules are based upon a sliding scale depending on the size and function of the municipal park facilities and the extent of access to beaches based upon the shoreline management plan standards.

Section 3  Fee Schedule

The fee schedule for County District, Regional, and Beach Parks is established beginning in Table 13.B.3-2, Parks and Recreation Fee Schedule for Unincorporated PBC. To ensure that the impact fee does not exceed the cost to provide capital facilities to accommodate new development, the impact fees in the fee schedule are established at no more than 95 percent of the cost to accommodate the impact.

The schedules are as follows:

A. Benefit Zones

1. Establishment of Benefit Zones

Four Park Impact Fee benefit zones are hereby established as follows:

a. Benefit Zone 1 (North)

Beginning at the water's edge of the Atlantic Ocean and the northern boundary of PBC as described in F.S. § 7.50, “County Boundary;” thence

1) Westerly along said northern boundary to the west line of Range 39 East; thence
2) Southerly along said west line to the SFWMD L-8 Canal; thence
3) Southeasterly along said L-8 Canal to the south line of Township 42 South; thence
4) Easterly along said south line to the west line of Range 42 East; thence
5) Northerly along said west line to SR 710 (Beeline Highway); thence
6) Southeasterly along said SR 710 to Port Road (8th Street); thence
7) Easterly along said Port Road and its easterly extension to the Intracoastal Waterway; thence
8) Northerly along the Intracoastal Waterway to the Lake Worth Inlet and east to the Atlantic Ocean; thence
9) Northerly along the water's edge of the Atlantic Ocean to the point of beginning.

b. Benefit Zone 2 (Central)

Beginning at the water's edge of the Atlantic Ocean and SR 804 (Boynton Beach Boulevard) extended; thence

1) Westerly along SR 804 and its extension to the SFWMD L-7 Canal; thence
2) Northerly along said L-7 Canal to the centerline of Old State Road 80; thence
3) Westerly along said centerline of State Road 80 to the intersection of the centerline of U.S. Highway 98; thence
4) Northwesterly along said centerline of U.S. Highway 98 to the west line of Range 40 East; thence
5) North along the west line of Range 40 East to the south line of Township 42 South; thence
6) Easterly along said south line to the west line of Range 42 East; thence
7) Northerly along said west line to SR 710 (Beeline Highway); thence
8) Southeasterly along said SR 710 to Port Road (8th Street); thence
9) Easterly along said Port Road and its easterly extension to the Intracoastal Waterway; thence
10) Northerly along the Intracoastal Waterway to the Lake Worth Inlet and east to the Atlantic Ocean; thence
11) Southerly along the water's edge of the Atlantic Ocean to the point of beginning.

c. Benefit Zone 3 (South)

Beginning at the water's edge of the Atlantic Ocean and SR 804 (Boynton Beach Boulevard) extended; thence

1) Westerly along SR 804 and its extension to the SFWMD L-7 Canal; thence
2) Southerly and southeasterly along said L-7 Canal, L-39 Canal and L-36 Canal to the south boundary line of PBC as described in F.S. § 7.50, “County Boundary;” thence
3) Easterly along said boundary line to the water's edge of the Atlantic Ocean; thence
4) Northerly along said water's edge to the point of beginning.

d. Benefit Zone 4 (Glades)

Zone 4 is bounded on the north by the Martin County line; on the East by the Western boundaries of Zones 1, 2, and 3; on the South by the Broward County line; and, on the West by the Hendry County line.

2. Identification of Benefit Zones

The park benefit zones are shown in Figure 13.B.1.C-1, Park Benefit Zones. No Park Impact Fee is exacted in Benefit Zone 4 because (1) development in that benefit zone is overwhelmingly isolated from eastern PBC; (2) no new capital facilities for parks are required during the planning horizon upon which the Park Impact Fee in Benefit Zone 4 is based, except for district park capital facilities; and, (3) credits to development in Benefit Zone 4 for other assessments funding park capital facilities equal or exceed the impact fee associated with district parks in Benefit Zone 4.

B. Establishment of Trust Funds

There are hereby established separate Park Impact Fee trust funds, one for each Park Impact Fee benefit zone.

C. Use of Park Impact Fees

Impact fees paid pursuant to this Section shall be encumbered and spent only in conformance with Art. 13.A.9, Use of Impact Fees.
Figure 13.B.1.C-1 – Park Benefit Zones
CHAPTER C  FIRE-RESCUE IMPACT FEES

Section 1  Imposition of Fee

Impact fees are imposed upon all land uses creating an impact on fire-rescue services in accordance with Art. 13.A.4, Imposition of Fee, and this Section.

Section 2  Fee Schedule

The impact fee schedule for fire-rescue services is established in Table 13.C.2-10, Fire-Rescue Fee Schedule, Land uses in the fee schedule shall be defined in F.S. § 195.073, and Chapter 12D-8, F.A.C. To ensure that the impact fee does not exceed the cost to provide capital facilities to accommodate new development, the impact fees in the fee schedule are established at no more than 95 percent of the cost to accommodate the impact.

Section 3  Benefit Zones

A. Establishment of Benefit Zones

There are hereby established two Fire-Rescue Impact Fee benefit zones identified in Figure 13.C.5-2, Fire-Rescue Benefit Zones, and set forth as follows:

1. Benefit Zone 1

The boundaries of Benefit Zone 1 correspond to the PBC Fire-Rescue Municipal Service Taxing Unit, excluding Royal Palm Beach and those portions of the County in Benefit Zone 2. [Ord. 2005-047]

2. Benefit Zone 2

The boundaries of Benefit Zone 2 shall be PBC’s Northern, Western and Southern borders on the North, West, and South, respectively; and the Western border of Range 40 East and the SFWMD L-40 on the East. No Fire-Rescue Impact Fees shall be collected at this time in Benefit Zone 2 because there is no identified need for additional fire-rescue capital facilities due to new development during the planning horizon on which this impact fee is based.

Section 4  Establishment of Trust Fund

There is hereby established a separate impact fee trust funds for the impact fee benefit zones described in Art. 13.C.3.A, Establishment of Benefit Zones.
Section 5  Use of Fire-Rescue Impact Fees

Impact fees paid pursuant to this Section shall be encumbered and spent only in conformance with Art. 13.A.9, Use of Impact Fees.

Figure 13.C.5-2 – Fire-Rescue Benefit Zones
CHAPTER D  LIBRARY IMPACT FEES

Section 1  Imposition of Fee

Impact fees are imposed upon all land uses creating an impact on fire-rescue services in accordance with Art. 13.A.4, Imposition of Fee, and this Section.

Section 2  Fee Schedule

The fee schedule for library services is established in Table 13.D.2-15, Library Fee Schedule. To ensure that the impact fee does not exceed the cost to provide capital facilities to accommodate new development, the impact fees in the fee schedule are established at no more than 95 percent of the cost to accommodate the impact.

Section 3  Benefit Zones

A. Establishment of Benefit Zones

There are hereby established two Library Impact Fee benefit zones identified in Figure 13.D.5-3, Library Benefit Zones, and set forth as follows:

1. Benefit Zone 1

The boundaries of Benefit Zone 1 consists of unincorporated PBC and those municipalities that are part of the Library Taxing District (municipalities include: Atlantis, Briny Breezes, Cloud Lake, Glen Ridge, Golfview, Greenacres City, Haverhill, Hypoluxo, Juno Beach, Jupiter, Jupiter Inlet Colony, Lake Clarke Shores, Mangonia Park, Ocean Ridge, Palm Beach Gardens, Palm Beach Shores, Royal Palm Beach, South Palm Beach, Tequesta, and Village of Golf) excluding that porting of the County in Benefit Zone 2.

2. Benefit Zone 2

The boundaries of Benefit Zone 2 shall be PBC’s Northern, Western and Southern borders on the North, West, and South, respectively; and the Western border of Range 40 East and SFWMD L-40 on the East. No Library Impact Fees shall be collected at this time in Benefit Zone 2 because there is no identified need for additional library capital facilities due to new development during the planning horizon on which this impact fee is based.

Section 4  Establishment of Trust Funds

There is hereby established a Library Impact Fee trust funds for the benefit zones described in Art. 13.D.3, Benefit Zones.

Section 5  Use of Library Impact Fees

Impact fees paid pursuant to this Section shall be encumbered and spent only in conformance with Art. 13.A.9, Use of Impact Fees.
Figure 13.D.5-3 – Library Benefit Zones
CHAPTER E  LAW ENFORCEMENT IMPACT FEES

Section 1  Imposition of Fee

Impact fees are imposed upon all land uses creating an impact on law enforcement services in accordance with Art. 13.A.4, Imposition of Fee, and this Section.

Section 2  Fee Schedule

The fee schedules for law enforcement services are established in Table 13.E.2-16, Law Enforcement Fee Schedule for Countywide Services Benefit Zone 1, and Table 13.E.2-17, Law Enforcement Patrol Fee Schedule for Unincorporated PBC Benefit Zone 2. Land uses in the fee schedule shall be as defined in F.S. § 195.073, and Chapter 12D-8, F.A.C. To ensure that the impact fee does not exceed the cost to provide capital facilities to accommodate new development, the impact fees in the fee schedule are established at no more than 95 percent of the cost to accommodate the impact.

### Notes:
Section 3 Benefit Zones

A. Establishment of Benefit Zones
There are hereby established three Law Enforcement Impact Fee benefit zones identified in Figure 13.E.5-4, Law Enforcement Benefit Zones, and set forth as follows.

1. Area and Services in Benefit Zone 1
Benefit Zone 1 shall consist of the entire PBC, including both the unincorporated area and all municipalities. Countywide functions for which impact fees are charged in this zone include the crime laboratory, warrants divisions, marine enforcement, K-9 unit, and organized crime bureau. No credits for municipal law enforcement activities are applied for these services.

2. Area and Services in Benefit Zone 2
Benefit Zone 2 shall include the unincorporated portions of PBC and those municipalities which do not provide road patrol services, including Cloud Lake, Haverhill, Glen Ridge, and Village of Golf and excluding those portions of the County in Benefit Zone 3. Impact fees paid in these areas support law enforcement functions otherwise met by municipal law enforcement services, though all law enforcement functions of the Sheriff are countywide. The use of this district allows credit for municipal law enforcement services. [Ord. 2005-047]

3. Area and Services in Benefit Zone 3
Benefit Zone 3 shall include PBC’s Northern, Western, and Southern borders on the North, West, and South respectively; and the Western border of Range 40 East and the SFWMD L-40 on the East. No Law Enforcement Impact Fees shall be collected at this time in Benefit Zone 3 because there is no identified need for additional law enforcement capital facilities due to new development during the planning horizon on which this impact fee is based.

Section 4 Establishment of Trust Funds

There are hereby established separate impact fee trust funds for each impact fee benefit zone described in Art. 13.E.3, Benefit Zones.

Section 5 Use of Law Enforcement Impact Fees

The Sheriff shall identify in the Sheriff’s budget those new capital facilities for which Law Enforcement Impact Fees shall be spent. The funds shall remain restricted to their respective trust funds and the requirements of this Article, and the Sheriff shall ensure that the funds are expended and accounted for in accordance with this Article. The Sheriff shall maintain such records and documentation necessary to allow the effective audit of the use of the Law Enforcement Impact Fees. The County Internal Auditor shall have authority to require accounting controls and documentation, and shall have the authority to audit the use of Law Enforcement Impact Fees. PBC may require special impact fee reports by the auditor performing an audit of the Sheriff’s accounts.
Figure 13.E.5-4 – Law Enforcement Benefit Zones
CHAPTER F  PUBLIC BUILDINGS IMPACT FEES

Section 1  Imposition of Fee

Impact fees are imposed upon all land uses creating an impact on public buildings in accordance with Art. 13.A.4, Imposition of Fee, and this Section.

Section 2  Fee Schedule

The fee schedule for public buildings is established in Table 13.F.2-18, Public Buildings Fee Schedule. Land uses in the fee schedule shall be as defined in F.S. § 195.073, and Chapter 12D-8, F.A.C. To ensure that the impact fee does not exceed the cost to provide capital facilities to accommodate new development, the impact fees in the fee schedule are established at no more than 95 percent of the cost to accommodate the impact.

Section 3  Benefit Zones

A. Establishment of Benefit Zones

There is hereby established two Public Buildings Impact Fee benefit zones identified in Figure 13.F.5-5, Public Building Benefit Zones, and set forth as follows:

1. The boundary of Benefit Zone 1 consists of the entire PBC, including both the incorporated and unincorporated areas of the County and excluding the areas of the County in Benefit Zone 2. [Ord. 2005-047]

2. The boundary of Benefit Zone 2 shall include PBCs Northern, Western, and Southern borders on the North, West, and South respectively; and the Western border of Range 40 East and the SFWMD L-40 on the East. No Public Buildings Impact Fees shall be collected at this time in Benefit Zone 2 because there is no identified need for additional public building capital facilities due to new development during the planning horizon on which this impact fee is based.

Section 4  Establishment of Trust Funds

There is hereby established a separate impact fee trust funds for the impact fee benefit zones described in Art. 13.F.3, Benefit Zones.
Section 5 Use of Public Buildings Impact Fees

Fees paid pursuant to this Section shall be encumbered and spent only in conformance with Art. 13.A.9, Use of Impact Fees.

Figure 13.F.5-5 – Public Buildings Benefit Zones
CHAPTER G  SCHOOL IMPACT FEES

Section 1  Imposition of Fee

Impact fees are imposed upon all development creating an impact on schools in accordance with Art. 13.D.4, Establishment of Trust Funds, and this Section.

Section 2  Fee Schedule

The fee schedules for School Impact Fees are established in Table 13.G.2-19, School Fee Schedule. To ensure that the impact fee does not exceed the cost to provide capital facilities to accommodate new development, the impact fees in the fee schedule are established at no more than 95 percent of the cost to accommodate the impact.

Section 3  Benefit Zones

A. Establishment of Benefit Zones

There are hereby established two School Impact Fee benefit zones set forth as follows. [Ord. 2019-013]

1. Benefit Zone 1

   The boundary of Benefit Zone 1 consists of the entire PBC, including both the incorporated and unincorporated areas of the County and excluding the areas of the County in Benefit Zone 5. [Ord. 2019-013]

2. Benefit Zone 5

   The boundaries of Benefit Zone 5 shall be PBC's Northern, Western, and Southern borders on the North, West, and South, respectively; and the Western border of Range 40 East and the SFWMD L-40 on the East.

B. Identification of Benefit Zones

   The School Impact Fee benefit zones are identified in Figure 13.G.5-6, School Benefit Zones. No School Impact Fees shall be collected at this time in Benefit Zone 5 because there is no identified need for additional schools due to new development during the planning horizon on which this impact fee is based.

Section 4  Establishment of Trust Funds

There are hereby established separate impact fee trust funds for each impact fee benefit zone.

Section 5  Use of School Impact Fees

School Impact Fees shall be appropriated by the BCC and remitted to the School Board following the Clerk’s pre-audit of such funds. The funds shall remain restricted to their respective School Board trust funds and the requirements of this Article, and the School Board shall ensure that the funds are expended and accounted for in
accordance with the provisions of this Article. The County Internal Auditor shall have the authority to require certain internal accounting controls and documentation, and shall have the authority to audit the expenditure of the funds.

Figure 13.G.5-6 – School Benefit Zones
CHAPTER H   ROAD IMPACT FEES

Section 1  Imposition of Fee

Impact fees are imposed upon all land uses creating an impact on road facilities in accordance with Art. 13.A.4, Imposition of Fee, and this Section.

Section 2  Fee Schedule

At the option of the feepayer, the amount of the impact fee may be determined by the fee schedule, established in Table 13.H.4-20, Fair Share Road Impact Fee Schedule, or by the independent calculation provided by the feepayer and approved by the Impact Fee Coordinator and the County Engineer. The impact fees in the schedule have been calculated using accepted trip generation, trip length, capture/diversion, and capital road facility costs standards, and applying the appropriate credits. Land uses not listed in the fee schedule shall be as defined in the most current edition of the Institute of Transportation Engineers Trip Generation Manual. To ensure that the impact fee does not exceed the cost to provide capital facilities to accommodate new development, the impact fees in the fee schedule are established at no more than 95 percent of the cost to accommodate the impact.

Section 3  Land Uses Not Specified in Fee Schedule

If the type of land use for which a Building Permit is applied is not specified on the impact fee schedule, the Impact Fee Coordinator shall select the most comparable type of land use from the most current edition of Trip Generation, a publication of The Institute of Transportation Engineers (ITE). If the Impact Fee Coordinator determines that there is no comparable type of land use in the most current edition of Trip Generation, then the Impact Fee Coordinator shall request a determination of the impact fee from the County Engineer, who shall use the best available traffic generation data, other trip characteristics data, costs per lane mile data, and credit data. The feepayer may challenge the County Engineer's determination through the completion of an independent fee calculation study pursuant to Art. 13.A.6, Independent Fee Calculation Study.

Section 4  Use of Road Impact Fee Funds

Fees paid pursuant to this Article shall be encumbered and spent only in conformance with Art. 13.A.9, Use of Impact Fees, collected in accordance with this Article shall be used solely for the purpose of construction or improving roads, streets, highways, and bridges on the major road network system, including but not limited to:

[Ord. 2005-047]

A. design and construction plan preparation;
B. right-of-way acquisition;
C. construction of new through lanes;
D. construction of new turn lanes;
E. construction of new bridges;
F. construction of new drainage facilities in conjunction with new roadway construction;
G. purchase and installation of traffic signalization;
H. construction of new curbs, medians, and shoulders; and,
I. relocating utilities to accommodate new roadway construction.

**Section 5 Benefit Zones**

Road Impact Fee benefit zones are hereby established as shown in [Figure 13.H.6-7, Road Benefit Zones](#), and incorporated herein by reference.

**Section 6 Establishment of Trust Funds**

There are hereby established separate Road Impact Fee trust funds, one for each Road Impact Fee benefit zone as shown in [Figure 13.H.6-7, Road Benefit Zones](#).

ARTICLE 14
ENVIROMENTAL STANDARDS

CHAPTER A  SEA TURTLE PROTECTION AND SAND PRESERVATION

Section 1  Purpose and Intent

The purpose of this Chapter is to reduce impacts of coastal lighting and beach obstructions on sea turtles and prohibit the removal of sand from the beach/dune system. [Ord. 2009-040]

Section 2  Definitions

Section 3  STPZ/STPO – Sea Turtle Protection Ordinance

This Chapter shall be known as the PBC Sea Turtle Protection and Sand Preservation Standards. It repeals and replaces PBC Ordinances No. 72-12, 78-20, 87-13, and 90-2.

Section 4  Applicability

A. All provisions of this Chapter shall be effective within the unincorporated and incorporated areas of PBC, and shall set restrictions, constraints, and requirements to preserve and protect sea turtles, sea turtle habitat, and beach/dune sediments. Notwithstanding the foregoing, incorporated areas that have a Sea Turtle Protection Ordinance (STPO) shall not be subject to the provisions of this Chapter that pertain to coastal lighting, and incorporated areas that have established a sand protection zone to preserve beach/dune sediments shall not be subject to the provisions of this Chapter pertaining to sand preservation. [Ord. 2011-001]

B. PBC funds for dune restoration or shore protection projects in municipalities shall be contingent upon this Chapter being fully enforced or the adoption and enforcement of an equally stringent or more stringent ordinance by a municipality. Funding determinations shall be based on ERM's review and acceptance or rejection of a municipality's replacement ordinance, as well as a review of permits and variances and enforcement notices issued pursuant to the municipal ordinance.

C. This Chapter shall apply to any coastal lighting activity that has the potential to adversely impact sea turtles in PBC within the limits of jurisdiction. This Chapter shall also apply to any sand removal or degradation that has the potential to adversely impact the unique sediments which comprise the coastal beach/dune system in PBC within the limits of jurisdiction.

Section 5  Authority

This Chapter is adopted under the authority of F.S. § 125.01, et seq.

Section 6  Jurisdiction

A. ERM shall have regulatory authority over coastal lighting and alterations to the beach/dune system. This Chapter establishes two zones of jurisdiction: the Sea Turtle Protection Zone (STPZ) and the Sand Preservation Zone (SPZ). The STPZ extends from three miles offshore of the Atlantic Ocean and along inlet shorelines to a line 600 feet landward of the mean high water line. The SPZ extends from the mean high water line of the Atlantic Ocean to 600 feet landward.

B. The STPZ is established for the purpose of minimizing and controlling coastal lighting. [Ord. 2011-001]

C. The SPZ is established for the purposes of maintaining the volume and quality of beach sand presently existing within the beach/dune system. The unique characteristics of the sediments contained in the existing beaches and dunes of PBC require the preservation of these materials within the beach/dune system. [Ord. 2011-001]

D. Within the limits of jurisdiction of the STPZ as defined in this Chapter, no person, firm, corporation, municipality, special district, or public agency shall perform new building construction or install any new artificial lighting on any property that, in whole or in part, is seaward of a line 600 feet landward of the mean high water line without first having obtained an approved Sea Turtle Protection Lighting Plan (STLP) from
ERM as provided for in this Chapter. Existing beachfront lighting causing direct or indirect illumination within the STPZ as defined herein shall comply with Art. 14.A.11, Standards for Existing Beachfront Lighting. [Ord. 2009-040]

E. Within the limits of jurisdiction of the SPZ as defined in this Chapter, no person, firm, corporation, municipality, special district, or public agency shall remove any beach or dune sediments from their property or from the SPZ without first complying with Art. 14.A.13, Standards for SPZ.

F. Beach obstructions are exempt from the requirements of this Article. However, this exemption shall not be in effect during sea turtle nesting season (March 1 through October 31) unless the structures are removed daily from the beach from sunset until two hours following sunrise or after completion of a dedicated independent sea turtle nesting survey by a Marine Turtle Permit Holder. Beach obstructions shall be removed from the beach or placed in a single row as close to the toe of the dune as possible in an area that does not impact native vegetation or significantly affect sea turtles. Exemptions under this provision are not intended to authorize any violation of F.S. § 379.2431 or any of the provisions of the Endangered Species Act of 1973, as may be amended. (Ord. No. 05-27, § 3.QQ) [Ord. 2006-036] [Ord. 2009-040]

Section 7  De Minimis

Those projects for which ERM provides a written determination that there will be no significant adverse environmental impacts. Approvals may include but are not limited to: removal of a light source whether approved or not approved; reduction in light intensity of a light source; installation of a light source within the STPZ which is not directly or indirectly visible from the beach. [Ord. 2009-040]

Section 8  Sea Turtle Protection Lighting Plan

A. A STLP approval is required for all new building construction and new artificial lighting proposed within the limits described in Art. 14.A.6.D. A STLP must be approved by ERM prior to the issuance of a Building Permit by the PZB or the local building department. [Ord. 2009-040] [Ord. 2011-001]

B. Applications shall be made on a form approved by ERM. ERM may make use of forms already in use by the State of Florida and/or Federal agencies.

C. ERM may attach conditions to any STLP approval where such conditions are deemed reasonably necessary to protect sea turtles.

D. Any application received that is substantially the same as a previous application that has been denied by ERM shall also be denied without further processing.

E. Any site or Property Owner that is subject to or recipient of a notice of violation or notice of noncompliance that remains unresolved shall not be issued an ERM STLP approval.

F. STLP approval shall not be issued until any and all information necessary to fully understand the extent, nature, and potential impacts of a proposed lighting plan are received by ERM. Such information may include, but is not limited to: [Ord. 2011-001]

1. A completed application form;
2. An explanation of the necessity and purpose of the proposed lighting;
3. Photographs of existing conditions which may include aerial photographs;
4. Plans showing profile and plan views depicting all light fixture locations, the elevations of proposed and existing structures, proposed and existing vegetation, beach/dune profiles, and pertinent topographic information; and,
5. Electrical, building, and landscape plans shall be submitted illustrating all exterior lights and windows within jurisdictional boundaries. Light and window tinting information shall include: [Ord. 2009-040]
   a. The location, number, wattage, elevation, orientation, light fixture cut sheets, photometric illustrations, and all type(s) of proposed artificial light sources. [Ord. 2006-036]
   b. Protective/mitigative measures to minimize lighting impacts on sea turtles, including measures to prevent direct and indirect illumination that is visible from the beach. [Ord. 2009-040]
   c. Window tinting specifications for all windows and doors within line of sight of the beach including percentage of visible light transmittance (see definition of tinted glass).

G. When an application is made for a STLP approval in common areas of a Multifamily residential site (i.e., condominiums, apartments, townhouses, villas, etc.), the representative association, or all of the homeowners as a group, shall be the Applicant. ERM shall not process an application made by one unit owner in a Multifamily setting where the work is proposed on lands designated as, or can reasonably be considered to be, common areas.

H. Upon receipt of an application and appropriate application fee, ERM shall have 30 days to request any additional information. Within 30 days of receipt of such additional information, ERM may request only that
I. If ERM does not make a request for additional information within 30 days of receipt of an application or requested information, the application shall be deemed complete upon receipt.

J. If an Applicant fails to respond to an ERM request for an application fee, or any additional information, within 60 days, the application may be denied without prejudice. However, ERM may grant an extension of time as is reasonable necessary to fulfill the request for additional information.

K. Upon receipt of a completed application and fee, ERM shall have 90 days to take final action unless the Applicant agrees in writing to a time extension or waiver of this requirement. Final agency action shall be approval of a STLP, denial of a STLP, or conditional approval of STLP. Failure by ERM to take final action within 90 days shall result in the authorization of the proposed work with standard limiting conditions.

L. Any application containing false information may be denied, and any STLP approval granted based upon false information may be revoked. [Ord. 2011-001]

M. ERM STLP approvals may be issued with a duration period that is reasonably necessary to complete the project not to exceed five years.

N. Any substantial modification to a complete application, or a STLP approval, shall require an amended application form and an additional application fee and shall restart all time periods of this Section.

O. No application shall be processed until ERM receives the appropriate application fee. [Ord. 2011-001]

Section 9 Criteria for STLP Approval

A. A STLP approval may be issued pursuant to this Chapter provided that the Applicant provides to ERM reasonable assurance that there shall be no adverse impacts to sea turtles, sea turtle nesting, and sea turtle habitat, and that the following criteria will be met:

1. Any and all light fixtures shall be designed to be the minimum level necessary for safety and shall be positioned such that they do not cause direct or indirect illumination that is visible from the beach. [Ord. 2009-040] [Ord. 2011-001]
   a. All outdoor lighting and exterior lighting shall be directed downwards. No lights shall be directed upwards. [Ord. 2009-040]
   b. Filters shall be prohibited. [Ord. 2009-040]
   c. All exterior fixtures on the seaward and the shore perpendicular sides of the building (and the landward side of the building if they are visible from the beach) shall be well shielded and full cut-off. [Ord. 2009-040]
   d. Long wave length lights that produce light that measures greater than 570 nanometers, shall be used for all coastal construction visible from and adjacent to the beach. Bright white light, such as metal halide, halogen, fluorescent, mercury vapor, and incandescent lamps will not be approved. Shorter wavelength lights will only be approved in areas where direct or indirect illumination is not visible from the beach. [Ord. 2009-040]

2. Use of Window Treatments at Multifamily Residential Properties

   In common areas of a Multifamily residential property, window treatments that are sufficient to prevent direct or indirect illumination visible from the beach shall be required on all windows visible from the beach within jurisdictional boundaries. [Ord. 2009-040]

3. ERM determines that coastal lighting alternatives and modifications to lessen impacts are infeasible.

4. ERM determines that the cumulative impacts of the subject lighting project and other similar lighting projects will also meet the criteria of this Article. [Ord. 2009-040]

B. Measures that may be implemented to protect sea turtles include: elimination, modification, or alteration of all proposed and/or existing exterior lights that cause illumination which is directly or indirectly visible from the beach. [Ord. 2009-040]

C. All lighting installed after September 2, 1987 shall comply with the following standards: [Ord. 2011-001]

1. Artificial public or private light source shall not cause illumination which is directly or indirectly visible from the beach where it may deter adult female sea turtles from nesting or disorient hatchlings. [Ord. 2009-040]

3. Any and all light fixtures shall be designed and/or positioned such that they do not cause illumination which is directly or indirectly visible from the beach. [Ord. 2009-040]
4. All lights on balconies shall be eliminated or shielded from the beach. Proposed balcony lights which
do not meet standard Art. 14.A.9.C.1, Artificial public or private light source, above shall not be

5. Artificial lighting for decorative or accent purposes shall not be authorized within the zone of jurisdiction
unless it will not be directly or indirectly visible from the beach. [Ord. 2009-040]

6. Lighting used in parking lots shall be: [Ord. 2009-040]
   a. Set on a base which raises the source of light no higher than 48 inches off the ground unless the
   lighting does not cause illumination or is not directly or indirectly visible from the beach. [Ord. 2009-
   040]
   b. Positioned and/or shielded such that the source of light is not visible from the beach and does not
   cause illumination directly or indirectly visible from the beach. [Ord. 2009-040]

7. Sign lighting may be authorized provided it illuminates an area less than 15 square feet and meets the

8. Permanent firepits shall be positioned and/or shielded to ensure that the source of illumination is not
directly or indirectly visible from the beach. Maximum flame height shall be determined at final
   inspection. [Ord. 2009-040]

9. Open fires on the beach shall be prohibited during Sea Turtle Nesting season. [Ord. 2005-002]

10. Tinted glass or any window film applied to window glass which meets the defined criteria for tinted
    glass, shall be installed on all windows and doors within line of sight of the beach.

11. Pool deck lights and underwater pool lights shall be turned off while the pool is closed at sunset during
    sea turtle nesting season, March 1 through October 31. The use of an automatic timer shall be
    acceptable only for pool lighting. [Ord. 2009-040]

---

Section 10  Inspection Required

A. Prior to the issuance of a Certificate of Occupancy (CO) by the PZB or local building department, each
facility shall be inspected for compliance as follows:

1. Upon completion of the construction activities, a State of Florida registered architect, landscape
   architect, environmental professional, or professional engineer shall conduct a site inspection which
   includes a night survey with all the beachfront lighting turned on to the highest illumination levels. [Ord.
   2009-040]

2. The inspector shall prepare and report the inspection finding in writing to ERM, identifying:
   a. the date and time of initial inspection;
   b. the extent of compliance with this Chapter and the approved STLP;
   c. all areas of potential and observed noncompliance with this Chapter;
   d. any action(s) taken to remedy observed noncompliance and date remedy will be implemented, if
      applicable; and,
   e. the date(s) and time(s) of remedial inspection(s), if applicable.

3. The inspector shall sign and seal the inspection report which includes a certification that:
   a. the beachfront lighting has been constructed in accordance with this Chapter;
   b. the inspector observed the project area at night with all lights operating;
   c. the beachfront lighting does not cause direct or indirect illumination that is visible from the beach
      at the time of the night inspection; and, [Ord. 2009-040]
   d. the beachfront light sources within the jurisdictional boundaries are not directly or indirectly visible
      from the beach at the time of the night inspection.

---

Section 11  Standards for Existing Beachfront Lighting

A. Existing Beachfront Lighting
Existing beachfront lighting causing direct or indirect illumination within the STPZ shall be adjusted or
corrected to ensure that the lighting does not cause illumination that is directly or indirectly visible from the
beach. [Ord. 2011-001]

B. Adjustment to Essential Lighting
Changing coastal conditions (including but not limited to erosion, renourishment, and vegetation impacts,
may necessitate retrofitting light fixtures. Installation of a new fixture shall require an approved Sea Turtle
Lighting Plan (STLP) that must comply with Art. 14.A.9, Criteria for STLP Approval. Retrofits to existing
fixtures shall be designed and/or positioned to ensure that they do not cause illumination that is directly or
indirectly visible from the beach. [Ord. 2006-036] [Ord. 2009-040] [Ord. 2011-001]
C. Reduction of Indirect Lighting on the Beach
The installation and maintenance of ground level barriers including dense native vegetation is strongly encouraged and may be required to reduce the amount of lighting striking the beach/dune system. [Ord. 2009-040]

D. Lighting for Pedestrian Traffic
Lights illuminating beach access points, dune crossovers, beach walkways, piers, or any other structure designed for pedestrian traffic shall be the minimum level necessary to maintain safety and shall be located and shielded such that lights and their illumination are not directly or indirectly visible from the beach. [Ord. 2009-040]

E. Use of Window Treatments
To prevent interior lights from illuminating the beach, window treatment shall be required on all windows visible from the beach within jurisdictional boundaries. Blackout draperies or shadescreens are preferred. Alternatively or additionally, window tint may be applied to beachfront windows. The turning out of all unnecessary interior lights during the nesting season is strongly encouraged.

F. Special Lighting Restrictions during the Nesting Season
Effective May 1, 1988, and continuously throughout each nesting season (March 1 through October 31), external light sources that are directly or indirectly visible from the beach shall be disconnected or otherwise modified to comply with this Chapter. [Ord. 2009-040]

G. Recommended Corrective Action
The following measures can be used to reduce or eliminate the effects of any exterior lighting on hatchlings and nesting sea turtles:
1. permanently remove the light fixture; [Ord. 2006-036]
2. disconnect the light fixture; [Ord. 2006-036]
3. reposition the light fixture so the point source of light is no longer visible from the beach; [Ord. 2006-036]
4. replace light fixtures having an exposed light source with light fixtures containing recessed light sources or shields; [Ord. 2006-036]
5. replace non-directional light fixtures with directional light fixtures pointing down and away from the beach; [Ord. 2006-036]
6. replace light fixtures having translucent or transparent coverings with light fixtures having opaque shields covering an arc of at least 180 degrees and extending an appropriate distance below the bottom edge of the light fixture on seaward side so the light source is not visible from the beach; [Ord. 2006-036]
7. replace pole lamps with low-profile, low-level luminaries so that the light source is not visible from the beach;
8. plant or improve vegetation buffers between the light source and the beach to screen light from the beach;
9. construct an ornamental structural barrier to shield light source from the beach; and,
10. modify the light fixture by adding a shield. [Ord. 2006-036]

Section 12 Standards for Dune Crossovers

A. Information Sign Requirements
Permanent sea turtle information signs shall be conspicuously posted by applicable jurisdictions at all public beach access points provided with dune crossovers. The information signs shall be standardized by ERM.

1. Sign Posting Responsibility
   Sea turtle information signs shall be encouraged at all new private beach access points provided with dune crossovers. Signage shall be the responsibility of the Property Owner.

2. Sign Maintenance Requirements
   Standardized sea turtle information signs shall be maintained in perpetuity such that information printed on the signs remains accurate and legible and the signs positioned such that they are conspicuous to persons at all public beach access points provided with dune crossovers.

3. Sign Removal
   Removal of the information signs by anyone other than those authorized by ERM is prohibited.
Section 13  Standards for SPZ

A. There shall be no net loss of sand from the SPZ. Sand temporarily excavated from the SPZ shall be returned to the SPZ. Sand shall be returned to the SPZ prior to the issuance of a building department CO where a CO is required, or within six months of the excavation for projects which do not require a CO. In addition, the sand may not be degraded by mixing with any sediment, soil, or material, such that it will not meet the definition for beach compatible sand as defined. [Ord. 2009-040]

B. Sediment analysis of existing beach/dune and any proposed fill material to be mixed with the existing sand may be required by ERM. Written notification must be provided to ERM (attention: ERM Coastal Geologist) prior to removal of sand from the SPZ.

Section 14  Appeals

Any affected party may appeal a final determination of ERM pursuant to Art. 14.C.11, Appeals.

Section 15  Fees

A. Fees shall be required as established by Resolution of the BCC. [Ord. 2009-040] [Ord. 2011-001]

B. Fees shall be non-refundable and nontransferable.

C. All application fees paid by check shall be made payable to the BCC.

Section 16  Violations

A. An unapproved lighting source illuminated during the night that is directly or indirectly visible from the beach. [Ord. 2011-001]

B. An approved lighting source that has experienced a change in conditions such that it is no longer in conformance with this Chapter. Violations may include but are not limited to: increase of intensity or direction of the light source; failure to maintain proper shielding; addition or modification of adjacent structures; modification of background colors of the structure; or, modification of height of vegetation, width or height of dune, or width of beach. [Ord. 2011-001]

D. Submittal to ERM of any signed and sealed lighting inspection report containing false information.

E. Removal of sand from the SPZ without first supplying written notification to ERM.

F. Degrading sand by mixing with sediment, soil, or material such that it will not meet the definition for beach compatible sand.

G. Alterations which result in a net loss of sand from the SPZ.

H. Failure to comply with the requirements of this Chapter or any approval granted or authorized hereunder.

I. Traversing a natural dune by a pedestrian within 200 feet of a public dune walkover.

J. Any lighting projects or alterations which would have been in violation of PBC Ordinances No. 72-12, 78-20, 87-13, or 90-2, as amended, during its effective period, shall continue to be violations under this Chapter but shall be subject to prosecution under the terms of PBC Ordinance No. 72-12, 78-20, 87-13, or 90-2, as amended.

Section 17  Enforcement and Implementation of Corrective Measures

A. In order to enforce compliance with the provisions of this Chapter, ERM may do one or more of the following: [Ord. 2011-001]

1. provide the violator with verbal or written notice of noncompliance; [Ord. 2011-001]

2. require a noncompliant Property Owner to take corrective measures; [Ord. 2011-001]

3. issue a notice of noncompliance; [Ord. 2011-001]

4. issue a notice of violation citation; [Ord. 2011-001]

5. issue a notice of hearing; [Ord. 2011-001]

6. issue a cease and desist order; and, [Ord. 2011-001]

7. require that a Building Permit or CO be withheld, if the noncompliance involves new construction. [Ord. 2011-001]

B. When a violator is required to take corrective measures to cure a violation, such corrective measures shall be implemented in addition to applicable penalties and fines. [Ord. 2011-001]
C. Violations of the provisions of this Chapter shall be punishable by one or more of the following:
   1. triple application fees for STLP approvals not obtained prior to violations involving activities which would otherwise have been authorized as determined by ERM; and
   2. enforcement procedures as outlined in this Chapter and in Art. 10.C, Groundwater and Natural Resources Protection Board. [Ord. 2011-001]

D. All monies collected as civil penalties for violations of this Chapter shall be deposited in the Pollution Recovery Trust Fund.

CHAPTER B WELLFIELD PROTECTION

Section 1 Purpose and Intent

A. The purpose and intent of this Chapter is to protect and safeguard the health, safety, and welfare of the residents and visitors of PBC by providing criteria for regulating and prohibiting the use, handling, production, and storage of certain deleterious substances which may impair present and future public potable water supply wells and wellfields.

Section 2 Definitions

Section 3 Applicability

A. General
   The provisions of this Chapter shall be effective within the incorporated and unincorporated areas of PBC, and shall set restrictions, constraints, and prohibitions to protect present and future public potable water supply wells and wellfields from degradation by contamination of deleterious substances.

B. Review and Permitting Procedures
   No Building Permit or Business Tax Receipt for any nonresidential activity shall be issued by PBC or any city located within PBC that would allow development or construction in Zones 1, 2, 3, or 4 that is contrary to the restrictions and provisions provided in this Chapter. Permits or Business Tax Receipts issued in violation of this Chapter confirm no right or privilege on the grantee and such invalid permit or licenses will not vest rights. [Ord. 2007-013]

Section 4 Effective Date

A. Effective Date
   The requirements and provisions of this Chapter shall apply immediately upon and after March 7, 1988 to all new nonresidential activities. An existing activity is one for which a Building Permit or Business Tax Receipt had been issued by the appropriate jurisdiction prior to March 7, 1988 and which had not expired on or before March 7, 1988, or for which a completed Building Permit or Business Tax Receipt application had been filed and accepted with the appropriate jurisdiction prior to March 7, 1988. All other activities shall be deemed “new.” [Ord. 2007-013]

B. Time of Review
   Any application for a Building Permit for a nonresidential development or residential development greater than 25 units or nonresidential development subject to review by an advisory planning body and approval by the local governing authority or zoning board of appeals that includes property wholly or partially within Zones 1, 2, 3, or 4, of a wellfield shall include requirements of ERM. These requirements shall be as follows:
   1. Notification by the local governing authority of the location of the property in Zones 1, 2, 3, or 4 and notarized letter from Applicant admitting acceptance of notification. Notification shall be prepared by ERM providing details of Zones, prohibitions, and measures required for compliance; or
   2. Submittal of application to ERM for notification.

C. Certification of Compliance
   Any application submitted for a Business Tax Receipt for any use within Zones 1, 2, 3, or 4 of an incorporated or unincorporated area shall require certification by ERM that the use meets the applicable requirements of this Article. [Ord. 2007-013]

D. Screening of Occupational License
   It shall be the duty of each local agency to screen all applications for Zones 1, 2, 3, or 4 Business Tax Receipts. [Ord. 2007-013]
E. Zone 1 Activities
ERM shall provide a list to all local agencies of potentially prohibited operations in Zone 1.

F. Interdepartmental Coordination
Copies of Building Permits for residential uses containing more than 25 units, all nonresidential projects, and all occupational licenses issued for Zones 1, 2, 3, or 4 shall be submitted to ERM on a weekly basis, or upon issuance by the appropriate issuing authority.

Section 5 Exemption

A. General Exemptions
A General Exemption application and an Operating Permit issued pursuant to the provisions of Art. 14.B.6.C.2, Zone 2, shall be filed with ERM for any nonresidential activity claiming a General Exemption to these regulations under Art. 14.B.5.A.4.a, Fire, Police, Emergency Medical Services, and PBC Emergency Management Center Facilities, Art. 14.B.5.A.4.b, Utilities in Zone 1, and Art. 14.B.5.A.4.f, Retail/Wholesale Sales Activities. No nonresidential facility that stores, handles, produces, or uses any Regulated Substances after March 7, 1988 shall be eligible for a General Exemption in Zone 1 unless such facility was in existence prior to the establishment of a new Wellfield Zone 1 or a reconfigured Wellfield Zone 1 and is required to move or cease operations as a direct result of a change in the Wellfield Protection Maps. [Ord. 2013-001]

1. Application
A General Exemption application shall contain a concise statement detailing the circumstances which the Applicant believes would entitle him or her to a General Exemption pursuant to Art. 14.B.5.A, General Exemptions.

2. Fee
A fee shall be required as established by the approved Fee Schedule.

3. Procedure
Within 30 working days of receipt of an application for a General Exemption, ERM shall inform the Applicant whether such application contains sufficient information for a proper determination to be made. If the application is found to be insufficient, then ERM shall provide to the Applicant a written statement by certified mail or hand delivery requesting the additional information required. The Applicant shall inform ERM within ten working days of the date of the written statement of intent to either furnish the information or have the application processed as originally submitted. ERM shall have 90 working days from the date that the sufficiency determination was rendered or the date of receipt of additional requested information to act upon the application.

4. General Exemption Activities and Criteria
   a. Fire, Police, Emergency Medical Services, and PBC Emergency Management Center Facilities
   Existing fire, police, emergency medical services, and PBC emergency management center facilities are exempt from the Zone 1 prohibitions set forth in Art. 14.B.6.C.1, Zone 1, provided that an Operating Permit for such uses is obtained pursuant to Art. 14.B.7.B.1, Operating Permit.
   b. Utilities in Zone 1
   Existing utilities as of July 25, 1991 shall be exempt, except for the maintenance and refueling of vehicles, from the Zone 1 prohibitions set forth in Art. 14.B.6.C.1, Zone 1, provided that an Operating Permit for such uses is obtained pursuant to Art. 14.B.7.B.1, Operating Permit.
   c. Continuous Transit
   The transportation of any Regulated Substance through Zones 1, 2, 3, or 4 shall be exempt from the provisions of this Chapter, provided that the transporting motor vehicle is in continuous transit. The transport of such substances through existing permanent pipelines is also exempt, provided that the currently authorized use or uses are not changed, and provided that leak detection and monitoring as approved by ERM are employed. No General Exemption or Operating Permit application is required except that an Operating Permit is required to establish the leak detection and monitoring requirements for said existing pipelines. Any new pipelines constructed through Zones 1, 2, or 3 and carrying Regulated Substances shall be provided with secondary containment, leak detection, and monitoring as approved by ERM.
   d. Vehicular and Lawn Maintenance Fuel and Lubricant Use
   The use in a vehicle or lawn maintenance equipment of any Regulated Substance solely as fuel in that vehicle or equipment fuel tank or as a lubricant in that vehicle or equipment shall be exempt from the provisions of this Chapter. No General Exemption or Operating Permit application is required.
e. **Application of Pesticides, Herbicides, Fungicides, and Rodenticides**

The application of those Regulated Substances used as pesticides, herbicides, fungicides, and rodenticides in recreation, agriculture, pest control, and aquatic weed control activities shall be exempt from the provisions of this Chapter provided that:

1) in all zones, the application is in strict conformity with the use requirement as set forth in the substances EPA registries and as indicated on the containers in which the substances are sold;
2) in all zones, the application is in strict conformity with the requirements as set forth in F.S. ch. 482, F.S. ch. 487, Chapter 5E-2, F.A.C., and Chapter 5E-9, F.A.C.;
3) in all zones, the application of any of the pesticides, herbicides, fungicides, and rodenticides shall be noted in the records of the certified operator. Records shall be kept of the date and amount of these substances applied at each location and said records shall be available for inspection at reasonable times by ERM;
4) in Zones 1, 2, 3, or 4, the pesticides, herbicides, fungicides, and rodenticides shall not be handled during application in a quantity exceeding 700 gallons of formulation; and,
5) all nonresidential applicators of pesticides, herbicides, fungicides, and rodenticides who apply those substances in Zones 1, 2, 3, or 4 shall obtain an Operating Permit covering all application operations using these materials under one permit and shall comply with all the requirements of Art. 14.B.6.C.2.b.3), Emergency Plan.

f. **Retail/Wholesale Sales Activities**

Retail/wholesale sales establishments in Zone 1 that store and handle Regulated Substances for resale in their original unopened containers shall be exempt from the prohibition in Zone 1, provided that those establishments obtain an Operating Permit pursuant to Art. 14.B.6.C.1, Zone 1. Items in Art. 14.B.6.C.2.b.7), Monitoring for Regulated Substances in the Potable Water Wells, certification by a Professional Engineer or Professional Geologist registered or licensed in the State of Florida, and a bond or letter of credit as set forth in Art. 14.B.7.B.4, Bond Required, are not required for facilities in Zones 1, 2, or 3, provided no individual container of Regulated Substances exceeds five gallons, if liquid, or 25 pounds, if solid.

g. **Office Uses**

Offices uses, except for the use of Regulated Substances for the maintenance and cleaning of office buildings, shall be exempt from the provisions of this Chapter, and no General Exemption or Operating Permit shall be required.

h. **Construction Activities**

The activities of constructing, repairing or maintaining any facility or improvement on lands within Zones 1, 2, 3, or 4 shall be exempt from the provisions of this Chapter, provided that all contractors, subcontractors, laborers, material men, and their employees, when using, handling, storing, or producing Regulated Substances in Zones 1, 2, 3, or 4, use those applicable Best Management Practices set forth in Appendix 3, Best Management Practices for the Construction Industry, attached hereto and incorporated herein. No General Exemption or Operating Permit applications are required.

i. **Activities Subject to Regulation Due to Accumulation of Waste Regulated Substances**

Activities in Zones 2 or 3, which are subject to permitting requirements of the Chapter shall obtain an Operating Permit pursuant to the provisions in Art. 14.B.6.C.2, Zone 2, or Art. 14.B.6.C.3, Zone 3. Items in Art. 14.B.6.C.2.b.7), Monitoring for Regulated Substances in the Potable Water Wells, and Art. 14.B.6.C.2.b.8), Regulated Substances in Groundwater Monitoring Wells, and a bond or letter of credit as set forth in Art. 14.B.7.B.4, Bond Required, are not required, provided that all waste liquid Regulated Substance are secondarily contained according to the conditions described in Art. 14.B.6.C.2.b.1), Containment of Regulated Substances, and are removed from the site on a regular schedule by a contracted hauler licensed by EPA or the State of Florida to handle the waste Regulated Substance. The accumulated waste Regulated Substance shall at no time exceed 55 gallons if liquid or 220 pounds if solid, and the accumulation time shall not exceed 90 days. Records of removal and disposal of all waste Regulated Substance through the licensed hauler shall be maintained and made available for ERM inspection at reasonable times. In addition, all other Regulated Substance shall not exceed the threshold quantities identified in the definition of “Regulated Substances.” Failure to comply with any of these requirements shall subject the facility to the full permitting provisions for the applicable zone.

**B. Special Exemptions**

An affected person in Zones 1 or 2 may petition the Hearing Officer pursuant to the appeal process in Art. 14.C.11, Appeals, for a Special Exemption, from the prohibitions and monitoring requirements set out in Art. 14.B.6.C.1, Zone 1, and Art. 14.B.6.C.2, Zone 2. No nonresidential facility that stores, handles,
produces, or uses any Regulated Substances after March 7, 1988 shall be eligible for a Special Exemption in Zone 1 unless such facility was in existence prior to the establishment of a new Wellfield Zone 1 or a reconfigured Wellfield Zone 1 and is required to move or cease operations as a direct result of a change in the Wellfield Protection Maps. [Ord. 2013-001]

1. **Criteria**
   In order to obtain a Special Exemption, a person must demonstrate, by a preponderance of competent, substantial evidence, that:
   a. Special or unusual circumstances and adequate technology exists to isolate the facility or activity from the potable water supply; and
   b. In granting the Special Exemption, the Hearing Officer pursuant to Art. 14.C.11, Appeals, may prescribe any additional appropriate conditions and safeguards which are necessary to protect the wellfield.

2. **Procedures**
   The following Special Exemption application and review procedures shall apply to activities claiming a Special Exemption with adequate technology to isolate the facility or activity from the potable water supply and protect the wellfield:
   a. **Application**
      A Special Exemption application claiming special or unusual circumstances and adequate protection technology shall be filed with ERM, who shall then promptly notify the County Attorney's Office that such an application has been filed. The application shall be signed by the Applicant and a Professional Engineer or Professional Geologist registered or licensed in the State of Florida;
   b. **Basis for Application**
      The application shall contain a concise statement by the Applicant detailing the circumstances that the Applicant feels entitles the Applicant to Special Exemption, pursuant to this Chapter;
   c. **Fee**
      A fee shall be required as established by the approved Fee Schedule; and,
   d. **Submittal Requirements**
      The application for Special Exemption shall contain but not be limited to the following elements:
      1) **Operating Conditions**
         A description of the situation at the site requiring isolation from the wellfield, including:
         a) a list of the Regulated Substances in use at the site;
         b) a site plan of the facility including all storage, piping, dispensing, shipping, etc., facilities;
         c) what operations at the facility involve Regulated Substances which must be isolated from the wellfields;
         d) the location of all operations involving Regulated Substances;
         e) a sampling and analysis of the groundwater on the site of the activity seeking a Special Exemption shall be performed to determine if any Regulated Substances are already present which constitute a threat to the water supply;
         f) an analysis of the affected well showing whether or not such well is already contaminated by any Regulated Substances and the extent of such contamination; and,
         g) a hydrogeologic assessment of the site which shall address, as a minimum, soil characteristics and ground water levels, directional flow, and quality.
      2) **Technical Components**
         A technical proposal to achieve the required isolation including:
         a) components to be used and their individual functions;
         b) system tying the components together;
         c) a discussion and documentation, such as published technical articles, substantiating the performance and reliability of the components individually and the system as a whole. If the system has not been field tested, a discussion and laboratory test documentation to substantiate the proposed performance and reliability of the system; and,
         d) details of the specific plans to install the system at the site.
      3) **Testing Procedures**
         If the proposed system does not have a proven history of successful in field operation, it may still be proposed using proven components. A test plan for the system as installed shall be provided to prove that the proposed system works in the field.
      4) **Backup Detection**
         A technical proposal for backup detection of Regulated Substances that may elude the isolation system and escape to outside a perimeter to be established by ERM. Such proposal shall include emergency measures to be initiated in case of escape of Regulated Substances.
5) **Criteria for Success**

Site specific, system performance criteria shall be proposed to ascertain the success of the system. Such criteria shall include but shall not be limited to:

a) performance;

b) reliability;

c) level of maintenance;

d) level of Sensitivity to Regulated Substances; and,

e) effect of rain, flood, power failure or other natural disaster.

6) **Precautions in Event of Failure**

The Applicant shall provide information on the on-site availability of substance removal technologies sufficient to remediate any introduction of Regulated Substances into the water table at the site. Where water is removed from on-site wells during the remedial process a plan shall be proposed for the disposal of such water.

7) **Closure Plan**

A closure plan shall be provided in the event the system does not prove successful in the testing required by Art. 14.B.5.B.2.d.3), Testing Procedures.

8) **Other Information**

Any other reasonable information deemed necessary by ERM shall be due to site specific circumstances.

e. **Sufficiency Review**

Within 30 working days of receipt of an application for Special Exemption, ERM shall inform the Applicant whether such application contains sufficient information for a proper determination to be made. If the application is found to be insufficient, then ERM shall provide to the Applicant a written statement by certified mail or hand delivery requesting the required additional information. The Applicant shall inform ERM within ten working days of the date of the written statement of intent to either furnish the information or have the application denied. When the application contains sufficient information for a proper determination to be made, ERM shall notify the County Attorney's Office that all documentation necessary to evaluate the Special Exemption has been received, and shall promptly transmit all such documentation to the County Attorney's Office.

f. **Action on Application**

Any Special Exemption granted by the Reference to Art. 14.C.11, Appeals, shall be subject to the applicable conditions which apply to Zones 1 and 2 and any other reasonable and necessary special conditions imposed by the Reference to Art. 14.C.11, Appeals. An Operating Permit shall be issued by ERM with the applicable conditions of Art. 14.B.6.C.1, Zone 1, and Art. 14.B.6.C.2, Zone 2, and any other reasonable and necessary special conditions imposed by the Hearing Officer. Such Special Exemptions shall be subject to revocation or revision by ERM for violation of any condition of said Special Exemption by first issuing a written notice of intent to revoke or revise (certified mail return receipt requested or hand delivery). Upon revocation or revision, the activity will immediately be subject to the enforcement provisions of this Article. [Ord. 2013-001]

---

**Section 6 Zones of Influence**

A. **Maps**

The Zones of Influence Maps, developed as described in Art. 14.B.6.A.2, Basis, are incorporated herein and made a part of this Chapter. These Maps shall be on file and maintained by ERM.

1. **Amendments**

Any amendments, additions, or deletions to said Maps shall be approved by the BCC after public hearing. [Ord. 2013-001]

2. **Basis**

The Zones of Influence Maps are based upon travel time contours and one foot drawdown contours. They are generated using a contaminant transport computer model that simulates pollutant movement using particles released around wells. The travel time contours and the one foot drawdown contours are calculated by using finite difference computer modeling techniques that incorporate the effects of an extensive canal system, groundwater flows, and SFWMD Consumptive Use Permit approved public water supply pumping rates. Additional considerations may be incorporated into the modeling methodology as approved by ERM. [Ord. 2006-036]
3. **Review**
   The Zones of Influence Maps shall be reviewed at least on an annual basis. However, failure to conduct said review shall not affect the validity of the existing approved Maps. The basis for updating said Maps may include, but is not limited to, the following:
   a. Changes in the technical knowledge concerning the applicable aquifer;
   b. Changes in the pumping rate of wellfields;
   c. Wellfield reconfiguration; and,
   d. Designation of new wellfields.

4. **Boundaries**
   The Zones of Influence indicated on the Zones of Influence Maps are as follows:
   a. **Zone 1**
      The land area situated between the well(s) and the 30-day travel time contour;
   b. **Zone 2**
      The land area situated between the 30-day and the 210-day travel time contours;
   c. **Zone 3**
      The land area situated between 210-day and the 500-day travel time contours; and,
   d. **Zone 4**
      The land area situated beyond the 500-day travel time contour and within the one foot drawdown contour.

5. **Interpretation of Boundaries**
   In determining the location of properties and facilities within the zones depicted on the Zones of Influence Maps, the following rules shall apply:
   a. Properties located wholly within one zone reflected on the applicable Zones of Influence Maps shall be governed by the restrictions applicable to that zone;
   b. To the extent Art. 14.B.6.C, Prohibitions and Restrictions, does not apply, properties having parts lying within more than one zone as reflected on the applicable Zones of Influence Maps shall be governed by the restrictions applicable to the zone in which the part of the property is located;
   c. Where a travel time contour which delineates the boundary between two Zones of Influence, passes through a facility, the entire facility shall be considered to be in the more restrictive zone; and,
   d. Where the facility, or portion thereof, is overlapped by Zones of Influence of different wells or wellfields, the stricter zones shall apply.

6. **Reference Raw Water Analysis to Be Completed for Each Well**
   A reference set of raw water analyses shall be completed for each Well for which a Zones of Influence map has been established. Said analyses shall be completed within 185 days after March 7, 1988, for existing wells. A copy of the analytical report shall be forwarded to ERM and the PBCHD within 14 days of completion. For any new well, this set of analyses shall be completed prior to the release of the well into service by the PBCHD and ERM. Said analyses shall address inorganic priority pollutants and organic pollutants as listed in Chapter 62-550, F.A.C. The cost shall be borne by the utility. The analytical reports shall be prepared by a State of Florida certified laboratory, certified for the applicable analyses. Samples shall be taken by the State of Florida certified laboratory performing the analyses, or its authorized representative. [Ord. 2013-001]

B. **Protection of Future Wellfields**
   The prohibitions and restrictions set forth in this Chapter and in regulations promulgated pursuant hereto shall apply to any sites officially designated by the BCC as future wellfields. Such prohibitions and restrictions shall become effective upon approval by the BCC of the Zones of Influence Maps for the designated future wellfield. [Ord. 2013-001]

C. **Prohibitions and Restrictions**

1. **Zone 1**
   a. **Prohibited Activities**
      The use, handling, production, and storage of Regulated Substances associated with nonresidential activities is prohibited in Zone 1, except as provided under the General Exemptions and Special Exemptions provisions of this Chapter.
   b. **Closure of Existing Uses**
      All existing nonresidential activities within Zone 1 which store, handle, use, or produce any Regulated Substances shall cease to do so within one year from the date of notification by writing, certified mail, or hand delivery, except as provided for in this Chapter.
A Closure Permit application, General Exemption application, or a Special Exemption application prepared and signed by a Professional Engineer or Professional Geologist registered or licensed in the State of Florida shall be submitted to ERM within 120 days receipt of the notice to cease. Within 30 days of receipt of said notice, the owner or operator shall file with ERM proof of retention of said engineer or geologist.

Any nonresidential activity in Zone 1 which is allowed to continue in accordance with the General Exemption or Special Exemption provisions of this Chapter shall obtain an Operating Permit, unless expressly not required by this Chapter, which shall indicate the special conditions to be instituted and the dates on which such conditions shall be instituted. Such activities shall comply with all Zone 2 requirements unless otherwise provided herein. No expansions, modifications, or alterations which would increase the storage, handling, use, or production of Regulated Substances shall be permitted in Zone 1. An owner or operator that is denied a Special Exemption shall be issued a Closure Permit as part of the denial process. Any Operating Permit application required herein shall be filed with the applications for General Exemption or Special Exemption.

2. Zone 2
   a. Prohibited Activities
      All nonresidential activities within Zone 2 which store, handle, use, or produce any Regulated Substance are prohibited, unless they qualify as a General Exemption, obtain a Special Exemption, or receive an Operating Permit from ERM.
   b. Permit Conditions
      An Operating Permit issued to any nonresidential activity within Zone 2 that stores, handles, uses, or produces any Regulated Substance shall be subject to the following conditions:
      1) Containment of Regulated Substances
         Leak-proof trays under containers, floor curbing, or other containment systems to provide secondary liquid containment shall be installed. The containment shall be of adequate size to handle all spills, leaks, overflows, and precipitation until appropriate action can be taken. The specific design and selection of materials shall be sufficient to preclude any Regulated Substance loss to the external environment. Containment systems shall be sheltered so that the intrusion of precipitation is effectively prevented. The owner/operator may choose to provide adequate and appropriate liquid collection methods rather than sheltering only after approval of the design by ERM. These requirements shall apply to all areas of use, production, and handling, to all storage areas, to loading and off-loading areas, and to above-ground and underground storage areas. The containment devices and liquid collection systems shall be certified in the Operating Permit application by the Professional Engineer or Professional Geologist registered or licensed in the State of Florida.
      2) Emergency Collection Devices
         Vacuum suction devices, absorbent scavenger materials or other devices approved by ERM, shall be present on site or available within two hours (one hour in Zone 1) by contract with a cleanup company approved by ERM, in sufficient magnitude so as to control and collect the total quantity of Regulated Substances present. To the degree feasible, emergency containers shall be present and of such capacity as to hold the total quantity of Regulated Substances plus absorbent material. The presence of such emergency collection devices shall be certified in the Operating Permit application for existing activities. Such certification for new activities shall be provided to ERM prior to the presence of Regulated Substances on the site. Certification shall be provided by a Professional Engineer or Professional Geologist registered or licensed in the State of Florida.
      3) Emergency Plan
         An emergency plan shall be prepared and filed with the Operating Permit application indicating the procedures which will be followed in the event of spillage of a Regulated Substance so as to control and collect all such spilled material in such a manner as to prevent it from reaching any storm or sanitary drains or the ground.
      4) Inspection
         A responsible person designated by the Permittee who stores, handles, uses, or produces the Regulated Substances shall check on every day of operation, for breakage or leakage of any container holding the Regulated Substances. Electronic sensing devices may be employed as part of the inspection process, if approved by ERM, and provided the sensing system is checked daily for malfunctions. The manner of daily inspection shall not necessarily require physical inspection of each container provided the location of the containers can be inspected.
to a degree which reasonably assures ERM that breakage or leakage can be detected by the inspection. Monitoring records shall be kept and made available to ERM at all reasonable times for examination.

5) **Proper and Adequate Maintenance of Containment and Emergency Equipment**
   Procedures shall be established for quarterly, in-house inspection and maintenance of containment and emergency equipment. Such procedure shall be in writing; a regular checklist and schedule of maintenance shall be established; and a log shall be kept of inspections and maintenance. Such logs and records shall be available for inspection by ERM.

6) **Reporting of Spills**
   Any spill of a Regulated Substance in excess of the non-aggregate quantity thresholds identified in the definition of “Regulated Substance” shall be reported by telephone to PBCHD and the designated public utility within one hour, and to ERM within 24 hours of discovery of the spill. Cleanup shall commence immediately upon discovery of the spill. A full written report including the steps taken to contain and clean up the spill shall be submitted to ERM within 15 days of discovery of the spill.

7) **Monitoring for Regulated Substances in the Potable Water Wells**
   Arrangements shall be made with the designated public utility to establish a semi-annual schedule of raw water analysis unless sampling results indicate contamination, in which case ERM shall require an increased sampling schedule.
   The analysis shall be for all substances which are listed on the Operating Permit. The analytical reports shall be prepared by a State of Florida certified laboratory, certified for the applicable analyses. It shall be the responsibility of the designated public utility to provide for the sampling and analyses but the cost shall be borne by the Permittee or those permittees on a pro-rata basis as to the same substances listed on the permits of those permittees in Zones of Influence of the subject well. Samples shall be taken by the State of Florida certified laboratory performing the analyses, or its authorized representative. Semi-annual reports prepared by a State of Florida certified laboratory of the analyses for Regulated Substances shall be submitted to ERM for the purpose of determining the presence of Regulated Substances in each well for which a Zones of Influence map has been established.

8) **Regulated Substances in Groundwater Monitoring Wells**
   Groundwater monitoring well(s) shall be provided at the expense of the Permittee in a manner, number, and location approved by ERM. Except for existing wells found by ERM to be adequate for this provision, the required well or wells shall be installed by a State of Florida licensed water well contractor. Samples shall be taken by the State of Florida certified laboratory performing the analyses, or its authorized representative. Analytical reports prepared by a State of Florida certified laboratory of the quantity present in each monitoring well of the Regulated Substances listed in the activity's Operating Permit shall be filed at least semi-annually, or more frequently, as determined by ERM, based upon site conditions and operations.

9) **Alterations and Expansions**
   ERM shall be notified in writing prior to the expansion, alteration, or modification of an activity holding an Operating Permit. Such expansion, alteration, or modification may result from increased square footage of production or storage capacity, or increased quantities of Regulated Substances, or changes in types of Regulated Substances beyond those square footages, quantities, and types upon which the permit was issued. Should a facility add new Regulated Substances which individually are below the non-aggregate limits identified in the definition of “Regulated Substance,” it shall notify ERM on an annual basis of the types and quantities of such substances added and the location of the use, handling, storage, and production of said substances. [Ord. 2013-001]

   Any such expansion, alteration, or modification shall be in strict conformity with this Chapter. Further, except as provided herein, any existing Operating Permit shall be amended to reflect the introduction of any new Regulated Substances resulting from the change. However, the introduction of any new Regulated Substance shall not prevent the revocation or revision of any existing Operating Permit if, in the opinion of ERM, such introduction substantially or materially modifies, alters, or affects the conditions upon which the existing Operating Permit was granted or the ability to remain qualified as a General Exemption, if applicable, or to continue to satisfy any conditions that have been imposed as part of a Special Exemption, if
applicable. ERM shall notify the Permittee in writing within 60 days of receipt of the Permittee's notice that ERM proposes to revoke or revise the permit and state the grounds therefore.

10) Reconstruction after Catastrophe
Reconstruction of any portion of a structure or building in which there is any activity subject to the provisions of this regulation which is damaged by fire, vandalism, flood, explosion, collapse, wind, war, or other catastrophe shall be in strict conformity with this Chapter.

11) Revocation or Revision for Spill
Within 30 days of acquiring knowledge of any spill of a Regulated Substance, ERM shall consider revocation or revision of the permit. In consideration of whether to revoke or revise the permit, ERM may consider the intentional nature or the degree of negligence, if any, associated with the spill, the extent to which containment or cleanup is possible, the nature, number, and frequency of previous spills by the Permittee, and the potential degree of harm to the groundwater and surrounding wells due to such spill.

c. Permits for Existing Uses
All existing nonresidential activities in Zone 2 which use, handle, store, or produce Regulated Substances shall file an application for an Operating Permit within 90 days of the receipt of written notice from ERM. Said permit application shall be prepared and signed by a Professional Engineer or Professional Geologist registered or licensed in the State of Florida, except for Closure or Transfer Permits as provided Art. 14.B.7.B.2, Closure Permit, and Art. 14.B.10, Transfers and Changes in Ownership. Within 30 days of receipt of said notice, the owner or operator shall file with ERM proof of retention of said engineer or geologist. If application is made for an Operating Permit, such a permit shall be issued or denied within 60 days of the filing of the completed application. If the application for an Operating Permit is denied, then the activity shall cease within 180 days of the denial of the Operating Permit. All Regulated Substances and contaminated containers shall be disposed in a lawful and environmentally sound manner in accordance with applicable State and Federal laws, and the activity and environs shall be cleaned up so as to preclude leaching of residual Regulated Substances into the environment. [Ord. 2013-001]

3. Zone 3
a. Prohibited Activities
All nonresidential activities within Zone 3 which store, handle, use, or produce any Regulated Substance are prohibited, unless they qualify as a General Exemption or receive an Operating Permit from ERM.

b. Permit Conditions
An Operating Permit issued to any nonresidential activity within Zone 3 that stores, handles, uses, or produces any Regulated Substance shall be subject to the following conditions:

1) Containment of Regulated Substances
Leak-proof trays under containers, floor curbing, or other containment systems to provide secondary liquid containment shall be installed. The containment shall be of adequate size to handle all spills, leaks, overflows, and precipitation until appropriate action can be taken. The specific design and selection of materials shall be sufficient to preclude any Regulated Substance loss to the external environment. Containment systems shall be sheltered so that the intrusion of precipitation is effectively prevented. The owner/operator may choose to provide adequate and appropriate liquid collection methods rather than sheltering only after approval of the design by ERM. These requirements shall apply to all areas of use, production, and handling, to all storage areas, to loading and off-loading areas, and to above-ground and underground storage areas. The containment devices and liquid collection systems shall be certified in the Operating Permit application by the Professional Engineer or Professional Geologist registered or licensed in the State of Florida.

2) Emergency Plan
An emergency plan shall be prepared and filed with the Operating Permit application indicating the procedures which will be followed in the event of spillage of a Regulated Substance so as to control and collect all such spilled material in such a manner as to prevent it from reaching any storm or sanitary drains or the ground.

3) Inspection
A responsible person designated by the Permittee who stores, handles, uses, or produces the Regulated Substances shall check on every day of operation, for breakage or leakage of any container holding the Regulated Substances. Electronic sensing devices may be employed as part of the inspection process, if approved by ERM, and provided the sensing system is checked daily for malfunctions. The manner of daily inspection shall not necessarily require
physical inspection of each container provided the location of the containers can be inspected to a degree which reasonably assures ERM that breakage or leakage can be detected by the inspection. Monitoring records shall be kept and made available to ERM at all reasonable times for examination.

4) **Maintenance of Containment and Emergency Equipment**

Procedures shall be established for the quarterly in-house inspection and maintenance of containment and emergency equipment. Such procedure shall be in writing; a regular checklist and schedule of maintenance shall be established; and a log shall be kept of inspections and maintenance. Such logs and records shall be available for inspection by ERM.

5) **Reporting of Spills**

Any spill of a Regulated Substance in excess of the non-aggregate quantity thresholds identified in the definition of “Regulated Substance” shall be reported by telephone to PBCHD and the designated public utility within one hour, and to ERM within 24 hours of discovery of the spill. Cleanup shall commence immediately upon discovery of the spill. A full written report including the steps taken to contain and clean up the spill shall be submitted to ERM within 15 days of discovery of the spill.

6) **Revocation or Revision for Spill**

Within 30 days of acquiring knowledge of any spill of a Regulated Substance, ERM shall consider revocation or revision of the permit to comply with some or all the conditions applicable to Zone 2, as set forth in Art. 14.B.6.C.2.b.1) -11), Permit Conditions, in addition to the Zone 3 conditions of Art. 14.B.6.C.3.b.1-7), Permit Conditions. In consideration of whether to revoke or revise the permit, ERM may consider the intentional nature or the degree of negligence, if any, associated with the spill, the extent to which containment or cleanup is possible, the nature, number, and frequency of previous spills by the Permittee, and the potential degree of harm to the groundwater and surrounding wells due to such spill.

7) **Permit Process**

Operating Permits required by this Chapter shall be applied for and processed in accordance with Art. 14.B.6.C.2.c, Permits for Existing Uses, by filing an application for an Operating Permit within 90 days of the receipt of written notice from ERM. Said permit application shall be prepared and signed by a Professional Engineer or Professional Geologist registered or licensed in the State of Florida. Within 30 days of receipt of said notice, the owner or operator shall file with ERM proof of retention of said engineer or geologist. If application is made for an Operating Permit, such a permit shall be issued or denied within 60 days of the filing of the completed application. If the application for an Operating Permit is denied, then the activity shall cease within 180 days of the denial of the Operating Permit. All Regulated Substances and contaminated containers shall be disposed in a lawful and environmentally sound manner in accordance with applicable State and Federal laws, and the activity and environs shall be cleaned up so as to preclude leaching of residual Regulated Substances into the environment.

[Ord. 2013-001]
2) **Reporting of Spills**
   Any spill of a Regulated Substance in excess of the non-aggregate quantity thresholds identified in the definition of “Regulated Substance” shall be reported by telephone to PBCHD and the designated public utility within one hour, and to ERM within 24 hours of discovery of the spill. Cleanup shall commence immediately upon discovery of the spill. A full written report including the steps taken to contain and clean up the spill shall be submitted to ERM within 15 days of discovery of the spill.

3) **Revocation or Revision for Spill**
   Within 30 days of acquiring knowledge of any spill of a Regulated Substance, ERM shall consider revocation or revision of the permit to comply with some or all the conditions applicable to Zone 2, as set forth in Art. 14.B.6.C.2, Zone 2, and Art. 14.B.6.C.2.b, Permit Conditions, in addition to those of Art. 14.B.6.C.4.b.1)-4), Permit Conditions. In consideration of whether to revoke or revise the permit, ERM may consider the intentional nature or the degree of negligence, if any, associated with the spill, the extent to which containment or cleanup is possible, the nature, number, and frequency of previous spills by the Permittee, and the potential degree of harm to the groundwater and surrounding wells due to such spill.

4) **Permit Process**
   Operating Permits required by this Chapter shall be applied for and processed by filing an application for an Operating Permit within 90 days of the receipt of written notice from ERM. Said permit application shall be prepared and signed by a Professional Engineer or Professional Geologist registered or licensed in the State of Florida. However, a nonresidential activity in Zone 4 is not required to retain an engineer or geologist to prepare the Operating Permit if the revocation for spill provisions of this Chapter do not apply. Within 30 days of receipt of said notice, the owner or operator shall file with ERM proof of retention of said engineer or geologist. If application is made for an Operating Permit, such a permit shall be issued or denied within 60 days of the filing of the completed application. If the application for an Operating Permit is denied, then the activity shall cease within 180 days of the denial. All Regulated Substances and contaminated containers shall be disposed in a lawful and environmental sound manner in accordance with applicable State and Federal laws, and the activity and environs shall be cleaned up so as to preclude leaching of residual Regulated Substances into the environment. [Ord. 2013-001]

D. **Other Requirements and Liabilities**
   A notice to cease, or a permit or exemption issued under this Chapter shall not relieve the owner or operator of the obligation to comply with any other applicable Federal, State, regional, or local regulation, rule, ordinance, or requirement. Nor shall said notice, permit, or exemption relieve any owner or operator of any liability for violation of such regulations, rules, ordinances, or requirements.

E. **Domestic Wastewater and Stormwater Treatment**
   1. **Sanitary Sewer Mains**
      All new or replacement installations of sanitary sewer mains in Zone 1 or Zone 2 of a public drinking water wellfield shall be constructed using pressure pipe. Standards for installation are shown in Appendix 4, Minimum Standards for Sewer Pipe and Fittings, and shall be enforced by PBCHD through the permit process. For new wells placed in areas of existing sanitary sewers, the sewers in Zones 1 and 2 must be pressure tested at each joint, grouted, and sealed with proof of testing provided to the PBCHD prior to release of the well for service. [Ord. 2013-001]

2. **Exfiltration Systems**
   No new exfiltration system shall be constructed in Zone 1 or Zone 2 of a public drinking water wellfield.

3. **Retention/Detention Ponds**
   New retention or detention ponds located within wellfield zones shall comply with the criteria described in the SFWMD Management and Storage of Surface Waters Permit Information Manual IV. These criteria are enforced through the SFWMD permitting process.

4. **Percolation Ponds**
   New percolation ponds for domestic wastewater treatment located within wellfield zones shall comply with the requirements for separation from public drinking water wells set forth in Chapter 62-555, F.A.C., and Chapter 62-610, F.A.C., and enforced by Florida Department of Environmental Protection and the PBCHD.

5. **Land Application of Domestic Wastewater Effluent**
   Land application of domestic effluent or sludge within wellfield zones shall comply with the requirements for separation from public drinking water wells as set forth in Chapter 62-555, F.A.C., Chapter 62-610,
6. **On-Site Sewage Disposal Systems**

New on-site sewage disposal systems (septic tanks) located within wellfield zones shall comply with the requirements for maximum sewage loading and separation from public drinking water wells as set forth in Environmental Control Rule (ECR) I and enforced by the PBCHD.

F. **Spill Assessment and Remediation**

Upon discovery of a spill in a wellfield zone, a determination shall be made as to jurisdiction. ERM shall provide notification to the Florida Department of Environmental Protection and PBCHD including all available information pertinent to the spill. Florida Department of Environmental Protection will be responsible for determination if the spill occurrence constitutes a Resource Conservation and Recovery Act (RCRA) regulated material as defined in Chapter 62-730, F.A.C., and 40 CFR 261. If determination is made that the spill occurrence involves a RCRA regulated material, Florida Department of Environmental Protection will assume the role as lead regulatory agency in assessment and remediation. ERM will assume the role as lead agency if determination reveals a non-RCRA Regulated Substance. Upon issuance of an order by ERM, corrective action shall immediately be initiated by the responsible person. Failure to initiate corrective action shall be a violation of this Chapter. Corrective action shall include any or all of the following:

1. Cessation of the discharge and initial control, containment, and recovery of free-flowing, floating, or standing pollutants;
2. Removal and disposal of contaminated soils, sediments, vegetation, containers, recovery, and other contaminated materials in accordance with applicable Federal, State, and local regulations;
3. Assessment of the horizontal and vertical extent of soil, sediment, surface water, and groundwater contamination, as well as rate and direction of migration of the contaminants; and,
4. Remediation of contaminated soils, sediments, surface water, and groundwater to preclude further migration of unacceptable levels of residual Regulated Substances into or through the surface water or groundwater environment. ERM shall determine necessary, reasonable measures and time frames for corrective action. The corrective action shall be completed to the satisfaction of ERM. Where State or Federal regulations establish procedures or cleanup levels for corrective action for particular discharges, the corrective action shall at a minimum comply with those procedures and cleanup levels. Completion of corrective action as specified by ERM shall not relieve the responsible person or persons of liability under any other applicable Federal, State, or local regulation, rule, ordinance, or requirement; nor shall it relieve the responsible person or persons of liability for corrective actions for conditions which were previously unknown to ERM, or which resulted from implementation of corrective action as required.

G. **Closure Activity**

When an activity in any Zone ceases operation, all Regulated Substances and contaminated containers shall be disposed of in a lawful and environmentally sound manner in accordance with applicable State and Federal laws, and the activity and environs shall be cleaned up so as to preclude leaching of residual Regulated substances into the environment. When an activity in Zone 1 ceases operation, a Closure Permit shall be obtained. [Ord. 2013-001]

Section 7 **Wellfield Protection (Operating and Closure Permits)**

The following provisions provide the requirements and procedures for the issuance of Operating and Closure Permits required by this Chapter.

A. **General**

1. An application which satisfies the requirements of the applicable Zones of Influence, Art. 14.B.7.B, Applications, for Operating Permits, and, if applicable, Art. 14.B.5.A, General Exemptions, for General Exemptions and Art. 14.B.8, Appeals, shall be approved and a permit issued. In addition to the failure to satisfy these requirements, ERM may deny a permit based on repeated violations of this Chapter.
2. An Operating Permit shall remain valid provided the Permittee is in compliance with the terms and conditions of the permit.
3. Permittees shall be required to pay annual permit renewal fees beginning October 1, 1990. Beginning October 1, 1990, all current and future permittees are subject to an annual permit renewal fee as established by the approved Fee Schedule. Notification to ERM under Art. 14.B.6.C.2.b.9), Alterations and Expansions, is due with the renewal fee.
4. ERM shall have the right to make inspections of facilities at reasonable times to determine compliance with this Chapter.

F.A.C., and Chapter 62-640, F.A.C., and enforced by Florida Department of Environmental Protection and the PBCHD.
5. All of the facilities owned and/or operated by one person when these structures and activities are located on contiguous parcels of property even where there are intervening public or private roads, may be covered under one permit.

B. Applications

1. Operating Permit

   All applications for Operating Permits shall, at the minimum, provide the following information:
   a. A list of all Regulated Substances and substances on the Generic Substance List which are to be stored, handled, used, or produced in the nonresidential activity being permitted including their quantities.
   b. A detailed description of the nonresidential activities that involve the storage, handling, use, or production of the Regulated Substances indicating the unit quantities in which the substances are contained or manipulated including layout plans or drawings of the facility in which the activities will take place.
   c. A description of the containment, the emergency collection devices, containers, and emergency plan that will be employed to comply with the restrictions required for Zone 2 and 3 as set forth above. For Zone 4 this particular documentation will only be required if a permit revision is required pursuant to Art. 14.B.6.C.4.b.3), Revocation or Revision for Spill.
   d. A description of the daily monitoring activities that have been or will be instituted to comply with the restrictions for Zones 2, 3, and 4 as set forth above in Art. 14.B.6.C.2, Zone 2.
   e. A description of the maintenance that will be provided for the containment facility, monitoring system, and emergency equipment required to comply with the restrictions of Zones 2 and 3 as set forth above. For Zone 4 this particular documentation will be required if a permit revision is required pursuant to Art. 14.B.6.C.4.b.3), Revocation or Revision for Spill.
   f. A description of the groundwater monitoring wells that have been or will be installed, other pertinent well construction information, and the arrangements which have been made or which will be made for certified analyses for specified Regulated Substances. For Zones 3 and 4 this particular documentation will only be required for a revised Operating Permit as required under Art. 14.B.6.C.3.b.6), Revocation or Revision for Spill, Art. 14.B.6.C.4.b.3), Revocation or Revision for Spill, and Art. 14.B.13.C, Spills.
   g. Evidence of arrangements made with the appropriate designated public utility for sampling analysis of the raw water from the potable water well. For Zones 3 and 4 this particular documentation will only be required for a revised Operating Permit as required under Art. 14.B.6.C.3.b.6), Revocation or Revision for Spill, Art. 14.B.6.C.4.b.3), Revocation or Revision for Spill, and Art. 14.B.13.C, Spills.
   h. An agreement to indemnify and hold PBC harmless from any and all claims, liabilities, causes of action, or damages arising out of the issuance of the permit. PBC shall provide reasonable notice to the Permittee of any such claims.
   i. The application for the Operating Permit shall be filed with ERM within 90 days of receipt of written notification from ERM.

2. Closure Permit

   Closure Permit applications shall be required in Zone 1 and contain the following information: [Ord. 2013-001]
   a. A schedule of events to complete the closure of an activity that does or did store, handle, use, or produce Regulated Substances. As a minimum, the following actions shall be addressed:
      1) Disposition of all Regulated Substances and contaminated containers;
      2) Cleanup of the activity and environs to preclude leaching of unacceptable levels of residual Regulated Substances into the aquifer;
      3) Certification by a Professional Engineer or Professional Geologist registered or licensed in the State of Florida that disposal and cleanup have been completed in a technically acceptable manner. The requirement for certification by a Professional Engineer or Geologist may be waived if the Applicant provides evidence to ERM that all of the following items are applicable:
         a) The entire operation is maintained inside the building(s) of the facility;
         b) The standard method of removing operating waste is not by septic tank, sewer mains, or floor drains;
         c) There is no evidence of spills permeating floors or environs;
         d) There are no outstanding or past notices of violation from any regulatory agency concerned with hazardous, industrial, or special waste;
         e) There is no evidence of past contamination in the public drinking water well(s) associated with the facility in Zone 1; and,
f) The Applicant shall provide a sworn statement that disposal and cleanup have been completed in a technically acceptable manner.

4) An appointment for an inspection by ERM; and,
5) An agreement to indemnify and hold PBC harmless from any and all claims, liabilities, causes of action, or damages arising out of the issuance of the permit. PBC shall provide reasonable notice to the Permittee of any such claims.

b. The issue of well reconfiguration shall be evaluated by ERM and the affected public utility as an alternative to a Closure Permit during the permit application process. Should a utility notify ERM in writing that it intends to reconfigure a wellfield and said configuration no longer subjects a facility to Zone 1 and Zone 2 requirements, ERM may issue an Operating Permit providing conditions under which said facility may continue to operate.

c. The Florida Department of Environmental Protection and the PBCHD shall be advised in writing of each Closure Permit application.

3. Permit Conditions
The permit conditions shall ensure compliance with all the prohibitions, restrictions, and requirements as set forth in this Chapter. Such conditions may include, but not be limited to, monitoring wells, periodic groundwater analysis reports, and compliance schedules. Said conditions may also include requirements in a Closure Permit to reduce the risk in the interim of contamination of the groundwaters, taking into account cost, likely effectiveness, and degree of risk to the groundwater.

4. Bond Required
Except as provided in Art. 14.B.7.B.4.e below, no permit herein required shall be issued unless there is filed at the time of application, except in the case of an application by a political subdivision or agency of the State of Florida, a cash bond, permit bond with a corporate surety, or letter of credit in the amount specified in Appendix 2, Operating and Closure Permit Bonds, attached hereto and incorporated herein.

a. The Permittee will operate its nonresidential activities and/or closure of such nonresidential activities, as applicable, in accordance with the conditions and requirements of this Chapter and permits issued hereunder.

b. The Permittee shall reimburse PBC in accordance with Art. 14.B.7.B.1, Operating Permit, for any and all expenses and costs that PBC incurs as a result of the Permittee failing to comply with the conditions and requirements of this Chapter.

c. Before a bond or letter of credit is accepted by ERM as being in compliance with this Chapter, the bond or letter of credit shall be reviewed and approved by the County Attorney's Office and Contract Development and Control. A corporate bond shall be executed by a corporation authorized to do business in the State of Florida as a Surety. A cash bond shall be deposited with ERM, who shall give receipt therefore.

d. The bond or letter of credit required by this Chapter shall be kept in full force and effect for the term of the permit and for one year after voluntary cessation of activities permitted hereunder, expiration, or revocation of the permit.

e. No bond or letter of credit is required for issuance of a permit for the following:
   1) Closure of a facility, provided that the conditions listed in Art. 14.B.7.B.2.a.3), above for waiver of certification by an engineer or geologist are applicable. [Ord. 2005-002]
   2) A facility in Zone 4, unless ERM has determined that a revision of the permit is appropriate under conditions described in Art. 14.B.6.C.4.b.3), Revocation or Revision for Spill or Art. 14.B.13.C, Spills.
   3) Retail/wholesale activities which meet the conditions for this exemption set forth in Art. 14.B.5.A.4.f, Retail/Wholesale Sales Activities.
   4) Activities subject to regulation due to the accumulations of Wasted Regulated Substances, provided that they comply with the conditions for this exemption set forth in Art. 14.B.5.A.4.i, Activities Subject to Regulation Due to Accumulation.

5. Cleanup and Reimbursement
Any person subject to regulation under this Chapter shall be liable with respect to Regulated Substances emanating on or from the person's property for all costs of removal or remedial action incurred by PBC and damages for injury to, destruction of, or loss of natural resources, including the reasonable cost of assessing such injury, destruction, or loss resulting from the release or threatened release of a Regulated Substances as defined in this Chapter. Such removal or remedial action by PBC may include, but is not limited to, the prevention of further contamination of groundwater, monitoring, containment, and cleanup or disposal of Regulated Substances resulting from the spilling, leaking, pumping, pouring, emitting, or dumping of any Regulated Substance, or material which creates an emergency hazardous situation or is expected to create an emergency hazardous situation.
Section 8 Appeals

A. General
Any affected party may appeal ERM decisions set forth below, pursuant to procedures in Art. 14.C.11, Appeals.

B. Matters for Review and Time for Filing
Any person may appeal to a Hearing Officer as established in Art. 2.G.3.G, Hearing Officers for the following reasons:
1. To appeal ERM's permit conditions, denial of a permit, General Exemption, or nondisclosure of a trade secret;
2. To appeal an intent to revoke or revise an Operating Permit and a General or Special Exemption; and,
3. To request a Special Exemption.

Section 9 Petition for Compensation

The purpose of this Section is to provide a means of petitioning PBC for reasonable compensation in the event a person operating a facility in existence prior to the establishment of a new Wellfield Zone 1 or a reconfigured Wellfield Zone 1 is required to move or cease operations as a direct result of a change in the Wellfield Protection Maps. This Section shall apply only in the event an application for a General or Special Exemption, as set forth in Art. 14.B.5, and all subsequent appeals, are denied. ERM may impose a reasonable fee for each petition in order to defray the costs to PBC in administering this Section. [Ord. 2013-001]

A. Filing
A petition for compensation shall be filed with ERM no later than 90 days after an application for a General or Special Exemption, as set forth in Art. 14.B.5, and all subsequent appeals, are denied. The petition shall be heard by a Hearing Officer as established in Art. 2.G.3.G, Hearing Officers. [Ord. 2013-001]

B. Contents of Petition
A petition for compensation shall contain, as applicable, the following:
1. An analysis of the need to move, or cease operations including a summary of alternatives investigated and estimated costs of those alternatives; [Ord. 2013-001]
2. A list of all previously issued EPA notices of violation by ERM, Florida Department of Environmental Protection, or the EPA regarding use of Regulated Substances including a description of any corrective action taken or pending; and,
3. Detailed specification of the amount for which compensation is being requested. Petitions shall include documentation to verify all costs for which compensation is sought. [Ord. 2013-001]

C. Administrative Review
ERM shall review all petitions for compensation for completeness within 30 working days of receipt of the petition. If ERM determines the petition is not complete, written notice shall be mailed to the Petitioner specifying the deficiencies. No further action shall be taken on the petition until the deficiencies are remedied. If the deficiencies are not remedied within 30 working days of receipt of written notice, the petition shall be deemed abandoned and any rights that may be conferred under this Section shall be waived. Upon a finding of sufficiency, ERM shall review the petition and make recommendations to the Hearing Officer regarding the reasonableness of any amounts requested by the Petitioner, whether the requested compensation consists of amounts greater than the cost of any reasonable facility/operation modifications. Based upon such recommendations, the Hearing Officer may deny such petition. [Ord. 2013-001]

D. Hearing on Petition
As soon as practicable after submission of a petition for compensation, but no later than 90 days, by an owner or operator of an activity, the Hearing Officer shall hold a hearing to determine the eligibility of the activity for compensation pursuant to this Chapter. The Hearing Officer may extend the 90 day period for good cause based on the request of the Petitioner, PBC, or on its own initiative. Petitioner shall be given written notice by certified mail or hand delivery of such hearing at least 30 days prior to the hearing. At least ten days prior to the hearing, the Petitioner and PBC shall exchange names and addresses of witnesses and copies of all documentary evidence intended to be used at the hearing. Formal Rules of Evidence shall not apply to such hearing, but fundamental due process shall be observed and shall govern the proceedings. Petitioner and PBC shall have the right to: [Ord. 2013-001]
1. Call and examine witnesses;
2. Introduce exhibits;
3. Cross examine witnesses on any relevant matter;
4. Rebut the evidence; and,
5. Be represented by counsel.
E. Review and Evaluation Criteria

1. Cessation or Move

In determining whether the Petitioner is eligible for compensation for cessation or moving, the Hearing Officer shall consider:

   a. Whether a reasonable, cost effective alternative to cessation or moving of operations exists for complying with this Chapter, including reconfiguring of the wellfield. Petitioner, with the cooperation of ERM and the affected public utility, shall address the issue of reconfiguration; [Ord. 2013-001]

   b. Whether the requirements of this Chapter were the sole reason for cessation or moving of the operation; [Ord. 2013-001]

   c. Past environmental record; and,

   d. Efforts to mitigate financial impact of this Chapter and these corresponding regulations.

F. Classes of Impact for Which Compensation May Be Granted

1. Actual Reasonable Relocation Expenses

   a. Costs

      The owner or operator of an affected activity may be paid the actual reasonable cost of relocation within PBC, such amount to include the cost of: [Ord. 2013-001]

      1) Dismantling operation;

      2) Actual moving;

      3) Reassembling equipment;

      4) Installation of equipment;

      5) Internal connection of utilities to equipment;

      6) Minor modification of site to accommodate operation, specifically excluding structural changes to the building or paving and drainage requirements at the site;

      7) Any losses caused by the necessity of terminating a lease, such compensation not to exceed three months' rent. [Ord. 2013-001]

   b. Documentation of Costs

      The eligible costs for actual reasonable relocation expenses shall be supported by two itemized and sealed bids and a detailed listing of the claimed items. The amount to be paid shall not exceed the lower of the two bids. In order to verify such information, ERM shall have the right to enter the activity's premises at reasonable times. Such bids and detailed listing of the cost shall be verified by ERM.

   c. Self-Moves

      In the case of a self-move the owner of a relocated activity may be paid the lower of two sealed and itemized bids from licensed moving companies based on a detailed listing of the cost.

2. Actual Direct Losses of Tangible Personal Property

Actual direct losses of tangible personal property are allowed when a person closes or relocates an activity. Payment may only be made after a diligent effort is made by the owner to sell the item(s) involved.

   a. If the activity is to be re-established and an item of property to be used therewith is not moved but promptly replaced with a comparable item at the new site, reimbursement shall be either:

      1) Replacement cost, taking into account depreciation, less the proceeds of the sale. Present value based on accepted standards in the related business community may be substituted for net proceeds of a sale where applicable; or

      2) Estimated cost of moving the item to the replacement site within the geographic boundaries of PBC.

   b. If a sale is not affected because no offer is received and the item is abandoned, payment for the loss may be its fair market value for continued use at its existing location plus the costs of the attempted sale, less the equipment's salvage value.

3. In Lieu of Actual Moving Expenses

In lieu of the payments described in Art. 14.B.9.F.1, Actual Reasonable Relocation Expenses, Art. 14.B.9.E.2, Actual Reasonable Modification of Operation Expenses, and Art. 14.B.9.F.2, Actual Direct Losses of Tangible Personal Property, an owner of a discontinued activity may be eligible to receive a payment equal to 75 percent of the estimated reasonable cost of moving the activity within PBC, except that such payment shall not be more than the lower of two sealed and itemized bids, provided the following requirements are met:

   a. For the owner of an affected activity to be entitled to this payment, the Hearing Officer must determine that the business cannot be relocated without a substantial loss of its existing patronage. Such determination shall be made by the Hearing Officer only after consideration of all pertinent circumstances, including, but not limited to, the following factors:
1) The type of business conducted by the displaced activity;
2) The nature of the clientele of the displaced activity;
3) The relative importance of the present location to the displaced activity; and,
4) The additional costs which would have to be incurred to move the activity due to changed circumstances or applicable laws, ordinances, or regulations.

b. For the owner or operator of an affected activity to be entitled to his or her payment, information must be provided to support the estimated moving costs. Such proof shall consist of two sealed bids from licensed moving companies based on a detailed inventory of the items which would be moved.

4. **Exclusions on Moving Expenses and Losses**

The following expenses are considered ineligible for payment as “actual” moving expenses:

a. Additional expenses incurred because of moving to and living in a new location including search cost for finding a new dwelling;

b. Cost of moving structures, improvements, or other real property in which the displaced activity reserved ownership;

c. Significant changes in building structure but not including minor electrical, plumbing, or carpentry work;

d. Cost of improvement to activity made after such activity was on notice that it is affected by this Chapter and would have to cease or alter an operation in Zone 1;

e. Interest on loans to cover moving expenses;

f. Loss of goodwill;

g. Loss of business or profits or both;

h. Loss of trained employees; and,

i. Cost of preparing the petition for compensation.

5. **Payment and Release of Obligation**

PBC shall disperse 85 percent of the compensation to be paid as determined by the Hearing Officer in advance of any move or change of operation. PBC shall retain 15 percent of the monies authorized as compensation for economic impact of this Chapter until such time as the affected activity has carried out the procedures outlined in its petition for compensation and provides evidence of such expenditures. Upon receipt of payment of compensation as provided in this Chapter, the recipient shall execute a release in favor of PBC from any further obligation to the recipient with regard to the economic impact of this Chapter on the recipient or activity.

6. **Appeal**

PBC or the Petitioner seeking compensation under this Section may appeal the final decision of the Hearing Officer by filing a Petition for Writ of Certiorari in the 15th Judicial Circuit Court in and for PBC.

[Ord. 2013-001]

**Section 10 Transfers and Changes in Ownership**

In the event, there is a change of ownership, a new lease, or an assignment of a lease, a sublease, or any other change in regard to the person conducting the operation regulated, ERM shall be notified and upon payment of the appropriate fee and completion of processing of an application by ERM, the Wellfield Protection Operating Permit shall be transferred.

**Section 11 Trade Secrets**

ERM shall not disclose any trade secrets of the Applicant or Permittee that are exempted from such disclosure by Federal or State law; provided, however, the burden shall be on the Applicant or Permittee to demonstrate entitlement to such nondisclosure. Decisions by ERM as to such entitlement shall be subject to challenge by the Applicant or Permittee by filing a petition with the Hearing Officer pursuant to Art. 14.C.11, Appeals.
Section 12 Fees

A. Filing Fee
All applicants for a Wellfield Protection Operating or Closure Permit shall pay a non-refundable filing fee as established by the approved Fee Schedule. The fee shall be provided at the time of acceptance of the permit application.

B. Wellfield Protection Operating Permit Fee
The fee for a Wellfield Protection Operating Permit including any permit obtained pursuant to the General Exemptions set forth in Art. 14.B.5.A, General Exemptions, of this Chapter as established by the approved Fee Schedule. The operating fee shall be used to defray the cost of administering this Chapter.

C. Closure Permit Fee
The fee for a Closure Permit under this regulation shall be one-half of the fee for the Wellfield Protection Operating Permit as established by the approved Fee Schedule.

D. Permit Transfer Fee
The fee for transfer of an Operating Permit or Closure Permit shall be as established by the approved Fee Schedule to defray the cost of processing the transfer. Application for Transfer of Permit is to be made within 60 days of transfer of ownership of the activity.

E. Special Exemption Fee
A Fee shall be required for any person seeking a Special Exemption as established by the approved Fee Schedule.

F. General Exemption Fee
A Fee shall be required for any person seeking a General Exemption as established by the approved Fee Schedule.

G. Annual Permit Renewal Fee
The fee for annually renewing the permit established by the approved Fee Schedule, shall be used to defray the cost of administering this Chapter. Beginning October 2, 1990, all permittees shall pay an annual permit renewal fee for each permitted facility.

H. Late Fee
A late fee as established by the approved Fee Schedule, shall be paid to ERM if the application for permit or renewal is late.

Section 13 Revocation and Revision of Permits and Exemptions

A. Revocation
Any permit issued under the provisions of this Chapter shall not become vested in the Permittee. ERM may revoke any permit issued by it by first issuing a written notice of intent to revoke (certified mail return receipt requested, or hand delivery) if it finds that the permit holder:

1. Has failed or refused to comply with any of the provisions of this Chapter, including but not limited to permit conditions and bond requirements of Art. 14.B.7.B.4, Bond Required, herein;
2. Has submitted false or inaccurate information in this application;
3. Has failed to submit operational reports or other information required by this Chapter;
4. Has refused lawful inspection under Art. 14.B.7.A.4, General; or,

B. Revision

C. Spills
In addition to the provisions of Art. 14.B.6.C.2.b.11), Revocation or Revision for Spill, Art. 14.B.6.C.3.b.6), Revocation or Revision for Spill, and Art. 14.B.6.C.4.b.3), Revocation or Revision for Spill, within 30 days of acquiring knowledge of any spill of a Regulated Substance in a wellfield zone, ERM shall consider revocation or revision of the permit. Upon such consideration, ERM may issue a notice of intent to revoke or revise, which shall be subject to the appeal provisions of this Chapter, or elect not to issue such notice. In consideration of whether to revoke or revise the permit, ERM may consider the intentional nature or degree of negligence, if any, associated with this spill, and the extent to which containment or cleanup is possible, the nature, number, and frequency of previous spills by the Permittee, and the potential degree of harm to the groundwater and surrounding wells due to such spill.
D. Revocations of Exemptions
For any revocation or revision by ERM of a Special Exemption or General Exemption that requires an Operating Permit as provided under the terms of this Chapter, ERM shall issue a notice of intent to revoke or revise which shall contain the intent to revoke or revise both the applicable exemption and the accompanying Operating Permit.

E. Notice
The written notice of intent to revoke or revise shall contain the following information:
1. The name and address of the Permittee, if any, and Property Owner, if different;
2. A description of the facility which is the subject of the proposed revocation or revision;
3. Location of the spill, if any;
4. Concise explanation and specific reasons for the proposed revocation or revision; and,
5. A statement that “Failure to appeal a notice of intent to revoke or revise, within 20 days after the date upon which Permittee receives written notice pursuant to Art. 14.C.11, Appeals, shall render the proposed revocation or revision final and in full force and effect.”

F. Appeals
Failure of Permittee to file a petition in accordance with the appeal provisions of this Chapter shall render the proposed revocation or revision final and in full force and effect.

G. Other Remedies
Nothing in this Chapter shall preclude or be deemed a condition precedent to ERM seeking a temporary or permanent injunction.

Section 14 Violations, Enforcement, and Penalties
Failure to comply with the requirements of this Chapter or any permit, exemption, or approval granted or authorized hereunder shall constitute a violation of this Chapter.

Section 15 Groundwater and Natural Resources Protection Board (GNRPB)
The GNRPB shall hear violations of this Chapter pursuant to Art. 10.C, Groundwater and Natural Resources Board. Violations of this Chapter may be referred by ERM to the GNRPB for corrective actions and civil penalties.

Section 16 Additional Enforcement Measures
In addition to the enforcement procedures set forth above, violations of the provisions of this Chapter may be enforced pursuant to F.S. § 125.69. Such violations may be deemed a separate offense for each day during any portion of which any violation is committed or continued. In addition to the sanctions contained herein, PBC may take any other appropriate legal action, including but not limited to, administrative action and requests for temporary and permanent injunctions, to enforce the provisions of this Chapter. It is the purpose of this Chapter to provide additional cumulative remedies.

Section 17 PBC Pollution Recovery Trust Fund
Funds collected pursuant to administrative penalties levied by the GNRPB for violations of this Chapter shall be deposited in the PBC Pollution Recovery Trust Fund.
CHAPTER C  VEGETATION PRESERVATION AND PROTECTION

Section 1  General

A. Goals
The goals of this Chapter are:
1. To avoid the unnecessary destruction of native vegetation;
2. To pursue eradication of invasive non-native vegetation;
3. To minimize adverse impacts to native vegetation during parcel improvement;
4. To mitigate the removal of native vegetation when the vegetation cannot be preserved in place or relocated under the proposed site plan; and,
5. To relocate any movable native vegetation that cannot be incorporated into the site plan to a PBC approved parcel.

Section 2  Definitions

Section 3  Purpose

A. This Chapter shall:
1. Establish a program to preserve and protect native vegetation; and [Ord. 2008-040]
2. Prohibit the unnecessary destruction of native vegetation and require the eradication of invasive non-native vegetation. [Ord. 2008-040]

Section 4  Applicability

A. This Chapter shall apply within the unincorporated areas of PBC, Florida.
B. PBC shall have regulatory authority over the alteration or removal of non-native and native upland vegetation, and the establishment and maintenance of upland preserve areas.
C. Terms specific to this Chapter are defined in Art. 1.H, Definitions and Acronyms. Terms not defined in this Chapter shall be defined pursuant to Chapter 62, F.A.C., the document entitled, “Basis of Review” (BOR), as amended, for Applications within the South Florida Water Management District, dated November 1996, and Art. 1.H, Definitions and Acronyms, of this Code, as may be amended from time to time. In the event that a term is defined in Chapter 62, F.A.C., or the BOR, the BOR shall prevail. [Ord. 2008-040]

Section 5  Authority

This Chapter is adopted under the authority of F.S. ch. 125, as amended, and the Plan, as amended. [Ord. 2008-040]

Section 6  Approval Required Unless Exempt

No person may alter or cause to be altered any vegetation unless such alteration is exempted by, or expressly approved by this Chapter.

Section 7  Application, Process, and General Standards

A. Single Family Dwellings
All newly constructed Single Family dwellings in a residential subdivision will automatically receive a Building Division Residential 1 & 2 Family Checklist with standard native and non-native vegetation removal conditions as part of the Building Permit process. For the purposes of this Chapter, a Single Family residential parcel also includes single two-unit (duplex) residences and associated accessory structures, and shall comply with the following standards: [Ord. 2008-040] [Ord. 2012-027] [Ord. 2018-018]
1. Removal of native vegetation shall be limited to the minimum necessary to accomplish the purpose of the site plan. The Building Division Checklist shall include requirements that ensure the intent of this provision is implemented. [Ord. 2008-040] [Ord. 2018-018]
2. Complete removal or eradication of prohibited invasive non-native vegetation, as identified in Appendix 5, Prohibited Invasive Non-Native Vegetation, and Appendix 6, Invasive Non-Native Vegetation, shall be completed for the entire parcel or parcels of the Development Order prior to receipt of the CO. Planting or installation of vegetation identified in Appendix 5, Prohibited Invasive Non-Native Vegetation, and Appendix 6, Invasive Non-Native Vegetation, shall be completed for the entire parcel or parcels of the Development Order prior to receipt of the CO.
Vegetation, and Appendix 6, Invasive Non-Native Vegetation, is prohibited. The parcel owner shall maintain the parcel free of prohibited vegetation. No additional permit for such maintenance of vegetation shall be required. [Ord. 2005-002] [Ord. 2006-004]

Notwithstanding anything in this Chapter to the contrary, all vegetation removal permits for Single Family residences, single two-unit (duplex) residences, and accessory structures associated with Single Family residential parcels in existence as of the date of the adoption of this Chapter are void and of no effect, and all pending enforcement actions related thereto are dismissed. Single Family residential Property Owners are encouraged to maintain preserved native vegetation after site development is completed and to minimize the removal of native vegetation damaged by an extreme weather event such as a storm, hurricane, or other natural disaster. [Ord. 2008-040] [Ord. 2014-001]

1. Requirements and Process
   a. Projects involving the development of commercial projects, government projects, schools, new construction of a utility, road right-of-way projects, projects requiring DRO review, and agricultural operations of ten acres or greater shall apply to ERM for approval of said project on forms provided by ERM. The provisions of the Art. 14.C.7, Application, Process, and General Standards shall not apply on lands classified as Bona Fide Agriculture when the regulatory activity is preempted by State law. Projects that are exempt from the DRO process must make application for approval to remove native vegetation to ERM within 30 days of making application for an initial Building Permit for the project. [Ord. 2008-040] [Ord. 2009-040] [Ord. 2014-001]
   b. An application shall not be deemed complete until the application fee and all information necessary to fully understand the extent, nature, and potential impacts of a proposed project are received by ERM and approved by ERM prior to the scheduled DRO meeting. Any additional information for an application deemed insufficient at DRO meeting will not be approved until the next scheduled DRO meeting. Such information may include, but is not limited to: [Ord. 2008-040]
      1) A completed application form with the notarized signature of the parcel owner or authorized agent of the parcel owner; [Ord. 2008-040]
      2) A written explanation of the need and intent of the project and a description of construction or alteration methodologies; [Ord. 2008-040]
      3) A certified site plan or survey, where applicable, showing all easements. Both plan view and cross sectional view sketches may be required; [Ord. 2008-040]
      4) Parcel information including a location map, a recent aerial photograph with the parcel clearly delineated, and representative color photographs; [Ord. 2008-040]
      5) Identification of the type and location of native vegetation in the vicinity of, and likely to be affected by the project; [Ord. 2008-040]
      6) An Incorporated Vegetation Plan which graphically depicts the location and field tag number for each native tree and palm to remain undisturbed on the parcel during construction and the natural life of the vegetation. The Incorporated Vegetation Plan may also be required to be incorporated as a feature of the site plan; [Ord. 2008-040]
      7) A numbered tabular list of all native trees/palms surveyed, indicating the type of tree/palm, the DBH or height of clear trunk if palm, and whether the parcel owner proposes to keep the tree/palm in place, relocate it, offer it for surplus, remove it, or mitigate for its removal; [Ord. 2008-040]
      8) A completed Vegetation Surplus Form which identifies surplus native vegetation which the parcel owner determines cannot otherwise be used on the parcel and is providing for the use of the Surplus Vegetation Program; and, [Ord. 2008-040]
      9) Methods of stormwater pollution prevention if construction of the project may result in an area of exposed soil greater than one acre subject to Federal National Pollution Discharge Elimination System (NPDES) stormwater regulations, a copy of the on-site Stormwater Pollution Prevention Plan shall be submitted as part of the application for approval. [Ord. 2008-037]
   c. Any application received that is substantially the same as a previous application that has been denied by ERM subsequent to the effective date of this Chapter shall be denied with a written response provided to the Applicant stating the reason for denial. [Ord. 2008-040]
   d. Any parcel where a violation of any Chapter administered by ERM has occurred, shall not be eligible for approval under this Chapter until such violation has been resolved. [Ord. 2008-040]
e. Any application containing false information, or any approval issued based upon false information, may be denied or revoked and may subject the Applicant to enforcement proceedings pursuant to Art. 10, Enforcement, of this Code. [Ord. 2008-040]

f. ERM shall have the right to make inspections of construction areas at reasonable times to determine compliance with this Chapter. [Ord. 2008-037]

2. Standards of Approval

No approval shall be issued unless the application demonstrates that the project: [Ord. 2008-040]

a. Will not result in a net loss of wetland functions and values; [Ord. 2008-040]

c. Will not adversely affect the conservation of fish or wildlife or their habitats, or adversely affect recreational fisheries or their habitats; [Ord. 2008-040]

d. Will not adversely impact endangered or threatened species, and species of special concern, or their habitat; [Ord. 2008-040]

e. Incorporates into the design alternatives and modifications to avoid or minimize impacts to native vegetation. Existing native vegetation shall be incorporated into the site plan and protected during construction. Parcel improvement features shall be configured to minimize removal of existing native vegetation and maximize the use of areas dominated by prohibited and invasive non-native vegetation. Existing native vegetation that cannot be preserved in place shall be relocated to appropriate buffer and open space areas on the parcel. Relocatable native vegetation that cannot be incorporated into the parcel may be considered surplus. There is no requirement to provide vegetation for surplus. Non-relocatable native vegetation with trunk diameters equal to or greater than six inches that cannot be maintained on the parcel shall be mitigated in accordance with Table 7.E.3.C, Vegetation Credit and Replacement or through planting equivalent native vegetation, accepted by ERM prior to the receipt of the Certificate of Occupancy for single-unit projects or 75 percent completion of construction of multi-unit projects, based on either total square footage or number of units to be constructed. Native palms with gray wood equal to or greater than eight feet that cannot be relocated must be replaced with native palms of like size. A planting plan that clearly delineates proposed mitigation plantings from any required landscape plantings must be approved by ERM prior to the issuance of the first Building Permit for the project. [Ord. 2008-037] [Ord. 2008-040] [Ord. 2009-040] [Ord. 2018-018]

f. ERM shall also consider: [Ord. 2005-002] [Ord. 2008-003]

1) Alternative designs to limit the removal of native vegetation to the minimum necessary while still allowing the Applicant to accomplish the purpose of the site plan; [Ord. 2008-040]

2) Preserving listed species in place or relocating to buffers, open space, or unimproved portions of the parcel; [Ord. 2008-040]

3) The likelihood of success for relocated native vegetation; [Ord. 2008-040]

4) Mitigation or compensation for the loss of native vegetation; [Ord. 2008-040]

5) Creation of a tree preservation area; [Ord. 2008-040]

6) In lieu of replacement planting, when on-site mitigation has been exhausted or is unavailable, a donation may be made to PBC for the Natural Areas Fund unless an alternative plan that meets the purpose and intent of this Chapter has been approved by the Director of ERM. The donation amount shall be based on the average cost of the purchase, installation, and maintenance for one year of an equivalent number of replacement trees; and, [Ord. 2006-036] [Ord. 2008-037] [Ord. 2012-027]

7) Sabal palms may be allowed as replacement plantings for Canopy trees if approved by ERM and planted at three-to-one (palms-to-required replacement trees) based on Table 7.E.3.C, Vegetation Credit and Replacement, on ten-foot centers, plus or minus one foot, and grouped as shown on a planting plan table approved by ERM. [Ord. 2006-036] [Ord. 2008-040]

7) Sabal palms may be allowed as replacement plantings for Canopy trees if approved by ERM and planted at three-to-one (palms-to-required replacement trees) based on Table 7.E.3.C, Vegetation Credit and Replacement, on ten-foot centers, plus or minus one foot, and grouped as shown on a planting plan table approved by ERM. [Ord. 2006-036] [Ord. 2008-040]

h. Removes or eradicates prohibited invasive non-native vegetation, as identified in Appendix 5, Prohibited Invasive Non-Native Vegetation, and Appendix 6, Invasive Non-Native Vegetation, shall be completed for the entire parcel or parcels of the Development Order prior to receipt of the CO. Planting or installation of vegetation identified in Appendix 5, Prohibited Invasive Non-Native Vegetation, and Appendix 6, Invasive Non-Native Vegetation, is prohibited. The parcel owner shall maintain the parcel free of prohibited vegetation. No additional permit for such maintenance of vegetation shall be required. [Ord. 2005-002] [Ord. 2006-004] [Ord. 2008-040]
3. Establishing Native Upland Preserves
   All approvals for parcels equal to or greater than four acres shall be evaluated by ERM for the establishment of a native upland preserve. Parcels that have significant or unique areas of native upland vegetation, regardless of parcel size shall be required to designate a native upland preserve equivalent to at least 25 percent of the total native upland vegetation on site or otherwise comply with this Chapter. ERM encourages upland preserve areas greater than one-half acre in size. New public park facilities constructed on parcels 20 acres in size or less shall be exempt from the preserve requirements of this Chapter.

   The Applicant shall provide an environmental assessment prepared by an environmental professional for parcels with significant or unique areas of native vegetation at time of initial application to determine the native upland preserve location, size, and configuration for evaluation by ERM. The Applicant is encouraged to meet with ERM to determine the extent of the assessment. The assessment shall include the following with photo documentation, at a minimum: Florida Land Use and Cover Classification System (FLUCCS) map, a list of native species, quality of the native ecosystem, overall identification and quality of the native species, presence of listed species, ecosystem type, uniqueness of wildlife habitat, quality and quantity of native vegetation (canopy, understory, and groundcover), compactness of the preserve, and the proximity to other natural preserve areas and corridors. [Ord. 2019-034]

   a. The preserve boundaries shall be designated in a certified survey submitted to ERM for approval. No easements may be located within the boundaries of the preserve. Prior to and during parcel alteration, the preserve boundaries shall be clearly marked and appropriately barricaded. Permanent preserve boundary markers shall be installed and proper documentation submitted to ERM prior to issuance of technical compliance or monitoring release, if applicable, and shall be maintained by the parcel owner in compliance with the approved Preserve Management Plan. The County may release the preserve if the applicant offers to relocate the preserve to an area that meets the criteria in Art. 14.C.7.B.6, Surplus Native Vegetation. [Ord. 2008-040] [Ord. 2019-034]

   b. The parcel owner shall develop a Preserve Management Plan to provide long-term protection and maintenance of the values and functions of the preserve. Activities that cause degradation of the preserve are prohibited. The Preserve Management Plan shall be accepted by ERM prior to a DRO certification. ERM may provide Preserve Management Plan Guidelines. The parcel owner shall maintain the preserve in accordance with the Preserve Management Plan. The Preserve Management Plan will include the requirement to maintain annual reports detailing species presences, control practices for prohibited and invasive non-native species, activity corrections to maintain compliance with the Plan, and photographs demonstrating the state of the preserve. Said annual reports shall be delivered to ERM within 90 days upon written request, unless extended by ERM in writing. Modifications to the Preserve Management Plan are prohibited without prior written approval by ERM. [Ord. 2008-040] [Ord. 2019-034]

   c. Preserve areas shall be identified graphically and legally described in the applicable deed restriction plat, restrictive covenant, conservation easement, or by a separate instrument to be recorded pursuant to F.S. § 704.06, as amended. Said preserve shall be specifically and separately reserved to the owner, or if applicable, to the Property Owners’ Association as its perpetual maintenance responsibility, without recourse to PBC or other governmental entity or agency. Prior to technical compliance, the plat or instrument shall be submitted to and approved by ERM, recorded in the public records of PBC, and proof of recordation shall be provided to ERM. Parcel owners are encouraged to dedicate voluntary preserves to PBC for preservation in perpetuity. PBC may enter into agreements with parcel owners to enhance private preserves. [Ord. 2008-040]

   d. All vegetation listed in Appendix 5, Prohibited Invasive Non-Native Vegetation, and Appendix 6, Invasive Non-Native Vegetation, shall be removed from the parcel and proper documentation submitted to ERM prior to issuance of the Certificate of Occupancy for single-unit projects or 75 percent completion of construction of multi-unit projects, based on either total square footage or number of buildings to be constructed, unless a phasing plan has been approved in writing by ERM. In addition to the removal requirement above, the vegetation identified in Appendix 8, Invasive Non-Native Vegetation within Preserves, shall be removed from the preserve area. The parcel owner shall thereafter maintain the parcel free of this vegetation. [Ord. 2008-040] [Ord. 2009-034]

   e. A parcel owner may mitigate for the loss of vegetation during parcel improvement by preserving additional native upland habitat or vegetation or by developing and implementing a restoration and enhancement plan for a native upland preserve. Alternative mitigation proposals that meet the purpose and intent of this Chapter may also be submitted. [Ord. 2008-040]
f. Preserves may be dedicated off site in lieu of on-site dedication with ERM’s approval. The size of the off-site preserve shall be based on the quality of the habitat or vegetation on both the parcel being improved and the parcel of the proposed preserve. The final appraised values of the parcel being improved and the parcel for the proposed preserve may also be considered. The location of the off-site preserve shall be determined prior to DRO. Prior to issuance of approval, the instrument used to dedicate an off-site preserve shall be submitted to and approved by ERM. [Ord. 2008-040]

g. A preserve may be purchased in accordance with the following: [Ord. 2008-040]

1) Parcels with existing and approved preserve areas or that support endangered, threatened, rare, and species of special concern will not be considered for a cash payment in lieu of dedicating a preserve set aside. A parcel owner may submit a cash payment in lieu of setting aside a native upland preserve provided the following criteria are met: [Ord. 2008-040] [Ord. 2019-034]

   a) A written request shall be submitted to ERM prior to DRO, certification for public hearing, site plan certification, or issuance of a building construction permit, whichever occurs first; [Ord. 2008-040]

   b) The cash payment shall be equivalent to the per acre value of the parcel, at the time of permit application, multiplied by the number of acres required to be preserved. PBC may request a second appraisal on which to base this cash payment; and, [Ord. 2008-040] [Ord. 2010-022] [Ord. 2019-034]

   c) The cash payment shall be made payable to the PBC Natural Areas Fund and shall be submitted prior to issuance of the permit or site plan certification, whichever occurs first. [Ord. 2008-040]

2) For Bona Fide Agriculture, this cash payment option may allow commencement of parcel improvement prior to submittal of the cash payment provided: [Ord. 2008-040]

   a) The parcel owner records a restricted covenant on a PBC-approved form limiting the use of the parcel to Bona Fide Agriculture, and requiring the parcel owner to make the cash payment to PBC at the time the parcel is converted to a non-agricultural land use or is sold; [Ord. 2008-040]

   b) The cash payment amount shall be calculated based on the appraised conversion value or actual cost, if sold, whichever is greater, of the parcel after conversion to a non-agricultural use; [Ord. 2008-040]

   c) Upon any conversion of a parcel to non-agricultural use where a deed restriction option is used, the parcel owner shall comply with PBC requirements for an enhanced Landscape Buffer; [Ord. 2008-040]

   d) The parcel owner considers increasing the upland set aside to offset any mitigation on the parcel for trees as determined by ERM; and, [Ord. 2008-040]

   e) The parcel owner may consider replanting the preserve, with appropriate vegetation, as determined by ERM in lieu of cash payment. The constructed preserve shall comply with preserve standards as required under Art. 14.C.7.B.3., Establishing Native Upland Preserves. Monies collected in lieu of establishing a preserve shall be paid to PBC for the Natural Areas Fund for the management of native ecosystems. [Ord. 2008-040]

h. Tree Preservation Areas

   Parcels less than four acres or parcels greater than four acres with significant upland vegetation that may not otherwise qualify for a 25 percent set aside, may be required to provide tree preservation area(s). Factors that will determine if a parcel has significant areas of native vegetation include, but are not limited to the quality of the ecosystem, overall quality of biological diversity, the presence of listed or uncommon species, wildlife habitat value, value grouping of assemblages of native vegetation, compactness of the area, and degree of limited impact by prohibited and invasive non-native vegetation. [Ord. 2008-040]

i. Preserves shall be maintained in compliance with standards set forth in this Chapter and the preserve management plan. Non-native vegetation shall not be introduced into the preserve. Invasive vegetation that can alter the existing native vegetation communities by displacing native vegetation shall be removed if non-native or reduced, if native, to a level of non-interference with the growth of native vegetation. [Ord. 2008-040]
4. **Preserves under Dedication**
   a. An Applicant may propose to relocate a preserve under dedication to an alternate on-site or off-site parcel provided the proposed parcel relocation does not create multiple preserves that are smaller in size than the original preserve unless ERM determines the proposed smaller preserve(s) meets or exceeds the quality and meets or exceeds the quantity of the habitat or vegetation of the existing preserve parcel at the time the dedication was approved by ERM and relocation does not create fragmentation with any other natural system. The Applicant shall demonstrate compliance with the approved Preserve Management Plan for the preserve under dedication and provide an environmental assessment per **Art. 14.C.7.B.3. Establishing Native Upland Preserves** for the proposed parcel for evaluation by ERM. If the original preserve is contiguous to another natural system then the request will not be considered unless a more favorable habitat is offered. [Ord. 2019-034]
   b. A preserve under dedication that has endangered, threatened, rare, and species of special concern, other than gopher tortoises or any other species being relocated under a Florida Fish and Wildlife Conservation Commission permit, shall not be considered for relocation. [Ord. 2019-034]
   c. A preserve under dedication resulting from a violation or enforcement action shall not be considered for relocation unless **Art. 14.C.7.B.4.a. and b.** are satisfied. [Ord. 2019-034]

5. **Transferring of a Preserve under Dedication**
   A municipality may request that a preserve under dedication be transferred to their jurisdiction provided: annexation has occurred, the County approved site plan development has not occurred, and the preserve under dedication is not a result of an enforcement action or violation. [Ord. 2019-034]

6. **Surplus Native Vegetation**
   Native upland vegetation that cannot be preserved or relocated on the parcel shall be considered surplus. An Applicant for an approval shall complete and attach to the application a Vegetation Surplus Form provided by ERM, and a list of the available vegetation including the species names and approximate quantity and sizes of each species to be surplused. The Applicant shall prevent inadvertent destruction by physically marking available vegetation on the parcel to afford easy identification. ERM shall maintain a list of persons interested in relocating surplus native vegetation, and shall assist in finding suitable locations for this surplus vegetation. Should a parcel owner elect to participate in the Vegetation Surplus program, the vegetation shall remain available for removal, sale, or donation for at least 20 working days unless a shorter time frame is approved in writing by ERM, and the parcel owner shall cooperate with relocating surplus vegetation off site. Should a parcel owner elect not to participate in the benefits of the Vegetation Surplus program, this fact shall be stated on the application. [Ord. 2008-040]

7. **Mitigation or Restoration**
   a. When native trees are removed or damaged contrary to written approval by ERM or when trees that were to be preserved in place or relocated are damaged or destroyed during activities conducted with ERM approval, they shall be replaced at double the rate shown in the **Table 7.E.3.C, Vegetation Credit and Replacement**. For replacement vegetation which dies other than by damage or destruction, the replacement value shall be that in **Table 7.E.3.C, Vegetation Credit and Replacement**. Should replacement values not be found in the Table, the vegetation shall be replaced like size for like size. ERM may approve the planting of native vegetation equivalents other than the replacement values specified in **Table 7.E.3.C, Vegetation Credit and Replacement**. [Ord. 2008-040] [Ord. 2009-040] [Ord. 2012-027]
   b. Alternative mitigation that meets the purpose and intent of this Chapter may be proposed for public projects on a publicly-owned parcel. Alternative mitigation proposals shall be reviewed and a determination made by the County Administrator in consultation with the Director of ERM. [Ord. 2008-040]
   c. All vegetation planted to meet mitigation requirements shall be installed using best industry standards and provided with mulch, irrigation, and required maintenance to ensure survival. [Ord. 2009-040] [Ord. 2019-034]
   d. All mitigation shall occur and proper documentation, in the form of a final planting plan, shall be submitted to ERM prior to the Certificate of Occupancy for single-unit projects or 75 percent completion of construction of multi-unit projects, based on either total square footage or number of units to be constructed. [Ord. 2008-040] [Ord. 2009-040]
   e. Any mitigation plantings found to have died within 360 days of plantings shall be replaced. [Ord. 2009-040]
the issuance of the Certificate of Occupancy shall substitute for any required final inspection. [Ord. 2009-040]

g. Any clearing activity after 1986 which cannot provide evidence of approval will be required to restore nine trees per 1,500 square feet of cleared native vegetation. The restoration may be accomplished through on-site planting of native trees or equivalent native vegetation approved by ERM, a contribution to the Palm Beach County Natural Areas Fund that is equivalent to nine trees per 1,500 square feet of removed native vegetation, or the dedication of equivalent upland quality land area. [Ord. 2008-040] [Ord. 2009-040] [Ord. 2012-027]

h. Projects within the one year monitoring period may remove vegetation damaged by an extreme weather event such as a storm, hurricane, or other natural disaster under an approval from ERM. Any mitigation vegetation removed must be replanted within 365 days of the removal date. [Ord. 2014-001]

C. Standards of Issuance

No approval shall be issued unless the application demonstrates that the project: [Ord. 2014-001]

1. Will not result in a net loss of wetland functions and values;
3. Will not adversely affect the conservation of fish or wildlife or their habitats, or adversely affect recreational fisheries or their habitats;
4. Will not adversely impact endangered or threatened species, and species of special concern, or their habitat;
5. Incorporates into the design alternatives and modifications to avoid or minimize impacts to native vegetation; and,
6. Complies with any applicable Federal, State, or local designated preserve, conservation, or mitigation area.

Section 8 Exemptions

The following activities do not require an approval under this Chapter: [Ord. 2008-040]

A. Botanical Gardens, Botanical Research Centers, Licensed Commercial Nurseries, or Agricultural Operations

After an initial clearing performed in accordance with this Chapter, the following are exempt if part of the ongoing activities of an existing operation: vegetation alteration associated with subsequent harvesting activities and harvesting or alteration of vegetation previously planted and cultivated for production as part of a botanical garden, botanical research center, nursery, or agricultural operation. This exemption does not allow for the removal of vegetation within preserve areas or vegetated buffers. [Ord. 2012-027] [Ord. 2014-001]

B. Fencing

The minimal removal of trees or understory necessary to install a fence, provided that no tree three inches or greater DBH is removed, the path cleared for the fence does not exceed five feet in width, and native vegetation is removed solely by hand.

C. Forest Management Activities

Selective tree removal for forest management activities as defined in the current Forest Management Plan as approved by the State of Florida Division of Forestry.

D. Improved Parcels

Removal of prohibited and invasive non-native vegetation. The removal of dead and dying vegetation and vegetation not subject to this Chapter is also exempt; provided, however, the removal complies with Art. 7, Landscaping, as amended. [Ord. 2019-034]

E. Landscape Plant Removal

Removal or alteration, from an improved parcel, of non-native vegetation installed as landscape, provided the activity complies with the requirements of Art. 7, Landscaping, as amended, and no removal or alteration occurs from native upland vegetation buffers, preserves, or jurisdictional wetlands.

F. Lot Clearing Provisions

Removal of prohibited and invasive non-native vegetation required pursuant to the Lot Clearing Provision in Art. 7, Landscaping, as amended, or at the direction of a public law enforcement agency pursuant to necessary law enforcement activity.

G. Mitigation or Enhancement Projects

Activities conducted pursuant to a permit from SFWMD, Florida Department of Environmental Protection, or ERM under F.S. ch. 403 and F.S. ch. 373, as amended, and Chapter 62-312, F.A.C., as amended, including activities approved under an adopted Surface Water Improvement and Management Plan.
H. Natural Emergencies
The provisions of this Chapter may be suspended or waived by the Director of ERM during a period of officially declared emergency, such as a hurricane, windstorm, tropical storm, flood, or similar disaster.

I. Parks and Recreation
Alterations of vegetation pursuant to an adopted management plan for government maintained parks, recreation areas, wildlife management areas, conservation areas, and preserves, excluding new construction or parcel improvement.

J. Preserve Management Activities
Preserve management activities provided that:
1. The preserve area is designated by deed restriction, plat, restrictive covenant, or conservation easement and is dedicated to a public entity or approved private conservation group for preservation in perpetuity;
2. The activity furthers the natural values and functions of the ecological communities present, such as clearing firebreaks for prescribed burns or construction of fences; and,
3. The preserve area has a preserve management plan approved by ERM.

K. Pruning
Pruning of native vegetation in non-preserve areas in accordance with the American National Standards Institute, (ANSI) A 300, pursuant to Art. 7.F, Installation and Maintenance as revised, to allow for healthy growth, to promote safety, and to remove dead or dying vegetation, provided there is no cutting back of limbs to a point between branch collars or buds larger than one inch in diameter within the tree’s crown.

L. Utilities, Water Control, Water Management Districts, and Road R-O-W
Alteration of vegetation is permitted within drainage easements associated with repairs to or maintenance of existing canal structures at the direction of water control districts, or water management districts within drainage easements, where the vegetation is interfering with drainage or services provided by the water control districts or water management districts. Alteration of vegetation is permitted within a utility easement, where the vegetation is interfering with services provided by a utility. Alteration of vegetation is permitted within a road R-O-W for normal maintenance activities. Alteration associated with new construction is not an exempt activity.

M. Survey or Other Test Required
The necessary removal of vegetation by, or at the direction of, a State of Florida licensed professional surveyor and mapper, professional geologist, or professional engineer to conduct a survey or other required test, provided that no tree three inches or greater DBH is removed, the path cleared does not exceed five feet in width, and native vegetation is removed solely by hand. If necessary, soil sampling with a vehicle equipped with a boring apparatus may clear a path not to exceed the minimum width required to gain ingress and egress into the test sampling area. [Ord. 2009-040]

N. Minor Vegetation Removal
Removal of native vegetation with a replacement value of four trees or less, as defined in Table 7.E.3.C, Vegetation Credit and Replacement. [Ord. 2012-027]

O. Minor Vegetation Relocation
Relocation of up to ten native palm trees, providing that the trees are relocated using best industry standards and provided with mulch, irrigation and required maintenance to ensure survival. The planting location must be depicted on a site plan, survey or other document format acceptable to ERM. [Ord. 2012-027]

P. Initial Clearing for an Agricultural Operation Less Than Ten Acres
Initial clearing for an agricultural operation less than ten acres is exempt, provided that the level of clearing does not exceed the area for crop production. [Ord. 2014-001]

Q. Removal of native vegetation on a Single Family residential parcel or a single two-unit duplex residential parcel without a recorded Conservation Easement. [Ord. 2018-018]

Section 9 Removal of Prohibited Invasive Non-Native Vegetation
Improved parcels approved or constructed on or after April 28, 1986, shall be maintained free of prohibited vegetation listed in Appendix 5, Prohibited Invasive Non-Native Vegetation. [Ord. 2008-040]

Section 10 Fees
Fees shall be required as established by Resolution of the BCC. Fees shall be non-refundable and non-transferable. An administrative fee may be required where projects require specific detailed site plan assistance by PBC or where site plans change after initial review. Application fees paid by check shall be payable to the BCC. [Ord. 2008-040]
Section 11 Appeals

A. Hearing Officer

An Applicant for any approval may appeal a final determination made by the Director of ERM to a Hearing Officer as established in Art. 2.G.3.G, Hearing Officers, of this Code pursuant to this Chapter. The Applicant shall comply with the following appeal procedures. [Ord. 2008-040]

1. Submittal

A written appeal must be made within 20 days of the Applicant's receipt of the decision by the Director of ERM. The appeal must state with specificity the reasons for the appeal and shall contain such data and documentation upon which the Applicant seeks to rely. Failure to file within such time frame shall constitute a waiver of a person's right of review by the Hearing Officer.

2. Hearing

The appeal shall be reviewed at a hearing by the Hearing Officer within 60 working days of ERM's receipt of a request and a $50.00 filing fee. The Applicant will receive notice of the hearing no less than 15 working days in advance of the hearing. At the hearing, the Hearing Officer shall provide the Applicant and the Director of ERM, or their respective legal representatives, an opportunity to present testimony and evidence, provided such information was part of the review before the Director of ERM. All testimony shall be under oath and shall be recorded. The formal rules of evidence shall not apply but fundamental due process shall be observed and shall govern the proceedings. The Hearing Officer in his or her discretion, may exclude irrelevant, immaterial, or unduly repetitious evidence, but all conduct of their affairs shall be admissible, whether or not such evidence would be admissible in a trial in the courts of the State of Florida. Any part of the evidence may be received in written form. The Hearing Officer shall reverse the decision of the Director of ERM only if there is substantial competent evidence in the record that the Director of ERM erred in applying the standards of this Chapter. The Hearing Officer shall enter a decision by written order not less than ten days following conclusion of the hearing. The order shall include findings of fact and conclusions of law and shall be deemed final administrative action. An Applicant or ERM may appeal a final decision of the appeal board within 30 days of the rendition of the decision. Such appeal shall not be a hearing de novo, but shall be a petition for Writ of Certiorari in the Circuit Court of the Fifteenth Judicial Circuit in and for PBC. The Court shall be limited to appellate review of the record created before the Hearing Officer and may assess a reasonable fee for the preparation of the record to be paid by the Petitioner in accordance with F.S. § 119.07, as amended from time to time.

3. Judicial Relief

An Applicant or ERM may appeal a final written order to the Circuit Court of the Fifteenth Judicial Circuit in and for PBC. Such appeal shall not be a hearing de novo, but shall be a petition for Writ of Certiorari and the Court shall be limited to appellate review of the record created before the Hearing Officer. PBC may assess a reasonable fee for the preparation of the record to be paid by the Petitioner in accordance with F.S. § 119.07, as amended from time to time.

Section 12 Violations

A. Violations

A violation shall be:

1. The alteration or removal of up to 1,500 square feet of native vegetation without an approval from ERM, unless expressly exempt under this Chapter. Alteration or removal of each additional 1,500 square feet of native vegetation or portion thereof in violation of this Chapter shall constitute a separate and additional violation. [Ord. 2008-040] [Ord. 2009-040]

2. Failure to comply with a condition of an approval issued by ERM pursuant to this Chapter or a requirement of a Preserve Management Plan approved by ERM. Each condition or requirement violated and each occurrence of a violation shall constitute as a separate violation. [Ord. 2008-040]

3. Failure to comply with the requirements of this Chapter or any approval granted or activity authorized hereunder.

4. Failure to comply with an ERM Wetlands Alteration Permit issued prior to the effective date of March 1, 1998.

5. Planting prohibited invasive non-native vegetation.

6. Planting non-native vegetation within a preserve.

7. Conversion of a parcel cleared for Bona Fide Agriculture to another use prior to use as agriculture.

8. Introduction of structures, grade changes, debris, or utilities into a preserve without approval by ERM. [Ord. 2006-036]
B. Enforcement

1. To enforce compliance with this Chapter, the County may issue a cease and desist order or require that a Building Permit or CO be withheld. A violation of this Chapter shall be punishable by one or more of the following: [Ord. 2008-040]
   b. Any applicable remedies under F.S. ch. 125 and F.S. ch. 162, as amended; [Ord. 2008-003]
   c. PBC may take any other appropriate legal action, including but not limited to, administrative action, and requests for temporary and permanent injunctions to enforce the provisions of this Chapter; and, [Ord. 2008-003] [Ord. 2008-040]
   d. ERM Wetlands Alteration Permits issued prior to, and with obligations beyond the effective date of this Chapter, shall remain in full force and effect. Accordingly, the enforcement provisions herein shall apply to any violation of an ERM Wetlands Alteration Permit issued prior to, and with obligations beyond, the effective date of this Chapter, except that violations of Single Family dock permits issued pursuant to the agreement between PBC and the USACOE (adopted as Resolution No. R-89-120 and dated January 24, 1989), shall be referred to the USACOE, and ERM Mangrove Trimming Permit violations shall be referred to the DEP. In the event the DEP directs ERM to enforce a violation of a permit issued under the mangrove delegation agreement between PBC and the DEP, dated January 21, 1997, the enforcement provisions herein, in addition to any State-mandated enforcement provisions, shall apply.

C. Pollution Recovery Trust Fund

All monies collected as civil penalties for violations of this Chapter shall be paid to PBC for the Pollution Recovery Trust Fund.

D. Restoration

a. Properties cleared after 1986 without an approval will be required to restore nine trees per violation. The restoration may be accomplished through on-site planting of native trees or equivalent native vegetation approved by ERM, a contribution to the Palm Beach County Natural Areas Fund that is equivalent to nine trees per violation, or the dedication of equivalent upland quality land cleared. [Ord. 2008-040] [Ord. 2012-027] [Ord. 2019-034]

b. If a preserve under dedication has degraded due to neglect or lack of compliance with the approved Preserve Management Plan, the Property Owner shall provide a restoration plan to ERM per Art. 14.C.12.D.a. Restoration of the preserve may occur in phases as approved by ERM. [Ord. 2019-034]

Section 13 Natural Areas and Preserve Areas

A. Natural Areas

Planned developments shall be designed to mitigate the negative impacts of development intensity and density upon natural areas as defined in PBC Ord. No. 94-13, and parcels designated as preserve areas according to this Chapter. Proposed development shall not negatively impact the native ecosystem of any adjacent natural areas and shall comply with the criteria established in this Article, for natural areas and other applicable environmental Ordinances. The Applicant shall work in cooperation with the PZB and ERM to establish mutually acceptable alternatives to protect the natural area, including but not limited to:
1. The prohibition of certain land uses; and
2. A reduction in the building intensity near natural areas and preserve areas by the creation of a minimum 50-foot buffer zone.

B. Special Preservation Protection Standards

Lake Worth Lagoon and Loxahatchee River buffers – A 50-foot native vegetation buffer shall be preserved along the Lake Worth Lagoon, and that portion of the Loxahatchee River which lies outside the Jonathan Dickinson State Park Greenline Overlay, depicted in Map LU 3.1, Special Planning Areas, of the Plan. The purpose of the native vegetation buffer is to preserve native vegetation along the two waterways and to decrease the impact of stormwater activities on the two waterways. Restrictions may be imposed on development by ERM to conserve native vegetation within the buffer and reduce hydrological impacts to the two waterways. [Ord. 2005-002]

1. If native vegetation exists within the 50-foot conservation buffer, then restrictions may be imposed by ERM within the buffer to address the following issues: [Ord. 2005-002]
   a. Visual encroachment;
   b. Edge effects;
   c. Exotic pest plant invasions; or,
   d. Interference with prescribed burns in natural areas; [Ord. 2005-002]
2. If native vegetation does not exist within the 50-foot buffer, then restrictions may be imposed by ERM within the buffer to address the following issues: [Ord. 2005-002]
   b. Any other specific site development regulations required by this Code.
3. In addition to any of the restrictions listed above, ERM may also require: [Ord. 2005-002]
   a. development to be clustered away from natural or preserve areas; or [Ord. 2005-002]
   b. buffer or preserve areas to be added adjacent to existing natural and preserve areas; or [Ord. 2005-002]
   c. a combination of these alternatives. [Ord. 2005-002]
ERM shall strive to minimize parcel alterations near natural and preserve areas. [Ord. 2005-002]
4. The addition of a buffer or preserve areas adjacent to existing natural areas and preserve areas. Additionally, all effort shall be made to minimize parcel alterations near natural areas and preserve areas.

CHAPTER D PROHIBITED INVASIVE NON-NATIVE VEGETATION REMOVAL ORDINANCE

Section 1 Purpose and Intent
A. It is the intent of this Chapter to require removal and control of prohibited invasive non-native vegetation.  
B. It is the intent of this Chapter to protect natural areas from unwanted seed sources from outside the natural areas.

Section 2 Definitions

Section 3 Applicability
A. All provisions of this Chapter shall be effective within the unincorporated and incorporated areas of PBC, except to the extent of conflict with a municipal ordinance, in which case the municipal ordinance will prevail over this Chapter in accordance with Sec. 1-3, the PBC Charter.

Section 4 Authority
This Chapter is adopted under the authority of F.S. ch. 125, and the Plan, as amended. ERM shall administer the requirements of this Chapter. [Ord. 2008-040]

Section 5 Protection of Natural Areas:
A. The County will establish by geographical information system reference, a 500-foot buffer area around all natural areas listed on Appendix 9, Natural Areas. Maps of the natural areas including buffers shall be on file and maintained by ERM and made available to the public. [Ord. 2008-040]
B. Natural areas acquired by the BCC using the Conservation Lands Bond Fund shall be added to Appendix 9, Natural Areas pursuant to a duly noticed public hearing. [Ord. 2008-040]
C. Any individual, organization, or governmental entity owning or controlling a natural area may request an addition to Appendix 9, Natural Areas, by petitioning ERM. The petition shall include a description and map of the proposed addition, written justification for listing, a copy of the management plan, if available, and proof of notice to parcel owners within the proposed buffer of the natural area. ERM recommended additions to Appendix 9, Natural Areas, or changes to the size of the buffer area may be approved by the BCC following a duly noticed public hearing.
   1. For publicly-owned natural areas, there is no minimum size for listing.
   2. For privately-owned natural areas, there must be a minimum of ten acres of natural area unless determined by ERM to be a highly significant natural area including scrub, wetlands, or mangrove communities and maintained under a management plan approved or accepted by ERM.

Section 6 Removal of Prohibited Invasive Non-Native Vegetation
A. By January 1, of the applicable year provided on Appendix 10, Prohibited Vegetation Removal Schedule, a parcel owner of a property located within the 500-foot buffer area around each natural area listed in Appendix 9, Natural Areas shall remove or caused to be removed or eradicated, the prohibited invasive
non-native vegetation as listed on Appendix 10, Prohibited Vegetation Removal Schedule, unless an exemption is provided under Art. 14.D.7, Exemptions, of this Chapter. [Ord. 2008-040]

B. For parcels located outside the 500-foot buffer area around each natural area listed in Appendix 9, Natural Areas, a parcel owner shall remove or cause to be removed old world climbing fern and air potato as listed in Appendix 10, Prohibited Vegetation Removal Schedule, unless an exemption is provided under Art. 14.D.7, Exemptions, of this Chapter. [Ord. 2008-040]

C. Upon removal of prohibited invasive non-native vegetation under this Chapter or any other Ordinance requiring removal of this nuisance vegetation, the parcel owner shall maintain the parcel free of prohibited invasive non-native vegetation.

D. In accordance with Art. 14.C.9, Removal of Prohibited Invasive Non-Native Vegetation, improved parcels located in unincorporated Palm Beach County, approved or constructed on or after April 28, 1986, shall be maintained free of prohibited vegetation listed in Appendix 5, Prohibited Invasive Non-Native Vegetation. The applicable year as described in Art. 14.D.6.A and provided in Appendix 10, Prohibited Vegetation Removal Schedule, does not apply to these parcels, instead parcel owners of these improved parcels shall immediately and perpetually maintain them free of all prohibited invasive non-native vegetation. [Ord. 2008-040] [Ord. 2009-040]

E. Planting or installation of this vegetation is prohibited. [Ord. 2008-040]

Section 7 Exemptions

A. For parcels impacted by greater than 30 percent coverage of prohibited invasive non-native vegetation or parcels containing 100 acres or greater in size, a management plan may be approved by ERM to space the eradication rate over an extended period. To be eligible for this approval, the management plan must be provided to, and approved by ERM, and eradication begun prior to the required date for removal or eradication of the prohibited invasive non-native vegetation addressed in the plan.

B. For parcels or portions of parcels that necessitate phased removal or eradication of prohibited invasive non-native vegetation in response to a documented need for maintenance of existing wildlife values, a management plan may be approved by ERM to extend the time for removal.

Section 8 Enforcement

A. Violations of this Chapter shall be:

B. The following are procedures which are to be followed for compliance and enforcement with this Chapter:

1. Inspection of a parcel to determine the possible location of prohibited invasive non-native vegetation.

2. Preparation and provision of an information notice informing the parcel owner of prohibited invasive non-native vegetation on the parcel and instructions for the removal or eradication of the vegetation and a time frame provided for compliance. A follow up inspection is conducted.

3. Preparation and provision of a noncompliance notice to the parcel owner concerning the possible violation of this Chapter, including a stated time frame of 30 days for compliance. [Ord. 2008-040]

4. Preparation and provision of a notice of violation to the parcel owner concerning the possible violation of this Chapter and failure to comply with the noncompliance notice, including a stated time frame of 30 days for compliance. [Ord. 2008-040]

5. Preparation and provision of a Notice of Hearing to the parcel owner concerning the possible violation of this Chapter, failure to comply with a notice of violation, and an order to appear before the Groundwater and Natural Resources Protection Board (GNRPB).

6. The decision of the GNRPB, which may include corrective actions and civil penalties in the maximum amount of $1,000.00 per day, per violation, shall be the final administrative action on behalf of ERM and PBC. Any person who is a party to the proceeding before the GNRPB may appeal to the Circuit Court of PBC in accordance with applicable Florida Appellate Rules.

C. Additional remedies for enforcement include any applicable remedies under F.S. ch. 125 and F.S. ch. 162, as amended, and other legal action, including but not limited to, administrative action and requests for temporary and permanent injunctions to enforce the provisions of this Chapter. [Ord. 2008-040]
D. In order to provide an expeditious settlement that would be beneficial to the enforcement of this Chapter and be in the best interest of the citizens of PBC, the Director of ERM is authorized to enter into voluntary consent (settlement) agreements with alleged violators. Any such agreement shall be a formal written consent agreement between ERM on behalf of PBC, by and through its Director, and any such alleged violators, and shall be approved as to form and legal sufficiency by the County Attorney’s Office. The agreement can be entered into at any time prior to the hearing before the GNRPB.

1. Conditions. Such consent agreements may be conditioned upon a promise by the alleged violator to:
   a. Remove or eradicate prohibited invasive non-native vegetation and maintain the parcel free of this vegetation, and
   b. Remit payment of a monetary settlement not to exceed the maximum amount allowed per violation, as set forth in this Chapter, and
   c. Remit payment for costs and expenses of the PBC for investigation and enforcement, and
   d. Any other remedies and corrective action deemed necessary and appropriate by the Director of ERM to ensure compliance with this Chapter.

2. The consent agreement shall not serve as evidence of a violation of this Chapter and shall expressly state that the alleged violator neither admits nor denies culpability for the alleged violations by entering into such agreement. In addition, prior to entering into any such consent agreement, each alleged violator shall be apprized of the right to have the matter heard by the GNRPB in accordance with the provisions of this Chapter, and that execution of the agreement is not required.

3. The consent agreement shall be valid and enforceable in a court of competent jurisdiction in PBC and shall abate any enforcement proceedings available to ERM for so long as the terms and conditions of such agreement are complied with. In the event the alleged violator fails to comply with the terms and conditions set forth in the executed agreement, the Director of ERM may either:
   a. Consider the consent agreement void and pursue any remedies available for enforcement of the applicable provisions of this Chapter; or
   b. Initiate legal proceedings for specific performance of the consent agreement.

E. All monies collected pursuant to violations of this Chapter whether from consent agreement or the GNRPB shall be deposited in the PBC Pollution Recovery Trust Fund.

APPENDIX 3  BEST MANAGEMENT PRACTICES FOR THE CONSTRUCTION INDUSTRY

A. The general contractor, or if none, the Property Owner, shall be responsible for assuring that each contractor or subcontractor evaluates each site before construction is initiated to determine if any site conditions may pose particular problems for the handling of any Regulated Substances. For instance, handling Regulated Substances in the proximity of water bodies or wetlands may be improper.

B. If any Regulated Substances are stored on the construction site during the construction process, they shall be stored in a location and manner which will minimize any possible risk of release to the environment. Any storage container of 55 gallons, or 440 pounds, or more containing Regulated Substances shall have constructed below it an impervious containment system constructed of materials of sufficient thickness, density, and composition that will prevent the discharge to the land, groundwaters, or surface waters, of any pollutant which may emanate from aid storage container or containers. Each containment system shall be able to contain 150 percent of the contents of all storage containers above the containment system.

C. Each contractor shall familiarize him/herself with the manufacturer's safety data sheet supplied with each material containing a Regulated Substance and shall be familiar with procedures required to contain and clean up any releases of the Regulated Substance. Any tools or equipment necessary to accomplish same shall be available in case of a release.

D. Upon completion of construction, all unused and waste Regulated Substances and containment systems shall be removed from the construction site by the responsible contractor and shall be disposed of in a proper manner as prescribed by law.
APPENDIX 4 MINIMUM STANDARDS FOR SEWER PIPE AND FITTINGS

A. Ductile Iron Pipe and Fittings for Gravity Sewer and Force Main Application
1. Ductile iron pipe shall conform to the requirements of ANSI/AWWA C151/A21.51 unless otherwise noted on the plans. The pipe shall be Class 350 for sizes four inches through 24 inches and class 250 for sizes from 30 inches to 36 inches. Glands for mechanical joints shall be of ductile iron. [Ord. 2013-001]
2. Fittings shall have mechanical joints or flanged ends unless an approved flexible joint restraint system is used. The fittings shall conform to the requirements of AWWA C-110 or AWWA C-153. [Ord. 2013-001]
3. Flanged ductile iron pipe shall be “special thickness Class 53.” Flanged ductile iron pipe and fittings shall have threaded flanges, unless otherwise noted on the drawings, and shall conform to ANSI/AWWA C115/A21.15. All flanges shall be Class 1560, ANSI B16.5. All above grades flanges shall be flat faced unless they are mating up to existing, or otherwise, specified, raised flanges. All gaskets shall be full faced one-eighth feet red rubber. [Ord. 2013-001]
5. All ductile iron pipe and fittings shall have an epoxy lining and a bituminous coating on the exterior per AWWA specification C-210. The coating and lining shall be applied in accordance with the manufacturer’s recommendations. [Ord. 2013-001]

B. Polyvinyl Chloride Pipe (PVC) (Gasketed Joint) and Fittings for Gravity Wastewater and Sewer Force Main Applications
1. Pipe four inches or larger in diameter shall conform to the requirements as set forth in AWWA C900/C905 with minimum dimension ratio DR 18. Provisions must be made for contraction and expansion at each joint, or with a rubber ring and an integral bell as part of each joint, or by a rubber ring sealed coupling. Clean, reworked material generated from the manufacturer’s own pipe production may be used. Fittings shall be cast or ductile iron. Pipe shall have cast iron pipe equivalent outside dimensions. [Ord. 2013-001]
2. Pipe smaller than four inches in diameter shall conform to Commercial Standard CS 256 and ASTM D-22141. Provisions shall be made for contraction and expansion at each joint with a rubber ring, and an integral bell as part of each joint, or by a rubber ring sealed coupling. Pipe shall be made from SDR 21, 200 psi clean, virgin NSF approved Type I, Grade 1 PBC conforming to ASTM D 1784. Clean reworked material generated from the manufacturer’s own pipe production may be used. Fittings for pipe smaller than four inches in diameter shall be PVC. [Ord. 2013-001]

C. High Density Polyethylene Pipe for Force Mains
HDPE pipe for force mains shall be AWWA C906, minimum 40 feet standard lengths, DR 11 minimum, DIPS size. [Ord. 2013-001]

D. Leakage Tests
The test shall be of two-hour duration. During the test, the pipe being tested shall be maintained at a pressure of not less than 150 psi. Leakage is defined as the quantity of water added to the pipe being tested during the test period. No pipe installation will be accepted if the leakage exceeds the quantities specified in AWWA C-600, Sec. 5.2. No more than 500 feet of gravity sewer main or 1000 feet of force main shall be tested at one time. Pressure tested gravity wastewater mains and laterals located in Wellfield Zones 1 and 2 shall be PVC C900 SDR 18 minimum. The tested portion of the laterals shall end at the “upper” bend using a temporary mechanical joint restrained cap. [Ord. 2013-001]

E. Manholes
Manholes shall be precast and coated with an approved corrosion barrier system. Exterior manhole joint seal application is required. Manhole inlets and outlets shall be tightly sealed around the sewer pipe and coated to prevent leakage. [Ord. 2013-001]

APPENDIX 9  NATURAL AREAS

The following are ultimate boundaries of natural areas acquired under the 1991 Sensitive Lands or 1999 Conservation Lands bond issues as listed in Resolution No. R-99-1073 as well as natural areas acquired by other governmental entities in PBC. Maps of each area are designated by Range, Township, and Section with its associated 500-foot buffer and are on file at ERM for inspection. [Ord. 2016-042]

ARTICLE 15
HEALTH REGULATIONS

CHAPTER A  (ENVIRONMENTAL CONTROL RULE I) – ONSITE SEWAGE TREATMENT AND DISPOSAL SYSTEMS (OSTDS)

This Article shall be designated as "PBC Environmental Control Rule I - Onsite Sewage Treatment and Disposal Systems."

Section 1  Purpose

The provisions of this Article shall apply to the following Onsite Sewage Treatment and Disposal Systems (OSTDS) and Private Collection and Transmission Systems (PCTS): [Ord. 2011-002]

A. An OSTDS regulated under F.S.§ 381.0065, as amended, that serves a residence or establishment with an estimated domestic sewage flow of 10,000 gallons or less per day based on Table I of Chapter 64E-6, Florida Administrative Code (F.A.C.), which is not currently regulated under F.S.§ 403; [Ord. 2011-002]

B. An OSTDS regulated under F.S.§ 381.0065, that serves an establishment with an estimated commercial sewage flow of 5,000 gallons or less per day, based on Table I of Chapter 64E-6, F.A.C, which is not currently regulated under F.S.§ 403; and, [Ord. 2011-002]

C. An OSTDS which has received variances from the FDEP from the requirements of F.S.§ 403, and from the Florida Department of Health (FDOH) from the jurisdictional flow limits of F.S.§ 381. [Ord. 2011-002]

Section 2  Definitions

See Art. 1.I, Definitions and Acronyms.

Section 3  General Provisions: OSTDS

A. No OSTDS shall be installed, modified, abandoned or repaired without a valid permit, or used without obtaining final approval or release from the Health Department. [Ord. 2011-002]

B. No municipality or political subdivision of the State of Florida, including PBC, shall issue a building or plumbing permit for any building requiring the use of an OSTDS unless the owner or builder has received a permit for such system from the Department. No municipality or political subdivision of the State of Florida should issue a business tax receipt to an owner or tenant of a building or otherwise allow an individual or business to relocate into or within an area zoned or used for industrial or manufacturing purposes or its equivalent until the owner or tenant has received written approval from the Department. Approval shall state that the OSTDS serving the business has been evaluated, is not expected to receive toxic or hazardous waste and is adequately designed to meet the sewage treatment and disposal needs of the business. [Ord. 2007-013]

C. Buildings used or intended for human occupancy, employment or service to the public and locations where persons congregate shall provide toilets connected to an approved sewage disposal system. Also, property or location where persons congregate and are employed, or where property is used by the public for temporary and short periods of duration, such as construction sites, fairs, carnivals,revivals, field locations of agricultural workers, encampments or other use, shall be provided with portable toilets or other approved toilet facilities. The number of toilet facilities to be provided shall be in accordance with the local plumbing code, other applicable local regulations and the F.A.C. Establishments with permanent structures shall not rely upon systems designed for temporary use as the primary means of wastewater treatment and disposal unless a temporary approval is issued by the Health Department. [Ord. 2011-002]

D. Sewage wastes and effluents from an OSTDS shall not be allowed to surface onto the ground and shall not be discharged into or permitted to enter streams, surface waters, underground aquifers, ditches or drainage structures.

E. No building or premises shall be occupied, sub-let or leased unless provided with an approved sewage disposal system.

F. Wastewater generated by industrial or commercial establishments shall not be discharged into an OSTDS if the characteristics of the waste are such that it would cause malfunctioning of the OSTDS and/or contamination of the ground water. Wastewater from such establishments shall be treated and disposed of in accordance with the FDEP requirements. [Ord. 2011-002]
G. Treatment and disposal of the wastewater from a building or establishment shall be in compliance with FDEP standards and rules when any one of the following conditions exist:
   1. Sewage or wastewater contains industrial, toxic or hazardous waste.
   2. An area is zoned for industrial or manufacturing use, or its equivalent, where there is a likelihood the system may be used for disposing of wastes which are not domestic wastes.

H. Any OSTDS used for disposal of domestic sewage, which is designed, constructed, installed, or modified after the effective date of this Article shall conform to the minimum requirements and provisions of this Article. Should an emergency or epidemic occur, the Department may approve temporary systems for waste disposal which may differ from standards set forth in this Article, as long as the Department supervises the operation of the temporary system.

I. Any existing OSTDS installed under previous rules and regulations which becomes non-conforming with this Article for conditions or purpose as approved and which has not been placed in use for a period of one year or more, shall be deemed unapproved and its use for such purpose prohibited.

J. Whenever an approved sanitary sewer is made available under the conditions set forth in Art. 15.A.8.A of this Article, any OSTDS shall be abandoned and the sewage wastes from the residences or building discharged to the sanitary sewer within 90 days thereafter.

K. When the use of an OSTDS is discontinued, it shall be abandoned and its further use for any purpose prohibited. An abandoned septic tank shall be (a) pumped out, (b), the bottom suitably opened or ruptured so as to prevent the tank from retaining water, and (c) filled with clean sand or other suitable material, the actions being taken in the order listed.

L. It shall be the duty of the Department to conduct such technical inspections as are reasonable and necessary to determine compliance with the provisions of this Article.

Section 4 Permit Conditions and Approvals

A. An OSTDS shall not be installed, modified, abandoned or repaired until a valid permit has been obtained from the Health Department. Permits for system repairs shall be issued in accordance with Rule 64E-6, F.A.C. [Ord. 2011-002]

B. If the Department determines that the disposal of certain wastes into the OSTDS may interfere with the proper functioning of the system, the Department may specify on the permit those conditions that are appropriate for the proper functioning of the system. Upon request of the Department, the permit and conditions shall be recorded in the public records of PBC at the permittee’s expense.

C. The OSTDS shall not be used or covered with earth before it has passed an inspection by the Health Department and a notice of approval has been issued. Should the installer or general contractor fail to notify the Health Department prior to covering the system, the Health Department shall require that the system be uncovered for inspection. If the system is approved, the Health Department shall issue a notice of approval to the owner. Any new building or structure shall not be occupied until final approval has been issued by the Health Department. [Ord. 2011-002] [Ord. 2011-017]

Section 5 Application Data for an OSTDS: Single Lot or Parcel

A. The application and supporting data required for approval of an OSTDS for a single lot or parcel of property shall be submitted to the Health Department by the owner or his authorized representative, or a contractor licensed under F.S. Chapter 489 in accordance with Chapter 64E-6, FAC. The completed application form shall be submitted together with the following: [Ord. 2011-017]

1. A site plan of the property drawn to scale, showing the following:
   a. Property boundaries with dimensions;
   b. Easements;
   c. Location of all existing and proposed buildings;
   d. Location of all wells;
   e. Location and layout of treatment receptacle and drainfield;
   f. Unobstructed area available for the installation of the OSTDS;
   g. Potable and non-potable water lines;
   h. Driveways;
   i. Parking areas;
   j. Walkways;
   k. Swimming pools;
   l. Storm water drainage system;
m. Surface water such as ponds, (existing or proposed), lakes, streams, ditches, canals or wet areas;

n. Location and elevation of soil profiles;

o. Benchmark on or adjacent to the property;

p. Location of wells, onsite sewage treatment and disposal facilities or other pertinent features on adjacent properties if the features are within 200 feet of the proposed onsite sewage treatment system or well; and

q. The site plan shall also indicate the presence of any marsh area, mangroves, cypress and wetland vegetation on the property or on adjacent properties.

2. For residences, a floor plan showing the number of bedrooms and the building area of each dwelling unit.

3. In cases where there is an extreme variation in the elevation of the lot, a topographical map of the property must be submitted.

4. At least two soil profiles delineating the textural classification and Munsell color of the native soil at the beginning and end of the soil absorption area to a minimum depth of six feet or refusal in accordance with USDA Soil Classification Methodology, and

5. The existing water table elevation and the estimated wettest season water table elevation.

B. The owner shall be held responsible for all information supplied to the Department. The application and supporting data serve as the basis for the issuance of a construction permit. In the event of a change in any material fact given in the application which served as a basis for issuing a construction permit, the owner shall immediately file an amended application detailing such changed conditions. If the new conditions are in compliance with the standards in this Article, the construction permit shall be amended. If the new conditions are not in compliance with the standards of this Article, the permit shall be revoked.

C. New Construction, Additions or Repairs

1. For new construction and additions, the supporting data must be prepared by an engineer and land surveyor registered in the State of Florida, as specified in Rule 64E-6, F.A.C. The site plan must be prepared by a professional land surveyor registered in the State of Florida. The soil classification and system design shall be performed by a professional engineer registered in the State of Florida with training in soils. When fill soils are used, the Department may require that soils be classified by a certified soils engineering testing laboratory registered in the State of Florida. [Ord. 2018-019]

2. For repairs, an existing site plan can be used. The soils profile can be performed by a contractor licensed under F.S. Chapter 489 in accordance with Chapter 64E-6F.A.C. [Ord.2018-019]

D. If the application is for a lot that is exempt under Art. 15.A.7.E, of this Article, documentation shall be submitted to substantiate the existence of the lot prior to January 1, 1972. Documentation shall be: [Ord. 2005 – 003]

1. A survey, map, plat or drawing prepared by a professional land surveyor licensed in the State of Florida, or

2. A survey, map, plat or drawing registered with the Department of Business and Professional Regulation, Division of Land Sales, or

3. A property tax receipt, or

4. A deed, or

5. An agreement for deed.

Section 6 Application Data for an OSTDS: Subdivision

A. The application and supporting data required for approval of the use of OSTDS for a subdivision shall be submitted to the Department by the owner or his authorized representative. The supporting data must be prepared by a licensed surveyor or engineer, as appropriate, and shall include:

1. A plan of the subdivision clearly drawn to scale, showing lot and block arrangements, lot dimensions with all lots numbered and net area of each lot;

2. A topographical map with contour interval to indicate surface configurations, including slopes, streams, or water courses, bodies of water, low, wet, or marshy land and lots on which any fill is to be made;

3. A general site location map for reference identification of the area;

4. The proposed drainage plans certified by the preparer as being in compliance with existing district drainage plans as approved by the local drainage authority, the PBC Engineering Department and the South Florida Water Management District (SFWMD), as applicable;

5. SFWMD staff report and permit for the proposed drainage system, if applicable;
6. The natural soil profile delineating soil classification to a depth of six feet or refusal for a representative number of test sites for at least ten percent of the number of lots, for which the minimum information provided is the upper and lower horizon boundaries. Munsell color of the horizon and its components and USDA soil texture; using USDA Soil Classification methodology as described in Chapter 3 of the Soil Survey Manual, USDA, Handbook No. 18, October 1993, herein incorporated by reference. Where the replacement of severely limited soil is proposed, soil profiles shall be performed to a minimum depth of six feet or to the depth of the slightly or moderately limited soil layer lying below the replaced layer, whichever is greater;
7. Water table elevations as existing and for the wettest season, based on M.S.L. datum;
8. All dedicated R-O-W or recorded easements proposed for use in the installation of onsite sewage treatment and disposal or water system;
9. Proposed sewer utility easements and R-O-W shall be included on the subdivision; and
10. If private wells are to be used, submit evidence to the Department that the groundwater is of satisfactory quality and is not threatened by a source of contamination.

Section 7 Approval Standards: OSTDS

In considering applications for permitting construction of an OSTDS, the Health Department shall be governed by the following standards: [Ord. 2011-017]
A. The lot, unless exempt under Art. 15.A.7.E, of this Article, shall have a minimum net usable land area of: [Ord. 2005 – 003]
   1. One-half acre if the water supply is by means of a community well; [Ord. 2011-017]
   2. One acre if the water supply is by means of an onsite well. [Ord. 2011-017]
B. The drainfield invert shall be a minimum of 30 inches above the wettest season water table elevation.
C. Systems shall be placed no closer than the minimum distances required under Rule 64E-6, F.A.C., except for lots addressed under Art. 15.A.7.F, of this Article; [Ord. 2005 – 003]
D. Suitable, unobstructed land shall be available for the installation and proper functioning of drainfields as required under Rule 64E-6, F.A.C.
E. Parcels or tracts of land for which documentation has been submitted in accordance with Art. 15.A.5.D, of this Article, to substantiate existence prior to January 1, 1972 shall be exempt from the lot size requirements of Art. 15.A.7.A, of this Article, as long as a conditional use has not been granted or a change in zoning has not been made; provided, however, that neither a zoning change which does not increase the permitted residential density of units on the parcels or tracts nor a zoning change initiated by action of PBC shall be deemed to divest the parcels or tracts of the exemption provided hereby. [Ord. 2005 – 003]
F. The following standards shall apply when the soil profile, as required under Art. 15.A.5.A.4, of this Article, shows the presence of hardpan or bedrock or of soils classified as sandy clay loam, clay loam, silty clay loam, sandy clay, silty clay, clay and organic soils. The PBC Soil Survey prepared by the USDA Soil Conservation Service or other available data may be used by the Health Department to determine the presence of the above noted soils. [Ord. 2005 – 003] [Ord. 2011-017]
   1. The OSTDS shall be placed no closer than the minimum distances indicated for the following:
      a. 100 feet from private, multi-family and limited use wells;
      b. 200 feet from a non-community well;
      c. 500 feet from a community well;
      d. 75 feet from a non-potable water well; and
      e. 100 feet from the high water line of lakes, streams, canals or other surface waters of overflow.
      (See Appendix A, Typical Site Plan Sewage Disposal System).
G. When an automatic dosing system is required in accordance with Rule 64E-6, F.A.C., two pumps shall be required for commercial use when the estimated establishment sewage flow exceeds 500 gallons per day and for multiple family residential use where three or more units are proposed. A placard on the dosing pump panel must be provided indicating the following:
   1. Name and phone number of person to contact in case of emergency; and
   2. Name and phone number of septic tank company to call for pumpout in case of overflow.

Section 8 Conditions for Non-Approval of an OSTDS

An OSTDS shall not be approved:
   A. Where an existing sanitary sewer is available. A municipal or investor-owned sewage system shall be deemed available for connection if the following conditions exist:
1. The system is not under a FDEP moratorium, the sewage system has adequate hydraulic capacity to accept the quantity of sewage to be generated by the proposed establishment, and the existing sewer line is within the following distance from the property:
   a. For estimated sewage flows of 600 or fewer gallons per day, if a sewer line exists in a public easement or R-O-W which abuts the property or is within 100 feet of the property and if gravity flow can be maintained from the building drain to the sewer line.
   b. For estimated sewage flows exceeding 600 gallons per day to 1,200 gallons per day, if a sewer line, gravity or force main exists in a public easement or R-O-W which is within 100 feet of the property.
   c. For estimated sewage flows greater than 1,200 gallons per day to 2,500 gallons per day, if a sewer line, gravity or force main exists in a public easement or R-O-W which is within 500 feet of the property.
   d. For estimated sewage flows greater than 2,500 gallons per day to 10,000 gallons per day, if a sewer line (gravity or force main) exists in a public easement or R-O-W which is within 1,000 feet of the property. [Ord. 2013-002]

B. Where the property is located in an area that is subject to frequent flooding.
C. For lots in a subdivision where the approved drainage has not been constructed in accordance with the requirements of the SFWMD and/or the PBC Engineering Department.
D. For treatment and disposal of industrial hazardous or toxic wastes.

Section 9 Handling of Septage

Collection, treatment and disposal of septage shall be in accordance with Rule 64E-6, F.A.C. No person(s) or corporation shall engage in the business of servicing septic tanks, grease traps, portable toilets or other treatment receptacles without first obtaining an annual license from the Department. The issuance of the license would be based upon compliance with the provisions of Rule 64E-6, F.A.C.

Section 10 Prohibitions

A. It is prohibited for any person to construct, keep, use or maintain a privy from which human waste is deposited on the surface of the ground or over waters of the State of Florida.
B. No person shall manufacture, sell or install an OSTDS unless in compliance with the requirements of his Article.
C. It is prohibited to drain sewage wastes or septic tank effluent into cesspools or drywells as means of disposal.
D. Organic chemical solvents shall not be advertised, sold or used in PBC for the purpose of degreasing or declogging onsite sewage disposal systems.

Section 11 Incorporation by Reference of Rule 64E-6, F.A.C.

Rule 64E-6, F.A.C. as may be amended from time to time and all amendments hereto, is hereby incorporated by reference including, but not limited to, application and permitting procedures, systems design and construction standards, system setback requirements, septage disposal, system maintenance and fee schedule unless higher in the PBC fee ordinance. In the event of a conflict between the provision of Rule 64E-6, F.A.C. and this Article, the more restrictive provision shall apply.

Section 12 Environmental Appeal Board (EAB)

The EAB was established by the ECB on May 26, 1987 to hear appeals from certain requirements, interpretations or determinations of this Article made by the Department or the ECO. Its membership is described in Art. 2.G, Decision Making Bodies.

Section 13 Appeals

A. Persons aggrieved by a requirement, interpretation or determination of this Article made by the Department or the ECO may appeal to the EAB by filing a written notice of appeal, with the ECO within 30 days from the determination to be appealed. However, no appeal shall be filed which requests relief from the construction standards required under Rule 64E-6, F.A.C. The notice shall be accompanied by a certified check or money order, made payable to the Department to defray the cost of processing and
administering the appeal. The fee for filing the appeal shall be in accordance with the fee schedule [PBC Code Chapter 11, Art. II Sect. 11-24]. [Ord. 2013-002]

B. Each notice of appeal shall state the factual basis for the appeal and the relief requested. There shall be attached to each notice supportive materials and documents, including the information listed in Appendix C, ECR I - Information Required for an Appeal for an Individual Lot, or Appendix D, ECR II - Information for an Appeal for a Subdivision, if applicable to the appeal. The EAB may require such additional information, as it deems necessary. A separate notice of appeal must be filed for each site or system considered for an appeal. Required supporting documentation for the appeal must be filed with the Department of Environmental Control Office with the notice of appeal. The burden of presenting supportive facts in the notice of appeal shall be the responsibility of the person filing the appeal. The person filing the appeal shall have the burden of proving that he/she is entitled to relief. The Department shall defend all appeals before the EAB. [Ord. 2005 – 003]

C. The person filing the appeal shall also submit to the ECO a list of the names and addresses of every property owner who may be affected by the granting of the appeal in the following cases:
   1. The proposed OSTDS fails to meet the minimum distance required between the system and a well, as provided by this Article; or
   2. The proposed OSTDS is within five feet of a neighboring lot; or
   3. The proposed OSTDS is within 50 feet of a water body on a neighboring lot.

D. A hearing on the appeal shall be set within 60 days of receipt of the notice of appeal by the ECO. This provision does not mean that the applicant is entitled to a hearing on the first available agenda following receipt of the notice of appeal.

E. Formal rules of evidence shall not apply, but fundamental due process shall be observed and shall govern the proceedings. All testimony shall be under oath. Irrelevant, immaterial or unduly repetitious evidence shall be excluded; but all other evidence of a type commonly relied upon by reasonably prudent persons shall be admissible, whether or not such evidence would be admissible in the trial courts of the State of Florida. Hearsay evidence may be used for the purpose of supplementing or explaining other evidence, but it shall not be sufficient in itself to support a finding unless it would be admissible over objection in civil actions.

F. The parties shall have the following rights: to be represented by counsel; to call and examine witnesses; to introduce exhibits; to cross-examine witnesses on any relevant matter, even though the matter was not covered in direct examination; and to rebut evidence.

G. The EAB shall hear and consider all facts material to the appeal and shall issue findings of fact based upon the greater weight of the evidence and shall issue an order affording the proper relief consistent with the powers granted herein. The findings and order shall be by motion approved by a majority of those members present and voting.

H. In order to grant an appeal authorizing an OSTDS on a single lot, the EAB must find that:
   1. Because of special factors, which may include economic factors, the applicant is unable to comply with this Article; and
   2. The OSTDS complies with current construction standards; and
   3. The granting of the appeal is the minimum alternative that will make possible the reasonable use of the land, structure or building; and
   4. The granting of the appeal is consistent with the general intent, purpose and requirements of PBC laws and ordinances; and
   5. The grant of the appeal will not be injurious to the area involved or to the public health and general welfare.

(This space intentionally left blank)
I. In order to grant an appeal authorizing OSTDS in subdivisions containing lots smaller than those required under this Article, the EAB must additionally find:

1. That for a proposed subdivision to be served by individual private wells, each lot has at least one-half acre, with a minimum dimension of 100 feet and that said subdivision contains no more than 50 lots; or that for the proposed subdivision to be served by a public water system, each lot has at least one-third acre with a minimum dimension of 75 feet and that said subdivision contains no more than 100 lots; and

2. That satisfactory ground water can be obtained if an individual private well is to be used; and

3. That all distance and setbacks, soil conditions, water table elevations and other related requirements of this Article and Rule 64E-6, F.A.C., are met; and

4. That the proposed subdivision does not represent sequential development of contiguous subdivisions, the purpose of which is to avoid the requirements of Art.15.A.13.I.1; and

5. That a municipal, county or investor-owned public sewage system is not available contiguous to the proposed subdivision or within one-half mile thereof with public R-O-W accessibility; and

6. That a municipal, county or investor-owned public sewage system is not available contiguous to the proposed subdivision or within one-half mile thereof with public R-O-W accessibility; and

7. That the proposed density of the subdivision is consistent with the density recommended in the Land Use Plan of PBC or in the Land Use Plan of the appropriate municipality; and

8. That the developer has made every reasonable effort to obtain public water and sewer; and

9. That dry water and/or sewer lines are to be installed by the developer and that the developer will establish an escrow account to pay for the cost of connection when water and/or sewer becomes available, or that the installation of the same is not feasible from a technical or economic standpoint; and

10. That onsite, water and/or sewage treatment facilities are not feasible from a technical or economic standpoint; and

11. That the proposed development will consist of no more than one single family residence per lot; and

12. That land uses surrounding and adjacent to the proposed subdivision and soil qualities of the area do not indicate that the area’s health is endangered by an inordinate proliferation of septic tanks.

J. Provided that the factual findings specified in Art.15.A.13.H and Art.15.A.13.I, the EAB may reverse, modify or affirm, wholly or partly, the requirement, interpretation or determination made by the Department or the ECO. In granting an appeal, the EAB may prescribe appropriate conditions and safeguards consistent with this Article. Violation of such conditions and safeguards, when made a part of the terms under which the appeal is granted, shall be deemed a violation of this Article. The EAB may also prescribe a reasonable time within which the action for which the appeal is granted shall be started or completed or both. Any decision of the EAB shall be in the form of written order.

K. If there is a change in facts or circumstances supporting a request for relief after an order granting relief has been issued, then the applicant shall notify the Department. The Department may request the EAB to revoke or amend the order.

L. Except where the relief granted is to exempt an applicant from the requirement to connect to a sanitary sewer under Art.15.A.8.A, any relief granted shall automatically terminate upon the availability of sewer service to the lot or parcel. Unless otherwise provided in an order issued pursuant to Art. 15.A.13.J, relief granted under this Article shall automatically lapse if action for which the appeal was granted has not been initiated within 24 months from the date of granting such appeal by the EAB or, if judicial proceedings to review the EABs decision shall be instituted, from the date of entry of the final order in such proceedings, including all appeals. [Ord. 2013-002]

M. The decision of the EAB shall be final administrative action. Any party or interested person may appeal a decision of the EAB to the Circuit Court of PBC. Such appeal shall be filed within 30 days of the execution of the EABs order.

Section 14 Violations, Enforcement Penalties, Inspections

A. Violations, Enforcement and Penalties

It is unlawful for any person to violate any provisions of this Article or any duly constituted order of the ECHB enforcing this Article. Such violations shall be punished according to the provisions of Chapter 77-616, Special Acts, Laws of Florida, as amended from time to time and PBC Environmental Control Ordinance No. 94-26, 32 as amended.

B. Inspections

It shall be the duty of the Health Director to conduct such inspections as are reasonable and necessary to determine compliance with the provisions of this Article.
Section 15 Judicial Review

Any person aggrieved by an action or decision of the EAB may seek judicial review in the Circuit Court for PBC by filing a petition for writ of certiorari pursuant to the Florida Rules of Appellate Procedure.

Section 16 Applicability

This Article shall apply to all the incorporated and unincorporated areas of PBC.

CHAPTER B (PBC ENVIRONMENTAL CONTROL RULE II) DRINKING WATER SUPPLY SYSTEMS

This Article shall be designated as "PBC Environmental Control Rule II Drinking Water Supply Systems."

Section 1 Purpose

The provisions of this Article prescribe the minimum standards for the design, construction, installation and operation of all water supply systems from which water is used for human consumption, culinary, sanitary, domestic, or other purposes.

Section 2 Definitions

See Art. 1.I, Definitions and Acronyms

Section 3 General Provisions

A. A single water supply system shall be constructed for any new structure, lot or facility containing more than one building with common access parking.

B. All fees charged for the administration of this Article shall be in accordance with the fee schedule pursuant to Ord. No. 97-58 and the amendments thereto. Also refer to Sec. 11-24 of the PBC Environmental Regulation and Control Code.

C. All buildings used or intended for human occupancy, employment or service to the public shall be provided with piped water under pressure from a water system which complies with the provisions of this Article. Bottled water shall not be considered an acceptable substitute for such a water system.

D. Request for Department approval on zoning, site plan and subdivision matters for building permits shall be reviewed in light of this Article.

E. This Article applies to both new and existing water systems unless the Section states otherwise.

Section 4 Water Quality Requirements

The ultimate concern of a public drinking water program is the quality of piped water for human consumption when the water reaches the consumers. The following rules establish the maximum contaminant levels for the water within public water systems. Public water systems shall not exceed the maximum contaminant levels established.

A. Primary Drinking Water Standards Maximum Contaminant Levels

These standards are as specified in Chapter 62-550, F.A.C. and 64E-8, F.A.C. as applicable.

B. Maximum Contaminant Levels for Secondary Inorganic Contaminant

The maximum contaminant levels for secondary inorganic contaminants are applicable to community water systems only and are as specified in Chapter 62-550, F.A.C.

Section 5 Water Monitoring Requirements

A. Monitoring requirements for the supplier of water shall be per Chapter 62-550, F.A.C. for community, non-transient non-community, and transient non-community public water supply systems and per 64E-8 for limited use water systems. [Ord. 2005 – 003]

B. Community and non-transient non-community water systems shall monitor for the following from each raw water source or well semi annually: [Ord. 2005 – 003]

- Calcium, Ca
- Chloride, Cl
- Color
- Iron, Fe
- Nitrate, NO3
- pH (Field)
Section 6  Reporting Requirements

The supplier of water of any community, non-transient non-community, or transient non-community water supply system shall comply with the reporting requirements as specified in Chapter 62-550, F.A.C.. The supplier of water of any limited use water supply system shall comply with the reporting requirements as specified in Chapter 64E-8, F.A.C.  [Ord. 2005 – 003]

Section 7  Notification Requirements

A. The supplier of water of any community, non-community, non-transient or transient non-community water system shall comply with the notification requirements as defined in Chapter 62-560, F.A.C.  [Ord. 2011-002]

B. If a limited use water system fails to comply with an applicable maximum contaminant level or fails to comply with an applicable testing procedure, established in Art.15.B.6, Reporting Requirements, the supplier of water shall give notice of such failure to the persons served by the system by fixed signs located at all potable water outlets or connections.

C. In case of breaks in water mains transmission lines, a drop in water pressure at the point of entry or anywhere in the distribution system below 20 p.s.i., abnormal taste or odor, any interruption of water service to users, or any circumstances which could affect the quality of the drinking water, it shall be the duty of the water supplier to notify the Health Department within one hour of the occurrence. Notification shall include the following information:  [Ord. 2011-002]

1. Description of the problem;
2. Area affected;
3. Number of connections or users affected;
4. Estimated duration of problem;
5. Method of notification to users; and
6. Such information shall also be provided in writing on the monthly operation report.

D. If any of the conditions listed in Art. 15.B.7.C, above, should occur, the water supplier is required to obtain two consecutive days of satisfactory bacteriological sample results from the affected area. If it is determined that notification of the necessity to boil water is required, then notification shall be given immediately to the users either by written notice (ex. door hangers, flyers, locally posted signs), a reverse 911 calling system through the media of newspaper, radio, or television, or a combination of these methods as needed to properly contact the service population. The Department of Health’s “Guidelines for the Issuance of Precautionary Boil Water Notices” as adopted in Rule 62-550, F.A.C. shall be used to determine if and when a boil water notification is necessary and how to issue/rescind said boil water notification.  If issued, the notice to boil water shall remain in effect until at least one day of satisfactory bacteriological sample results have been obtained from the affected area, and after consultation and approval of the Health Department. If only one day of precautionary boil water is utilized, then sufficient evidence must be provided to the Health Department to confirm that no contamination has occurred, ex. extensive bacteriological test data, system pressure data, detailed explanation of repair process to confirm lack of potential for contamination, etc. If unsatisfactory bacteriological levels are detected following the one day initial sampling, or if the system cannot adequately justify to the Health Department that no contamination has occurred, then the water system shall provide a minimum of two consecutive days of satisfactory sample results prior to rescinding the boil notice. Samples shall be taken 24 hours apart. The Health Department shall notify the water supplier when a system-wide boil water notice may be rescinded.  [Ord. 2005 – 003]  [Ord. 2011-002]

E. Where public fire protection is provided by the mains affected by the interruption, the utility water supplier shall notify the Fire Marshall or the appropriate Fire Department official that an interruption has occurred or will occur.

Section 8  Construction and Design Requirements

A. Design Criteria

Approval for construction, extension, expansion or use of any community, non-transient non-community, transient non-community and limited use water supply system shall be based on the criteria below, in addition to the design criteria specified in Chapters 62-532, 62-555, 64E-8, F.A.C., and the standards
considered as modern engineering practices. Criteria in the references listed below are incorporated into this Code. If any differences in design criteria exist, the more stringent standard shall be used. [Ord. 2011-002]

1. Lead pipes, solder and flux are prohibited for use in the installation or repair of any drinking water system. This does not apply to leaded joints necessary for the repair of cast iron pipes. Solders and fluxes must contain not more than 0.2 percent lead and fittings not more than 8.0 percent lead.

2. A minimum of two drinking water supply wells and pumps shall be provided for each community water system that will serve 350 or more persons or 150 or more service connections upon completion of construction. [Ord. 2005 – 003]

3. All water wells shall be constructed by a water well contractor licensed by the SFWMD in accordance with Chapter 62-531, F.A.C., as applicable.

4. All water wells shall be constructed in accordance with Chapters 40E-3, 62-532, 62-555 and 64E-8 F.A.C., as applicable.

5. For private and multi-family water wells and irrigation wells the casing shall be surrounded at grade level by a two-inch thick concrete pad extending at least six inches in all directions and the upper terminus of the well casing shall project at least 12 inches above finished grade. [Ord. 2005 – 003]

6. Whenever the pump is not set at the vertical casing, the line between the vertical casing and pump shall be considered an extension of the casing and protected from sanitary hazards in a similar manner as the casing.

7. For community, non-community and non-transient non-community water systems having OSTDS wells shall be located as specified in Chapter 62-555, F.A.C.

8. Limited use wells shall be placed a minimum distance of 100 feet from any OSTDS.

9. Private and multi-family water wells shall be placed a minimum distance of 75 feet from any OSTDS or brine disposal area.
   a. 75 feet from any OSTDS or brine disposal area. [Ord. 2005 – 003]
   b. 50 feet from any non-potable water well, pond, canal or other body of water. [Ord. 2005 – 003]

10. Community, non-community, non-transient non-community and limited use water wells shall be located a minimum distance of:
   a. 100 feet from other pollution sources, including but not limited to drainage wells, gasoline or other petroleum product under ground storage tanks water softener brine disposal areas except as otherwise provided in the PBC Wellfield Protection Ordinance.
   b. 100 feet from any non-potable water well, pond, canal or other body of water unless justified in accordance with Chapter 62-555, F.A.C., but not less than 50 feet.
   c. 25 feet from poisoned soils, including but not limited to building foundations.
   d. 500 feet from any sanitary landfill or recognized hazardous or toxic waste site.

12. Any waste collection or transmission line within the defined locations defined in the PBC Wellfield Protection Ordinance shall be constructed in accordance with current American Water Works Association, water main standards, including the passing of the appropriate pressure and leakage tests.

13. Within 30 days after the completion of the construction or repair of any drinking water well, the water well contractor shall submit a report to the Department on the approved forms in accordance with the instructions provided thereon.

14. Water supply system wells shall be enclosed within protective fencing when access is open to the general public.

15. The cone of influence of a new well or wells serving a community water supply system shall comply with the requirements of the PBC Wellfield Protection Ordinance.

16. All wells for which use has been permanently discontinued shall be plugged by filling them from the bottom to the top with neat cement grout, concrete or other method approved by the Department.

17. All existing community systems serving 350 or more persons and all newly proposed community systems shall be equipped with a source of auxiliary power to allow operation of the raw water supply, water treatment units and pumping capacity. In addition, such systems shall be provided with automatic start up devices except where elevated storage or 24 hour per day, seven day per week operation is provided. Such emergency power shall be of a sufficient capacity to operate the water supply facility at average daily design capacity. A minimum fuel supply for 14 days of continuous operation for each item of auxiliary power shall be maintained at the Water or Wastewater Treatment Plant or under the control of the utility and reserved for the Water or Wastewater Treatment Plant.
Any fuel pumps required to transfer the fuel to the auxiliary power units shall be equipped with their own auxiliary power or manual pumping system. [Ord. 2005 – 003] [Ord. 2017-008]

18. All community, non-transient non-community, and transient non-community limited use systems where applicable, shall maintain a minimum reserve supply of chlorine for emergency conditions. Such reserve shall be figured for 14 days consumption for systems using gas chlorine and seven days consumption for systems using hypochlorite solution. The consumption shall be based, as a minimum on 50 percent of design capacity. [Ord. 2011-002]

19. Disinfection
   a. All public water systems shall be designed to maintain a minimum continuous and effective free chlorine residual within the acceptable range of 4.0 mg/l maximum and 0.2 mg/l minimum or equivalent disinfection if other than free chlorine is used as the disinfection measure throughout the system. When utilizing chlorine in combination with ammonia, a minimum combined residual of 0.6 mg/l shall be maintained. [Ord. 2005 –003]
   b. Limited use water systems - The Department shall require disinfection if bacteria is discovered in any sample of water and it is determined that there is an existing or potential health threat.
   c. A minimum of two chlorination facilities at the Water or Wastewater Treatment Plant shall be provided for each community water system. Each chlorinator shall be of adequate capacity to supply the total demand of the raw water at the rated capacity of the Water or Wastewater Treatment Plant. Where more than two chlorinators are available, adequate capacity to supply the total chlorine demand of the raw water shall be provided with the largest unit out of service. Disinfection other than chlorination will be considered on an individual basis by the Department. [Ord. 2017-008]
   d. Booster chlorination facilities shall be provided in the distribution systems of community water systems as necessary to maintain the disinfection requirements of Art. 15.B.8.A.19, above, to consecutive systems. [Ord. 2011-002]
   e. Consecutive systems shall be responsible for maintaining the disinfectant residual requirements of Art. 15.B.8.A.19, above, within the consecutive system.

20. Water or Wastewater Treatment Plant and Storage
   The approved design capacity shall be adequate to provide for the maximum day demand plus fire flow requirements and maintain the water quality standards specified in this Article.

21. Distribution
   a. The sizing of the distribution lines shall be adequate to provide the maximum day demand plus fire flow without the development of distribution pressures lower than 20 pounds per square inch (20 p.s.i.). The minimum required fire flow shall be established by the fire department having jurisdiction. [Ord. 2006-004]
   b. Except for repair or replacement of existing lines, the size of new piping for any community system shall be no less than six-inch diameter unless a departure in sizing is justified by hydraulic analysis or historic analysis and future water use for the area and is approved by Department based on such circumstances.
   c. In metered distribution systems, the supplier of water shall be responsible for operation maintenance and repair of new water lines up to and including the water meter.
   d. Any new development or construction connecting to an offsite water main shall provide an extension of that water main along the public R-O-W or utility easements abutting the property.
   e. Dead end lines shall be minimized by the looping of all mains where possible. Where dead end lines occur, they shall be provided with flush hydrants, fire hydrants or blowoffs for flushing purposes.
   f. When the distribution demand, as determined in Art. 15.B.8.A.21.a, above, reaches 80 percent of approved design capacity the supplier of water shall initiate the procedures for Water or Wastewater Treatment Plant expansion. In the event expansion procedures are not initiated, the system shall be considered inadequate for additional distribution expansion, and approval for additional distribution expansion shall not be granted unless otherwise justified by an engineering report covering the circumstances and approved by the Department. [Ord. 2017-008]
   g. When the distribution demand, as determined in Art. 15.B.8.A.21.a, above, reaches 90 percent of the approved design capacity, the supplier of water shall have the Water or Wastewater Treatment plant expansion under construction. In the event construction is not underway, the system shall be considered inadequate for additional distribution expansion and approval for additional distribution expansion shall not be granted unless otherwise justified by an engineering report covering the circumstances and approved by the Department. [Ord. 2017-008]
Section 9 Connection Required

A. All existing buildings served by non-transient non-community, transient non-community and limited use water systems or new limited use and new private water systems shall connect to an approved community water system where such a system has an available water main within 100 feet in a public R-O-W or easement abutting the property on which the building(s) are located. Connection to an approved community water system shall be completed within six months of being notified by the Health Department. Connection to an approved community water system shall not be required: [Ord. 2011-002]
   1. If connection requires an extension of the main; or
   2. If the main is located across four or more lanes of paved roadway; or
   3. If the utility is unable to provide water.

B. Notwithstanding the provisions of Art. 15.B.9.A, if the Health Department determines that there is an existing or potential health threat on the property served by a non-transient non-community, transient non-community, or limited use water system, then the connection shall be made as required under Art. 15.B.9.C, below. [Ord. 2011-002]

C. Establishments or buildings that utilize a non-transient non-community, or transient non-community or limited use water system and are being constructed, modified, expanded or changed in operation shall connect to an approved community water supply system when said system is available within 1,000 feet by existing R-O-W or easement to the property. Each foot of water crossing, paved roadway, or sidewalk shall be considered as two feet; the proposed supply shall not be required to cross interstate highway or railroad systems. Property owners connecting to community water supply systems under this Subsection shall be required to extend the water main along their public R-O-W utility easements, which abut the property. Connection to an approved community water system shall be completed within six months of being notified by the Health Department. [Ord. 2011-002] [Ord. 2017-008]

Section 10 Backflow Prevention

The following buildings, establishments or facilities connected to a drinking water supply shall install and maintain backflow prevention devices complying with current American Water Works Association standards: nursing homes, hospitals, mortuaries, funeral parlors, restaurants, sewage treatment plants, sewage lift stations, public swimming pools and buildings using corrosive, toxic, infectious, radioactive or other substances which would be a health threat if they entered a drinking water supply.

Section 11 Permits/Approvals

A. Approval
   The Department shall review and approve or deny any construction or use of any water supply system or facility based on the criteria specified in this Article. Prior to submission to the Department, plans involving distribution mains shall be reviewed by the Fire Marshall or by the appropriate Fire Department official.

B. Construction Permits
   1. No person shall install, extend or alter any water supply system or facility including any well, plant, tank, pump station, distribution system, fire line or other pipe or structures without first obtaining a construction permit or written approval from the Department. [Ord. 2005 – 003]
   2. Where required, applicants shall provide evidence of their ability to secure a consumptive use permit from the SFWMD; in addition evidence of proper zoning is required prior to Department approval.
   3. The applicant shall provide the necessary information and design specifications requested and required by the Department to conduct an adequate review of any proposed activity or construction in addition to that information provided on the FDEP or Department application forms. The plans, applications and specifications for community, non-community, or non-transient non-community water wells and water systems except limited use private and non-potable well water wells shall be prepared by a professional engineer, licensed in the State of Florida.
   4. Any submittal for community water systems, for which the supplier of water is not the applicant but will require ownership, operation or maintenance by the supplier of water, shall require the acceptance stamp of the supplier of water on the plans.
   5. A construction permit shall be required for all extensions, relocations, or replacements of distribution lines exceeding 100 feet in length at any single location, service connections exceeding 100 feet in length with two inch or larger pipe serving commercial or institutional establishments, and where privately owned or maintained fire hydrants are proposed. [Ord. 2005 – 003].
6. Distribution lines and service connections permitted by the department shall be reviewed to determine that the proposed construction complies with applicable design and construction standards of Chapter 62-550 and 62-555, F.A.C. and this Article. [Ord. 2005 – 003]

7. Any extension of a distribution system within PBC for which the water supply facility is not located within PBC, or distribution extension outside PBC when the water supply facility is located within PBC, shall require a permit from the Department and written acceptance of the project from the responsible agency outside the PBC. [Ord. 2005 – 003]

C. Approval for Use

1. No person shall put into service or use any drinking water system or facility, including any well, plant, tank, pump station, distribution system, fire line or other pipes or structure without first having received written approval from the Department.

2. Upon completion of construction of the water well or water system, the following information shall be submitted to the Department in order to obtain an approval for use:
   a. For water wells, a well completion report prepared by a licensed water well contractor.
   b. For water systems a Certification of Completion and record drawings (sampling points shall be highlighted) prepared by the Engineer of Record.
   c. Chemical and bacteriological sample results as required by this Article.

3. The Certification of Completion for the water system or facility shall include certification of any accompanying sewage system and evidence of the acceptance of the system or facility by the supplier of water.

4. Uses of construction meters for construction water may be approved by the Department in cases when accompanying sewer has not been certified if the Department determines the water system or facility has been satisfactorily tested and certified by the Engineer of Record.

5. The Water Well Completion Report shall be submitted to the Department within 30 days of the completion of construction or repair of the water well.

6. The connection of new water mains to existing mains shall not be completed until after the new mains have passed their pressure and leakage tests and completed the disinfection and bacteriological clearance procedures. During construction partial releases may be given by the Department. However, the pressure and leakage tests and the disinfection and bacteriological procedures shall be followed in all cases. No water supply system or facility, including any well, plant, tank, pump station, distribution system, or other pipes, equipment or structure through which water is delivered to the consumer for drinking or household purposes, except certain community water supply service connections not requiring a permit, shall be put into service or used until such facility has been effectively disinfected and bacteriologically cleared. Sample results shall be submitted to the Health Department as follows: [Ord. 2011-002]
   a. For all water systems, except wells, two acceptable consecutive daily samples shall be required.
   b. For a community, non-transient non-community, or transient non-community well clearance, a minimum of 20 consecutive workday acceptable samples are required with no more than two samples taken daily. Samples shall be taken at least six hours apart. [Ord. 2011-002]
   c. For a limited use well water clearance, a minimum of five acceptable samples are required. The collection and analysis of two samples per day is permitted if the samples are taken a minimum of six hours apart and the well is purged for 15 minutes before each sample is taken. [Ord. 2005 – 003]
   d. For a private water well clearance, one acceptable sample shall be taken.
   e. Any sample analysis with confluent growth and/or TNTC non-coliform counts shall not be accepted.
   f. Sample results from any water supply facility or well shall not be accepted if more than 60 days has elapsed since the taking of the last sample. [Ord. 2005 – 003]

Section 12 Sampling/Analytical Methods

A. All water samples required under this Article for community, non-transient non-community, and transient non-community, water systems, including community water well and water main clearance shall be taken by an employee of a laboratory certified to perform drinking water analysis by the Health Department in accordance with F.S.§ 403.863 and Chapter 64E-1, F.A.C., or an operator certified under Chapter 62-602, F.A.C., or an employee of the Health Department. Water samples for other public and private water well clearance shall be taken by the licensed well contractor that installed the well. [Ord. 2011-002]

B. All water samples shall be analyzed by a laboratory certified to perform drinking water analyses by the Department in accordance with F. S. § 403.863 and Chapter 64E-1, F.A.C.
C. Analyses conducted to determine compliance with this Article shall be made in accordance first with the methods specified in Chapter 62-550, F.A.C., and if not specified then in accordance with "Standard Methods of Examination of Water and Wastewater," latest Edition, or methods approved by the EPA.

Section 13 Operation and Maintenance

A. The supplier of water shall maintain all items of the water supply facility in the approved operational condition.

B. The supplier of water shall provide a certified operator as specified in Chapter 62-699, F.A.C. as it may be amended or transferred. [Ord. 2005 – 003]

C. The certified operator servicing water systems shall maintain an on site log of maintenance performed, date performed and problems encountered with the system.

D. The supplier of water shall operate the water supply facility to maintain continuously the free available chlorine residual or equivalent disinfection between 4.0 mg/l and 0.2 mg/l throughout the distribution system, and the total chlorine residual no greater than 5.0 mg/l. When utilizing chlorine in combination with ammonia, a minimum combined residual 0.6 mg/l shall be maintained. [Ord. 2005–003]

E. The supplier of water shall operate the water supply facility to produce continuously water meeting the pressure quality requirements of this Article.

F. The supplier of water shall not make any change in treatment or alter, discontinue or by pass a purification process or protective provisions without securing prior approval from the Department.

G. Cross-connection to any water supply system is prohibited. Upon detection of a cross-connection, the supplier of water shall either eliminate the cross-connection by installation of an approved backflow prevention device or discontinue service by providing a physical separation.

H. The supplier of water shall establish a routine cross-connection control program and keep a maintenance log on each backflow prevention device connected to its system. Inspection, testing and maintenance on each backflow prevention device shall be performed by a certified backflow prevention device tester, certified under a State of Florida approved program. The frequency of testing shall be minimum of once per year or other schedule recommended by the manufacturer and approved by the Department.

I. Fire hydrant maintenance and fire flow testing shall be the responsibility of the owner of the fire hydrant. Maintenance and fire flow testing shall be performed in accordance with the "Standards of the American Water Works Association Manual M-17" and as indicated below: [Ord. 2006-004]

1. A routine maintenance program shall be established for each fire hydrant. [Ord. 2006-004]

2. Fire flow testing of hydrants shall be performed on a three year cycle, such that all hydrants in a system are fire flow tested at least once every three years unless recommended by the manufacturer or the Department to be more frequent. Owners of fire hydrants which do not utilize local fire departments or water utility departments to perform or oversee the fire flow testing shall have completed all testing and submitted a letter of completion to the local fire authority by January 1st of each year with all hydrants accounted for within the required cycle. These records shall be maintained on site for review by the applicable fire authority. [Ord. 2006-004] [Ord. 2013-002] [Ord. 2014-026]

3. The minimum required fire flow from fire hydrants shall be determined as per Art. 15.B.8.A.21.a. [Ord. 2006-004]

J. Any planned water outages shall be scheduled by the water supplier during periods of low water usage.

K. The supplier of water shall operate all emergency power units for at least 15 minutes at least once per week to ensure starting capabilities and continuously for four hours under load once each calendar quarter to ensure dependability.

L. The supplier of water shall conduct the necessary flushing program to remove lime, sand or other objectionable sediments, matter or material from its water system.

M. Each community and non-transient community water system shall maintain a distribution map showing the general locations of the water lines and sizes, valves, fire hydrants, flush hydrants and any inter connections. The scale of the distribution map shall be between 200 and 1,000 feet per inch or other scale acceptable to the Department. A microfilm quality copy of the current edition of this map shall be submitted to the Department by February 28, of each even numbered year. The Department may waive the submittal requirements for any water supply in which no significant change has taken place within the distribution system.
**Section 14  Emergency Operation Requirements**

A. Where two community water supply systems have distribution or transmission lines within 1,000 feet of each other, they shall provide an emergency interconnection between the two systems when the Department determines that such a connection would be of benefit to the citizens of PBC. Such determination shall be based on the possibility of destruction of the water source or treatment system in the event of a disaster and the possible benefits in moving water between the systems. Such interconnecting lines shall be no smaller than the smallest of the two lines being inter-connection and shall be provided with at least one valve and any necessary flush points. If the two water suppliers are unable to reach an agreement on the payment for installation of such an inter-connection, each supplier shall pay the cost of construction from the supplier's line to the point of connection and shall pay 50 percent of the cost of a meter and meter box if either party desires a meter and meter box. The point of connection shall be at the following:

1. Municipal limits or franchise boundaries if the supplier's limits or boundaries are adjacent and contiguous.
2. The midpoint of the municipal limits or franchise boundaries if the limits or boundaries are not adjacent and contiguous. The interconnection shall be completed within one year after the Department notifies the systems involved.

B. Any consecutive or community water system may be required to provide a flush or fire hydrant, water tap or other provision for securing an emergency water service from an existing main at a location that the Department determines would be of benefit to the citizens of the area. Such determination shall be based in part on the possibility of a prolonged power outage or other disaster which would render individual wells in the area unusable. Other considerations will include the density of individual wells in the area and the distance of the nearest possible potable water supply during an emergency. Such water taps shall be constructed within 120 days of notification by the Department. It shall be the responsibility of PBC to secure an agreement with the community water system for use of that emergency water service.

**Section 15  Adoption of Chapters of F.A.C.**

Chapters 62, 532, 550, 551, 555, 560, 602, 699, 64E-6 and 64E-8, F.A.C., and all amendments thereto, are hereby incorporated into this Article. In the event of a conflict between the provisions of these Chapters and this Article, the more restrictive provision shall apply.

**Section 16  Environmental Appeal Board (EAB)**

The EAB was established by the ECB on May 26, 1987, to hear appeals from certain requirements, interpretations or determinations of this Article made by the Department or the ECO. Its membership is described in Art. 2.G, Decision Making Bodies.

**Section 17  Appeals**

A. Persons aggrieved by a requirement, interpretation or determination of Art. 15.B.8, Construction and Design Requirements, and Art. 15.B.9, Connection Required, made by the Department or the ECO may appeal to the EAB by filing a written notice of appeal, with the ECO within 30 days from the determination to be appealed. The notice shall be accompanied by a certified check or money order, in the amount of $100.00 made payable to the Department which shall be non-refundable, to defray the cost of processing and administering the appeal. Only those appeals requesting relief from setbacks under Art. 15.B.8, Construction and Design Requirements, or requesting an exception from connection to a public or investor-owned community water supply under Art. 15.B.9, Connection Required, shall be filed. [Ord. 2005 – 003]

B. Each notice of appeal shall state the factual basis for the appeal and the relief requested. There shall be attached to each notice supportive materials and documents, including a site plan indicating proposed and existing individual sewage disposal systems and water wells on the property that is the subject of the appeal and all other systems and conditions on neighboring properties which could affect the requirements of Art. 15.B.8, Construction and Design Requirements, or Art. 15.B.9, Connection Required, if the appeals were granted. The EAB may require such additional information as it deems necessary. A separate notice of appeal must be filed for each site or system considered for an appeal. Required supporting documentation for the appeal must be filed with the Department or ECO with the notice of appeal. The burden of presenting supporting facts in the notice of appeal shall be the responsibility of the
person filing the appeal. The person filing the appeal shall have the burden of proving that he/she is entitled to relief. The Department and/or ECO shall defend all appeals before the EAB. [Ord. 2005 – 003]

C. The person filing the appeal shall also submit to the ECO a list of the names and addresses of every property owner who may be affected by the granting of the appeal.

D. A hearing on the appeal shall be set within 60 days of receipt of the notice of appeal by the ECO. This provision does not mean that the applicant is entitled to a hearing on the first available agenda following receipt of the notice of appeal.

E. Formal rules of evidence shall not apply to the hearing but fundamental due process shall be observed and shall govern the proceedings. All testimony shall be under oath. Irrelevant, immaterial or unduly repetitious evidence shall be excluded; but all other evidence of a type commonly relied upon by reasonably prudent persons shall be admissible, whether or not such evidence would be admissible in the trial courts of the State of Florida. Hearsay evidence may be used for the purpose of supplementing or explaining other evidence, but it shall not be sufficient in itself to support a finding unless it would be admissible over objection in civil actions.

F. The parties shall have the following rights: to be represented by counsel; to call and examine witnesses; to introduce exhibits; to cross-examine witnesses on any relevant matter, even though the matter was not covered in direct examination; and to rebut evidence.

G. The EAB shall hear and consider all facts material to the appeal and shall issue findings of fact based upon the greater weight of the evidence and shall issue an order affording the proper relief consistent with the powers granted herein. The findings and order shall be by motion approved by a majority of those members present and voting.

H. In order to grant an appeal authorizing a new or existing well for use in lieu of connecting to a public or investor-owned community water supply, the EAB must find that: [Ord. 2005 – 003]
   1. Satisfactory ground water is available or can be obtained; and
   2. The well complies with all setbacks, construction standards and other requirements of this Article, and Chapters 62-550, 62-555, 62-532, 64E-6, and 64E-8, F.A.C., and [Ord. 2005 – 003]
   3. Every reasonable effort has been made to obtain a water supply from a public or investor-owned community water supplier.

I. In order to grant relief from Art. 15.B.8, Construction and Design Requirements, and/or Art. 15.B.9, Connection Required, the EAB must find that: [Ord. 2005 – 003]
   1. Satisfactory ground water can be obtained; and
   2. Every reasonable effort has been made to comply with the requirements of this Article in the location of the water well; and
   3. The proposed water well complies with all construction standards and other requirements of this Article; and
   4. Advanced notice shall be given to future purchasers of the water system that the system shall be connected to a community water supply when such supply becomes available. The purchaser has certain operational requirements until such connection is completed.

J. Provided that the factual findings specified in Art.15.B.17.H, Art.15.B.17.I, above, are made, the EAB may reverse, modify or affirm, wholly or partly, the requirement, interpretation or determination made by the Department or the ECO. In granting an appeal, the EAB may prescribe appropriate conditions and safeguards consistent with this Article. Violation of such conditions and safeguards, when made a part of the terms under which the appeal is granted, shall be deemed a violation of this Article. The EAB may also prescribe a reasonable time within which the action for which the appeal is granted shall be started or completed or both. Any decision of the EAB shall be in the form of written order.

K. If there is a change in the facts or circumstances supporting a request for relief after an order granting relief has been issued, then the applicant shall notify the Department. The Department may request the EAB to revoke or amend the order.

L. Except where the relief granted is to exempt an applicant from the requirement to connect to a community water supply under Art.15.B.9, Connection Required, any relief granted shall automatically terminate upon the availability of community water supply to the lot or parcel. Upon the request of the Department or the ECO, the EAB may modify or rescind an order granting relief from the requirements to connect to a public or investor-owned community water supply under Art. 15.B.17.H if conditions under which the appeal was granted no longer exist. Unless otherwise provided in an order issued pursuant to Art. 15.B.17.H, relief granted under this Article shall automatically lapse if action for which the appeal was granted has not been initiated within one year from the date of granting such appeal by the EAB or, if judicial proceedings to review the EABs decision shall be instituted, from the date of entry of the final order in such proceedings, including all appeals. [Ord. 2005 – 003]

Unified Land Development Code
Article 15 - Health Regulations
Supplement No. 24 (Printed 10-18)
M. The decision of the EAB shall be final administrative action. Any party or interested person may appeal a decision of the EAB to the Circuit Court of PBC. Such appeal shall be filed within 30 days of the execution of the EAB Order.

Section 18 Violations, Enforcement, Penalties and Inspections

A. Violations and Penalties
It is unlawful for any person to violate any provision of this Article or any duly constituted order of the ECHB enforcing this Article. Such violations shall be subject to the enforcement and penalty provisions of Chapter 77-616, Special Acts, Laws of Florida, as may be amended from time to time and PBC Environmental Control Ordinance No. 94-26, 32 as amended.

B. Inspections
It shall be the duty of the Director to conduct such inspections as are reasonable and necessary to determine compliance with the provisions of this Article.

Section 19 Judicial Review

Any person aggrieved by an action or decision of the ECHB, including PBC, may seek judicial review in the Circuit Court of PBC.

Section 20 Application

This Article shall apply to all the incorporated and unincorporated areas of PBC.

CHAPTER C GENERAL THRESHOLD REVIEW

Section 1 Purpose

The purpose of threshold review is to provide information to the applicant and PBC on the carrying capacity of the land prior to site design.

A. Development on Property or Uses Requiring Threshold Review

Proposed development consisting of any of the following site uses shall be reviewed by the Department. In response, the Department shall advise the applicant of special rules and procedures governing development of the use:

1. Landfills or Incinerator; [Ord. 2017-008]
2. Recycling Plants and Recycling/Centers; [Ord. 2017-008]
3. Composting Facility
4. Chipping and Mulching [Ord. 2017-008]
5. Water or Wastewater Treatment Plants; [Ord. 2017-008]
6. Public Bathing Places;
7. Salvage and Junk Yards; [Ord. 2017-008]
8. Air Curtain Incinerator; [Ord. 2017-008]
10. Electric Power Plants; [Ord. 2017-008]
11. Septic Tanks;
12. Private Water Supply Wells; and
13. Public Swimming Pools

B. Application Procedures

Applications for Threshold Review may be submitted to the PBCHD or concurrently with a zoning application.

1. Application Submitted to PBCHD
   Application must comply with the provision of this article and any additional application requirements, established by the Health Department.

2. Submitted with a Zoning Application
   An application for all Zoning amendments or development permits shall be submitted pursuant to Art. 2, Application Processes and Procedures, by the owner, or agent who is authorized in writing to act on the owner’s behalf, or person having a written contractual interest in the land for which the amendment or development permit is proposed.
Simultaneous with the submission of the application for development permit, a Threshold Review application shall be completed and submitted in a form established by the Zoning Division. The response from the reviewing agencies shall be provided to the applicant within 15 days after submission of a completed application. The response shall be submitted the Zoning Division prior to certification of the application for a public hearing or meeting. For the purpose of applying for a development permit, a Certificate of Threshold Review shall remain valid for one year from the date of issuance of the certificate provided the project does not change, or for the life of the review process, whichever is less.

(This space intentionally left blank)
APPENDIX A

Septic System for areas of Palm Beach County with severely or moderately limited soil

Description
Required Setbacks from typical features to a Septic System including neighboring.

Legend
- Lot
- Building
- Drainfield
- Unobstructed Area
- Septic Tank
- Soil Profile Location
- Elevation
- Proposed Water Line
- Existing Pond
- Canal

(This space intentionally left blank)
APPENDIX B

Septic System for areas of Palm Beach County with slightly limited soil

Description
Required Setbacks from typical features to a Septic System including neighboring.

Legend
- Lot
- Building
- Drainfield
- Unobstructed Area
- Septic Tank
- Soil Profile Location
- Elevation
- Proposed Water Line
- Canal

Proposed Residence

- Proposed 1250 Square Feet available area for on site Sewage Disposal System.
- LOT # 52
- Swale

Benchmark is set PK.NAIL & WASHER: X=17.22
APPENDIX C
ECR I
INFORMATION REQUIRED FOR AN APPEAL FOR AN INDIVIDUAL LOT

Eight copies of the following information prepared by an engineer or land surveyor registered in the State of Florida must be submitted with the notice of appeal:

1. Floor Plan
2. A site plan drawn to scale showing:
   a. Boundaries with dimensions
   b. Elevations or slope of land
   c. Location of building(s)
   d. Location and layout of septic tank
   e. Location and layout of drainfield
   f. Location of potable water supply lines
   g. Location of well
   h. Location of public sewers
   i. Location and elevation of percolation test
   j. Location of septic tank, drainfield and well on adjacent properties (sides, front and rear)
   k. Location of driveways, parking and walkways
   l. Benchmark on or adjacent to property
3. The site plan must indicate the following (related to the system):
   a. Distance from private well
   b. Distance from public well
   c. Distance of septic tank and drainfield from building
   d. Distance of septic tank and drainfield from property line
   e. Distance from water supply lines
   f. Distance to high water line of lakes, canals, streams, etc.
4. Two soil profiles to six feet (in drainfield area) indicating the soil classification and showing the existing water table and the estimated wettest season water table.

(This space intentionally left blank)
Appendix D
ECR II
INFORMATION REQUIRED FOR AN APPEAL FOR A SUBDIVISION

Ten copies of the following information prepared by an engineer registered in the State of Florida must be submitted with the notice of appeal:

1. General Information
   a. Name of subdivision
   b. Owner
   c. Address
   d. Location of subdivision
   e. Total area of subdivision __________ acre:
      Number of lots __________
   f. Minimum lot size
   g. Adjacent subdivisions Location Size Distance
   h. Approximate adjacent acreage available for expansion:
   i. Typical home to be constructed:
      No. of bedrooms __________
      Sq. footage of heated or cooled area __________

2. Required exhibits
   a. Location map - A location map showing the location of the subdivision in relation to the surrounding areas and nearby built-up area.
   b. Topographical map - A contour map indicating all streams or watercourses, bodies of water, low, wet or marshy land, rock outcrops and filled areas.
   c. Proposed plat - A plat of the subdivision showing the individual lots, if available, or a proposed subdivision layout.
   d. Drainage plans - A plan of the subdivision indicating all drainage structures and features, designed in accordance with the requirements of the South Florida Water Management District and the local drainage district.
   e. Plans for water and sewer lines - A plan of the subdivision indicating proposed water and sewer lines.

3. Water supply and sewage disposal.
   a. Source of proposed water supply.
      1) Community
      2) Non-community
      3) Private well
      4) If a utility is expected to supply water, submit evidence of availability of the water supply.
      5) If an onsite well is utilized, submit evidence that ground water is of adequate quality.

ARTICLE 16
AIRPORT REGULATIONS

CHAPTER A  GENERAL

Section 1  Purpose and Intent

These provisions are intended to regulate permitted construction to promote the maximum safety of aircraft arriving at and departing from the publicly-owned airports within PBC; to promote the maximum safety of residents and property in areas surrounding PBC Airports; to promote the full utility of PBC Airports and public use airports; to provide structure height standards for airport hazards and uses within airport primary, horizontal, conical, approach, and transitional surfaces so as to encourage and promote compatible development of land beneath said areas; and to provide administrative procedures for the efficient and uniform regulation of all development proposals within said zones. [Ord. 2017-025]

Section 2  Short Title and Authority

A. This Article shall be known and cited as the “Airport Zoning Ordinance.”
B. This Article is enacted pursuant to the provisions of Art. VIII, § 1(g), Fla. Const., F.S. ch. 125 (1995), F.S. ch. 333 (2016), or as amended. [Ord. 2017-025]

Section 3  Applicability

A. This Article regulates height and land uses around publicly owned airports in PBC. The height standards for structures or obstructions provide maximum height limits and a review procedure to determine if structures or obstructions will have an adverse impact on safe and efficient airspace use. The land use standards provide restrictions and a review procedure within four nautical miles of publicly owned airports to determine if the land use is compatible with normal airport operation and Federal Aviation Administration (FAA) guidelines. The land use standards apply to the most restrictive airport hazard areas and Noise Zones, and limit uses which include, but are not limited to, hazardous material storage, emissions of light or smoke, or uses which attract concentrations of people or birds. [Ord. 2017-025]
B. This Article applies to all land in unincorporated PBC.
C. This Article also applies to all municipalities that may elect to participate through interlocal agreement, pursuant to F.S. ch. 163 and F.S. § 333.03(1)(b)1. [Ord. 2017-025]
D. These regulations supplement other land development regulations in this Code.
E. Where there exists a conflict between any of the regulations or limitations prescribed in this Article and any other regulations applicable to the same area, the more stringent limitation or requirement shall govern and prevail.

Section 4  Definitions and Acronyms

See Art. 1.I, Definitions and Acronyms.

Section 5  Appendices

Maps and related information contained in Appendices 1-15 are incorporated herein by reference and are available for review at the Department of Airports or may be obtained from their web site. [Ord. 2017-025]
CHAPTER B  AIRPORT PROTECTION ZONING REGULATIONS GOVERNING AIRPORT HAZARDS

Section 1  Airspace Height Regulations

A. General
In order to carry out the provisions of this Article, there are hereby created and established certain zones which include all of the applicable land lying beneath the primary, horizontal, conical, approach, and transitional surfaces as they apply to a particular airport. To regulate height, an Airspace Notification Map, Appendix 1, and a procedure to review and permit obstructions has been established. Airport height limitations and the notification procedures established in this Section conform to the standards for determining obstructions to air navigation of F.A.R. 14 CFR 77, § 77.17. [Ord. 2017-025] [Ord. 2019-005]

B. Regulated Obstructions
For purposes of this Section, obstructions include but are not limited to, any existing or proposed permanent or temporary object, natural growth or structures, or adding height to any existing structure and shall include the location of derricks, draglines, cranes, and other boom-equipped machinery. Obstruction does not include any development which does not have the effect of adding height to the land or other structure, such as paving, draining, or roofing. [Ord. 2017-025]

C. Regulated Areas
The various surfaces displayed as Zone 1 and Zone 2 on the PBC “Airspace Notification Map” are defined below. Penetration of one of these zones shall require a technical analysis by FAA and obtaining a Permit for Obstruction from the DOA following a review by the DOA, PZB Department, and other applicable governmental agencies in accordance with this Article. [Ord. 2017-025]

1. Publicly-Owned, Public Use Airports
   a. Zone 1
      That area within the County limits extending outward 20,000 feet from the nearest point of the nearest runway of each County owned and operated airport, excluding heliports, as depicted on the Airspace Notification Map as Zone 1. This zone depicts an imaginary surface extending outward and upward at a slope of 100 to 1 for a horizontal distance of 20,000 feet. [Ord. 2019-005]
   b. Zone 2
      That area within the County outside the limits of Zone 1 as depicted on the Airspace Notification Map. The height for Zone 2 is 200 feet above ground level (AGL). [Ord. 2019-005]
   c. Any construction or alteration of a height greater than an imaginary surface extending outward and upward for a distance of 20,000 feet from the reference point of any terminal navigational aid facility up to a height of 200 feet above ground level.

2. All Heliports/Vertiports
   Any construction or alteration of a height greater than an imaginary surface extending outward and upward from any point of any public or private State licensed Heliport for a distance of 5,000 feet up to a height of 200 feet above ground level. [Ord. 2017-025]

3. Terminal Navigational Aid Notification Areas
   Any construction or alteration within 5,000 feet of any navigational aid facility; and

4. Other Areas
   Any construction or alteration of a height greater than 200 feet above ground level.

D. Airport Zones Established
Primary, Horizontal, Conical, Approach, and Transitional Airport Zones are shown on maps described below. These maps are available online utilizing the County’s myGeoNav application http://maps.co.palm-beach.fl.us/mygeonav/. These maps are also included by reference and attached as Appendices 2-7, available at The Department of Airports. [Ord. 2019-005]
Map A – PBIA (Appendix 2)
Map B – PBC Park Airport (Lantana) (Appendix 3)
Map C – PBC Glades Airport (Pahokee) (Appendix 4)
Map D – Belle Glade Municipal Airport (Appendix 5)
Map E – Palm Beach North County Airport (Appendix 6)
Map F – Boca Raton Airport (Appendix 7)

E. Airport Runway Categories Defined
The size and dimensions of each zone created and established as part of this Section is based upon the category of each runway, according to the type of approach available or planned for that runway. The zones associated with each airport in this Article correspond to the civil airport imaginary surfaces defined in F.A.R. 14 CFR 77, § 77.17, and are contained within the Airport Layout Plan for each airport, available at the
F. Airport Height Limitations

1. General
Where any two limitations in this Article are in conflict, the more stringent applies. Except as otherwise provided in this Section, no obstruction including any structure or object of natural growth, shall be erected, altered, or be maintained without prior approval by DOA or PZB, which is or would be an obstacle to air navigation, as defined in this Article, or of a height greater than: [Ord. 2017-025]

   a. 500 feet above ground level at the site of the object;
   b. 200 feet above ground level or the established airport elevation, whichever is higher. These heights shall be measured within three nautical miles of the established reference point of an airport; and which height increases up to a maximum of 500 feet, at a slope of one foot vertically for every 100 feet horizontally, for a distance of 50,000 feet; or,
   c. Any object within the approach segment, departure area, or any missed approach or circling approach area which is determined by the Director of Airports, or designee, to be a hazard to the safe and efficient use of airspace around an airport. [Ord. 2019-005]

G. Airport Height Zone Definitions and Limitations
A property located in more than one of the described zones is considered to be only in the zone with the more restrictive height limitation. The various zones are hereby established and defined below. These zones are depicted in plan view in the County’s myGeoNav application http://maps.co.palm-beach.fl.us/mygeonav/. General definition and height limitations are described in the Subsections to follow. [Ord. 2019-005]

1. Primary Zone Definition
An area longitudinally centered on a runway, extending 200 feet beyond each end of that runway with the width so specified for each runway for the most precise approach existing or planned for either end of the runway.

   a. Primary Zone Height Limitations
      No structure or obstruction will be permitted within the Primary Zone that is not part of the landing, maneuvering, and taking-off facilities and is of a greater height than the nearest point of the runway centerline.
   b. Primary Zone Width for each Specific Airport
      The specific width of each Primary Zone for each airport is contained within the Airport Layout Plan for each airport, available at the Department of Airports, and provided graphically on the County’s myGeoNav application http://maps.co.palm-beach.fl.us/mygeonav/. [Ord. 2019-005]

2. Horizontal Zone Definition
The area around each airport with an outer boundary the perimeter of which is constructed by swinging arcs of specified radii from the center of each end of the Primary Zone of each airport's runways and connecting adjacent area by lines tangent to those arcs. The radius of the arc specified for each end of a value will be the highest composite value determined for either end of the runway. When a 5,000-foot arc is encompassed by tangents connecting two adjacent 10,000-foot arcs, the 5,000-foot arc shall be disregarded on the construction of the perimeter of the Horizontal Zone.

   a. Horizontal Zone Height Limitations
      Only structures or obstructions for which the FAA has issued a determination of no hazard, will be permitted in the Horizontal Zone. [Ord. 2019-005]
   b. Horizontal Arc Radius for each Specific Airport
      The specific horizontal arc Radius of each airport is contained within the Airport Layout Plan for each airport, available at the Department of Airports, and provided graphically on the County’s myGeoNav application http://maps.co.palm-beach.fl.us/mygeonav/. [Ord. 2019-005]

3. Conical Zone Definition
The area extending outward from the periphery of the Horizontal Zone for a distance of 4,000 feet. The specific Conical Zone distance for each airport is contained within the Airport Layout Plan for each airport, available at the Department of Airports, and provided graphically on the County’s myGeoNav application http://maps.co.palm-beach.fl.us/mygeonav/. [Ord. 2019-005]

   a. Conical Zone Height Limitation
      Only structures or obstructions for which the FAA has issued a determination of no hazard will be permitted in the Conical Zone. [Ord. 2019-005]
4. **Approach Zone Definition**  
An area longitudinally centered on the extended runway centerline and extending outward and upward from each end of the primary zone. An Approach Zone is designated for each runway based upon the type of approach available or planned for that runway end.

   a. **Approach Zone Height Limitations**  
   Only structures or obstructions for which the FAA has issued a determination of no hazard will be permitted in the Approach Zone. [Ord. 2019-005]

   b. **Approach Zone Horizontal Distance for each Specific Airport**  
The specific Approach Zone dimensions for each airport is contained within the Airport Layout Plan for each airport, available at the Department of Airports, and provided graphically on the County’s myGeoNav application http://maps.co.palm-beach.fl.us/mygeonav/. [Ord. 2019-005]

5. **Transitional Zone Definition**  
The area extending outward from the sides of the Primary Zones and Approach Zones connecting them to the Horizontal Zone. Height limits within the Transitional Zone are the same as the Primary Zone or Approach Zone at the boundary line where these Zones meet (i.e., level with the nearest point on the runway centerline) and increase at a rate of one foot vertically for every seven feet horizontally, with the horizontal distance measured at right angles to the runway centerline and extended centerline, until the height matches the height of the Horizontal Zone, the Conical Zone or for a horizontal distance of 5,000 feet from the side of the part of the Precision Approach Zone that extends beyond the Conical Zone.

   a. **Transitional Zone Height Limitation**  
   Only structures or obstructions for which the FAA has issued a determination of no hazard will be permitted within the Transitional Zone. [Ord. 2017-025] [Ord. 2019-005]

6. **Terminal Navigational Aid Obstruction Zone**  
Operation of a Navigational Aid Facility is electromagnetic in nature therefore, objects constructed off of airport property may have an adverse effect on the safe and efficient operation of navigational facilities. A Navigational Aid Obstruction Zone has been established extending outward 3,500 feet from the nearest point of the nearest runway of each County owned and operated airport, excluding heliports, as depicted on the Airspace Notification Map as Zone 1. This zone is shown on the Airspace Notification Map, Appendix 1. [Ord. 2017-025] [Ord. 2019-005]

   a. **Terminal Navigational Aid Obstruction Zone Limitation**  
   No construction or alteration or installation of any electromagnetic device shall be permitted within this Navigation Aid Obstruction Zone without prior technical review by the FAA. If deemed necessary by the results of the FAA review, a Permit for Obstruction must be obtained from DOA following a review by the DOA and PZB. [Ord. 2017-025]

7. **Heliport/Vertiports**  
   a. **Primary Zone Definition**  
   The Primary Zone coincides in size and shape with the designated take-off and landing area of a Heliport/Vertiport.

      1) **Primary Zone Limitation**  
      This primary zone height limitation is described by a horizontal plane at the elevation of the established elevation.

   b. **Approach Zone Definition**  
   The Approach Zone begins at each end of the Heliport/Vertiport Primary Zone with the same width as the Primary Zone and extends outward and upward for a horizontal distance of 4,000 feet where its width is 500 feet.

      1) **Approach Zone Height Limitation**  
      The Approach Zone height limitation is a slope of one foot vertically for every eight feet horizontally.

   c. **Transitional Zone Definition**  
   The Transitional Zone extends outward and upward from the lateral boundaries of the Primary Zone and from the Approach Zone for a distance of 250 feet measured horizontally from the centerline of the Primary and Approach Zones.

      1) **Transitional Zone Height Limitation**  
      The Transitional Zone has a height limitation at a slope of one foot vertically for every two feet horizontally.
H. Airspace Height Review

All new construction, reconstruction or alteration that adds height to any obstruction within areas shown on the "Airspace Notification Map," Appendix 1, shall be reviewed for compliance with the standards of this Section. [Ord. 2017-025]

1. General

No Permit for Obstruction will be issued if all FAA and DOA comments are not addressed to the satisfaction of DOA, PZB, and County Attorney. No development permit application shall be issued if the proposed construction or alteration is found to violate the provisions of this Article, or is determined a hazard by the Federal Aviation Regulations Part 77 or other applicable Federal or State rules or regulations. [Ord. 2017-025] [Ord. 2019-005]

a. Exemption

A Permit is not required for existing structures that received construction permits from the Federal Communications Commission for structures exceeding federal obstruction standards before May 20, 1975; a permit is not required for any necessary replacement or repairs to such existing structures if the height and location are unchanged. [Ord. 2019-005]

2. Review Procedures

An application for the construction, reconstruction, or alteration of any obstruction must be reviewed in accordance with the development review procedures in Art. 2, Application Processes and Procedures, prior to certification or approval of an application by DRO or issuance of a building permit for a permanent or temporary obstruction located within areas Regulated by this Article. [Ord. 2017-025] [Ord. 2019-005]

a. FAA Review

1) The applicant must utilize the FAA’s Notice Criteria Tool found on the FAA’s Obstruction Evaluation/Airport Airspace Analysis website at https://oeaaa.faa.gov/ and submit the results to DOA. This tool will inform the applicant that review by the FAA is required if the proposed obstruction represented in the application may exceed: [Ord. 2017-025] [Ord. 2019-005]

a) The structure will exceed 200 feet above ground level; [Ord. 2019-005]

b) The structure will be in proximity to an airport and will exceed the slope ratio of 100:1; [Ord. 2019-005]

c) The structure involves construction of a traverseway (i.e. highway, railroad, waterway, etc.) and once adjusted upward with the appropriate vertical distance would exceed a standard of Part 77.9(a) or (b); [Ord. 2019-005]

d) The structure will emit frequencies, and does not meet the conditions of the FAA Co-location Policy; [Ord. 2019-005]

e) The structure will be in an instrument approach area and might exceed F.A.R. 14 CFR 77, Subpart C; [Ord. 2019-005]

f) The proposed structure will be in proximity to a navigation facility and may impact the assurance of navigation signal reception; [Ord. 2019-005]

g) The structure will be on an airport or heliport; or, [Ord. 2019-005]

h) A filing has been requested by the FAA. [Ord. 2019-005]

2) If the results of the Notice Criteria Tool indicate that the applicant must file, the FAA must review and issue a determination of the proposal's effect on navigable airspace where such notification under F.A.R. 14 CFR 77 is required. PZB shall suspend any review of any development permit application process until FAA findings of aeronautical affect are determined. [Ord. 2019-005]

a) Responsibility of the Applicant

(2) When the results are received, the Applicant shall submit in person or forward by Certified Mail (Return Receipt Requested) to the DOA the FAA’s determination of aeronautical affect, including a valid aeronautical study number and a copy of the original electronic submittal of FAA Form 7460-1. [Ord. 2017-025] [Ord. 2019-005]

b. DOA Review

1) No application for development shall be approved solely on the basis that the FAA has issued a determination of no hazard to air navigation under a valid aeronautical study. Following receipt of the FAA determination, if required, the DOA shall consider the following criteria when determining whether to recommend certification or approval of a development application with or without conditions of approval; or recommend issuance or denial of a building permit with or without conditions. [Ord. 2017-025] [Ord. 2019-005]

a) The safety of persons on the ground and in the air; [Ord. 2017-025]
b) The safe and efficient use of navigable airspace; [Ord. 2017-025]  
c) The nature of the terrain and height of existing structures: [Ord. 2017-025]  
d) The effect of the construction or alteration on the state licensing standards for a public-use airport contained in F.S. ch. 333 and rules adopted thereunder; [Ord. 2017-025]  
e) The character of existing and planned flight operations and developments at public-use airports; [Ord. 2017-025]  
f) Federal airways, visual flight rules, flyways, and corridors, and instrument approaches as designated by the FAA; [Ord. 2017-025]  
g) The effect of the construction or alteration of the proposed structure on the minimum descent altitude or the decision height at the affected airport; [Ord. 2017-025]  
h) The cumulative effects on navigable airspace of all existing structures and all other known proposed structures in the area; and, [Ord. 2017-025]  
i) Any additional code requirements pertinent to evaluate and protect airspace and airport operations. [Ord. 2019-005]

2) FDOT Review  
Following receipt of a complete application indicating that the proposed construction or alteration could be an obstruction, the DOA shall provide a copy of the application to the FDOT aviation office for their review and evaluation pursuant to F.S. § 333.025. [Ord. 2019-005]  

3) Structure(s) Not Exceeding Obstruction Standards or Other Provisions  
DOA shall review the FAA’s determination issued in response to the applicant’s FAA Form 7460-1, any comments received from FDOT and the permit application. If the proposed construction or alteration is not a hazard, the DOA shall recommend certification or approval of an application by the DRO with or without conditions of approval or issuance of a building permit with or without conditions so that the proposed structure may be erected in accordance with permitting requirements of PZB. PZB may certify the development application or issue a building permit, as applicable. The applicant shall present a copy of the permit to PZB with the development application or building permit application. [Ord. 2017-025] [Ord. 2019-005]  

4) Structure(s) Exceeding Obstruction Standards or Other Provisions  
DOA shall review the FAA’s determination issued in response to the applicant’s FAA Form 7460-1, any comments received by FDOT and the permit application. If the proposed obstruction is a hazard, then the DOA shall deny the permit. The notice shall state the reasons for denial and inform the applicant that they may appeal the decision pursuant to Art. 16.C.2, Nonconforming Uses. [Ord. 2017-025] [Ord. 2019-005]

c. Building Permit Requirement  
The applicant shall present a copy of the Permit, along with all Development Order comments and conditions of approval, to the Building Director in order to ensure that any conditions are adequately addressed prior to the issuance of a building permit, including obstruction lighting and marking conditions, if applicable. [Ord. 2017-025] [Ord. 2019-005]  

d. Obstruction Marking and Lighting  
The owner shall mark and light the structure in accordance with the provisions of F.S. ch. 333; Rules of Florida Department of Transportation, Chapter 14-60, and the FAA Advisory Circular 70/7460-1L, Obstruction Marking and Lighting, as may be amended from time to time. The permit may be conditioned to require the applicant to mark and light the structure, at applicant’s own expense, or to allow DOA to install, operate, and maintain at its own expense, such markers and lights as may be necessary to indicate to pilots the presence of an airspace obstruction if warranted. [Ord. 2019-005]  

(This space intentionally left blank)
CHAPTER C  AIRPORT LAND USE COMPATIBILITY ZONING REGULATIONS

Section 1  Airport Land Use Regulations

A. General
In order to carry out the provisions of this Article, there are hereby created and established certain zones, which include all the land lying beneath the Runway Protection Zone (RPZ) and within Airport Land Use Noise Zone(s) (ALUNZ), as they apply to a particular airport, and within Zone 3. All areas defined as the RPZ and areas displayed as ALUNZ in Appendices 2 through 7 and 9 through 14 are subject to review and technical analysis by DOA, and other applicable governmental agencies, in consultation with PZB, in accordance with this Article. [Ord. 2017-025] [Ord. 2019-005]

To regulate land uses within these zones, an Off-Airport Land Use Compatibility Schedule Appendix 8, maps, and review procedures have been established.

B. Regulated Land Use
Notwithstanding any other provisions of this Article, no use may be made of land or water within the RPZ in such manner as to interfere with the operation of an airborne aircraft. The Off-Airport Land Use Compatibility Schedule, Appendix 8, shall be used to determine additional land development requirements for uses identified in Art. 4, Use Regulations. Those activities and land uses not specifically listed in the Airport Land Use Compatibility Schedule are permitted or restricted based on their similarity to noise tolerance and compatibility with normal airport operations as exhibited by the activities and land uses which are listed in the Schedule.

1. Construction, defined
For purposes of this Section, construction includes but is not limited to creating new structures, making alterations or repairs and additions to any existing building or structure, or moving or relocating a building(s) or structure(s) within a Regulated Area. Construction does not include paving, underground utility infrastructure, or similar types of improvements. [Ord. 2017-025] [Ord. 2019-005]

2. Review Procedure for Regulated Land Use
All new construction or reconstruction for temporary or permanent uses shall be reviewed for compliance with the standards of this Section in accordance with the development review procedures in Art. 2, Application Processes and Procedures, or at the time of application for a building permit. Prior to issuance of a development order or a building permit, the DOA, in consultation with PZB, shall review the application for compliance with this Article. [Ord. 2017-025]

C. Regulated Areas
To regulate land uses within the RPZ and ALUNZ, an Off-Airport Land Use Compatibility Schedule, maps, and review procedures have been established. Only the portion of the lot falling within the RPZ or ALUNZ shall be subject to the provisions of this Article. The Off-Airport Land Use Compatibility Schedule, Appendix 8, shall be used to determine compatibility of land use with airport operations within these zones. [Ord. 2017-025]

1. Runway Protection Zone (RPZ)
The RPZ includes all land lying beneath the defined RPZ, as shown on the applicable Airport Zoning Maps, on the County’s myGeoNav application http://maps.co.palm-beach.fl.us/mygeonav/, or on the Airport Layout Plan for all County-owned airports in PBC, available at the Department of Airports. [Ord. 2019-005]

2. Airport Land Use Noise Zones (ALUNZ)
The ALUNZ include all land area lying within the defined ALUNZ as shown on the applicable Airport Land Use Zone Maps, on the County’s myGeoNav application http://maps.co.palm-beach.fl.us/mygeonav/ in for all airports in PBC. [Ord. 2019-005]

3. Zone 3
That area within the County limits extending outward 10,000 feet from the nearest point of the nearest runway for each County owned and operated airport, excluding heliports, as depicted on the Airspace Notification Map as Zone 3. [Ord. 2019-005]

D. Airport Land Use Noise Zone(s) Established
All land uses shall be permitted within ALUNZ as provided in the Off-Airport Land Use Compatibility Schedule, Appendix 8.

1. Airport Land Use Noise Zones for Airports which have completed F.A.R. Part 150 Noise and Land Use Compatibility Studies
Several airports within PBC have completed a noise study in accordance with F.A.R. 14 CFR 150. Land uses within the area contiguous to these airports, within an area defined as the outer noise contour, or
equivalent thereof shall be consistent with the type of use listed in Airport Land Use Compatibility Schedule. [Ord. 2017-025]

a. Palm Beach International Airport (PBIA)

The Palm Beach International ALUNZ has been established and is incorporated herein as Appendix 9. This Zone is created based on yearly averaged, 24-hour day/night average noise level projections arising from aircraft flight operations at PBIA.

1) Palm Beach International Airport Land Use Noise Zone (ALUNZ) Define

That area commencing at the outermost boundary of the airport and extending outward therefrom to a boundary indicated on the Palm Beach International Airport Land Use Noise Zone Map. The boundary of the zone approximates a projected yearly averaged, 24-hour day/night average noise level contour of 65 Ldn. [Ord. 2017-025]

b. Boca Raton Airport

The Boca Raton ALUNZ has been established and is incorporated herein as Appendix 10. This Zone is created based on projections of aircraft flight operations at Boca Raton Airport.

1) Boca Raton Airport Land Use Noise Zone (ALUNZ) Defined

That area commencing at the outermost boundary of the airport and extending outward there from to a boundary indicated on the Boca Raton Airport Land Use Noise Zone Map. The outer boundary of the zone approximates a projected yearly averaged, 24-hour day/night average noise level contour of 60 Ldn or greater.

2. ALUNZs for Airports which have not completed an F.A.R. Part 150 Noise and Land Use Compatibility Study

An overlay Land Use Noise Zone has been established for the civil airports which have not completed an F.A.R. Part 150 Noise and Land Use Compatibility Study. This Zone is created as an area beneath the standard VFR traffic pattern and buffer airspace established in FAA Order 7400.2D, Procedures for Handling Airspace Matters, which underlies the majority of recurring aircraft flight paths. Land Uses within this zone may be subject to aircraft noise that may be considered objectionable.

a. Land Use Noise Zone(s) Defined for PBC Park Airport (Lantana), PBC Glades Airport (Pahokee), Belle Glade Municipal Airport, and Palm Beach North County Airport

Land Use Noise Zones for these airports are established as the land lying within parallel lines 9,108 feet in both directions from the approach and departure end of each runway, the runway centerline, and all airspace in between. These zones are established and attached as Appendices 11 through 14.

E. General Land Use Regulations – Off-Airport Land Use Compatibility Schedule (Appendix 8)

1. The Off-Airport Land Use Compatibility Schedule (Appendix 8)

Lists land uses as defined below:

a. Land Uses Compatible without Restriction ("P")

Uses noted with a "P" may develop pursuant to the development review procedures in the Use Matrices in Art. 4, Use Regulations, Art. 3.B, Overlays, and Art. 2, Application Processes and Procedures, and are not required to comply with the conditional requirements set forth in Appendix 8, The Off-Airport Land Use Compatibility Schedule. [Ord. 2017-025]

b. Land Uses Qualified As Compatible Only If In Compliance With Conditional Requirements ("Q")

Uses noted with a "Q" may develop pursuant to the development review procedures in the Use Matrices in Art. 4, Use Regulations, Art. 3.B, Overlays, and Art. 2, Application Processes and Procedures, if regulated and constructed in accordance with the conditional notes in Appendix 8. [Ord. 2006-036] [Ord. 2017-025]

c. Incompatible Land Uses ("N")

Uses noted as an "N" are considered to be incompatible in the Regulated Areas. These uses shall not be allowed in the Runway Protect Zone (RPZ) and variance relief is not available. [Ord. 2017-025]

2. Prohibited Land Uses

a. In no case shall a new Limited or General Day Care, School – Elementary or Secondary, or College or University, with the exception of aviation school facilities, be permitted within an area contiguous to the airport measuring ½ the length of the longest runway on either side of and at the end of each runway centerline. [Ord. 2011-016] [Ord. 2017-025] [Ord. 2019-005]

1) Exemption

For Palm Beach International Airport (PBIA) and Boca Raton Airport that have completed Federal Aviation Regulation 14 CFR Part 150 Noise and Land Use Compatibility Studies, educational land uses within regulated areas defined in Art. 16.C.1.D.1.a, Palm Beach
International Airport (PBIA) and Art. 16.C.1.D.1.b, Boca Raton Airport “Airport Land Use Noise Zones” shall meet the standards set forth in the study or be compliant with 14 CFR Appendix A to Part 150 [Ord. 2019-005]

2) Nothing in subsection a. above shall be construed to require the removal, alteration, sound conditioning, or other change, or to interfere with the continued use or expansion to contiguous properties of any public or private educational structure in existence, or real property in use, on November 1, 1996. Construction of new education structures shall meet the provisions of Art. 16.B.1.H, Airspace Height Review, and the provision of sound insulation materials in accordance with established architectural and acoustical principles as contained in document DOT/FAA/PP-92-5 (or later version), Guidelines for the Sound Insulation of Residences Exposed to Aircraft Operations, is encouraged.

3) The language in subsection a. above shall not be construed to require the removal, alteration, sound conditioning, or other change, or to interfere with the continued use or expansion of any Limited or General Day Care use in existence, or real property in use, or with a valid development order prior the effective date of this Ordinance. Expansion or alterations of a Day Care located within the runway area that represents an increase in the number of occupants shall be prohibited. [Ord. 2011-016]

   b. In no case shall new residential construction be permitted within an area contiguous to the airport measuring ½ the length of the longest runway on either side of and at the end of each runway centerline unless it meets the conditional notes in the Off-Airport Land Use Compatibility Schedule, Appendix 8. This area is shown as the “New Residential Construction Limit” on Appendices 10-14.

1) Exemption

   For Palm Beach International Airport (PBIA) and Boca Raton Airport that have completed Federal Aviation Regulation 14 CFR Part 150 Noise and Land Use Compatibility Studies, residential land uses within regulated areas defined in Art. 16.C.1.D.1.a, Palm Beach International Airport (PBIA) and Art. 16.C.1.D.1.b, Boca Raton Airport “Airport Land Use Noise Zones” shall meet the standards set forth in the study or be compliant with 14 CFR Appendix A to Part 150. [Ord. 2019-005]

   c. In no case shall a new Landfill be permitted, or an existing Landfill expanded, within 10,000 feet from the nearest point of any Airport runway used by only turbine aircraft; within 5,000 feet from the nearest point of any Airport runway used by only nonturbine aircraft; or within the lateral limits of the civil airport imaginary surfaces. [Ord. 2017-025]

3. Additional Use Regulations

   In addition to the requirements contained in the Off-Airport Land Use Compatibility Schedule, Appendix 8, all uses within Regulated Areas shall comply with the following provisions: [Ord. 2019-005]

   a. Lights and Illuminations

      All lights or illumination used in conjunction with streets, parking, signs, or use of land and structures shall be arranged and operated in such manner that is not misleading or dangerous to aircraft operating from or to a public airport or in vicinity thereof.

   b. Electronic Devices

      No application, use, or operations of any type shall produce electronic interference with navigation signals or radio communication between aircraft; the airport tower, or other air traffic control facility.

   c. Obscuration

      No operations of any type shall produce smoke, glare, or other obscuration.

   d. Bird Concentrations

      No use of any type shall be permitted that attract or sustain hazardous bird movements, feeding, water, or roosting areas into or across an airport's runways' approach and departure pattern.

   e. Disclosure

      The owner of any new building or structure or any existing building or structure which is substantially repaired, reconstructed, or altered, as provided in Art. 16, Airport Regulations, proposed to be located within regulated areas shall provide disclosure to all prospective purchasers or tenants of such building or structure that the building or structure is located within the Land Use Compatibility Noise Zone and that aircraft noise may be objectionable.

F. Review Procedure for Airport Land Use Noise Zones (ALUNZ)

   All new construction or reconstruction for temporary or permanent structures within ALUNZ shall be reviewed for compliance with the standards of this Section. Prior to acceptance of a development order or issuance of a building permit, the DOA in consultation with PZB shall review the application for compliance with this Article. [Ord. 2017-025]
1. Noise Level Reduction (NLR) Requirements
   If a proposed land use within an Airport Land Use Noise Zone is designated generally compatible (Q), or incompatible (N), then measures to achieve 30 dB NLR shall be incorporated into the regulated use.
   a. Exemptions
      Land Uses within regulated areas defined in Art. 16.C.1.D.2.a, Land Use Noise Zone(s) Defined for PBC Park Airport (Lantana), PBC Glades Airport (Pahokee), Belle Glade Municipal Airport, and Palm Beach North County Airport.
   b. Use and Occupancy
      Buildings or structures supporting a legal use(s) which existed prior to (the effective date of this Article), may continue to support the existing use or occupancy provided such continued use does not jeopardize life or health.
   c. Relocated Buildings
      Buildings or structures moved into a RPZ or ALUNZ shall comply with the height and noise level reduction provisions of this Article, as applicable.
   d. Proposed or Newly Constructed Buildings
      Valid permits to construct a building, submitted to the Building Division of PZB prior to June 16, 1992, shall not be required to comply with the provisions of Art. 16, Airport Regulations, as long as the building permit has not been amended or expired. [Ord. 2017-025]
   e. Design Requirements
      The NLR requirements of the Off-Airport Land Use Compatibility Schedule, Appendix 8, may be achieved by any suitable combination of building design, choice of building materials, and construction techniques in accordance with established architectural and acoustical principles as contained in DOT document DOT/FAA/PP-92-5, Guidelines for the Sound Insulation of Residences Exposed to Aircraft Operations. This document is on file at the offices of the DOA and PZB. The noise level reduction requirements shall apply to all occupied rooms having one or more exterior walls or ceilings, when furnished in accordance with the intended final usage of the room. [Ord. 2017-025]

Section 2  Nonconforming Uses

Uses nonconforming to the Airport Regulations shall be administered in accordance with the provisions identified within Art. 16, Airport Regulations and Art. 1.F, Nonconformities. [Ord. 2017-025]

Section 3  Administration

A. This Article of the ULDC shall be interpreted by the Director of Airports. DOA, in consultation with the PZB, shall administer the review of development applications for compliance with this Article within the territorial limits over which PBC has jurisdiction. DOA by Interlocal Agreement with any jurisdiction which has permitting authority may administer the review of development applications for compliance with this Article within the territorial limits of the municipality. If a Permit for Obstruction is required, then the DOA may administer review with the FAA. Fees shall be established by the DOA and PZB to administer this Article. [Ord. 2008-003] [Ord. 2017-025] [Ord. 2019-005]

B. In the event that any violation of the requirements of this Article are found, the Director of Code Enforcement shall give written notice to the property owner. Such notice shall indicate the nature of the violation and the necessary action to correct or abate the violation. A copy of said notice shall be sent to the Code Enforcement Board and DOA. PZB shall require work to stop and may take any or all other action necessary to correct violations and obtain compliance with all the provisions of this Article. [Ord. 2017-025] [Ord. 2019-005]

C. The DOA shall notify the Executive Director of PZB of all amendments to the airport master plan(s), or other regulations that affect the definitions or height limitations of the zones established herein. [Ord. 2017-025]

D. Airport signage shall not be subject to the requirements of Art. 8, Signage of the ULDC. Proposed signage shall be approved or amended in conjunction with the Airport master plan. [Ord. 2008-003] [Ord. 2017-025]

Section 4  Enforcement

A. Non-compliance
   Failure to comply with the requirements of this Article or any permit or Approval granted or authorized hereunder shall constitute a violation of this code. PZB or DOA may issue a Cease and Desist Order or withhold a Certificate of Occupancy until the provisions of this Article have been met. PBC may subject the
owner of the premises to the violation and enforcement provisions in F.S. § 333.07, and F.S. § 333.13, as may be amended from time to time, or may pursue any other remedy available at law, in order to fully effectuate the purposes of this Ordinance. Each violation of this Ordinance or of any regulation, order, or ruling promulgated herein shall be considered a separate offense and enforced in accordance with the provisions of Art. 10, Enforcement. [Ord. 2017-025] [Ord. 2019-005]

Section 5  Appeals

A.  Hearing Officers, as established in Art. 2.G.3.G. Hearing Officers, are hereby authorized to hear and decide appeals of final decisions by the DOA. [Ord. 2017-025]

B.  An applicant shall file an appeal with DOA within 20 working days of a final decision by the DOA. The appeal must state with specificity the reasons for the appeal and shall contain such data and documentation upon which the applicant seeks to rely. The DOA, by Resolution of the BCC, may establish a reasonable fee to be paid by the applicant upon filing an appeal. This fee shall not exceed the cost to the County in processing the appeal. [Ord. 2017-025]

C.  The DOA shall schedule a hearing before the Hearing Officer no later than 90 working days after an appeal has been filed. The DOA shall notify the applicant of the hearing date at least 15 working days in advance of the hearing and invite the applicant or the applicant’s representative to attend the hearing. Any of the time limitations set forth in this paragraph may be waived upon mutual agreement of the DOA and the party filing the appeal. [Ord. 2017-025]

D.  An appeal shall stay all proceedings in the underlying action appealed from, unless the DOA certifies that a stay would, in its opinion, cause imminent peril to life or property. In such cases, proceedings may not be stayed except by order of the BCC for good cause shown. [Ord. 2017-025]

E.  At the hearing, the Hearing Officer shall provide the applicant and the DOA an opportunity to present testimony and evidence, provided such information was part of the review before the DOA. The Hearing Officer shall affirm, reverse, or modify the final decision of the DOA in conformity with this Chapter. The Hearing Officer shall affirm the decision of the DOA if there is substantial competent evidence in the record that the DOA properly applied the standards in this Chapter. [Ord. 2017-025]

F.  Any aggrieved party, including PBC, may appeal an order of the Hearing Officer to the Fifteenth Judicial Circuit Court of PBC. Such appeal shall not be a hearing de novo, but shall be a petition for Writ of Certiorari and the Court shall be limited to appellate review of the record created before the Hearing Officer. PBC may assess a reasonable fee for the preparation of the record to be paid by the Petitioner in accordance with F.S. § 119.07, as amended from time to time. [Ord. 2017-025]

ARTICLE 18
FLOOD DAMAGE PREVENTION

CHAPTER A  ADMINISTRATION, PERMITTING AND ENFORCEMENT

Section 1  General

A. Title
These regulations shall be known as the Flood Damage Prevention Ordinance of PBC, Florida.

B. Authority
Chapter 125, Florida Statutes, authorizes the legislative and governing body of PBC, Florida, the power to establish and administer programs of flood control; and the BCC of PBC, Florida, has the responsibility to adopt regulations designed to promote the public health, safety and general welfare of its citizens.

C. Scope
The provisions of this Article shall apply, within the limits of PBC’s jurisdictional authority, to all Development that is wholly within or partially within any Special Flood Hazard Area, as defined in Art. 1, including but not limited to: the subdivision of land; filling, grading, and other site improvements and utility installations; alteration, remodeling, enlargement, improvement, replacement, repair, relocation or demolition of Buildings, Structures and facilities that are exempt from the Florida Building Code, as listed in Art. 18.A.4.C; placement, installation or replacement of Manufactured Homes and Manufactured Buildings; installation or replacement of tanks; placement of Recreational Vehicle parking pads; installation of swimming pools; and any other Development.

D. Intent
The purposes of this Article and the flood load and flood resistant construction requirements of the Florida Building Code are to establish minimum requirements to safeguard the public health, safety and general welfare and to minimize public and private losses due to flooding through regulation of Development in Special Flood Hazard Areas to:
1. Minimize unnecessary disruption of commerce, access and public service during times of flooding;
2. Require the use of appropriate construction practices in order to prevent or minimize future flood damage;
3. Manage filling, grading, dredging, mining, paving, excavation, drilling operations, storage of equipment or materials, and other Development which may increase flood damage or erosion potential;
4. Manage the alteration of Special Flood Hazard Areas, watercourses, and shorelines to minimize the adverse impact of Development on the natural and beneficial functions of the floodplain;
5. Minimize damage to public and private facilities and utilities;
6. Help maintain a stable tax base by providing for the sound use and Development of Special Flood Hazard Areas;
7. Minimize the need for future expenditure of public funds for flood control projects and response to and recovery from flood events; and
8. Meet the requirements of the National Flood Insurance Program for community participation, as set forth in the Title 44 Code of Federal Regulations, Section 59.22.

E. Coordination with the Florida Building Code
This Article is intended to be administered and enforced in conjunction with the Florida Building Code. Where cited, ASCE 24 refers to the edition of the standard that is referenced by the Florida Building Code.

F. Warning
The degree of flood protection required by this Article and the Florida Building Code, as amended by PBC, is considered the minimum reasonable for regulatory purposes and is based on scientific and engineering considerations. Larger floods can and will occur. Flood heights may be increased by man made or natural causes. This Article does not imply that land outside of mapped Special Flood Hazard Areas, or that uses permitted within such Special Flood Hazard Areas, will be free from flooding or flood damage. The Special Flood Hazard Areas and Base Flood Elevations contained in the Flood Insurance Study and shown on Flood Insurance Rate Maps and the requirements of Title 44 Code of Federal Regulations, Sections 59 and 60, may be revised by the Federal Emergency Management Agency, requiring PBC to revise these regulations to remain eligible for participation in the National Flood Insurance Program.
Insurance Program. No guarantee of vested use, existing use, or future use is implied or expressed by compliance with this Article.

G. Disclaimer of Liability
This Article shall not create liability on the part of the PBC BCC or by any officer or employee hereof for any flood damage that results from reliance on this Article or any administrative decision lawfully made thereunder.

Section 2 Applicability

A. General
Where there is a conflict between a general requirement and a specific requirement, the specific requirement shall govern.

B. Areas to which this Article Applies
This Article shall apply to all Flood Hazard Areas and Special Flood Hazard Areas in unincorporated PBC, as defined in Art. 1 and established in Art.18.A.2.C below.

C. Special Flood Hazard Areas
The United States Department of Housing and Urban Development, Flood Insurance Study for PBC, Florida, Unincorporated Areas dated October 5, 2017 and all subsequent amendments and revisions to such studies, and the accompanying Flood Insurance Rates Maps and all subsequent amendments and revisions to such maps, shall serve as the minimum basis for establishing Flood Hazard Areas and Special Flood Hazard Areas, including those areas developed into lots or Building sites without minimum floor elevations engineered from a master stormwater drainage network. Studies and maps that establish Flood Hazard Areas are on file at the PBC Department of Planning, Zoning and Building located at 2300 North Jog Road, West Palm Beach, Florida 33411.

D. Submission of Additional Data to Establish Special Flood Hazard Areas
The Floodplain Administrator may require the submission of additional data to establish Special Flood Hazard Areas and Base Flood Elevations, pursuant to Art. 18.A.5. Where field-surveyed topography prepared by a Florida-licensed professional surveyor or digital topography accepted by PBC indicates that ground elevations are either:
1. at or below the closest applicable Base Flood Elevation, even in areas not delineated as a Special Flood Hazard Area on a FIRM, the area shall be considered as Special Flood Hazard Area and subject to the requirements of this Article and, as applicable, the requirements of the Florida Building Code; or
2. above the closest applicable Base Flood Elevation, the area shall be regulated as Special Flood Hazard Area unless the applicant obtains a Letter of Map Change that removes the area from the Special Flood Hazard Area.

E. Other Laws
The provisions of this Article shall not be deemed to nullify any provisions of local, state or federal law.

F. Abrogation and Greater Restrictions
This Article supersedes any ordinance in effect for management of Development in Special Flood Hazard Areas. However, it is not intended to repeal or abrogate any existing ordinances including but not limited to land development regulations, zoning ordinances, stormwater management regulations, or the Florida Building Code. In the event of a conflict between this Article and any other regulations, the more restrictive shall govern. This Article shall not impair any deed restriction, covenant or easement, but any land that is subject to such interests shall also be governed by this Article.

G. Interpretation
In the interpretation and application of this Article, all provisions shall be:
1. considered as minimum requirements;
2. liberally construed in favor of the governing body; and
3. deemed neither to limit nor repeal any other powers granted under state statutes.

Section 3 Duties and Powers of the Floodplain Administrator and the Flood Damage Prevention Board

A. Designation
1. The Building Official is designated as the Floodplain Administrator. The Floodplain Administrator may delegate performance of certain duties to other employees.
2. The BCC of PBC hereby designates the 11 members of the Construction Board of Adjustment and Appeals to act as the Flood Damage Prevention Board. The Flood Damage Prevention Board shall
hear and decide Appeals when it is alleged an error in any requirement, decision, or determination is made by the Floodplain Administrator in the enforcement or administration of this Article and shall decide any Variance request following procedures in Art.18.A.7.

B. General
The Floodplain Administrator is authorized and directed to administer and enforce the provisions of this Article. The Floodplain Administrator shall have the authority to render interpretations of this Article consistent with the intent and purpose of this Article, and may establish policies and procedures in order to clarify the application of its provisions. Such interpretations, policies, and procedures shall not have the effect of waiving requirements specifically provided in this Article without the granting of a Variance by the Flood Damage Prevention Board, pursuant to Art. 18.A.7.

C. Applications and Permits
The Floodplain Administrator, in coordination with other pertinent offices of PBC, shall:
1. Review applications and plans to determine whether proposed new Development will be located in Special Flood Hazard Areas;
2. Review applications for modification of any existing Development in Special Flood Hazard Areas for compliance with the requirements of this Article;
3. Interpret Special Flood Hazard Area boundaries where such interpretation is necessary to determine the exact location of boundaries; a person contesting the determination shall have the opportunity to Appeal the interpretation;
4. Provide available flood elevation and flood hazard information;
5. Determine whether additional flood hazard data shall be obtained from other sources or shall be developed by an applicant;
6. Review applications to determine whether proposed Development will be reasonably safe from flooding;
7. Issue floodplain Development permits or approvals for Development other than Buildings and Structures that are subject to the Florida Building Code, including Buildings, Structures and facilities exempt from the Florida Building Code, as listed in Art. 18.A.4.C, when compliance with this Article is demonstrated, or disapprove the same in the event of noncompliance; and
8. Coordinate with and provide comments to assure that applications, plan reviews, and inspections for Buildings and Structures in Special Flood Hazard Areas comply with the applicable provisions of this Article.

D. Substantial Improvement and Substantial Damage Determinations
For applications for building permits to improve Buildings and Structures, including alterations, relocation, enlargement, replacement, repair, change of occupancy, additions, rehabilitations, renovations, Substantial Improvements, repairs of Substantial Damage, and any other improvement of or work on such Buildings and Structures, the Floodplain Administrator, acting as the Building Official, shall:
1. Estimate the Market Value, or require the applicant to obtain an appraisal of the Market Value prepared by a qualified independent appraiser, of the Building or Structure before the Start of Construction of the proposed work; in the case of repair, the Market Value of the Building or Structure shall be the Market Value before the damage occurred and before any repairs are made;
2. Compare the cost to perform the improvement, the cost to repair a damaged Building to its pre-damaged condition, or the combined costs of improvements and repairs, if applicable, to the Market Value of the Building or Structure;
3. Determine and document whether the proposed work constitutes Substantial Improvement or repair of Substantial Damage; the determination requires evaluation of previous permits issued for improvements and repairs, as specified in the definition of “Substantial Improvement”; for proposed work to repair damage caused by flooding, the determination requires evaluation of previous permits issued to repair flood-related damage, as specified in the definition of “Substantial Damage”; and
4. Notify the applicant if it is determined that the work constitutes Substantial Improvement or repair of Substantial Damage and that compliance with the flood resistant construction requirements of the Florida Building Code and this Article is required.

E. Modifications of the Strict Application of the Requirements of the Florida Building Code
The Floodplain Administrator shall review requests submitted to the Building Official that seek approval to modify the strict application of the flood load and flood resistant construction requirements of the Florida Building Code to determine whether such requests require the granting of a Variance pursuant to Art. 18.A.7.

F. Notices and Orders
The Floodplain Administrator shall coordinate with appropriate local agencies for the issuance of all necessary notices or orders to ensure compliance with this Article.
G. Inspections
The Floodplain Administrator or designee shall make the required inspections, as specified in Art. 18.A.6, for Development that is exempt from the Florida Building Code, as listed in Art. 18.A.4.C. The Floodplain Administrator or designee shall inspect Special Flood Hazard Areas to determine if Development is undertaken without issuance of a permit.

H. Other Duties of the Floodplain Administrator
The Floodplain Administrator shall have other duties, including but not limited to:
1. Establish procedures for administering and documenting determinations of Substantial Improvement and Substantial Damage made pursuant to Art. 18.A.3.D;
2. Require that applicants proposing Alteration of a Watercourse notify adjacent communities and the Florida Division of Emergency Management, State Floodplain Management Office, and submit copies of such notifications to the Federal Emergency Management Agency (FEMA);
3. Require applicants who submit hydrologic and hydraulic engineering analyses in support of permit applications to submit to FEMA the data and information necessary to maintain the Flood Insurance Rate Maps if the analyses propose to change Base Flood Elevations, Special Flood Hazard Area boundaries, or Floodway designations; such submissions shall be made within six months of such data becoming available;
4. Review required design certifications and documentation of elevations specified by this Article and the Florida Building Code to determine that such certifications and documentations are complete;
5. Notify FEMA when the boundaries of unincorporated PBC are modified; and
6. Advise applicants for New Buildings and Structures, including Substantial Improvements, that are located in any unit of the Coastal Barrier Resources System established by the Coastal Barrier Resources Act (Public Law 97-348) and the Coastal Barrier Improvement Act of 1990 (Public Law 101-591) that federal flood insurance is not available on such construction; areas subject to this limitation are identified on Flood Insurance Rate Maps as “Coastal Barrier Resource System Areas” and “Otherwise Protected Areas.”

I. Floodplain Management Records
Regardless of any limitation on the period required for retention of public records, the Floodplain Administrator shall maintain and permanently keep and make available for public inspection all records that are necessary for the administration of this Article and the flood resistant construction requirements of the Florida Building Code, including Flood Insurance Rate Maps; Letters of Map Change; records of issuance of permits and denial of permits; determinations of whether proposed work constitutes Substantial Improvement or repair of Substantial Damage; required design certifications and documentation of elevations specified by the Florida Building Code and this Article; notifications to adjacent communities, FEMA, and the state related to alterations of watercourses; assurances that the flood-carrying capacity of altered watercourses will be maintained; documentation related to Appeals and Variances, including justification for issuance or denial; and records of enforcement actions taken pursuant to this Article and the flood resistant construction requirements of the Florida Building Code. These records are available for public inspection at the PBC Department of Planning, Zoning and Building at 2300 North Jog Road, West Palm Beach, FL 33411.

Section 4 Permits

A. Permits Required
Any owner or owner’s authorized agent (hereinafter “applicant”) who intends to undertake any Development activity within the scope of this Article, including Buildings, Structures and facilities exempt from the Florida Building Code, as listed in Art. 18.A.4.C, which is wholly within or partially within any Special Flood Hazard Area shall first make application to the Floodplain Administrator and the Building Official, if applicable, and shall obtain the required permit(s) and approval(s). No such permit or approval shall be issued until compliance with the requirements of this Article has been satisfied.

B. Floodplain Development Permits or Approvals
Floodplain Development Permits or Approvals shall be issued pursuant to this Article for any Development activities exempt from the Florida Building Code, as listed in Art. 18.A.4.C. Depending on the nature and extent of proposed Development that includes a Building or Structure, the Floodplain Administrator may determine that a Floodplain Development Permit or Approval is required in addition to a building permit.

C. Buildings, Structures and Facilities Exempt from the Florida Building Code
Pursuant to the requirements of federal regulation for participation in the National Flood Insurance Program (44 CFR, Sections 59 and 60), Floodplain Development Permits or Approvals shall be required
for the following Buildings, Structures and facilities that are exempt from the Florida Building Code and any further exemptions provided by law, which are subject to the requirements of this Article:
1. Railroads and ancillary facilities associated with the railroad.
2. Nonresidential farm Buildings on farms, as provided in section 604.50, F.S.
3. Temporary Buildings or sheds used exclusively for construction purposes.
4. Mobile or modular Structures used as temporary offices.
5. Those Structures or facilities of electric utilities, as defined in section 366.02, F.S., which are directly involved in the generation, transmission, or distribution of electricity.
6. Chickees constructed by the Miccosukee Tribe of Indians of Florida or the Seminole Tribe of Florida. As used in this paragraph, the term “chickee” means an open-sided wooden hut that has a thatched roof of palm or palmetto or other traditional materials, and that does not incorporate any electrical, plumbing, or other non-wood features.
7. Family mausoleums, not exceeding 250 square feet in area, which are prefabricated and assembled on site or preassembled and delivered on site and have walls, roofs and a floor constructed of granite, marble or reinforced concrete.
8. Temporary housing provided by the Florida Department of Corrections to any prisoner in the state correctional system.
9. Structures identified in section 553.73(10)(k), F.S., are not exempt from the Florida Building Code if such Structures are located in Special Flood Hazard Areas established on Flood Insurance Rate Maps.

D. Application for a Permit or Approval
To obtain a Floodplain Development Permit or Approval outside of the building permit process, the applicant shall first file an application in writing on a form furnished by PBC. The information provided shall:
1. Identify and describe the Development to be covered by the permit or approval.
2. Describe the land on which the proposed Development is to be conducted by legal description, street address or similar description that will readily identify and definitively locate the site.
3. Indicate the use and occupancy for which the proposed Development is intended.
4. Be accompanied by a site plan or construction documents, as specified in Art.18.A.5.
5. State the valuation of the proposed work.
6. Be signed by the applicant or the applicant’s authorized agent.
7. Give such other data and information as required by the Floodplain Administrator.

E. Validity of Permit or Approval
The issuance of a Floodplain Development Permit or Approval pursuant to this Article shall not be construed to be a permit for, or approval of, any Violation of this Article, the Florida Building Code, or any other ordinance of PBC. The issuance of permits based on submitted applications, construction documents, and information shall not prevent the Floodplain Administrator from requiring the correction of errors and omissions.

F. Suspension or Revocation
The Floodplain Administrator is authorized to suspend or revoke a Floodplain Development Permit or Approval if the permit was issued in error, on the basis of incorrect or incomplete information, or in Violation of this Article or any other ordinance, regulation or requirement of PBC.

G. Expiration
A Floodplain Development Permit or Approval shall become invalid unless the work authorized by such permit is commenced within six months after its issuance or the issuance of a building permit, whichever comes last, or if the work authorized is suspended or abandoned for a period of six months after the work commences. Extensions for periods of not more than six months each shall be requested in writing prior to expiration and justifiable cause shall be demonstrated. In no case shall the permit remain valid when FIRMs are updated, unless Development is under construction.

H. Other Permits Required
Floodplain Development Permits shall include a statement that all other applicable state or federal permits shall be obtained before commencement of the permitted Development, including, but not limited to, the following:
1. The South Florida Water Management District; section 373.036, F.S.
2. Florida Department of Health for onsite sewage treatment and disposal systems; section 381.0065, F.S., and Chapter 64E-6, FAC.
3. PBC Department of Environmental Resources Management, as applies.
4. Florida Department of Environmental Protection for construction, reconstruction, changes, or physical activities for shore protection or other activities seaward of the Coastal Construction Control Line; section 161.141, F.S.
5. Florida Department of Environmental Protection for activities subject to the Joint Coastal Permit; section 161.055, F.S.
6. Florida Department of Environmental Protection for activities that affect wetlands and alter surface water flows, in conjunction with the U.S. Army Corps of Engineers; section 404 of the Clean Water Act.
7. Federal permits and approvals.

Section 5 Site plans and construction documents

A. Information for Development in Special Flood Hazard Areas
The site plan or construction documents for any Development subject to the requirements of this Article shall be drawn to scale and shall include, as applicable to the proposed Development:
1. Delineation of Special Flood Hazard Areas, Floodway boundaries and flood zone(s), Base Flood Elevation(s), and ground elevations, if necessary, for review of the proposed Development.
2. Where Base Flood Elevations or Floodway data are not included on the FIRM or in the Flood Insurance Study, they shall be established in accordance with Art. 18.A.5.B.2 or 3 below.
3. Where the parcel on which the proposed Development will take place will have more than 50 lots or is larger than five acres, and the Base Flood Elevations are not included on the FIRM or in the Flood Insurance Study, such elevations shall be established in accordance with Art. 18.A.5.B.1.
4. Location of the proposed activity and proposed Structures, and locations of existing Buildings and Structures; in Coastal High Hazard Areas, New Buildings shall be located landward of the reach of mean high tide.
5. Location, extent, amount, and proposed final grades of any filling, grading, or excavation.
6. Where the placement of fill is proposed, the amount, type, and source of fill material; compaction specifications; a description of the intended purpose of the fill areas; and evidence that the proposed fill areas are the minimum necessary to achieve the intended purpose.
7. Delineation of the Coastal Construction Control Line or notation that the site is seaward of the Coastal Construction Control Line, if applicable.
8. Extent of any proposed alteration of Sand Dunes or mangrove stands, provided such alteration is approved by the Florida Department of Environmental Protection.
9. Existing and proposed alignment of any proposed Alteration of a Watercourse.
10. Subdivisions of more than three lots or greater than ten acres shall provide an electronic subdivision topographic plan.

The Floodplain Administrator is authorized to waive the submission of site plans, construction documents, and other data that are required by this Article, but that are not required to be prepared by a registered design professional, if it is found that the nature of the proposed Development is such that the review of such submissions is not necessary to ascertain compliance with this Article.

B. Information in Special Flood Hazard Areas without Base Flood Elevations (approximate Zone A)
Where Special Flood Hazard Areas are delineated on the FIRM and Base Flood elevation data have not been provided, the Floodplain Administrator shall:
1. Require the applicant to include Base Flood Elevation data prepared in accordance with currently-accepted engineering practices.
2. Obtain, review, and provide to applicants Base Flood Elevation and Floodway data available from a federal or state agency or other source, or require the applicant to obtain and use Base Flood Elevation and Floodway data available from a federal or state agency or other source.
3. Where Base Flood Elevation and Floodway data are not available from another source, where the available data are deemed by the Floodplain Administrator to not reasonably reflect flooding conditions, or where the available data are known to be scientifically or technically incorrect or otherwise inadequate:
   a. Require the applicant to include Base Flood Elevation data prepared in accordance with currently-accepted engineering practices; or
   b. Specify that the Base Flood Elevation is two feet above the highest adjacent grade (finished) at the location of the Development, provided there is no evidence indicating flood depths have been or may be greater than two feet.
4. Where the Base Flood Elevation data are to be used to support a Letter of Map Change from FEMA, advise the applicant that the analyses shall be prepared by a Florida-licensed engineer in a format...
required by FEMA, and that it shall be the responsibility of the applicant to satisfy the submittal requirements and pay the processing fees.

C. Additional Analyses and Certifications
As applicable to the location and nature of the proposed Development activity, and in addition to the requirements of this section, the applicant shall have the following analyses signed and sealed by a Florida-licensed engineer for submission with the site plan and construction documents:

1. For Development activities proposed to be located in a regulatory Floodway, a Floodway Encroachment Analysis that demonstrates that the encroachment of the proposed Development will not cause any increase in Base Flood Elevations; where the applicant proposes to undertake Development activities that do increase Base Flood Elevations, the applicant shall submit such analysis to FEMA, as specified in Art. 18.A.5.D, and shall submit the Conditional Letter of Map Revision, if issued by FEMA, with the site plan and construction documents.

2. For Development activities proposed to be located in a riverine Special Flood Hazard Area for which Base Flood Elevations are included in the Flood Insurance Study or on the FIRM and Floodways have not been designated, hydrologic and hydraulic analyses that demonstrate that the cumulative effect of the proposed Development, when combined with all other existing and anticipated Flood Hazard Area encroachments, will not increase the Base Flood Elevation more than one foot at any point within the community. This requirement does not apply in isolated Special Flood Hazard Areas not connected to a riverine Special Flood Hazard Area or in Special Flood Hazard Areas identified as Zone AO or Zone AH.

3. For Alteration of a Watercourse, an engineering analysis prepared in accordance with standard engineering practices which demonstrates that the flood-carrying capacity of the altered or relocated portion of the watercourse will not be decreased, and certification that the altered watercourse shall be maintained in a manner which preserves the channel's flood-carrying capacity; the applicant shall submit the analysis to FEMA as specified in Art. 18.A.5.D.

4. For activities that propose to alter Sand Dunes or mangrove stands in Coastal High Hazard Areas (Zone V), an engineering analysis that demonstrates that the proposed alteration will not increase the potential for flood damage.

D. Submission of Additional Data
When additional hydrologic, hydraulic or other engineering data, studies, and additional analyses are submitted to support an application, the applicant has the right to seek a Letter of Map Change from FEMA to change the Base Flood Elevations, change Floodway boundaries, or change boundaries of Special Flood Hazard Areas shown on FIRMs, and to submit such data to FEMA for such purposes. The analyses shall be prepared by a Florida-licensed engineer in a format required by FEMA. Submittal requirements and processing fees shall be the responsibility of the applicant.

Section 6 Inspections

A. General
Development for which a Floodplain Development Permit or Approval is required shall be subject to inspection.

B. Development other than Buildings and Structures
The Floodplain Administrator shall inspect all Development to determine compliance with the requirements of this Article and the conditions of issued Floodplain Development Permits or approvals.

C. Buildings, Structures and Facilities Exempt from the Florida Building Code
The Floodplain Administrator shall inspect Buildings, Structures and facilities exempt from the Florida Building Code, as listed in Art. 18.A.4.C, to determine compliance with the requirements of this Article and the conditions of issued Floodplain Development Permits or approvals.

D. Lowest-floor inspection for Buildings, Structures and Facilities exempt from the Florida Building Code
Upon placement of the Lowest Floor, including Basement, and prior to further vertical construction, the owner of a Building, Structure or facility exempt from the Florida Building Code, as listed in Art. 18.A.4.C, or the owner’s authorized agent, shall submit to the Floodplain Administrator:

1. If a Design Flood Elevation was used to determine the required elevation of the Lowest Floor, the certification of elevation of the Lowest Floor prepared and sealed by a Florida-licensed professional surveyor; or

2. If the elevation used to determine the required elevation of the Lowest Floor was determined in accordance with Art. 18.A.5.B.3.b, the documentation of height of the Lowest Floor above highest adjacent grade, prepared by the owner or the owner’s authorized agent.
E. Final Inspection for Buildings, Structures and Facilities Exempt from the Florida Building Code
As part of the final inspection for Buildings, Structures and facilities exempt from the Florida Building Code, as listed in Art. 18.A.4.C, the owner or owner’s authorized agent shall submit to the Floodplain Administrator a final certification of elevation of the Lowest Floor and/or final documentation of the height of the Lowest Floor above the highest adjacent grade; such certifications and documentations shall be prepared as specified in Art. 18.A.6.D.

F. Manufactured Homes
The Floodplain Administrator shall inspect Manufactured Homes that are installed or replaced in Special Flood Hazard Areas to determine compliance with the requirements of this Article and the conditions of the issued permit. Upon placement of a Manufactured Home, certification of the elevation of the Lowest Floor shall be submitted to the Floodplain Administrator.

Section 7 Appeals and Variances

A. General
The Flood Damage Prevention Board shall hear and decide on all requests for Appeals or Variances from the strict application of this Article.

B. Appeal procedures
1. A request for Appeal to the decision of the Floodplain Administrator enforcing the provisions of this Article shall include reference to this Art. 18.A.7, and the applicant’s technical basis of contesting the decision of the Floodplain Administrator. The Appeal shall be filed in writing within 30 calendar days after the decision is rendered by the Floodplain Administrator. Failure to timely file an Appeal shall be deemed a waiver of the applicant’s ability to seek relief for said decision. An Appeal may be filed whenever any one of the following conditions are claimed to exist:
   a. The Floodplain Administrator rejected or refused to approve the applicant’s request;
   b. The provisions of this Article do not apply to the applicant’s specific case;
   c. That an equally-good or more-desirable method can be employed and fully meet the intent of this Article, which the Floodplain Administrator has rejected;
   d. The true intent and meaning of this Article or any of the regulations there under have been misconstrued or incorrectly interpreted.
2. The Flood Damage Prevention Board shall hear Appeal requests at the next available meeting within 60 days of date of Appeal. This 60-day period may be extended upon mutual consent of the Floodplain Administrator and the applicant.
3. At the conclusion of the hearing, the Flood Damage Prevention Board shall orally render a decision based on testimony and evidence entered into the record. An order setting forth findings of fact and conclusion of law shall then be delivered to the appellant.
4. The applicant or PBC may Appeal a decision of the Flood Damage Prevention Board to the Circuit Court of PBC, Florida, by petition for writ of certiorari; any Appeal filed pursuant to this Article shall be considered timely if filed within 30 days of the execution of the order to be Appealed.

C. Variance procedures
1. An initial request for a Variance from the provisions of this Article shall be filed in writing by the affected party with the Floodplain Administrator.
2. The Flood Damage Prevention Board shall hear Variance requests at the next available meeting. In acting upon Variance applications, the Flood Damage Prevention Board shall consider all technical evaluations, all relevant factors, and standards specified in other sections of this Article; and
   a. The danger that materials may be swept onto other lands to the injury of others;
   b. The danger to life and property due to flooding or erosion damage;
   c. The susceptibility of the proposed facility and its contents to flood damage and the effect of such damage on the individual owner;
   d. The importance of the services provided by the proposed facility to the community;
   e. The necessity to the facility of a waterfront location;
   f. The availability of alternative locations for the proposed use which are not subject to flooding or erosion damage;
   g. The compatibility of the proposed use with existing and anticipated Development;
   h. The relationship of the proposed use to the comprehensive plan and flood damage prevention program for that area;
   i. The safety of access to the property in times of flood for ordinary and emergency vehicles;
   j. The expected heights, velocity, duration, rate of rise, and sediment of transport of the floodwaters and the effects of wave action, if applicable, expected at the site;
k. The costs of providing governmental services during and after flood conditions, including maintenance and repair of public utilities and facilities such as sewer, gas, electric, and water systems, and streets and bridges; and

l. The negative effect a Variance may have on the county rating under the FEMA Community Rating System.

3. The applicant or PBC may Appeal a decision of the Flood Damage Prevention Board to the Circuit Court of PBC, Florida, by a petition for writ of certiorari; any Appeal filed pursuant to this Article shall be considered timely if filed within 30 days of the execution of the order to be Appealed.

D. Restrictions in Floodways
A Variance shall not be issued for any proposed Development in a Floodway if any increase in Base Flood Elevations would result, as evidenced by the applicable analyses and certifications required in Art. 18.A.5.C.

E. Historic Buildings
A Variance is authorized to be issued for the repair, improvement, or rehabilitation of a Historic Building that is determined eligible for the exception to the flood resistant construction requirements of the Florida Building Code, Existing Building Volume, Chapter 11, Historic Buildings, upon a determination that the proposed repair, improvement or rehabilitation will not preclude the Building’s continued designation as a Historic Building and the Variance is the minimum necessary to preserve the historic character and design of the Building. If the proposed work precludes the Building’s continued designation as a Historic Building, a Variance shall not be granted upon this basis and the Building and any repair, improvement and rehabilitation shall be subject to the requirements of the Florida Building Code.

F. Functionally-Dependent Uses
A Variance is authorized to be issued for the construction or Substantial Improvement necessary for the conduct of a Functionally-Dependent Use, as defined in Art. 1, provided the Variance is the minimum necessary considering the flood hazard, and all due consideration has been given to use of methods and materials that minimize flood damage during occurrence of the Base Flood.

G. Conditions for Issuance of Variances
Variances shall be issued only upon:
1. Submission by the applicant of a showing of good and sufficient cause that the unique characteristics of the size, configuration or topography of the site limit compliance with any provision of this Article or the required elevation standards.
2. Determination by the Flood Damage Prevention Board that:
   a. Failure to grant the Variance would result in exceptional hardship due to the physical characteristics of the land that render the lot undevelopable; increased costs to satisfy the requirements or inconvenience do not constitute hardship;
   b. The granting of a Variance will not result in increased flood heights, additional threats to public safety, extraordinary public expense, nor create nuisances, cause fraud on or victimization of the public or conflict with existing local laws and ordinances; and
   c. The Variance is the minimum necessary, considering the flood hazard, to afford relief.

H. Limitations on Authority to Grant Variances
The Flood Damage Prevention Board shall base its decisions on Variances on technical justifications submitted by applicants, the considerations for issuance in Art. 18.A.7.C.2, the conditions of issuance set forth in Art. 18.A.7.G, and the comments and recommendations of the Floodplain Administrator. The Flood Damage Prevention Board has the right to attach such conditions as it deems necessary to further the purposes and objectives of this Article.

I. Variance Notification
Any applicant to whom a Variance is granted shall be given a written order, bearing the signature of the Chairperson of the Flood Damage Prevention Board, indicating the difference between the Base Flood Elevation and the proposed elevation of the Lowest Floor, stating the issuance of a Variance to construct a Structure or Substantial Improvement below the required elevation, or otherwise not comply with the requirements of this Article, may result in substantial increase in the cost of federal flood insurance (up to amounts as high as $25 for $100 of insurance coverage) and such noncompliance construction increases risks to life and property. A copy of the notice shall be recorded by the Floodplain Administrator in the Office of the PBC Clerk and shall be recorded in a manner so that it appears in the chain of title of the affected parcel of land in the Official Records of PBC. The Floodplain Administrator will maintain a record of all Variance actions, including justification for their issuance, and report such Variances issued in its biennial report submitted to FEMA.

Section 8 Violations
A. Violations
Any Development that is not within the scope of the Florida Building Code, but that is regulated by this Article, as listed in Art. 18.A.4.C, that is performed without an issued permit, that is in conflict with an issued permit, or that does not fully comply with this Article, shall be deemed a Violation of this Article. A Building or Structure without the documentation of elevation of the Lowest Floor, other required design certifications, or other evidence of compliance required by this Article or the Florida Building Code is presumed to be a Violation until such time as that documentation is provided.

B. Authority
The Floodplain Administrator is authorized to serve notices of Violation or stop work orders to owners of the property involved, to the owner’s agent, or to the person or persons performing the work for Development that is not within the scope of the Florida Building Code, but that is regulated by this Article, as listed in Art. 18.A.4.C, and that is determined to be a Violation.

C. Unlawful Continuance
Any person who shall continue any work after having been served with a notice of Violation or a stop work order, except such work as that person is directed to perform to remove or remedy a Violation or unsafe condition, shall be subject to penalties as prescribed by law.

D. Penalties for Violation
Violation of this Article or failure to comply with any of its requirements, including Violation of conditions and safeguards established in connection with grants of Variances shall be enforceable pursuant to the Code Enforcement Procedures established in Chapter 162, Parts I and II, F.S., as amended or replaced, and Article 10, Code Enforcement. Each day such Violation continues shall be considered a separate offense. Nothing herein contained shall prevent the Floodplain Administrator or PBC from taking such other lawful actions as are necessary to prevent or remedy any Violation, including enforcement pursuant to section 125.69, F.S., as amended or replaced. Any person who receives a conviction pursuant to section 125.69, F.S., as amended or replaced, for violating or failing to comply with any of the requirements herein shall, upon conviction hereof, be fined not more than $500 or imprisoned for not more than 60 days.

CHAPTER B BUILDINGS AND STRUCTURES

Section 1 Design and Construction of Buildings, Structures and Facilities Exempt from the Florida Building Code.

Pursuant to Art. 18.A.4.C, Buildings, Structures, and facilities that are exempt from the Florida Building Code, including Substantial Improvement or repair of Substantial Damage of such Buildings, Structures and facilities, shall be designed and constructed in accordance with the flood load and flood resistant construction requirements of ASCE 24. Structures exempt from the Florida Building Code that are not walled and roofed Buildings shall comply with the requirements of Art. 18.H.

Section 2 Buildings and Structures Seaward of the Coastal Construction Control Line.

If extending, in whole or in part, seaward of the Coastal Construction Control Line and also located, in whole or in part, in a Special Flood Hazard Area:

A. Buildings and Structures shall be designed and constructed to comply with the more-restrictive applicable requirements of the Florida Building Code, Building Volume, Section 3109 and Section 1612 or Florida Building Code, Residential Volume, Section R322.

B. Minor Structures and non-habitable major Structures, as defined in section 161.54, F.S., shall be designed and constructed to comply with the intent and applicable provisions of this Article and ASCE 24.

Section 3 Specific Methods of Construction and Requirements.

In addition to the requirements of this Article and the Florida Building Code, the following specific methods of construction apply:

A. Application of Flood Resistant Requirements
The following “higher standards” shall apply to all properties located within unincorporated PBC, as described in this section.

B. Additional Elevation of Buildings (Freeboard)
1. For New Construction and Substantial Improvements, including electrical systems, equipment and components, heating, ventilating, air conditioning, plumbing appliances and plumbing fixtures, duct systems, and other service equipment, in Zones AE, AH and VE, the minimum elevation requirement
(for the Lowest Floor or lowest horizontal member, as applicable) shall be at least one foot above the Base Flood Elevation. In areas without a master stormwater drainage system, the minimum elevation requirement shall be the higher of one foot above the Base Flood Elevation or 18 inches above the Lowest Adjacent Road Crown (LARC). Flood-proofing, to a minimum of one foot above the Base Flood Elevation, subject to the limitations of applicable provisions of the Florida Building Code, as may be amended, may be used in flood zones other than Coastal High Hazard Areas.

2. For New Construction and Substantial Improvements, including electrical systems, equipment and components, heating, ventilating, air conditioning, plumbing appliances and plumbing fixtures, duct systems, and other service equipment, in approximate Zone A, the minimum elevation requirement (for the Lowest Floor or lowest horizontal member, as applicable) shall be one foot above the Base Flood Elevation, as determined pursuant to Art. 18.A.5.B. In areas without a master stormwater drainage system, the minimum elevation requirement shall be the higher of one foot above the Base Flood Elevation or 18 inches above the LARC. Flood-proofing may be used, subject to the limitations of applicable provisions of the Florida Building Code, as may be amended.

3. For New Construction and Substantial Improvements, including electrical systems, equipment and components, heating, ventilating, air conditioning, plumbing appliances and plumbing fixtures, duct systems, and other service equipment, in Zone AO, the minimum elevation requirement shall be at least one foot greater than the depth specified by FEMA on the Flood Insurance Rate Maps above natural grade. If a depth is not specified, the minimum elevation requirement shall be at least two feet above the highest adjacent grade. In areas without a master stormwater drainage system, the minimum elevation requirement shall be the higher of one foot above the depth number or 18 inches above LARC. Flood-proofing may be used, subject to the limitations of applicable provisions of the Florida Building Code, as may be amended.

4. For New Construction and Substantial Improvements, including electrical systems, equipment and components, heating, ventilating, air conditioning, plumbing appliances and plumbing fixtures, duct systems, and other service equipment, in Zones X, X500, and areas not studied, without a master stormwater drainage system, the Base Flood Elevation shall be at least 18 inches above the LARC. Flood-proofing may be used, subject to applicable provisions of the Florida Building Code, as may be amended.

C. Substantial Improvement and Substantial Damage

For the administration of the flood provisions of the Florida Building Code, Building Volume and Existing Building Volume, the definitions in ULDC Art. 1. I, Section 2, for “Substantial Improvement” and “Substantial Improvement” shall apply.

D. Critical Facilities

Construction of new critical facilities shall be, to the extent possible, located outside the limits of SFHAs. Construction of new critical facilities may be permissible within a SFHA if no feasible alternative site is available. If permitted, critical facilities shall be elevated or protected to or above the Base Flood Elevation, plus three feet, or the 500-year (0.2 percent chance) flood elevation, whichever is higher. Flood-proofing may be used, subject to the applicable provisions of the Florida Building Code, as may be amended. Access routes elevated to or above the level of the Base Flood Elevation shall be provided to all critical facilities.

CHAPTER C SUBDIVISIONS

Section 1 Minimum Requirements

Subdivision proposals, including proposals for Manufactured Home Parks and Subdivisions, shall be reviewed to determine that:

A. Such proposals are consistent with the need to minimize flood damage and will be reasonably safe from flooding;

B. All public utilities and facilities such as sewer, gas, electric, communications, and water systems are located and constructed to minimize or eliminate flood damage; and

C. Adequate drainage is provided to reduce exposure to flood hazards; in Zones AH and AO, adequate drainage paths shall be provided to guide floodwaters around and away from proposed Structures.

Section 2 Subdivision Plats

Where any portion of proposed subdivisions, including Manufactured Home Parks and Subdivisions, lies within a Special Flood Hazard Area, the following shall be required:
A. Delineation of Special Flood Hazard Areas, Floodway boundaries and flood zones, and Design Flood Elevations, as appropriate, shall be shown on a separate exhibit submitted with a Technical Compliance Application for platting, pursuant to Art. 11, Subdivision, Platting, and Required Improvements;
B. Where the subdivision has more than 50 lots or is larger than five acres and Base Flood Elevations are not included on the FIRM, the Base Flood Elevations determined in accordance with Art. 18.A.5.B.1; and
C. Compliance with the site improvement and utilities requirements of Art. 18.D.

CHAPTER D SITE IMPROVEMENTS, UTILITIES AND LIMITATIONS

Section 1 Minimum Requirements

All proposed new Development shall be reviewed to determine that:
A. Such proposals are consistent with the need to minimize flood damage and will be reasonably safe from flooding;
B. All public utilities and facilities, such as sewer, gas, electric, communications and water systems, are located and constructed to minimize or eliminate flood damage; and
C. Adequate drainage is provided to reduce exposure to flood hazards; in Zones AH and AO, adequate drainage paths shall be provided to guide floodwaters around and away from proposed Structures.

Section 2 Sanitary-Sewage Facilities

All new and replacement sanitary-sewage facilities, private sewage treatment plants (including all pumping stations and collector systems), and on-site waste disposal systems shall be designed in accordance with the standards for onsite sewage treatment and disposal systems in Chapter 64E-6, FAC, and ASCE 24, Chapter 7, to minimize or eliminate infiltration of floodwaters into the facilities and discharge from the facilities into flood waters, and impairment of the facilities and systems.

Section 3 Water-Supply Facilities

All new and replacement water-supply facilities shall be designed in accordance with the water well construction standards in Art. 15, ULDC, Section 62-532.500, FAC, and ASCE 24, Chapter 7, to minimize or eliminate infiltration of floodwaters into the systems.

Section 4 Limitations on Sites in Regulatory Floodways

No Development, including but not limited to site improvements and land-disturbing activity involving fill or regrading, shall be authorized in the regulatory Floodway, unless the Floodway Encroachment Analysis required in Art. 18.A.5.C demonstrates that the proposed Development or land-disturbing activity will not result in any increase in the Base Flood Elevation.

Section 5 Limitations on Placement of Fill

Subject to the limitations of this Article, fill shall be designed to be stable under conditions of flooding including rapid rise and rapid drawdown of floodwaters, prolonged inundation, and protection against flood-related erosion and scour. In addition to these requirements, if intended to support Buildings and Structures (Zone A only), fill shall comply with the requirements of the Florida Building Code.

A. Grading and Earth Fill
   1. Grading
      On all new, permitted construction, regardless of flood-zone designation, grading shall keep all rainfall and runoff flow on the Building site, until discharged into the roadway drainage system or to public drainage ways adjacent to the property lines. Berms shall be constructed along lot lines, if necessary, to prevent stormwater flow directly onto adjacent properties. Erosion sedimentation off the Building site shall be controlled until vegetative cover is established. The Floodplain Administrator may require grading plans showing pre-construction and proposed finish earth grades.
   2. Earth Fill
      On all New Construction, earth fill brought onto the site of construction from another site shall be minimized to maximize existing floodwater storage capacity. Maximum volume of imported fill shall be limited to that necessary to raise an earth pad to elevate the slab-on-grade not more than six inches above minimum floor elevation set in this Article, with side slopes of the pad of 1:5 to 1:3 starting ten feet from the slab edges.
3. Fill in Zone V
Structural fill shall not be utilized in Coastal High Hazard Areas (Zone V).

4. Lot and Building Site Drainage
Site grading immediately adjacent to the perimeter of each Building constructed as slab-on-grade shall be sloped so as to drain or direct water away from the Structure.

5. Exceptions from the Requirements in this Section
a. Only on Building sites requiring raised septic mounds to PBC Health Department minimum elevations, will additional volume of fill be allowed to construct the mound;
b. Earth fill dug from an on-site excavation shall be unregulated if in accordance with the regulations in the ULDC, and provided finish grade directs lot drainage back into the excavation;
c. Any volume of fill for placement inside the perimeter foundation walls to raise an interior concrete slab to any higher elevation shall be allowed;
d. Fill shall be permitted to raise earthen berms on side property lines to prevent drainage onto adjacent lots, provided said berms have side slopes of 1:5 to 1:3, with a triangular cross section;
e. Fill shall be allowed inside retaining walls for Building access ramps or driveway ramps required by the American Disabilities Act (ADA);
f. Fill necessary to direct on-site drainage to the public roadway or drainage system shall also be permitted;
g. Minimum fill for sites that have sloping topography that do not store floodwater shall be permitted. Any fill in excess of this minimum grading requirement shall be subject to approval of the Flood Damage Prevention Board as a Variance;
h. Fill necessary for critical facilities and public service Buildings; and
i. Areas included within a South Florida Water Management District permit shall be filled and graded in accordance with the fill and grading design conditions identified in said permit even when elevations are more than six inches above the minimum floor elevation set in Art. 18.D.5.A.2.

Section 6 Limitations on Sites in Coastal High Hazard Areas (Zone V)
In Coastal High Hazard Areas, alteration of Sand Dunes and mangrove stands shall be permitted only if such alteration is approved by the Florida Department of Environmental Protection and only if the engineering analysis required by Art. 18.A.5.C.4 demonstrates that the proposed alteration will not increase the potential for flood damage. Construction or restoration of dunes under or around elevated Buildings and Structures shall comply with Art. 18.H.8.C.

CHAPTER E MANUFACTURED HOMES

Section 1 General
All Manufactured Homes installed in Special Flood Hazard Areas shall be installed by an installer that is licensed pursuant to section 320.8249, F.S., and shall comply with the requirements of Chapter 15C-1, FAC, and the requirements of this Article. Manufactured Homes shall not be allowed seaward of the Coastal Construction Control Line.

Section 2 Foundations
All new Manufactured Homes and replacement Manufactured Homes installed in Special Flood Hazard Areas shall be installed on permanent, reinforced foundations that:
A. In Special Flood Hazard Areas (Zone A) other than Coastal High Hazard Areas, are designed in accordance with the foundation requirements of the Florida Building Code, Residential Volume, Section R322.2, and this Article. Foundations for Manufactured Homes, subject to Art. 18.E.4.B, are permitted to be reinforced piers or other foundation elements of at least equivalent strength.
B. In Coastal High Hazard Areas (Zone V), are designed in accordance with the foundation requirements of the Florida Building Code, Residential Volume, Section R322.3, and this Article.

Section 3 Anchoring
All new Manufactured Homes and replacement Manufactured Homes shall be installed using methods and practices which minimize flood damage and shall be securely anchored to an adequately-anchored foundation system to resist flotation, collapse or lateral movement. Methods of anchoring include, but are not limited to, use
of over-the-top or frame ties to ground anchors. This anchoring requirement is in addition to applicable state and local anchoring requirements for wind resistance.

Section 4  Elevation

Manufactured Homes that are placed, replaced or substantially improved shall comply with Art. 18.E.4.A or Art. 18.E.4.B, as applicable.

A. General Elevation Requirement

Unless subject to the requirements of Art. 18.E.4.B, all Manufactured Homes that are placed, replaced, or substantially improved on sites located: (a) outside of a Manufactured Home Park or Subdivision; (b) in a new Manufactured Home park or subdivision; (c) in an expansion to an Existing Manufactured Home Park or Subdivision; or (d) in an Existing Manufactured Home Park or Subdivision upon which a Manufactured Home has incurred “Substantial Damage” as the result of a flood, shall be elevated such that the bottom of the frame is at or above the elevation required, as applicable to the Special Flood Hazard Area, in the Florida Building Code, Residential Volume, Section R322.2 (Zone A) or Section R322.3 (Zone V).

B. Elevation Requirement for Certain Existing Manufactured Home Parks and Subdivisions

Manufactured Homes that are not subject to Art. 18.E.4.A, including Manufactured Homes that are placed, replaced, or substantially improved on sites located in an Existing Manufactured Home Park or Subdivision, unless on a site where Substantial Damage as result of flooding has occurred, shall be elevated such that either the:

1. Bottom of the frame of the Manufactured Home is at or above the elevation required, as applicable to the Special Flood Hazard Area, in the Florida Building Code, Residential Volume, Section R322.2 (Zone A) or Section R322.3 (Zone V); or
2. Bottom of the frame is supported by reinforced piers or other foundation elements of at least equivalent strength that are not less than 36 inches in height above grade.

Section 5  Enclosures

Enclosed areas below elevated Manufactured Homes shall comply with the requirements of the Florida Building Code, Residential Volume, Section R322.2 or R322.3, for such enclosed areas, as applicable to the Special Flood Hazard Area.

Section 6  Utility Equipment

Utility equipment that serves Manufactured Homes, including electric, heating, ventilation, plumbing, and air conditioning equipment and other service facilities, shall comply with the requirements of the Florida Building Code, Residential Volume, Section R322, as applicable to the Special Flood Hazard Area.

CHAPTER F  RECREATIONAL VEHICLES AND PARK TRAILERS

Section 1  Temporary Placement

Recreational Vehicles and Park Trailers placed temporarily in Special Flood Hazard Areas shall:

A. Be on the site for fewer than 180 consecutive days; or

B. Be fully licensed and ready for highway use, which means the Recreational Vehicle or Park Trailer is on wheels or jacking system, is attached to the site only by quick-disconnect type utilities and security devices, and has no permanent attachments such as additions, rooms, stairs, decks and porches.

Section 2  Permanent Placement

Recreational Vehicles and Park Trailers that do not meet the limitations in Art. 18.F.1 above for temporary placement shall meet the requirements of Art. 18.E for Manufactured Homes.

CHAPTER G  TANKS

Section 1  Underground Tanks

Underground tanks in Special Flood Hazard Areas shall be anchored to prevent flotation, collapse or lateral movement resulting from hydrodynamic and hydrostatic loads during conditions of the Design Flood, including the effects of buoyancy assuming the tank is empty.
Section 2  Non-Elevated, Above-Ground Tanks

Above-ground tanks that do not meet the elevation requirements of Art. 18.G.3 below shall:

A. Be permitted in Special Flood Hazard Areas (Zone A) other than Coastal High Hazard Areas, provided the tanks are anchored or otherwise designed and constructed to prevent flotation, collapse or lateral movement resulting from hydrodynamic and hydrostatic loads during conditions of the Design Flood, including the effects of buoyancy assuming the tank is empty and the effects of flood-borne debris.

B. Not be permitted in Coastal High Hazard Areas (Zone V).

Section 3  Elevated, Above-Ground Tanks

In Special Flood Hazard Areas, above-ground tanks shall be attached to, and elevated to (or above) the Design Flood Elevation of, a supporting Structure designed to prevent flotation, collapse or lateral movement during Design Flood conditions. Tank-supporting Structures shall meet the foundation requirements of the applicable Special Flood Hazard Area.

Section 4  Tank Inlets and Vents

Tank inlets, fill openings, outlets and vents shall be:

A. At or above the Design Flood Elevation or fitted with covers designed to prevent the inflow of floodwater or outflow of the contents of the tanks during conditions of the Design Flood; and

B. Anchored to prevent lateral movement resulting from hydrodynamic and hydrostatic loads, including the effects of buoyancy, during conditions of the Design Flood.

CHAPTER H  OTHER DEVELOPMENT

Section 1  General Requirements for Other Development

All Development subject to this article, including man-made changes to improved or unimproved real estate for which specific provisions are not specified in this Article or the Florida Building Code, shall:

A. Be located and constructed to minimize flood damage;

B. Meet the limitations of Art. 18.D.4 if located in a regulated Floodway;

C. Be anchored to prevent flotation, collapse or lateral movement resulting from hydrostatic loads, including the effects of buoyancy, during conditions of the Design Flood;

D. Be constructed of Flood Damage Resistant Materials; and

E. Have mechanical, plumbing, and electrical systems above the Design Flood Elevation or meet the requirements of ASCE 24, except that “minimum” electric service (i.e., service required to address life safety and electric code requirements) is permitted below the Design Flood Elevation provided it conforms to the provisions of the electrical part of the building code for wet locations.

Section 2  Fences in Regulated Floodways

Fences in regulated Floodways that have the potential to block the passage of floodwaters, such as stockade fences and wire mesh fences, shall meet the limitations of Art. 18.D.4.

Section 3  Retaining Walls, Sidewalks and Driveways in Regulated Floodways

Retaining walls, sidewalks and driveways that involve the placement of fill in regulated Floodways shall meet the limitations of Art. 18.D.4.

Section 4  Roads and Watercourse Crossings in Regulated Floodways

 Roads and watercourse crossings, including roads, bridges, culverts, low-water crossings and similar means for vehicles or pedestrians to travel from one side of a watercourse to the other side, that encroach into regulated Floodways shall meet the limitations of Art. 18.D.4. Alteration of a Watercourse that is part of a road or watercourse crossing shall meet the requirements of Art. 18.A.5.C.3.

Section 5  Concrete Slabs Used as Parking Pads, Enclosure floors, Landings, Decks, Walkways, Patios and Similar Nonstructural Uses in Coastal High Hazard Areas (Zone V)
In Coastal High Hazard Areas, concrete slabs used as parking pads, enclosure floors, landings, decks, walkways, patios and similar nonstructural uses are permitted beneath or adjacent to Buildings and Structures or beneath Design Flood requirements, provided the concrete slabs are designed and constructed to be:

A. structurally independent of the foundation system of the Building or Structure;
B. frangible and not reinforced, so as to minimize debris during flooding that is capable of causing significant damage to any Structure; and
C. have a maximum slab thickness of not more than four inches.

Section 6   Decks and Patios in Coastal High Hazard Areas (Zone V)

In addition to the requirements of the Florida Building Code, decks and patios in Coastal High Hazard Areas shall be located, designed, and constructed in compliance with the following:

A. A deck that is structurally attached to a Building or Structure shall have the bottom of the lowest horizontal structural member at or above the Design Flood Elevation, and any supporting members that extend below the Design Flood Elevation shall comply with the foundation requirements that apply to the Building or Structure, which shall be designed to accommodate any increased loads resulting from the attached deck.
B. A deck or patio that is located below the Design Flood Elevation shall be structurally independent from Buildings or Structures and their foundation systems, and shall be designed and constructed either to remain intact and in place during Design Flood conditions or to break apart into small pieces to minimize debris during flooding that is capable of causing structural damage to the Building or Structure or to adjacent Buildings and Structures.
C. A deck or patio that has a vertical thickness of more than 12 inches or that is constructed with more than the minimum amount of fill necessary for site drainage shall not be approved unless an analysis prepared by a qualified, registered design professional demonstrates no harmful diversion of floodwaters or wave runup and wave reflection that would increase damage to the Building or Structure or to adjacent Buildings and Structures.
D. A deck or patio that has a vertical thickness of 12 inches or less and that is at natural grade or on nonstructural fill material that is similar to and compatible with local soils and is the minimum amount necessary for site drainage may be approved without requiring analysis of the impact on diversion of floodwaters or wave runup and wave reflection.

Section 7   Other Development in Coastal High Hazard Areas (Zone V)

In Coastal High Hazard Areas, Development activities, other than Buildings and Structures, shall be permitted only if also authorized by the appropriate federal, state or local authority; if located outside the footprint of and not structurally attached to Buildings and Structures; and if analyses prepared by qualified, registered design professionals demonstrate no harmful diversion of floodwaters or wave runup and wave reflection that would increase damage to adjacent Buildings and Structures. Such other Development activities include but are not limited to:

A. Bulkheads, seawalls, retaining walls, revetments, and similar erosion control Structures;
B. Solid fences and privacy walls, and fences prone to trapping debris, unless designed and constructed to fail under flood conditions less than the Design Flood or otherwise function to avoid obstruction of floodwaters; and
C. On-site sewage treatment and disposal systems defined in Section 64E-6.002, FAC, as filled systems or mound systems.

Section 8   Nonstructural Fill in Coastal High Hazard Areas (Zone V). In Coastal High Hazard Areas:

A. Minor grading and the placement of minor quantities of nonstructural fill shall be permitted for landscaping and for drainage purposes under and around Buildings.
B. Nonstructural fill with finished slopes that are steeper than one unit vertical to five units horizontal shall be permitted only if an analysis prepared by a qualified, registered design professional demonstrates no harmful diversion of floodwaters or wave runup and wave reflection that would increase damage to adjacent Buildings and Structures.
C. Where authorized by the Florida Department of Environmental Protection or applicable local approval, sand dune construction and restoration of Sand Dunes under or around elevated Buildings are permitted without additional engineering analysis or certification of the diversion of floodwater or wave runup and wave reflection if the scale and location of the dune work is consistent with local beach-dune morphology.
and the vertical clearance is maintained between the top of the sand dune and the lowest horizontal structural member of the Building.

AMENDMENT HISTORY: [Ord. 2017-026; October 5, 2017]
