ARTICLE 1
GENERAL PROVISIONS

CHAPTER A  AUTHORITY

Section 1  General

A. Title and Citation
This Code shall be known as the “Palm Beach County Unified Land Development Code” and may be referred to herein as the “Code.”

1. Amendments
   Any reference to this Code, a statute, ordinance, a resolution, or common law cited herein shall include any amendment thereto.

B. Authority
The Board of County Commissioners (BCC) has the authority to adopt this Code pursuant to Art. VIII, § 1(g), Fla. Const., the PBC Charter, F.S. § 125.01, F.S. § 163.3161, and such other authority and provisions that are established by statute, administrative rule, or common law in the State of Florida. [Ord. 2019-005]

C. Intent
1. Implementation of the Plan
   It is the intent of the BCC that this Code implement and ensure that all Development Orders approved in unincorporated Palm Beach County (PBC) are consistent with the Comprehensive Plan and its managed growth systems.

2. Consistent Regulations
   It is the intent of the BCC that this Code establish comprehensive and consistent standards and procedures for the review and approval of all proposed development of land in unincorporated PBC.

3. Efficient and Effective Regulations
   It is the further purpose of the BCC that the development review, approval, and permitting process established by this Code be efficient, in terms of time and expense; effective, in terms of addressing the natural resource and public facility implications of proposed development; and, equitable, in terms of consistency with established regulations and procedures, respect for the rights of Property Owners, and consideration of the interests of the citizens of PBC.

4. Preserve and Enhance
   This Code is adopted to encourage the most appropriate use of land, water, and natural resources; prevent the overcrowding of land and avoid undue concentration of population; facilitate the adequate and efficient provision of transportation, water, sewage, drainage, solid waste, parks, schools, fire, and police facilities; conserve, develop, utilize, and protect natural resources; protect human, environmental, social, and economic resources; and, maintain, through orderly growth and development, the community character and stability of present and future land uses and development in PBC.

D. Building Permits, Certificates of Occupancy (CO), and Use
1. Issuance
   No Building Permit shall be issued for any structure on any lot created by a subdivision of land until such lot is shown on a plat of record or certified survey recorded in the manner prescribed in this Article, except as provided below.
   a. Exceptions
      Temporary structures, permanent structures having a temporary use, and ancillary structures such as fences, buffer walls, and guardhouses may receive a Building Permit prior to recordation of the Final Plat for the property only when the use and location have been approved by the DRO and shown on the approved Final Subdivision Plan. Such approval, however, shall not in any way relieve the Property Owner from the obligation to correct any and all nonconforming setbacks, separations, or encroachments due to inconsistencies between the location of said structures and lot, street, or easement boundaries as established by the applicable record plat.
   b. Revocation
      PZB may revoke a Building Permit or CO in those cases where an administrative determination has been duly made in which false statements or misrepresentations resulted as to material fact(s) in the application or plans upon which the permit or approval was based.
c. Suspension
PZB may suspend a Building Permit or CO or use where an administrative determination has been duly made in which an error or omission on either the part of the permit Applicant or government agency resulted in the issuance of the permit or certificate approval. A valid permit or certificate shall be issued in place of the incorrect permit or certificate after correction of the error or omission.

Section 2 Applicability
The provisions of this Code shall apply to the development of all land in unincorporated PBC, unless stated otherwise. No development shall be undertaken unless authorized by a Development Order. [Ord. 2010-022]

Section 3 Definitions

CHAPTER B INTERPRETATION OF THE CODE

Section 1 Interpretations

A. Authority
Interpretations to this Code and the Official Zoning Map shall be made by the Executive Director of PZB or designee with the following exceptions: [Ord. 2011-016]

1. The Director of Parks and Recreation shall have the authority to interpret Art. 5.D, Parks and Recreation – Rules and Recreation Standards; [Ord. 2011-016]

2. The Executive Director of Palm Tran shall have the authority to make interpretations of Art. 5.H, Mass Transit Standards; [Ord. 2011-016]

3. The County Engineer shall have the authority to make all interpretations of Art. 4.B.10.B.7.a.10), Hauling Standards; Art. 4.B.10.B.7.b.2(c), Drainage; Art. 4.B.10.C.5.g.5), Haul Agreement; and, Art. 12, Traffic Performance Standards; [Ord. 2011-016] [Ord. 2017-007]

4. The Impact Fee Coordinator shall have the authority to make all interpretations of Art. 13, Impact Fees; [Ord. 2011-016]

6. The County Health Department Director shall have the authority to make all interpretations of Art. 15, Health Regulations; [Ord. 2011-016]

7. The PBC Airport Director shall have the authority to interpret Art. 16, Airport Regulations; [Ord. 2011-016]

8. The Flood Damage Prevention Administrator shall have the authority to interpret Art. 18, Flood Damage Prevention; [Ord. 2011-016]

9. The County Administrator or designee shall have the authority to interpret Art. 5.I, Murals; and, [Ord. 2013-021]

10. The Executive Director of PZB or designee shall have the authority to make interpretations of the following provisions found in Art. 4.B.10, Excavation Uses in consultation with the Director of ERM and the County Engineer as appropriate: Art. 4.B.10.B.4.a), Prohibitions; Art. 4.B.10.B.4.b.12), De Minimis Impact; Art. 4.B.10.B.4.b.14), Excavation by Public Agencies; Art. 4.B.10.B.6.e, Written Approval; Art. 4.B.10.B.7.b.2), Slopes except for Art. 4.B.10.B.7.b.2)c), Drainage; Art. 4.B.10.B.7.d.1), General; Art. 4.B.10.B.7.d.2), Provisions; Art. 4.B.10.B.7.d.4), Form of Guarantee; and, Art. 4.B.10.B.7.d.6),
**B. Appeal**

An appeal to contest an interpretation of this Code may be filed pursuant to Article 2.A.14, Appeal. [Ord. 2011-016]

**Section 2 Assistance by Staff**

Except as specifically set forth in Article 1.B.1, Interpretations, any assistance given or representation made by a PBC employee during consultation shall not constitute the approval of the Department, shall not bind the staff, the Department, the Division, the Executive Director, or the BCC, and shall not relieve any person of any requirements of this Code or other applicable provisions of federal, state law, or local ordinances. If there exists a conflict between any staff representation and the laws, rules, codes, or ordinances, such laws, rules, codes, or ordinances shall prevail to the extent allowed by law.

**CHAPTER C RULES OF CONSTRUCTION AND MEASUREMENT**

**Section 1 Rules of Construction**

The rules set out in this Section shall be used to enforce and apply this Code, unless such rules are inconsistent with the Plan. References to Florida Statutes (F.S.) and the Florida Administrative Code (F.A.C.) refer to citations published in 2003 as may be amended.

**A. General**

1. **Rules and Definitions**
   
The rules and definitions set out in this Section shall not be applied to any express provision, which are specifically excluded. This Code shall be liberally construed in order that the intent of the Plan may be fully carried out. In cases of conflict, the Plan shall prevail to the extent of the conflict. Terms used in this Code, unless otherwise stated, shall have the meanings prescribed by the statutes of the State of Florida for the same terms.

2. **Interpretation and Application**
   
The interpretation and application of any provision in this Code shall be the minimum required to promote the public health, safety, comfort, convenience, and general welfare. Where interpretation and application of any provision in this Code imposes greater restrictions upon the subject matter than a general provision imposed by the Plan or other provision in this Code, the provision imposing the greater restriction shall control.
   
a. **Affected Area** – Use of the term “affected area” shall refer to that portion of a project which is the subject of a Development Permit, Development Order, or a modification, including all aspects and peripheral areas.
   
b. **And** – All cases apply.
   
c. **Building or Structure** – Use of terms “building” or “structure” shall refer to the classification of the subject building or structure in the Florida Building Code.
   
d. **Common Words and Punctuation** – Common words, phrases and punctuation shall be construed and understood according to the common and approved use of the English language. Common words shall have the meaning assigned to them in the latest edition of an English dictionary unless otherwise defined in this Code.
   
e. **Computation of Time** – The time within which an act is to be completed shall be computed by excluding the first day and including the last day; if the last day is a Saturday, Sunday, or legal holiday recognized by PBC, that day shall also be excluded.
   
f. **Day** – A working weekday unless otherwise stated or used in reference to a violation. Violations shall be calculated on calendar days.
   
g. **Delegation of Authority** – If the head of a Department, Division, or other PBC Official or employee is required to do some act or perform some duty, it shall be construed to authorize the head of the Department, Division, or other official or employee to designate, delegate, and authorize professional-level subordinates to perform the required act or duty on their behalf, unless the terms of the Provision or Section specify otherwise.
   
h. **Gender** – Words implying the masculine gender shall be construed to include the feminine and neuter genders.
   
i. **Headings** – Headings of Articles, Chapters, Sections, and Subsections shall not be construed as the sole meaning or intent of the underlying regulation or standards.
j. Include/Such As – Use of the word “include,” “includes,” or “including” or terms “such as” shall not limit a term to the specified examples, but shall extend its meaning to all other instances or circumstances of like kind or character.

k. May – Permissive.

l. Month – A calendar month.

m. Must – Mandatory.

n. Number – A word importing the singular number only may extend and be applied to several persons or things as well as to one person or thing. The use of a plural number shall be deemed to include any single person or thing.

o. Or – Either or both cases apply

q. Project – Use of the term “project” shall refer to the entire development referenced or implied in the regulation, standard or definition.

r. Rounding of Fractions – Rounding may be permitted for itemized requirements such as minimum parking spaces, trees, shrubs, or other similar required by this Code, as well as linear or area dimensions, except that PDRs for minimum lot dimensions may only be rounded for legal lots of record, and rounding shall not apply to density. Rounding shall not be permitted for any build-to-lines, maximum height limitations, or any measurement used to calculate a number. The results of calculations containing a fraction of 0.5 or greater, shall be rounded up to the nearest whole number; and, a fraction of less than 0.5 shall be rounded down to the nearest whole number. [Ord. 2017-025]

s. References – Reference to the F.S., the F.A.C., and the Code of Federal Regulations refer to citations published in 2003 as may be amended.

t. Shall – Mandatory.

u. Technical Words and Undefined Terms – Technical words and undefined terms, phrases, terms of art, vernacular, and the use of words which have acquired a peculiar and appropriate meaning and which are not defined in this Code shall be construed and understood according to such meaning.

v. Tense – Words used in the past or present tense shall also include the future tense and conversely.

w. Terms Found in the Plan – Terms not found in this Code, but found in the Plan, shall have the meaning given in the Plan.

x. Text – In case of any difference of meaning between the text of this Code and any figure, graphic, or table, the text shall control.

y. Week – Seven calendar days.

z. Weekend – Friday, Saturday, and Sunday. [Ord. 2012-027]

zz. Written – Any representation of words, letters, or figures whether by printing or other form of writing.

zzz. Year – A calendar year, unless otherwise indicated.

Section 2 District Boundaries

In case of uncertainty, the PZB Executive Director shall interpret the intent of the Official Zoning Map to determine the location of boundaries. Where uncertainty exists concerning the boundary of a district on the Official Zoning Map, the following rules shall apply. [Ord. 2011-016]

A. Bisecting Lines
   Where boundaries approximately bisect blocks, the boundaries shall be the median line of such blocks, or the centerline of the street that forms a boundary.

B. Center Lines
   Boundaries indicated as approximately following the center lines of streets, alleys, or highways shall be construed as following such center lines.

C. Excluded Areas
   Where parcels of land or water areas have been inadvertently excluded from a district, said parcels shall be given an Agricultural Residential (AR) classification.

D. Lot, Section, and Tract Lines
   Boundaries indicated as approximately following platted lot lines, section, or tract lines shall be construed as following such lines.
E. Parallel Lines
1. Lots with Frontage on Highway, Alley, or Railroad R-O-W
   Where boundaries are approximately parallel to a street, highway, alley, or railroad R-O-W, the distance of such boundaries from the property line of such shall be, one existing lot depth unless otherwise shown by dimensions on the Official Zoning Map.

2. On Parallel Lots, Acreage, or Tracts
   The distance of such boundaries from the property line to the nearest lot line shall be between lots to conform to adjacent district lines or approximately 150 feet.

F. Political Boundaries
   Boundaries indicated as approximately following political boundaries shall be construed as following such political boundaries.

G. Railroad Lines
   Boundaries indicated as following railroad lines shall be construed as following centerline of the railroad R-O-W.

H. Shorelines
   Boundaries indicated as approximately following shorelines shall be construed as following such shorelines. In the event of a change in the shoreline, boundaries shall be construed as moving with the actual shoreline. Boundaries indicated as approximately following the center lines of streams, rivers, canals, lakes, or other bodies of water shall be construed to follow such center lines.

Section 3 Special Provisions for Lots Divided by District
A lot in its existing configuration as of the effective date of this Code, located in two or more zoning districts not as a result of actions by the Property Owner, shall apply the following:

A. Use Regulations
   If more than 50 percent of the lot area is located in one district, the use regulations applicable to the district containing the majority lot area shall apply to the entire lot, if consistent with the Plan.

B. Property Development Regulations (PDRs)
   If more than 50 percent of the gross lot area is located in one district, the PDRs applicable to the district containing the majority lot area shall apply to the entire lot.

Section 4 Measurement
Distance requirements between a proposed use and another use shall require the spatial separation to be measured between the proposed and the other use within the unincorporated PBC and, if applicable, other jurisdictions, including municipalities and other counties. If a conflict exists between this Section and another Section, the definition in Art. 1.H, Definitions and Acronyms, shall apply.

A. Depth
   From the lowest point of an excavated area to the ordinary high water mark.

Figure 1.C.4.A – Typical Example to Measure Depth
B. Distance
By drawing a straight line from a site element, use, or structure to:
1. The intersection of two centerlines;
2. Another site element, such as parking; or,
3. A specific distance, such as 1,320 feet.

Figure 1.C.4.B – Typical Example of Measurement of Distance from Center Line to Site Element

Figure 1.C.4.B – Typical Example of Measurement of Distance to a Specific Site Element (Parking Space)

Parking spaces in excess of 400’ from the public entrance are required to provide pedestrian sidewalks.
C. Height
From finished grade to highest point or peak of roof.

1. Building Height
Refer to definitions of building height in Art. 1.H, Definitions and Acronyms.

Figure 1.C.4.C – Typical Example of Measurement of Building Height

2. Fence/Wall Height
Refer to Art. 5.B.1.A.2.a. Height Measurement.

Figure 1.C.4.C – Typical Example of Measurement of Fence/Wall Height

3. Hedge Height

Figure 1.C.4.C – Typical Example of Measurement of Hedge Height

4. Berm Height
Refer to Art. 7.D.6.C, Height Measurement, and Figure 7.D.6, Berm Elevation and Drainage Requirements. [Ord. 2005-002]
D. **On Center**
   By drawing a straight line between.
   1. Individual trees or shrubs (centerline to centerline); or
   2. Tree clusters, or shrub clusters (centerline to centerline).

**Figure 1.C.4.D – Typical Example of Measurement from Centerline**
E. Separation from a Structure
By drawing a straight line from the closest point on the perimeter of the exterior wall, structure or bay to another structure, the property line, or a well or septic.

Figure 1.C.4.E – Typical Example of Measurement of Separation from Structure

F. Separation from a Property Line
By drawing a straight line from the closest point on the perimeter of the exterior wall, structure or bay to the base building line, the R-O-W line, the edge of the water, or the property line.

Figure 1.C.4.F – Typical Example of Measurement of Separation from a Property Line
G. Separation from a Zoning District or FLU Designation
When adjacent parcels, located in different zoning districts or FLU designations, and are separated by a R-O-W, the required separation distance shall be measured by drawing a straight line from the closest point of the applicable structure to the closest point of the adjacent property line across the R-O-W. [Ord. 2018-002]

H. Sound
In decibels as defined in the specific Article and measures for impact from the adjacent property line.

I. Gasoline Pumps
For the purposes of Art. 1.F, Nonconformities and Art. 4.B, Use Classification, any fraction of the number of pumps shall be rounded upward to the nearest whole number for one-half or more of a whole pump, and downward if it is less than one-half of a whole pump. [Ord. 2010-005]
J. Surface Area
A polygon drawn tangent to the extremities of a vertical or horizontal plane and calculated to provide total acreage or square footage.

![Figure 1.C.4.H – Typical Examples of Measurement for Surface Area](image)

K. R-O-W, Improved
By drawing a straight line between a site element, use or structure to the ultimate R-O-W.

![Figure 1.C.4.I – Typical Examples of Measurement from Improved R-O-W](image)

L. Building Transparency
For the purpose of determining a building’s transparency requirement, the following calculation shall be utilized: the height of the first story of the building, a minimum height of 12 feet above finished grade, multiplied by the length of the façade and the applicable transparency percentage. The window or glass door openings including frames and mullions shall be allowed to be included in the calculation. [Ord. 2010-022]

M. R-O-W, Unimproved
By drawing a straight line between a site element, use or structure to the base building line.

Section 5 Density, Intensity, and Building Coverage

That portion of a property conveyed or dedicated for public right-of-way without compensation may be subsequently included with the subject property for the purpose of density, intensity, or building coverage calculations. [Ord. 2009-040] [Ord. 2010-005]

CHAPTER D IMPLEMENTATION

Section 1 Minimum Requirements

The provisions of this Code are the minimum requirements necessary to accomplish the purposes of this Code and implement and ensure consistency with the Plan.

Section 2 Effective Date

A. The effective date of this Code is January 1, 2004.
B. Applications submitted after the effective date of this Code shall be reviewed in accordance with the standards and procedures in this Code.
CHAPTER E   PRIOR APPROVALS

Section 1  General

A. Purpose and Intent
This Section establishes the review and approval procedures for: Development Orders or Permits approved prior to the effective date of this Code and their vested status, nonconforming site elements of a prior approval, and establish extent of vested status of the limits of affected area of modifications. [Ord. 2010-005]

B. Prior Approvals
All Development Orders, permits, enforcement orders, ongoing enforcement actions, and all other actions of the BCC, the ZC, the DRO, Enforcement Boards, all other PBC decision making and advisory boards, Special Masters, Hearing Officers, and all other PBC Officials, issued pursuant to the procedures established by prior PBC land development regulations, shall remain in full force and effect. The uses, site design, intensity, density, and tabular data shown on a Development Permit that was approved in accordance with a prior Ordinance, shall not be subject to the requirements of this Code for any information clearly shown. This information may be carried forward onto subsequent plans if necessary to implement the previously approved plan. [Ord. 2010-005] [Ord. 2010-022]

1. Prior Variances, Exemptions, or Waivers
Previously approved variances, exemptions, or waivers from property development regulations and standards no longer required by this Code shall remain in effect until superseded, modified, abandoned, voided, or revoked by the authority which granted the original approval. Such prior approvals may only be used in their entirety, as originally approved, and may not be amended or modified. [Ord. 2010-005]

C. Modification of Prior Approvals
A Development Order or Permit, which was approved under prior Code provisions, shall comply with the current review process for any modifications and the following: [Ord. 2010-005] [Ord. 2016-042]

1. Determination of Extent of Vested Status in the Area of Modification
The proposed modification shall comply with the current Code to the greatest extent possible in the affected area, which also includes the determination of whether the prior approval has nonconformities. A prior approval may be subject to rezoning in accordance with the requirements of Art. 3.A.3, Zoning District Consistency with the Future Land Use Atlas (FLUA). [Ord. 2010-005] [Ord. 2011-016]

2. Modification to a Prior Approval with Nonconformities
Proposed modifications may not increase a nonconformity. The Applicant shall identify the extent of the proposed modification on the applicable plan and in the application pursuant to Art. 2.A.6.B, Plan Requirements. The application and plan shall: [Ord. 2010-005]
   a. list all prior Zoning resolutions and prior ULDC Amendment Ordinances to establish a record of any prior vesting claim; [Ord. 2010-005]
   b. delineate on the plan the boundary of the affected area and indicate all proposed modifications; If necessary, the Zoning Director shall render decision on the affected area. [Ord. 2010-005]
   c. identify all nonconformities with prior approved Development Orders, which includes: lot, structure, use, and site elements of the subject property or affected area of the subject property to establish a record of nonconformities in the tabular data of the plan, and note on the plan these nonconformities, where applicable. [Ord. 2010-005]
   d. all nonconformities outside of the affected area that are clearly shown on a prior Development Order shall be vested. [Ord. 2010-005]

3. Mobile Home Park Exception
Pursuant to F.S. § 723.041(4), the placement of any size new or used mobile home and appurtenances on a mobile home lot shall be permitted in accordance with the lot sizes, separation and setback distances, and other requirements in effect at the time of the approval of the Development Order for the mobile home park, or any subsequent Development Order Amendment, if applicable. [Ord. 2016-042]

D. Invalid Approvals
Invalid Development Orders include those which have been revoked, voided, abandoned, or have expired. If a Development Order for a parcel of land is invalid, any future Development Order for that parcel shall be subject to all applicable provisions of this Code. [Ord. 2010-005]

E. Applications in Process
Development Order application that is found sufficient for review purposes shall be required to meet the Code provisions in effect on the date the application is submitted. The application shall not be required to
meet any subsequent Code amendments that may be adopted prior to final approval of the application by the appropriate Board or County Official. [Ord. 2010-005]

CHAPTER F NONCONFORMITIES

Section 1 General

A. Purpose and Intent
The purpose and intent of this Chapter is: to establish regulations to address lots, structures, uses and site elements that were lawfully established before this Code was adopted or amended, that now do not conform to the terms and current requirements of this Code; to regulate and limit the continued existence of such nonconformities; and, where possible, bring them into conformance with this Code.

In addition, this Chapter addresses projects within the Redevelopment Areas in Art. 3.B, Overlays (IRO, URAO, and WCRAO) where new developments and redevelopments are regulated by form-based design standards. The intent is to provide incentives to encourage infill and redevelopment in these areas, improve the overall quality of the surrounding communities, to address any development restrictions unique to each overlay and to ensure overall compliance with the general intent of non-conformity provisions. [Ord. 2010-005] [Ord. 2010-022]

B. Applicability
This Chapter applies to nonconforming lots, structures, uses and site elements. In determining whether such nonconformities will be regulated by the provisions of this Chapter, the following shall apply: [Ord. 2010-005]
1. Nonconforming status shall not be provided for any: lot, structure, use, or site element, which was illegally created, commenced, constructed or unlawfully continued, or commenced after the restrictions, became applicable. [Ord. 2010-005]
2. Nonconforming status shall only be authorized upon demonstration by the Applicant that a lot, structure, use or site element was created, commenced or constructed, and not merely contemplated, unless permitted by this Code. [Ord. 2010-005]
   a. For a nonconforming use, affidavits alone are not sufficient evidence to establish nonconforming status. The Applicant must demonstrate that the use was in continuous operation during business hours and not an occasional use of the property. The Applicant will be required to submit a Vested Use Recognition Form established by the Zoning Director to confirm the use is vested. [Ord. 2010-005]
3. An accessory nonconforming use shall not become the principal use. [Ord. 2010-005]
4. Exemption for All Designated Historic Sites/Structures by the BCC
   Limitations for maintenance, renovation and natural disaster damage repair shall not apply to conforming uses for nonconforming structures, site elements or lots that have been granted waivers from all applicable nonconformities by the BCC in accordance with Art. 9.B.4.B, Waiver of the Code Provisions, for historic sites. [Ord. 2010-022]

C. Improvements to Nonconformities
There are four classifications of improvements that may be made to nonconformities. These include: Expansion, Maintenance, Renovation, and Natural Disaster Damage Repair pursuant to Art. 1.H.2, Definitions. [Ord. 2010-005]

D. Improvement Value
Improvement Value, as determined by the Palm Beach County Property Appraiser, is utilized to calculate allowable improvements for all types of nonconformities listed in this Chapter. The maximum allowable improvement is based upon the Property Appraiser’s most recent Improvement Value of the structure as follows: 125 percent for non-government structures including structures in the Redevelopment Area or in the Overlays, and 185 percent for government structures. A Property Owner may apply to the Property Appraiser for a re-assessment to obtain the most recent improvement value of the structure. If a new value is established, it shall be forwarded directly to the Zoning Director from the Property Appraiser. [Ord. 2010-005]

E. Total Value of Improvements
The International Code Council’s Building Valuation Data Table, which provides the “average” construction costs per square foot, shall be used as the sole basis in determining the value of an improvement necessary to perform expansion, maintenance, renovation, or natural disaster damage repair for any type of nonconformity. The table is outlined in the most current building valuation data in the Building Safety Journal, as amended periodically by the International Code Council. As an alternative to the Building
Valuation Data table, an Applicant may submit other comparable guidelines adopted by law or accepted in practice by the Building Official. [Ord. 2010-005]

F. Expansion for Nonconformities
Expansion shall comply with Table 1.F.1.F. Nonconformities – Percentage and Approval Process for Expansion and other applicable Sections of this Chapter. No variance shall be permitted beyond the percentages stated in this Table. [Ord. 2010-005]

Table 1.F.1.F – Nonconformities

<td>Comply with applicable Code to greatest extent possible through applicable review approval process.</td>
</tr>
<tr>
<td>Non-Government and Government</td>
<td>Shall not be expanded in area it occupies unless it is being expanded into an area of a structure, which was designed and approved for such use in a valid Development Order prior to becoming nonconforming.</td>
<td>Shall not exceed 10% max. of approved floor area of the structure or 10% of the improvement value of the structures on site, whichever is less, or other form of measures pursuant to Art. 1.F.4.D, Expansion.</td>
<td>Shall not change or increase the nonconforming features of the structure. Shall not result in the expansion of a nonconforming use.</td>
<td></td>
</tr>
</tbody>
</table>

[Ord. 2010-005] [Ord. 2010-022]

Notes:
1. Nonconforming use in a nonconforming structure shall not expand.
2. Expansion shall be based upon intensity or density pursuant to Art. 1.F.4.D, Expansion.
3. Refer to Art. 1.F.5, Nonconforming Site Element for additional information.

G. Maximum Improvement to a Nonconformity
The standards, limitations, and approval processes for improvements to nonconformities shall be as follows: [Ord. 2010-005]
1. Maintenance, Renovation, and Natural Disaster Damage Repair – The total combined value for improvement classifications shall not exceed the allowable maximum percentage of any single improvement classification. The percentage of each improvement classification is pursuant to Table 1.F.1.G, Nonconformities – Percentage and Approval Process for Maintenance, Renovation, and Natural Disaster Damage Repair. [Ord. 2010-005]
2. Maintenance – may be performed in any 12-consecutive month period. [Ord. 2010-005]
3. Renovation and Natural Disaster Damage Repair – The cumulative changes in total value of improvement are calculated over the previous five-year period as a nonconforming use or structure is renovated or repaired for damages. [Ord. 2010-005]
4. Public utility facilities with nonconforming structures on existing sites shall not be subject to the requirements of this Chapter. [Ord. 2010-005]
5. For additional requirements for each type of nonconformities, see applicable Sections of this Chapter. [Ord. 2010-005]
6. No variance shall be permitted for the percentages stated in Table 1.F.1.F, Nonconformities – Percentage and Approval Process for Expansion. [Ord. 2010-005]
7. Repair for non-natural disaster damage shall comply with percentage pursuant to Table 1.F.1.F, Nonconformities – Percentage and Approval Process for Expansion. [Ord. 2010-005]

<td></td>
</tr>
</tbody>
</table>

**Notes:**

1. All percentages shall be based on the Improvement Value of the structure pursuant to Art. 1.F.1.D, Improvement Value, unless stated otherwise herein.
2. For non-conforming use in a conforming or non-conforming structure, the percentage of the non-conforming use shall apply.
3. A higher percentage shall be allowed for Government structures as appraisals by the Property Appraiser’s Office are conducted less for Government structures due to exemptions for property tax.
4. A higher percentage shall be allowed for Redevelopment Areas and Overlays to encourage infill and redevelopment that requires built forms to regulate uses. All improvements must comply with applicable Sections of Art. 3.B, Overlays.
5. If the use or structure is non-conforming, the maximum allowable percentage for improvements for the site elements shall be included in the total value of improvements.
Section 2  Non-Conforming Lot

A. Applicability
This Section shall only apply to non-conforming lots that do not meet the minimum lot acreage and dimensional criteria pursuant to Table 3.D.1.A, Property Development Regulations (PDRs) of this Code, if all of the following conditions are met: [Ord. 2008-037] [Ord. 2010-005]

1. **FLU and Zoning Consistency**
The existing zoning or any rezoning is in compliance with the requirements of Art. 3.A.3, Zoning District Consistency with the Future Land Use (FLU). [Ord. 2008-037] [Ord. 2010-005] [Ord. 2019-034]

2. **Lot Recombination Requirements**
Where applicable, the lot or lots have complied with the lot recombination requirements of Plan FLUE Policy 2.2.1-r, and Art. 11, Subdivision, Platting, and Required Improvements. [Ord. 2008-037] [Ord. 2010-005]

B. Subdivision (Includes Lot Combinations)
Non-conforming lots may be combined with any other conforming or non-conforming lot without obtaining Variance relief for non-conforming lot dimensions, inclusive of frontage, width, depth, and size, if all of the following conditions are met: [Ord. 2008-037] [Ord. 2010-005]

1. The newly created lot complies with the lot dimensions of this Code, or reduces the non-conformity; and [Ord. 2008-037] [Ord. 2010-005]

2. Can comply with the requirements of Art. 11, Subdivision, Platting, and Required Improvements. [Ord. 2008-037] [Ord. 2010-005]

C. Residential Development Regulations
A non-conforming residential lot may utilize the following property development regulations for a Single Family dwelling unit only, or for related accessory structures in the AR district in accordance with Art. 5.B.1.A.1.d.2)b), Non-Conforming Lot Dimensions. [Ord. 2010-005] [Ord. 2016-042]

1. **Minimum Setback Requirements**
Minimum setback requirements may be in accordance with the percentages listed below: [Ord. 2010-005] [Ord. 2016-042] [Ord. 2019-034]
   a. If the minimum depth dimension is non-conforming: [Ord. 2010-005]
      Front:  30 percent of lot depth. [Ord. 2010-005]
      Rear:  20 percent of lot depth. [Ord. 2010-005]
   b. If the minimum width dimension is non-conforming: [Ord. 2010-005]
      Side Interior: 15 percent of lot width. [Ord. 2010-005]
      Side Street: 20 percent of lot width. [Ord. 2010-005]

2. **Building Coverage**
The maximum lot coverage calculations shall be based on the size of the lot indicated in the Table below, and shall include accessory structures. [Ord. 2010-005] [Ord. 2016-042]

<table>
<thead>
<tr>
<th>Non-Conforming Lot Size</th>
<th>Max. Building Coverage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Greater than 2.5 ac.</td>
<td>15%</td>
</tr>
<tr>
<td>20,000 sq. ft.-2.5 ac.</td>
<td>20%</td>
</tr>
<tr>
<td>14,000 sq. ft.-19,999 sq. ft.</td>
<td>30%</td>
</tr>
<tr>
<td>13,999 sq. ft. and under</td>
<td>40%</td>
</tr>
</tbody>
</table>

[Ord. 2016-042]

3. **Floor Area Ratio**
Maximum Floor Ratio Area (FAR) requirements for the AR district do not apply. [Ord. 2016-042]

4. **Accessory Structures**
Accessory structures shall comply with all applicable Code requirements. [Ord. 2010-005] [Ord. 2016-042]
Figure 1.F.2 – Non-Conforming Lots and Setbacks

SCENARIO

Application of setbacks for Residential Lots

For the purpose of calculating setbacks for residential lots, the AR zoning district has been selected for this explanation.

1. Example of Conforming Lots: See Diagram A. Lot complies with minimum acreage and lot dimensions:
   - Minimum acreage = 10 ac
   - Front setback (F) = 100'
   - Rear setback (R) = 100'
   - Side Interior (SI) = 50'
   - Side Corner (SC) = 80'

2. Example of Non-Conforming Lots: See Diagrams B
   Lots do not comply with minimum lot dimensions.

LEGEND

- Road
- Building

F = Front
SC = Side Corner
SI = Side Interior
R = Rear

Minimum setbacks
- F = 100'
- SC = 80'
- S = 50'
- R = 100'

Example of Non-Conforming Lots in AR District

- Single lot 3 acres
- F = 30% depth = .30 x 250' = 75'
- SC = 20% width = .20 x 101' = 20'
- S = 15% width = .15 x 101' = 15'
- R = 20% depth = .20 x 250' = 50'

[Ord. 2005-002] [Ord. 2010-005] [Ord. 2016-042]
D. Accessory Quarters

Accessory Quarters on non-conforming lots with an RR FLU designation that are equal to or less than one and one-half acres may utilize a 25-foot side or rear setback, subject to the following where the setback is less than the setback required for the SFD unit: [Ord. 2006-004] [Ord. 2010-005] [Ord. 2017-007]

1. A minimum five-foot-high continuous solid opaque visual screen consisting of a hedge, fence, or wall, shall be installed and maintained along the property line adjacent to the length of the Accessory Quarters. [Ord. 2006-004] [Ord. 2010-005] [Ord. 2017-007]

2. Ingress/egress to the Accessory Quarters shall not be oriented towards the adjoining property. [Ord. 2006-004] [Ord. 2010-005] [Ord. 2017-007]

E. Non-Residential Development and/or Residential Development Other Than Single Family

Non-residential development and residential development other than Single Family may be developed, subject to the following: [Ord. 2008-037] [Ord. 2010-005]

1. The proposed use is allowed by this Code; and [Ord. 2010-005]

2. All other PDRs, supplemental development regulations, and setbacks for the use are met, or Variances are obtained pursuant to the requirements of Art. 2.B.7.E, Type 2 Variance or Art. 2.C.5.E, Type 1 Variance and Art. 2.C.5.F, Type 1 Waiver. [Ord. 2008-037] [Ord. 2010-005] [Ord. 2010-022] [Ord. 2018-002]

Section 3 Non-Conforming Structure

A. General

A non-conforming structure may continue to exist in accordance with this Section. [Ord. 2010-005]

B. Expansion

Expansion of a non-conforming structure shall not change or increase the non-conforming features of the structure, and shall not result in the intensification of a non-conforming use through the structural expansion. Expansion shall not exceed the percentage pursuant to Table 1.F.1.F, Nonconformities – Percentage and Approval Process for Expansion. [Ord. 2010-005]

C. Maintenance, Renovation, and Natural Disaster Damage Repair

Maintenance, renovation, and damage repair caused by acts of nature shall not exceed the percentage pursuant to Table 1.F.1.G, Nonconformities – Percentage and Approval Process for Maintenance, Renovation, and Natural Disaster Damage Repair. [Ord. 2010-005]

D. Uses and Structures within an Airport Zone Established in Article 16

1. Applicability

Uses, structures, and other obstructions permitted prior to the effective date of the Airport regulations, November 1, 1996, that lie within regulated areas defined in Art. 16, Airport Regulations, which do not comply with the Airport Land Use Compatibility Schedule or FDOT, “Guidelines for the Sound Insulation of Residences Exposed to Aircraft Operations,” or exceeds permitted height limitations shall be considered a non-conforming use unless the structure or use is brought into conformance with the provisions of Art. 16, Airport Regulations. [Ord. 2010-005] [Ord. 2017-025]

a. Exemptions

Land Uses within regulated areas for PBC Park Airport (Lantana), PBC Glades Airport (Pahokee), Belle Glade Municipal Airport, and Palm Beach North County Airport are exempt from the requirements of this Article. [Ord. 2010-005] [Ord. 2017-025]

2. Existing Uses and Occupancy

The requirements of Art. 16, Airport Regulations, shall not be construed to necessitate the removal, lowering, or other modification of a structure or building supporting an existing use non-conforming to the requirements therein, or otherwise interfere with the continuance of such use which legally existed prior to November 1, 1996, provided the continuation does not jeopardize life or health. Construction or alterations which existed or started prior to November 1, 1996, and are diligently pursued and completed in accordance with building permitting requirements as defined by PZB, shall not be required to comply with the provisions in Art. 16, Airport Regulations. [Ord. 2010-005] [Ord. 2017-025]

a. Change in Use and Occupancy

If a change of use is proposed for an existing structure or building which does not comply with the Airport Zoning provisions for that particular use, as specified in the Airport Land Use Compatibility Schedule, the entire structure or building shall be brought into conformance with Art. 16, Airport Regulations. [Ord. 2010-005]
3. Discontinuance or Cessation
A nonconforming use or structure that is intentionally discontinued, abandoned, or changed shall lose its nonconforming status and shall not be reestablished or resumed. Any subsequent use or structure in the same location shall be consistent with this Code. A use or structure that has been discontinued, abandoned, or changed for a period of more than 180 consecutive days, or for a total of 540 calendar days during any three-year period, shall constitute a presumption of the intent to discontinue, abandon, or change the use or structure. In the event either time period has been exceeded, an Applicant shall have the burden of rebutting the presumption by presenting competent, substantial evidence of the intent to maintain the nonconforming use or structure. [Ord. 2017-025]

4. Repair, Reconstruction, Restoration, or Alteration of a Structure
   a. Height Restrictions
      Permits shall not be granted that would allow an existing structure to become higher or become a greater hazard to air navigation than it was as of November 1, 1996. All structures shall comply with Art. 16.B.1, Airspace Height Regulations. [Ord. 2010-005]
   b. Use Regulations
      Any permits to substantially modify, repair, restore, reconstruct, or rebuild a structure supporting a non-conforming use shall comply with Art. 16.C.1.E, General Land Use Regulations – Off-Airport Land Use Compatibility Schedule (Appendix 8). In such cases, the entire building or structure shall be brought into conformance with these requirements. For the purposes of this Article, substantially modify shall mean: [Ord. 2010-005] [Ord. 2017-025]
      1) the structure is more than 80 percent torn down, destroyed, deteriorated, or decayed; or [Ord. 2010-005]
      2) the Total Value of Improvement of repair, reconstruction, or restoration exceeds 50 percent of the Improvement Value of the existing building or structure. [Ord. 2010-005] [Ord. 2013-001] [Ord. 2017-025]
      If the structure does not meet these criteria, then only the new construction, alteration, or repair shall be subject to the requirements of Art. 16, Airport Regulations. [Ord. 2010-005]

5. Relocated Buildings
   Buildings or structures moved into or within Palm Beach County, into a RPZ or ALUNZ shall comply with the height and noise level reduction provisions in Art. 16, Airport Regulations. [Ord. 2010-005]

6. Obstruction and Marking Requirements
   Any repair restoration, reconstruction or alteration to a non-conforming structure or establishment of a new use shall require compliance with the Obstruction Marking and Lighting provisions in Art. 16.B.1, Airspace Height Regulations. [Ord. 2010-005]

Section 4 Nonconforming Use

A. Nonconforming Use Classifications
   There are three classes of nonconforming uses: Major, Minor, and Nonconforming to Airport Regulations. [Ord. 2010-005]
   1. Major
      A major nonconforming use is a use that was legally established in a zoning district where the use is now prohibited under the terms of this Code. Major nonconforming uses are inappropriately located and create or threaten to create incompatibilities that are detrimental to the public welfare. The intent of the PBC Comprehensive Plan is to eliminate or reduce existing or previously approved land uses, and activities, which were lawful before the adoption of the Plan but are now prohibited, regulated, or restricted under the terms of the Plan. [Ord. 2010-005]
   2. Minor
      A minor nonconforming use is a use that was legally established in a zoning district under a prior Code and one or more of the following applies: the use has been changed to a more restrictive review or approval process under the terms of this Code; DOAs or improvements to the use would exceed the development and approval thresholds; or, the use does not meet the property development regulations of this Code. Minor nonconforming uses do not create or threaten to create incompatibilities injurious to the public welfare. An Applicant who is requesting modification or improvement to a minor nonconforming use is encouraged to apply pursuant to the review and approval process now in effect to correct the nonconforming status of the use for the benefit of future Development Order Amendments and other types of improvements. [Ord. 2010-005] [Ord. 2015-006]
3. **Nonconforming to Airport Regulations**

Requirements for uses nonconforming to Airport regulations are set forth in [Art. 1.F.3.D. Uses and Structures within an Airport Zone Established in Article 16](#). Nonconforming uses that are also nonconforming to the Airport zoning regulations shall comply with both the nonconforming provisions in [Art. 1.F. Nonconformities](#) and the nonconforming provisions in [Art. 16, Airport Regulations](#). These uses shall be regulated as follows: [Ord. 2010-005] [Ord. 2017-025]

- A major nonconforming use shall comply with the major nonconforming use provisions in [Art. 1.F, Nonconformities](#). [Ord. 2010-005] [Ord. 2017-025]
- A minor nonconforming use shall comply with both provisions of the minor nonconforming use provisions in [Art. 1.F, Nonconformities](#) and the Nonconforming to Airport Regulations in [Art. 16.C.2, Nonconforming Uses](#). [Ord. 2010-005] [Ord. 2017-025]

**B. Change in Use**

A nonconforming use shall not be changed to any other use, unless the new use conforms to this Code. A nonconforming use physically replaced by a permitted use shall not be re-established. [Ord. 2010-005]

**C. Discontinuance or Cessation**

A nonconforming use that is intentionally discontinued, abandoned, or changed to an accessory use shall lose its nonconforming status and shall not be reestablished or resumed. Any subsequent use in the same location shall be consistent with this Code. A use that has been discontinued, abandoned, or changed to an accessory use for a period of more than 180 consecutive days, or for a total of 540 calendar days during any three-year period shall constitute a presumption of the intent to discontinue, abandon, or change to an accessory use. In the event either time period has been exceeded, an Applicant shall have the burden of rebutting the presumption by presenting competent, substantial evidence of the intent to maintain the nonconforming use. [Ord. 2010-005] [Ord. 2017-025]

**D. Expansion**

1. **Major Nonconforming Use**

   Expansion shall not exceed the percentage pursuant to [Table 1.F.1.F, Nonconformities – Percentage and Approval Process for Expansion](#). [Ord. 2010-005]

2. **Minor Nonconforming Use**

   A minor nonconforming use may be expanded pursuant to [Table 1.F.1.F, Nonconformities – Percentage and Approval Process for Expansion](#), and the following: [Ord. 2010-005]

   - The expansion shall not exceed ten percent of the approved floor area of the structure or ten percent of the improvement value of the structures on site, whichever is less; or any other form of measure of intensity/density for the specific use such as but not limited to: beds for congregate living facilities; decks for restaurants; number of children for daycares; number of fueling stations or gas pumps for Retail Gas and Fuel Sales; or, other traffic intensity measures. [Ord. 2010-005] [Ord. 2017-007]

**E. Maintenance, Renovation, and Natural Disaster Damage Repair**

Shall not exceed the percentage pursuant to [Table 1.F.1.G, Nonconformities – Percentage and Approval Process for Maintenance, Renovation, and Natural Disaster Damage Repair](#). For natural disaster damage repair, improvement value shall be established at the time the damage occurred. [Ord. 2010-005]

**F. Relocation**

See [Figure 1.F.4, Relocation and Expansion](#) for permitted relocation of nonconformities. A nonconforming use shall not be relocated. [Ord. 2010-005]
Section 5 Nonconforming Site Element

A. Applicability
This Section establishes procedures for improvements and modifications to a prior approval with nonconforming site elements and establishes thresholds for vesting nonconformities. This Section shall apply to non-conforming site elements, including but not limited to: Art. 5.E.4.E, Outdoor Lighting, Art. 6, Parking, Loading, and Circulation, Art. 7, Landscaping, and Art. 8, Signage that may be impacted by proposed improvements or modifications to a prior approval. In addition, this Section shall also apply to projects that meet the threshold pursuant to Art. 5.B, Accessory Uses and Structures and Art. 5.C, Design Standards, and those that are subject to Art. 16, Airport Regulations. [Ord. 2010-005] [Ord. 2019-005]
B. **Modification or Improvement to a Prior Approval with Nonconforming Site Elements**

Proposed modification or improvement to a project where the use or structure is conforming or has been brought into conformance with this Code through an applicable approval process, and where only the site elements are nonconforming, the following requirements shall be met: [Ord. 2010-005]

1. **Projects without an Approved Plan**
   A project without an approved plan shall comply with this Code. [Ord. 2010-005]

2. **Unbuilt Projects with an Approved Plan**
   An unbuilt project with an approved plan shall only comply with Art. 6, Parking, Loading, and Circulation, Art. 7, Landscaping, and Art. 8, Signage in the affected area to the greatest extent possible without the loss of density, intensity, or required parking. [Ord. 2010-005]

3. **Built Projects with an Approved Plan**
   Projects, which have commenced development or have been constructed, shall comply with the requirements of this Code and the following: [Ord. 2010-005]
   a. Projects with 80 percent or more of the approved density or intensity (number of units, square feet, or footprint of buildings) constructed shall remain valid for any information and items clearly shown on the approved Development Order. The affected area shall meet this Code to the greatest extent possible. [Ord. 2010-005]
   b. Projects with less than 80 percent of the approved density or intensity constructed shall comply with Art. 6, Parking, Loading, and Circulation, Art. 7, Landscaping, and Art. 8, Signage in the affected area to the greatest extent possible without the loss of density, intensity, or required parking. [Ord. 2010-005]

C. **Additional Improvement Threshold for Nonconforming Site Elements**

When improvements are proposed to a conforming structure with a conforming use, the associated nonconforming site elements must also be improved to comply with current Code requirements (See Zoning Division Technical Manual for examples). The required improvements shall be determined based on the Improvement Value of the structure pursuant to Table 1.F.5, Thresholds for Improvements – Nonconforming Site Elements. These improvements are required in addition to the standards pursuant to Art. 1.F.5.B.3, Built Projects with an Approved Plan. [Ord. 2010-005]

[Ord. 2010-005]

Notes:
1. The percentage is based on the Improvement Value of conforming structure(s). [Ord. 2010-005]
2. The percentage applies to improvements for a conforming use or structure with nonconforming site elements. If the use or structure is nonconforming, the maximum allowable percentage shall comply with Table 1.F.1.F, Nonconformities – Percentage and Approval Process for Expansion. [Ord. 2010-005]
3. Applies only to exterior renovations or additions to existing buildings and structures. [Ord. 2010-005]

D. **Standalone Improvements to Nonconforming Site Elements**

Standalone improvements to nonconforming site elements shall comply with Art. 1.F.5.B, Modification or Improvement to a Prior Approval with Nonconforming Site Elements in the affected area, to the greatest extent possible, and the following, where applicable: [Ord. 2010-005]

1. **Outdoor Lighting**
   Alterations or additions to outdoor lighting shall comply with Art. 5.E.4.E, Outdoor Lighting. [Ord. 2010-005]
2. **Vehicular Use Areas**
Alterations or additions to vehicular use areas shall comply with Art. 5.E.4.E, Outdoor Lighting Standards, Art. 6, Parking, Loading, and Circulation, and Art. 7, Landscaping. [Ord. 2010-005]

a. **Non-Residential PDDs and TMDs Parking Calculation**
   Proposed modifications to a previously approved development, whether modifications is for the entire or a portion of the development, shall be in compliance with the following: [Ord. 2010-005]
   1) the minimum parking requirements pursuant to the non-residential parking requirements of Art. 3.E.1.C.2.h, Parking; and [Ord. 2010-005]
   2) applicable Sections of Art. 7, Landscaping. [Ord. 2010-005]

3. **Sign Renovations or Additions**
Approved signs as shown on plans or pursuant to conditions of an approval shall remain valid. Renovations or additions to a sign shall be in compliance with Art. 8, Signage. The maximum percentage of improvements for a non-conforming sign shall be based on the original value of the previously approved sign. [Ord. 2010-005]

4. **Landscaping**
Approved Landscape Plans shall remain valid unless the development is amended or modified. The affected area of the amended or modified plans shall be subject to Art. 7, Landscaping to the greatest extent possible. All plans shall also be subject to Art. 14.C, Vegetation Preservation and Protection. [Ord. 2010-005]

---

**CHAPTER G  EMINENT DOMAIN**

**Section 1  Properties Affected by Eminent Domain Proceedings**

A. **Applicability**
For the purposes of this Code, an eminent domain action occurs when property is acquired through an eminent domain proceeding or where such property is voluntarily conveyed under the threat of condemnation to a condemning authority. This Section shall apply to all properties impacted by an eminent domain action. Site improvements and conditions, including non-conforming features and uses existing prior to the time of the eminent domain action shall not be affected by this Section. This Section alone shall not cause a specific use on a property impacted by an eminent domain action to cease.

B. **Development Standards**
Properties and site improvements impacted by eminent domain action may continue to exist and may expand as outlined below.

1. **General**
   Where, due to an eminent domain action, a reduction in the size of a lot causes a reduction below the required lot area, setbacks, parking, landscaping, sign location, or other development regulations in this Code, the structure(s) on the property, the use(s) within the structure(s), and other site improvements may continue to exist in the configuration remaining after the condemnation, except that:
   a. **Access**
      The length of access ways shall not be less than ten feet measured from the R-O-W, unless otherwise approved by the County Engineer; and
   b. **Direction**
      Ingress and egress to and from the site shall be in a forward direction.

2. **Enlargement or Change in Use**
A structure or other site improvement located on property reduced by an eminent domain action may be enlarged or expanded if the enlarged or expanded portion meets the requirements of this Code.
   a. **Parking**
      Parking for the new use shall utilize the excess spaces, if any provided for the existing use.
      1) For the purpose of determining the required parking, the Code in effect at the time of the enlargement or change in use shall be used.
      2) There shall be no reduction in required spaces designated for physically disabled persons. Where parking is reduced, the use of off-site parking, cross-parking agreements, and shared parking agreements are encouraged.
3. Redesign of Sites

Redesign of sites, at any time, is encouraged for the purposes of achieving safer sites and enhanced landscaping along roadways. Site improvements may be relocated or replaced elsewhere on site and shall be approved if the redesign meets current Code requirements, unless otherwise stated in this Section. Redesign shall follow the permitting procedures of this Code, except for provisions specifically identified in this Section.

   a. Variance Required for New Deviation from Regulations

   A Variance shall be obtained for any additional deviation from required property development regulations or site design standards proposed by the redesign. Any redesign or expansion which reduces an existing deviation from required property development regulations or site design standards shall not require a Variance. When applying the Variance standards in Art. 2.B.7.E, Type 2 Variance, and Art. 2.C.5.E, Type 1 Variance, the eminent domain action shall be presumed to be sufficient evidence to demonstrate a hardship (only applies to Type 2 Variance Standard “d.” listed under Art. 2.B.7.E.6, Standards for Zoning or Subdivision Variance). To encourage site redesign, in cases when a DRO Site Plan approval and a Variance would both be required, only a Variance shall be required. [Ord. 2010-022] [Ord. 2014-001]

   b. Modification of Zoning Commissions ZC or BCC Approved Plans

   Where a proposed redesign is located on property that is the subject of a plan approved by the ZC or BCC, redesign shall be approved by the DRO even if the redesign is in excess of the limitations in Art. 2.C.5.C, Administrative Modifications to Prior DOs. Conditions imposed by the ZC or BCC shall not be amended without ZC or BCC approval, whichever is applicable.

   c. Parking Area Reduction

   If site redesign involves either a lot combination, vehicular use area, or alteration required by Art. 1.G.1, Properties Affected by Eminent Domain Proceedings, a reduction of up to 35 percent of the required spaces shall be permitted provided:
   1) The access standards of Art. 6.B.3.A.2.a.3), Driveways and Access are met; and
   2) A minimum of five feet wide landscape buffer with landscaping as required in Art. 7, Landscaping, is installed along the frontage of the property.

4. Damage and Restoration of Structures

A structure subject to this Section which becomes damaged may be reconstructed in the location and manner as it legally existed before the eminent domain action except that a structure that is destroyed or damaged in excess of more than 50 percent of its value at the time of reconstruction shall be considered a vacant lot pursuant to Art. 1.G.1.B.6, Lots Reduced by Eminent Domain. In determining the value of such a structure, the standards and procedures described in Art. 1.F.3, Non-Conforming Structure, shall be used.

5. Signs

Any existing, legally established point of purchase or freestanding sign located on the property included in the eminent domain action may be relocated on site subject to the standards of this Section provided any sign(s) to be relocated shall comply with the requirements of this Code and the following criteria:

   a. Sign Number and Size

   Any sign(s) to be relocated shall comply with the height, size (face area), and maximum number of signs allowed in accordance with the requirements of the Code. [Ord. 2005-002]

   b. Sign Relocation

   In no event shall the front setback be less than five feet from the ultimate R-O-W and have less than a two-foot side setback, except upon issuance of a sign relocation permit. [Ord. 2005-002]

   c. Sign Relocation Permit

   Signs that must be relocated which are physically precluded from compliance with the setback requirements in Art. 1.G.1.B.5.b, Sign Relocation, above may obtain, upon payment of a fee, a sign relocation certificate from the Zoning Director subject to this Subsection. The Zoning Director shall issue a sign relocation certificate provided the Applicant can meet the following standards: [Ord. 2005-002]
   1) The sign relocation in accordance with Art. 1.G.1.B.5.b, Sign Relocation, above, would not create additional loss in the number of required parking spaces; [Ord. 2005-002]
   2) The proposed sign location does not encroach into the R-O-W, unless it is part of negotiated settlement with the condemning authority; and, [Ord. 2005-002]
   3) There is no other location on the subject property to place the sign consistent with safe vehicular use area design. [Ord. 2005-002]
6. **Lots Reduced by Eminent Domain**
   A lot reduced by an eminent domain action to any size or configuration below that required by the applicable zoning district may be developed, subject to the following: [Ord. 2014-001]
   a. Uses subject to lot size requirements in **Art. 4.B, Use Classification**, shall comply with those standards. Type 2 Variance relief may be requested from this requirement if it cannot be met as a result of the eminent domain action; and [Ord. 2014-001]
   b. In all cases, required district setbacks shall be used.

7. **Lot Combination**
   Lot combinations are encouraged for the purposes of creating safer, more functional and aesthetically pleasing developments, and attaining a greater degree of compliance with Code requirements. This Section may apply to the combined lots whether or not they are owned by the same person. Combined lots may be considered as a single lot for the purposes of applying property development regulations, provided either a cross-parking or cross-access agreement is executed. The agreement shall be made in the form acceptable to the County Attorney and recorded in the Official Records of PBC. Lot combination shall follow the permitting requirements and procedures of this Code, except as provided below:
   a. **Parking Credit**
      Except as provided below, required parking for combined lots may be administratively reduced by up to 20 percent upon approval by the DRO of a Site Plan which reduces the number of access points and the execution of a Unity of Control which includes a cross-parking or cross-access agreement.
   b. **Razed Lots**
      Lots which have been combined and where all principal structures have been demolished shall be considered a vacant lot pursuant to **Art. 1.G.1.B.6, Lots Reduced by Eminent Domain**.
   c. **Sites Subject to Approved Site Plans or Certificates of Conformity**
      For properties, which are the subject of a valid Certificate of Conformity, the Certificate may be amended, upon application by the Property Owner and approval of the DRO, to allow the combination and the configuration shown on the Certificate may be implemented. Where a proposed lot combination is located on property which is the subject of a Site Plan approved by the BCC, combination may be approved by the DRO even if the redesign proposes Site Plan changes in excess of the administrative limits contained in **Art. 2.C.5.C, Administrative Modifications to Prior DOs**, of this Code. Conditions imposed by the BCC shall not be amended without BCC approval.

C. **Certificates of Conformity**
   A Certificate of Conformity issued pursuant to either Ordinance No. 73-2, as amended, or Ordinance No. 92-20, as amended through June 1993, shall be honored provided the Certificate of Conformity was issued to the Property Owner, or a notice of intent to issue a Certificate of Conformity was signed by the Property Owner before June 30, 1994 and is presently on file at the Zoning Division.
CHAPTER H DEFINITIONS AND ACRONYMS

Section 1 General

A. Terms in this Code shall have the following definitions. Supplemental terms and definitions are defined in specific Articles and/or their Chapters. The definitions outlined in this Article apply to all Articles, unless specifically outlined in the respective Article. If a conflict exists in terms between Articles, the terms defined in the specific Article shall apply.

B. All provisions, terms, phrases, and expressions contained in this Code shall be liberally construed in order that the true intent and meaning of the BCC as established in the Plan may be fully carried out. Terms used in these regulations, unless otherwise specifically provided, shall have the meanings prescribed by the statutes of the State of Florida for the same terms.

C. In the interpretation and application of any provision of this Code it shall be held to be the minimum requirements adopted for the promotion of the public health, safety, comfort, convenience, and general welfare. Where any provision of this Code imposes greater restrictions upon the subject matter than a general provision imposed by the Plan or another provision of this Code, the provision imposing the greater restriction or regulation shall be deemed to be controlling.

Section 2 Definitions

A. Terms defined herein or referenced in this Article shall have the following meanings:

1. A-Weighted Sound Pressure Level – for the purposes of Art. 5, Supplementary Standards, the sound pressure level as measured with a sound level meter using the A-Weighting network. The standard notation is dB.

2. Abandon – given up, unused, vacant, or not occupied for the purpose it was originally intended.

3. Abandoned Tower – any commercial communication tower whose principal use has been discontinued for a period in excess of three months.

4. Abutting Property – lying immediately adjacent to and sharing a common property line with other property.

5. Accent Lighting – For the purposes of Art. 5.E.4.E, Outdoor Lighting, shall mean lighting used to accent a sculpture, trellis, waterfalls, statue, foot bridge, rock outcrop, fountain or other similar feature and landscaping. [Ord. 2008-037]

6. Access, Legal – the principal means of access from a lot to a public street or to a private street over which a perpetual ingress and egress easement or R-O-W has been granted to the owners of any lot serviced by such street.

7. Access Way – a non-dedicated area that is permitted for ingress or egress of vehicles or pedestrians. An access way is permitted to traverse a required landscape buffer.

8. Accessory Agricultural Uses – For the purposes of Art. 4.B, Use Classification, these uses include “U-Pick-Em” operations; sale of on-site produced products; corrals; pens; training facilities; dipping vats; processing of raw material; storage sheds; repair, fabrication, body work and welding of agricultural equipment; freestanding coolers; bulk storage of petroleum products; shipping containers used for temporary storage; washing, cutting, and packing of farm products, and canning, dehydration, and basic preparation of raw food products prior to shipment and outdoor storage of equipment. [Ord. 2005-002]

9. Accessory Building or Appurtenant Structure – for the purposes of Art. 18, Flood Damage Prevention, a structure that is located on the same parcel of property as a principal structure and the use of which is incidental to the use of the principal structure. Accessory structures should constitute a minimal investment not to exceed 25 percent of the value of the primary structure, shall not be used for human habitation, and be designed to have minimal flood damage potential. Examples of accessory buildings or appurtenant structures for flood damage purposes are detached garages, carports, storage sheds, and barns. All structures used for human occupancy shall be deemed principal structures and shall comply with these regulations, and not be defined as an Accessory Building or Appurtenant Structure. [Ord. 2004-013]

10. Accessory Building or Structure – a detached, subordinate structure meeting all property development regulations (PDRs), the use of which is clearly incidental and related to that of the principal building or use of the land, and which is located on the same lot as that of the principal building or use.

11. Accessory Overnight Accommodation (AOA) – A limited service overnight facility for visiting researchers, scientists and dignitaries. [Ord. 2004-040]
12. **Accessory-Retail** – Where a retail sales use is not the principal use, but may be permitted as an accessory use. [Ord. 2010-005]
13. **Accessory Use** – see Uses, Accessory
14. **Acre** – land or water consisting of 43,560 square feet.
15. **Acreage, Gross** – the total land area, including all public and private areas, within the legal boundaries of a particular parcel of land or project.
17. **Adaptive Use** – for the purposes of Art. 9, Archaeological and Historic Preservation, the process of converting a building to a use other than that which it was originally designed.
18. **Addition** – means any walled and roofed expansion to the perimeter of an existing building. Expansion shall be connected by a roof line, foundation, and a common load-bearing wall of an existing building. Any walled and roofed expansion, which is connected by a firewall or is separated by independent perimeter load-bearing walls, is considered as new construction, and not an addition. An expansion that is connected to an existing building by a breezeway shall be considered an accessory structure. [Ord. 2018-018]
19. **Adequate Protection by Treatment** – for the purposes of Art. 15, Health Regulations, any one or any combination of the controlled processes of coagulation, sedimentation, absorption, filtration, or other processes in addition to disinfection which produces water consistently meeting the requirements of this Article including processes which are appropriate to the source of supply.
20. **Adjacent Parcel of Land** – A parcel of land that has all or part of a boundary in common with another parcel, including point to point, or is separated from such parcel by a street, easement, R-O-W, waterway, park or other minor geographical division. [Ord. 2008-037]
21. **Administrative Inquiry** – a request by PBC Officials to the Board of County Commissioners (BCC) for direction on procedural matters or to resolve inconsistencies in a Development Order; or to provide status or an inquiry of a specific site when the Monitoring provisions of Art. 2E, Monitoring of Development Orders (DOs) and Conditions of Approval are not applicable. [Ord. 2011-016] [Ord. 2017-002]
22. **Adopted Level of Service (LOS)** – for the purposes of Art. 12, Traffic Performance Standards, LOS D; except as specifically set forth by the Plan or pursuant to Policies of the Transportation Element. For Test 2 it is LOS E except as set forth by the Plan.
23. **Adverse Effect** – for the purposes of Art. 9, Archaeological and Historic Preservation, any action which will significantly alter or destroy a historic resource. [Ord. 2008-037]
24. **Adverse Impact** – for the purposes of Art. 18, Flood Damage Prevention, the increased probability of damage to structures from flooding or from floodwater erosion. [Ord. 2004-013]
25. **Advertising Structure** – for the purposes of Art. 8, Signage, a sign representing or directing attention to a business, commodity, service, or entertainment, conducted, sold, or offered.
26. **Aerobic Treatment Unit** – for the purposes of Art. 15A, PBC Environmental Control Rule I – Onsite Sewage Treatment and Disposal Systems, as defined by Chapter 64E-6, F.A.C.
27. **Aeronautical Study** – means a Federal Aviation Administration study, conducted in accordance with the standards of 14 CFR 77, Subpart C, and Federal Aviation Administration policy and guidance, on the effect of proposed construction or alteration upon the operation of air navigation facilities and the safe and efficient use of navigable airspace. [Ord. 2017-025]
28. **Affected Area** – For the purposes of Art. 1E, Prior Approvals, the area on a plan or a development that is subject to the proposed modification, including but not limited to: lot, structures, uses, or site elements. [Ord. 2010-005]
29. **Affidavit of Exemption** – for the purposes of Art. 2, Application Processes and Procedures, a document, recorded in the public record, evidencing the grant of an exemption for an unrecorded subdivision existing prior to February 5, 1973, from the provisions of the former PBC Subdivision and Platting Regulations (Ord. No. 73-4), as amended, granted pursuant to said regulations.
30. **Affidavit of Waiver** – for the purposes of Art. 11, Subdivision, Plating, and Required Improvements, a document evidencing the grant of an exception to the platting requirement or the required improvements installation requirement.
31. **Affordable Housing** – a dwelling unit for which a household spends no more than 30 percent of its gross income for housing costs. Rental housing costs include contract rent and utilities. Owner occupied housing costs include mortgage principal and interest, property taxes, insurance, and, where applicable, homeowner's association fees. The current median income for PBC and income categories established within the Plan are available at the Planning Division.
32. **Affordable Housing Program** – a voluntary program used by an Applicant seeking additional density for an affordable housing development. [Ord. 2009-040]

33. **AGR-PUD Gross Site Area** – the land area of the PUD less land dedicated per the Thoroughfare Identification Map. The gross site area includes land to be used for other R-O-W, streets, Preservation Areas, Development Areas, water retention, open space, commercial, recreation, and civic uses.

34. **AGR-PUD Preservation Area** – land contained in the preservation pod preserved in perpetuity to bona-fide agriculture, fallow land, water preserve areas, wetlands or uplands.

35. **AGR-PUD 60/40 Development Area** – that portion of the PUD which contains the residential, recreational, civic, and commercial pods with support facilities such as streets, internal open space, and stormwater retention areas.

36. **AGR-PUD 80/20 Development Area** – that portion of the PUD which contains the residential, recreational, civic, and commercial pods.

37. **Aggrieved or Adversely Affected Person** – any person or local government which will suffer an adverse effect to an interest protected or furthered by the Plan, including interests related to health and safety, police and fire protection systems, densities or intensities of development, transportation facilities, health care facilities, or environmental or natural resources. The alleged adverse effect may be shared in common with other members of the community at large, but shall exceed in degree the general interest in common good shared by all persons.

38. **Agriculture, Food Processing** – a facility for the canning, dehydration and basic preparation of raw food products, such as the washing and cutting prior to shipment.

39. **Air Rights** – the right to use space above ground level.

40. **Air Space** – for the purposes of Art. 16, Airport Regulations any vehicle which is used or designed for navigation of or flight in the air.

41. **Airport** – for the purposes of Art. 16, Airport Regulations, any area of land or water designed and set aside for the taking off, maneuvering and landing of aircraft and used or to be used in the interest of the public for such purpose, including Palm Beach International Airport (PBIA), Park Airport (Lantana), PBC Glades Airport (Pahokee), Belle Glade Municipal Airport, Palm Beach North County Airport and Boca Raton Airport and any area owned or operated by PBC, or other public entity, validly licensed by the State of Florida for public use. [Ord. 2017-025]

42. **Airport Elevation** – for the purposes of Art. 16, Airport Regulations, the highest point of an airport's usable landing area measured in feet above mean sea level (AMSL).

43. **Airport Hazard** – for the purposes of Art. 16, Airport Regulations, an obstruction to air navigation which effects the safe and efficient use of navigable airspace or the operation of planned or existing air navigation and communication facilities. [Ord. 2017-025]

44. **Airport Hazard Area** – for the purposes of Art. 16, Airport Regulations, any area of land or water upon which an airport hazard might be established. [Ord. 2017-025]

45. **Airport Land Use Compatibility Zoning** – for the purposes of Art. 16, Airport Regulations, airport zoning regulations governing the use of land on, adjacent to, or in the immediate vicinity of airports. [Ord. 2017-025]

46. **Airport Layout Plan** – for the purposes of Art. 16, Airport Regulations, a set of scaled drawings that provide a graphic representation of the existing and future development plan for the airport and demonstrate the preservation and continuity of safety, utility, and efficiency of the airport. [Ord. 2017-025]

47. **Airport Master Plan** – a comprehensive plan for an airport which typically describes current and future plans for airport development designed to support existing and future aviation demand. [Ord. 2017-025]

48. **Airport Protection Zoning Regulations** – for the purposes of Art. 16, Airport Regulations, means airport zoning regulations governing airport hazards. [Ord. 2019-005]

49. **Airport Obstruction** – for the purposes of Art. 16, Airport Regulations, any existing or proposed permanent or temporary object, natural growth or terrain, or structure construction or alteration which would exceed the Federal obstruction standards as contained in 14 CFR 77, Subpart C (as may be amended from time to time). [Ord. 2017-025]

50. **Airspace Height** – for the purposes of Art. 16, Airport Regulations, the height limits as established and set forth in this Section. Above Mean Sea Level (AMSL) elevation shall be the datum unless otherwise specified.
53. **Alley** – a R-O-W providing a secondary means of access to property that is not intended or used for principal traffic circulation.
   a. a R-O-W providing a secondary means of access to property that is not intended or used for principal traffic circulation. [Ord. 2010-022]
   b. for the purposes of the Priority Redevelopment Areas, may provide for primary vehicular access to a building, parking and service areas. [Ord. 2010-022]

54. **Alter Structurally** – for the purposes of **Art. 8. Signage**, in the case of a sign means to make a change in the supporting members of a structure, such as bearing walls, columns, beams, sign poles or posts, or girders, that will prolong the life of the structure.

55. **Alteration**
   a. for the purposes of **Art. 9, Archaeological and Historic Preservation**, any change affecting the exterior appearance of an existing structure or improvement by additions, reconstruction, remodeling, maintenance or structural changes involving changes in form, texture, materials or color or any such changes in appearance in specially designated historic sites, or historic interiors;
   b. for the purposes of **Art. 14.C, Vegetation Preservation and Protection**, human-caused activity that modifies, transforms, or otherwise changes the vegetation, including, but not limited to:
      1) Removal, displacement, mowing, or disturbance (severe pruning, hatracking or internodal cutting, or poisoning) of vegetation excluding prescribed burns for the management of native vegetation communities;
      2) Removal, displacement, demucking, or disturbance of soil, rock, minerals, or water within the plant’s root zone;
      3) Introduction of livestock for grazing; [Ord. 2005-003]
      4) Placement of vehicles, structures, debris, fill, or other material objects thereon, including introduction or injection of water and other substances; and,
      5) Use of mechanical equipment within the plant’s root zone.
   c. for the purposes of **Art. 16, Airport Regulations**, modification to any permanent or temporary existing structure by a change in the structure's height, including appurtenances, lateral dimensions, and equipment or materials used in the structure. [Ord. 2019-005]

57. **Alteration, Building** – any change in the structure which will increase the number of dwelling units, the floor area, or height of the structure.

58. **Alteration of a Watercourse** – for the purposes of **Art. 18, Flood Damage Prevention**, a dam, impoundment, channel relocation, change in channel alignment, channelization, or change in cross-sectional area of the channel or the channel capacity, or any other form of modification which may alter, impede, retard, or change the direction and/or velocity of the riverine flow of water during conditions of the Base Flood. [Ord. 2017-026]

59. **Alternative Landscape Plan (ALP)** – a plan showing the location, quantity, and species of plants to be installed at non-residential, Multifamily, or residential planned developments. This plan shall be designed to preserve and incorporate existing native vegetation in excess of minimum standards or demonstrate innovative use of plant material and improve site design.

60. **Ambulatory Surgical Center** – An establishment primarily providing elective surgical care, in which the patient is admitted to and discharged within the same working day and is not permitted to stay overnight; and which is not part of a hospital. [Ord. 2017-007]

61. **Animal Control Facility** – means a government owned facility charged with enforcement of all Local, State and Federal laws pertaining to animals or animal welfare, operation of an animal shelter(s), licensing of certain animals, investigations for dangerous dogs and animal-to-human bites, impoundment of stray or unwanted animals, disposition and adoption of animals, licensing and permitting of animal businesses as outlined in Palm Beach County Ord. No. 98-22, as may be amended, administration and oversight of animal welfare and animal issues that relate to animal protection, public safety and public health, rabies surveillance and vaccination programs, development of local standards for both public and private animal shelters and animal rescue organizations, and development and oversight of pet overpopulation programs. [Ord. 2008-037]

62. **Animal Shelter** – means a not for profit institutional establishment regulated by ACC Ord. No. 98-22, as amended, as a humane society, or private animal non-profit organization on 2.5 acres or more or when open to the public, that is used for the protection of unwanted or abandoned domiciled animals, the use of which may include sheltering, adoption, fostering, providing rescue or old age homes, medical or behavioral rehabilitation, or other accessory uses as may be permitted by ACC that are not regulated elsewhere by this Code. [Ord. 2008-037]
63. **ANSI**—the American National Standards Institute or its successor bodies.

64. **Antenna Height**—the overall vertical length of the antenna and antenna support structure above grade, or if such system is located on a building, then the overall vertical length includes the height of the building upon which the structure is mounted. In the event a retractable or demountable-type antenna support structure is utilized, the antenna height is to be calculated as the overall vertical length of the antenna and antenna support structure when fully extended.

65. **Antenna Support Structure**—any structure, mast, pole, tripod, or tower utilized for the purpose of supporting an antenna or antennas.

66. **Antiquated Subdivision**—as defined in the Plan.

67. **Appeal**—for the purposes of Art. 18, Flood Damage Prevention, a request for a review of the Floodplain Administrator’s interpretation of any provision of Art. 18, Flood Damage Prevention, which is filed with the Flood Damage Prevention Board. [Ord. 2017-025]

68. **Applicant**
   a. the owner of record, the agent pursuant to an agent’s agreement acceptable to the County Attorney or the mortgagor in the case of bankruptcy.
   b. for the purposes of Art. 12, Traffic Performance Standards, person seeking a Site Specific Development Order. In the Unincorporated Area, it consists of those Development Orders for which a Concurrency Certificate or Concurrency Exemption Determination is required.

69. **Approach Zone**—for the purposes of Art. 16, Airport Regulations, an area longitudinally centered on the extended runway centerline and extending outward and upward from each end of the primary zone. An approach zone is designated for each runway based upon the type of approach available or planned for that runway end.

70. **Appurtenance**—for the purposes of Art. 9, Archaeological and Historic Preservation, a part, possession, or other incidental part which is generally subordinate to, or adjoins the principal use of structure, i.e., fences, walls, steps, paving, sidewalks, signs and light fixtures.

71. **Aquifer**—a groundwater bearing geologic formation, or formations, that contain enough saturated permeable material to yield significant quantities of water.

72. **Arcaded Sidewalk**—a covered pedestrian walkway contiguous to a street, plaza or square that is open to the public and includes usable floor area above the roof of the arcade. [Ord. 2006-004] [Ord. 2010-022]

73. **Archaeological Evaluation Report**—for the purposes of Art. 9, Archaeological and Historic Preservation, a letter prepared by the County Archaeologist evaluating the potential significance of an archaeological site after issuance of a Suspension Order by the Department.

74. **Archaeological Resources**—all evidences of past human occupations which can be used to reconstruct the life ways of past peoples and evidence of past animal life in the form of non-human vertebrate fossils. These include sites, artifacts, environmental and all other relevant information and the contexts in which they occur. Archaeological resources are found in prehistoric and historic period sites and areas of occupation and activity.

75. **Archaeological Site**—property or location which has yielded or might yield information on PBC, State or Nation’s history or prehistory. Archaeological sites are evidenced by the presence of artifacts and features on or below the ground surface indicating the past use of a location at least 75 years ago by people or the presence of non-human vertebrate fossils. Archaeological sites include aboriginal mounds, forts, earthworks, village locations, camp sites, middens, burial mounds, missions, historic or prehistoric ruins which are, or may be the source of artifacts or other items of significant archaeological value.

76. **Archaeologist, Qualified**—a member of, or qualified for membership in the Florida Archaeological Council (FAC), or the Society of Professional Archaeologists (SOPA), Registry of Professional Archaeologists (RPA) or a person who meets the minimum professional requirements for an archaeologist as set by the United States Secretary of Interior. [Ord. 2008-037]

77. **Architectural Features**—for the purposes of Art. 9, Archaeological and Historic Preservation, architectural features include the architectural style, scale, massing sitting, general design and general arrangement of the exterior of the building or structure, including the type, style and color of roofs, type and texture of building material, public access open courtyards, windows, doors, and appurtenances. These features will include interior spaces where the interior has been given historic designation under the procedures listed in Art. 9.B.3.A, Application for Historic Site or District Designation.

78. **Architectural Terms**—for the purposes of Art. 5.C, Design Standards.
   a. **Architect**—a person licensed to engage in the practice of architecture under F.S. ch. 481, pt. I, and includes the term “registered architect.” [Ord. 2009-040]
b. **Architectural Compatibility** – similar architectural composition that is agreeable, consistent, complimentary, and provides a degree of architectural integration with the structures in the surrounding area. Particular attention should be given to scale, proportion, unity, harmony, and context. [Ord. 2009-040]

c. **Architectural Composition** – the scale, height, mass, proportion, color, form, style, detail, treatment, texture, construction material, and roof design of a project or building. [Ord. 2009-040]

d. **Architectural Style Sheets** – examples of various architectural elements and components that define a particular character, style, or classification of architecture. [Ord. 2009-040]

e. **Balance** – the pleasing or harmonious arrangement or proportion of parts or elements in a design or composition. [Ord. 2009-040]

f. **Green Architecture** – a building designed to limit its environmental impact through environmentally conscious methods of design and construction. The focus shall pertain to the exterior of the building i.e. façade, rooftop, exterior treatment, fenestration. [Ord. 2009-040]

g. **Harmony** – the orderly or congruent arrangement of elements or parts of a whole. [Ord. 2009-040]

h. **Order** – the condition of logical, harmonious, or comprehensible arrangement in which each element of a group is properly disposed with reference to other elements and to its purpose. [Ord. 2009-040]

i. **Proportion** – the comparative, proper, or harmonious relation of one part to another or to the whole with respect to magnitude, quantity, or degree. [Ord. 2009-040]

j. **Rhythm** – movement characterized by a patterned repetition or alternative of formal elements or not if it is in the same or a modified form. [Ord. 2009-040]

k. **Scale** – certain proportion to size, extent, or degree usually judged in relation to some standard or point of reference. [Ord. 2009-040]

l. **Style** – key elements associated with the style of a building. [Ord. 2009-040]

m. **Unique Structure** – a structure that is unusual, unequal, rare, or has distinct characteristics in relation to the architectural compatibility of a defined area. Scale, proportion, unity, and harmony shall be considered for unique structure classification. [Ord. 2009-040]

n. **Unity** – the state or quality of being combined into one that promotes a singleness effect. [Ord. 2009-040]

79. **Area of Potential Effect (APE)** – for the purposes of Art. 9, Archaeological and Historic Preservation, is the geographic area or areas within which a project’s undertaking may directly or indirectly cause changes in the character or use of historic properties, if such properties exist. The area of potential effects is influenced by the scale and nature of the undertaking and may be different for different kinds of effects caused by the undertaking. [Ord. 2008-037]

80. **Arterial Street** – see Street, Arterial.

81. **Articulated Parapet** – for the purposes of Art. 5, Supplementary Standards, a parapet with a height variation proportional to the building height.

82. **Artifacts** – for the purposes of Art. 9, Archaeological and Historic Preservation, relics, specimens, or objects of historical, prehistorical, archaeological, or anthropological nature, over 75 years old, which may be found on, above, or below the surface of the earth, including land and water, which have a scientific or historic value as objects of antiquity, as aboriginal relics, or as anthropological specimens, including but not limited to clothing, tools and weapons made of ceramics, worked stone, shell, bone, teeth, hide, feathers and horn, metal coins, glass, beads, building material, daub, and plant fibers. Objects over 75 years old but not of significant archaeological value shall not be considered an artifact for purposes of this Code. Further, objects under 75 years old and deemed by a qualified archaeologist to be of significant archaeological value shall be subject to the provisions of this Code.

83. **Artificial Light Source(s)** – for the purposes of Art. 14, Environmental Standards, any exterior source of light emanating from a man-made device, including but not limited to, incandescent, fluorescent, mercury vapor, low voltage, metal halide or sodium lamps, spotlights, flood lights, landscaping lights, street lights, vehicular lights, construction or security lights.

84. **Artisanal Use** – a land use involving the manufacture and sale of goods using only hand labor or table mounted electrical tools.

85. **ASCE 24** – for the purposes of Art. 18, Flood Damage Prevention, a standard titled Flood Resistant Design and Construction that is referenced by the Florida Building Code. ASCE 24 is developed and published by the American Society of Civil Engineers, Reston, VA. [Ord. 2017-026]

86. **Association, Master Property Owners’** – a Property Owners’ Association (POA) of which membership is mandatory with the ownership of property subject to the master POA and which has the authority to represent the members and bind the members by such representation.
87. **Association, Property Owners** – an organization recognized under the laws of the State of Florida, operated under recorded maintenance and ownership agreements through which each owner of a portion of a subdivision, be it a lot, home, property or any other interest, is automatically a voting member, and each such member is automatically subject to a charge for a prorated share of expenses, either direct or indirect, for maintaining common properties within the subdivision, such as roads, parks, recreational areas, common areas and other similar properties. Within the text of this Code, a POA is considered to be a single entity for property ownership. As used in this Code, the term “Property Owners’ Association” shall also be deemed to include a homeowner’s association (HOA), condominium association or cooperative (apartment) association, as defined in F.S. ch. 711, as amended, having a life tenure of not less than 20 years, as well as a third party having an agreement with a condominium or cooperative association as permitted by F.S. ch. 711, as amended.

88. **Assured Construction**
   a. For the purposes of Art. 12, Traffic Performance Standards, Road Construction Improvements scheduled to be made to the Major Thoroughfare System by one or more of the following means:
      1) Inclusion in the adopted Five-Year County Road Program for commencement of construction; provided any anticipated non-public funds are secured by Performance Security;
      2) Inclusion in the adopted Five-Year State Department of Transportation Work Program for commencement of construction;
      3) Major Intersection or Link improvement for which a contract for construction which is secured by Performance Security has been executed and which, by its terms, requires that construction be completed within six years;
      4) Major Intersection or Link improvement which will be constructed pursuant to an Agreement; and which, by its terms, requires that construction be completed within six years;
      5) Major Intersection or Link improvements which is required to be constructed pursuant to a condition of a Development Order which by its terms requires that it be completed within six years and which has been secured by Performance Security;
      6) Specific inclusion in the capital improvements element of a municipal comprehensive plan for commencement of construction within five years provided:
         a) The improvements are financially feasible, based on currently available public revenue sources adequate to complete the improvement; and
         b) A comprehensive plan amendment would be required to eliminate, defer, or delay construction; or
   b. For purposes of a Concurrency Certificate for a Site Specific Development Order only, a Major Intersection or Link that the Applicant agrees to construct and guarantee through a Condition of Approval, or Agreement, said construction to be completed prior to issuance of the Certificate(s) of Occupancy which are phased to the improvement(s) and to be secured by Performance Security within six months of issuance of the Site Specific Development Order. No further Development Orders for the Project shall be issued if Performance Security is not timely posted.

89. **Attic** – the non-habitable storage area immediately beneath the pitch of a roof.

90. **Automated Teller Machines (ATMs)** – computerized, self-service machines used by financial institution customers permitting a full range of financial transactions, including (but not limited to) deposits, withdrawals and fund transfers, or the technological evolution thereof, without contact with financial institution personnel. [Ord. 2013-021]

91. **Average Daily Traffic** – for the purposes of Art. 12, Traffic Performance Standards, the average of two 24-hour weekday traffic counts taken at one location, with one count being taken in the Peak Season and the other in the Off-Peak Season. The Traffic Volume Map of the MPO shall normally be used to determine existing ADT for the West Palm Beach Urban Study Area. However, in all cases, where newer data are available from the FDOT or PBC, such newer data shall be used. Any person may provide a traffic count or counts which may be used, subject to the prior approval of the County Engineer for count location and adjustment factors based upon accepted traffic engineering principles, instead of the counts used in creating the Traffic Volume Map(s) where such counts are not available. The Average Daily Traffic established by the counts of PBC shall not include Friday counts after 8:00 a.m.

92. **Aviation Easement** – for the purposes of Art. 16, Airport Regulations, the assignment of a right to an airport proprietor to a portion of the total benefits of the ownership of real property. The selected rights may be granted or may be purchased.

93. **Awning** – a temporary hood or cover that projects from the wall of a building and that may include a type, which can be retracted, folded, or collapsed against the face of a supporting building.
B. Terms defined herein or referenced in this Article shall have the following meanings:

1. **Background Traffic** – for the purposes of Art. 12, Traffic Performance Standards, the projected traffic generation from Previously Approved but incomplete Projects, and other sources of traffic growth, as described in Art. 12.C.1.C.2.e, Pass-By Trips and Art. 12.C.1.C.4, Background Traffic. [Ord. 2005-002]

2. **Balloons** – an airtight bag that rises above the earth when force filled with hot air.

3. **Banner** – see Flag.

4. **Banquet/Reception Hall Facility** – a facility rented or used for temporary gathering of people for food, entertainment, and celebration of an event.

5. **Base Building Line** – a line horizontally offset from and running parallel to the centerline of a street from which property development regulations, including landscaping, parking and setbacks for front yard, corner side yard, are measured as set forth in this Code.

6. **Base Flood Elevation (BFE)** – for the purposes of Art. 18, Flood Damage Prevention, the elevation of the Base Flood, including wave height, relative to the National Geodetic Vertical Datum (NGVD), North American Vertical Datum (NAVD), or other datum specified on the Flood Insurance Rate Map (FIRM). [Ord. 2004-13] [Ord. 2017-026]

7. **Basement** – for the purposes of Art. 18, Flood Damage Prevention, the portion of a Building having its floor subgrade (below ground level) on all sides. [Ord. 2017-026]

8. **Beach** – the zone of unconsolidated material that extends landward from the mean high water line of the Atlantic Ocean and inlets to the place where there is a marked change in material or physiographic form, or to the line of permanent vegetation, usually the effective limit of storm waves. Beach is alternately termed shore.

9. **Beach Access Point** – for the purposes of Art. 5, Supplementary Standards, any path through or over the dune used by the general public or, with respect to private property, by the owners or with the owner's permission, for the purpose of gaining access to the beach.

10. **Beach Compatible Sand** – for the purposes of Art. 14.A, Sea Turtle Protection and Sand Preservation, any sand that is similar to the native beach and dune material in terms of grain, size, distribution and color. The fill material shall consist of sand that falls within the same size classification of sand within the Unified Soils Classification System [i.e., fine sand (0.074 to 0.42 millimeters), medium sand (0.42 to 2.0 millimeters) and coarse sand (2.0 to 4.76 millimeters)] as that of the native beach material. The acceptable silt/clay fraction (less than 0.074 millimeters) and gravel/cobble fraction (greater than 4.76 millimeters) shall be based upon existing site conditions. Sand grain size analyses shall be consistent with the grain size methodologies described in ASTM standard D-422 and D-1140. The fill material color shall match the color of the existing beach and dune coloration. [Ord. 2011-001]

11. **Beachfront** – for the purposes of Art. 5, Supplementary Standards, sand placed on the beach.

12. **Beachfront Lighting** – for the purposes of Art. 14, Environmental Standards, all lighting within or causing illumination within the jurisdictional boundaries of this Chapter or which is directly or indirectly visible from the beach. For the purpose of this Chapter, Coastal Lighting is synonymous with Beachfront Lighting. [Ord. 2011-001]

13. **Beach Obstruction** – Any natural or artificially constructed structure(s) that: (1) does not constitute fixed structure(s); (2) does not require a Building Permit; (3) is not required for public safety; (4) upon review by the County Administrator or his/her designee does not present an actual or potential threat to the beach and the dune system and adjacent properties. All temporary manmade structures including but not limited to beach umbrellas, beach furniture, recreational equipment, boats or any other man-made items that interfere with the use of the beach as a nesting habitat. [Ord. 2006-036] [Ord. 2011-001]

14. **Benefit Zones** – for the purposes of Art. 13, Impact Fees, the geographic area as set forth in individual Chapters of this Article within which impact fees are collected and spent.

15. **Berm** – man made or natural change in grade not exceeding a three-in-one slope measured from the highest curb or parking area. A berm shall be constructed of clean fill as defined by DEP, excluding block, brick, tile and glass.

16. **Best Management Practices (BMPs)** – technologically and economically feasible means of preventing or reducing amounts of pollution generated by point and non-point sources to a level compatible with the water quality and quantity objectives of PBC. BMPs include schedules of activities, prohibitions of practices, maintenance procedures, and other management practices to prevent or reduce the pollution of waters. [Ord. 2013-021]

17. **Billboard** – a sign or structure, other than temporary signs as defined in this Article, portraying information or directing attention to a business, activity, commodity service, entertainment, or communication which is not conducted, sold or offered at the parcel on which the sign or structure is located, or which does not pertain to the parcel upon which the sign or structure is located.
18. **Billboard, Changeable Copy Sign Face** – a sign face containing one or more advertisements or promotions that are changed automatically or mechanically.

19. **Billboard Company** – any firm, organization, or individual which owns one or more billboards.

20. **Billboard Demolition Permit** – the permit issued by the Building Division which allows demolition of an existing billboard.

21. **Billboard Height** – measured from finished grade to the highest point of a billboard face, excluding temporary embellishments.

22. **Billboard Inventory** – the official inventory, as updated by the signatories to the billboard stipulated settlement agreement, of billboards existing in unincorporated PBC.

23. **Billboard, Lawfully Erected** – any billboard erected in PBC consistent with applicable Zoning Code and Building Permit procedures and described on the official inventory prepared by the PZB in 1988, and as updated pursuant to the billboard stipulated settlement agreement,

24. **Billboard Location** – an area within a radius of not more than 100 feet from the location of an existing billboard structure.

25. **Billboard Registration Permit** – the annual permit issued by the Zoning Division for existing billboards that can be replaced or relocated.

26. **Billboard Relocation** – the removal of an existing billboard structure from a billboard location included in the updated billboard inventory to a different location consistent with the terms of this Code and the billboard stipulated settlement agreement.

27. **Billboard Relocation Permit** – the permit issued by the Zoning Division which allows relocation of an existing billboard to another location.

28. **Billboard Replacement** – the removal of an existing billboard structure and construction of a new billboard within the permitted billboard location.

29. **Billboard Setback** – the required minimum horizontal distance between a billboard structure and all property lines.

30. **Billboard Sign Face** – the fixed or changeable portion of the billboard structure upon which one or more advertising messages are displayed.

31. **Billboard Stipulated Settlement Agreement** – the agreement between PBC, Ackerley Advertising, 3M National Advertising, and any other affected parties who may agree to the stipulations therein, approved on February 6, 1996 by the BCC to terminate legal proceedings initiated by Case No. 92-8752, Case No. CL92-1187-AO, Case No. 92-1187-AO, and Case No. CL93-7958AH.

32. **Billboard Structure** – all structural elements of a billboard, including but not limited to structural framework and supports, and lighting.

33. **Billboard Temporary Embellishment** – additional billboard area attached to and extending beyond the side and top of a billboard.

34. **Biohazardous Waste** – any solid waste or liquid waste, which may present a threat of infection to humans. The term includes, but not limited to, non-liquid human tissue and body parts; hospital, laboratory, or veterinary waste which contains human disease-causing agents; discarded sharps; human blood, human blood products, and body fluids.

35. **Biomass** – For the purposes of Art. 4, Use Regulations, Plant material, vegetation or agricultural waste used as a fuel or energy source. [Ord. 2008-037]

36. **Blank Copy** – any paraphernalia including pennants, streamers, and banners that are intended solely to attract attention and which contain no letters or symbols.

37. **Block**
   a. A parcel of land entirely surrounded by streets, railroad R-O-W, parks or other public space, or a combination thereof.
   b. For the purposes of Art. 3, Overlays and Zoning Districts, an area of land entirely bounded by streets.

38. **Boarding House** – a dwelling, or part thereof, in which lodging is provided by the owner or operation to three or more boarders.

39. **Boat Trailer** – any non-powered car coupled to, and drawn by, a motorcar in front of it for the carrying of boats.

40. **Boatyard** – a facility intended to provide complete construction or repair services for marine crafts in addition to such dry storage as may be found complimentary to the primary use, but not including docking of pleasure craft for residential purposes.

41. **Boca Taxing District** – the Greater Boca Raton Beach and Park Taxing District, including the municipal limits of Boca Raton.
42. **Bottled Water** – for the purposes of [Art. 15.B, PBC Environmental Control Rule II – Drinking Water Supply Systems](#), water that is sealed in a container or package and is offered for sale for human consumption or other uses.

43. **Bottled Water Plant** – for the purposes of [Art. 15.B, PBC Environmental Control Rule II – Drinking Water Supply Systems](#), any place or establishment in which bottled water is prepared for sale.

44. **Boundary Plat** – see [Plat, Boundary](#).

45. **Branch** – for the purposes of [Art. 7, Landscaping](#), a secondary shoot or stem arising from one of the main axes (i.e., trunk or leader) of a tree.

46. **Breakaway Walls** – any type of walls, whether solid or lattice, and whether constructed of concrete, masonry, wood, metal, plastic, or other suitable Building material, that is not part of the structural support of the Building and is intended through its design and construction to collapse under specific later loading forces without causing damage to the elevated portion of the Building or the supporting foundation system.

47. **Buffer Area** – for the purposes of [Art. 14.D, Prohibited Invasive Non-Native Vegetation Removal Ordinance](#), an area outside the perimeter of a designated natural area drawn by geographical information system reference which determines what is to be protected from unwanted seed source, prohibited invasive non-native vegetation removed, incentives provided and canopy replaced.

48. **Buffer, Landscape** – see [Landscape Buffer](#).

49. **Build-to-Line** – an alignment establishing a certain location for a building from either the R-O-W for a public street or the curb line along internal streets for a TMD, TND Neighborhood Center, WCRAO, IRO, or PRA project. [Ord. 2010-005] [Ord. 2010-022] [Ord. 2017-025]

50. **Buildable Area** – the portion of a lot remaining after the setbacks have been provided.

51. **Building**
   a. Any structure having a roof supported by columns or walls and intended for the shelter, housing, or enclosure of any individual, animal, process, equipment, goods, or materials of any kind or nature. For purposes of this Code, tanks (including but not limited to water, gas, and other types of storage tanks) and water towers will not be considered buildings. [Ord. 2007-013]
   b. For the purposes of [Art. 18, Flood Damage Prevention](#), a Structure that encloses an area for any use and shall not include structures such as walls, playground equipment, or gas tanks. The terms Structure and Building are interchangeable in the National Flood Insurance Program. [Ord. 2004-013] [Ord. 2017-026]

52. **Building Construction** – the erection of a structure intended for human habitation in the case of residential land use, or occupancy or use of such in the case of non-residential land use.

53. **Building Coverage** – that portion of the area of a lot, expressed as a percentage, occupied by the square footage of the ground floor area of a building or structure.

54. **Building, Elevated** – a non-basement building that has its lowest floor elevated above ground level by fill, solid foundation perimeter wall pilings, columns, posts or piers, shear walls, or breakaway walls.

55. **Building Frontage** – the linear dimensions of a building which faces upon a public street, projected along the street property line. Where a building faces two or more streets, the frontage containing the principal street address shall be designated as the building frontage.

56. **Building Height** – the vertical distance measured in feet from finished grade to the highest point of the roof for flat roofs; to the deck line for mansard roofs; and to the average height between eaves and the ridge for gable, hip and gambrel roofs.

57. **Building Mezzanine** – a low-ceilinged story between two main stories of a building. A mezzanine shall be counted as one story if it covers more than one-third of the area of the floor below.

58. **Building Permit**
   a. an official document or certificate issued by the governmental authority having jurisdiction, authorizing the construction of any building. Building Permit includes a tie-down permit for a structure or building that does not require a Building Permit, such as a mobile home, in order to be occupied.
   b. for the purposes of [Art. 12, Traffic Performance Standards](#), a Development Order under F.S. § 163.3164, issued under the Standard Building Code by the Building Division of PZB in the unincorporated area or similar department in a municipality authorizing the construction of a structure.

59. **Building Site** – a portion or parcel of land considered as a unit, devoted to a certain use or occupied by a building or group of buildings that are united by a common interest or use and customary accessory buildings and open spaces.

60. **Building Square Footage** – the gross constructed area of all buildings and structures covered by a solid or screened roof and totally or partially enclosed by walls or other material. Non-residential outdoor
areas covered or uncovered which functionally extend the primary use, such as open seating and open retail are included, except that uses which generally completely occur outdoors, such as vehicle or monument sales, nurseries, gasoline sales, salvage yards, and outdoor storage, are not included. Non-residential canopies and screened enclosures, which functionally extend the primary use, are included. Decorative canopies or canopies designed to protect from weather are not included. For Art. 13, Impact Fees, purposes of residential development, the square footage is the conditioned area of the building as measured to the outside of the exterior wall. If the residential structure or addition has no conditioned area, square footage shall be the living area of the building as measured to the outside of the exterior wall.

61. **Building Story** – the Florida Building Code says for purposes of determining construction type (material requirements, etc.), that a basement is not counted as a story when the upper surface of the first floor above it complies with all of the following:
   a. Is less than seven feet above grade;
   b. Is less than seven feet above finish ground level for more than 50 percent of the perimeter of a building; and
   c. Is less than 12 feet above finish ground level around the entire building perimeter.

62. **Building, Modular** – constructed in accordance with PBC Building Code, composed of components substantially manufactured and assembled off-site and shipped for final assembly on the building site on a permanent foundation.

63. **Building, Principal** – a building in which is conducted the primary use of the lot on which it is located.

64. **Buildout Period** – for the purposes of Art. 12, Traffic Performance Standards, the anticipated time between the issuance of the Site Specific Development Order and December 31st of the year of completion of a proposed Project as assumed in the Traffic Impact Study and approved by the County Engineer in accordance with the standards set forth in Art. 12.C.1.B.3, Projected Buildout Period. Completion of a project shall mean the issuance of the final Certificates of Occupancy (COs) for buildings in a project. [Ord. 2005-002] [Ord. 2007-013] [Ord. 2010-022]

65. **Bulkheads** – for the purposes of Art. 11, Subdivision, Platting, and Required Improvements, structures of concrete, wood, or other permanent material affixed to the land adjacent to a water management tract or other water body for the purpose of establishing a vertical surface at the waters edge and stabilizing the land behind the bulkhead; provided, however, that water control structures and endwalls around outfalls and bridges shall not be considered bulkheads.

66. **Bus Bays (Turnouts or Pullouts)** – For the purposes of Art. 5.H, Mass Transit Standards, a specifically constructed area off the normal roadway section for bus loading and unloading. Typically, they are used in areas of high bus and rider volumes with adequate right of way where the roadway speed limit is 40 MPH or greater. Located outside of the sight triangle, cross walk area and adjacent to the sidewalk, they require a minimum 12-foot travel lane adjacent to the curb side lane measured parallel to the adjacent roadway with adequate provisions for appropriate curb side Bus Stop infrastructure. Minimum length is dependent on distance to the adjacent curb/shoulder. [Ord. 2008-003]
   a. Urban (Curb and Gutter): A minimum 240-foot length is required (80-foot entrance taper, 100-foot stopping area for 2-buses, 60-foot exit taper). Increase the stopping area by 50-feet for each additional bus expected to stop simultaneously. [Ord. 2008-003]
   b. Rural (Shoulder): A minimum 190-foot length is required (80-foot entrance taper, 50-foot stopping area for 1-bus, 60-foot exit taper). Increase the stopping area by 50-feet for each additional bus expected to stop simultaneously. [Ord. 2008-003]

67. **Bus Bulb Outs (Nubs or Curb Extensions)** – For the purposes of Art. 5.H, Mass Transit Standards, a bus stop wherein the sidewalk is extended into the parking lane, thereby allowing the bus to pick up passengers without leaving the travel lane. Typically, they are used in areas of high pedestrian and vehicular activity with limited sidewalk space and where the roadway speed limit is less than 40 MPH. Located outside of the sight triangle, cross walk area and adjacent to the sidewalk, they require a minimum width of 30-foot measured parallel to the roadway. Adequate length measured perpendicular to the curb and transition to the curb are required. [Ord. 2008-003]

68. **Bus Rapid Transit (BRT)** – For the purposes of Art. 5.H, Mass Transit Standards, Flexible, rubber-tired rapid transit mode integrating facilities, services, and infrastructure that collectively improves the speed, reliability, and identity of bus transit by combining stations, vehicles, services, running ways, and Intelligent Transportation System (ITS) elements into an integrated system. [Ord. 2008-003]
   a. Stations: Bus Stop Boarding & Alighting Areas widened to 50 feet typically spaced 2,000 to 7,000 feet apart enabling buses to operate at high speeds and located curbside or on the outside of bus-only roads or arterial median busways. [Ord. 2008-003]
b. Vehicles: Conventional standard and articulated diesel buses but may include innovative and distinctive designs for dedicated BRT vehicles. [Ord. 2008-003]

c. Services: Service Patterns may include express, limited-stop, or all stop operation in addition to feeder bus services at selected stations and extending beyond the limits of busways and bus lanes. [Ord. 2008-003]

d. Running Ways: Dedicated guideways and high occupancy vehicle lanes that can include mixed traffic lanes, curb bus lanes contra-flow freeway bus lanes, separated rights-of-way (busways), and median busways on urban streets; reserved lanes on freeways; and bus only roads, tunnels, and bridges. [Ord. 2008-003]

e. Intelligent Transportation System (ITS): Automated Vehicle Locator (AVL) systems; passenger information systems; and transit preferential systems at signalized intersections, controlled tunnel or bridge approaches, toll plazas, and freeway ramps. [Ord. 2008-003]

69. **Bus Stop Boarding and Alighting Area** – For the purposes of Art. 5.H, Mass Transit Standards, The Bus Stop Boarding and Alighting Area is the area at a Bus Stop consistent with the above Bus Stop standards with a minimum 30-foot length inside, parallel to, and along the property line; and a minimum 10-foot depth inside and perpendicular to the development site property line. It can be as much as 200 feet from any site triangle. It must agree with applicable portions of the Palm Tran Design Manual as well as other ADA, FDOT, PBC requirements. [Ord. 2008-003]

70. **Bus Stop Zone** – For the purposes of Art. 5.H, Mass Transit Standards, The length of roadway designated, marked, or signed as available for use by a bus loading or unloading passengers including ingress and egress from a bus stop. [Ord. 2008-003]

C. **Terms defined herein or referenced in this Article shall have the following meanings:**

1. **Canopy** – a permanently roofed shelter whether fabric or hand construct, projecting over a sidewalk, driveway, entry, window, or similar area, which shelter may be wholly supported by a building or may be wholly or partially supported by columns, poles, or braces extending from the ground, free of enclosed walls.

2. **Canopy Tree** – see Tree, Canopy or Shade.

3. **Capacity** – for the purposes of Art. 13, Impact Fees, the maximum number of vehicles for a given time period which a road can safely and efficiently carry, usually expressed in terms of vehicles per day.

4. **Capital Drainage Facility** – the planning of, engineering for, acquisition of land for, or the construction of drainage facilities necessary to meet the LOS for Capital Drainage Facilities.

5. **Capital Facilities** – for the purposes of Art. 13, Impact Fees, land, infrastructure, structures, and fixtures having a cost or value of at least $1,000; personal property and equipment having an aggregate cost or value of at least $1,000; hard-bound books and materials having a cost or value of at least $25, which must be of a non-consumable nature and be expected to be in service for at least one year.

6. **Capital Facility Costs** – all costs directly associated with the acquisition, design, engineering, site preparation, construction and placement of a capital facility. It excludes operation and maintenance costs, and the repair, replacement, or renovation of existing capital facilities where the capital facility improvement does not add capacity.

7. **Capital Fire-Rescue Facilities** – for the purposes of Art. 13, Impact Fees, the planning of, engineering for, acquisition of land for, or the construction of fire-rescue facilities and the purchase of equipment necessary to meet the LOS for Capital Fire-Rescue Facilities.

8. **Capital Improvement Element** – the Capital Improvement Element of the Plan.

9. **Capital Mass Transit Facilities** – the planning of, engineering for, acquisition of land for, or the construction of or purchase of mass transit facilities and equipment necessary to meet the LOS for Capital Mass Transit Facilities.

10. **Capital Potable Water Facilities** – the planning of, engineering for, acquisition of land for, or the construction of potable water facilities necessary to meet the LOS for Capital Potable Water Facilities.

11. **Capital Recreation and Park Facilities** – the planning of, engineering for, acquisition of land for, or the construction of buildings and park equipment necessary to meet the LOS for Urban Capital Park and Recreation Facilities and Rural Capital Park and Recreation Facilities.

12. **Capital Road Facilities** – the planning of, engineering for, acquisition of land for, or the construction of roads on the Major Road Network System necessary to meet the LOS for Capital Road Facilities.

13. **Capital Sanitary Sewer Facilities** – the planning of, engineering for, acquisition of land for, or the construction of sanitary sewer facilities necessary to meet the LOS for Capital Sanitary Sewer Facilities.

14. **Capital Solid Waste Facilities** – the planning of, engineering for, acquisition of land for, or the construction of solid waste facilities necessary to meet the LOS for Capital Solid Waste Facilities.

15. **Carport/Private Garage** – a roofed accessory structure or a portion of a main building providing space for the parking or storage of motor vehicles of the occupants of the main building.
16. **Catchment** – for the purposes of Art. 11, Subdivision, Platting, and Required Improvements, a sub-area of a drainage basin which contributes stormwater runoff by overland flow to a common collection point.

17. **Certificate of Appropriateness** – for the purposes of Art. 9, Archaeological and Historic Preservation, a written document, issued under the terms and conditions of this Article, allowing specified alterations, demolition, construction, or other work to a designated historic site, or for a building or structure within a designated historic district.

18. **Certificate of Completion** – see Chapter 1 of the Florida Building Code with PBC Amendments.

19. **Certificate of Occupancy (CO)** – see Chapter 1 of the Florida Building Code with PBC Amendments.

20. **Certificate to Dig** – for the purposes of Art. 9, Archaeological and Historic Preservation, a written document, issued under terms and conditions of this Article and is necessary prior to:
   a. Issuance of a Development Order for parcels identified on the map of known archaeological sites;
   b. Removal of a suspension order on a site where artifacts or fossilized human remains or non-human vertebrate fossils are found during the development process; or,
   c. Issuance of a Development Order for a, Type 3 Excavation.

21. **Certification** – all applicable code regulations and standards have been addressed.

22. **Champion Tree** – the largest tree of a species which has been designated by the Florida Department of Agriculture and Consumer Services.

23. **Chapel** – For the purposes of Art. 4, Use Regulations, means a use other than a Place of Worship, for religious fellowship, prayer or worship as an accessory use to a non-religious institution or use, such as a College or University, Hospital, Prison, Funeral Home, Airport, and Cemetery. [Ord. 2017-007]

24. **Chipping and Mulching** – an establishment using equipment designed to cut tree limbs, brush or wood construction debris into small pieces for use as mulch.

25. **Circumference** – for the purposes of Art. 14.C, Vegetation Preservation and Protection, a measurement of the circular distance around a tree trunk measured at a point four and one-half feet above the ground.

26. **Clean Vegetative Matter** – for the purposes of Art. 4.B, Use Classification, clean vegetative matter shall mean free of contamination with any excluded materials in feed stock. [Ord. 2008-037]

27. **Clean Wood** – for the purposes of Art. 4.B, Use Classification, clean wood shall mean untreated wood. [Ord. 2008-037]

28. **Climb Gradient** – for the purposes of Art. 16, Airport Regulations, an aircraft instrument departure procedure requiring adherence to minimum climb stops or grade expressed in feet per nautical mile.

30. **Clustered Lots** – residential parking lots grouped on a common street or parking tract where access is either a dead end street, loop, or otherwise designed so as to preclude its extension for access to additional lots.

31. **Coastal Construction** – means the carrying out of any activity within jurisdictional boundaries specified in Art. 14.A, Sea Turtle Protection and Sand Preservation, to modify or improve site conditions including, but not limited to, building, clearing, filling, excavation, grading, removal or planting of vegetation, or the making of any material change in the size or use of any structure or the appearance of site conditions, or the placement of equipment or material upon such sites. [Ord. 2011-016]

32. **Coastal Construction Control Line** – for the purposes of Art. 18, Flood Damage Prevention, the line established by the State of Florida, pursuant to F.S. § 161.053, which defines that portion of the beach-dune system subject to severe fluctuations based on a 100-year storm surge, storm waves, or other predictable weather conditions. [Ord. 2017-026]

33. **Coastal High Hazard Area** – For the purposes of Art. 18, Flood Damage Prevention, a Special Flood Hazard Area extending from offshore to the inland limit of a primary frontal dune along an open coast and any other area subject to high velocity wave action from storms or seismic sources. Coastal High Hazard Areas are also referred to as “high hazard areas subject to high velocity wave action” or “V Zones” and are designated on a Flood Insurance Rate Map as Zone V1-V30, VE, or V. [Ord. 2004-013] [Ord. 2013-021] [Ord. 2017-026]

34. **Coastal Protection Zone** – an area of jurisdiction established by this section. This zone extends from the mean high water line of the Atlantic Ocean to a line 25 feet landward of the crest of the dune or the State of Florida Coastal Construction Control Line, whichever is more landward.

35. **Code** – Code of Laws and Ordinances of PBC, including the Unified Land Development Code (ULDC).

36. **Code Inspector** – any authorized agent or employee of PBC whose duty is to assure Code compliance.
37. **Collocated Use** – Development in a Standard Zoning District with two or more uses classified with the definition of a use listed in Art. 4, Use Regulations. [Ord. 2006-013]

38. **Collocation** – the placement of more than one service providers’ antenna on an existing commercial communication tower or structure. The term collocation also includes the ground-mounted, structure-mounted or roof-mounted installation of the accessory equipment and structures needed for the functioning of the wireless facility. [Ord. 2006-004]

39. **Colonnade** – a covered pedestrian structure over a sidewalk that is open to the street except for supporting columns. Awnings are not considered colonnades.

40. **Combined Transmission/Communication Structure** – any combination of communication tower and electrical transmission line constructed within an electrical transmission line streets created pursuant to the “Transmission Line Siting Act” in F.S. § 403.52.

41. **Commercial Agricultural Development** – agriculture conducted for commercial purposes within the Agricultural Production Plan Category North of the L-8 Canal and East of the North Tieback Canal, the Agricultural Reserve (AGR) Plan Category, and those activities classified as special agriculture.

42. **Commercial Corridor** – For the purposes of the IRO, linear Arterial or Collector Streets located in the Urban/Suburban Tier that are predominantly lined with properties having a commercial FLU designation or zoning district. [Ord. 2010-005]

43. **Commercial Sewage Waste** – as defined by Chapter 64E-6, F.A.C.

44. **Commercial Vehicle** – a vehicle principally used in commerce or trade or any vehicle that is not a recreational vehicle that exceeds the following limits: rated capacity of one ton; gross vehicle weight rating (GVWR) does not exceed 12,500 pounds, including load; height exceeds nine feet, including any load, bed or box; and total vehicle length of 26 feet. Such vehicles shall include tow trucks, transport vehicles, construction vehicles, semi-trucks and step-vans. [Ord. 2008-003]

45. **Communication Tower Users List** – an official list of commercial communication tower service providers, maintained by the Development Review Officer, to assist new users to locate existing sites to encourage collocation, pursuant to Art. 4.B.9.E, Eligible Facilities Request for Modification. [Ord. 2009-040] [Ord. 2017-007]

46. **Community Development District** – Refer to F.S. ch. 190 for applicability. [Ord. 2020-001]

47. **Community Water System** – for the purposes of Art. 15.B, PBC Environmental Control Rule II – Drinking Water Supply Systems, a public water system which serves at least 15 service connections used by year round residents or which serves at least 25 year round residents.

48. **Community Well** – for the purposes of Art. 15.A, PBC Environmental Control Rule I – Onsite Sewage Treatment and Disposal Systems, a water well that is a source of potable water and functions as part of a community water system.

49. **Commuter Bus** – For the purposes of Art. 12, Traffic Performance Standards, transit service connecting communities to employment centers. [Ord. 2006-036]

50. **Compatible/Compatibility**
   a. For the purposes of Art. 5, Supplementary Standards, design, which utilizes accepted site planning (e.g., building placement, orientation, and sitting) and the elements of architectural composition within the context of the surrounding area. Similar adjacent land uses or square footage shall not necessarily constitute architectural compatibility.
   b. Land uses that are congruous, similar and in harmony with one another because they do not create or foster undesirable health, safety or aesthetic effects arising from direct association of dissimilar, contradictory, incongruous, or discordant activities, including the impacts of intensity of use, traffic, hours of operation, aesthetics, noise, vibration, smoke, hazardous odors, radiation, function and other land use conditions.

51. **Compatible Sites** – residential uses or pods adjacent to residential uses or pods; or adjacent to residential uses or pods with a density difference less than or equal to two units per acre.

52. **Complaining Land** – for the purposes of Art. 5, Supplementary Standards, that land which is included in a residential district receiving sound levels above those permitted by Art. 5.E, Performance Standards.

53. **Complement/Complementary** – for the purposes of Art. 5, Supplementary Standards, having similar architectural composition.

54. **Complete Application**
   a. For the purposes of Art. 12, Traffic Performance Standards, an application filed with the Local Government which satisfied all application requirements of State law; and the relevant land development regulations, the general rules and policies adopted, and the customary general practices of the Local Government.
b. For the purposes of Art. 14, Environmental Standards, an application which includes all materials and documents which are necessary to support the application and which has been accepted as complete by ERM.

55. **Completely Enclosed** – a building separated on all sides from adjacent open area, or from other buildings or other structures, by a permanent roof and by exterior walls or party walls, pierced only by windows or entrances or exit doors normally provided for the accommodation of persons, goods, or vehicles.

56. **Composting** – the process by which biological decomposition of organic solid waste is carried out under controlled conditions, and which stabilizes the organic fraction into a material which can easily and safely be stored, handled, and used in an environmentally acceptable manner. [Ord. 2013-021]

57. **Comprehensive Plan** – see Plan.

58. **Conceptual Master** – for the purposes of Art. 8, Signage, a conceptual plan indicating the total number, location, and sign area of all proposed signs on a site plan or typical building elevation.

59. **Concurrency, Affidavit of Waiver** – a document evidencing the grant of an exception to the plating requirement or the required improvements installation requirement.

60. **Concurrency Certificate** – for the purposes of Art. 12, Traffic Performance Standards, in the Unincorporated Area, Concurrency Reservation, or Adequate Public Facilities Determination, as defined in Art. 2.F, Concurrency (Adequate Public Facility Standards), and this Chapter; or similar confirmation in a Municipality.

61. **Concurrency, 80 Percent Built Out** – 80 percent built out means the evaluation of the entire project.

62. **Concurrency Exemption Certificate** – a properly issued order of the Hearing Officer pursuant to the Code of Laws and Ordinances of PBC, Florida, as amended, by which a parcel or lot is exempt from the concurrency requirements of the Plan.

63. **Concurrency Exemption Determination**
   a. For the purposes of Art. 2, Application Processes and Procedures, a determination that the land in the Unincorporated Area is exempt from the concurrency standards of the Plan and this Code;
   b. For the purposes of Art. 12, Traffic Performance Standards, a determination that the property in the Unincorporated Area is exempt from the concurrency requirements of the Plan pursuant to Ord. No. 89-5, as amended.

64. **Concurrency Exemption (Exemption)** – an order approved by the Zoning Director that the development is exempt from the concurrency standards of the Plan pursuant to meeting the requirements of Art. 2.E, Monitoring of Development Orders (DOs) and Conditions of Approval.

65. **Concurrency Exemption Extension** – an order issued by the Zoning Director extending a Concurrency Exemption for a two-year period.

66. **Concurrency, Equivalency Determination** – a determination approved by the Zoning Director that the proposed development or uses would require equal or lesser public facility capacity than the valid concurrency reservation or existing use(s) require(s). Approval of an equivalency determination results in either (1) amending an existing reservation or exemption; or (2) the issuance of a new reservation.

67. **Concurrency, Level of Service (LOS)** – an indicator of the extent or degree of service provided by, or proposed to be provided by a public facility or service based on and related to the operational characteristics of the public facility or service.

68. **Concurrency, Public Facilities** – capital facilities including, but not limited to, roads, parks and recreation, fire-rescue, library, law enforcement, and public buildings. [Ord. 2018-002]

69. **Concurrency, Public Facilities Agreement** – an agreement entered into by PBC or a service provider and a developer or landowner for the purpose of ensuring public facility capacity is reserved for a proposed development.

70. **Concurrency Requirements of the Plan** – the provisions in the Plan and the implementing land development regulations requiring that public facilities for traffic circulation, mass transit, sanitary sewer, potable water, recreation/open space, fire-rescue, solid waste, and drainage are available at the minimum LOS concurrent with the impact of the Development; and, as to the applicability of expanded or more stringent traffic performance standards pursuant to State of Florida mandates under F.S. ch. 163 such requirements as set forth in the future traffic performance standards ordinance(s). [Ord. 2019-005]

71. **Concurrency Reservation** – a certificate approved by the Zoning Director with or without conditions, which may be considered in conjunction with a Development Agreement, public facility agreement, or other binding agreement and pursuant to the terms of Art. 2.F.1, General, Adequate Public Facility Standards, that constitutes proof of adequate public facilities to serve the proposed development.

72. **Concurrency, Service Provider** – any agency that is responsible for the provision of public facilities to development in PBC.
73. **Condition of Approval** – imposed as part of, or associated with, the issuance of a Development Order. [Ord. 2010-022]

74. **Conditional Use** – those uses that are generally compatible with the other uses permitted in a district, but that require individual review of their location, design, configuration, intensity and density of use, structures, and may require the imposition of conditions pertinent thereto in order to ensure the appropriateness of the use at a particular location.

75. **Cone of Depression** – for the purposes of Art. 14.B, Wellfield Protection, an area of reduced water levels which results from the withdrawal of groundwater from a point of collective source such as a well, wellfield, de-watering site or quarry. The aerial extent and depth of the depression is a function of the hydraulic properties of the aquifer, the pumping rates and recharge rates. [Ord. 2006-036]

76. **Confluent Growth** – for the purposes of Art. 15.B, PBC Environmental Control Rule II – Drinking Water Supply Systems, a continuous bacterial growth covering the entire filtration area of a membrane filter used for coliform detection, or a portion thereof, in which bacterial colonies are not discrete.

77. **Conforming** – complies with the current regulations.

78. **Congregate Living Personal Services** – assistance with or supervision of essential activities of daily living such as eating, bathing, grooming, dressing, and ambulating; supervision of self-administered medication and such other similar services as may be defined by the State of Florida Department of Health and Rehabilitative Services.

79. **Conical Zone** – for the purposes of Art. 16, Airport Regulations, the area extending outward from the periphery of the horizontal zone for a distance of 4,000 feet.

80. **Consecutive Water System** – a water supply system which serves at least 15 service connections used by year round residents or which serves at least 25 year round residents which receives its water from a community water system. [Ord. 2005-003] [Ord. 2006-004]

81. **Consistency** – determined to satisfy the specific requirement(s) of this Code or F.S. § 163.3194.

82. **Constrained Facility** – for the purposes of Art. 12, Traffic Performance Standards, a Link which is widened (or assumed to be widened under Test 2) to its adopted width as determined by the BCC as part of the Thoroughfare R-O-W Identification Map.

83. **Construction** – the placement, assembly, erection, substantial repair, alteration or demolition of a building or structure on land, the placement of concrete, asphalt, similar materials on land, or grading or earthwork of land.

84. **Construction and Demolition Debris** – for the purposes of Art. 4.B.5.C.12, Recycling Plant, Construction and Demolition Debris means discarded solid materials that are not water soluble and not hazardous, including, but not limited to: steel, glass, brick, concrete, asphalt roofing material, pipe, gypsum wallboard, lumber. It also includes rocks and soils from construction, renovation or demolition of a structure or a site; and, trees or vegetative material from land clearing. [Ord. 2017-007]

85. **Construction Equipment** – a mechanical implement principally used in construction activity. Such equipment shall include but is not limited to: bobcats, front-end loaders, over-head cranes, graders, dump trucks, compactors, forklift, steam rollers, earth movers, bulldozer, backhoe, concrete mixer, trenchers, cable/pipe layers or any such equipment that is not a street worthy vehicle.

86. **Construction Work**
   a. Any site preparation, assembly, erection, substantial repair, alteration, demolition or similar action to buildings or land.
   b. For the purposes of Art. 5, Supplementary Standards, the use of mechanical or manual equipment to build or improve a lot or structure such as but not limited to: shovels, saws, drills, hammers that creates noise.

87. **Contaminant** – for the purposes of Art. 15.B, PBC Environmental Control Rule II – Drinking Water Supply Systems, any physical, chemical biological or radiological substance or matter in water.

88. **Contiguous**
   a. Lots that share a common border, or lands separated only by streets, easements, pipelines, power lines, conduits, R-O-W under ownership of the land owner of one of the subject parcels, a POA or a governmental agency, or a public utility. [Ord. 2006-004]
      1) For density purposes lots that touch point-to-point, or lots which are separated by waterways, streets or major easements are not considered contiguous. [Ord. 2006-004]
      2) For the purpose of AGR preservation parcels, the following shall not be considered contiguous: lots that touch point-to-point or are separated by Collector or Arterial Streets. [Ord. 2006-004]

89. **Contributing Resource** – for the purposes of Art. 9, Archaeological and Historic Preservation, building, site, structure, or object adding to the historic significance of a property or district.

90. **Control Device** – the element of a discharge structure which allows release of water under controlled conditions.
91. Control Elevation – for the purposes of Article 12, Traffic Performance Standards, the lowest elevation at which water can be released through a control device.

92. Corner Clip – an area at each side of a street intersection, or driveway connection to a street, which is subject to restrictions on the construction, installation, placement, or maintenance of visual obstructions. The location and dimensions of said area, whether located within or adjacent to the legally established street boundaries, shall be as shown in Figure 3.D.1.D, Corner Clip Setback.

93. Corner Store – a small store located in a multi-story mixed-use building devoted to the retail sale of a limited line of food and household items with a corner entrance.

94. County – Palm Beach County, Florida. Also referred to as PBC in this Code.

95. County Archaeologist – for the purposes of Article 9, Archaeological and Historic Preservation, Staff member of or contracted to PZB who shall be a qualified Archaeologist.

96. County Standards – the minimum standards, specifications, and details for design and construction of streets and other infrastructure improvements, as promulgated by the County Engineer pursuant to Resolution No. R-90-740 of the BCC as may be amended. Said standards include, but are not limited to those compiled in the most current edition of the Palm Beach County Land Development Design Standards Manual.

97. Covenant – a recordable instrument that runs with the land, binds the fee simple owner, heirs, successors, and assigns, and is recorded. It may include recorded Development Agreements or other agreements. Covenants may include PBC as a party or intended beneficiary, shall recite the benefit intended, and shall include any terms or conditions under which it may be released.

98. Covered Walkway – a pedestrian walkway that is covered by a roofed structure that may be wholly supported by a building or may be wholly or partially supported by columns, poles, or braces extending from the ground.

100. Credit – for the purposes of Article 13, Impact Fees, a reduction in the particular impact fee based on: (1) previous payments for which no benefit was received and future payments of the development toward the capital facilities for which the impact fee is assessed; (2) a reduction of impact due to: redevelopment of existing square footage; other assessments for the same capital facilities; in-kind contributions; or, in the case of Park Impact Fees, alternative municipal provision of like capital facilities, or proximity to the beach.

101. Credit Factor – For the purposes of Article 12, Traffic Performance Standards, a multiplier used in calculating points available as a result of a project’s use of congestion mitigation strategies. [Ord. 2006-036]

102. Crest of Dune – for the purposes of Article 14.A, Sea Turtle Protection and Sand Preservation, the highest point in elevation of the dune.

103. Crime Prevention Through Environmental Design (CPTED) – design philosophy which promotes proper design and effective use of the built environment with the goal of reducing the fear and incidence of crime, and improving quality of life.

104. Critical Facility – for the purposes of Article 18, Flood Damage Prevention, a facility for which any flooding would adversely affect essential public services. Critical facilities include, but are not limited to, nursing homes, hospitals, police, fire and emergency response installation, or installations which produce, use, or store hazardous materials or hazardous waste. [Ord. 2004-013]

105. Critical Volumes – for the purposes of Article 12, Traffic Performance Standards, the sum of all movements in an intersection which conflict with one or more other movements as established pursuant to the Transportation Research Board, Special Report 209, Highway Capacity Manual (1985), “Planning Analysis,” pages 9-21 and 9-22, as amended by the PBC Intersection Analysis by Critical Sum Method (See LOS D and E definitions).

106. Cross-Connection – for the purposes of Article 15, Health Regulations, any physical arrangement whereby any drinking water supply is connected, directly or indirectly, with any other supply system, sewer, drain, conduit, pool, storage reservoir, plumbing fixture, or other device which contains or may contain contaminated water, sewage, or other waste or liquid of unknown or unsafe quality which may be capable of imparting contamination to the drinking water supply as the result of backflow. Bypass arrangements, jumper connections, removable sections, swivel or changeable devices, and other temporary or permanent devices through which or because of which backflow could occur are considered to be cross-connections.

107. Crown – for the purposes of Article 7, Landscaping, the main point of branching or foliage of a tree or plant, or the upper portion of a plant or tree.

108. Cul-de-Sac – see Street, Cul-de-Sac.
109. **Cultural Resources** – for the purposes of Art. 9, *Archaeological and Historic Preservation*, are material culture remains including artifacts, pits, trash dumps, middens, architectural features, standing structures, remains of structures, and the physical alteration of the natural landscape such as ponds, roads landscaping, canals, and fences. [Ord. 2008-037]

### D. Terms defined herein or referenced in this Article shall have the following meanings:

1. **D Factor** – for the purposes of Art. 12, *Traffic Performance Standards*, the ratio of peak hour directional traffic to peak hour two-way traffic, as provided in the FDOT Quality/LOS Handbook. Example: Peak Hour Two-Way = 1,000 peak hour direction volume = 600, \(D = 0.60\).

2. **Damage** – loss in structural integrity due to an act of calamity. Also see Natural Disaster Damage. [Ord. 2010-005]

3. **Day-Night Average Sound Level (L_{dn})** – a 24-hour average Noise level in weighted decibels, for a period from midnight to midnight, adding a ten-decibel penalty for each Noise event during the hours between midnight and 7:00 a.m. and 10:00 p.m. and midnight.

4. **DBA** – the total sound level of all noise as measured with a sound level meter using A-Weighting Network. The unit is decibel based on a reference sound pressure of 0.0002 microbars.

5. **Decibel** – a unit of sound pressure level abbreviated as dB.

6. **Decision Height** – for the purposes of Art. 16, *Airport Regulations*, the height at which a pilot must decide, during an Instrument Landing System (ILS) approach, to either continue the approach or to execute a missed approach.

7. **Defined Search Area** – the geographic area in which an antenna is proposed to be located to provide the carrier’s designed service. [Ord. 2006-004]

8. **Demolition** – the act or process of wrecking, destroying, or removing any building or any exterior or structural part thereof.

9. **Density** – the ratio of the number of dwelling units per acre of land.

10. **Density Bonus** – an increase in the residential density above the maximum or PDD density permitted by the Plan for the applicable residential Future Land Use category.

11. **Density, Entitlement** – granted by PBC which permits use of land until concurrency provisions can be satisfied as shown in Figure 2 of the FLUE of the Plan, as amended.

12. **Density, Maximum Level** – allowed by the Plan, as amended, with a Planned Development, as shown in the FLUE.

13. **Density, Minimum Level** – must be attained when land is developed pursuant to the 1989 Plan, as amended in the FLUE.

14. **Density, Standard** – allowed by the Plan, as amended, without a Planned Development as shown in FLUE Table III.C.1.

15. **Department**
   a. For the purposes of Art. 14, *Environmental Standards*, PBC Department of Environmental Resources Management or the PBC PZB Departments, or an entity of any municipality in PBC which has been assigned the responsibility of administering and enforcing this Code;
   b. For the purposes of Art. 15, *Health Regulations*, PBC Health Department.

16. **Design Flood** – for the purposes of Art. 18, *Flood Damage Prevention*, the flood associated with the greater of the following two areas: [Ord. 2017-026]
   a. Area with a floodplain subject to a one percent or greater chance of flooding in any year; or
   b. Area designated as a Special Flood Hazard Area on the community’s flood hazard map, or otherwise legally designated. [Ord. 2017-026]

17. **Design Flood Elevation** – for the purposes of Art. 18, *Flood Damage Prevention*, the elevation of the Design Flood, including wave height, relative to the datum specified on the community’s legally-designated flood hazard map plus any freeboard specified by the community. In areas designated as Zone AO, the Design Flood Elevation shall be the elevation of the highest natural grade, prior to site Development at the Building’s perimeter, plus the depth number (in feet) specified on the flood hazard map. In areas designated as Zone AO, where the depth number is not specified on the map, the depth number shall be taken as being equal to two feet plus any freeboard specified by the community. [Ord. 2017-026]

18. **Design Professional** – an architect, landscape architect, or engineer licensed in the State of Florida with good standing.

19. **Designated Disposal Facility** – for the purposes of Art. 5.J, *Best Management Practices for Livestock Waste Received from Offsite Sources*, a solid waste management facility operated, permitted, or
designated by the Solid Waste Authority to receive solid waste generated within Palm Beach County, or such alternate facility as may be designated by the Solid Waste Authority in writing. [Ord. 2013-021]

20. **Designated Exterior** – for the purposes of Art. 9, Archaeological and Historic Preservation, all outside surfaces of any improvement, building, or structure as defined in the historic preservation survey and pursuant to Art. 9.B, Historic Preservation Procedures, or an exterior designated under Art. 9.B, Historic Preservation Procedures, as having significant value to the historic character of the building, district, or PBC.

21. **Designated Public Utility** – for the purposes of Art. 14.B, Wellfield Protection, that public utility which operates a well or wells for which the Zones of Influence include part or all of the property on which the non-residential activity is located.

22. **Designation** – for the purposes of Art. 9, Archaeological and Historic Preservation, the act of designating specific historic sites or districts pursuant to the provisions of this Code.

23. **Detention** – the collection and temporary storage of stormwater runoff for the purpose of treatment and/or discharge rate control with subsequent gradual release directly to surface waters. See also Dry Detention/Retention.

24. **Determination** – for the purposes of Art. 16, Airport Regulations, the term used by FAA to denote the outcome of an aeronautical study under FAR Part 77 (See: Airport Hazard or No Hazard).

25. **Developed Area** – that portion of a site upon which any building structure, pavement, landscape material, stormwater facility, excavated lake, or other improvement has been or will be placed or on which a development activity occurs or has occurred.

26. **Developer** – any person, including a governmental agency, undertaking any development.

27. **Developer's Engineer** – for the purposes of Art. 11, Subdivision, Platting, and Required Improvements, a single engineering firm or a professional engineer registered in the State of Florida, and engaged by the developer to coordinate the design and monitor the construction of the work required under Art. 11, Subdivision, Platting, and Required Improvements.

28. **Development**
   a. The carrying out of any building activity or mining operation, the making of any material change in the use or appearance of land, or the dividing of land into two or more parcels;
   b. For the purposes of Art. 9, Archaeological and Historic Preservation, archaeological preservation, the definition in F.S. § 380.04, as well as site preparation work consisting of excavation, earth moving, and the like. This definition shall not include the dividing of land into two or more parcels;
   c. For the purposes of Art. 12, Traffic Performance Standards, as defined in F.S. § 380.04, except that it shall not include the following items listed therein the: (1) demolition of a structure except as an adjunct of construction; (2) clearing of land except as an adjunct of construction; and, (3) deposit of refuse, solid or liquid waste, or fill on a lot unless the Site Specific Development Order is specifically for such as the end use and not as an adjunct to the end use;
   d. For the purposes of Art. 13, Impact Fees, as the context indicates, either the carrying on of construction or any physical alteration of a building or structure; the result of such activity; a legally divisible parcel of land developed under a common plan; or, the change in any use of a structure or land that increases the impact on capital facilities for which the particular impact fee is assessed. It includes the placement of a mobile home for dwelling purposes;
   e. For the purposes of Art. 18, Flood Damage Prevention, any man-made change to improved or unimproved real estate, including, but not limited to, Buildings or other Structures, tanks, temporary Structures, temporary or permanent storage of equipment or materials, mining, dredging, filling, grading, paving, excavations, drilling operations, or any other land-disturbing activities. [Ord. 2017-026]

29. **Development Agreement** – a development agreement, public facilities agreement, or other binding agreement entered into between the Applicant and PBC or other service provided for the purpose of assuring compliance with the adopted LOS standards. The form of the agreement may include, but not be limited to a development agreement pursuant to F.S. § 163.3220.

30. **Development Order**
   a. Any order granting, granting with conditions, or denying an application for a Development Permit through procedures required by the Code which establishes the specific use or uses of land, sets the density, and involves an active and specific consideration by PBC of particular detailed development concept. A Development Order typically involves the submission and review of a plan, but may not necessarily involve such. It shall not include land use designations or amendments established by the Comprehensive Plan and Rezoning initiated by PZB pursuant to direction of the BCC. [Ord. 2010-022]
b. For the purposes of Art. 2.F, Concurrency (Adequate Public Facility Standards), any Concurrency Reservation that applies to lands that are owned by a unit of Local, State, or Federal Government and utilized for buildings or facilities that are owned by a government entity and support government services or delivery of public services. [Ord. 2007-013]

31. Development Permit – includes any Building Permits, Zoning Permits such as Rezoning, Conditional Uses, Development Order Amendments, DRO/Administrative Approvals, Special Permits, Deviations, Waivers, Variances, Subdivisions, or any other official action of PBC having the effect of permitting the development of land or the specific use of land. [Ord. 2010-022] [Ord. 2017-007]

32. Development Plan, Preliminary – a generalized depiction of use categories presented to the appropriate review body for Planned Development Districts, Previously Approved Planned Developments (Master Plans and Site Plans), and Class A Conditional Use and Class B Conditional Use approvals.

33. Development of Regional Impact – as defined in F.S. § 380.06.

34. Deviation(s) Subject to BCC Approval – An abatement of the requirements of Art. 5, Supplementary Standards, Art. 6, Parking, Loading, and Circulation, and Art. 7, Landscaping of the ULDC for development supporting government facilities within the PO Zoning District, subject to approval by the BCC. [Ord. 2007-013]

35. Deviation(s) Subject to County Engineer Approval – An abatement of the requirements of Art. 11, Subdivision, Platting, and Required Improvements of the ULDC for development supporting government facilities within the PO Zoning District, subject to approval by the County Engineer. [Ord.2007-013]

36. Dewatered Domestic Wastewater Residuals – the solid, semisolid, or liquid residue removed during the treatment of wastewater which is more than 12 percent or greater dry solids by weight. Not included is the treated effluent or reclaimed water from a domestic wastewater treatment plant.

37. Diameter at Breast Height (DBH) – the diameter of a tree trunk measured at a point four and one-half feet above the ground.

38. Direct Illumination – illuminated as a result of glowing element(s), lamp(s), globe(s), or reflector(s) of an artificial light source which is visible to an observer on the beach. [Ord. 2011-001]

39. Disabled – for the purposes of Art. 2.C.8.C, Reasonable Accommodation, a disabled person is an individual that qualifies as disabled or handicapped under the FHA or ADA. [Ord. 2011-016]

40. Discharge Structure – a structural device, constructed or fabricated from durable material such as concrete, metal, or decay-resistant timber, through which water is released to surface water from detention.

41. Disposition, Off-Site – the off-premises transportation of excavated material.

42. Disposition, On-Site – the on-premise use of extractive or excavated material.

43. District – any certain described zoning district of PBC to which these regulations apply and within which the zoning regulations are uniform.

44. Disturbed Excavated Area – the total area altered by excavation activities.

45. Ditch – For the purposes of Art. 11, Subdivision, Platting, and Required Improvements, a swale that is three feet or greater in depth from the top of bank to the invert and with the capacity of temporarily containing or conveying stormwater runoff. [Ord. 2014-025]

46. Dock, Private – a structure built on or over the water which is designed or used to provide no more than ten boat slips, and anchorage for, and access to, one or more boats belonging to the Property Owner. Necessary services such as water, and other utilities are considered a part of a dock; which does not provide a fuel facility, however, no cooking, sleeping, or business activity shall be permitted.

47. Domestic Sewage Waste – as defined by F.S. § 381.0065(2). Domestic sewage is further categorized as:
   a. Blackwater by F.S. § 381.0065(2).
   b. Graywater by F.S. § 381.0065(2).
   c. Domestic Sewage Characteristics.
      1) Carbonaceous Biochemical Oxygen Demand, maximum 300 mg/l.
      2) Total Suspended Solids, maximum 200 mg/l.
      3) pH, six to eight; or within one pH unit of the water supply pH.
      4) Nitrogen (TKN) maximum 100 mg/l.

48. Domestic Sludge – a solid waste resulting from sewage, seepage, or food service operations, or any other such waste having similar characteristics. Domestic sludge includes sludge resulting from the treatment of domestic wastewater.

49. Domestic Wastewater – wastewater derived principally from dwellings, business buildings, institutions, and the like; sanitary wastewater; sewage.
50. **Domesticated Livestock** – for the purposes of [Art. 5, Supplementary Standards](#), shall include, but not be limited to, all animals of the equine (excluding horses), bovine (cattle), porcine (swine), caprine (goats), ovine (sheep), and camelid (llamas, alpacas) families as well as poultry (chickens and ducks). For the purposes of [Art. 5.J, Best Management Practices for Livestock Waste Received from Offsite Sources](#), livestock shall include all domesticated livestock and horses. [Ord. 2012-027] [Ord. 2013-021]

51. **Downtown Revitalization** – the physical and economic renewal of a central business district of a community as designated by the local government in its Comprehensive Plan, and including both downtown development and redevelopment.

52. **Drainage Basin** – a sub-area of a watershed which contributes stormwater runoff to a watercourse tributary to the main receiving water.

53. **Drainage Easement** – see Easement, Stormwater Management.

54. **Drainfield** – for the purposes of [Art. 15, Health Regulations](#), as defined by Chapter 64E-6, F.A.C.

55. **Dripline** – an imaginary vertical line extending from the outermost circumference of the branches of a tree to the ground.

56. **Drive-Through** – any place of business which serves, sells or otherwise makes available its services or products to patrons in automobiles for their off premise use or consumption.

57. **Driveway, Shared** – a driveway that serves more than one dwelling unit.

58. **Drop Lens Fixture** – Any luminaire that is not a full cut off luminaire. [Ord. 2005-041]

60. **Dry Detention/Retention** – detention or retention of water in a storage facility which is designed, constructed, and operated to limit the duration of ponding within the facility so as to maintain a normally dry bottom between rainfall events.

61. **Dune** – a hill or ridge of windblown sand and marine deposits lying landward of, and adjacent to, the beach which is formed by natural or artificial processes.

62. **Dune Profile** – the cross-sectional configuration of the dune.

63. **Dwelling Unit** – one or more rooms designed, occupied or intended for occupancy as separate living quarters, with only one kitchen plus sleeping and sanitary facilities provided within the unit, for the exclusive use of a single family maintaining a household. Specialized residences, such as accessory apartments for the elderly or handicapped, congregate living facility quarters, groom’s quarters, farm worker quarters, or migrant labor quarters shall not be considered “dwelling units” for the purpose of applying restriction on density contained in the Plan or this Code unless otherwise stated in the Plan or the Code.

E. **Terms defined herein or referenced in this Article shall have the following meanings:**

   1. **Easement** – any strip of land created by subdivision or granted by the owner, for public or private access utilities, drainage, sanitation or other specified uses having limitations, the title to which shall remain in the name of the land owner, subject to the right of use designated in the reservation of the servitude.

   2. **Easement Holder or Beneficiary** – the grantee or persons directly benefiting from the existence of the easement.

   3. **Easement, Lake Maintenance** – created by plat dedication or other instrument of record, establishing access and use rights on or to the periphery of a water management tract for purposes of construction, maintenance, and repair of wet detention/retention facilities and appurtenant structures therein.

   4. **Easement, Limited Access** – established adjacent to a street for the purpose of prohibiting vehicular access to the street from abutting property except at those locations specifically authorized by the BCC.

   5. **Easement, Public** – granted to a governmental entity, public agency, a utility, or the public.

   6. **Easement, Quasi-public** – granted to a POA in which PBC or the public have some beneficial interest.

   7. **Easement, Stormwater Management** – establishing rights to collect, drain or convey surface water by way of natural or man-made facilities, including, but not limited to water bodies, water courses, canals, ditches, swales, storm sewers and overland flow. It also includes any fee interest of a governmental entity in land to collect, drain, or convey water.

   8. **Easement, Utility** – established for the purpose of the installation, operation, repair, or maintenance of facilities and equipment used to provide utility services.

   9. **Ecosystem** – an assemblage of living organisms (plants, animals, microorganisms, etc.) and nonliving components (soil, water, air, etc.) that functions as a dynamic whole through which organized energy flows.

   10. **Elderly Person** – as defined in the Plan.

   11. **Electrical Transmission Line** – street means the area necessary for construction and maintenance of a 230 kilovolt or greater electrical transmission line, as provided in [F.S. § 403.52](#).
12. **Elevated Building** – see Building, Elevated.
13. **Emergency** – an incident or natural disaster which results in immediate danger to the health, safety, welfare or resources of the residents of PBC. [Ord. 2011-001]
14. **Emergency Hazardous Situation** – for the purposes of Art. 14.B, Wellfield Protection, occurs whenever there is an immediate and substantial danger to human health, safety, or welfare or to the environment. [Ord. 2011-001]
15. **Eminent Domain Proceeding** – for the purposes of this Article, a formal court initiated civil action to acquire fee simple, easement, or R-O-W interest in land for governmental purposes, or a voluntary conveyance of such in lieu of formal court initiated action.
16. **Encroachment** – for the purposes of Art. 18, Flood Damage Prevention, the advance or infringement of uses, plant growth, fill, excavation, Buildings, permanent Structures or development into a SFHA, which may impede or alter the flow capacity of floodwaters. [Ord. 2004-013]
17. **Encroachment, Vehicular** – for the purposes of Art. 7, Landscaping, any protrusion of a motor vehicle outside of the boundaries of a vehicular use area into a landscape or other area.
18. **Encumber** – to reserve or earmark funds for a specific expenditure or an identified development.
19. **Engineer** – a person registered to engage in the practice of engineering under F.S. § 471.001-471.037, and includes the terms “professional engineer” and “registered engineer.”
20. **Endangered, Threatened, Rare, and Species of Special Concern** – any species listed as endangered, threatened, rare, or of special concern by one or more of the following agencies:
   a. U.S. Fish and Wildlife Service;
   c. Florida Committee on Rare and Endangered Plants and Animals;
   d. Florida Department of Agriculture and Consumer Services; or,
   e. Treasure Coast Regional Planning Council.
21. **Enlargement or to Enlarge** – an addition to the floor area of an existing building, an increase in the size of any other structure, an addition of a use or an increase in that portion of a tract of land occupied by an approved use.
22. **Entrance Area** – 66 feet (see IES definition). [Ord. 2005-041]
23. **Environmental Appeal Board (EAB)** – For the purposes of Art. 15, Health Regulations, is the five-member board appointed by the Environmental Control Board (ECB) to hear appeals under this Article. [Ord. 2006-004]
24. **Environmental Control Board (ECB)** – for the purposes of Art. 15, Health Regulations, is the board consisting of the seven members of the BCC, which adopts, reviews, and amends Ordinances and rules under Chapter 77-616, Special Acts, Laws of Florida, as amended.
25. **Environmental Control Hearing Board (ECHB)** – for the purposes of Art. 15, Health Regulations, is the five-member board appointed by the ECB, pursuant to Chapter 77-616, Special Acts, Laws of Florida, as amended, to conduct hearings on alleged violations of this Article.
26. **Environmental Control Officer (ECO)** – is the person appointed by the ECB under Chapter 77-616, Special Acts, Laws of Florida, as amended.
27. **Environmentally Sensitive Lands** – ecological sites (ecosites), other than wetlands, that are designated in the Inventory of Native Ecosystems in Palm Beach County and on its accompanying aerial photographs as “A” quality, representing high-quality native Florida upland ecosystems. These sites are indicated on the aerial photographs (received on May 30, 1989) that are on file at ERM and are incorporated herein by reference. Inventory of Native Ecosystems in Palm Beach County is a report and annotated aerials produced during the study with this title, which was conducted by consultants under contract to PBC.
28. **Equestrian Use** – use of land for boarding, breeding, training, riding, showing or raising horses, ponies, mules or donkeys.
29. **Equestrian Waste** – for the purposes of Equestrian Waste Management Facility, waste composed of the excreta of horses and residual organic materials that have been used for bedding, sanitary, or feeding purposes for horses. [Ord. 2017-007]
30. **Equivalency Determination** – means a determination approved by the Zoning Director that the proposed development or uses will require equal or lesser public facility capacity than the valid Concurrency Reservation or existing use(s) require(s). Approval of an Equivalency Determination results in either (1) amending an existing Reservation or Exemption; or (2) the issuance of a new Reservation.
31. **Establishment**
   a. Single structure or a group of structures other than a Single Family residence on one or more parcels of land with common access, parking, drainage facilities and/or water supply. It may also
include the premise on which the business is located, including the interior of the business, or portion thereof, upon which activities or operations are being conducted for commercial gain. [Ord. 2005-041]

b. For the purposes of Art. 15, Health Regulations, single structure or a group of structures other than a Single Family residence on one or more parcels of land with common access, parking, drainage facilities and/or water supply.

32. Ethanol – type of alcohol used as a biofuel alternative to gasoline, that is made from biomass. [Ord. 2008-037]

33. Excavate or Excavation – For the purposes of Art. 4.B.10, Excavation Uses, the extraction of minerals from the earth necessary to (1) construct a Single Family dwelling; or (2) support bona fide agricultural production operations; or (3) to implement a final site development plan; or (4) any act wherein the earth is cut into, dug, quarried, uncovered, removed, displaced, or deliberately disturbed to create a temporary or permanent body of water, including the conditions resulting therefrom. Excavation excludes agricultural plowing, site grading, dry retention/detention, demucking and canal dredging in preparation for construction. [Ord. 2017-026]

34. Excavation – For the purposes of Art. 14.A, Sea Turtle Protection and Sand Preservation, displacement of soil or sand by the processes not limited to digging, dredging, scooping, or hollowing out. [Ord. 2017-007]

35. Exceptional Hardship – for the purposes of Art. 18, Flood Damage Prevention, (as applied to variance criteria), a condition of a parcel of property which is unusual or exhibits peculiar physical characteristics. These characteristic(s) must be unique only to that property and not to be shared by adjacent parcels. These unique characteristics must pertain to the land itself, not to the structure, its inhabitants, or the Property Owners. Mere economic or financial hardship alone is not “exceptional.” Inconvenience, aesthetic considerations, physical handicaps, personal preferences, or the disapproval of one’s neighbors cannot, as a rule, qualify as exceptional hardships. A hardship shall not necessarily exist even if the alternative is more expensive, or requires the Property Owner to build elsewhere or put the parcel to a different use than originally intended. [Ord. 2004-013]

36. Excessive Noise – noise that disturbs a reasonable person of normal sensitivity.

37. Exfiltration System – for the purposes of Art. 14, Environmental Standards, any gallery, perforated or “leaky” pipe or similarly designed structure which is used to dispose of untreated stormwater by allowing the routed water to percolate by subsurface discharge directly or indirectly into the groundwater.

38. Existing – for the purposes of Art. 18, Flood Damage Prevention, (as applied to Building, Development, or Structure), any man-made improvement on which the Start of Construction commenced before the enactment of the first Flood Damage Prevention Regulations adopted by the County, Ord. No. 79-1, on January 31, 1979. [Ord. 2004-013]

39. Existing Manufactured Home Park or Subdivision – for the purposes of Art. 18, Flood Damage Prevention, a Manufactured Home Park or Subdivision for which the construction of facilities for servicing the lots on which the Manufactured Homes are to be affixed, including, at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads was completed before January 31, 1979. [Ord. 2004-013] [Ord. 2017-026]

40. Existing Residential Use – any residential structure on a parcel of land or property possessing either residential designation by the FLUA of the Plan or a residential zoning designation consistent with the underlying FLU designation.

41. Exotic Plant Species – a plant species not indigenous to State of Florida including those plants listed as prohibited and invasive non-native plant species. A list of exotic plant species shall be maintained by ERM.

42. Expansion – the increase in the floor area of a structure, including covered attached decks and porches, outdoor seating, coolers, and interior mezzanines or the increase in the height of a structure.

43. Expansions to an Existing Manufactured Home Park or Subdivision – for the purposes of Art. 18, Flood Damage Prevention, the preparation of additional sites by the construction of facilities for servicing the lots on which the Manufactured Homes are to be affixed, including at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads. [Ord. 2004-013]

44. Expenditure – the irrevocable contractual obligation which requires the remittance of money by the Applicant for services, goods, facilities, or fixtures, for the project; the post remittance of money for such.

45. Exterior – for the purposes of Art. 9, Archaeological and Historic Preservation, the outside surfaces of a building.
F. Terms defined herein or referenced in this Article shall have the following meanings:

1. Facility – for the purposes of Art. 14, Environmental Standards, main structures, accessory structures and activities which store, handle, use or produce Regulated Substances. Where contiguous facilities exist and such facilities are separate in the nature of the businesses, they shall remain separate under this Chapter.

2. Family – either a single person occupying a dwelling unit and maintaining a household, including not more than one boarder, roomer, or lodger as herein described; or two or more persons related by blood, marriage, or adoption occupying a dwelling, living together, and maintaining a common household, including not more than one such boarder, roomer, or lodger; or, not more than four unrelated persons occupying a dwelling, living together, and maintaining a non-profit housekeeping unit as distinguished from a group occupying a boarding or lodging house, hotel, club, or similar dwelling for group use. A common household shall be deemed to exist if all members thereof have access to all parts of the dwelling.

3. Farm Structure – any building or structure used for agricultural purposes excluding those used for residences.

4. F.A.R. (Part 77) – for the purposes of Art. 16, Airport Regulations, Federal Aviation Regulation. The “Part numbers” identify specific subject areas. All FARs are contained in Title 14, CFR (Part 77 – Title: Objects Affecting Navigable Airspace).

5. Federal Emergency Management Agency (FEMA) – for the purposes of Art. 18, Flood Damage Prevention, the Federal agency that, in addition to carrying out other functions, administers the National Flood Insurance Program. [Ord. 2017-026]

6. Feeder Transit Services – For the purposes of Art. 12, Traffic Performance Standards, transit service connecting communities and/or employment centers directly to rail stations or bus terminals. [Ord. 2006-036]

7. Feed Stock – for the purposes of Art. 4, Use Regulations, biomass consisting of: authorized wood material (clean wood recovered from construction and demolition wood debris, land clearing debris, and yard waste consisting of tree and shrub trimmings, grass clippings, palm fronds, trees, tree stumps, and other clean vegetative matter); agricultural residue (waste resulting from the production of sugar, rice, vegetable crops or fruit). This definition specifically excludes hazardous substances and waste, biomedical waste, trash, garbage, sludge or special waste. [Ord. 2008-037]

8. Feepayer – for the purposes of Art. 13, Impact Fees, the person paying the impact fee associated with a Building Permit or change in use, or the feepayer’s agent.

9. Fence – an artificially constructed barrier of any material or combination of materials erected to enclose or screen areas of land.

10. Fenestration – windows, doors and openings in a building façade or wall allowing light and views between interior and exterior. [Ord. 2010-022]

11. Filling – the placement of any material in, on, or over a jurisdictional wetland.

12. Final Plan – the most recent site or subdivision plan approved by the DRO.

13. Finished Floor Elevation – the highest finished ground floor surface elevation to which no additional permanent finished material would be applied. [Ord. 2005-002]

14. Fire-Rescue Facilities – mean the planning, engineering for, preparation of acquisition documents for, acquisition of land for, or the construction of fire-rescue facilities and the purchase of equipment necessary to meet the LOS for fire-rescue facilities.

15. Firewall – a wall of incombustible construction which subdivides a building or separates buildings to restrict the spread of fire and which starts at the foundation and extends continuously through all stories to and above the roof, except where the roof is of fireproof or fire resistive construction and the wall is carried up tightly against the underside of the roof slab, pursuant to the PBC Building Code.

16. First Directly Accessed Link – For the purposes of Art. 12, Traffic Performance Standards, Roadway(s) providing a main entrance to a project. [Ord. 2006-036]

17. Five-Year Analysis Period
   a. For the purposes of Art. 12, Traffic Performance Standards, the period of time between the submittal of a Traffic Impact Study and the end of the fifth year of the Florida Department of Transportation Five-Year Transportation Improvement Program in effect at the time of Traffic Impact Study submittal. [Ord. 2007-013]

18. Fixed Mechanical Equipment – mechanical equipment, such as an air conditioning unit, water cooling tower, swimming pool pump, irrigation pump, well water pump, fan, power generator or other similar power source equipment, permanently affixed to land or structure, as distinguished from temporary, portable, non-fixed mechanical equipment.
19. **Fixture** – the assembly that houses the lamp or lamps and can include all or some of the following parts: a housing, a mounting bracket or pole socket, a lamp holder, a ballast, a reflector or mirror, and/or a refractor or lens. [Ord. 2005-041]

20. **Flag** – a fabric or plastic sheet of square, rectangular, or triangular shape which is mounted on a pole, cable, or rope at one end.

21. **Flag, Official** – a flag which represents a political/public region or jurisdiction and is not used for advertising purposes.

22. **Flag Poles** – a pole used to display a fabric or plastic sheet of square, rectangular, or triangular shape.

23. **Flex Space** – A type of use that allows a flexible amount of retail, office, and industrial space in one structure located on parcels with an Industrial (IND), Economic Development Center (EDC), or Commercial High (CH) Future Land Use (FLU) designation, that are directly related to the principal use. [Ord. 2010-005]

24. **Flood or Flooding**
   a. A general and temporary condition of partial or complete inundation of normally dry land areas from the overflow of inland or tidal waters; or the unusual and rapid accumulation or runoff of surface waters from any source. Terms associated with flooding include: Frequent, flooding which occurs more than once every two years on the average; and ten-year flood elevation, which has a ten in 100 probability of being equaled or exceeded in any calendar year.
   b. For the purposes of Art. 18, Flood Damage Prevention, a general and temporary condition of partial or complete inundation of normally dry land areas from the overflow of inland or tidal waters; or the unusual and rapid accumulation or runoff of surface waters from any source. [Ord. 2004-013]

25. **Flood Damage Prevention Board** – for the purposes of Art. 18, Flood Damage Prevention, a group of citizens appointed to the Construction Board of Adjustments and Appeals, who shall hear and decide variance requests and appeals made under Art. 18, Flood Damage Prevention. [Ord. 2004-013]

26. **Flood Damage Resistant Materials** – for the purposes of Art. 18, Flood Damage Prevention, any construction material capable of withstanding direct and prolonged contact with floodwaters without sustaining any damage that requires more than cosmetic repair. [Ord. 2017-026]

27. **Flood Hazard Area** – for the purposes of Art. 18, Flood Damage Prevention, the greatest of the following three areas: [Ord. 2017-026]
   a. The area within a floodplain subject to a one percent or greater chance of flooding in any year. [Ord. 2017-026]
   b. The area designated as a Flood Hazard Area on the community’s flood hazard map, or otherwise legally designated. [Ord. 2017-026]
   c. The area developed into Building sites without a master-engineered stormwater drainage plan. [Ord. 2017-026]

28. **Flood Insurance Rate Map (FIRM)** – for the purposes of Art. 18, Flood Damage Prevention, the official map of the community on which the Federal Emergency Management Agency has delineated both Special Flood Hazard Areas and the risk premium zones applicable to the community. [Ord. 2004-013] [Ord. 2017-026]

29. **Flood Insurance Study** – the official report provided by the Federal Emergency Management Agency (FEMA) that contains flood profiles, as well as the Flood Hazard Boundary Map and the water surface elevation of the base flood. [Ord. 2004-013]

30. **Flood Insurance Study (FIS)** – for the purposes of Art. 18, Flood Damage Prevention, the official report provided by the Federal Emergency Management Agency that contains the Flood Insurance Rate Map, the Flood Boundary and Floodway Map (if applicable), the Water Surface Elevations of the Base Flood, and supporting technical data. [Ord. 2004-013] [Ord. 2017-026]

31. **Floodplain**
   a. The land area adjacent to the normal limits of a watercourse or water body which is inundated during a flood event of specified magnitude or return period.
   b. For the purposes of Art. 18, Flood Damage Prevention, any land area susceptible to flooding, as defined in FIRM and any area without a master storm water drainage system. [Ord. 2004-013]

32. **Floodplain Development Permit or Approval** – for the purposes of Art. 18, Flood Damage Prevention, an official document or certificate issued by the community, or other evidence of approval or concurrence, which authorizes performance of specific Development activities that are located in Special Flood Hazard Areas and that are determined to be compliant with Art. 18, Flood Damage Prevention. [Ord. 2017-026]

33. **Floodproofing** – any combination of structural or nonstructural adjustments, changes, or actions that reduce or eliminate flood damage to a structure, content, and attendant utilities and equipment. [Ord. 2017-026]
34. **Floodway**
   a. The channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than one foot.

35. **Floodway Encroachment Analysis** – for the purposes of [Art. 18, Flood Damage Prevention](#), an engineering analysis of the impact that a proposed encroachment into a Floodway is expected to have on the Floodway boundaries and Base Flood Elevations; the evaluation shall be prepared by a qualified Florida-licensed engineer using standard engineering methods and models. [Ord. 2017-026]

36. **Floor** – the top surface of an enclosed area in a building (including basement) i.e., top of slab in concrete construction or top of wood flooring in wood frame construction. The term does not include the floor of a garage used solely for parking vehicles.

37. **Floor Area, Gross (GFA)** – horizontal square footage of all floors of a building measured from the exterior face of exterior walls or other type of enclosure, or from the centerline of a wall separating two buildings.

38. **Floor Area, Gross Leasable** – the GFA minus the floor area of: elevator shafts and stairways; public restrooms; public lobbies, common mall areas, atriums and courtyards provided solely for pedestrian access to the building from the exterior, and/or aesthetic enhancement or natural lighting purposes; and, permanently designated corridors.

39. **Floor Area Ratio (FAR)** – the ratio of the GFA of all structures on a lot to the lot area, excluding vertical core circulation areas for multi-story structures.

40. **Floor Area, Total Leasable** – see Floor Area, Gross Leasable.

41. **Floor, Ground** – a level of building, the floor of which is located not more than two feet below nor more than six feet above finished grade.

42. **Florida Building Code** – for the purposes of [Art. 18, Flood Damage Prevention](#), the codes adopted by the Florida Building Commission, including, but not limited to: Accessibility Volume; Building Volume; Energy Conservation Volume; Residential Volume; Existing Building Volume; Mechanical Volume; Plumbing Volume; Fuel Gas Volume; and, the National Electrical Code. [Ord. 2017-026]

43. **Florida's Turnpike** – a.k.a. Ronald Reagan Turnpike

44. **Focal Point** – non-commercial design element, either landscape, water feature, or accessory structure, intended to create a visual point of interest.

45. **Food Processing** – For the purposes of [Art. 4.B.5.C.4, Equestrian Waste Management Facility](#), shall mean any facility or use involved in food processing, including but not limited to Agricultural Packing Plant, Sugar Mill or Refinery, or Manufacturing and Processing. [Ord. 2017-007]

46. **Food Service** – at least one full meal being provided to each resident, every day, in a central dining area.

47. **Foot-Candle** – for the purposes of [Art. 5, Supplementary Standards](#), unit of light quantity or density when the foot is the unit of measure. One foot-candle (fc) equals one lumen per square foot of area. When metric units are used, lux is the unit of light quantity. One lux equals one lumen per square meter of area. One foot-candle equals ten and seventy-six hundredths lux. [Ord. 2005-041]

48. **Form Based Code** – A method of regulating the physical form of the built environment to achieve a predictable urban form, public realm, and sense of place. [Ord. 2010-005]

49. **Fossil** – for the purposes of [Art. 9, Archaeological and Historic Preservation](#), a remnant or trace of an organism of a past geological age.

50. **Frontage** – see Lot Frontage.

51. **Front Façade**
   a. For the purposes of [Art. 3, Overlays and Zoning Districts](#), the wall of a building parallel with and facing a frontage line.
   b. For the purposes of [Art. 5.C, Design Standards](#) and [Art. 7.C.3.B, Foundation Planting](#), the main pedestrian entrance of a building or structure shall be designated as the front façade. [Ord. 2018-002]

52. **Full-Cutoff Luminaire** – A luminaire light distribution where zero candela intensity occurs at an angle of 90 degrees above nadir, and at all greater angles from nadir. [Ord. 2005-041]

53. **Functionally-Dependent Use** – for the purposes of [Art. 18, Flood Damage Prevention](#), a use which cannot perform its intended purpose unless it is located or carried out in close proximity to water, including only docking facilities and port facilities that are necessary for the loading and unloading of cargo or passengers, and ship building and ship repair facilities; the term does not include long-term storage or related manufacturing facilities. [Ord. 2017-026]
54. **Functions** – the roles wetlands serve, including but not limited to flood storage, flood conveyance, ground water recharge and discharge, erosion control, wave attenuation, water quality enhancement and protection, nutrient removal, food chain support, wildlife habitat, breeding and habitat grounds for fishery species, and recreational values.

55. **Future Land Use** – as defined in the Plan, FLU Map.

G. **Terms defined herein or referenced in this Article shall have the following meanings:**

1. **Gallery** – a covered promenade over a pedestrian walkway, contiguous to a street, plaza, or square that is open to the public, with no usable floor area above. [Ord. 2006-004]

2. **Gasoline Pump** – For the purposes of Art. 4.B, Use Classification, a mechanism that draws gasoline from underground storage tanks. A gasoline pump may have multiple dispensers and may be installed within a fueling island adjacent to queuing spaces. [Ord. 2010-005]

3. **Gathering** – the bringing together of a group of people for social, civic, or other casual, public assembly.

4. **Gazebo** – accessory building consisting of detached, freestanding open on all sides of the structure with a solid roof.

5. **Generic Substance List** – for the purposes of Art. 14, Environmental Standards, those general categories of substances set forth in Appendix 1, Generic Substances List attached hereto and incorporated herein.

6. **Glare** – a discomforting condition that occurs when the brightness of a light contrasts with a low brightness background and makes it difficult for the human eye to adjust. [Ord. 2005-041]

7. **Government Facilities** – lands that are owned by a unit of Local, State, or Federal Government, that support government services, customary government operations, or delivery of public services. [Ord. 2007-013]

8. **Grade, Finished** – see Florida Building Code, Building Section 202 for definition of Grade and all applicable PBC Amendments.

9. **Grain Milling or Processing** – means facilities for processing and storing grain or other nonperishable crops. Typical uses include cotton gins and grain mills.

10. **Grass Parking** – for the purposes of Art. 6, Parking, Loading, and Circulation, on-site turf parking spaces on an improved subbase.

11. **Grave Good/Funerary Object** – for the purposes of Art. 9, Archaeological and Historic Preservation, any material culture object that is associated with a human burial. [Ord. 2008-037]

12. **Grease Trap** – for the purposes of Art. 15, Health Regulations, a watertight receptacle or reservoir receiving wastewater from a kitchen or other source containing grease.

13. **Greenhouse** – an accessory structure consisting of a glass or hard plastic enclosure used to protect plants from insects, heat, cold, and exposure to the sun.

15. **Groom's Quarters** – on-site living quarters for persons responsible for grooming and caring for horses boarded at a stable. Occupancy shall be limited to on-site employees and members of the employees’ family only.

16. **Gross Acreage** – see Gross Land Area.

17. **Gross Land Area** – the total area, including all public and private areas within the legal boundaries of a particular parcel of land or project.

18. **Gross Leasable Area (GLA)** – see Floor Area, Gross Leasable.

19. **Gross Trips** – for the purposes of Art. 12, Traffic Performance Standards, Project Trips plus internal trips.

20. **Ground Cover** – for the purposes of Art. 7, Landscaping, plants, other than turf grass, normally reaching an average maximum height of not more than 24 inches at maturity.

21. **Ground Floor** – a level of building, the floor of which is located not more than two feet below nor more than six feet above finished grade.

22. **Ground-Level Barrier** – for the purposes of Art. 14, Environmental Standards, any natural or artificial structure rising above the ground which prevents beachfront lighting from shining directly onto the beach-dune system.
23. Ground Water
   a. Water beneath the surface of the ground within a zone of saturation where such water is at or
      above atmospheric pressure, whether within the voids between soil particles or within solution
      channels or fractures in rock.
   b. For the purposes of Art. 14.B, Wellfield Protection, water that fills all the unblocked voids of
      underlying material below the ground surface, which is the upper limit of saturation, or water which
      is held in the unsaturated zone by capillarity.
   c. For the purposes of Art. 15, Health Regulations, a source of water existing below the surface of the
      ground and not exposed to the atmosphere.

24. Groundwater and Natural Resources Protection Board (GNR PB) – for the purposes of Art. 14,
    Environmental Standards, that board designated by the BCC, to hear alleged violations of this Chapter
    and other State and Local laws protecting the groundwater and natural resources of PBC. [Ord. 2011-
    001]

25. Groves/Row Crops – the cultivation of fruits and vegetables for bona fide agricultural purposes.

26. Grubbing – removal of vegetation from land by digging, raking, dragging, or otherwise disturbing the
    roots of the vegetation and the soil in which roots are located.

27. Guarantee – sufficient funds over which PBC has control irrevocably committed by written instrument
    to secure complete performance of a contract for required improvements, condition of a Development
    Order, or Road Agreement.

H. Terms defined herein or referenced in this Article shall have the following meanings:

1. Habitable Room – a room occupied by one or more persons for living, eating, sleeping, or working
   purposes. It does not include toilets, laundries, serving and storage pantries, corridors, cellars, and
   spaces that are not used frequently or during extended periods.

2. Handicap Space – for the purposes of Art. 6, Parking, Loading, and Circulation, a parking space
   designed, marked, and reserved for exclusive use by persons registered as handicapped.

3. Handicapped Person – has the meaning given in F.S. § 760.22(7).

4. Hardship – for the purposes of Art. 18, Flood Damage Prevention, see Exceptional Hardship. [Ord.
   2004-013]

5. Hatchling – for the purposes of Art. 14, Environmental Standards, any specimen of sea turtle, within
   or outside of a nest, which has recently hatched from an egg.

6. Hatracking – see Pruning, Hatracking.

7. Hazard – for the purposes of Art. 16, Airport Regulations, an advisory determination rendered by the
   FAA at the conclusion of an Aeronautical Study made under FAR Part 77 indicating the proposed
   structure is not a safe and/or efficient use of airspace.

8. Health Hazard – any condition, device, or practice in a water supply system or its operation, which
    creates or may create an imminent or substantial danger to the health and well-being of the water
    consumer.

9. Health Threat – for the purposes of Art. 15, Health Regulations, any condition, device, or practice in a
    water supply system or its operation which creates or may create an imminent or substantial danger to
    the health and well-being of the water consumer.

10. Hedge – for the purposes of Art. 7, Landscaping, a landscape barrier consisting of a continuous, dense
    planting of shrubs. A series of shrubs planted in a manner so as to form a continuous visual screen.

11. Heliport or Vertiport – For the purposes of Art. 16, Airport Regulations, an identifiable ground-level or
    elevated area which is validly licensed by the State of Florida for public use and is intended to be used
    for the takeoff and landing of helicopters, tilt rotors, or any other vertical takeoff and landing rotorcraft.

12. High Probability Area/Zone/Section/Portion/Tract – for the purposes of Art. 9, Archaeological and
    Historic Preservation, terms used to describe a geographical area in real space that has an increased
    potential of containing previously undocumented archaeological or historic resources. These areas
    have dissimilar landforms compared to the surrounding landscape (an example would be an increase
    in elevation), have or had diverse ecological environments (examples include tree islands, low
    hammocks, coastal hammocks, costal dunes, and strands) all are located within a reasonable proximity
    to a freshwater source, and a close proximity to any known archaeological sites. [Ord. 2008-037]

13. Highway Capacity Manual (HCM) – unless otherwise specified, the most recent edition of the Highway
    Capacity Manual as published by the Transportation Research Board. [Ord. 2010-022]

14. Highest Adjacent Grade
    Natural – the highest natural elevation of the ground surface, prior to start of any past or proposed
    construction or Development, immediately next to the proposed exterior walls or foundation of a
    Building. [Ord. 2017-026]
    Finished – the highest elevation of the ground surface, next to the walls or foundation of a Structure.
15. **Historic Building or Structure** – for the purposes of Art. 18, Flood Damage Prevention, any Building or Structure that is determined eligible for the exception to the Special Flood Hazard Area requirements of the Florida Building Code, Existing Building Volume, Chapter 11, Historic Buildings, being listed individually in the National Register of Historic Places (a listing maintained by the Department of the Interior) or preliminarily determined by the Secretary of the Interior as meeting the requirements for individual listing on the National Register or certified or preliminarily determined by the Secretary of the Interior as contributing to the historical significance of a registered historic or a district preliminarily determined by the Secretary to qualify as a registered historic district or individually listed on a State inventory of historic places in States with historic preservation programs which have been approved by the Secretary of the Interior; or individually listed on the Historic Palm Beach County Preservation Board’s inventory of historic places. [Ord. 2004-013] [Ord. 2017-026]

16. **Historic District** – for the purposes of Art. 9, Archaeological and Historic Preservation, a geographically defined area with a significant concentration, linkage, or continuity of sites, improvements, or landscape features united by historic events or by plan or physical development, and which area has been designated as a historic district, pursuant to Art. 9.B, Historic Preservation Procedures. Any historic district may have within its area contributing and non-contributing buildings or other structures that contribute to the overall visual character of the district.

17. **Historic Resources** – for the purposes of Art. 9, Archaeological and Historic Preservation, all evidences of human occupations that date from historic (i.e., recorded history) periods. These resources include documentary data (i.e., written records, archival material, photographs, maps, etc.) sites, artifacts, buildings, structures and all other cultural resources and relevant information pertaining to them. Historic resources are cultural resources and may be considered archaeological resources when archaeological work is involved in their identification.

18. **Historical Traffic Growth Table** – for the purposes of Art. 12, Traffic Performance Standards, a table prepared by the County Engineer showing the preceding three year’s increase or decrease in Average Daily Traffic or two-way Peak Hour Traffic on various Links, based upon traffic counts and which provide the information to be used in Projecting the Background Traffic.

19. **Home Instruction, Inside** – teaching which takes place inside the dwelling unit of the instructor. Typical instruction includes music lessons and academic tutoring.

20. **Home Instruction, Outside** – teaching which takes place outside the dwelling unit, on the property of the instructor. This type of instruction is limited to subject matter which necessitates outside instruction. Typical instruction includes tennis, swimming lessons, dog training and equestrian lessons.

21. **Home(s)** – for the purposes of Art. 7, Landscaping, Single Family houses, Zero Lot Line houses, Townhouses, duplexes, Multifamily dwellings, or other structures intended or used for residential housing. [Ord. 2005-002]

22. **Horizontal Plane** – means an imaginary line drawn across the bottom of a light fixture above which no light shall be emitted. [Ord. 2005-041]

23. **Horizontal Zone** – for the purposes of Art. 16, Airport Regulations, the area around each airport with an outer boundary constructed by swinging arcs of specified radii from the center of each end of the primary zone of each airport’s runways and connecting adjacent area by lines tangent to those arcs. The radius of the arc specified for each end of a value will be the highest composite value determined for either end of the runway. When a 5,000-foot arc is encompassed by tangents connecting two adjacent 10,000-foot arcs, the 5,000-foot arc shall be disregarded on the construction of the perimeter of the Horizontal Zone.
I. Terms defined herein or referenced in this Article shall have the following meanings:

1. **Illuminance** – the quantity of light arriving at a surface divided by the area of the lighted surface, measured in foot-candles. Horizontal illuminance applies to a horizontal surface; vertical illuminance applies to a vertical surface. Average illuminance is the level of illuminance over an entire illuminated target area. Maximum illuminance is the highest level of illuminance on any point within the entire area; minimum illuminance is the lowest level of illuminance on any point within the target area. [Ord. 2005-041]

2. **Illuminance Levels** – for the purposes of Art. 5.E.4.E. Outdoor Lighting, all illuminance levels and foot-candles means the maintained illuminance levels utilizing lamp manufacture mean lumen values. The average illuminance level applies to an entire illuminated target area. Unless otherwise noted, illuminance levels refer to horizontal illuminance levels. [Ord. 2005-041]

3. **Illumination** – for the purposes of Art. 14, Environmental Standards, light produced from any artificial light source directly or indirectly cast within the jurisdictional boundaries of this Chapter and visible from the beach. [Ord. 2011-001]

4. **Impact Fee Coordinator** – the person responsible for the administration of PBC’s Impact Fee program.

5. **Improvement** – for the purposes of Art. 9, Archaeological and Historic Preservation, any building, structure, fence, gate, wall, walkway, parking facility, light fixture, bench, foundation, sign, work of art, earthworks, sidewalk, or other man-made objects constituting a physical change or betterment of real property, or any part thereof.

6. **Improved Parcel** – for the purposes of Art. 14, Environmental Standards, real property which has undergone an alteration from its natural state, initiated by the parcel owner or predecessor in interest, but not those alterations initiated on private property by a governmental agency. For the purpose of this Chapter alterations are at least the following: land clearing and relocation of native vegetation, mining and excavation, agriculture; installation of construction of paved or unpaved roads and paths, canals and structures for human or agricultural use.

7. **Improvement Value** – For the purposes of this Article and Art. 5, Supplementary Standards, means the most recent value placed on a structure by the PBC Property Appraiser. [Ord. 2013-001]

8. **Incinerator** – a permanent facility operated alone or in conjunction with a resource recovery facility or landfill for the purpose of burning biohazardous waste, solid waste or trash to ash as regulated by the ERM under Ord. No. 92-22 and Ord. No. 92-23, as amended.

9. **Income, WHP** – The following household income ranges shall apply to the WHP. These income ranges are based on the Area Median Income (AMI) for Palm Beach County, as published annually by the U.S. Department of Housing and Urban Development. [Ord. 2006-055]
   a. **Income, Low** – A household income between 60 and 80 percent of the County’s median income. [Ord. 2006-055] [Ord. 2019-033]
   b. **Income 1, Moderate** – A household income between 80 and 100 percent of the County’s median income. [Ord. 2006-055] [Ord. 2019-033]
   c. **Income 2, Moderate** – A household income between 100 and 120 percent of the County’s median income. [Ord. 2006-055] [Ord. 2019-033]
   d. **Income, Middle** – A household income between 120 and 140 percent of the County’s median income. [Ord. 2006-055] [Ord. 2019-033]

10. **Incompatibility of Land Uses** – the undesirable health and safety effects arising from the proximity or direct association of contradictory, incongruous, or discordant land uses or activities, including aesthetics, noise, vibration, smoke, hazardous odors, radiations and other land use and environmental conditions such as the intensity, character, impact or amount of traffic.

11. **Incompatible Sites**
   a. Residential uses or pods adjacent to non-residential uses or pods.
   b. Residential uses or pods adjacent to residential uses or pods with a density difference greater than three units per acre.

12. **Inconsistent Use** – any and all construction not related to the purpose of the easement, and any and all landscaping other than turf grass (seed/sod).

13. **Incorporated Vegetation Plan** – for the purposes of Art. 14, Environmental Standards, a comprehensive document or site plan that provides parcel specific information for native trees, excluding trees within Native Upland Preserves or Tree Preservation Areas, to be incorporated on the parcel. Documented trees are to be three inches or greater DBH, and palm trees with a minimum overall clear trunk height of eight feet. The Incorporated Vegetation Plan may be performed by a State of Florida licensed surveyor and mapper, using contemporary surveying techniques, or other professional using Global Positioning System (GPS) equipment with sub meter accuracy.
14. **Independent Calculation/Independent Analysis** – for the purposes of Art. 13, Impact Fees, the data, analysis and report prepared by a feepayer for the purpose of establishing a different impact fee amount than the one set forth in the Impact Fee Schedule.

15. **Indirect Illumination** – illuminated as a result of the glowing element(s), lamp(s), globe(s), or reflector(s) of an artificial light source which is not visible to an observer on the beach. [Ord. 2011-001]

16. **Industrial Equipment/Heavy Machinery** – farm tractors and implements, bulldozers, drag lines, cranes, derricks, heavy earth moving equipment normally used in farming, excavation or heavy construction activities. For the purposes of this definition, all machinery that uses steel tracks for traction shall also be considered heavy machinery.

17. **Industrial, Hazardous or Toxic Waste** – for the purposes of Art. 15, Health Regulations, as defined by Chapter 64E-6, F.A.C.

18. **Infill Project** – a development project located on a parcel located in a predominantly developed area and adjacent to existing residential, commercial, or civic land uses on at least two sides.

19. **Ingress** – entry to lot or structure.

20. **In-Kind Contribution** – for the purposes of Art. 13, Impact Fees, the conveyance, dedication, construction, placement, delivery, or remittance of land, buildings, improvements, fixtures, personal property, or money to PBC or the PBC School Board for capital facilities for which impact fees are levied in Art. 13, Impact Fees.

21. **Inhabited Residential** – for the purposes of Art. 5, Supplementary Standards, regularly occupied by the complainant and occupied at the time of the complaint.

22. **Instrument Approach Procedure** – for the purposes of Art. 16, Airport Regulations, a specified, published set of operating procedures issued by the FAA and used by a pilot to land an aircraft at an airport without visual reference to the ground.

23. **Instrument Landing System (ILS)** – for the purposes of Art. 16, Airport Regulations, a landing approach system that establishes a course and a descent path to align aircraft with a runway for final approach.

24. **Integration** – For the purposes of Art. 3.B, Overlays and determining consistency with FLUE Policy 2.4-b and the vertical integration provision of FLUE Policy 2.2.2-f of the Plan, functional or vertical integration shall mean the horizontal or vertical combination of residential and non-residential uses that forms a single project providing for pedestrian and built form connectivity between uses, parking areas, and public spaces. [Ord. 2006-004] [Ord. 2006-036] [Ord. 2009-040]

25. **Intensity** – the number of square feet per acre and specific land use for non-residential uses.

26. **Intensity Entitlement** – for the purposes of Art. 2, Application Processes and Procedures, the amount of intensity granted by PBC if a parcel couldn’t satisfy concurrency as stated in the FLUE of the Plan, as amended.

27. **Interior Area** – for the purposes of Art. 7, Landscaping, the entire parcel to be developed exclusive of the required front, rear, or side perimeter landscape areas.

28. **Intermodal Transfer Center** – For the purposes of Art. 5.H, Mass Transit Standards, A station area adjacent to or within 6 to 8 miles of Mass Transit serving two or more Palm Tran Bus Routes at a time with a covered waiting area providing any or all of the above Infrastructure/Facilities including commuter parking is considered an Intermodal Transfer Center/Terminal. [Ord. 2008-003]

29. **Internal Trips** – for the purposes of Art. 12, Traffic Performance Standards, trips from a proposed Project that do not exit the Project or enter the Major Thoroughfare system.

30. **Reserved For Future Use**

31. **Inundation** – the presence of water, in motion or standing, of sufficient depth to damage property due to the mere presence of water or the deposition of silt or which may be a nuisance, hazard or health problem.

32. **Invasive Non-Native Plant Species** – any plant not indigenous to the State of Florida, which exhibits, or has the potential to exhibit, uncontrolled growth and invasion or alteration of the natural qualities of any native habitat. A list of invasive, non-native plant species shall be maintained by the ERM.

33. **Irreparable or Irreversible Harm**
   a. A substantial injury that is beyond the possibility of repair; the injury suffered cannot be undone; damage or destruction of a natural resource that is so substantial and permanent that it is beyond the possibility of being repaired or restored to its previous condition. A natural resource shall be deemed irreparably harmed when an activity taken or caused by a person or persons alters the natural resource to such a degree that it cannot reasonably be restored or returned to the condition existing immediately prior to such alteration. A non-renewable natural resource shall be deemed irreparably harmed when the resource has been permanently removed or consumed. There shall be a rebuttable presumption that a natural resource has been irreparably harmed when the nature
or extent of the alteration makes it impossible to ascertain the pre-alteration condition of the natural resource. A natural resource shall not be deemed irreparably harmed when the alteration of the natural resource is authorized by County law. [Ord. 2006-036]

b. For the purposes of Art. 7, Landscaping, irreparable or irreversible harm to existing vegetation shall include the improper pruning or hatracking that has caused significant damage to vegetation to an extent that precludes the regrowth of a natural canopy, or reduced the size of vegetation down to a stump. Reparable harm to existing vegetation shall include the improper pruning or hatracking that has caused damage to vegetation to an extent that can be corrected or repaired through standards of additional pruning and care. [Ord. 2020-001]

34. Irrigation System – a system of pipes or other conduits designed to transport and distribute water to plants.

J. Terms defined herein or referenced in this Article shall have the following meanings:
1. Jersey Barrier – a device installed around the base of towers, guy anchors, or supports to protect structural integrity from vehicular impact.
2. Jurisdictional Boundaries – the area between the mean high water line of the Atlantic Ocean as well as the Jupiter, Lake Worth, South Lake Worth, and Boca Raton Inlets and a line 500 feet inland for structures greater than two stories tall or a line 300 feet inland for all other structures.

K. Terms defined herein or referenced in this Article shall have the following meanings:
1. K Factor – for the purposes of Art. 12, Traffic Performance Standards, the ratio of peak hour traffic to average daily traffic, as provided in the FDOT Quality/Level of Service Handbook. Example: ADT = 10,000, peak hour traffic = 1,000, k = 0.10.
2. Kitchen – that portion of a structure used or designed to be used for the preparation of food, and including or designed to include a stove with a 220 volt line, refrigerator, sink and cupboards.

L. Terms defined herein or referenced in this Article shall have the following meanings:
1. Laboratory – for the purposes of Art. 14, Environmental Standards, a designated area or areas used for testing, research, experimentation, quality control, or prototype construction, but not used for repair or maintenance activities (excluding laboratory equipment), the manufacturing of products for sale, or pilot plant testing.
2. Lake, Excavated – a body of water, excluding canals of conveyance, greater than one acre in size or greater than six feet in depth from OWL and which will remain open for longer than 180 days. Multiple (more than one) bodies of water constructed on a parcel or parcels of property under common ownership or control shall be considered a lake when such water bodies have a combined surface area greater than one acre.
3. Lake, Excavated, Existing – body of water constructed, under construction or to be constructed under permit of a jurisdictional agency prior to June 16, 1992.
4. Lake, Finger – that portion of a dead end water body, which is less than 50 feet in width, and longer than one and one-half times its width, as measured from the point at which the dead end water body is less than 50 feet wide.
5. Lake Maintenance Easement – see Easement, Lake Maintenance.
6. Lake, Mined – a lake created by the extraction of minerals from the earth for commercial purposes.
7. Land – the earth, water, and air, above, below, or on the surface, and includes any improvements or structures customarily regarded as land.
8. Land Application – for the purposes of Art. 14, Environmental Standards, means the application or disposal of effluent or sludge on, above or into the surface of the ground through spray irrigation, land spreading, or other methods.
9. Land Development Permit – for the purposes of Art. 11, Subdivision, Platting, and Required Improvements, the Development Permit issued by PBC authorizing construction of required improvements for a subdivision
10. Land Development Regulations – Ordinances enacted by PBC for the regulation of any aspect of development and includes any zoning, rezoning, subdivision, health, environmental, or sign regulations controlling the development of land.
11. Landscape – for the purposes of Art. 7, Landscaping, any combination of living plants (such as grass, ground cover, shrubs, vines, hedges, or trees) and non-living landscape material (such as rocks, pebbles, sand, mulch, walls, fences, or decorative paving materials).
12. Landscape Architect – a person licensed to practice landscape architecture under F.S. ch. 481, pt. II (Landscape Architecture) and includes the term “registered landscape architect.”
13. Landscape Barrier – for the purposes of Art. 7, Landscaping, a landscape design feature constructed within a landscape buffer that is intended to channel pedestrian movement and impede vehicular access and to provide an abrupt transition between otherwise incompatible uses. A landscape barrier

Unified Land Development Code
Supplement No. 28 (Printed 09/20)
may consist of living plants (such as a hedge), structures (such as a wall or fence), or changes in grade (such as a berm).

14. **Landscape Buffer** – a continuous area of land which is required by Art. 7, Landscaping, to be set aside along the perimeter of a lot or parcel in which existing native vegetation, relocated native vegetation, and landscaping is used to provide a transition between and to reduce the negative environmental, aesthetic, compatibility and other impacts of one use upon another.

15. **Landscaping** – any combination of living plants (such as grass, ground cover, shrubs, vines, hedges, or trees) or nonliving landscape material (such as rocks, pebbles, sand, mulch, walls, fences, or decorative paving materials). Landscaping may include the preservation and incorporation of existing trees, vegetation, or ecosystems into site development.

16. **Landscape Feature** – for the purposes of Art. 9, Archaeological and Historic Preservation, any improvement or vegetation including, but not limited to: outbuildings, walls, courtyards, fences, shrubbery, trees, sidewalks, planters, plantings, gates, street furniture or exterior lighting.

17. **Landscape Hierarchy** – for the purposes of Art. 7, Landscaping, planting creating a ranking of plants from small to large.

18. **Landscape Plan** – a plan showing the location, quantity, and variety of plants to be installed on a non-residential, Multifamily, or residential planned development. This plan may also show the location of hardscape elements, buffers, or other landscape-related items.

19. **Large Scale Development** – any large single tenant retail use, with or without accessory tenants, in a single building, occupying 65,000 gross square feet or more. [Ord. 2007-013]

20. **Legal Access** – see Access, Legal.

21. **Legal Positive Outfall** – the permanently established connection of a stormwater discharge conveyance facility serving a development site to a watercourse or water body under the control and jurisdiction of one or more public agencies, said connection being subject to all applicable agency permitting and approval requirements.

22. **Letter of Map Change (LOMC)** – for the purposes of Art. 18, Flood Damage Prevention, an official determination issued by FEMA that amends or revises an effective Flood Insurance Rate Map or Flood Insurance Study. Letters of Map Change include: [Ord. 2017-026]
   a. **Letter of Map Revision (LOMR)** – for the purposes of Art. 18, Flood Damage Prevention, a revision based on technical data that may show changes to flood zones, flood elevations, Special Flood Hazard Area boundaries and Floodway delineations, and other planimetric features. [Ord. 2017-026]
   b. **Letter of Map Amendment (LOMA)** – An amendment based on technical data showing that a property was incorrectly included in a designated Special Flood Hazard Area. A LOMA amends the current effective Flood Insurance Rate Map and establishes that a specific property, portion of a property, or structure is not located in a Special Flood Hazard Area. [Ord. 2017-026]
   c. **Letter of Map Revision Based on Fill (LOMR-F)** – A determination that a structure or parcel of land has been elevated by fill above the base flood elevation and is, therefore, no longer located within the Special Flood Hazard Area. In order to qualify for this determination, the fill must have been permitted and placed in accordance with the community’s floodplain management regulations. [Ord. 2017-026]
   d. **Conditional Letter of Map Revision (CLOMR)** – for the purposes of Art. 18, Flood Damage Prevention, a formal review and comment as to whether a proposed flood protection project or other project complies with the minimum NFIP requirements for such projects with respect to delineation of Special Flood Hazard Areas. A CLOMR does not revise the effective Flood Insurance Rate Map or Flood Insurance Study; upon submission and approval of certified as-built documentation, a Letter of Map Revision may be issued by FEMA to revise the effective FIRM. [Ord. 2017-026]

23. **Level of Service (LOS)** – For the purposes of Art. 12, Traffic Performance Standards, the measure of the functional and operational characteristics of a roadway based upon traffic volume in relation to road capacity or the amount of vehicle delay or average speed. [Ord. 2018-002]

24. **Level of Service (LOS) D** – for the purposes of Art. 12, Traffic Performance Standards, as to Average Daily Traffic, Peak Hour Traffic two-way and Peak Direction on a Link, the numbers set forth in Table 12.B.2.C-1.1A, LOS D Link Service Volumes, as to Traffic at an intersection, a Critical Volume of 1,400 or average delay of greater than 35 and less than or equal to 55 seconds based on the HCM 2000 operations analysis; as to speed thresholds, the numbers set forth in Table 12.B.2.C-3.1C, LOS D Speed Thresholds. [Ord. 2005-002]

25. **Level of Service (LOS) E** – for the purposes of Art. 12, Traffic Performance Standards, as to Average Daily Traffic, Peak Hour Traffic two-way and Peak Direction on a Link, the numbers set forth in Table
12.B.2.C-4 2A, LOS E Link Service Volumes as to Peak Hour Traffic at an intersection, a Critical Volume of one 1,500 or average delay of greater than 55 and less than or equal to 80 seconds based on the HCM 2000 operational analysis, as to speed thresholds, the numbers as set forth in Table 12.B.2.C-6 2C, LOS E Speed Thresholds.

26. Level of Service (LOS) for Rural Service Area – the LOS established for the areas identified as the Rural Service Area in the FLUA of the Plan.

27. Level of Service (LOS) for Urban Service Area – the LOS established for those areas identified as the Urban Service Area in the FLUA of the Plan.

28. Library Services – those services provided by the PBC Library Taxing District.

29. Light Cutoff – for the purposes of Art. 5, Supplementary Standards, a luminary with elements such as shields, reflectors, or refractor panels which direct light and eliminate light spillover and glare.

30. Light-Duty Truck – for the purposes of Art. 18, Flood Damage Prevention, and as defined in 40 CFR § 86.082-2, any motor vehicle rated at 8,500 pounds Gross Vehicular Weight Rating or less which has a vehicular curb weight of 6,000 pounds or less and which has a basic vehicle frontal area of 45 square feet or less, which is: [Ord. 2017-026]

   a. Designed primarily for purposes of transportation of property or is a derivation of such a vehicle, or [Ord. 2017-026]
   b. Designed primarily for transportation of persons and has a capacity of more than 12 persons; or [Ord. 2017-026]
   c. Available with special features enabling off-street or off-highway operation and use. [Ord. 2017-026]

31. Light Fixture – any device that holds protects and provides the optical system and power connections for a lamp or emits illumination. [Ord. 2006-036]

32. Lighting, Animated – for the purposes of Art. 5.E.4.E, Outdoor Lighting, flashing or moving lights that otherwise change at intervals more frequently than once every six seconds. [Ord. 2005-041]

33. Light Loss Factor – for the purposes of Art. 5.E.4.E, Outdoor Lighting, a percentage amount applied to the actual anticipated foot-candle levels of a fixture, which reduces the calculated light level output on the photometric plan to account for lower light level output from a fixture due to the age of the bulb, debris or dust on the fixture, and other factors that degrade the output capacity of the fixture. [Ord. 2005-041]

34. Light Trespass – the illumination of light produced by a luminaire, which is beyond the boundaries of the property on which the luminaire is located. [Ord. 2005-041]

35. Limb – see Branch.

36. Limitation Ratings – for the purposes of Art. 15, Health Regulations, as defined by Ch. 64E-6, F.A.C.

37. Limited Use Water Systems – for the purposes of Art. 15, Health Regulations, a water system not covered or included in the State of Florida Safe Drinking Water Act, which is further defined as either:

   a. Limited use commercial water system serves one or more non-residential establishments; or
   b. Limited use community water system serves five or more residences or two or more rental residences.

38. Limited Use Well – for the purposes of Art. 15, Health Regulations, a water well that is a source of potable water and is part of a limited use water system.

39. Limited Use Well – for the purposes of Art. 15, Health Regulations, a water well that is a source of potable water and is part of a limited use water system.

40. Line of Sight of Beach – for the purposes of Art. 14, Environmental Standards, any position that is visible from any portion of the nesting beach at sand level and is not limited to a shore perpendicular direction.

41. Lion Country Safari – for the purposes of Art. 3.E.2.G, RR-PUD, shall mean the Lion Country Safari Overlay, as established by FLUE Objective 1.11 of the Plan. [Ord. 2011-016]

42. Listed Species – for the purposes of Art. 14, Environmental Standards, any animal or plant species listed as endangered, threatened, rare, or of special concern by one or more of the following agencies:

   a. U.S. Fish and Wildlife Service;
   b. Florida Fish and Wildlife Conservation Commission;
   c. Florida Committee on Rare and Endangered Plants and Animals;
   d. Florida Department of Agriculture and Consumer Services; and
   e. Treasure Coast Regional Planning Council.
e. Treasure Coast Regional Planning Council.

43. **Litter** — any garbage, rubbish, trash, refuse, can, bottle, box, container, paper, tobacco product, tire, appliance, mechanical equipment or part, building or construction material, tool, machinery, wood, motor vehicle or motor vehicle part, vessel, aircraft, farm machinery or equipment, sludge from a waste treatment facility, or air pollution control facility, or substance in any form resulting from domestic, industrial, commercial, mining, or government operations.

44. **Littoral Zone** — that region of the shoreline beginning at the OHW and extending waterward to a maximum depth of minus three feet OHW.

45. **Live/Work** — a mixed use supporting one residential dwelling unit collocated with any non-residential use permitted pursuant to the applicable zoning district, where permitted by the Florida Building Code.

46. **Livestock Waste** — for the purposes of Art. 5.J, Best Management Practices for Livestock Waste Received from Offsite Sources, waste composed of excreta of animals and residual materials that have been used for bedding, sanitary, or feeding purposes for such animals.

47. **Loading Area** — For the purposes of Art. 6, Parking, Loading, and Circulation, an area consisting of two or more loading spaces.

48. **Loading Bay** — For the purposes of Art. 6, Parking, Loading, and Circulation, a portion of a structure where deliveries are loaded and unloaded.

49. **Loading Dock** — For the purposes of Art. 6, Parking, Loading, and Circulation, a platform where trucks can be loaded or unloaded.

50. **Loading Space** — for the purposes of Art. 6, Parking, Loading, and Circulation, the space within which vehicles are temporarily parked during loading and unloading operations.

51. **Local Bus** — For the purposes of Art. 12, Traffic Performance Standards, transit service interconnecting communities with employment centers and/or other attractions.

52. **Local Government** — PBC, or a municipality in PBC.

53. **Local Government Plan** — for the purposes of Art. 12, Traffic Performance Standards, the Comprehensive Plan of the Local Government adopted pursuant to F.S. ch. 163, pt. II.

54. **Local Planning Agency** — the local planning agency designated by the BCC to prepare the Comprehensive Plan pursuant to F.S. § 163.3161.

55. **Local Shuttle** — For the purposes of Art. 12, Traffic Performance Standards, transit service connecting two developments: (1) residential to interrelated services; or (2) residential to employment centers.

56. **Lot**
   a. The smallest division of land identified as a single unit of ownership for conveyance and legal development purposes, and delineated by a closed boundary, which is either:
      1) Depicted on a recorded plat;
      2) Depicted on a survey, map, or drawing for which an affidavit or waiver or affidavit of exemption has been recorded; or
   b. The total area of abutting lands joined pursuant to a recorded unity of title shall be deemed a single lot for the purposes of this Code. As used herein, the term shall be synonymous with the terms "plot," "parcel," or "tract" when referring to lands within a closed boundary not further divided by one or more interior property lines.
   c. For the purposes of Art. 15.A, PBC Environmental Control Rule I – Onsite Sewage Treatment and Disposal Systems, as defined by F.S. § 381.0065(2).

57. **Lot Area** — the total horizontal area included within lot lines.

58. **Lot, Corner** — either a lot bounded entirely by streets, or a lot which adjoins the point of intersection of two or more streets.

59. **Lot Depth** — the horizontal length of a straight line drawn from the midpoint of the front property line of a lot to the midpoint of the rear property line.

60. **Lot Frontage**
   a. That side of the property line abutting a legally accessible street. On a corner lot, the frontage may be designated by the owner, subject to the approval by the Zoning Division who will determine whether it is consistent with the orientation of the other lots and improvements on the same side of the accessible street.
   b. For the purposes of TDD, WCRAO, IRO, or PRA projects where a build-to-line is required, and vehicular access may be from the side or rear of the property, the property line used to meet the build-to-line requirements shall be the lot frontage.
61. **Lot, Flag** – a lot not meeting the minimum frontage requirement and where access to a public street is established by a narrow private street or easement.

62. **Lot, Interior** – any lot neither a corner lot nor a through lot.

63. **Lot Line, Front** – the lot line adjacent to a street.

64. **Lot Line, Interior** – any lot line not adjacent to a street.

65. **Lot Line, Rear** – that lot line which is opposite, generally parallel to, and most distant from the front lot line.

66. **Lot, Double Frontage** – any lot having frontage on two nonintersecting streets.

67. **Lot Width** – the horizontal distance between the side lot lines measured at right angles to the lot depth at a point midway between the front and rear property lines.

68. **Lots, Clustered** – residential parking lots grouped on a common street or parking tract where access is either a dead end street, loop, or otherwise designed so as to preclude its extension for access to additional lots.

69. **Lowest Adjacent Roadway Crown (LARC)** – for the purposes of Art. 18, Flood Damage Prevention, the lowest elevation of any point in the crown of a street or road immediately next to the site of a new structure. [Ord. 2004-013]

70. **Lowest Floor** – for the purposes of Art. 18, Flood Damage Prevention, the lowest floor of the lowest enclosed area (including Basement) of a Building. Any unfinished or flood-resistant enclosure, used solely for parking of vehicles, Building access, or storage, in an area other than a Basement, is not considered a Building’s Lowest Floor, provided that such enclosure is not built so as to render the Structure in Violation of the non-elevation design standards of the Florida Building Code or ASCE 24. [Ord. 2004-013] [Ord. 2017-026]

71. **Lumen** – a unit of luminous flux. One foot-candle is one lumen per square foot. [Ord. 2005-041]

72. **Luminaire** – a complete lighting system, which includes a fixture and any associated freestanding pole or other similar structure. [Ord. 2005-041]

73. **Luminaire Height** – the measurement from a paved or landscaped surface at ground level directly under the fixture to the top of the luminaire. [Ord. 2005-041]

**M. Terms defined herein or referenced in this Article shall have the following meanings:**

1. **Machinery, Heavy** – see Industrial Equipment/Heavy Machinery.

2. **Maintenance** – repair or fix existing walls, fixtures, wiring, air conditioning and plumbing necessary to permit structures to remain in a state of good repair without creating additional improvements. See Repair for additional allowed improvement. [Ord. 2010-005]

3. **Major Intersection** – for the purposes of Art. 12, Traffic Performance Standards, the juncture of two or more Major Thoroughfares.

4. **Major Road Network System** – all Arterial and major Collector Roads in PBC (excluding local roads and minor Collectors), and all roads on the Thoroughfare R-O-W Identification Map of the Plan. The distinction between major and minor Collectors shall be made by the County Engineer, based upon accepted traffic engineering principles. Consideration shall be given to such factors as traffic volumes, trip length continuity, and access.

5. **Major Thoroughfares** – for the purposes of Art. 12, Traffic Performance Standards, Major Thoroughfares are:
   a. All streets as defined in the Thoroughfare R-O-W Identification Map, Map TE 14.1 of the Plan as it may be amended.
   b. All existing, proposed or approved roadways that function or would function as major thoroughfares as determined by the County Engineer based on consideration of the following criteria:
      1) Provides continuity of an existing roadway;
      2) Provides connectivity to other Links of the thoroughfare network;
      3) Carries or is projected to carry a volume of at least 1,310 two-way peak hour trips;
      4) Provides an opportunity for decreasing vehicle miles traveled;
      5) Provides an alternative to a parallel thoroughfare network roadway such that the demand on the parallel roadway is decreased.
   c. All proposed and approved roads that would, if built, function as Arterials and major Collectors during the Buildout Period of the proposed Project as determined by the County Engineer in accordance with accepted Traffic Engineering principles.
   d. As to restricting the issuance of Site Specific Development Order’s, it shall not include roads, which are the responsibility of any Municipality pursuant to functional classification under F.S. ch. 335.

6. **Maneuvering Area** – For the purposes of Art. 6, Parking, Loading, and Circulation, an area of sufficient size to allow adequate turning motions for a vehicle to ingress/egress a loading area or loading bay. [Ord. 2008-037]
7. **Mangrove** – any specimen of the species *Avicennia germinans* (black mangrove), *Laguncularia racemosa* (white mangrove), *Rhizophora mangle* (red mangrove), or *Conocarpus erecta* (buttonwood).

8. **Mangrove Fringe** – those shoreline mangrove areas whose width does not exceed 30 feet as measured from the landward edge of the mangrove trunk most landward of MHW (or MHW itself in the absence of any landward tree), waterward along a line perpendicular to MHW, to the waterward edge of the mangrove trunk most waterward of MHW.

9. **Mangrove Stand** – an assemblage of mangrove trees that is mostly low trees noted for a copious development of interfacing adventitious roots above the ground and that contain one or more of the following species: black mangrove (*Avicennia germinans*); red mangrove (*Rhizophora mangle*); white mangrove (*Laguncularia racemosa*); and buttonwood (*Conocarpus erecta*).

10. **Manufactured Building**
   a. A closed structure, building assembly, or system of subassemblies, which may include structural, electrical, plumbing, heating, ventilating, or other service systems manufactured with or without other specified components, as a finished building or as part of a finished building, constructed in conformance with and certified pursuant to the requirements of F.S. ch. 553, as may be amended, which shall include, but not be limited to, Residential Manufactured Buildings (a.k.a. Modular Homes), commercial, institutional, storage, and industrial structures. This definition does not apply to mobile homes. [Ord. 2017-007]
   b. For the purposes of Art. 3, Overlays and Zoning Districts and Art. 4, Use Regulations, a Residential Manufactured Building (a.k.a. Modular Home) may also be considered a Mobile Home, where required by F.S. § 553.382, Placement of Certain Housing. [Ord. 2012-027]

11. **Manufactured Home** – for the purposes of Art. 18, Flood Damage Prevention, a Single Family dwelling constructed entirely in a controlled factory environment built to HUD standards; defined in 24 CFR § 3280.2, Subpart A – Definitions as amended or replaced, as a Structure transportable in one or more sections, which in the traveling mode, is eight feet or more in width and 40 feet or more in length, or when erected on site, is 320 or more square feet, and which is built on a permanent chassis and designed to be a dwelling with or without a permanent foundation when connected to the required utilities which includes the plumbing, heating, air conditioning, and electrical systems contained therein. “Mobile home” is considered to be synonymous with Manufactured Home. The term includes, but is not limited to, Park Trailers, travel trailers, and commercial trailers placed on site for 180 consecutive days or longer and intended to be improvements to real property. Those manufactured Buildings for residential, commercial, institutional, or other use, constructed under DBPR codes and standards for compliance with the Florida Building Code are excluded from this definition. [Ord. 2004-013] [Ord. 2017-0026]

12. **Manufactured Home Park or Manufactured Home Subdivision** – A parcel (or contiguous parcels) of land divided into two or more Manufactured Home lots for rent or sale for which the construction of facilities for servicing the lot on which the Manufactured Home is to be affixed (including, at a minimum, the installation of utilities, either final site grading or the pouring of concrete pads, or the construction of streets) is completed on or after the effective date of this Code. See also Manufactured Building.

13. **Map of Known Archaeological Sites** – for the purposes of Art. 9, Archaeological and Historic Preservation, a map adopted as part of this Article and updated as needed identifying known archaeological sites in the unincorporated areas of PBC.

14. **Marginal Access Street** – see Street, Marginal Access.

15. **Marina** – see Marine Facility.

16. **Market Value** – for the purposes of Art. 18, Flood Damage Prevention, the price at which a property will change hands between a willing buyer and a willing seller, neither party being under compulsion to buy or sell and both having reasonable knowledge of relevant facts. As used in Art. 18, Flood Damage Prevention, the term refers to the Market Value of Buildings and Structures, excluding the land and other improvements on the parcel. Market Value may be established by a qualified independent appraiser, Actual Cash Value (replacement cost depreciated for age and quality of construction), or tax assessment value adjusted to approximate Market Value by a factor provided by the Property Appraiser or Floodplain Administrator. [Ord. 2004-013] [Ord. 2017-026]

17. **Mass Transit Facilities** – the planning of, engineering for, preparation of acquisition documents for, acquisition of land for, or the construction of or purchase of mass transit facilities and equipment necessary to meet the LOS for mass transit facilities.

18. **Master Plan or Site Plan**
   a. For the purposes of Art. 2, Application Processes and Procedures and Art. 3, Overlays and Zoning Districts, a Master Plan or a Site Plan means a graphic and informational representation of a specific design solution for a development phase or entirety, meeting the requirements and
conditions of this Code. The Master Plan or a Site Plan shows an overall development concept including present property uses as well as proposed land development uses, and layout of design and infrastructure components. Various stages of refinement and government approval qualify the Master Plan or the Site Plan to be certified as the proposed Master Plan or Site Plan. [Ord. 2009-040]

b. For the purposes of Art. 11, Subdivision, Platting, and Required Improvements and Art. 12, Traffic Performance Standards, a Master Plan or Site Plan shows how parcels and uses in a mixed use development will integrate with one another. The Master or Site Plan dictates access, mitigation strategies, the build-out timeframe and shall be the controlling document for a mixed use development. Approval of a Master Plan or Site Plan shall be binding upon the landowners subject to the Development Order, their successors and assigns, and shall constitute development regulations for the land. Development of the land shall be limited to the uses, intensities, access, configuration, mitigation strategies, and all other elements and conditions set forth in the Master Plan or Site Plan. Requirements for the submittal of a preliminary master or site plan and a final master or site plan to the Zoning Division are indicated in Art. 2, Application Processes and Procedures pursuant to the type of zoning application being submitted. [Ord. 2006-036] [Ord. 2009-040] [Ord. 2014-025]

19. Master Sign Plan – for the purposes of Art. 8, Signage, a coordinated program of all signs, including exempt and temporary signs for a business, or businesses if applicable, located on a development site. The sign program shall include, but not be limited to, indications of the locations, dimensions, colors, letter styles and sign types of all signs to be installed on a site.

20. Master Storm Water Drainage System – for the purposes of Art. 18, Flood Damage Prevention, an engineered system, which may include culverts, retention areas, water control gates, control devices, earth grading, and/or minimum floor elevations in development of building sites, designed to ensure less than one-percent annual chance of flooding of the building sites. [Ord. 2004-013]

21. Material Culture – for the purposes of Art. 9, Archaeological and Historic Preservation, is any object that has been modified by a human being. [Ord. 2008-037]

22. Material, Excess – excavated material not required for backfill or grading of the premises as determined by a Final Site Plan.

23. Material, Extractive or Excavated – earth, sand, gravel, rock, shell rock, muck, or other mineral or organic substance, other than vegetation, which naturally occurs upon a lot.

24. Maximum Contaminant Level – for the purposes of Art. 15, Health Regulations, the maximum permissible level of a contaminant in water which is delivered to any user of a water supply system.

25. Maximum Day – for the purposes of Art. 15, Health Regulations, the highest day of water consumption within any 24-hour period from midnight to midnight excluding fire flow.

26. Mean High Water – for the purposes of Art. 15, Health Regulations, the average height of tidal high water over a 19-year period.

27. Mean Sea Level – The average height of the sea for all stages of the tide based on the NGVD.

28. Mechanical Equipment – For the purposes of Art. 5, Supplementary Standards, equipment and accessories, that relate to water supply, drainage, heating, ventilating, electrical, air conditioning, and similar purposes. [Ord. 2008-037]

29. Medical Marijuana Treatment Center – means an entity that acquires, cultivates, possesses, processes (including development of related products such as food, tinctures, aerosols, oils, or ointments), transfers, transports, sells, distributes, dispenses, or administers marijuana, products containing marijuana, related supplies, or educational materials to qualifying patients or their professional caregivers, and is registered by the Florida Department of Health. [Ord. 2017-009]

30. Membrane BioReactor Systems – Facilities that treat raw sewage to tertiary levels for reuse water (irrigation quality water) or for discharge (ground or surface water recharge). These systems are enclosed within buildings and utilize hollow fiber or flat plate membranes and combine clarification, aeration and filtration to produce consistent, high-quality effluent suitable for any discharge or reuse application. On-site storage tanks, distribution pumps and electrical equipment may also be associated with these facilities. [Ord. 2007-013]

31. Meteorological Tower – A tower erected to measure atmospheric weather conditions. [Ord. 2011-016]

32. Mezzanine – see Building Mezzanine.

33. Midden – is a deposit of material culture refuse. Midden soils contain a high abundance of cultural resources and occasionally human remains. Midden soils tend to differ in color and composition from the surrounding soil matrix. [Ord. 2008-037]

34. Military Installation – a facility designed for use by a branch of the United States Armed Forces.
35. **Minimum Descent Altitude (MDA)** – for the purposes of Art. 16, Airport Regulations, the lowest altitude expressed in feet above mean sea level (AMSL), to which descent is authorized on final approach or during circling-to-land maneuvering in execution of a standard instrument approach procedure (SIAP) where electronic glide slope is not provided.

36. **Minimum Obstruction Clearance Altitude (MOCA)** – for the purposes of Art. 16, Airport Regulations, the lowest published altitude in effect between radio fixes on Federal VOR airways, off-airway routes, or route segments that meets obstruction clearance requirements for the entire route segment and assures acceptable navigational signal coverage only within 22 miles to a VOR.

37. **Minimum Vectoring Altitude (MVA)** – for the purposes of Art. 16, Airport Regulations, the lowest altitude AMSL at which aircraft operating under IFR conditions will be vectored by a radar controller, except when otherwise authorized for radar approaches, departures or missed approaches.

38. **Mitigation** – for the purposes of Art. 9, Archaeological and Historic Preservation, a process designed to ameliorate adverse impact of an activity on a cultural resource by the systematic removal of the prehistoric, historic, or architectural data in order to acquire the fundamental information necessary for understanding the property within its proper historic context.

39. **Mixed Housing Projects** – for the purposes of Art. 5.G, Density Bonus Programs, projects that include both market rate and affordable units, and promote a balance of housing opportunities. [Ord. 2005-002]

40. **Mixed Use**
   a. the combination of residential and one or more non-residential uses that are functionally integrated. [Ord. 2006-004] [Ord. 2010-022]
   b. for the purposes of Art. 13, Impact Fees, means a group of different uses of land within a tract of land or a building for which applications for Development Permits are sought.

41. **Mixed Use Strategy** – For the purposes of Art. 12, Traffic Performance Standards, the development of a neighborhood, tract of land, building, or structure combining residential development with a variety of complementary and integrated uses, such as, but not limited to, office, manufacturing, retail, public, and recreation, in a compact urban form. The purpose of a mixed use development strategy for the Okeechobee Boulevard corridor is to internalize as much site-generated traffic as possible so as to reduce impact on the external streets. However, not all mixed use developments will necessarily maximize internalization and limit the amount of additional external traffic impact. Studies (such as the ITE Trip Generation Handbook) which show interactions between various land use combinations should be used as a guide in determining the optimal mix and quantities of land uses for a particular site. [Ord. 2006-036]

42. **Mobile Home**
   a. **Structure** – A detached, transportable structure, manufactured upon a chassis or undercarriage as an integral part thereof, without independent motive power, designed for long term occupancy and containing all conveniences and facilities, with plumbing and electrical connections provided for attachment to approved utility systems. [Ord. 2017-007]
   b. **Dwelling** – The use of a residential lot or unit for one mobile home. [Ord. 2012-027] [Ord. 2017-007]

43. **Mobile Home Subdivision** – For the purposes of Art. 11, Subdivision, Platting, and Required Improvements, a subdivision of land for the sale of lots intended for the placement of mobile homes and which meets the requirements of Art. 11, Subdivision, Platting, and Required Improvements.

44. **Module** – For the purposes of Art. 6, Parking, Loading, and Circulation, a portion of a parking facility containing a central drive aisle with parking spaces on each side of the aisle. [Ord. 2012-027]

45. **Motor Vehicle** – the statutes of the State of Florida providing for the regulation, registration, licensing and recordation of ownership of motor vehicles in the State of Florida.

46. **Mound System** – for the purposes of Art. 15, Health Regulations, a drainfield system in which the distribution pipe is installed in fill material above natural grade.

47. **Mulch** – for the purposes of Art. 7, Landscaping, non-living organic material customarily used in landscape design to retard erosion and retain moisture.

48. **Multi-Family Water System** – for the purposes of Art. 15, Health Regulations, a water system that provides potable water for three to four residences, one of which may be a rental residence.

49. **Multi-Family Well** – for the purposes of Art. 15, Health Regulations, a water well that is a source of potable water and is part of a multi-family water system.

50. **Municipal Engineer** – for the purposes of Art. 12, Traffic Performance Standards, a Professional Engineer practicing traffic engineering employed or retained by the Municipality.
51. **Municipal Official** – for the purposes of Art. 12, Traffic Performance Standards, the public official responsible for coordinating the application of this Section in the Municipality, it may be the Municipal Engineer.

52. **Mural** – an original production of art of any size, shape, color, material, medium or combination thereof that is designed by an artist, directly affixed or applied to the exterior surface of a building or structure (mural surface), and that neither contains nor consists of any commercial message, including any logo, icon, trademark or brand name. For the purposes of this definition, a commercial message is any message that advertises a business conducted, services rendered, or goods produced or sold. [Ord. 2013-021]

N. Terms defined herein or referenced in this Article shall have the following meanings:

1. **Nadir** – For the purposes of Art. 5.E.4.E, Outdoor Lighting, nadir shall mean the lowest point on its sphere when measuring a foot-candle. [Ord. 2008-037]

2. **National Geodetic Vertical Datum (NGVD)** – for the purposes of Art. 18, Flood Damage Prevention, as corrected in the year of 1929, is a vertical control used as a reference for establishing varying elevations within the floodplain. This datum is referenced on prior FIRMs or by FEMA. [Ord. 2004-013]

3. **National Register of Historic Places** – for the purposes of Art. 9, Archaeological and Historic Preservation, official Federal list of districts, sites, buildings, structures, and objects significant in American history, architecture, archaeology, engineering, and culture.

4. **Native Tree(s) or Native Vegetation** – for the purposes of Art. 14, Environmental Standards, vegetation with a natural geographic distribution indigenous to the State of Florida and not introduced by humans.

5. **Native Upland Vegetation** – the plant component of a native State of Florida upland community (a characteristic assemblage of native plant and animal species which are interrelated and occupy predominantly upland terrain), which includes intact upland vegetation include, but are not limited to, Florida scrub, pine flatwoods, scrubby flatwoods, coastal dune and strand, hammocks (natural, tropical, mesic, and hydric), dry prairies, and drained cypress heads.

6. **Native Vegetation Community** – for the purposes of Art. 14, Environmental Standards, a characteristic assemblage of native vegetation including scrub, pine flatwoods, scrubby flatwoods, hammocks, dry prairies, wetlands, dunes, maritime forests, freshwater and saltwater marshes, swamps, and mangroves.

7. **Natural Area** – for the purposes of Art. 14, Environmental Standards, all public or private parcels as approved under this Chapter containing high-quality native ecosystems that are under or assigned to a public entity for management, maintenance, and operation; or private parcels for which the parcel owner applies to ERM for designation as a natural area, is operating under a management plan approved or accepted by ERM, and is legally described in an applicable deed restriction, plat, restricted covenant, conservation easement, or a separate instrument recorded pursuant to F.S. § 704.06.

8. **Natural Disaster** – natural disaster is the consequence or effect of a hazardous event, occurring when human activities and a natural phenomenon (a physical event, such as a hurricane, landslide, etc.) become enmeshed. The resulting fatalities, or property damages depend on the capacity of the population to support or resist the disaster. [Ord. 2006-036]

9. **Natural Disaster Damage** – loss in structural integrity due to an act of nature such as hurricane, tornado, wildfire, or flood. This does not include fire, termites, and other damages not related to those listed herein. [Ord. 2010-005]

10. **Nautical Mile** – for the purposes of Art. 16, Airport Regulations, a unit of length used in air navigation, based on the length of one minute of arc of a great circle, and equivalent to U.S. unit equal to 1,852 meters, or 6,076 feet.

11. **Neighborhood** – a defined and compact geographic area consisting of residences which may include non-residential uses to serve the daily needs of the residents, such as shops, workplaces, recreational areas, and civic uses (schools, places of worship), that are accessible by interconnecting streets. [Ord. 2010-022]

12. **Neighborhood Center** – as defined in the Plan.

13. **Nest** – for the purposes of Art. 14, Environmental Standards, the area in which sea turtle eggs are naturally deposited or relocated beneath the sediments of the beach/dune system.

14. **Nesting Season** – for the purposes of Art. 14, Environmental Standards, the period from March 1 through October 31 of each year.
15. **Net Acreage** – For the purposes of **Art. 12, Traffic Performance Standards**, a measure of the net area of the site that is available for development, excluding non-site related areas donated to and accepted by a governmental agency, by deed or easement, in perpetuity, for utility, drainage, roadway, and preservation purposes. [Ord. 2006-036]

17. **Net Usable Land** – for the purposes of **Art. 15, Health Regulations**, the total area of a parcel less all street, wet areas, canals, R-O-Ws, drainage easements and other impairments to the owner’s unrestricted use thereof as a building site.

18. **New Capital Facilities** – for the purposes of **Art. 13, Impact Fees**, newly constructed, expanded, or added capital facilities which provide additional capacity. New capital facilities shall not include that portion of reconstruction or remodeling of existing facilities that does not create additional capacity.

19. **New Construction**
   a. For the purposes of **Art. 13, Impact Fees**, Structures for which the start of construction commenced on or after the effective date of this Code.
   b. For the purposes of **Art. 18, Flood Damage Prevention**, and the flood-resistant construction requirements of the Florida Building Code, Structures for which the “Start of Construction” commenced on or after January 31, 1979, and includes any subsequent improvements to such Structures. [Ord. 2004-013] [Ord. 2017-026]

20. **New Manufactured Home Park or Manufactured Home Subdivision**
   a. See Manufactured Home Park or Manufactured Home Subdivision.
   b. For the purposes of **Art. 18, Flood Damage Prevention**, a Manufactured Home Park or Subdivision for which the construction of facilities for servicing the lots on which the Manufactured Homes are to be affixed, including at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads, is completed on or after the effective date of this Article. [Ord. 2004-013]

21. **No-Hazard** – for the purposes of **Art. 16, Airport Regulations**, an advisory determination rendered by the FAA at the conclusion of an Aeronautical Study made under FAR Part 77 indicating the proposed structure may be safely and/or efficiently accommodated in navigable airspace.

22. **Noise Level Reduction** – for the purposes of **Art. 16, Airport Regulations**, a comparison of outdoor to indoor Noise levels, expressed in dB., i.e., a structure requiring a 30 dB NLR is one to which modifications must be made to achieve a 30 dB reduction in interior noise levels as compared to exterior noise levels.

23. **Non-Combustible Refuse** – wastes that are unburnable at ordinary incinerator temperature (800 to 1,800 degrees Fahrenheit) such as metals, mineral matter, appliances, metal furniture, auto bodies or parts, and other similar material or refuse not usual to housekeeping or to operation of stores or offices.

24. **Non-Commencement** – the failure to begin, or the discontinuation of, construction activity that would make a material change in a structure as evidenced by the cancellation, lapsing, or revocation of a Building Permit; or the failure to begin, or the discontinuation of, any other land use activity that would make a material change in the use of land.

25. **Non-Community Water System** – for the purposes of **Art. 15, Health Regulations**, a public water system that is not a community water system. A non-community system is either a non-transient non-community water system or a transient non-community water system, which are further defined as:

26. **Non-Transient Non-Community Water System** – a non-community water system that regularly serves at least 25 of the same persons for more than six months per year.

27. **Non-Community Well** – for the purposes of **Art. 15, Health Regulations**, a water well that is a source of potable water and is part of a non-community water system.

28. **Non-Conforming, Sign** – for the purposes of **Art. 8, Signage**, a sign or advertising structure or parts therein existing within the unincorporated area on the effective date of this Code which, by its height, square foot area, location, use, operating characteristics or structural support does not conform to the requirements of **Art. 8, Signage**.

29. **Non-Conforming Lot** – for the purposes of this Article, a single lot, tract or parcel of land of record that was conforming at the time of its creation, but which fails to meet the requirements for area, width or depth under the current district regulations of this Code or the Plan.

30. **Non-Conforming Structure** – for the purposes of this Article, a structure that was lawfully established before this Code was adopted or amended, and that does not conform to the property development regulations of area, height, lot coverage, yard setbacks, lot location, parking, or other dimensional requirements for the zoning district in which it is located.
31. **Non-Conforming Use** – a use that was lawfully established prior to the adopted Code or amendment that creates the non-conformity and now does not conform to the use regulations of the zoning district in which it is located.

32. **Non-Conforming Use, Major** – a major non-conforming use is a use that was legally established in a zoning district where the use is now prohibited under the terms of this Code. Major non-conforming uses are inappropriately located so as to create or threaten to create incompatibilities detrimental to the public welfare.

33. **Non-Conforming Use, Minor** – a minor non-conforming use is a use that was legally established in a zoning district under a prior Code and one or more of the following applies: the use has been changed to a more restrictive review or approval process under the terms of this Code; DOAs or improvements to the use would exceed the development and approval thresholds; or, the use does not meet the property development regulations of this Code. Minor non-conforming uses do not create or threaten to create incompatibilities injurious to the public welfare. [Ord. 2010-005] [Ord. 2015-006]

34. **Non-Conformities** – for the purposes of this Article, uses of land, structures, lots, site elements, and property development regulations and site development standards that were lawfully established before this Code was adopted or amended, that are not in conformity with the terms and requirements of this Code. [Ord. 2010-005]

35. **Non-Contributing Resource** – for the purposes of **Art. 9, Archaeological and Historic Preservation**, building, site, structure, or object that does not add to the historic significance of a property or district.

37. **Non-Plan Collector Street** – see Street, Collector, Non-Plan.

38. **Non-Potable Water Well** – for the purposes of **Art. 15, Health Regulations**, as defined by Chapter 64E-6, F.A.C.

39. **Non-Precision Instrument Runway** – for the purposes of **Art. 16, Airport Regulations**, a runway having a non-precision instrument approach procedure utilizing air navigation facilities with only horizontal guidance, or area type of navigation equipment, for which a straight-in non-precision instrument approach procedure has been approved or planned, and for which no precision instrument approach facilities are planned or indicated on an appropriate FAA civil or military service airport planning documents.

40. **Non-Residential** – for the purposes of **Art. 2, Application Processes and Procedures**.

41. **Non-Residential Activity** – for the purposes of **Art. 14, Environmental Standards**, any activity which occurs in any building, structure, or open area which is not used primarily as a private residence or dwelling.

42. **Non-Transient Non-Community Water Supply** – for the purposes of **Art. 15, Health Regulations**, a water system for provision of piped water under pressure for human consumption, culinary, sanitary, or domestic purposes that regularly serves at least 25 of the same persons over six months per year but is not a community water system.

44. **Nuisance** – for the purposes of **Art. 5, Supplementary Standards**, interference with the enjoyment and use of property.
O. Terms defined herein or referenced in this Article shall have the following meanings:

1. “O” Horizon – for the purposes of Art. 15, Health Regulations, the layer of organic matter on the surface of a mineral soil. This soil layer consists of decaying plant residues.

2. Objectionable Odor – An objectionable odor is defined as any odor present in the outdoor atmosphere which by itself or in combination with other odors, is or may be harmful or injurious to human health or welfare, which unreasonably interferes with the comfortable use and enjoyment of life or property, or which creates a nuisance, in accordance with Chapter 62-210, F.A.C. ([Ord. 2006-004])

3. Obstruction to Air Navigation – for the purposes of Art. 16, Airport Regulations, any existing or proposed man-made object or object of natural growth or terrain that exceeds the standards contained in this Article, and contained in 14 CFR § 77.21, § 77.23, § 77.25, § 77.28, and § 77.29.

4. Off-Peak Season – for the purposes of Art. 12, Traffic Performance Standards, the time from June 1 through August 15, inclusive.

5. Off-Site Improvements – improvements constructed outside of the boundaries of the project which are required as a part of a development approval.

6. Office – for the purposes of Art. 13, Impact Fees, a building used primarily for conducting the affairs of or the administration of a business, organization, profession, service, industry, or similar activity.

7. Office of Industrial Nature – an establishment providing executive, management, or administrative support, but not involving medical or dental services, the sale of merchandise, or professional services (business or professional offices). Typical uses involve corporate headquarters or other similar offices whose function does not include frequent visits by the public or the provision of services.

8. Official Zoning Map – the official map upon which the boundaries of each district are designated and established as approved and adopted by the governing body, made a part of the Official Public Records of PBC, and shall be the final authority as to the zoning status of land and water areas, buildings, and other structures in the unincorporated area of PBC and incorporated into this Code by reference.

9. On Site – within the boundaries of a facility location, property, or site including sites separated by public or private R-O-W.

10. Onsite Sewage Treatment and Disposal System (OSTDS) – for the purposes of Art. 15, Health Regulations, as defined by Chapter 64E-6, F.A.C.

11. One-Foot Drawdown Contour – for the purposes of Art. 14, Environmental Standards, the locus of points around a well or wellfield where the free water elevation is lowered by one foot due to a specified pumping rate of the well or wellfield.

12. Open Space – land reserved or shown on an approved plan, such as but not limited to: easements, preservation, conservation, wetlands, well site dedicated to PBCWUD, recreation, greenway, landscaping, landscape buffer, and water management tracts. ([Ord. 2011-001])

13. Open Space, Usable – an area such as a park, square, plaza, or courtyard accessible to the public and used for passive or active recreation or gatherings. Credit shall not be given for any indoor spaces, road R-O-Ws, building setback areas, lakes and other water bodies, drainage or retention areas, impervious surface courts (tennis, basketball, handball, etc.), swimming pools, sidewalks, parking lots, and other impervious surfaces or any pervious green area not intended for passive or active recreation or gatherings. ([Ord. 2011-001])

14. Open to the Public – see Park, Open to the Public.

16. Ordinary High Water (OHW) – for areas with an established control elevation, the control elevation will be the OHW. For areas without an established control elevation, the wet season water table prior to the excavation activity will be OHW.

17. Ordinary Maintenance or Repair – for the purposes of Art. 9, Archaeological and Historic Preservation, any work for which a Building Permit is not required by law, where the purpose and effect of such work is to correct any physical deterioration or damage of an improvement, or any part thereof by restoring it, as nearly as practical, to its appearance prior to the occurrence of such deterioration or damage.

18. Ordinary Water Level (OWL) – the average level of water as determined by an engineer or by the Applicant’s appointee. The established water surface elevation shall consider seasonal fluctuations in the groundwater table and other factors that may cause fluctuations of the water level.

19. Original Final DRO – For the purposes of Art. 2, Application Processes and Procedures, the first approved plan by the DRO following the BCC or ZC hearing. ([Ord. 2020-020])

20. Original Value of the Structure – the value of the structure at the time it was issued a CO, based upon an appraisal by a Member of the Appraiser’s Institute (MAI).
21. **Other Than Utility Runway** — for the purposes of Art. 16, Airport Regulations, a runway designed for and intended to be used by all types of aircraft including those having gross weights greater than 12,500 pounds.

22. **Outdoor Activity** — for the purposes of Art. 5, Supplementary Standards, any functional operation associated with a use listed in Art. 4, Use Regulations, that takes place outside of an enclosed building. The term excludes Outdoor Storage and the loading or unloading of trucks at loading bays or docks. [Ord. 2017-007]

23. **Outdoor Display of Merchandise, Temporary** — a temporary display for the introduction, promotion, or announcement of a new product.

24. **Overlay Zoning District** — for the purposes of Art. 3, Overlays and Zoning Districts, a set of zoning regulations for a defined area which are required either in addition to the Standard Zoning District's regulations or in lieu of those regulations. Overlay zoning is used to protect the character of an area of special concern or to encourage new development subject to additional controls.

25. **Owner** — the owner of the freehold estates, as appears by deed of record. It shall not include lessees, remaindermen, or mortgagees.

26. **Owner, Motor Vehicle** — the person to which the motor vehicle is registered on the motor vehicle certificate of title and shall include, if under lease, rental agreement, or loan under any other type of arrangement, gratuitous or otherwise, the person having possession or control of the vehicle.

P. **Terms defined herein or referenced in this Article shall have the following meanings:**

1. **Packaged or Canned Foods** — For the purposes of Art. 4, Use Regulations, containerized food products that can be eaten as sold. [Ord. 2012-003]

2. **Parcel** — for the purposes of Art. 14, Environmental Standards, see Land; a unit of land with a legally established property line.

3. **Park, Beach** — for the purposes of Art. 5, Supplementary Standards, facilities that front the Atlantic Ocean or its inlets and provide public beach access. Recreational facilities include those necessary to support beach access, swimming, surfing, fishing, and snorkeling as well as play areas, picnic areas, and adequate parking areas to serve those utilizing the facility.

4. **Park, Beach/Park, District/Park, Regional** — for the purposes of Art. 13, Impact Fees, refer to Art. 5.D, Parks and Recreation – Rules and Recreation Standards.

5. **Park, Community** — for the purposes of Art. 5, Supplementary Standards, facilities generally more than five but less than 40 acres in size that provide active, and to a lesser degree passive, recreational facilities to population areas within three miles or less of the facility. Recreational facilities include play areas, small groups of lighted fields or courts suitable for programmed youth activities, community centers, and adequate bicycle and automobile parking areas and pedestrian paths to serve the facility.

6. **Park, Countywide Level** — for the purposes of Art. 5, Supplementary Standards, those large-scale recreational facilities for which Countywide Park Impact Fees are assessed on new residential development and that include a system of public parks generally classified as Regional, District, or Beach, and that are designed to meet the general active and passive recreational needs of the countywide populace.

7. **Park, District** — for the purposes of Art. 5, Supplementary Standards, facilities generally greater than 40 acres in size that primarily provide active recreational facilities, and to a lesser degree some passive recreational facilities, to population areas within five miles or less of the facility if within the USA, or within ten miles or less of the facility if outside the USA. Recreational facilities typically include groups of lighted fields or courts suitable for scheduled athletic league activities, exercise trails, and support facilities such as restrooms and concessions with bicycle and automobile parking areas and pedestrian path systems to accommodate park users. Special facilities such as recreation centers, aquatic centers, golf courses, and boat ramps and docks may also be included.

8. **Park, Local Level** — for the purposes of Art. 5, Supplementary Standards, those relatively small-scale recreational facilities that include both public parks generally classified as community, neighborhood, or infill neighborhood, and required private recreation areas that are designed to meet the recreational needs for specific population areas or for planned developments.

9. **Park, Neighborhood** — for the purposes of Art. 5, Supplementary Standards, facilities generally less than five acres in size. Neighborhood parks include passive and active recreational facilities, are generally few in number due to size constraints, and are developed according to the demands and character of the specific neighborhoods that they serve. In addition to the above-mentioned characteristics, for the purposes of Art. 3.E.3, Multiple Use Planned Development (MUPD), Art. 3.E.4, Mixed Use Planned Development (MXPD), and Art. 3.F.3, Traditional Neighborhood Development (TND), neighborhood parks shall consist of usable open space within walking distance of housing.
10. **Park, Open to the Public** – for the purposes of [Art. 5, Supplementary Standards](#), those park acres developed according to the Parks and Recreation Department's adopted Park Master Plan and made available to the general public for specific recreational purposes whether for a fee or free of charge.

11. **Park, Private** – for the purposes of [Art. 5, Supplementary Standards](#), a privately-owned or operated park or beach providing opportunities for active or passive recreational activities to the general public.

12. **Park, Regional** – for the purposes of [Art. 5, Supplementary Standards](#), facilities generally more than 200 acres in size that also provides access to a substantial natural or man-made resource base. Regional parks primarily provide passive recreational facilities, and to a lesser degree, active recreational facilities where no adverse impact on the resource base results. Recreational facilities in regional parks are primarily passive or resource based with picnicking, camping, hiking, fishing, and boating as the main activities. Special facilities such as museums, nature centers, special event areas, golf courses, or water skiing facilities may also be included, as well as some of those active facilities often found in district parks.

13. **Park Recreation and Park Facilities** – for the purposes of [Art. 5, Supplementary Standards](#), the planning of, engineering for, preparation of acquisition documents for, acquisition of land for, or construction of buildings and park equipment necessary to meet the LOS for Urban Park and Recreation Facilities and Rural Park and Recreation Facilities.

14. **Park Trailer** – for the purposes of [Art. 18, Flood Damage Prevention](#), a transportable unit which has a body width not exceeding 14 feet and which is built on a single chassis and is designed to provide seasonal or temporary living quarters when connected to utilities necessary for operation of installed fixtures and appliances (see [P.S. § 320.01](#), as amended or replaced). [Ord. 2017-026]

15. **Parking Garage/Structure** – a building or structure that provides parking for motor vehicles as an accessory use to a principal use. [Ord. 2010-022] [Ord. 2017-007]

16. **Parking Lot** – for the purposes of [Art. 6, Parking, Loading, and Circulation](#), an on-site, area constructed at grade that is used for the temporary parking of automobiles, motorcycles, and trucks. Parking lots include access aisles, ramps, maneuvering, and all related vehicle use areas.

17. **Parking Lot, Shared or Common** – for the purposes of [Art. 6, Parking, Loading, and Circulation](#), an on-site parking lot that serves more than one lot, building, use, or dwelling.

18. **Parking, On-Site** – for the purposes of [Art. 6, Parking, Loading, and Circulation](#), the minimum number of parking spaces on the same lot or parcel of the facility that it serves. [Ord. 2020-020]

19. **Parking, On-Street** – a row of parking spaces along a street that may be designed in a parallel or angled layout. [Ord. 2010-005]

20. **Parking, Shared** – for the purposes of [Art. 6, Parking, Loading, and Circulation](#), the development and use of parking areas for joint use by separate businesses in one or more properties. Typically, sharing of parking space during off-peak hours and confirmed by a traffic analysis allows for a shared parking agreement.

21. **Parking Space** – for the purposes of [Art. 6, Parking, Loading, and Circulation](#), a paved enclosed or unenclosed grass area, meeting the dimensional and access requirements of this Article, and approved to temporarily park or store one motor vehicle.

22. **Parking Tract** – for the purposes of [Art. 6, Parking, Loading, and Circulation](#), a parking lot delineated on a plat or otherwise created by an instrument of record for the purpose of providing common on-site parking and legal access for owners of adjacent lots.

23. **Pass-By-Trips** – for the purposes of [Art. 12, Traffic Performance Standards](#), trips generated by a proposed Project which are trips already on the road Link on which the proposed Project is located.

24. **Patio** – an open unoccupied space which may be partially enclosed by a wall, fence, or building and not considered part of the residential living structure.

25. **Patio Home** – see Zero Lot Line Home.

26. **PBC Register of Historic Places** – for the purposes of [Art. 9, Archaeological and Historic Preservation](#), official PBC list of archeological sites identified on the Map of Known Archeological Sites, and historic sites and districts designated by the BCC.

27. **PBC Standards** – for the purposes of [Art. 11, Subdivision, Platting, and Required Improvements](#), the minimum standards, specifications, and details for design and construction of streets and other infrastructure improvements, as promulgated by the County Engineer pursuant to Resolution No. R-90-740 of the BCC as may be amended. Said standards include, but are not limited to those compiled in the most current edition of the PBC Land Development Design Standards Manual.

28. **Peak Hour Traffic** – for the purposes of [Art. 12, Traffic Performance Standards](#), shall mean the one hour of traffic representative of the peak period, as defined in [Art. 12.C.1.B.5, Peak Hours](#) and includes two-way and peak direction volumes. Peak Hour Traffic shall be determined from actual traffic counts conducted by the PBC. The Project may provide actual counts, at the approval of the County Engineer,
or at the approval of the County Engineer, the Peak Hour Traffic may be determined by factoring the Average Daily Traffic by an approved "K" factor. [Ord. 2005-002]

29. Peak Season – for the purposes of Art. 12, Traffic Performance Standards, the time from January 1 through March 31, inclusive.

30. Pedestrian Circulation Zone – for the purposes of the Priority Redevelopment Areas, a continuous unobstructed space reserved for pedestrian movement. [Ord. 2010-022]

31. Pennant – see Flag.

32. Percolation Pond – for the purposes of Art. 14, Environmental Standards, an artificial impoundment similar to a holding pond for which the design and operation provides for fluid losses through percolation or seepage.

33. Performance Security
   a. To secure the complete performance of a contract or condition of a Development Order, Development Agreement, or covenant. Performance securities shall be denominated in United States dollars. The form of the security shall be approved by the County Attorney, and may include:
      1) Irrevocable letter of credit;
      2) Escrow agreement;
      3) Surety bond; or,
      4) Cash bond.
   b. For the purposes of Art. 12, Traffic Performance Standards, sufficient funds over which PBC has control irrevocably committed by written instrument to secure complete performance of a contract or condition of a Development Order, or other Agreement in the form set forth by PBC policy of a:
      1) Letter of Credit;
      2) Escrow Agreement;
      3) Surety Bond; or,
      4) Cash Bond.

34. Perimeter Street – For the purposes of the IRO, a private or public street R-O-W abutting the perimeter boundary of an eligible IRO parcel. [Ord. 2010-005]

35. Permit Holder, Marine Turtle – for the purposes of Art. 14, Environmental Standards, any individual, group, or organization possessing a permit from the Florida Fish and Wildlife Conservation Commission (FFWCC) to conduct activities related to sea turtle protection and conservation. [Ord. 2011-001]

36. Person
   a. For the purposes of Art. 14, Environmental Standards, any individual, public or private corporation, firm, association, joint venture, partnership, municipality, governmental agency, political subdivision, public officer, owner, lessee, tenant, or any other entity whatsoever or any combination of such jointly or severally.
   b. For the purposes of Art. 15, Health Regulations, any individual, corporation, company, association, partnership, State, subdivision of the State, municipality, or Federal agency.
   c. For the purposes of Art. 16, Airport Regulations, any individual, firm, copartnership, corporation, company, association, joint-stock association, or body politic, and includes any trustee, receiver, assignee, or other similar representative thereof. [Ord. 2019-005]

37. Pervious Surface
   a. ground cover through which water can penetrate at a rate comparable to that of water through undisturbed soils.
   b. For the purposes of Art. 7, Landscaping, pervious surface is the area that can be utilized for planting that is covered by permeable material. [Ord. 2018-002]

38. Pharmacy – shall mean an establishment offering on-site dispensing of prescription drugs, non-prescription drugs, or both. [Ord. 2011-016]

39. Phased Development – development which is designed, permitted, or platted in distinct, sequential stages to be developed over a specified period of time.

41. Planned Development – a Planned Development District or a Previously Approved Planned Development. A regulation containing the term "Planned Development" that the regulation applies to a Planned Development District and a Previously Approved Planned Development.

42. Planned Development, District (PDD) – a zoning district which is approved pursuant to the policies and procedures of Art. 3.E, Planned Development Districts (PDDs) of this Code including: PUD, Residential Planned Unit Development District; MXPD, Mixed Use Planned Development District; MUPD, Multiple Use Planned Development District; PIPD, Planned Industrial Park Development District; MHPD, Mobile Home Park Planned Development District; and, RVPD, Recreational Vehicle Park Planned Development District. [Ord. 2010-005] [Ord. 2017-025]
43. **Planned Development, Previously Approved** – for the purposes of [Art. 3, Overlays and Zoning Districts](#), a Planned Development approved by Rezoning, Special Exception, or Conditional Use prior to the effective date of this Code. Previously Approved Planned Developments include: Planned Unit Developments (PUDs); Traditional Neighborhood Districts Developments (TNDs); Mixed-Use Developments; Planned Neighborhood Commercial Developments (PNCDs); Planned General Commercial Developments (PGCDs); Large Scale Community and Regional Shopping Center Developments, 30,000 square feet and 50,000 square feet; Planned Office Business Park Developments (POBPDe); Planned Industrial Park Developments (PIPDs); Mobile Home Rental Park, Condominium, and Conditional Use Developments; Recreational Vehicle Park Developments (RVPDs); Sanitary Landfill, Resource Recovery Facility, Volume Reduction Plant, and Incinerator Developments; and, other Special Exceptions, or Conditional Uses approved prior to the effective date of this Code which support land uses regulated by [Art. 3.E, Planned Development Districts (PDDs)](#).

44. **Plating/Amenity Zone** – for the purposes of the Priority Redevelopment Areas, accommodating streets and, landscaping or hardscaped areas, providing a transition between vehicular travel lanes and pedestrian circulation zones. [Ord. 2010-022]

45. **Plating Plan** – for the purposes of [Art. 7, Landscaping](#), a plan that is not required to be done by a Landscape Architect, showing the location, quantity, and variety of plants to be installed on a Single Family, two-unit Townhouse, or two-unit Multifamily lot or other use as authorized by this Code. [Ord. 2016-042]

46. **Plant Species, Controlled** – those plant species, that are demonstrably detrimental to native plants, native wildlife, ecosystems, or human health, safety, and welfare.

47. **Plant Species, Native** – any plant species with a geographic distribution indigenous to all or part of South Florida. Plant species which have been introduced by man are not native vegetation.

48. **Plant Species, Prohibited** – those species as defined in the landscape section of this Code, as being demonstrably detrimental to native plants, wildlife, the ecosystem, or public health, safety, or welfare.

49. **Plat** – for the purposes of [Art. 11, Subdivision, Platting, and Required Improvements](#), a map or delineated representation of the subdivision of lands, being a complete, exact representation of the subdivision and other information in compliance with the requirements of all applicable provisions of [Art. 11, Subdivision, Platting, and Required Improvements](#) and [F.S. ch. 177](#), and may include the terms “replat,” “amended plat,” or “revised plat.”

50. **Plat, Boundary** – for the purposes of [Art. 11, Subdivision, Platting, and Required Improvements](#), a map or delineated representation for recordation of a single lot for development purposes prepared, approved, and recorded in accordance with requirements and procedures for a plat pursuant to [Art. 11, Subdivision, Platting, and Required Improvements] and [F.S. ch. 177](#).

51. **Plat, Final** – for the purposes of [Art. 11, Subdivision, Platting, and Required Improvements](#), a finished plat including all signatures required for recordation except those signifying approval by PBC.

52. **Plat, Preliminary** – for the purposes of [Art. 11, Subdivision, Platting, and Required Improvements](#), a copy of the plat in sufficient form to readily compare the plat with the subdivision plan and construction plans.

53. **Plat of Record** – for the purposes of [Art. 11, Subdivision, Platting, and Required Improvements](#), a plat which conforms to the requirements of the applicable State laws and [Art. 11, Subdivision, Platting, and Required Improvements](#) which has received all required PBC approvals for recordation, and which has been placed in the Official Records of PBC.

54. **Plaza** – outdoor space accessible to the public, dedicated to active or passive activities where pedestrians gather, designed to include streetscape, and accented with landscape or focal points. [Ord. 2010-005]

55. **Pole Barn** – a permanent structure constructed for storage or shelter purposes with no horizontal structural components or walls, excluding beams which support a roof system.

56. **Pole Trailer** – shall have the meaning ascribed by F.S. providing for the regulation, registration, licensing, and recordation of ownership of motor vehicles in the State of Florida.

57. **Pollutant** – any substance which is harmful or threatening to plant, animal or human life.

58. **Pond** – a permanent body of water less than one acre in size and less than six feet in depth.

59. **Positive Drainage** – for the purposes of [Art. 11, Subdivision, Platting, and Required Improvements](#), the provision of a stormwater management system which conveys stormwater runoff to a point of legal positive outfall.

60. **Pot Bellied Pig** – for the purposes of [Art. 5.B.1.A, Accessory Uses and Structures](#), means a domesticated miniature or pot-bellied or pot belly pig kept as a household pet for the sole purpose of providing human companionship and not kept or raised for human consumption or other similar use attributed to the raising of livestock. [Ord. 2013-001]
61. **Potable Water** – for the purposes of *Art. 14, Environmental Standards*, water that is intended for drinking, culinary, or domestic purposes, subject to compliance with PBC, State of Florida, or Federal drinking water standards.

62. **Potable Water Facilities** – the planning of, engineering for, preparation of acquisition documents for, acquisition of land for, or construction of potable water facilities necessary to meet the LOS for potable water facilities.

63. **Precision Instrument Runway** – for the purposes of *Art. 16, Airport Regulations*, a runway having an instrument approach procedure utilizing horizontal and vertical guidance through an Instrument Landing System (ILS), Microwave Landing System (MLS), or a Precision Approach Radar (PAR) including a runway for which such a system is planned and is so indicated on an approved civil or military airport layout plan, other FAA planning documents, or comparable military service planning documents.

64. **Preliminary Assessment Letter (PAL)** – For the purposes of *Art. 4.B.10, Excavation Uses*, a letter from Department of Environmental Protection, Bureau of Mining and Minerals Regulations in response to a pre-application meeting conducted in accordance with *Art. 4.B.10.C.5, Type 3 Excavation*, [Ord. 2008-037]

65. **Preliminary Development Plan** – for the purposes of *Art. 3, Overlays and Zoning Districts*, a generalized depiction of use designations presented to the appropriate review body for Planned Development Districts, Previously Approved Planned Developments (Master Plans and Site Plans), and Class A and B Conditional Use approvals.

66. **Premises** – any lot, area, or tract of land whether used in connection with a building or not.

67. **Preservation** – for the purposes of *Art. 9, Archaeological and Historic Preservation*, the identification, evaluation, recordation, documentation, analysis, recovery, interpretation, curation, acquisition, protection, management, rehabilitation, restoration, stabilization, maintenance, or reconstruction of historic properties.

68. **Preserve or Preserve Area** – that portion of native vegetation which is required to be set aside from development to be retained in its natural state in perpetuity.

69. **Pre-Application Conference** – a meeting to review preliminary application and conceptual site plan for review by the Zoning Division.

70. **Previous Approval, Previously Issued DO, Previously Approved DO** – for the purposes of *Art. 12, Traffic Performance Standards*, a Site Specific Development Order which:
   a. In the Unincorporated Area, received a Concurrency Exemption Determination based on a Development Order for which completed application was made prior to or on May 21, 1987. It does not include an amendment or amendments to a Previous Approval applied for after May 21, 1987; and
   b. In the Incorporated Area is a Valid Site Specific Development Order formally approved by a Municipality: (1) for which a complete application was made to, and accepted by, a Municipality, prior to February 1, 1990; or (2) in the case of a Development of Regional Impact, a Development of Regional Impact which received a report and recommendation by the Treasure Coast Regional Planning Council prior to February 1, 1990, all pursuant to formally established procedures pursuant to the Municipality's land development regulations. It does not include applications for Site Specific Development Order’s on a lot subject to an Interlocal Agreement entered into by the Municipality and PBC, after May 21, 1987, as a result of an annexation where the agreement requires compliance with traffic performance standards. A determination of a Previous Approval in Incorporated Areas shall be in accordance with *Art. 12.A.3.E, Municipal Concurrency Management System*. It does not include an amendment or amendments to a Previous Approval applied for on or after February 1, 1990.

71. **Previous Approval, Traffic** – for the purposes of *Art. 12, Traffic Performance Standards*, Project Traffic resulting from units or square footage of a Previous Approval established pursuant to *Art. 12.A.3.B, Credits Against Project Traffic*.

72. **Previously Captured Project** – for the purposes of *Art. 12, Traffic Performance Standards*, a Project approved after May 21, 1987 in the Unincorporated Area or after February 1, 1990 in the Incorporated Area. [Ord. 2007-013]

73. **Primary Zone** – for the purposes of *Art. 16, Airport Regulations*, an area longitudinally centered on a runway, extending 200 feet beyond each end of that runway with the width so specified for each runway for the most precise approach existing or planned for either end of the runway.

74. **Principal Entrance** – the main point of pedestrian access into a building or storefront. [Ord. 2010-022]

75. **Principal Use** – see Use, Principal.

76. **Prior Ordinances** – prior Ordinances include Zoning Resolution No. 3-57; Ordinance No. 73-2; Ordinance No. 73-4; and, Ordinance No. 92-20; as amended.
77. **Privacy Fence or Wall** – a structural barrier of an opaque quality, constructed such that the privacy of the area to be enclosed is maintained.

78. **Private Street** – see Street, Private.

79. **Private Water System** – for the purposes of [Art. 15, Health Regulations](#), a water system that provides piped water for one or two residences, one of which may be a rental residence.

80. **Private Well** – for the purposes of [Art. 15, Health Regulations](#), a water well that is a source of potable water and is part of a private water system.

81. **Project**
   a. Land use or group of land uses involving the development of a particular parcel of land at a particular intensity or density which was granted a Development Order, or which substantially complies with applicable provisions of the PBC Subdivision Code as determined by the Director of the Land Development Division of the PBC Engineering Department. [Ord. 2010-022] [Ord. 2019-005]
   b. For the purposes of [Art. 12, Traffic Performance Standards](#), a land use or group of land uses, or land development activity or activities, or amendment thereto, which require the issuance of a Development Order(s). All Public Civic Sites dedicated as part of a PUD or otherwise obtained by a governmental agency for public use shall be considered a Project separate from the PUD for the purposes of reviewing the traffic impacts of the Civic Sites under this Article.

82. **Project Accessed Link** – for the purposes of [Art. 12, Traffic Performance Standards](#), the paved Link(s) that serve as the Projects immediate and direct access or means of ingress and egress. If not directly accessed, the first Link reached. Each access point of a Project shall be considered to have access to at least one Link provided that the access points of a Project may be considered to share a common Link.

83. **Project Boundary** – For the purposes of [Art. 4.B.7.C.9, Renewable Energy Wind Facility](#), shall mean the limits of the approval for an Energy Wind Facility located on multiple parcels, whether owned by the Wind Energy Facility operator or by leases with individual Property Owners, where the limits of the approval may be used for purposes of determining setbacks in lieu of internal property lines. [Ord. 2011-016] [Ord. 2017-007]

84. **Project Traffic/Project Trips** – for the purposes of [Art. 12, Traffic Performance Standards](#), the number of trips generated by the proposed Project (this includes reductions for internal trips). In the event no specific use, size, or density is proposed, the maximum trips possible under the Site Specific Development Order shall be Project Traffic. Average Daily Project traffic shall be generated using the “Official Daily Trip Generation Rate” Table 13.H.4-20, Fair Share Road Impact Fee Schedule of [Art. 13, Impact Fees](#). If the appropriate rate is not provided in this Table, then latest edition of Trip Generation published by the Institute of Transportation Engineers (ITE) shall be used to determine the trip generation rate. Peak hour Project traffic volumes shall be generated using the latest edition of the ITE Trip Generation handbook or as approved by the County Engineer pursuant to [Art. 12.C, Traffic Impact Studies](#).

85. **Prop Root** – the structures originating below the lowest limbs of the red mangrove that are also known as stilt roots.

86. **Propagation Study** – for the purposes of [Art. 4, Use Regulations](#), a method utilized by radio-frequency (RF) engineers for site placement. The study indicates signal strength as it relates to adjacent sites, including the potential for towers or tall structures within the study area to be utilized for collocation and the avoidance of additional towers. [Ord. 2006-004]

87. **Property Control Number** – 17-digit PBC identification number assigned for each parcel of land.

88. **Proposed New Residential Development** – for the purposes of [Art. 2, Application Processes and Procedures](#), any application for residential development or amendment to a previously approved residential development that increases the number of housing units. This shall include any request for any approval of the type that establishes a density of development and which approves a Site Specific Development Order on a specific parcel of property.

89. **Protection** – for the purposes of [Art. 9, Archaeological and Historic Preservation](#), the act or process of applying measures designed to affect the physical condition of a property by defending or guarding it from deterioration, loss or attack, or to cover or shield the property from danger or injury. In the case of buildings and structures, such treatment is generally of a temporary nature and anticipates future historic preservation treatment; in the case of archaeological sites, the protective measure may be temporary or permanent.

90. **Pruning** – for the purposes of [Art. 7, Landscaping](#), the removal of plant parts, dead or alive, in a careful and systematic manner so as to not damage other parts of the plant.
91. **Pruning, Hatracking** – for the purposes of Art. 7, Landscaping, or tree topping means the cutting back of limbs to a point between branch collars/buds larger than one inch in diameter within the tree’s crown.

92. **Pruning, Hatracking, Type 1** – for the purposes of Art. 7, Landscaping, trees that are damaged to the extent they will never regrow a natural canopy and must be replaced.

93. **Pruning, Hatracking, Type 2** – for the purposes of Art. 7, Landscaping, trees that are damaged to the extent they will not regrow a natural canopy without proper pruning.

94. **Pruning, Topping** – for the purposes of Art. 7, Landscaping, undesirable pruning practices resulting in internodal cutting back of branches with little regard to the natural shape of the tree.

95. **Pruning, Tree Shaping** – for the purposes of Art. 7, Landscaping, the pruning of a tree beyond its natural growth habit to create a distinct shape or form.

96. **Public Agency** – any government or governmental agency, board, commission, authority or public body of PBC, the State of Florida, or of the United States government, or any legally constituted governmental subdivision or special district.

97. **Public Civic Sites** – for the purposes of Art. 4, Use Regulations, any property in any zoning district which accommodates a use under the ownership of or leased by a public agency as defined in Art. 3, Overlays and Zoning Districts, of the Code.

98. **Public Easement** – see Easement, Public.

99. **Public Facilities** – capital facilities including but not limited to roads, parks and recreation, fire-rescue, library, law enforcement, public buildings, and school sites.

100. **Public Facilities Agreement** – an agreement entered into by PBC or a Service Provider and a developer or landowner for the purpose of ensuring public facility capacity is reserved for a proposed development.

101. **Public Health, Safety and General Welfare** – for the purposes of Art. 18, Flood Damage Prevention, conditions concerning the safety or health of an entire community or neighborhood, or any considerable number of people. [Ord. 2004-013]

102. **Public Street** – see Street.

103. **Public Utility**
   a. An entity owning, operating, managing or controlling a system or proposing construction of a system that is providing or proposing to provide water or sewer service, electricity, natural or manufactured gas, or any similar gaseous substance, telephone, telegraph or other communication service to the public for compensation.
   b. For the purposes of Art. 14, Environmental Standards, any privately-owned, municipally-owned, PBC-owned, special district-owned, or State of Florida-owned system providing water or wastewater service to the public which has at least 15 service connections or regularly serves at least 25 individuals daily for at least 60 days of the year.

104. **Public Water System** – for the purposes of Art. 15, Health Regulations, a system for the provision to the public of water for human consumption through pipes or other constructed conveyances if such system has at least 15 service connections or regularly serves at least 25 individuals daily at least 60 days out of the year. A public water system is either a community water system or a non-community water system. The term “Public Water System” includes:
   a. Any collection, treatment, storage, and distribution facility or facilities under the control of the operator of such system and used primarily in connection with such system; and
   b. Any collection or pretreatment storage facility or facilities not under the control of the operator of such system but used primarily in connection with such system.

105. **Public Works Projects** – projects that may be conducted by government agencies or are linear projects, such as pipelines, transmission lines, telephone lines, etc., that are constructed for no single property.

Q. **Terms defined herein or referenced in this Article shall have the following meanings:**

1. **Qualified Parcel** – for the purposes of Art. 14, Environmental Standards, for unincorporated County, a parcel improved prior to April 28, 1986. For incorporated areas, a qualified parcel is a parcel improved prior to the effective date of a municipal ordinance requiring removal of prohibited invasive non-native vegetation.

2. **Quasi-Public Easement** – see Easement, Quasi-Public.

3. **Quasi-Public Use** – a use or group of uses open for general public use, such as stadiums, amphitheaters, civic centers, and colleges. It does not include shopping centers or other retail uses, or hotels.

4. **Queuing** – for the purposes of Art. 6, Parking, Loading, and Circulation, a one-way aisle that provides a waiting area for a specified number of cars.
R. Terms defined herein or referenced in this Article shall have the following meanings:

1. **Radius of Development of Influence** – for the purposes of Art. 12, Traffic Performance Standards, the area surrounding a proposed Project as set forth in Table 12.B.2.D-7 3A, Radius of Development Influence herein. The distance shall be measured in road miles from the point at which the proposed Project’s traffic enters the first Link, or Links, not as a geometric radius. If a Project’s Traffic is only significant in one direction from the point at which it enters the first Link, then the Radius of Development Influence shall only include that portion of the first Link. [Ord. 2006-043]

2. **Raised Basement** – for the purposes of Art. 3, Overlays and Zoning Districts, a semi-underground story of a building.

3. **Real Estate Sales Model** – a Single Family residential unit used for real estate marketing, real estate sales, builder’s office, and other services directly associated with the sale of a residential unit.

4. **Real Estate Sales Office, Planned Development** – for the purposes of Art. 3, Overlays and Zoning Districts, an office for the sale and resale of new and existing residential units in a planned development.

5. **Rebuild or Reconstruct** – replacement or rehabilitation of a structure due to damage or proposed modification in excess of 30 percent of its original Improvement Value. [Ord. 2013-001]

6. **Reclamation** – re-establishments if the soil and earth to a usable condition.

7. **Reclamation, Water** – Water treated to tertiary standards considered suitable for storage, distribution and application as irrigation water under FDEP guidelines. [Ord. 2007-013]

8. **Recreation Facility, Neighborhood** – a non-profit facility designed and intended for recreational use by occupants of a residential development or subdivision owned and operated by a Property Owners’ Association or equivalent. Typical uses include clubhouses, golf courses, swimming pools and tennis courts and other recreational areas. [Ord. 2011-001] [Ord. 2013-001]

9. **Recreation and Park Facilities** – the planning of, engineering for, preparation of acquisition documents for, acquisition of land for, or construction of buildings and park equipment necessary to meet the LOS for Urban Park and Recreation Facilities and Rural Park and Recreation Facilities.

10. **Recreation, Required Areas** – recreational tracts of land with facilities required within a residential development, dedicated or reserved to a Property Owners’ Association for the perpetual use by all residents of the development for recreation.

11. **Recreational Vehicle**
   a. For the purposes of Art. 6, Parking, Loading, and Circulation, a truck, bus, trailer, pickup camper, pop-up camper, fifth wheel or other vehicle with or without motor power which has been converted or equipped with living or sleeping quarters and is designed and constructed to travel on public thoroughfares without a Special Permit in accordance with the provisions of F.S. § 316.550 of the Vehicle Code of the State of Florida. [Ord. 2019-005]
   b. For the purposes of Art. 18, Flood Damage Prevention, a vehicle which is: [Ord. 2004-013] [Ord. 2017-026]
      1) Built on a single chassis; [Ord. 2017-026]
      2) 400 square feet or less when measured at the largest horizontal projection; [Ord. 2017-026]
      3) Designed to be self-propelled or permanently towable by a Light-Duty Truck; and, [Ord. 2017-026]
      4) Designed primarily not for use as a permanent dwelling but as temporary living quarters for recreational, camping, travel, or seasonal use (see F.S. § 320.01, as amended or replaced). [Ord. 2017-026]
      5) Not occupied for more than six months. [Ord. 2017-026]

12. **Regional Facility** – For the purposes of Art. 8.G.3.B, Electronic Message Signs, a site or facility that because of its character, magnitude, events, programming and location is a destination or attraction to users who reside in an extended geographic region. Regional facility uses include, but are not limited to: Arenas, Stadiums, Amphitheaters, Regional Public Parks, State-chartered fairgrounds, and, live performance venues with a capacity of 2,000 or more. [Ord. 2018-002]

13. **Regional Water Management Areas** – areas which are managed consistent with the multiple objectives and purposes of F.S. ch. 373, including but not limited to water supply development, environmental restoration, water quality improvement, flood protection, water storage, see also page management, and wetland enhancement and mitigation.
14. Regulated Substances  
   a. For the purposes of Art. 14, Environmental Standards,  
      1) Those deleterious substances or contaminants, including degradation and interaction products which, because of quality, concentration, or physical, chemical (including ignitability, corrosivity, reactivity, and toxicity), or infectious characteristics, radioactivity, mutagenicity, carcinogenicity, teratogenicity, bioaccumulative effect, persistence (non degradability) in nature, or any other characteristic, may cause significant harm to human health and environment (including surface and groundwater, plants, and animals).  
      2) Those substances set forth in, but not limited to, the lists, as amended from time to time, entitled Lists of Hazardous Wastes (40 CFR 261, Subpart D), 40 CFR 261, Appendix VIII – Hazardous Constituents, and EPA Designation Reportable Quantities and Notification Requirements for Hazardous Substances Under CERCLA (40 CFR 302, effective July 3, 1986); provided, however, that this Chapter shall only apply whenever the aggregate sum of all quantities of any one Regulated Substance at a given facility/building at any one time exceeds five gallons where said substance is a liquid, or 25 pounds where said substance is a solid.  
   b. This Chapter shall also apply if no single substance exceeds the above reference limits but the aggregate sum of all Regulated Substances present at one facility/building at any one time exceeds 100 gallons if said substances are liquids, or 500 pounds if said substances are solids.  
      1) Where Regulated Substances are dissolved in or mixed with other non-Regulated Substances, only the actual quantity of the Regulated Substance present shall be used to determine compliance with the provisions of this Article.  
      2) Where a Regulated Substance is a liquid, the total volume of the Regulated Substances present in a solution or mixture of said substance with other substances shall be determined by volume percent composition of the Regulated Substance, provided that the solution or mixture containing the Regulated Substances does not itself have any of the characteristics described in 1 above.

16. Regulatory Floodway – for the purposes of Art. 18, Flood Damage Prevention, the channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than 12 inches. [Ord. 2004-013]
17. Rehabilitation – for the purposes of Art. 9, Archaeological and Historic Preservation, the act or process of returning a property to a state of utility through repair or alteration which makes possible an efficient contemporary use while preserving those portions or features of the property which are significant to its historic, architectural and cultural value.
18. Renovation – improvements to modify the interior or exterior physical characteristics of an existing structure. Renovation may include: conversion, rehabilitation, remodeling, or modernization of floor area, air conditioning, wiring or plumbing.
19. Repair – for the purposes of Art. 15, Health Regulations, as defined by Chapter 64E-6, F.A.C. For the purposes of Art. 1.F, Nonconformities, improvements to restore to a structural sound condition and shall include walls and other improvements included under Maintenance. [Ord. 2010-005]
20. Required Recreation Areas – recreational tracts of land with facilities required within a residential development, dedicated or reserved to a POA for the perpetual use by all residents of the development for recreation.
21. Residence – see Dwelling Unit.
22. Residential – for the purposes of Art. 4, Use Regulations, property possessing either a residential designation by the FLUA of the Plan or a residential zoning designation consistent with the underlying FLU designation.
23. Residential Access Street – see Street, Residential Access.
24. Residential Development  
   a. For the purposes of Art. 2, Application Processes and Procedures, any development that is comprised in whole, or part, of dwelling units; for permanent human habitation.  
   b. For the purposes of Art. 13, Impact Fees, a building, or many buildings or dwelling units, or portion of a building or land used primarily for human habitation.
25. Residential District – any area that has a district classification of AR, RE, RT, RM, and RS, as well as Residential Pods of any PDD or TND. Any creation of an additional residential district by amendment to the Official Zoning Map which occurs shall automatically be included in the definition of residential district for the purposes of this Code.
26. Respondent/Alleged Violator – those persons including both landowners and tenants who have been issued a notice of violation.
27. **Restoration**
   a. For the purposes of this Article, return to a former, normal or unimpaired condition. A reconstruction of the original form or structure.
   b. For the purposes of Art. 9, Archaeological and Historic Preservation, the act or process of accurately recovering the form and details of a property and its setting as it appeared at a particular period of time, by means of the removal of later work or by replacement of earlier work.

28. **Retention** – the collection and storage of a specific portion of stormwater runoff without subsequent direct release to surface waters of said portion or any part thereof.

29. **Retention or Detention Pond** – for the purposes of Art. 14, Environmental Standards, any pit, pond, or excavation excluding canals of conveyance which creates a body of water by virtue of its connection to groundwater, and which is intended to receive stormwater.

30. **Ridesharing** – For the purposes of Art. 12, Traffic Performance Standards, shall mean the use of one motor vehicle by two or more employees to commute to and from the project site for at least 60 percent of the total number of days the ridesharing employees travel to and from the project site. [Ord. 2006-036]

31. **Right of Way (R-O-W)** – a strip of land dedicated or deeded for the perpetual use of the public. See also Street.

32. **Road Facilities** – the planning of, engineering for, preparation of acquisition documents for, acquisition of land for, or construction of roads on the major road network system necessary to meet the LOS for road facilities.

34. **Rooming House** – see Boarding House.

35. **Rubbish** – waste consisting of any accumulation of paper, excelsior, rags, wooden or paper boxes or containers, sweeping, and all other accumulations of a nature other than garbage, which are usual to housekeeping and to the operation of stores, offices and other business places, and also any bottles, cans, container, or any other products which due to their ability to retain water may serve as breeding places for mosquitoes or other water-breeding insects; rubbish shall not include noncombustible refuse.

36. **Runway** – for the purposes of Art. 16, Airport Regulations, a defined area on an airport prepared, used or intended to be used for the taking-off and landing of aircraft along its length.

37. **Runway Protection Zone (RPZ)** – for the purposes of Art. 16, Airport Regulations, an area at ground level beyond the runway end to enhance the safety and protection of people and property on the ground. [Ord. 2017-025] [Ord. 2019-005]

38. **Rural Service Area (RSA)** – that area as designated by the Plan.

39. **Rural Subdivision** – for the purposes of Art. 11, Subdivision, Platting, and Required Improvements, a division of land within an Agricultural Reserve (AGR), Agriculture Residential (AR), or Agricultural Production (AP) district.
S. Terms defined herein or referenced in this Article shall have the following meanings:

1. **Sand** – for the purposes of Art. 14, Environmental Standards, sediments having a distribution of particle diameters between 0.074 and 4.76 millimeters, as defined in the Unified Soils Classification System. Sand grain analyses shall follow the methodology described in ASTM standard D-422 and D-1140 to determine grain size distribution. [Ord. 2011-001]

2. **Sand Dunes** – for the purposes of Art. 18, Flood Damage Prevention, naturally-occurring accumulations of sand in ridges or mounds landward of the beach. [Ord. 2017-028]

3. **Sand Preservation Zone (SPZ)** – for the purposes of Art. 14, Environmental Standards, an area of jurisdiction, established by this Chapter, for the purpose of maintaining the volume of beach sand within the beach/dune system. This zone extends from the mean high water line of the Atlantic Ocean to a line 600 feet landward.

4. **Sanitary Hazard** – any percolation pond for domestic wastewater effluent disposal, the land application of domestic wastewater sludge or domestic wastewater effluents that have not received high-level disinfection as defined in Chapter 17-610, F.A.C. and any on-site sewage disposal system (septic tank).

5. **Sanitary Nuisance** – any act, or the keeping, maintaining, propagation, existence, or permission of anything, by an individual, municipality, organization, or corporation, by which the health or life of an individual may be threatened or impaired or by which or through which, directly or indirectly, disease may be caused.

6. **Sanitary Sewer Facilities** – the planning of, engineering for, preparation of acquisition documents for, acquisition of land for, or construction of sanitary sewer facilities necessary to meet the LOS for sanitary sewer facilities.

7. **Sanitary Survey** – for the purposes of Art. 15, Health Regulations, on-site review of the water source, facilities, equipment, operation, and maintenance of a public water system to evaluate the adequacy of such source, facilities, equipment, operation, and maintenance for producing and distributing safe drinking water.

8. **School Board** – the PBC School Board.

10. **Screen Enclosure** – a structure, which may or may not be roofed, used to completely enclose an outdoor living space with screening.

11. **Seagrasses** – those submerged beds of the genera *Halophila*, *Syringodium*, *Halodule*, *Thalassia*, and/or the green algae *Caulerpa* spp.

12. **Sea Turtle(s)** – for the purposes of Art. 14, Environmental Standards, any animal belonging to the species *Caretta caretta* (loggerhead turtle), *Chelonia mydas* (green turtle), *Dermochelys coriacea* (leatherback turtle), *Eretmochelys imbricata* (hawksbill), or *Lepidochelys kempii* (Kemp’s ridley) using PBC beaches as a nesting habitat or natal beach. [Ord. 2011-001]

13. **Sea Turtle Lighting Plan (STLP)** – for the purposes of Art. 14, Environmental Standards, a plan showing elevations and locations of structures, vegetation, and proposed lighting fixtures and meets the requirements of Art. 14.A.8.F, Sea Turtle Protection Lighting Plan, for the purpose of ensuring no adverse impacts to sea turtles, their nests, or habitat.

14. **Sea Turtle Protection Zone (STPZ)** – for the purposes of Art. 14, Environmental Standards, an area of jurisdiction, established by this Chapter, for the purpose of regulating coastal lighting. This zone extends from three miles offshore of the Atlantic Ocean and along inlet shorelines to a line 600 feet landward of the mean high waterline.

15. **Seedling, Sapling, Runner, or Sucker** – any young plant or tree in early stages of growth.

16. **Segment** – for the purposes of Art. 12, Traffic Performance Standards, a section of roadway containing thoroughfare and non-thoroughfare Links and intersections which comprise a unit of roadway, of sufficient length and characteristics to be defined by the County Engineer, for the HCM operational analysis allowed under Test 1 – Option Analysis iii or Test 2 – Optional Analysis iii. [Ord. 2006-043]

17. **Self-Service Storage** – for the purposes of Art. 4, Use Regulations, a facility consisting of individual, self-contained units that are leased for the storage of business or personal goods.

18. **Semi-Public Water System** – for the purposes of Art. 15, Health Regulations, a water system for provisions of piped water under pressure for human consumption, culinary, sanitary, or domestic purposes to:
   a. Less than 25 individuals daily at least 60 days out of the year; or
   b. At least 25 individuals daily less than 60 days out of the year.

19. **Septage** – for the purposes of Art. 15, Health Regulations, a mixture of sludge, fatty materials, human feces, and wastewater removed during pumping of an OSTDS. Excluded from this definition are contents of portable toilets, holding tanks, and grease interceptors.
20. **Septic Tank** – for the purposes of Art. 15, Health Regulations, as defined by Chapter 64E-6, F.A.C.
21. **Septic Tank System** – for the purposes of Art. 15, Health Regulations, septic tank, distribution box, and drainfield. When pump equipment is utilized, it is also considered part of the septic tank system.
22. **Service Provider** – for the purposes of Art. 2, Application Processes and Procedures, means any agency that is responsible for the provision of public facilities to development in PBC.
23. **Service Truck** – for the purposes of Art. 15, Health Regulations, a vehicle used to pump out the contents of OSTDS, grease traps, laundry interceptors, and/or portable toilets.
24. **Setback** – the required minimum horizontal distance between any structure and the related front, side, or rear property lot line or base building line.
25. **Setback, Front** – the setback extending along the full length of the front lot line or base building line.
26. **Setback, Interior Side** – the setback extending along an interior side lot line between the front and rear setbacks.
27. **Setback, Rear** – the setback extending along the full length of the rear lot line.
28. **Setback, Street Side** – the setback extending along a street side lot line or base building line between the front and rear setbacks.
29. **Sewer System, Central** – for the purposes of Art. 15, Health Regulations, a regional sewage system, owned and operated by a municipal, county, special district, or other governmental entity, which provides sewer service to several developments located within its service area.
30. **Sewer System, Individual** – for the purposes of Art. 15, Health Regulations, a privately-owned sewage system, which provides sewer service to a single development, because of unavailability of a central sewer system.
31. **Shade Tree** – see Tree, Canopy or Shade.
32. **Shipping Container** – a unit designed and built for the shipment of material or goods.
33. **Shopping Center** – a group of commercial establishments planned, developed, managed, and operated as a unit, with on-site parking provided on the property, and related in its location, size, and type of shops to the trade area which the unit serves.
34. **Shrub** – for the purposes of Art. 7, Landscaping, a self-supporting woody perennial plant more than 30 inches in height at maturity, characterized by multiple stems and branches continuous from the base.
35. **Sight Distance** – see Corner Clip.
36. **Sign** – any character, letter, figure, symbol, design, or device or combination of these used to attract attention or convey a message and which is visible to any area outside of a building. The term includes banners, pennants, streamers, moving mechanisms, and lights.
   a. **Sign Types**
      1) **A-Frame or Sandwich** – for the purposes of Art. 8, Signage, a portable sign which is ordinarily in the shape of an “A” or some variation thereof that usually has no wheels nor permanent foundation.
      2) **Abandoned** – for the purposes of Art. 8, Signage, a sign on which is advertised a business that is no longer licensed, no longer has a CO, or is no longer doing business at that location.
      3) **Advertising** – for the purposes of Art. 8, Signage, a sign representing or directing attention to a business, commodity, service, or entertainment, conducted, sold, or offered.
      4) **Advertising Structure** – for the purposes of Art. 8, Signage, any structure erected for advertising purposes, with or without any advertisement displayed thereon, situated upon or attached to land, upon which any poster, bill, printing, painting, device, or other advertisement may be placed, posted, painted, tacked, nailed, or otherwise fastened, affixed, or displayed. “Advertising structure” does not include buildings.
      5) **Area** – the background area upon which the advertising surface area is placed. Where the advertising surface area is attached directly to the wall of a building that wall shall not be construed to be the background sign area unless it is an integral part of the sign. For painted wall signs, see surface area.
      6) **Awning or Canopy** – for the purposes of Art. 8, Signage, a type of wall sign which is placed on or integrated into fabric or other material that is an integral part of an awning or canopy.
      7) **Building Mounted** – for the purposes of Art. 8, Signage, any sign mounted or erected on or against any building or façade and includes all wall signs, awning and canopy signs, and projecting signs.
      8) **Bulletin Board** – for the purposes of Art. 8, Signage, a sign of permanent character, but with removable letters, words, or numerals, indicating the names or persons associated with, or events conducted upon, or products or services offered upon, the premises upon which such a sign is maintained.

Unified Land Development Code
Supplement No. 28 (Printed 09/20)
9) **Changeable Copy** – for the purposes of Art. 8, Signage, sign copy, including numbers, letters, and illustrations which can be changed manually, for example, on a menu board or theater marquee.

10) **Construction** – for the purposes of Art. 8, Signage, erected on the parcel on which construction is taking place, or will take place within one year, indicating the names of the architects, engineers, landscape architects, contractors or similar artisans, and the owners, financial supports, sponsors, and similar individuals or firms having a role or interest with respect to the structure or project.

11) **Directional** – for the purposes of Art. 8, Signage, any sign giving directions, instructions, or facility information and which may contain the name or logo of an establishment but no advertising copy. Directional signs intended for residential planned developments may be on or off premise such as model home complex signs.

12) **Directory** – for the purposes of Art. 8, Signage, a sign intended to show the relative locations of or direction to the several commercial or industrial activities within an outdoor shopping center or multiple use industrial or business park, or multiple building residential complex.

13) **Double-faced** – for the purposes of Art. 8, Signage, a sign with two faces which are usually parallel and back-to-back.

14) **Electronic Message** – for the purposes of Art. 8, Signage, a sign that uses changing lights, digital or other electronic medium to form a sign message or messages wherein the sequence of the messages and the rate of change are electronically programmed and can be modified by electronic processes. [Ord. 2014-025]

15) **Entrance Wall** – for the purposes of Art. 8, Signage, an identification structure located along the main access to a PBC approved subdivision or a development. The only advertising on the structure shall be the subdivision or development name and logo.

16) **Equipment** – for the purposes of Art. 8, Signage, signs incorporated into displays, machinery, or equipment by a manufacturer, distributor, or vendor that identifies or advertises only the product or service dispensed by the machine or equipment, such as signs customarily fixed to automated teller machines (ATMs), gasoline pumps, vending machines, menu boards, and umbrellas. [Ord. 2006-036] [Ord. 2008-003]

17) **Face** – for the purposes of Art. 8, Signage, the surface(s) used for the display of a sign message as seen from any one direction.

18) **Fixed Projecting** – for the purposes of Art. 8, Signage, any sign which is attached to a building and extends beyond the wall of the building to which it is attached.

19) **Flashing** – for the purposes of Art. 8, Signage, any illuminated sign, which exhibits changes in light or color. Illuminated signs which indicate the time, temperature, weather, or other similar information shall not be considered flashing signs.

20) **Freedom of Speech** – for the purposes of Art. 8, Signage, a sign communicating a message or ideas for non-commercial purposes, including political free speech and which does not constitute, among others, any of the following: construction sign, directional sign, billboard, grand opening sign, holiday sign, on-premises real estate sign, or political campaign sign.

21) **Freestanding** – for the purposes of Art. 8, Signage, a detached sign which shall include any sign supported by uprights or braces placed upon or in or supported by the ground and not attached to any building.

22) **Grand Opening** – for the purposes of Art. 8, Signage, a temporary sign for introduction, promotion or announcement of a new business, store, shopping center or office, or the announcement, introduction or promotion of an established business or the changing of ownership. A business may have a grand opening sign when it has been closed to the public and is re-opened.

23) **Ground Mounted** – for the purposes of Art. 8, Signage, any sign which is permanently erected or standing on the ground and supported from the ground by one or more poles, columns, uprights, braces, or anchors and includes all freestanding signs, monument signs and electronic message signs. [Ord. 2014-025]

24) **Height** – for the purposes of Art. 8, Signage, the vertical distance measured from the lowest ground level directly beneath the sign to the highest point at the top of the sign. The ground level shall be either the natural grade or finished grade, whichever is lowest.

25) **Holiday** – for the purposes of Art. 8, Signage, a temporary sign, for non-commercial purposes, communicating only a holiday’s name and event.
26) **Identification** – for the purposes of [Art. 8, Signage](#), a sign, other than a bulletin board sign, or nameplate sign, indicating the name of the primary use, the name or address of a building, or the name of the management thereof.

27) **Illegal** – for the purposes of [Art. 8, Signage](#), any sign erected in violation of this Code.

28) **Illuminated** – for the purposes of [Art. 8, Signage](#), a sign in which a source of light is used in order to make the message readable and shall include internally and externally lighted signs. Illuminated signs do not include signs that flash time and temperature.

29) **Instructional** – for the purposes of [Art. 8, Signage](#), any sign conveying instructions with respect to the premises on which it is maintained, such as the entrance or exit of a parking area, a no trespassing sign, a danger sign, and similar signs.

30) **Marquee** – for the purposes of [Art. 8, Signage](#), a projecting sign that is part of a permanent entryway or canopy and traditionally associated with theaters. A marquee may include a projecting vertical sign extending above the cornice line of a building. [Ord. 2008-003]

31) **Menu Board** – an outdoor sign associated with a restaurant with a drive-through window, which gives a detailed list of foods served that are available at the restaurant and which may incorporate a speaker for voice communications. [Ord. 2005-002]

32) **Mobile Vendor** – for the purposes of [Art. 8, Signage](#), signs fixed to mobile vending carts that identify or advertise the name, product, or service provided by the vendor. [Ord. 2006-036]

33) **Monument** – for the purposes of [Art. 8, Signage](#), a freestanding sign not erected on one or more poles or similar structures but erected to rest on the ground or to rest on a monument base designed as an architectural unit.

34) **Moving** – for the purposes of [Art. 8, Signage](#), the signs that are moved by mechanical or natural means such as wind. These signs including moving, revolving, rotating, and twirling signs. [Ord. 2008-003]

35) **Nameplate** – for the purposes of [Art. 8, Signage](#), a sign indicating the name, address, profession or occupation of an occupant or a group of occupants.

36) **Neon** – for the purposes of [Art. 8, Signage](#), a sign with tubing that is internally illuminated by neon or other electrically charged gas.

37) **Off-Premises** – for the purposes of [Art. 8, Signage](#), any framework for signs announcing or advertising merchandise, services, or entertainment available, sold, produced, manufactured, or furnished at a place other than the lot on which the sign is erected.

38) **Off-Site Directional** – for the purposes of [Art. 8, Signage](#), a sign offering directional information to a business, location or place located in an area different from where the sign is located.

39) **On-Site** – for the purposes of [Art. 8, Signage](#), a permanent sign, identifying a business, commodity, service, or product conducted, sold or offered on the same premises as those upon which the sign is located.

40) **Painted Wall** – for the purposes of [Art. 8, Signage](#), any sign painted on any surface or roof of any building, visible from any public R-O-W.

41) **Parking and Directional** – for the purposes of [Art. 8, Signage](#), on-site parking and directional signs, that do not include any advertising messages or symbols may be wall or ground mounted. [Ord. 2006-036]

42) **Permanent** – for the purposes of [Art. 8, Signage](#), any sign which is intended to be, and is so constructed as to be a lasting and enduring condition remaining unchanged in character, condition beyond normal wear and tear, and in a permanent manner affixed to the ground, wall, or building; provided the sign is permitted by this Code.

43) **Plastic** – for the purposes of [Art. 8, Signage](#), any sign, embellishment or sign area made of flat sheet, corrugated panels, formed or molded plastic on one or more faces.

44) **Point of Purchase** – for the purposes of [Art. 8, Signage](#), any structure with characters, letters or illustrations placed thereto, thereon, or thereunder by any method or whatsoever where the matter displayed is used for advertising on the premises, a product actually or actively offered for sale or rent thereon or therein or services rendered.

45) **Political Campaign** – for the purposes of [Art. 8, Signage](#), a temporary sign, which indicates an individual, party or issue that will be placed on the Federal, State or local election ballot in the subject calendar year.

46) **Portable** – for the purposes of [Art. 8, Signage](#), any sign not permanently attached to the ground or other structure.

47) **Project Identification** – for the purposes of [Art. 8, Signage](#), a sign placed on the perimeter of a recorded subdivision, planned development, shopping center, business office park, industrial
park, or mixed use complex at a major street or driveway entrance to identify the name of the project. Project identification signs include entrance signs.

48) **Projecting** – for the purposes of **Art. 8, Signage**, any sign viewed from directly overhead is affixed at an angle or perpendicularly to the wall of any building in such a manner to read perpendicularly or at an angle to the wall on which it is mounted and located under a canopy or cover, and usually has two message surfaces.

49) **Public Service Information** – for the purposes of **Art. 8, Signage**, any sign intending to promote items of general interest to the community, such as time, temperature, date, weather, news, or traffic information.

50) **Real Estate** – for the purposes of **Art. 8, Signage**, any sign erected by the owner, or an agent, advertising the land upon which the sign is located for rent or for sale.

51) **Recreational Vehicle Park** – for the purposes of **Art. 8, Signage**, any sign erected by the owner, or an agent, advertising the land upon which the sign is located for rent or for sale a land area under Unified Control designed and intended to accommodate short term, overnight parking of recreational vehicles and not for permanent residential use.

52) **Roof** – for the purposes of **Art. 8, Signage**, any sign erected, constructed, and maintained wholly upon or over the roof of any building.

53) **Sale, Lease, and Rent** – for the purposes of **Art. 8, Signage**, temporary signs, which indicate that a parcel or building is currently for sale, lease or rent.

54) **Snipe** – for the purposes of **Art. 8, Signage**, any sign made of any material, including paper, cardboard, wood, and metal, when such sign is tacked, nailed, posted, pasted, glued, or otherwise attached to trees, poles, fences or other objects, and the advertising matter appearing thereon is not applicable to the premises upon which the sign is located.

55) **Temporary Balloon Type** – for the purposes of **Art. 8, Signage**, a temporary display using a balloon to display a sign message for the introduction, promotion or announcement of a new product or new business.

56) **Vehicular** – for the purposes of **Art. 8, Signage**, a sign affixed to or painted onto a transportation vehicle or trailer, for the purposes of business advertising; however, a vehicular sign shall not include signs affixed to vehicles or trailers for identification purposes or signs required by licensing ordinances. [Ord. 2008-003]

57) **Wall** – for the purposes of **Art. 8, Signage**, any sign affixed to the building which shall not extend beyond the peak of the roof at the location of the sign. [Ord. 2008-003] [Ord. 2013-021]

37. **Significances Determination** – for the purposes of **Art. 9, Archaeological and Historic Preservation**, is a judgment made by Local, State or Federal official(s) tasked with enforcing historic preservation regulations that deem an area, site, and structure important to the understanding or to the potential understanding of the history of Palm Beach County, the State of Florida, and the nation. An area, site, and structure will be deemed to be significant if it is associated with distinctive elements of the cultural, social, political, economic, scientific, religious, prehistoric, paleontological, and architectural history that have contributed to the pattern of history in the community of the South Florida region, the State, or the nation; or it is associated with the lives of persons significant in our past; or embody the distinctive characteristics of a type, period, style, or method of construction or work of a master; or that possess high artistic value; or that represent a distinguishable entity whose components may lack individual distinction; or have yielded or are likely to yield information in history or prehistory; or is listed on the National Register of Historic Places (NRHP). [Ord. 2008-037]

38. **Significant** – for the purposes of **Art. 12, Traffic Performance Standards**, significant or significance shall refer to the amount of traffic that has been deemed to be of a level that requires the analysis of roadway Links and or intersections. For purposes of Test One, significance is calculated as the amount of peak hour, peak direction Project traffic assigned to a link taken as a percent of the LOS D service volume for that Link, as shown for the applicable classification in **Table 12.B.2.D-9 3C, Test 1 Levels of Significance**. For Test Two, Significance shall be calculated as the amount of peak hour, peak direction Project traffic assigned to a Link divided by the LOS E service volume for that link, as shown for the applicable classification in **Table 12.B.2.D-10 3D, Test 2 Levels of Significance**. The applicable classification shall be determined on the basis of the number of traffic signals per mile anticipated to be in place by the buildout time frame of the proposed Project. [Ord. 2005-002] [Ord. 2010-022]

39. **Significant Archeological Value** – for the purposes of **Art. 9, Archaeological and Historic Preservation**, an archaeological site, fossil, or artifact which could yield or has yielded information deemed by a qualified archaeologist to be of significant scientific, historical, ethnic, or public significance to the history or prehistory of the PBC, the State, or Nation.
40. **Significant Degradation** – for the purposes of [Art. 7, Landscaping], means any of the following: [Ord. 2005-002]
   a. Where 20 percent or more of the homes on one side of a street within the same address block have been demolished and the remaining lots are left vacant; or [Ord. 2005-002]
   b. Where homes on two or more contiguous lots are demolished and the remaining lots are left vacant; or [Ord. 2005-002]
   c. Where a home(s) on a contiguous lot(s) is demolished and the remaining lot(s) is left vacant, creating a gap in the combined lot frontage measuring 100 linear feet or greater in length. [Ord. 2005-002]
41. **Single-Faced, Sign** – for the purposes of [Art. 8, Signage], only one side of a double-faced sign.
42. **Single Family** – for the purposes of [Art. 5.B.1.A.22, Pot Bellied Pigs], Single Family shall include mobile home dwellings. [Ord. 2013-021] [Ord. 2017-007]
43. **Single Family Cluster** – a dwelling unit which is part of a cluster of similar dwelling units within a planned development but which is separated from other similar units by common areas dedicated to a POA.
44. **Single Family District** – the AR, RE, RT, RM, and RS districts, as well as Single Family Pods of PDDs.
45. **Single Room Occupancy** – A residential property that includes multiple single room dwelling units. Each unit is for occupancy by a single individual. The unit need not, but may, contain food preparation or sanitary facilities, or both. [Ord. 2007-013]
46. **Single Tenant** – For the purposes of [Art. 6.E, Loading Standards], single tenant shall mean a structure or tenant space less than 10,000 square feet. [Ord. 2008-037]
47. **Site** – the total area within the property boundaries of a principal parcel to be developed, or contiguous parcels intended for development under a common scheme or plan.
48. **Site Elements** – For the purposes of [Art. 1.E, Prior Approvals] and [Art. 1.F, Nonconformities], site elements shall include existing or proposed items for the site, which include but not limited to: parking, loading, outdoor lighting, landscaping, or signage. [Ord. 2010-005]
49. **Site, Historic Preservation** – for the purposes of [Art. 9, Archaeological and Historic Preservation], any area or location occupied as a residence or utilized by humans for a sufficient length of time to leave physical remains or traces of occupancy. Such localities vary in size, settlements and activity areas, and the transportation networks linking them. A site may consist of secondarily deposited archaeological remains.
50. **Site-Related Improvements** – road construction or road improvements at or near the development site which are necessary to interface the development's external trips with the major road network system, or which are necessary to interface the development's internal trips with the major road network system where a portion of the major road network system is included within the development.
51. **Site Specific Development Order** – for the purposes of [Art. 12, Traffic Performance Standards], a Development Order issued by a Local Government which establishes the density or intensity, or maximum density or intensity, or use, group of uses, or permitted uses and which approves a specific plan of Development on a lot or lots pursuant to an application by or on behalf of an Owner or contract purchaser, including applications initiated by a Local Government. It may apply to a lot or lots under single ownership or a group of lots under separate ownership. It shall not include general rezoning/district boundary changes initiated by the Local Government which do not involve a particular development concept, except “down zonings” under this Article of the Code. It includes those Development Order’s referenced in policies 2-g and 2-h of the Plan in the Capital Improvement Element, including amendments thereto. It includes Site Specific Rezonings, Special Exceptions, Conditional Uses, Special Permits, Master Plan approvals, site plan approvals, plat approvals, and Building Permits. It may or may not authorize the actual commencement of development. Two or more Development Orders which individually do not constitute a Site Specific Development Order shall be considered a Site Specific Development Order if when taken together they meet the definition of Site Specific Development Order. [Ord. 2010-022]
52. **Sky Exposure Plane** – an imaginary inclined plane beginning at a specified height of a building façade and rising over the building at a ratio of vertical distance to horizontal distance. [Ord. 2006-004]
53. **Solar Energy System** – Any device or combination of devices which rely upon direct sunlight as an energy source to convert solar energy to a usable form of energy, primarily to meet all or part of the energy needs of the onsite user. [Ord. 2014-001]
54. **Solid Waste** – garbage, rubbish, refuse, sludge, septage, dewatered domestic wastewater residuals, grit and screenings from a domestic wastewater treatment facility, or other discarded solid or liquid material resulting from domestic, commercial, industrial, agricultural activities, or governmental operations but does not include storm water discharges or other significant pollutants in water resources.
such as silt, dissolved or suspended solids in industrial wastewater effluent, dissolved materials in irrigation return flows, or other common water pollutants.

55. **Solid Waste Facilities** – the planning of, engineering for, preparation of acquisition documents for, acquisition of land for, or construction of solid waste facilities necessary to meet the LOS for solid waste facilities.

56. **Sound Level** – For the purposes of [Art. 5, Supplementary Standards](#), the weighted sound pressure obtained by use of a metering characteristic with an A-Weighting as specified in the ANSI specifications for sound level meters.

57. **Sound Level Meter** – for the purposes of [Art. 5, Supplementary Standards](#), an instrument that includes a microphone, amplifier, an output meter, and frequency weighting networks for the measurement of noise and sound levels in a manner to meet ANSI standards.

58. **Source Property** – for the purposes of [Art. 5, Supplementary Standards](#), the land from which the subject sound is originating including public or private streets, sidewalks, or other public or open space areas.

59. **Special Allocation** – for the purposes of [Art. 13, Impact Fees](#), the assignment by the BCC of impact fee credits for in-kind contributions to a feepayer, or a portion of a development. It may involve the pro rata rating of impact fee credits for in-kind contributions.

60. **Special Flood Hazard Area (SFHA)** – for the purposes of [Art. 18, Flood Damage Prevention](#), the land area subject to flood hazards and shown on a Flood Insurance Rate Map or other flood hazard map as Zone A, AE, A1-30, A99, AR, AO, AH, V, VO, VE, or V1-30. [Ord. 2004-013] [Ord. 2017-026]

61. **Specimen Tree** – for the purposes of [Art. 14, Environmental Standards](#), a tree that has attained an age where its size, stature, health, and appearance contributes to the aesthetics of an area. Trunk sizes designating specimen stature of the most commonly found native trees are listed in Appendix 7, Specimen Tree List. Other trees are specimen trees, if the trunk has attained a diameter size of at least 33 percent of that of the State of Florida Division of Forestry’s listed State of Florida champion for the applicable tree.

62. **Speculative Clearing** – the clear cutting of a site when no Final Site Plan or approved vegetation management plan has been prepared for the site.

63. **Spent** – the commitment of funds to a particular capital facility acquisition by the awarding of a contract.

64. **Spill** – for the purposes of [Art. 14, Environmental Standards](#), the unpermitted release or escape of a Regulated Substance, irrespective of the quantity thresholds identified in the definition of “Regulated Substance” above directly or indirectly to soil, surface waters or groundwaters.

65. **Spillover Light** – for the purposes of [Art. 5, Supplementary Standards](#), light that is distributed into areas where the illumination is not needed or intended. [Ord. 2005-041]

66. **Sports Vehicle** – for the purposes of [Art. 6, Parking, Loading, and Circulation](#), any wheeled or tracked motorized vehicle designed or adapted to travel on public thoroughfares, public waterways, on unpaved thoroughfares, etc. without a Special Permit in accordance with the provisions of F.S. § 316.550 of the Vehicle Code of the State of Florida. [Ord. 2019-005]

67. **Spot Light** – Any light fixture or luminaire that incorporates a reflector or a refractor to concentrate the light output into a directed beam in a particular direction. [Ord. 2005-041]

68. **Square** – an outdoor civic tract located within a neighborhood to provide community services and usable open space.

69. **Square Footage** – see Building Square Footage.

70. **Start of Construction** – for the purposes of [Art. 18, Flood Damage Prevention](#), for all construction, includes Substantial Improvement, and means the date the Building Permit was issued, provided the actual Start of Construction, repair, reconstruction, rehabilitation, addition, or improvement was within six months of the permit date. The actual start means the first placement of permanent construction of a Building, including a Manufactured Home, on a site, such as the pouring of slabs or footings, installation of piles, construction of columns, or any work beyond the stage of excavation or placement of a Manufactured Home on a foundation. Permanent construction does not include land preparation, such as clearing, grading, and filling; nor does it include installation of streets and/or walkways; nor does it include excavation for a Basement, footings, piers or foundations, or the erection of temporary forms; nor does it include installation or alteration on the property of accessory Buildings, such as garages or sheds not occupied as dwelling units or not part of the main Building. For Substantial Improvement, the actual Start of Construction means the first installation of any foundation, wall, ceiling, floor, or other structural part of a Building, whether or not that alteration affects the external dimensions of the Building. [Ord. 2004-013] [Ord. 2017-026]

71. **State Standards** – for the purposes of [Art. 11, Subdivision, Platting, and Required Improvements](#), the various design and construction guidelines, policies and standards promulgated, and amended, by the

72. Standards of this Section – for the purposes of Art. 12, Traffic Performance Standards, the requirements that Site Specific Development Orders satisfy the LOS provisions of this Section.

73. Stoop – A small porch or platform

74. Storage Container – a shipping container that has been permanently located on a recognized bona fide agricultural use site that is tied down to meet building code requirements.

75. Store Front – for the purposes of Art. 3, Overlays and Zoning Districts, the front of a retail establishment facing a street, plaza, square or other public use area, where the primary entrance is located. [Ord. 2010-022]

76. Stormwater – the flow of water that results from and occurs immediately following a rainfall event.

77. Stormwater Management Easement – see Easement, Stormwater Management.

78. Stormwater Management Plan – for the purposes of Art. 11, Subdivision, Platting, and Required Improvements, an engineering drawing and written report outlining the proposed secondary and tertiary stormwater management system needed for the proper development of a specific increment of the unincorporated area of PBC, including details of drainage-related conditions and characteristics of the existing development site and surrounding lands.

79. Stormwater Management System – for the purposes of Art. 11, Subdivision, Platting, and Required Improvements, a comprehensive system designed and constructed or implemented to collect, convey, store, absorb, inhibit, treat, use or reuse stormwater in order to prevent or reduce inundation, flooding, over-drainage, environmental degradation, and water pollution, or otherwise affect the quantity and quality of stormwater runoff.

80. Stormwater Runoff – for the purposes of Art. 11, Subdivision, Platting, and Required Improvements, that portion of stormwater which occurs either as overland surface flow or subsurface lateral flow through normally unsaturated soils, and which is neither intercepted by vegetation, evaporated, nor recharged to groundwater.

81. Stormwater System, Primary – for the purposes of Art. 11, Subdivision, Platting, and Required Improvements, classified surface waters of the State of Florida which convey stormwater runoff toward the ocean or a major inland water body.

82. Stormwater System, Secondary – for the purposes of Art. 11, Subdivision, Platting, and Required Improvements, that component of a stormwater management system which consists of facilities and features designed to provide for treatment and control of stormwater runoff generated by specifically delineated lands, in order to meet regulatory requirements governing the quality and quantity of stormwater discharged to the primary stormwater system.

83. Stormwater System, Tertiary – for the purposes of Art. 11, Subdivision, Platting, and Required Improvements, that component of a stormwater management system which consists of facilities and features designed to provide for rapid removal of stormwater from structures, building sites, streets, and other areas of development or uses sensitive to damage or disruption by inundation.

84. Stormwater Treatment – for the purposes of Art. 11, Subdivision, Platting, and Required Improvements, removal of pollutants, debris, and other undesirable materials from stormwater runoff by of natural chemical, biological or physical processes, including, but not necessarily limited to, detention, retention, filtration, percolation, sedimentation, floatation, and skimming. This definition does not normally include active treatment processes, requiring the consumption of electrical or mechanical energy.

85. Stream – for the purposes of Art. 15, Health Regulations, any river, creek, slough, or other natural watercourse whether or not the bed shall have been dredged or otherwise improved in whole or in part.

86. Street – a strip of land, owned privately or publicly, which affords legal access to abutting land and is designated for vehicular traffic. “Street” includes road, thoroughfare, parkway, avenue, boulevard, expressway, lane, throughway, place, and square, or however otherwise designated. Streets are further classified according to the function they perform.

87. Street, Arterial – for the purposes of Art. 11, Subdivision, Platting, and Required Improvements, a major street of higher classification than a Plan Collector Street, used primarily for traffic traveling considerable distance within or through an area not served by an expressway, of considerable continuity, and used primarily as a main traffic artery.
88. **Street, Collector** – for the purposes of [Art. 11, Subdivision, Platting, and Required Improvements](#), a street which carries traffic from Local Streets to Arterial Streets. Collector Streets have more continuity, carry higher traffic volumes and may provide less access than Local Streets.

89. **Street, Collector, Non-Plan** – for the purposes of [Art. 11, Subdivision, Platting, and Required Improvements](#), a Collector Street which is not included on the Thoroughfare Plan and which is the highest classification of minor street.

90. **Street, Collector, Plan** – for the purposes of [Art. 11, Subdivision, Platting, and Required Improvements](#), a Collector Street which is part of the Thoroughfare Plan, and which is the lowest classification of major street.

91. **Street, Cul-de-Sac** – for the purposes of [Art. 11, Subdivision, Platting, and Required Improvements](#), a dead end street terminating in a circular vehicular turn-around.

92. **Street, Dead End** – for the purposes of [Art. 11, Subdivision, Platting, and Required Improvements](#), a street with only one outlet.

93. **Street Frontage** – see Lot, Frontage.

94. **Street Layout Plan** – For the purposes of [Art. 3.E.2, Planned Unit Development (PUD)](#), this plan shall provide a method to calculate cul-de-sacs in a PUD. The plan shall show the general layout of all streets and clearly identify the streets that are to be included when calculating the cul-de-sacs. [Ord. 2008-037]

95. **Street, Limited Access** – for the purposes of [Art. 11, Subdivision, Platting, and Required Improvements](#), a street to which access from abutting property is under the control and jurisdiction of the County pursuant to a limited access easement or other regulatory access restriction.

96. **Street, Local Commercial** – for the purposes of [Art. 11, Subdivision, Platting, and Required Improvements](#), a street designed and maintained primarily to provide legal and vehicular access to abutting commercial or industrial lots. A Local Commercial Street is of limited continuity, is not for through traffic, and is the middle order street of minor streets.

97. **Street, Local Residential** – for the purposes of [Art. 11, Subdivision, Platting, and Required Improvements](#), a street designed and maintained primarily to provide legal and vehicular access to abutting residential lots. A Local Residential Street is of limited continuity, is not for through traffic, and is the middle order street of minor streets, being of a higher classification than a residential access street.

98. **Street, Major** – for the purposes of [Art. 11, Subdivision, Platting, and Required Improvements](#), a street depicted on the adopted Thoroughfare Plan; a Thoroughfare Plan road. Major streets are further classified as Collector Street, Arterial Street, and expressway.

99. **Street, Marginal Access** – for the purposes of [Art. 11, Subdivision, Platting, and Required Improvements](#), a special purpose Local Street which is parallel and adjacent to a Plan Collector Street, expressway, Arterial Street or other limited access street and which has its principal purpose of relieving such streets from local service of abutting property by providing access to abutting property and separation from through traffic. A marginal access street may also be called a “frontage street.”

100. **Street, Minor** – for the purposes of [Art. 11, Subdivision, Platting, and Required Improvements](#), not classified as a major street, and includes streets providing traffic circulation within the development.

101. **Street, Private** – for the purposes of [Art. 11, Subdivision, Platting, and Required Improvements](#),
   
   a. Has not been dedicated for public use;
   
   b. Is reserved to a Property Owners’ Association pursuant to recorded restrictions and covenants or a plat of record; or
   
   c. Is dedicated for public use but has not been accepted for maintenance by PBC, another local governmental entity, the State of Florida or a special district.

102. **Street, Residential Access** – for the purposes of [Art. 11, Subdivision, Platting, and Required Improvements](#), the lowest order of minor street which is intended to carry the least amount of traffic at the lowest speed.

103. **Streetscape** – For the purposes of the IRO, WCRAO, PRAs and TDDs, the visual elements of a street, adjoining buildings, street furniture, trees, pedestrian areas and open spaces, that combine to form the street's character. [Ord. 2010-005] [Ord. 2010-022] [Ord. 2017-025]

104. **Street Side Mass Transit Factors** – For the purposes of [Art. 5.H, Mass Transit Standards](#), Mass Transit infrastructure associated with the roadway that influences bus operations. [Ord. 2008-003]

105. **Street Structure** – that which is three feet or more in height, built or constructed or erected or tied down having a fixed location on the ground or attached to something having a permanent location on the ground, such as buildings, homes, mobile homes, towers, walls, fences, billboards, shore protection devices, and poster panels.
106. **Street Wall** – A characteristic of a streetscape resulting from the placement of continuous and harmonious building façades. May also include walls of proportional or sufficient height used to separate the streetscape from parking lots or other similar use areas, so as to maintain visual continuity with emphasis on establishing livable pedestrian use areas. [Ord. 2010-005]

107. **Structure**
   a. Unless specified otherwise, means that which is three feet or more in height which is built or constructed or erected or tied down having a fixed location on the ground or attached to something having a permanent location on the ground, such as buildings, homes, mobile homes, towers, walls, fences, billboards, shore protection devices and poster panels. [Ord. 2004-013] [Ord. 2007-001]
   b. For the purposes of Art. 16, **Airport Regulations**, any object, temporarily or permanently constructed erected, altered, or installed by man, including but not limited to: buildings, towers, smoke stacks, utility poles, power generation equipment, antennas, construction cranes and overhead transmission lines. [Ord. 2017-025]
   c. For the purposes of Art. 18, **Flood Damage Prevention**, a walled and roofed Building, including a gas or liquid storage tank, that is principally above ground, as well as a Manufactured Home. The terms Structure and Building are interchangeable in the National Flood Insurance Program. [Ord. 2004-013] [Ord. 2017-026]

108. **Structure, Principal** – see Building, Principal.

109. **Subdivision**
   a. For the purposes of Art. 11, **Subdivision, Platting, and Required Improvements**, the division of land, whether improved or unimproved, whether previously platted or not, into two or more contiguous lots for the purpose, whether immediate or future, of transfer of ownership. The term shall include any modification of legal boundaries for the purpose of redividing or combining any lot(s) depicted on a record plat, or on a certified survey or other map recorded pursuant to an affidavit of exemption or affidavit of waiver. When appropriate to the text, the term refers to the process of subdividing or the land proposed to be or which has been subdivided.
   b. For the purposes of Art. 12, **Traffic Performance Standards**, as defined in Art. 11, **Subdivision, Platting, and Required Improvements** of the Code of PBC, Florida as to the unincorporated area, and as defined in the Municipal Land Development Regulations in the Municipality.
   c. For the purposes of Art. 15.A, **PBC Environmental Control Rule I – Onsite Sewage Treatment and Disposal Systems**, any tract of land divided into three or more lots or parcels, regardless of the method by which the lots or parcels are described.

110. **Substantial Change in Land Use**
   a. Change in land use or site design that increases the intensity of land use,
   b. Change in land use or site design that increases the intensity of land use,
   c. An increase in the total floor area of multiple-family dwellings or non-residential buildings which results in increased traffic.

111. **Substantial Damage** – for the purposes of Art. 18, **Flood Damage Prevention**, damage of any origin sustained by a Building or Structure whereby the cost of restoring the Building or Structure to its before-damaged condition would equal or exceed 50 percent of the Market Value of the Building or Structure before the damage occurred. This term also includes flood-related damage sustained by a Building or Structure on two separate occasions during a ten-year period for which the cost of repairs at the time of each such flood event, on average, equals or exceeds 25 percent of the Market Value of the Structure before the damage occurred. [Ord. 2004-013] [Ord. 2017-026]

112. **Substantial Improvement**
   a. For the purposes of Art. 9, **Archaeological and Historic Preservation**, any combination of repairs, reconstruction, or improvement of a structure, where the improvement creates additional enclosed space that contains equipment or utilities relative to the primary structure, the cost of which equals or exceeds 50 percent of the market value of the structure either before the improvement or repair is started, or if the structure has been damaged and is being restored, before the damage of any wall, ceiling, floor, or other structural part of the building commences, whether or not that alteration affects the external dimensions of the structure. The term does not, however, include either any development for improvement of a structure to comply with existing State or local health, sanitary, or safety Code specifications that are solely necessary to assure safe living conditions, or any alteration of a structure listed on the National Register of Historic Places or a State Inventory of Historic Place.
b. For the purposes of Art. 18, Flood Damage Prevention, any combination of repairs, reconstruction, rehabilitation, addition, or improvement of a Building or Structure taking place during a five-year period, the cumulative cost of which equals or exceeds 50 percent of the Market Value of the Structure before the improvement or repair is started. For each Building or Structure, the five-year period begins on the date of the first permit is issued for improvement or repair of that Building or Structure in the preceding five years. If the Structure has sustained Substantial Damage, any repairs are considered Substantial Improvement regardless of the actual repair work performed. The term does not, however, include any project for improvement of a Building required to correct existing health, sanitary, or safety Code Violations identified by the Building Official and that are the minimum necessary to assure safe living conditions. For the purposes of residential and non-residential condominiums, Market Value shall be determined to be a prorated share of the total Market Value of the building. [Ord. 2004-013] [Ord. 2017-026]

113. **Substantial Renovation** – for the purposes of Art. 5, Supplementary Standards, any expansion, alteration, renovation, addition, redevelopment, or similar improvement to an existing building that exceeds 75 percent of the Improvement Value of the building, as indicated in the latest official PBC Property Appraiser’s records. [Ord. 2013-001]

114. **Superintendent** – the Superintendent of the PBC School Board.

115. **Supplier of Water** – for the purposes of Art. 15, Health Regulations, any person, company, or corporation that owns or operates a community, non-transient non-community, transient non-community, limited use, multi-family, or private water system; also applies to consecutive water systems. [Ord. 2005-003]

116. **Surface Water** – water upon the surface of the earth whether contained within natural or artificial boundaries or diffused.
   a. For the purposes of Art. 15.A, PBC Environmental Control Rule I – Onsite Sewage Treatment and Disposal Systems, a recognizable body of water, including swamp or marsh areas, bayheads, cypress ponds, sloughs and natural or constructed ponds contained within a recognizable boundary. This does not include storm water retention or detention areas designed to contain standing or flowing water for less than 72 hours after a rainfall.
   b. For the purposes of Art. 15.B, PBC Environmental Control Rule II – Drinking Water Supply Systems, a source of water existing above the surface of the ground and exposed to the atmosphere. [Ord. 2005-003] [Ord. 2006-004]

117. **Surveyor and Mapper** – a person registered to engage in the practice of surveying and mapping under F.S § 472.001-471.041, and includes the terms “surveyor,” and “professional surveyor and mapper.”

118. **Suspension Order** – for the purposes of Art. 9, Archaeological and Historic Preservation, suspension of construction work directly over the potential archaeological find. During the initial site visit, a qualified archaeologist may extend the boundary of the suspension order based on the potential significance and geographic coverage of the find.

119. **Sustainability** – The integration of social, economic and ecological needs of the community with policies advocating management of resources for future generations. [Ord. 2010-005]

120. **Swale** – for the purposes of Art. 11, Subdivision, Platting, and Required Improvements and Art. 15, Health Regulations, a stabilized and graded depression designed to convey stormwater runoff and retain water for only a brief period following a rainfall event. [Ord. 2014-025]

121. **Swimming Pool** – any confined body of water, located either above or below the existing finished grade of the site, exceeding 150 square feet in surface area, and two feet in depth, designed used, or intended to be used for swimming or bathing purposes.
T. Terms defined herein or referenced in this Article shall have the following meanings:

1. **Tabular Tree List** – for the purposes of Article 14, Environmental Standards, a complete listing of all native trees three inches or greater DBH in a tabular form.

2. **TDR Agricultural Conservation Easement** – for the purposes of Article 5, Supplementary Standards, an interest in land, which interest represents the right to retain land in bona fide agriculture, fallow land, and uses permitted in the Conservation WRA Future Land Use category, created pursuant to F.S. § 704.06.

3. **TDR, Bank** – for the purposes of Article 5, Supplementary Standards, accounting and monitoring system authorized by this Code empowering PBC to purchase and sell development rights. The TDR Bank offers an alternative to TDRs being transferred via the private market. The bank consists of development rights from lands designated for preservation as provided for in this Section and purchased by PBC. These rights may then be sold to developers for use in qualified receiving areas or held in reserve for future release.

4. **TDR, Community Commercial Facility** – for the purposes of Article 5, Supplementary Standards, a commercial facility constructed on ten or more acres supporting at least 100,000 square feet of GFA. The community commercial facility shall not be construed to mean the Community Commercial Zoning District described in this Code.

5. **TDR, Conservation Easement** – for the purposes of Article 5, Supplementary Standards, an interest in land which represents the right to restrict or prevent the development or improvement of the land for purposes other than water preserve areas, wetlands, or uplands, created pursuant to F.S. § 704.06.

6. **TDR, Contract for Sale and Purchase of Development Rights** – for the purposes of Article 5, Supplementary Standards, a valid contract which must be in writing pursuant to the State of Florida law, for the sale of development rights for the purpose of increasing density on a receiving area parcel.

7. **TDR, Deed of Transfer of Development Rights** – for the purposes of Article 5, Supplementary Standards, a legal document which transfers the ownership of specified development rights from one parcel of land to another, and which is recorded in the Public Records of PBC.

8. **TDR, Development Right** – for the purposes of Article 5, Supplementary Standards, the ability to develop a residential dwelling unit on a parcel of land. The landowner may sell, donate, or transfer the development rights and retain title to the land and the right to use the surface of the land on a limited basis. For the purpose of this Section, one development right shall equal one residential dwelling unit.

9. **TDR, Development Rights Certificate** – for the purposes of Article 5, Supplementary Standards, a legal document presented to a Property Owner who deeds to PBC, without compensation, environmentally sensitive, Rural Residential 20 (RR-20) land or land designated CON on the FLUA within a sending area, or records an agricultural conservation easement for a sending area designated AGR on the FLUA. The certificate shall specify the number of development rights the Property Owner is entitled to sell or trade, and the certificate shall remain valid until the development rights are permanently transferred to a property within a receiving area.

10. **TDR, Escrow Agreement** – for the purposes of Article 5, Supplementary Standards, a legal document which holds money or an approved surety in trust by a third party to be turned over to PBC upon the fulfillment of a condition. [Ord. 2007-001]

11. **TDR, Major Department Store** – for the purposes of Article 5, Supplementary Standards, a nationally or regionally recognized retail store which anchors a regional commercial facility and contains at least 100,000 square feet of GFA.

12. **TDR, Major Industrial Facility** – for the purposes of Article 5, Supplementary Standards, an industrial facility constructed on more than 35 acres supporting at least 700,000 square feet of GFA.

13. **TDR, Priority Acquisition Site** – for the purposes of Article 5, Supplementary Standards, a parcel of land designated by the ESLASC or CLASC as such and approved for acquisition by the BCC.

14. **TDR, Receiving Area** – for the purposes of Article 5, Supplementary Standards, parcel of land within the USA, which are permitted to increased density, as specified herein, and receive development rights purchased from the owners of land in a sending area. The transfer capacity of these development rights is based on the number of transf erable development rights which a specified area can accommodate, subject to Article 5.G.3.H, TDR Receiving Areas, and Article 5.G.3.K, TDR: Receiving Area Procedure.

15. **TDR, Regional Commercial Facility** – for the purposes of Article 5, Supplementary Standards, a commercial facility constructed on 40 or more acres supporting at least one major department store and 350,000 square feet of GFA.

16. **TDR, Sending Area** – for the purposes of Article 5, Supplementary Standards, an area which the TDR Program is designed to protect, as specified herein, and from which development rights are transferred pursuant to the provisions of this Section.
17. **Technical Manual** – a manual maintained by the Zoning Division that outlines the minimum technical requirements for preparing applications for zoning review. The Manual shall be posted on the Zoning web page. [Ord. 2009-040]

18. **Telecommuting** – For the purposes of Art. 12, Traffic Performance Standards, a system whereby employees are allowed to work from home or another location (such as a neighborhood office) an average of at least two weekdays per week in order to reduce commute travel. [Ord. 2006-036]

19. **Temporary** – for the purposes of Art. 15.A, PBC Environmental Control Rule I – Onsite Sewage Treatment and Disposal Systems, as defined by Chapter 64E-6, F.A.C. [Ord. 2019-005]

20. **Terminal Navigational Aid** – for the purposes of Art. 16, Airport Regulations, any visual or electronic device on the surface which provides point-to-point guidance information or position data to aircraft in flight and is located on a public use airport in PBC.

21. **Test 2 Radius of Development Influence** – for the purposes of Art. 12, Traffic Performance Standards, the radius of development influence used in Test 2 as set forth in Table 12.B.2.D-7 3A, Radius of Development Influence. The distance shall be measured in road miles from the point at which the proposed Project's traffic enters the first Link, not as a geometric radius. [Ord. 2006-043] [Ord. 2007-013]

22. **Test 2 Road Network** – for the purposes of Art. 12, Traffic Performance Standards, the Thoroughfare Plan roadway network that will be in place or is anticipated to have construction commenced by the end of the Five-Year Analysis Period for Test 2. This includes any roadway projects for which construction funds are budgeted within the Palm Beach County Five-Year Road Program and FDOT Five-Year Transportation Improvement Program in effect at the time of the traffic analysis submittal. [Ord. 2006-043]

23. **Third Party** – party not affiliated with the architect or landscape architect who prepared the original drawings to satisfy the regulations in Art. 5, Supplementary Standards, and Art. 7, Landscaping.

24. **Thoroughfare Plan, Thoroughfare R-O-W Identification Map or Plan**
   a. That which is described in the Transportation Element of the Plan, Support Document II, Existing Transportation System.
   b. For the purposes of Art. 12, Traffic Performance Standards, as described in the Transportation Element of the Plan, Support Document II, Existing Transportation System.

25. **Through-Intersection Continuity** – for the purposes of Art. 12, Traffic Performance Standards, at least one left turn lane at the intersection and the same number of through lanes as on the Link for at least 3,120 feet beyond the Major Intersection, including transition in accordance with FDOT Standards.

26. **Tinted Glass** – for the purposes of Art. 14, Environmental Standards, any window or door glass which has: (1) a visible light transmittance value of 45 percent or less; and (2) a minimum of five-year warranty; and (3) performance claims which are supported by approved testing procedures and documentation. For the purpose of this Chapter Window Tint shall be synonymous with Tinted Glass.

27. **TMD, Frontage, Primary** – for the purposes of Art. 3, Overlays and Zoning Districts, a type of building frontage that is primarily located along Main Streets and is characterized by zero front setbacks and limitations on the physical separation between buildings.

28. **TMD, Frontage, Secondary** – for the purposes of Art. 3, Overlays and Zoning Districts, a type of building frontage that allows for variable front setbacks and more frequent physical separation between buildings than allowed on Primary Frontages.

29. **TMD, Street, Main** – for the purposes of Art. 3.F, Traditional Development Districts (TDDs), a street connecting adjacent land uses and local streets with parks, plazas, and squares in a TMD.

30. **TMD, Street Wall** – for the purposes of Art. 3, Overlays and Zoning Districts, a wall, fence or hedge installed along the frontage line to fill in building frontage.

31. **TND, Accessory Structure** – for the purposes of Art. 3, Overlays and Zoning Districts, a detached accessory building constructed on a residential lot housing a garage, accessory apartment or handicapped or elderly apartment.

32. **TND, Colonnade** – for the purposes of Art. 3, Overlays and Zoning Districts, a covered pedestrian structure over a sidewalk that is open to the street except for supporting columns. Awnings are not considered colonnades.

33. **TND, Enfront** – for the purposes of Art. 3, Overlays and Zoning Districts, to face across a street.

34. **TND, Meeting Hall** – for the purposes of Art. 3, Overlays and Zoning Districts, a building designed for public assembly.

35. **TND, Neighborhood Center** – for the purposes of Art. 3, Overlays and Zoning Districts, Neighborhood Center is intended to accommodate neighborhood-oriented retail and commercial services. It may include professional offices, community facilities, and civic uses to serve the population of the TND and adjacent neighborhoods.
36. **TND, Porch** – for the purposes of Art. 3, Overlays and Zoning Districts, a roofed platform attached to the front of a dwelling unit. The structure is un-airconditioned, and may not be more than 75 percent enclosed by walls.

37. **TND, Raised Basement** – for the purposes of Art. 3, Overlays and Zoning Districts, a semi-underground story of a building.

38. **TND, Regulating Plan** – for the purposes of Art. 3, Overlays and Zoning Districts, a graphic and written representation of the detailed land use and development regulations applicable to a particular TND.

39. **Too Numerous to Count (TNTC)** – for the purposes of Art. 15.B, PBC Environmental Control Rule II – Drinking Water Supply Systems, equal to or greater than 200 non-coliform bacteria per 100 milliliters of sample.

40. **Total Traffic** – for the purposes of Art. 12, Traffic Performance Standards, the sum of:
   a. Existing Traffic;
   b. Net Trips; and,
   c. Background Traffic.

41. **TPS Database** – for the purposes of Art. 12, Traffic Performance Standards, a database which was initially approved by the Board of County Commissioners on October 26, 2006. On an ongoing basis, the Database compiles traffic from existing traffic counts as well as approved but unbuilt developments for each Link and Major Intersection on the County’s Major Thoroughfare network in order to provide Background Traffic volumes for use in traffic studies addressing compliance with Test 1 and Test 2. The Database shall also identify the double counting adjustment and historic growth rate, derived from the Historic Traffic Growth Table, that is appropriate for each Link and Major Intersection. The Background Traffic data shall be maintained by the County and updated to reflect all new project concurrency approvals as well as the buildout status of previously approved projects. [Ord. 2006-043]

42. **Traffic Impact Study** – for the purposes of Art. 12, Traffic Performance Standards, a traffic study of Links and intersections within the Test 1 Radius of Development Influence and Test 2 Radius of Development Influence of a proposed Project; and including the information, and prepared in accordance with the requirements, set forth in Art. 12.C.1.C.2, Traffic Generation. For the Transportation Element of the Plan, it is the “LOS Impact Statement” referred to in the Capital Improvement Element of the Plan. [Ord. 2006-043]

43. **Traffic Performance Standards Appeal Board** – for the purposes of Art. 12, Traffic Performance Standards, the administrative appeals board with the authority and responsibility to hear appeals from the decision of the County Engineer or Municipal Engineer as to traffic engineering issues.

44. **Traffic Volume Maps** – for the purposes of Art. 12, Traffic Performance Standards, the maps of the Major Thoroughfares produced and maintained jointly by the office of the MPO and County Engineer showing Average Daily Traffic, Peak Hour Traffic; two-way and peak directional.

45. **Trailer Coach** – shall have the meaning ascribed by the statutes of the State of Florida providing for the regulation, registration, licensing and recordation of ownership of motor vehicles in the State of Florida. The term shall also include all types of mobile homes and those types of self-propelled trucks or buses that have been converted or equipped with living or sleeping quarters, such as pick-up trucks with sleeping quarters installed, and converted buses. This definition shall exclude suburban, passenger vans and other types of automobiles for private use that have been equipped with camping equipment.

46. **Transact** – a distinct category of physical form ranging from the most urban to the least urban. Generally, the classifications range from highest to lowest density or intensity and are: urban core, urban center, general urban, suburban, rural and natural. [Ord. 2010-005] [Ord. 2010-022]

47. **Transact Zones** – For the purposes of the IRO, a distinct category of physical form ranging from the most urban to the least urban. The IRO requires the application of one or more of four transect zones: Core, General, Edge, and Open Space. [Ord. 2010-005]

49. **Transient Non-Community Water System** – a non-community water system that has at least 15 service connections or regularly serves 25 persons daily at least 60 days out of the year but that does not regularly serve 25 or more of the same persons for more than six months per year.

50. **Transient Occupancy** – residential occupancy when it is the intention of the parties that the occupancy will be for less than one month.

51. **Transit** – For the purposes of Art. 12, Traffic Performance Standards, a bus, train, or other public conveyance system. [Ord. 2006-036]

52. **Transitional Zone** – for the purposes of Art. 16, Airport Regulations, the area extending outward from the sides of the Primary Zones and Approach Zones connecting them to the Horizontal zone.
53. **Transit Center** – For the purposes of Art. 12, Traffic Performance Standards, a rail station or a transfer location for fixed-route service routes. [Ord. 2006-036]

54. **Transit Corridor** – For the purposes of Art. 12, Traffic Performance Standards, a roadway segment which (1) is located on a bus line with at least 30-minute peak headways and that connects directly to at least two transit centers; and (2) contains a transfer point to at least one other bus route. [Ord. 2006-036]

55. **Transmission Pole** – for the purposes of Art. 4.B.9, Commercial Communication Towers, means electrical transmission poles supporting 69kV conductors or greater. This does not include distribution. [Ord. 2017-016]

56. **Transportation Transfer Facility (distribution)** – for the purposes of Art. 4, Use Regulations, an establishment providing for the transfer of transportation or other motorized vehicles, but not involving vehicle sales or rental (retail or wholesale). Typical uses include the transfer of automobiles, trucks, heavy equipment, or other motorized vehicles prior to distribution to retail dealers.

57. **Tree**
   a. For the purposes of Art. 7, Landscaping, woody perennial plant commonly with a single stem and having a minimum diameter at breast height (DBH) of three inches, having a more or less defined crown, that usually grows to at least four meters or 13 feet in height at maturity.
   b. For the purposes of Art. 14, Environmental Standards, a woody or fibrous perennial plant commonly with a single stem and having a minimum trunk DBH of three inches and having a more or less defined crown, that usually grows to at least four meters or 13 feet in height at maturity.

58. **Tree, Canopy or Shade** – for the purposes of Art. 7, Landscaping, a tree that reaches a minimum height of 15 feet at maturity, provides relief from direct sunlight for at least six months each year, and is indicated as a shade tree on the Preferred Species List.

59. **Tree Credits** – for the purposes of Art. 7, Landscaping, a numerical representation of the value of a two-inch DBH ten-foot-high tree, used to assign values to trees of various sizes to calculate either credit against reforestation requirements, as in the case of trees protected during the development process, or to determine the extent of replanting required as in the case of removal of protected trees.

60. **Tree, Champion** – for the purposes of Art. 7, Landscaping, the largest tree of a species which has been designated by the Florida Department of Agriculture and Consumer Services.

61. **Tree, Drought-Tolerant** – for the purposes of Art. 7, Landscaping, a tree, excluding prohibited or controlled species, classified as very or moderately drought tolerant in the SFWMD Xeriscape Plant Guide.

62. **Tree Preservation Area** – for the purposes of Art. 14, Environmental Standards, an area of significant native vegetation that may be too small to be included as a preserve but has been determined to be worth designating for protection on the site plan and that the parcel owner is encouraged to manage with periodic maintenance activities, including the removal of prohibited and invasive non-native vegetation and protection of native vegetation from alteration.

63. **Tree, Specimen** – for the purposes of Art. 7, Landscaping, a tree that substantially contributes to the aesthetics of an area and which is protected through the permitting process, or which attains 33 percent or greater of the champion tree DBH. A specimen tree may be native or non-native and must be in good health.

64. **Tree Survey**
   a. For the purposes of Art. 7, Landscaping, a comprehensive survey document or site plan that provides the following information for trees greater than four inches diameter at breast height (DBH), or palm trees with an overall height of eight feet, that delineates the location and identifies the species of trees and vegetation upon a lot, and that meets the tree survey requirements of this Article. The Department shall determine the applicability and the extent of each survey. The survey shall provide the following information:
      1) The surveyed location, by a Florida licensed land surveyor, in relation to all proposed development, of all existing trees that are proposed to be destroyed, relocated or preserved.
      2) The common and scientific name of each tree.
      3) The DBH of each tree, or, if a multiple trunk tree, the sum of the DBH of all trunks.
   b. For the purposes of Art. 14, Environmental Standards, a comprehensive survey document or site plan that provides site specific information for trees three inches or greater DBH or for palm trees with an overall clear trunk height of eight feet that are on the site. The survey shall be performed by a Florida-licensed land surveyor, and ERM shall determine the applicability and the extent of each survey.

65. **Trip** – a one-way movement of vehicular travel from an origin (one trip end) to a destination (the other trip end).
66. **Trip Generation** – for the purposes of Art. 12, Traffic Performance Standards and Art. 13, Impact Fees, the attraction or production of trips caused by a given type of land development. The daily generation rates shall be as presented in Table 13.H.4-20, Fair Share Road Impact Fee Schedule. For daily rates not included in the Table and all peak hour rates the latest edition of Trip Generation Manual published by the ITE or other trip generation approved by the County Engineer pursuant to Art. 12.C.1.C.2, Traffic Generation, shall be used to determine the trip generation rate.

67. **Truck** – for the purposes of Art. 6, Parking, Loading, and Circulation, shall have the meaning ascribed by the statutes of the State of Florida providing for the regulation, registration, licensing and recordation or ownership of motor vehicles in the State of Florida.

68. **Turbine, Wind** – A rotary engine assembly with attached blades or other similar systems, typically affixed to an elevated structure, utilized in the process to convert wind into energy. [Ord. 2010-005] [Ord. 2011-016]

U. Terms defined herein or referenced in this Article shall have the following meanings:

1. **Ultimate R-O-W** – an area set aside for future road widening or used as means of ingress, egress or approach as determined by the FDOT, the Office of the County Engineer, the BCC, or by this Code, whichever provides the widest R-O-W.

3. **Undue Economic Hardship** – for the purposes of Art. 9, Archaeological and Historic Preservation, an exceptional financial burden that might otherwise result in a taking of property without compensation or otherwise denies use of the property in an economically viable manner.

4. **Unincorporated Area** – for the purposes of Art. 13, Impact Fees, all of the area within the boundaries of PBC not within the boundaries of any municipality. For the purposes of Park Impact Fees it excludes the Boca Taxing District.

5. **Unincorporated Area (Law Enforcement)** – for the purposes of Art. 13, Impact Fees, the unincorporated area of PBC and the municipalities of Cloud Lake, Haverhill, Glen Ridge, and Village of Golf.

6. **Unit** – building or portion of a building, or a mobile home used primarily for human habitation purposes with separate bathing, cooking and/or dining facilities. In the case of a hotel or motel, or a congregate living facility, it shall mean the room and bathrooms.

7. **Unity of Control** – covenant recorded in the office of the Clerk of the Circuit Court of PBC stipulating that a lot, lots, or project with different owners shall be developed according to a common site or master plan providing Unified Control and the combined lots shall meet land development requirements as if they are one lot.

8. **Unity of Title** – a document recorded in the office of the Clerk of the Circuit Court of PBC stipulating that a lot, lots or parcel of land shall be held under single ownership, shall not be eligible for further subdivision and shall not be transferred, conveyed, sold or divided in any unit other than in its entirety.

9. **Unmarked Human Burial** – for the purposes of Art. 9, Archaeological and Historic Preservation, any human skeletal or fossilized remains discovered during any land development activity or archaeological excavation.

10. **Unobstructed Land** – for the purposes of Art. 15.A, PBC Environmental Control Rule I – Onsite Sewage Treatment and Disposal Systems, that area on a lot or property which does not contain structures or other hindrances which would affect the installation, operation and/or maintenance of an OSTDS. This includes, but is not limited to, pools, playgrounds, concrete slabs, trees, buildings, driveways, parking areas and tennis courts.

11. **Upland Reclamation Area** – land area preserved or re-established around the perimeter of an excavated area created to ensure usable end-use of the land.

12. **Upland Reclamation Planting** – installation of vegetation to re-establish plant and animal habitats.

13. **Urban Infill** – for the purposes of Art. 12, Traffic Performance Standards, the development of vacant parcels in otherwise built-up areas where public facilities such as sewer systems, roads, schools, and recreation areas are already in place and the average residential density is at least five dwelling units per acre, the average non-residential intensity is at least a floor area ratio of 1.0 and vacant developable land does not constitute more than ten percent of the area.

14. **Urban Redevelopment** – for the purposes of Art. 12, Traffic Performance Standards, demolition and reconstruction or substantial improvement of existing buildings or infrastructure within urban infill areas or existing urban service areas.

15. **Urban Service Area (USA)** – that portion of PBC as designated by the Plan.

16. **Urban Service Area, Existing** – for the purposes of Art. 12, Traffic Performance Standards, an area defined and mapped in a local government comprehensive plan that is a built-up area where public
facilities and services such as sewage treatment systems, roads, schools, and recreation areas are already in place.

17. **Urgent Care Center** – A walk-in, extended-hour establishment that provides immediate, but not emergent, medical care to patients. Patients shall be served solely on an outpatient basis and such services shall not include overnight stays. [Ord. 2017-007]

18. **Use** – any purpose for which a building or other structure or a tract of land may be designed, arranged, intended, maintained, or occupied; or any activity, occupation, business or operation carried on, or intended to be carried on, in a building or other structure or on a tract of land.

19. **Use, Accessory** – a permitted use that is customarily associated with the principal use and clearly incidental to the principal use and is subordinate in area, extent, or purpose to and serves only the principal use.

20 **Use, Principal** – the primary and major purpose for which land or building is used as allowed by the applicable zoning district.

21. **Utility**
   a. Government or franchised provider of water, sewer, electric, gas, phone, cable television, or similar service.
   b. For the purposes of Art. 14, Environmental Standards, a public utility, power company or telephone company which serves the general public.

22. **Utility Easement** – see Easement.

23. **Utility Runway** – for the purposes of Art. 16, Airport Regulations, a runway that is constructed for and intended to be used by propeller driven aircraft of 12,500 pounds maximum gross weight and less.

V. **Terms defined herein or referenced in this Article shall have the following meanings:**

1. **Vacant Lot** – for the purposes of Art. 7, Landscaping, any tract or parcel of land upon which a home has been demolished and which has not been redeveloped. For the purposes of this definition only, redevelopment means the construction of a home. [Ord. 2005-002]

2. **Vacant Residential Parcel** – any undeveloped parcel of land or property, including any parcel or property with an approved Development Order, possessing either a residential designation by the FLUA of the Plan or a residential zoning designation consistent with the underlying Future Land Use designation.

3. **Valid Site Specific Development Order** – for the purposes of Art. 12, Traffic Performance Standards, a Valid Site Specific Development Order which: was issued by a Local Government: (1) in accordance with proper procedure and in compliance with State law, and the land development regulations and codes, administrative rules and procedures, and general policies of Local Governments, and the requirements of all other agencies; (2) not by mistake; and, (3) which has not expired, lapsed, or been abandoned, revoked, or canceled by operation of law, or by the Local Government or pursuant to the Local Government land development regulations or codes, rules, or policies.

4. **Value** – For the purposes of Art. 13, Impact Fees, in the case of land, the appraised value as determined by an appraiser from a list of approved appraisers of Palm Beach County. In the case of improvements to real property or chattel, it means the actual cost to the feepayer or developer of such improvements or chattel. In all cases, the values shall be established in or as if in an arm's length, bona fide transaction in a competitive market between a willing seller and a willing buyer, neither of whom are under any special circumstances, as approved by the Impact Fee Coordinator based upon the standards in Art. 13, Impact Fees. If the Impact Fee Coordinator rejects an appraised value, the Impact Fee Coordinator may obtain another appraisal using an appraiser from the approved list, in which case that appraisal shall prevail.

5. **Vanpool** – For the purposes of Art. 12, Traffic Performance Standards, a vehicle carrying six or more persons to and from work on a regular basis. [Ord. 2006-036]

6. **Variance**
   a. An abatement of certain regulations in the ULDC, where such variance will not be contrary to the public interest and where, owing to conditions peculiar to the property and not the result of the actions of the Applicant, a literal enforcement of this Code would result in unnecessary and undue hardship. [Ord. 2014-001]
   b. For the purposes of Art. 18, Flood Damage Prevention, a grant of relief from the requirements of Art. 18, Flood Damage Prevention or the flood-resistant construction requirements of the Florida Building Code, as granted by the Flood Damage Prevention Board, which permits construction in a manner that would not otherwise be permitted by Art. 18, Flood Damage Prevention or the Florida Building Code. [Ord. 2004-013] [Ord. 2017-026]

8. Vegetation, Native — any plant species with a geographic distribution indigenous to all or part of the State of Florida. Plant species, which have been introduced by man, are not native vegetation.

9. Vegetation Required to Be Preserved by Law — for the purposes of Art. 7, Landscaping, areas of vegetation which are clearly delineated on a Site Plan/Plat, or in some other legally binding manner based upon which the lot area is being preserved.

10. Vehicle Rental Facility, Neighborhood — a rental facility that is limited to a maximum of six vehicles stored on site. [Ord. 2009-040]

11. Vehicular Use Area
   a. An area designed or used for on-site parking; or
   b. An area used for loading, circulation, access, storage, or display of motor vehicles. Designated parking areas on public or private streets shall not be considered a vehicular use area.

12. Vehicular Use Area, Specialized — an area designed for storage of vehicles in operative condition, or for warehousing, transportation, or trucking operations, and which is not open to the general public.

13. Vessel — Synonymous with boat as referenced in Art. VII, § 1(b), Fla. Const, and includes every description of watercraft, barge, and airboat, other than a seaplane on the water, used or capable of being used as a means of transportation on water. The term “floating structure” is expressly excluded from the definition of a vessel. [Ord. 2007-013]

14. Vested — pursuant to the application of the State of Florida law.

15. Violation — for the purposes of Art. 18, Flood Damage Prevention, the failure of a Structure or other Development to be fully compliant with Art. 18, Flood Damage Prevention. In addition, a Structure or other Development without a required FEMA elevation certificate, other acceptable elevation certifications, or other evidence of compliance required in Art. 18, Flood Damage Prevention is presumed to be in Violation until such time as that documentation is provided. [Ord. 2004-013] [Ord. 2017-026]

16. Visual Impact Analysis — for the purposes of Art. 5, Supplementary Standards, a written and graphic assessment which determines the appropriate contextual relationship of a proposed building with respect to architectural composition and compatibility.

17. Visual Hazard — for the purposes of Art. 16, Airport Regulations, any source which emits occasional or permanent smoke, glare, dust, or any other perceptible emission that could be a risk to safe aircraft operations.

18. Visual Runway — for the purposes of Art. 16, Airport Regulations, a runway intended solely for the operation of aircraft using visual approach procedures with no straight-in instrument approach procedure and no instrument designation planned or indicated on the FAA approved civil or military airport layout plan, or by any other planning document submitted to the FAA by competent authority.

19. Volume to Capacity (V/C) Ratio — for the purposes of Art. 12, Traffic Performance Standards, the ratio of the volume of traffic on a Major Thoroughfare Link to the capacity of that Link as set forth in Table 12.B.2.C-1A, LOS D Link Service Volumes.

W. Terms defined herein or referenced in this Article shall have the following meanings:

1. Waiver — A request to alter a specific ULDC provisions where alternative solutions to Code requirements are provided, subject to standards, performance criteria, or limitations. Waivers are not intended to relieve specific financial hardship nor circumvent the intent of this Code. [Ord. 2012-027]

2. Waste — discarded material including but not limited to garbage, rubbish, yard trash, litter, non-combustible refuse, and industrial wastes.

3. Wastewater Residuals — the solid, semisolid, or liquid residue removed during the treatment of municipal wastewater. Not included is the treated effluent or reclaimed water from a domestic wastewater treatment plant.

4. Watercourse
   a. Any stream, canal, ditch, or other natural or artificial channel in which water normally flows within a defined bed, banks, or other discernible boundaries, either continuously or seasonally, whether or not such flow is uniform or uninterrupted.  
   b. For the purposes of Art. 18, Flood Damage Prevention, a lake, river, creek, stream, wash, channel, or other topographic feature on or over which waters flow at least periodically. Watercourse includes specifically designated areas in which substantial flood damage may occur. [Ord. 2004-013]

5. Wastewater Residuals (Dry) — domestic wastewater residuals that contain 65 percent solids or greater, by weight.

6. Water Management Tract — for the purposes of Art. 11, Subdivision, Platting, and Required Improvements, a parcel of land under single ownership, identified and created as a single unit on a plat or other instrument of record, established for the purpose of delineating a complete facility or unified.
area to be utilized for detention, retention, or groundwater recharge of stormwater runoff prior to discharge from a development site.

7. **Water Reclamation Production Facility** – These facilities can either treat raw wastewater to irrigation quality water or treat secondary effluent to tertiary standards for use as irrigation water. These facilities can be accessory to a Wastewater Treatment Plant or can be stand-alone facilities. They are comprised of pump and filtration systems, storage tanks, electrical sheds, and other facilities as necessary to process, store, and distribute irrigation quality water to an identified and reasonably proximate service area. [Ord. 2007-013]

8. **Water or Wastewater Treatment Plant**
   a. **Water or Wastewater Treatment Plant, Open Process** – These are also known as “conventional” Water or Wastewater Treatment Plants and use a series of unenclosed tanks without roof structures to treat raw water to drinking water standards. [Ord. 2007-013] [Ord. 2017-007]
   b. **Water or Wastewater Treatment Plant, Closed Treatment** – These plants treat raw water to drinking water standards within the confines of one or more relatively small, fully enclosed buildings. [Ord. 2007-013] [Ord. 2017-007]

9. **Water Supply System or Water Supply Facility or Water System or Water Facility** – for the purposes of **Art. 15.B, PBC Environmental Control Rule II – Drinking Water Supply Systems**, or “Water Supply Facility” or “Water System” or “Water Facility,” means any or all works and auxiliaries for collection, treatment, storage, and distribution of water from the source or sources of supply to the consumer or processing plants including ice making vending machines, water vending machines, and bottled water plants.

10. **Water System, Central** – for the purposes of **Art. 15, Health Regulations**, a regional water supply system owned and operated by a municipality, county, special district, or other governmental entity, which provides water service to several developments located within its service area.

11. **Water System, Individual** – for the purposes of **Art. 15, Health Regulations**, a privately-owned water supply system which provides water service to a single development because of unavailability of a central water system.

12. **Water Surface Elevation** – for the purposes of **Art. 18, Flood Damage Prevention**, the height, in relation to the datum on the current Flood Insurance Rate Map of floods of various magnitudes and frequencies in the floodplains of coastal or riverine areas. [Ord. 2004-013] [Ord. 2017-026]

13. **Water Table Elevation** – for the purposes of **Art. 15, Health Regulations**, as defined by **Chapter 64E-6, F.A.C.**.

14. **Water Treatment Facility** – a facility designed for treatment of ground or surface water for potable and sanitary purposes, with a design capacity of more than 10,000 gallons per day.

15. **Water Well**
   a. Source of water used for drinking, culinary, sanitary, and other domestic purposes.
   b. For the purposes of **Art. 15, Health Regulations**, any excavation that is drilled, cored, bored, washed, driven, dug, jetted, or otherwise constructed when the intended use of such excavation is to conduct groundwater from a source bed to the surface by pumping or natural flow.

16. **Waters of the State** – waters, as defined in **F.S. § 403.031(12)**, subject to compliance with State Water Quality Standards adopted pursuant to **F.S. ch. 403** and set forth in Chapter 17-3, F.A.C.

17. **Watershed** – the land area, which contributes to the total flow of water entering a receiving stream or water body.

19. **Well** – for the purposes of **Art. 14, Environmental Standards**, any excavation that is drilled, cored, bored, washed, driven, dug, jetted, or otherwise constructed when the intended use of such excavation is to conduct groundwater from a source bed to the surface by pumping, natural flow, or other method.

20. **Wellfield**
   a. For the purposes of **Art. 14, Environmental Standards**, an area of land which contains one or more than one well for obtaining water.
   b. For the purposes of **Art. 15, Health Regulations**, an area of land which contains more than one potable well that is designed for a pumping rate of at least 100,000 gallons per day.

21. **Wellfield Zones 1, 2, 3 and 4** – for the purposes of **Art. 14, Environmental Standards**, Zones of Influence delineated by iso-travel time contours around public water supply wellheads. Zone 1 is identified as the land area situated between the well(s) and the 30-day travel time, Zone 2 is the land area situated between the 30-day travel time and the 210-day travel time, and Zone 3 is the land area situated between 210-day and the 500-day travel time contours. Zone 4 is determined by the area
situated beyond the 500-day travel time contour and within the one-foot drawdown contour. Zones of Influence maps are maintained by ERM. [Ord. 2013-001]

22. **West County Agricultural Area (WCAA)** – the WCAA area is bounded roughly by Lake Okeechobee, Palm Beach-Hendry County Line, and the SFWMD Levees L-4, L-5, L-6, L-7, and L-8.

23. **Wet Detention/Retention** – detention or retention in a storage facility not designed, constructed, and operated so as to provide dry detention/retention.

24. **Wetland** – any persistent or intermittent water body or area characterized by the dominance of those submerged or transitional wetland species listed in the Chapter 17-301, F.A.C. or located within or up to three miles directly offshore of PBC. Dominance shall be defined in accordance with Chapter 17-301, F.A.C. and shall be determined in the appropriate plant stratum (canopy, sub-canopy, or ground cover) as outlined in Chapter 17-301, F.A.C.

25. **Wettest Season** – for the purposes of Art. 15, Health Regulations, as defined by Chapter 64E-6, F.A.C.

26. **Wildlife Corridor** – a continuous corridor of habitat, with a width of at least one mile, that is established by linking conservation areas, wildlife preserves, sanctuaries, refuges, parks, open space areas, and agricultural areas to provide a pathway for wildlife movement.

27. **Whip Antenna** – for the purposes of Art. 4.B.9, Commercial Communication Towers, a cylindrical or similarly shaped omnidirectional antenna utilized for transmission or receiving of electronic communications.

28. **Woodworking or Cabinetmaking** – an establishment engaged in the production of finished products from wood.

29. **Work** – for the purposes of Art. 11, Subdivision, Platting, and Required Improvements, all required construction as shown on approved construction plans and specifications for all facilities and features of any kind which are required, related to the process of subdivision of land under Art. 11, Subdivision, Platting, and Required Improvements.

X. **Terms defined herein or referenced in this Article shall have the following meanings:**

Y. **Terms defined herein or referenced in this Article shall have the following meanings:**

1. **Yard** – any area that lies between the principal building or buildings and the nearest lot line. [Ord. 2011-001]

2. **Yard Waste** – Vegetative matter resulting from landscaping maintenance and may include materials such as tree and shrub trimmings, grass clippings, palm fronds, and stumps. [Ord. 2011-001]

Z. **Terms defined herein or referenced in this Article shall have the following meanings:**

1. **Zones of Influence** – for the purposes of Art. 14, Environmental Standards, zones delineated by isotravel time contours and the one-foot contour within cones of depression of wells which obtain water from the unconfined or surficial aquifer system. These zones are calculated, based on the rate of movement of groundwaters in the vicinity of wells at a specific pumping rate.

2. **Zones of Influence Maps** – for the purposes of Art. 14, Environmental Standards, Zones of Influence contour lines that overlay the latest digital ortho-photography prior to BCC adoption at scales determined by ERM showing the location on the ground of the outer limits of Zones of Influence for present and future public potable water supply wells and wellfields permitted for 100,000 gallons per day or more. [Ord. 2006-036]

   5. Effect of an Issuance of a DO ........................................................................................................... 37
E. Type 2 Variance .................................................................................................................................... 37
   1. Purpose .......................................................................................................................................... 37
   2. Prohibition ...................................................................................................................................... 37

3. Type 2 Variance Applications ................................................................................................................. 37
4. Sequence of Submittal ............................................................................................................................... 38
5. Application Requirements.......................................................................................................................... 38
6. Standards for Zoning or Subdivision Variance ....................................................................................... 38
7. Noise Variance ......................................................................................................................................... 38
8. Effect of Issuance of a DO ....................................................................................................................... 38
F. Development Order Abandonment (ABN) ............................................................................................... 39
  1. Purpose ....................................................................................................................................................... 39
  2. Authority ...................................................................................................................................................... 39
  3. Applicability .............................................................................................................................................. 39
  4. Sequence of Submittal ............................................................................................................................... 39
  5. Application Requirements.......................................................................................................................... 40
  6. Standards.................................................................................................................................................... 40
  7. Scheduling of a Hearing............................................................................................................................. 40
G. Public Ownership (PO) Deviations ............................................................................................................ 41
  1. Purpose ....................................................................................................................................................... 41
  2. Applicability .............................................................................................................................................. 41
  3. Standards.................................................................................................................................................... 41
  4. Effect of Issuance of a DO .......................................................................................................................... 41

Section 8 Conditions of Approval .............................................................................................................. 41
  A. BCC Approved DOs ........................................................................................................................................... 41
  B. ZC Approved DOs ...................................................................................................................................... 41

Section 9 Effect of Issuance of a Development Order ...................................................................................... 42
  A. General ....................................................................................................................................................... 42
     1. Zoning Plan Compliance and Initiation of Use ....................................................................................... 42
  B. Type 2 Variance ...................................................................................................................................... 42
     1. Time Limitation ...................................................................................................................................... 42
     2. Conforming .......................................................................................................................................... 42

CHAPTER C ADMINISTRATIVE PROCESSES.................................................................................................. 43

Section 1 Purpose ............................................................................................................................................... 43

Section 2 Sufficiency Review .......................................................................................................................... 43
  A. Sufficiency .................................................................................................................................................. 43
     2. Exemptions .......................................................................................................................................... 43
     3. Application Review ............................................................................................................................... 43
  B. Insufficiency .......................................................................................................................................... 43
  C. Time Extension ....................................................................................................................................... 44
  D. Administrative Withdrawal ..................................................................................................................... 44

Section 3 General ............................................................................................................................................... 44
  A. Finalization of BCC or ZC DOs ................................................................................................................. 44
     2. DRO Expedited Review (DROE) ............................................................................................................. 44
     3. Concurrent Review .................................................................................................................................. 44
  B. Administrative Approval .......................................................................................................................... 45
     2. Concurrent Review ................................................................................................................................ 45

Section 4 Review, Resubmittal, and Final Decision ....................................................................................... 45
  A. Review ....................................................................................................................................................... 45
     3. Zoning Agency Review (ZAR) ................................................................................................................ 45
  B. Action by the DRO for DO Administrative Applications, except Type 1 Variance .................................. 45
     1. Not Approved ....................................................................................................................................... 45
Section 5. Types of Applications ................................................................. 47
A. Finalization of BCC or ZC DOs ............................................................ 47
1. DRO Expedited Review (DROE) ....................................................... 47
2. Exceptions .................................................................................... 47
B. Administrative Approval ................................................................. 47
1. Purpose ...................................................................................... 47
2. Standards .................................................................................. 48
3. Conditions ................................................................................ 48
4. Effect of an Issuance of a DO ....................................................... 48
C. Administrative Modifications to Prior DOs ................................. 48
1. Purpose ...................................................................................... 48
2. Modifications to BCC or ZC Approved Plans ............................ 48
3. Standards .................................................................................. 48
4. Applicability ............................................................................. 48
5. Other Modifications .................................................................. 51
6. Conditions ................................................................................ 51
7. Effect of an Issuance of a DO for Administrative Modifications .... 51
D. Temporary Use ............................................................................... 51
1. Purpose ...................................................................................... 51
2. Prior Approved and Authorized Special Permits ....................... 51
3. PAA ......................................................................................... 51
4. Sufficiency Determination .......................................................... 51
5. Review and Final Decision .......................................................... 51
6. Standards .................................................................................. 51
7. Conditions ................................................................................ 51
8. Limited Timeframe .................................................................... 52
9. Expiration .................................................................................. 52
10. Discontinuance ......................................................................... 52
11. Abandonment .......................................................................... 52
12. Violation of Code Requirements or Conditions of Approval .... 52
E. Type 1 Variance ............................................................................. 52
1. Purpose ...................................................................................... 52
2. Application Procedures ............................................................... 52
3. Variance Request Limitations ..................................................... 52
4. Standards .................................................................................. 53
5. Staff Report and Recommendation ............................................ 53
6. Conditions ................................................................................ 53
7. Time Limitation ......................................................................... 53
8. Effect of a Type 1 Variance DO ................................................... 53
F. Type 1 Waiver .............................................................................. 54
1. Purpose ...................................................................................... 54
2. Applicability ............................................................................. 54
3. Standards .................................................................................. 54
4. Conditions ................................................................................ 54
5. Effect of a Type 1 Waiver DO ....................................................... 54
G. Development Order Abandonment (ABN) ................................. 55
1. General ..................................................................................... 55
2. Authority ................................................................................... 55
3. Applicability.................................................................................................................................55
4. Sequence of Submittal ...................................................................................................................55
5. Application Requirements ...........................................................................................................55
6. Standards......................................................................................................................................55

Section 6 Conditions of Approval ................................................................................................56
A. DRO Authority .....................................................................................................................................56
2. Condition Limitations ......................................................................................................................56
C. Completion of Conditions ..............................................................................................................56

Section 7 Effect of an Issuance of a DO ..........................................................................................56

Section 8 Applications Not Issuing a Development Order ..........................................................57
A. Zoning Confirmation Letter (ZCL)................................................................................................57
1. Purpose ........................................................................................................................................57
2. Types of ZCL .....................................................................................................................................57
3. Processing ......................................................................................................................................57
4. ZCL Response ................................................................................................................................57
B. Administrative Inquiry (AI) ............................................................................................................58
1. Purpose ........................................................................................................................................58
2. Applicability .....................................................................................................................................58
3. Procedures ......................................................................................................................................58
C. Reasonable Accommodation .........................................................................................................58
1. Purpose ........................................................................................................................................58
2. Applicability .....................................................................................................................................58
3. Notice to the Public of Availability of Accommodation .................................................................58
4. Application Procedures ................................................................................................................58

CHAPTER D ULDC PRIVATELY INITIATED AMENDMENT (PIA) ..................................................61
Section 1 Purpose and Intent ..............................................................................................................61
Section 2 Authority ...............................................................................................................................61
Section 3 Standards .............................................................................................................................61
Section 4 Mandatory Pre-Application Appointment (PAA) .............................................................62
A. Applicability .....................................................................................................................................62
B. Purpose ...........................................................................................................................................62
C. PAA Requirements ..........................................................................................................................62
D. Decision ..........................................................................................................................................62

Section 5 Application Procedures .....................................................................................................62
A. General Overview .............................................................................................................................62
1. Phase 1 ...........................................................................................................................................62
2. Phase 2 ...........................................................................................................................................62
B. Application Requirements ..............................................................................................................62
C. Sufficiency Review ..........................................................................................................................62
1. Sufficiency .......................................................................................................................................62
2. Insufficiency .......................................................................................................................................62
3. Time Extension ..................................................................................................................................63
4. Administrative Withdrawal ..............................................................................................................63
D. Review and Resubmittal, Phase 1 and Phase 2 ............................................................................63
1. Staff Report and Recommendation .................................................................................................63
E. Application Modification after Completion of Staff Review .........................................................63
F. Scheduling .......................................................................................................................................63
1. Phase 1................................................................................................................................. 63
2. Phase 2................................................................................................................................. 63

Section 6  Notification .................................................................................................................. 64

A. Applicability ......................................................................................................................... 64
B. Newspaper Publication ......................................................................................................... 64
   1. LDRC Meeting .................................................................................................................. 64
   2. BCC Public Hearings ......................................................................................................... 64
C. Postponements ....................................................................................................................... 64

Section 7  Action by LDRAB and LDRC ..................................................................................... 64

A. Advisory Board ..................................................................................................................... 64
   1. Meeting .............................................................................................................................. 64
   2. Recommendation .............................................................................................................. 64
B. LDRC ..................................................................................................................................... 64

Section 8  Action by the BCC ..................................................................................................... 64

A. Public Hearing ....................................................................................................................... 64
B. Postponements, Continuance, or Remand ........................................................................... 64
C. Decision .................................................................................................................................. 64
   1. Phase 1 .............................................................................................................................. 64
   2. Phase 2 .............................................................................................................................. 64
D. Conduct at Hearing ............................................................................................................... 64

Section 9  Appeals ....................................................................................................................... 65

CHAPTER E  MONITORING OF DEVELOPMENT ORDERS (DOs) AND CONDITIONS OF APPROVAL...... 65

Section 1  General ...................................................................................................................... 65

A. Purpose and Intent ................................................................................................................ 65
B. Applicability ........................................................................................................................ 65
   2. Responsibilities .................................................................................................................. 65
C. Exemptions ........................................................................................................................... 65

Section 2  Monitoring Elements ................................................................................................. 66

A. Commencement of Development ......................................................................................... 66
B. Commencement of Development is Not ............................................................................ 66
C. Time Limitations for Commencement ................................................................................. 66
D. Time Limitations for Buildout …......................................................................................... 66
E. DOs with Conditions of Approval .................................................................................... 66
F. Community Development District Ordinances with Conditions of Approval .................... 66
G. FLUA Ordinances with Conditions of Approval .............................................................. 66
H. Notification Prior to a Due Date ......................................................................................... 66

Section 3  Procedures for Compliance ....................................................................................... 67

A. General .................................................................................................................................. 67
B. Administrative Extension of Time ....................................................................................... 67
C. Status Reports ....................................................................................................................... 67
   1. General .............................................................................................................................. 67
   2. Scheduling ......................................................................................................................... 67
   3. Staff Report and Recommendation .................................................................................. 67

APPLICATION PROCESSES AND PROCEDURES

CHAPTER A  GENERAL

Section 1  Purpose

To establish procedures and standards for Zoning and Planning applications. This Article is organized under the following Chapters with specific requirements pertaining to each type of application or process. In addition, Art. 2.G, Decision Making Bodies specifies the powers and duties of each Authority. [Ord. 2018-002]

A. Chapters A through C – Zoning Applications related to the Legislative, Quasi-judicial, or Administrative processes; [Ord. 2018-002]
B. Chapter D – Privately Initiated Amendments to the Unified Land Development Code; [Ord. 2018-002]
C. Chapter E – Monitoring of Development Orders; [Ord. 2018-002]
D. Chapter F – Concurrency (Adequate Public Facility Standards) for Development Orders; [Ord. 2018-002]
E. Chapter G – Decision Making Bodies; [Ord. 2018-002]
F. Chapter H – Comprehensive Plan Amendments; and, [Ord. 2018-002]

Section 2  Zoning Applications

Chapters A through D address application processes of the Zoning Division. These processes are generally classified as legislative, quasi-judicial, and administrative, and are reviewed by various County agencies and presented to the applicable decision making bodies or person for consideration. Both legislative and quasi-judicial processes are subject to the public hearing procedures. For the purpose of this Article, the term “public hearing” refers to the legislative and quasi-judicial processes. [Ord. 2018-002] [Ord. 2020-001]

A. Applicability
The provisions in this Article shall apply to all Zoning applications unless otherwise specified. Quasi-judicial and Administrative Approvals of applications will result in the issuance of DOs. DOs run with the land and may be transferred to new owners unless otherwise stipulated. [Ord. 2018-002]

B. Definitions

C. Application Types and Authorities
For the purposes of this Article, the authority of the Board of County Commissioners, Zoning Commission and Development Review Officer shall be limited to the powers and duties pursuant to Art. 2.G, Decision Making Bodies on those applications specified below. [Ord. 2006-036] [Ord. 2018-002]

1. Board of County Commissioners (BCC)
The BCC shall make a final decision on the following types of applications: [Ord. 2018-002]
### Table 2.A.2.C – Board of County Commissioners, Legislative and Quasi-Judicial Processes

</tr>
</tbody>
</table>

**Notes:**

1. Only rezoning to a PDD or TDD will issue a DO. A rezoning to a Standard District with a COZ may result in the issuance of a DO.
3. This is not considered as quasi-judicial process, however, it is subject to the Public Hearing process.
4. PO Deviations reviewed by the BCC do not include those PO Deviations described in Art. 11, Subdivision, Platting, and Required Improvements that are reviewed and approved or denied by the County Engineer. [Ord. 2019-005]

#### 2. Zoning Commission (ZC)

The ZC shall make a final decision on the following types of applications. [Ord. 2018-002]

**Table 2.A.2.C – Zoning Commission, Quasi-Judicial Processes**

</tr>
</tbody>
</table>

**Notes:**

1. Refer to Art. 2.B.7.E, Type 2 Variance for specific provisions where it indicate that the ZC is not authorized to grant variances from Code regulations with prohibited provisions.
2. This is not considered as quasi-judicial; however it is subject to the Public Hearing process.

#### 3. Development Review Officer (DRO)

The DRO, shall make a final decision on the types of applications indicated in Table 2.C.3, DRO, Administrative Processes. [Ord. 2006-036] [Ord. 2018-002] [Ord. 2018-018]
Section 3 Initiation of Applications

Applications may be submitted to the Zoning Division by the following authority: PBC Official, owner, agent who is authorized in writing to act on the owner’s behalf, or person having a written contractual interest in the land for which the amendment or Development Permit is proposed. Applications shall be submitted in accordance with the dates and fees established by the Zoning Division. [Ord. 2018-002]

A. Established Dates and Fees for Zoning Division Applications

1. The Zoning Director shall publish an Annual Zoning Calendar, as may be amended, providing dates and deadlines for the following: [Ord. 2018-002]
   a. Submittals and Resubmittals of an application by the Applicant; [Ord. 2018-002] [Ord. 2020-001]
   b. Sufficiency and Insufficiency determination by the DRO; [Ord. 2018-002] [Ord. 2020-001]
   c. Issues and Comments identified by Staff;
   d. Certification of an application for Public Hearings; and, [Ord. 2018-002]
   e. Hearing dates. [Ord. 2018-002]

2. All other dates and deadlines for the application processes shall be specified in the Code. If there is a conflict in the dates between the Code and the Calendar, the Code shall prevail. [Ord. 2018-002]

3. Applications that are submitted to the Zoning Division shall be accompanied by a fee established by the BCC. All fees shall be paid at the time of the submittal of the applications.

4. Any request for a refund of fees shall be in writing, based on the current PZB Refund Policy, and subject to approval by the Executive Director of Planning, Zoning and Building, or designee. [Ord. 2018-002] [Ord. 2020-001]

Section 4 Concurrent or Separate Applications

Applications may be submitted to the applicable Division concurrently or separately subject to the following:

A. Land Use Amendments

If a Small Scale land use amendment requires a Rezoning, Conditional Use, DOA, or ABN application, the applications shall be reviewed and considered by the BCC concurrently. The Applicant shall submit a Master Plan and/or Site Plan as part of the zoning application. The zoning application shall be submitted on the date indicated on the Annual Zoning Calendar within 45 calendar days of receipt of the land use amendment application. If a complete zoning application is not submitted, the land use amendment shall be administratively withdrawn. [Ord. 2006-036] [Ord. 2009-040] [Ord. 2017-007] [Ord. 2018-002]

B. Zoning Applications

Applications for DOs on the same property may be consolidated for review, subject to the approval by the Zoning Director. When applications for DOs are consolidated, the review period shall not be less than the timeframe established for the application with the longest review period. [Ord. 2018-002]

C. Type 2 Waivers and Type 2 Variances

An application for a Type 2 Waiver or a Type 2 Variance may be submitted concurrently or separately subject to the approval of the Zoning Director. Applications that are contingent upon the approval of Variances must be submitted separately. [Ord. 2018-002]

D. Type 2 or 3 Concurrent Review

Concurrent Review allows an Applicant to submit applications to different County Agencies for simultaneous review. The Final Zoning Plans may be approved concurrently with the approval of other Division or Department applications. [Ord. 2018-002]

1. Types of Concurrent Review

There are two types of Concurrent Review based on the following: [Ord. 2018-002]

   a. Type 2 Concurrent Review
      1) Zoning Division for Final Plan Approval and Land Development Division for Plat Review; or [Ord. 2018-002]
      2) Zoning Division for Final Plan Approval and Building Division for Permit Review.

   b. Type 3 Concurrent Review
      Zoning Division for Final Plan Approval; Land Development Division for Plat Review; and, Building Division for Permit Review. [Ord. 2018-002]

2. PAC

Applications for Concurrent Review shall be subject to the PAC requirements in accordance with Art. 2.A.5, Pre-Application Conference (PAC) or Pre-Application Appointment (PAA). The Applicant shall have six months from the date of the issuance of the PAC written notification to submit the Concurrent Review application to the DRO. [Ord. 2018-002] [Ord. 2020-020]
3. Submittal to Other Agencies
Within ten days of submittal of the Concurrent Review Final Plan application to the DRO, the Applicant shall submit the Concurrent Review Plat application(s) to the Land Development Division or the Permit application(s) to the Building Division, based on the type of Concurrent Review. [Ord. 2018-002]

Section 5 Pre-Application Conference (PAC) and Pre-Application Appointment (PAA)

It is mandatory for the Applicants to meet with Staff prior to the official submittal of applications that are listed in Table 2.A.5, PAC and PAA to identify issues related to the proposed request(s), and ensure the requests are in compliance with the applicable Comprehensive Plan or Codes. [Ord. 2018-002]

[Ord. 2018-002] [Ord. 2019-005]

Notes:
1. A Conceptual Plan shall be submitted to be reviewed as part of a PAC application.
2. Applicants shall indicate whether they have questions related to the request(s) for Staff to address before submitting for the Concurrent Review.
3. The Zoning Director in consultation with the Applicant may determine a formal PAA is not required based on general discussions on this request. [Ord. 2019-005]

A. Pre-Application Conference (PAC)
The purpose of the PAC is to provide the Applicant an opportunity to submit an application and a Conceptual Plan for review by the Zoning Division and other County Agencies. [Ord. 2018-002]

1. Applicant's Request and Responsibility
   A PAC application shall include, but not limited to, the following: [Ord. 2005-002] [Ord. 2010-005] [Ord. 2010-022] [Ord. 2018-002]
   a. Identification of the proposed uses as defined in Art. 4, Use Regulations; [Ord. 2018-002]
   b. Identification of the requested processes; [Ord. 2018-002]
   c. Application of Code requirements specific to the use(s) of the subject property; [Ord. 2018-002]
   d. Review of the proposed Conceptual Plan for those applications in the IRO or PRA; and, [Ord. 2018-002]
   e. Specific questions pertinent to the application for County Agencies to respond. [Ord. 2018-002]

2. Sufficiency and Insufficiency
   The application shall follow the procedures as provided in Art. 2.B, Public Hearing Processes and Art. 2.C, Administrative Processes. [Ord. 2018-002]

3. Additional IRO and PRA Requirements
   a. PAC Application
      The PAC application shall identify and document any proposed Variances or Waivers; and include any previous BCC Conditions of Approval, if applicable. [Ord. 2010-005] [Ord. 2012-027] [Ord. 2018-002]
   b. Conceptual Plan
      The Conceptual Plan shall be prepared in compliance with the applicable type of Plans pursuant to the Zoning Technical Manual, Title 2, Plans. The plan shall indicate and delineate the applicable items listed in the Table below: [Ord. 2010-005] [Ord. 2018-002]

[Ord. 2010-005] [Ord. 2010-022] [Ord. 2017-007] [Ord. 2018-002]

4. Review Summary
Within ten days after the date of the PAC, the DRO shall provide the Applicant with a written response to the Applicant’s questions. [Ord. 2010-005] [Ord. 2018-002]

B. Pre-Application Appointment (PAA)
The purpose of a PAA is to provide the Applicant an opportunity to discuss the proposed request(s) with Zoning Division Staff prior to the official submittal of an application. [Ord. 2018-002]

1. Applicant’s Request and Responsibility
The Applicant shall request the PAA and specify whether the attendance of the other County Agencies is required. Prior to the PAA, the Applicant shall specify the requests, prepare a list of questions related to the subject property, and provide a copy of relevant information regarding the proposed development to the DRO.

a. For a DOA application, it shall be the responsibility of the Applicant to research and review prior approved files, which includes but not limited to, plans, resolutions, and other relevant documents prior to the PAA. [Ord. 2018-002]

b. For a PO Deviation application, it is the responsibility of the Applicant to complete the Application including the Justification Statement, and provide a draft copy of these documents for review at the time of the PAA. [Ord. 2019-005]

Section 6 Zoning Application Procedures

All Zoning applications shall be submitted to the Zoning Division. Applications shall be reviewed for sufficiency prior to the initiation of review by the DRO, unless otherwise stated in this Code. It is recommended that applications that were subject to a review by the DRO under a PAC or PAA remain consistent with what was requested or discussed at the conference or appointment. Amendments to the application request(s) that are different from what was discussed at the PAC or PAA shall be documented in the Justification Statement of the application. [Ord. 2005-041] [Ord. 2018-002]

A. Zoning Application Requirements
Applications shall be submitted in a manner and forms established by the Zoning Division unless otherwise stated herein. The Applicant shall also provide additional application requirements specific to a zoning district, use, or process that are referenced in the applicable Sections of the ULDC. [Ord. 2005-041] [Ord. 2009-040] [Ord. 2018-002]

1. Justification Statement
Applicants shall provide a Justification Statement, which shall include but not limited to: [Ord. 2018-002]

a. Summary of the request(s) specifying the types of applications and approval processes; [Ord. 2018-002]

b. Project history with prior resolutions, if applicable; [Ord. 2018-002]
c. Analyses of the applicable Standards pursuant to Art. 2.B, Public Hearing Processes and Art. 2.C, Administrative Processes; and, [Ord. 2018-002]
d. Any other pertinent information related to the subject property. [Ord. 2018-002]

B. Plan Requirements

All applications, excluding Comprehensive Plan Amendments and Privately Initiated Amendments, shall require the submittal of plan(s) to the DRO, except where indicated otherwise. The type of plan shall be based upon the type of application request(s), and shall be prepared to include graphics and tabular data consistent with the Zoning Technical Manual requirements, as amended. The plan shall provide sufficient information for the DRO to review in order to render comments on the application for compliance with the applicable standards pursuant to Art. 2.B, Public Hearing Processes and Art. 2.C, Administrative Processes. In addition, the plan shall be prepared in compliance with the following: [Ord. 2009-040] [Ord. 2015-006] [Ord. 2017-002] [Ord. 2018-002]

1. The Land Development Design Standards Manual (LDM) published and maintained by the Land Development Division; and [Ord. 2009-040] [Ord. 2018-002]
2. Plan labeling standards as follows, unless otherwise stated herein; [Ord. 2009-040] [Ord. 2018-002]
   a. Plans requiring BCC or ZC’s approval shall be labeled “Preliminary.” After the BCC or ZC approves the DOs, the DRO shall finalize the Preliminary Plans to ensure consistency with the approved DOs. These Plans shall be labeled as Final Plans at the Final DRO approval process. [Ord. 2009-040] [Ord. 2018-002]

3. Master Plan

The Master Plan shall be the controlling document for a PDD listed below. All development site elements including, but not limited to: ingress and egress; density; and, intensity in the PDD shall be consistent with the Master Plan. All subdivisions and plats shall be consistent with the Master Plan. In cases of conflict between plans, the most recently approved BCC plan for those DOs that have no Final DRO plans, shall prevail. [Ord. 2009-040] [Ord. 2018-002]

a. Preliminary Master Plan (PMP) for Public Hearing Approval
   The BCC shall approve a PMP for the following PDDs: PUD; PIPD; MHPD; RVDP; PDDs with an MLU or EDC Future Land Use designation; and, a PUD within the Lion Country Safari (LCS) where the transfer of density from other PDDs within the LCS is proposed. The BCC may approve a PMP for an MUPD and MXPD that utilizes more than one FLU designation in order to define location of uses and property development regulations. [Ord. 2009-040] [Ord. 2010-022] [Ord. 2011-016] [Ord. 2018-002] [Ord. 2019-005]
   1) Preliminary Site Plan (PSP) or Subdivision Plan (PSBP) Options
      For a PUD application with no proposed subdivision, the Applicant may submit a PSP prior to certification for public hearing process, which includes but not limited to: layout of lots and buildings, ingress and egress, recreation areas, or exemplary design standards, if applicable for the purpose of the BCC’s consideration. For a PUD with proposed subdivision of lots, the Applicant, may submit a PSBP pursuant to Preliminary Subdivision Plan. [Ord. 2009-040] [Ord. 2018-002]
   2) Lion Country Safari
      A PMP shall be required for any LCS PUD application that proposes to transfer density from the MUPD or RVDP in accordance with FLUE Objective 1.11, Lion Country Safari Overlay. All other Plans within the LCS shall be consistent with the PMP. [Ord. 2011-016] [Ord. 2018-002]

b. Final Master Plan (FMP) for Public Hearing Processes
   For applications with a PMP, the Applicant shall submit a FMP to the DRO for finalization of the BCC or ZC approved DO(s). The FMP shall be prepared consistent with the BCC or ZC approved PMP, and all modifications shall be approved by the BCC or ZC unless the proposed changes are required to meet Conditions of Approval or are in accordance with the ULDC, whichever is more restrictive. [Ord. 2009-040] [Ord. 2018-002]

4. Site Plan

The Site Plan shall be the controlling plan for Conditional Uses or PDDs listed below. All development site elements including, but not limited to: ingress and egress; density; and intensity in the proposed application, shall be consistent with the Site Plan. All plats shall be consistent with the Site Plan. In cases of conflict between plans, the most recently approved BCC Preliminary Plan(s) for those DOs that have no Final Plan(s) shall prevail. [Ord. 2009-040] [Ord. 2017-007] [Ord. 2018-002]
a. **Preliminary Site Plan (PSP)**
The BCC shall approve a PSP for the following applications: Class A Conditional Use, MXPD, MUPD and equivalent previously approved planned developments. The ZC shall approve a PSP for a Class B Conditional Use request. [Ord. 2009-040] [Ord. 2017-007] [Ord. 2018-002]

b. **Final Site Plan (FSP) with Public Hearing Processes**
After a PSP is approved by the BCC or ZC, the Applicant shall submit a FSP to the DRO for finalization of the BCC or ZC approved DO(s). The DRO shall review the FSP for consistency with the PSP, applicable code requirements, BCC or ZC Conditions of Approval. All modifications to the PSP that are shown on the FSP must be approved by the BCC or ZC unless the proposed changes are required to meet Conditions of Approval or are in accordance with the ULDC, whichever is more restrictive. [Ord. 2009-040] [Ord. 2018-002]

c. **Final Site Plan (FSP) for Administrative Approval**
The DRO shall approve a FSP for:

1) Any requests for uses that have a “D” in the Use Matrices in Art. 4, Use Regulations; or [Ord. 2018-002]

5. **Subdivision Plan**
The Subdivision Plan shall be the controlling plan for Conditional Uses that are subject to the subdivision process. All development site elements including, but not limited to: ingress and egress; density; and intensity in the proposed project, shall be consistent with the Subdivision Plan. In cases of conflict between plans, the most recently approved BCC Preliminary Plan(s) for those DOs that have no Final DRO plans shall prevail. All plans and plats shall be consistent. [Ord. 2009-040] [Ord. 2010-005] [Ord. 2017-007] [Ord. 2018-002]

a. **Preliminary Subdivision Plan (PSBP) for Public Hearing Processes**
The DRO shall review and certify a PSBP for any applications that are subject to the submittal requirement of a PMP, and which involves in the subdivision of land to be platted. The Applicant may submit a PSBP prior to certification for public hearing process, which includes but not limited to: layout of lots, exemplary design standards, ingress and egress, density for the purpose of a BCC’s consideration. [Ord. 2009-040] [Ord. 2018-002]

b. **Final Subdivision Plan (FSBP) for Public Hearing Processes (Off-The-Board)**
After a PSBP is approved by the BCC or ZC, the Applicant shall submit a FSBP for parcels of land that are subject to subdivision to the DRO for finalization of the BCC or ZC approved DO(s). The FSBP shall be approved prior to submission of an application for a plat or other approval required by Art. 11, Subdivision, Platting, and Required Improvements. [Ord. 2009-040] [Ord. 2010-005] [Ord. 2018-002]

c. **Final Subdivision Plan (FSBP) for Administrative Approval**
The DRO shall approve a Final Subdivision Plan for: [Ord. 2009-040] [Ord. 2010-005]

1) Any subdivision of lots when the Zoning Director determines that it does not require the Public Hearing Approval Process. [Ord. 2009-040] [Ord. 2010-005]

d. **Exception**
A minor subdivision may be exempt from this Section subject to the approval of a Plat Waiver pursuant to Art. 11, Subdivision, Platting, and Required Improvements. [Ord. 2009-040]

6. **Regulating Plans – Optional**
When applicable, Regulating Plans shall provide a comprehensive graphic and written description of the project. [Ord. 2017-002]

a. **Thresholds**
Regulating Plan(s) may be submitted to the DRO for review and consideration under the following circumstances: [Ord. 2017-002] [Ord. 2018-002]

1) The Applicant may choose to provide design details to demonstrate the intent of the requests or the requests are in compliance with the Standards of the Code; [Ord. 2017-002]
2) Staff may recommend the submittal of the Regulating Plans due to the size and complexity of the application and site design; or, [Ord. 2017-002]
3) By a ZC or BCC Condition of Approval. [Ord. 2017-002]

b. **Submittal Requirements**
If submitted, the Plans shall be prepared in accordance with the Submittal Requirements, and consistent with the format and naming requirements pursuant to the Zoning Technical Manual.
Regulating Plans shall be drawn to scale or labeled with notes, specifications and dimension, and shall include where applicable, the following: [Ord. 2017-002] [Ord. 2018-002]

1) Street cross sections, including sidewalks, bike lanes, street trees, on street parking and lighting; [Ord. 2009-040] [Ord. 2017-002] [Ord. 2018-002]
2) Typical lot layouts for each housing type, including building envelope, screen enclosure/pool setbacks, and driveway access; [Ord. 2009-040] [Ord. 2017-002] [Ord. 2018-002]
3) Landscape buffer and interior landscaping details (plan view and cross section); [Ord. 2009-040] [Ord. 2017-002] [Ord. 2018-002]
4) Pedestrian circulation in accordance with Art. 3.E, Planned Development Districts (PDDs); [Ord. 2009-040] [Ord. 2017-002] [Ord. 2018-002]
5) Phasing pursuant to Art. 2.E, Monitoring of Development Orders (DOs) and Conditions of Approval; [Ord. 2009-040] [Ord. 2010-005] [Ord. 2017-002] [Ord. 2018-002]
6) Screening details; and, [Ord. 2009-040] [Ord. 2017-002] [Ord. 2018-002]

c. Other Plans
All other plans, including but not limited to: Phasing, Pedestrian or Vehicular Circulation, shall be submitted as Regulating Plans and label with the applicable name specifying the nature of the plan(s). Refer to the Zoning Technical Manual for examples. [Ord. 2018-002]

7. Landscape-Related Plans
Art. 7, Landscaping, identifies different types of landscape-related plans that are reviewed by the DRO for a final decision: Planting Plan, Landscape Plan, and Alternative Landscape Plan (ALP). All Plans shall be prepared consistent with the approved Master, Site, or Subdivision Plan. Application requirements, labeling of Plans, and approval procedures for the landscape-related plans shall be consistent, where applicable, with Art. 2.A.6.B, Plan Requirements and the Zoning Technical Manual, and Art. 7, Landscaping. All types of Landscape Plans shall be submitted at Building Permit, unless it is required to be submitted at Final Approval by the DRO through a Condition of Approval. The following Table summarizes the different types of Plans, applicability, and approval authority. [Ord. 2009-040] [Ord. 2016-042] [Ord. 2018-002]

[Ord. 2016-042] [Ord. 2018-002]

Notes:
1. Approval of Plan(s) must be completed prior to the issuance of a Building Permit, unless it is required to be approved at Final DRO by a Condition of Approval.
2. Applicant may submit the ALP concurrent with the DO application to garner support of the Waiver request(s). The ALP may be required as a Condition of Approval by the ZC, BCC, or DRO.
3. Landscape Plan(s) and ALP (except Planting Plan) shall be signed and sealed by a Florida-Licensed Professional Landscape Architect prior to the approval of a Building Permit. [Ord. 2009-040]
4. A Vegetation Disposition Chart may apply to all of the landscape-related plans, where a Site has existing native vegetation, even if no Waivers or Variances are being requested. Refer to the Technical Manual, Title 3, Landscape for the Vegetation Disposition Chart. [Ord. 2020-001]
5. An ALP may be submitted by the Applicant concurrently with a Waiver request to modify Landscape standards. The DRO may determine that the Waiver for Landscape requirements pursuant to Art. 7, Landscaping could be shown on a Site, Subdivision, or Regulating Plan in lieu of an ALP.
6. May be approved by the Building Division. The amount of required plant material shall be indicated on the applicable Building Division submittal form and installed prior to issuance of CO.
8. **Sign Plans**  
   [Art. 8, Signage](#), identifies two types of sign plans that are reviewed by the DRO for a decision: Master Sign Plan and Alternative Sign Plan (ASP). All Plans shall be prepared consistent with the approved DO, [Art. 8, Signage](#), and [Art. 2.A.6.B, Plan Requirements](#). The DRO may allow the proposed signs be shown on a Site, Subdivision, or Regulating Plan, whichever is most applicable. [Ord. 2009-040] [Ord. 2010-022] [Ord. 2016-042] [Ord. 2018-002]  
   a. **Thresholds**  
      1) The Applicant may submit a PMSP to the BCC or ZC for consideration and a decision. The BCC or ZC may impose a Condition of Approval on the proposed signs. [Ord. 2018-002]  
      2) The Applicant shall submit a Preliminary ASP for Sign Variances or Waivers to the ZC or BCC for consideration and a final decision. [Ord. 2018-002]  
      3) The Applicant shall submit the FMSP at Final DRO or at Building Permit Review. [Ord. 2018-002]  

### Section 7 Sufficiency Review  

The DRO shall determine whether the application is sufficient or insufficient by reviewing the required information provided in the application, and any additional data necessary to evaluate the application. Sufficiency review procedures specified in other Articles applicable to particular County Agencies may supersede these provisions, unless stated otherwise. Applications shall be subject to the requirements of [Art. 2.B.2, Sufficiency Review](#) for Public Hearing Processes and [Art. 2.C.2, Sufficiency Review](#) for Administrative Processes. [Ord. 2005-041] [Ord. 2011-016] [Ord. 2018-002] [Ord. 2020-001]  

### Section 8 Review and Decision  

All Zoning applications subject to the Public Hearing Process shall be reviewed and processed pursuant to [Art. 2.B, Public Hearing Processes](#). Applications that are subject to Administrative Approval shall be reviewed and processed pursuant to [Art. 2.C, Administrative Processes](#). [Ord. 2018-002]  

### Section 9 Development Order Abandonment (ABN)  

Abandonments of DOs that were approved by the BCC or ZC shall be subject to the requirements indicated in [Art. 2.B, Public Hearing Processes](#). Abandonments of DOs approved by the DRO shall be subject to the requirements indicated in [Art. 2.C, Administrative Processes](#). [Ord. 2018-002]  

### Section 10 Postponement, Remand, Suspension of Development Review, Withdrawal, and Denial of Application  

**A. Postponement and Remand**  
Postponement or remand of applications that were subject to the final decision of BCC or ZC shall be subject to the requirements indicated in [Art. 2.B, Public Hearing Processes](#). Applications that are subject to the final decision by the DRO shall be subject to the requirements indicated in [Art. 2.C, Administrative Processes](#). [Ord. 2018-002]  

**B. Suspension of Development Review**  
An application for a DO may be suspended during the pendency of a Code Enforcement proceeding pursuant to [Art. 10, Enforcement](#), or for any Code violation involving all or a portion of the land proposed for development, unless it is demonstrated in writing by the Applicant that suspension of development review processing could be adverse to the public interest. [Ord. 2018-002]  

**C. Withdrawal**  
The Applicant shall have the right to withdraw an application for a DO at any time prior to the final action on the application by the Decision Making Body or Person. Requests for withdrawal received by the PBC Official responsible for reviewing the application five days prior to a hearing or review date shall be granted without prejudice. Thereafter, the Decision Making Body or Person may make a motion on the application for withdrawal with or without prejudice. Withdrawal with prejudice prohibits the filing of a successive application, which is not materially different, as defined in this Section, for one calendar year. [Ord. 2018-002] [Ord. 2020-020]
D. Denial of Application
   1. Denial
      When an application is denied with prejudice, an application for a DO for all or a part of the same land shall not be considered for a period of one year after the date of denial. Denial with prejudice prohibits the filing of a successive application, which is not materially different, as defined in this Section, for one calendar year. [Ord. 2018-002]
   2. Exceptions
      The subsequent application involves a development proposal that is materially different from the prior proposal. For the purposes of this Section, an application for a Development Permit DO shall be considered materially different if it involves a change in intensity or density of 25 percent or more. [Ord. 2018-002]
   3. Reconsideration
      A majority of the members on the prevailing side of the Decision Making Body that made the final decision on the application determines that the prior denial was based on a material mistake of fact.

Section 11 Violation of Condition of DO

A violation of any condition in a DO shall be considered a violation of this Code. [Ord. 2018-002]
   A. The violation shall be rectified prior to any public hearing, public meeting, or DRO review on the issuance of any subsequent DO for that project, unless the subsequent application seeks to amend the condition that has been violated. Unless otherwise specified in the DO, an approved use must comply with all conditions prior to implementing the approval. [Ord. 2020-020]
   B. The violation shall be subject to any and all enforcement procedures available as provided by Art. 10, Enforcement and by all applicable laws and ordinances.

Section 12 Outstanding Liens or Fines

A. General
   Applications for properties that have outstanding liens or fines owed to PBC shall be restricted as follows: [Ord. 2018-002]
   1. Applications Subject to Public Hearing Processes
      The approving Decision Making Body shall impose a Condition of Approval requiring the payment of any outstanding liens or fines by a date certain or prior to a specific event; and [Ord. 2009-040] [Ord. 2018-002] [Ord. 2020-020]
   2. Applications Subject to Administrative Processes
      The DRO shall not approve the application until the payment of any outstanding liens or fines. [Ord. 2017-007] [Ord. 2018-002] [Ord. 2020-020]

B. Contest by the Applicant
   In the event litigation contesting the validity of the lien or fine is initiated prior to the application for the DO, the time for payment shall be established only after the conclusion of litigation. In this case, a condition shall be in place that requires the owner/developer to notify the County Attorney at Final Order, and if the lien is upheld, payment of the lien shall occur 35 days after the Final Order. [Ord. 2020-020]

Section 13 Misrepresentation

If there is evidence that an application was considered wherein there was misrepresentation, fraud, deceit, or a deliberate error of omission, the PBC Official responsible for the application shall initiate a rehearing to reconsider the DO. The applicable Authority shall approve, approve with new conditions, or deny the DO at the rehearing based on the applicable Standards. If evidence of misrepresentation, fraud, deceit, or a deliberate error of omission is discovered during the application review and approval process, the application shall be decertified and remanded to DRO for a re-review based on resubmitted information. [Ord. 2018-002]
Section 14  Appeal

A. General
Appeals from Decision Making Bodies and Officials shall be conducted as set forth in this Section unless stated otherwise herein. [Ord. 2011-016] [Ord. 2018-002]

B. Judicial Relief
1. Appeal of BCC Decision
Any Person aggrieved by a decision of the BCC on an application for a DO or Status Report may apply for judicial relief by the filing of a Petition for Writ of Certiorari in the Circuit Court of the Fifteenth Judicial Circuit in and for PBC, Florida, within 30 calendar days of the date the Zoning Resolution is filed with the Clerk of the Circuit Court. [Ord. 2018-002]

2. Appeal of Hearing Officer and ZC Variance Decisions
Any Person aggrieved by a decision of the Hearing Officer or the ZC on an application for a Type 2 Variance may apply for judicial relief by the filing of a Petition for Writ of Certiorari in the Circuit Court of the Fifteenth Judicial Circuit in and for PBC, Florida, within 30 calendar days of the decision. [Ord. 2006-036] [Ord. 2018-002]

C. Non-Judicial Relief
1. Standards
   a. Filing Time
   The appeal by the Applicant shall be filed within 20 days after the notice indicating the decision is mailed to the Applicant, unless stated otherwise. A written request for the appeal shall state the grounds for the objection and use established forms and procedures. [Ord. 2011-016] [Ord. 2018-002]
   b. Notification
   The applicable PBC Official responsible for the decision or an interpretation shall mail a written notification containing the date, time, and place of the appeal hearing to the Applicant, at least ten days prior to the hearing. [Ord. 2011-016] [Ord. 2018-002]

2. Processes
   a. Class B Conditional Use
   Any Person aggrieved by the decision of the Zoning Commission regarding a Class B Conditional Use may appeal that decision to the BCC according to the following: [Ord. 2011-016]
   1) The BCC shall consider the appeal petition within 60 days of its filing. [Ord. 2011-016]
   2) At the hearing, the BCC shall provide the petitioner, the Applicant (if the Applicant is not the petitioner), any Person who appeared before the ZC, and PBC Staff an opportunity to present arguments and testimony. [Ord. 2011-016]
   3) In making its decision, the BCC shall consider only the record before the ZC at the time of the decision, and the correctness of the findings of fact or any specific Condition of Approval imposed by the ZC. The notice and hearing provisions for a Class A Conditional Use shall govern the appeal. [Ord. 2011-016]
   4) The BCC shall reverse the decision of the ZC only if there is substantial competent evidence in the record before the ZC that the decision failed to comply with the standards of Art. 2.B.7.B.2, Standards. [Ord. 2011-016]

   b. Administrative DO
   Any Person seeking a DO approval from the DRO, except for Type 1 Waivers, may appeal that decision to the Hearing Officer according to the following: [Ord. 2005-002] [Ord. 2011-016] [Ord. 2012-027] [Ord. 2018-002]
   1) The Hearing Officer shall consider the appeal petition within 60 days of its filing or a date agreed upon by the Applicant and the DRO. The Zoning Division shall coordinate and establish the date for the DRAB hearing. [Ord. 2011-016]
   2) The Hearing Officer may reverse or affirm or modify the decision of the DRO. [Ord. 2011-016] [Ord. 2018-002]
   3) At the hearing, the Hearing Officer shall only consider testimony and argument relating to the application, supporting documentation, and any staff report or documentation presented at the time of the DRO decision. [Ord. 2011-016] [Ord. 2018-002]
   4) The decision of the DRO shall be presumed correct and the Person seeking the appeal shall have the burden of demonstrating error. The Hearing Officer shall defer to the discretion of the DRO in interpreting the ULDC and shall not modify or reject the interpretation if it is supported
by substantial competent evidence, unless the interpretation is found to be contrary to the Plan, 
this Code, or the Official Zoning Map. [Ord. 2011-016] [Ord. 2018-002]

**c. Temporary Use**

Any Person aggrieved by a decision of the DRO regarding a Temporary Use may appeal that 
decision to the Hearing Officer according to the following: [Ord. 2006-036] [Ord. 2011-016] [Ord. 2018-002]

1) The DRO shall coordinate and establish the date for the Hearing Officer to consider the appeal 
which shall be within 40 days of the filing of the appeal. [Ord. 2011-016] [Ord. 2018-002]

2) The Hearing Officer may reverse or affirm or modify the decision of the DRO. [Ord. 2011-016] 
[Ord. 2018-002]

3) At the hearing, the Hearing Officer shall only consider testimony and argument relating to the 
application, supporting documentation, and any staff report or documentation presented at the 
time of the DRO’s decision. [Ord. 2011-016] [Ord. 2018-002]

4) The decision of the DRO shall be presumed correct and the Person seeking the appeal shall 
have the burden of demonstrating error. The Hearing Officer shall defer to the discretion of the 
DRO in interpreting the ULDC and shall not modify or reject the interpretation if it is supported 
by substantial competent evidence, unless the interpretation is found to be contrary to the Plan, 
this Code, or the Official Zoning Map. [Ord. 2011-016] [Ord. 2018-002]

a) Adult Entertainment

The appeal process is set forth on Art. 4.B.2.C.1.d, License per Palm Beach County Adult 

d. Interpretations

The Person who sought the interpretation may appeal that interpretation to the Hearing Officer, 
unless stated otherwise, according to the following: [Ord. 2006-036] [Ord. 2011-016]

1) The Agency responsible for the interpretation shall coordinate and establish the date for the 
Hearing Officer to consider the appeal which shall be within 40 days of the filing of the appeal 
or a date agreed upon the Applicant and Agency Staff. [Ord. 2011-016]

2) The Hearing Officer may reverse or affirm or modify the interpretation. [Ord. 2006-036] [Ord. 2011-016]

3) At the hearing, the Hearing Officer shall only consider testimony and argument relating to 
documentation submitted by the Person seeking the interpretation, and any staff report or 
documentation presented at the time of the interpretation. [Ord. 2011-016]

4) The interpretation shall be presumed correct and the Person seeking the appeal shall have the 
burden of demonstrating error. The Hearing Officer shall defer to the discretion of the applicable 
authority in interpreting the ULDC and shall not modify or reject the interpretation if it is 
supported by substantial competent evidence, unless the interpretation is found to be contrary 
to the Plan, this Code, or the Official Zoning Map. [Ord. 2011-016]

e. Type 1 Variance Decisions

Any Person aggrieved by a decision of the DRO on an application for a Type 1 Variance may 
appeal to the Hearing Officer according to the following: [Ord. 2006-036] [Ord. 2011-016] [Ord. 2018-002]

1) The Zoning Division shall coordinate and establish the date for the Hearing Officer to consider 
the appeal which shall be within 40 days of the filing of the appeal or a date agreed upon the 
Applicant and Zoning Staff. [Ord. 2011-016]

2) The Hearing Officer may reverse or affirm or modify the decision. [Ord. 2011-016]

3) At the hearing, the Hearing Officer shall only consider testimony and argument relating to the 
application, supporting documentation, and any staff report or documentation presented at the 
time of the Zoning Director’s decision. [Ord. 2011-016]

4) The Zoning Director’s decision shall be presumed correct and the Person seeking the appeal shall 
have the burden of demonstrating error. The Hearing Officer shall defer to the discretion of the 
Zoning Director in interpreting the ULDC and shall not modify or reject the interpretation if it is 
supported by substantial competent evidence, unless the interpretation is found to be contrary 
to the Plan, this Code, or the Official Zoning Map. [Ord. 2011-016]

f. Type 1 Waiver

1) URAO

Any Person seeking a URAO Type 1 Waiver from the DRO may appeal that decision to the 
BCC pursuant to the procedures in Art. 2.A.14.C.2.a, Class B Conditional Use. [Ord. 2011- 
016] [Ord. 2018-002]
2) Other Type 1 Waivers
Any Person seeking a Type 1 Waiver, except for URAO, may appeal that decision to the Zoning Commission subject to the following: [Ord. 2011-016] [Ord. 2012-027] [Ord. 2018-002]
   a) The ZC shall consider the appeal petition within 60 days of its filing. [Ord. 2011-016]
   b) At the hearing, the ZC shall provide the petitioner, the Applicant, and PBC Staff an opportunity to present arguments and testimony. [Ord. 2011-016]
   c) The ZC shall consider only the evidence presented to County Staff at time of the decision and the correctness of findings of fact or any condition imposed by the DRO. [Ord. 2011-016]
   d) The ZC shall modify or reject only if substantial evidence is contrary to the Plan, ULDC, or Official Zoning Map. [Ord. 2011-016]

CHAPTER B PUBLIC HEARING PROCESSES

Section 1 Purpose
To establish procedures and standards for:
   A. Sufficiency determination of applications that are subject to the Public Hearing processes; [Ord. 2018-002]
   B. Submittal, Review, Resubmittal, and Certification of applications that are subject to Table 2.A.2.C, Board of County Commissioners, Legislative and Quasi-Judicial Processes, and Table 2.A.2.C, Zoning Commission, Quasi-Judicial Processes; [Ord. 2018-002]
   C. Public notification as mandated by Florida Statutes, andCourtesy notification provided by the County; [Ord. 2018-002]
   D. Preparation of Staff Reports and recommendations to the Decision Making Bodies; [Ord. 2018-002]
   E. Scheduling and Conduct of Hearings; and, [Ord. 2018-002]
   F. Final decision by the BCC or ZC pursuant to Art. 2.G, Decision Making Bodies. [Ord. 2018-002]

Section 2 Sufficiency Review
   A. Sufficiency
      The DRO shall ensure the applications meet all Submittal requirements and the requests are consistent with Art. 2.A, General and the Zoning Technical Manual. If the application is determined to be sufficient by the DRO, the DRO shall provide the written notification to the Applicant and the application shall be distributed to the applicable County Agencies for review pursuant to the procedures and standards of this Article. [Ord. 2005-041] [Ord. 2018-002] [Ord. 2020-001]
   B. Insufficiency
      If an application is determined to be insufficient pursuant to the Zoning Technical Manual, the DRO shall provide written notification to the Applicant specifying the deficiencies. The notification shall be forwarded to the Applicant within 30 calendar days from the date of the Application Submittal. [Ord. 2018-002] [Ord. 2020-001]
         1. No further action shall be taken on the application until the deficiencies are remedied. [Ord. 2018-002]
         2. The Applicant shall address all insufficiencies no more than 30 calendar days after the application was determined to be insufficient, and resubmit the application on the Submittal date. [Ord. 2018-002] [Ord. 2020-001]
         3. If the application is amended and determined to be sufficient by the DRO, the application shall be processed for review. [Ord. 2018-002]
         4. If the deficiencies are not remedied, the DRO shall issue a second written notification to the Applicant indicating the application shall be considered withdrawn unless a written request for a time extension has been submitted and approved by the Zoning Director, pursuant to Art. 2.B.2.C, Time Extension. [Ord. 2018-002] [Ord. 2020-001]
   C. Time Extension
      The Applicant may submit a written request for an extension of time to the Zoning Director should additional time be required to address deficiencies of the application. Such request shall be submitted to the Zoning Director no later than five days after the issuance of the second Insufficiency notification. [Ord. 2018-002] [Ord. 2020-001]
   D. Administrative Withdrawal
      If the Applicant fails to address the insufficiencies or request and receive a time extension, it may result in an Administrative withdrawal of the application. [Ord. 2018-002] [Ord. 2020-001]
Section 3 General

The DRO shall coordinate the review of applications with all the applicable Agencies based on the request(s), and in accordance with Table 2.A.2.C. Board of County Commissioners, Legislative and Quasi-Judicial Processes, and Table 2.A.2.C. Zoning Commission, Quasi-Judicial Processes. For a PO Deviation application, the Applicant shall be responsible to coordinate the review of the application with the applicable Agencies. The application(s) shall be assigned by the DRO to be reviewed through the Full DRO, which consists of all applicable County Agencies. An Applicant may also request a Concurrent Review by the DRO. [Ord. 2018-002] [Ord. 2019-005]

Section 4 Review, Resubmittal, and Certification

Review of an application shall be initiated by the DRO on the date it is deemed sufficient. The deadlines for Staff comments, Resubmittal by the Applicant, and Certification shall be indicated on the Annual Zoning Calendar. [Ord. 2018-002] [Ord. 2020-001]

A. Exception for PO Deviations

PO Deviations shall be submitted to the Zoning Division on the Application Submittal date. Sufficiency review is completed by the DRO to ensure the request complies with Art. 2.B.7.G. Public Ownership (PO) Deviations and PPM #ZO-O-063. The Zoning Division is only responsible for ensuring the correct allowable deviations are being requested and placing the application and Staff summary on a BCC Zoning Agenda. PO Deviations, pursuant to Art. 11, Subdivision, Platting, and Required Improvements, shall be submitted directly to the County Engineer for review. [Ord. 2019-005] [Ord. 2020-001]

B. Review

Staff review shall be based on applications that are deemed sufficient, and any subsequent resubmittals. The DRO shall prepare a list of issues and comments and make it available to the Applicant. The Applicant shall provide a written response and revised documents(s), if applicable, addressing all outstanding issues and comments on the Resubmittal date indicated on the Annual Zoning Calendar. The written responses and revised document(s) shall address the issues and comments prepared by Staff and shall not significantly modify the application that was determined to be sufficient. [Ord. 2018-002] [Ord. 2020-001]

1. Significant modifications shall include, but not limited to the following: [Ord. 2020-001]
   a. Additional requests to the application. [Ord. 2020-001]
   b. Modifications to the site layout or resubmitted document(s) that would require new review of the document(s) or impact the timing of a final decision by the ZC or BCC. [Ord. 2020-001]

2. If the DRO determines that the revised requests and documents are significantly modified from the original request that was determined to be sufficient, the DRO shall provide a written notification to the Applicant describing what changes significantly modified the application. The Applicant shall: [Ord. 2020-001]
   a. revise the requests and modify plans to eliminate the significant modification; [Ord. 2020-001]
   b. submit a written request for a time extension to the Zoning Director to determine if the application is still sufficient or if a new sufficiency review is required. Both parties may agree to a reasonable request for an extension of time; or, [Ord. 2020-001]
   c. request withdrawal of the application. [Ord. 2020-001]

C. Non-Certification

If the revised document(s) fail to address all listed outstanding issues and comments, the DRO shall issue a Result List indicating that the application is not certified. [Ord. 2018-002] [Ord. 2020-001]

1. Resubmittal Requirements

The Applicant shall provide a written response, addressing all outstanding issues and comments for those applications that are not certified, in a manner and form acceptable to the DRO. The revised document(s) shall be submitted on the Resubmittal date as established on the Annual Zoning Calendar. [Ord. 2005-041] [Ord. 2008-003] [Ord. 2018-002] [Ord. 2020-001]

2. Time Extension

Applicants who have applications for a DO that are not certified within 120 calendar days of Sufficiency determination by the DRO, must submit a written request and receive approval for an extension of time from the Zoning Director within the 120-calendar day deadline. Both parties may agree to a reasonable request for an extension of time. [Ord. 2020-001]

D. Certification

1. If the resubmitted document(s) satisfy Code requirements and address the DRO’s list of outstanding issues and comments, the DRO shall issue a written notification indicating the certification of the application. [Ord. 2018-002] [Ord. 2020-001] [Ord. 2020-020]
2. If the Applicant fails to address the listed outstanding issues and comments within the 120-calendar day deadline, and fails to request and receive approval for a reasonable request for an extension of time, from the Zoning Director, within the 120-calendar day deadline, the application shall be scheduled to proceed to a public hearing to comply with the timeframes enumerated in the F.S. An Applicant may receive a recommendation of denial from Staff for failure to comply with the Standards pursuant to Art. 2.B.7, Types of Applications, including the outstanding issues and comments provided by Staff. [Ord. 2020-001]

E. Application Modification after Certification
Applications shall not be significantly modified after certification, unless requested or agreed to by the DRO. Significant modifications to the certified plan(s) and application(s) within ten days of a scheduled public hearing date shall result in a postponement, when a decision can be rendered within the timeframe enumerated in the F.S., or if both parties agree to a reasonable request for an extension of time. For the purposes of this Article, a modification shall be considered significant if it exceeds 30 percent or more change from the certified plan or application request. The DRO may consider, but not limited to: intensity, density, land area, or vehicular use areas, to determine whether the certified plans or documents exceed the 30-percent threshold. [Ord. 2005-002] [Ord. 2018-002] [Ord. 2020-001]

Section 5 Notification

A. Applicability
Applications subject to Public Hearing or Type 1 Variance processes, Corrective Resolutions or Administrative Inquiries, or any application that will result in the redevelopment of an existing occupied mobile home park, shall require notification to the public, in accordance with the following Table: [Ord. 2011-016] [Ord. 2015-031] [Ord. 2017-002] [Ord. 2017-025] [Ord. 2018-002]

Notes:
1. Applies to Public Hearing, excluding: DOs advertised and abandoned simultaneously as part of a subsequent DO; and DOs advertised and reviewed for revocation pursuant to Art. 2.E, Monitoring of Development Orders (DOs) and Conditions of Approval. [Ord. 2019-034]
2. Notification shall be required in compliance with F.S. § 286.011.
3. Only applicable to an inquiry related to a specific development or parcel and not for general direction on a topic. [Ord. 2017-002]
4. In addition to any applicable signs required for the Public Hearing processes applications for the redevelopment of occupied mobile home parks shall be subject to additional posting requirements.

B. Newspaper Publication
Notice shall be published in a newspaper of general circulation in PBC in accordance with F.S. § 125.66. [Ord. 2011-016] [Ord. 2015-031] [Ord. 2018-002]
C. Courtesy Notice

1. Applicability and Mailing Boundary
   Courtesy notices shall be mailed to all Property Owners, interested parties or other entities identified in the following Table: [Ord. 2006-036] [Ord. 2008-003] [Ord. 2011-016] [Ord. 2015-031] [Ord. 2018-002]

Table 2.B.5.C – Courtesy Notice Requirements

Notes:
1. Distance shall be measured from the property line of the affected area, unless stated otherwise. If the adjacent property within the mailing boundary is owned by the Applicant or a related entity, the notification boundary shall be extended an additional 500 feet beyond the boundary of the adjacent parcel. Courtesy notices are not required where the outer boundary of the adjacent parcel lies farther than 1,500 feet on properties located in the Glades, Exurban, and Rural Tiers, or 1,000 feet for properties in other Tiers. [Ord. 2012-003]
2. Includes all owners of real property, whose names and addresses are known by reference to the latest published ad valorem tax records of the PBC Property Appraiser.
3. Includes condominium associations and all real Property Owners when real property consists of a condominium.
4. Shall also include municipalities that have the subject parcel identified within the PBC Future Annexation Map.
5. The Applicant shall provide the list of all Condominium Associations, POAs, HOAs, or equivalent within the boundaries. [Ord. 2016-016]
6. Shall be mailed a minimum of ten days prior to the date of the AI by the Applicant submitting the inquiry.
7. A larger notification boundary from 301 to 1,000 feet is required for properties located in the Glades, Exurban, or Rural Tiers.

2. Notice Content
   Courtesy notices shall include the following information: [Ord. 2011-016] [Ord. 2018-002]
   b. A date, time, and place for the Public Hearing(s) or the Public Meeting(s) for Type 1 Variance; [Ord. 2011-016] [Ord. 2018-002]
   c. A general location map of the subject property; [Ord. 2011-016] [Ord. 2018-002]
   d. A statement indicating that interested parties may appear at the Public Hearing or the Public Meeting for the Type 1 Variance to be heard regarding the request; and, [Ord. 2011-016] [Ord. 2018-002]
   e. For PO Deviations, the notice shall state the name, phone number, address, and email address of the Applicant. Responses to any letters from interested parties shall be mailed directly to the Applicant, and the Applicant shall be responsible for notifying the BCC of the responses to the notification at the Public Hearing when the item is discussed. [Ord. 2019-005]

3. Failure to Receive Courtesy Notice
   Failure to receive a notice shall not be deemed a failure to comply with Art. 2.B.5, Notification, or be grounds to challenge the validity of any decision made by the approving authority. [Ord. 2011-016] [Ord. 2015-031] [Ord. 2018-002]

D. Signs
   1. The Applicant shall post signs regarding the public hearing or the public meeting on the property subject to the application. The signs shall be prepared by the Applicant using information provided by the Zoning Division, consistent with the requirements of the Zoning Technical Manual. Signs must be posted at least 15 days in advance of any public hearing. One sign shall be posted for each 250 feet of frontage, or a fraction thereof, along a street up to a maximum of ten signs. All signs shall be: [Ord. 2010-022] [Ord. 2011-016] [Ord. 2012-003] [Ord. 2016-016] [Ord. 2018-002]
   a. Evenly spaced along the street when more than one sign per property is required; [Ord. 2011-016] [Ord. 2012-003] [Ord. 2018-002]
   b. Set back no more than 25 feet from the property line; and, [Ord. 2011-016] [Ord. 2018-002]
d. Where the property does not have sufficient frontage on a street, signs shall be in a location acceptable to the Zoning Director. The Applicant shall submit to the DRO an affidavit of Installation of Notification Signs with photographs confirming the signs have been posted. The failure of any such posted notice to remain in place after it has been posted shall not be deemed a failure to comply with this Section or be grounds to challenge the validity of any decision made by the approving authority. The Applicant shall also be required to ensure the signs have been removed no later than five days after the final hearing. [Ord. 2010-022] [Ord. 2011-016] [Ord. 2015-031] [Ord. 2018-002]

2. Exceptions
Signs posted by a public agency or the BCC may be posted on the nearest street or at major intersections leading to and within the subject property. [Ord. 2018-002]

3. Additional Sign Notification Requirements for Redevelopment of Mobile Home Parks
The purpose of this Section is to provide additional notice to a prospective purchaser of a mobile home in a mobile home park that has either applied for or received an approval to redevelop the property, potentially to another use. Should a person decide to purchase any mobile home in this park, he or she may be required to bear the cost of removing the mobile home to another suitable location. An application for a DO that will result in the redevelopment of an existing occupied mobile home park, shall be subject to the following additional notification requirements: [Ord. 2017-025]

a. Standards for Notification
In addition to the sign requirements above, the following additional requirements shall apply: [Ord. 2017-025]
1) The Applicant shall post signs within 30 days of an application being deemed sufficient. [Ord. 2017-025]
2) Signs shall be prepared by the Applicant using information provided by the Zoning Division, consistent with the requirements of the Zoning Technical Manual, and at a minimum shall be posted in English, Creole, and Spanish, to include the following specific text: “This mobile home park has applied for or has received an approval to redevelop the property, potentially to another use. Should you decide to purchase any mobile home in this park, you may be required to bear the cost of removing the mobile home to another suitable location.” [Ord. 2017-025]
3) One sign shall be posted for each 250 feet of frontage, evenly spaced, along a street up to a maximum of five signs, and where applicable at the entrance to any park management offices and recreational facilities. [Ord. 2017-025]
4) Signs shall remain posted until such time as the application is approved, denied, or withdrawn. [Ord. 2017-025]

b. Standards Applicable to Redevelopment Approvals
Upon approval, the above public information signs shall be updated and reposted in accordance with the following: [Ord. 2017-025]
1) The signs shall be posted within 30 days of a zoning application approval, in accordance with the information above, including number, spacing, location, and language, to include the following text: “This mobile home park has been approved for (specific use). Should you decide to purchase any mobile home in this park, you may be required to bear the cost of removing the mobile home to another suitable location.” [Ord. 2017-025]
2) The signs shall be maintained until such time as all mobile home units within the affected development area have been removed from the park, or the approval is abandoned. [Ord. 2017-025]

c. Compliance with Notice Requirement
The owner of the mobile home park shall be required to submit the form Affidavit of Installation of Notification Signs substantiating that such signage is consistently being maintained, on a quarterly basis, as follows: [Ord. 2017-025]
1) To the Zoning Division, for signs required under 1) above; and [Ord. 2017-025]
2) To the Monitoring and Compliance Section of the Planning Division, for signs required under 2) above. [Ord. 2017-025]

4. Postponements
All applications postponed for three or more consecutive hearings shall require the Applicant to provide new notification pursuant to Art. 2.B.5, Notification. [Ord. 2010-022] [Ord. 2011-016] [Ord. 2018-002]
Section 6  Public Hearing Procedures

All Decision Making Persons and Bodies shall act in accordance with the time limits established in this Code, unless stated otherwise. [Ord. 2018-002] [Ord. 2020-001]

A. Scheduling

Once an application has been certified by the DRO, the DRO shall schedule a public hearing in accordance with the dates established in the Annual Zoning Calendar and pursuant to F.S. § 125.022. The scheduling of the application for public hearing shall ensure the public notice requirements are satisfied. [Ord. 2018-002] [Ord. 2020-001]

1. Number of Hearings

Both the ZC and the BCC shall hold at least one public hearing on applications that are subject to the Public Hearing processes, unless otherwise stated herein. [Ord. 2018-002]

2. Exception for Official Zoning Map Amendment

The ZC shall hold at least one public hearing and the BCC shall hold two public hearings on a proposed amendment to the boundaries of the Official Zoning Map for PBC-initiated applications consisting of ten or more contiguous acres of land. [Ord. 2018-002]

3. Exception for PO Deviations

The application for public hearing shall be placed on the next available BCC Zoning Hearing for which the public notice requirements can be satisfied. [Ord. 2019-005]

B. Staff Report and Recommendation

The DRO or the PBC Official responsible for reviewing the application shall prepare a report for each application. The DRO shall incorporate the analysis and Conditions of Approval of the Agencies who are responsible for reviewing the application, and a recommendation of approval, approval with conditions, or denial based on the applicable Standards. The report shall be made available to the public at least five days prior to the hearing date. [Ord. 2018-002]

1. PO Deviations

The Applicant is responsible for preparing a staff report and recommendation. The report shall include an analysis of the request and Standards, as described in Art. 2.B.7.G, Public Ownership (PO) Deviations, including any proposed Conditions of Approval. The report shall be available to the public at least five days prior to the hearing date. [Ord. 2019-005]

C. Board Action

1. Action by ZC

The ZC shall conduct a public hearing on the application, subject to the following procedures: [Ord. 2018-002]

a. Recommendations by the ZC

The ZC shall consider the application where the BCC makes a final decision, including staff report, relevant support materials, public testimony, and public testimony given at the hearing. After close of the public hearing, the ZC shall recommend to the BCC that the application be approved, approved with conditions, modified, or denied based upon the applicable Standards in Art. 2.B.7, Types of Applications. [Ord. 2008-003] [Ord. 2011-016] [Ord. 2012-027] [Ord. 2017-007] [Ord. 2018-002] [Ord. 2020-001]

1) The ZC may consider an application be remanded, continued, or postponed when a decision can be rendered within the timeframe enumerated in the F.S., or if both parties agree to a reasonable request for an extension of time. If there is no mutual agreement for a time extension, the application shall move forward with a recommendation by the ZC. [Ord. 2020-001]

b. Final Decision by the ZC

The ZC shall consider the application where the ZC makes a final decision, including, staff report, relevant support materials, DRO certification, public testimony, and public testimony given at the hearing. After close of the public hearing, the ZC shall by not less than a majority of a quorum present approve, approve with conditions, modify, or deny the application. The actions shall be based upon the applicable and any Standards specific to the use as required in Art. 4.B, Use Classification, thereby adopting a resolution approving, approving with conditions, or denying the proposed request. The resolution shall be filed with the Zoning Division. [Ord. 2006-036] [Ord. 2008-003] [Ord. 2018-002] [Ord. 2020-001]

1) The ZC may consider an application be remanded, continued, or postponed when a decision can be rendered within the timeframe enumerated in the F.S., or if both parties agree to a
reasonable request for an extension of time. If there is no mutual agreement for a time extension, the application shall move forward with a final decision by the ZC.  [Ord. 2020-001]

2. Action by BCC
   a. Recommendations by the ZC
      The BCC shall consider the application, staff report, relevant support materials, the recommendation of the ZC, and the public testimony submitted before and given at the hearing. [Ord. 2018-002]
   b. Final Decision by the BCC
      The BCC shall consider the application, staff report, relevant support materials, DRO certification, the ZC recommendation, public testimony submitted before and given at the hearing. After close of the public hearing, the BCC shall by no less than a majority of a quorum present approve, approve with conditions, modify, or deny the application. The actions shall be based upon the applicable and any Standards specific to the use as required in 4.B, Use Classification, thereby adopting a resolution approving, approving with conditions, or denying the proposed request. The resolution shall be filed with the Clerk of the Circuit Court. For PO Deviations a written notification, in lieu of a resolution, is prepared by the DRO, provided to the Applicant, and filed with the Zoning Division. [Ord. 2008-003] [Ord. 2012-027] [Ord. 2017-007] [Ord. 2018-002] [Ord. 2019-005] [Ord. 2020-001] [Ord. 2020-020]
      1) The BCC may consider an application be: remanded, continued, or postponed when a decision can be rendered within the timeframe enumerated in the F.S., or if both parties agree to a reasonable request for an extension of time. If there is no mutual agreement for a time extension, the application shall move forward with a final decision by the BCC.  [Ord. 2020-001]

3. Action by the Hearing Officer
   At the public hearing(s), the Hearing Officer shall consider the application, all relevant support materials, staff report, testimony given, and evidence introduced into the record at the public hearing(s) and decide to approve, approve with conditions, deny, continue, postpone, modify, or withdraw the request. [Ord. 2006-036] [Ord. 2018-002]

D. Conduct of Hearings
   1. Oath or Affirmation
      All testimony and evidence shall be given under oath or by affirmation to the body conducting the hearing.  [Ord. 2018-002]
   2. Rights of All Persons
      Any person may appear at a public hearing and submit evidence, either individually or as a representative of an organization. Anyone representing an organization shall present evidence of his/her authority to speak on behalf of the organization in regard to the matter under consideration. Each person who appears at a public hearing shall be identified, state an address, and if appearing on behalf of an organization, state the name and mailing address of the organization.  [Ord. 2018-002]
   3. Procedures for Public Hearings
      The procedures of the hearings shall be in accordance with 2.G.2, General Provisions. The Decision Making Body may adopt bylaws stipulating the manner in which the proceedings will be conducted. The body conducting the hearing may exclude testimony or evidence that it finds to be irrelevant, immaterial, or unduly repetitious formal rules of evidence. Formal rules of evidence shall not apply but fundamental due process shall be observed. The order of the proceedings shall be as follows:
      [Ord. 2018-002]
      a. The Applicant shall present any information the Applicant deems appropriate.  [Ord. 2018-002]
      b. The PBC Official responsible for reviewing the applications shall present a written or oral recommendation, including any report prepared. This recommendation shall address each standard required to be considered by this Code prior to rendering a decision on the application. For PO Deviations, the Applicant shall present a written or oral recommendation, including any report prepared, with no presentation from the PBC Official. This recommendation shall address each standard required to be considered by this Code prior to rendering a decision on the application.  [Ord. 2018-002] [Ord. 2019-005]
      c. Public testimony shall be heard. [Ord. 2018-002]
      d. The PBC Official responsible for reviewing the application may respond to any statement made by the Applicant or any public comment.  [Ord. 2018-002]
      e. The Applicant may respond to any testimony or evidence presented by the PBC Staff or public at the discretion of the Chair.  [Ord. 2018-002]
f. The Decision Making Body may direct questions to Staff and the Applicant specific to the request. [Ord. 2018-002]
g. The Decision Making Body shall discuss the facts of the application and make a recommendation. [Ord. 2018-002]

E. Continuance or Postponement of Hearings
The BCC or ZC conducting the public hearing, may, on its own motion or at the request of an Applicant, consider an application be continued or postponed when a decision can be rendered within the timeframe enumerated in the F.S., or if both parties agree to a reasonable request for an extension of time. The BCC or ZC shall determine if an application shall be postponed when an Applicant fails to submit a written request for postponement five days prior to the hearing. All subsequent request for continuance or postponement shall be granted at the discretion of the Decision Making Body. [Ord. 2005-041] [Ord. 2006-036] [Ord. 2018-002] [Ord. 2020-001]

1. Postponement by Right
An Applicant may submit a written request to the Zoning Director, no less than five days prior to the hearing, for an application be postponed when a decision can be rendered within the timeframe enumerated in the F.S., or if both parties agree to a reasonable request for an extension of time. If the postponement is requested less than five days prior to the date of the scheduled hearing, the request for postponement shall be presented at the hearing and at the discretion of the ZC or BCC. [Ord. 2018-002] [Ord. 2020-001]

F. Finalization of Approved DOs
The Applicant shall submit an application to the DRO for finalization of the BCC or ZC approved DOs in accordance with the procedures in Art. 2.C.3.A, Finalization of BCC or ZC DOs, as applicable. [Ord. 2018-002] [Ord. 2019-005]

G. Other Procedures
Other procedures, which include: Postponement, Remand, Suspension of Development Review, Withdrawal, and Denial of Application are referenced in Art. 2.A.10; Violation of Condition of DO in Art. 2.A.11; Outstanding Liens or Fines in Art. 2.A.12; Misrepresentation in Art. 2.A.13; and, Appeal in Art. 2.A.14. [Ord. 2018-002] [Ord. 2020-001]

Section 7 Types of Applications

A. Official Zoning Map Amendment (Rezoning) to a Standard District

1. Purpose
To provide a means for changing the boundaries of the Official Zoning Map for a parcel of land. This Section is not intended to relieve particular hardships or to confer special privileges or rights on any person, but only to make necessary adjustments in light of changed conditions. In determining whether to grant an amendment, the BCC shall consider, the consistency of the proposed amendment with the intent of the Plan set forth in this Section. [Ord. 2018-002] [Ord. 2018-002]

2. Standards
When considering an application for rezoning to a Standard Zoning District with or without a COZ, the BCC and ZC shall utilize Standards a through g indicated below. An amendment which fails to meet any of these standards shall be deemed adverse to the public interest and shall not be approved. [Ord. 2007-001] [Ord. 2012-003] [Ord. 2017-007] [Ord. 2018-002]
a. **Consistency with the Plan**
The proposed amendment is consistent with the Plan. [Ord. 2007-001]

b. **Consistency with the Code**
The proposed amendment is not in conflict with any portion of this Code, and is consistent with the stated purpose and intent of this Code. [Ord. 2007-001]

c. **Compatibility with Surrounding Uses**
The proposed amendment is compatible, and generally consistent with existing uses and surrounding zoning districts, and is the appropriate zoning district for the parcel of land. In making this finding, the BCC may apply an alternative zoning district. [Ord. 2007-001]

d. **Effect on the Natural Environment**
The proposed amendment will not result in significantly adverse impacts on the natural environment, including but not limited to water, air, stormwater management, wildlife, vegetation, wetlands, and the natural functioning of the environment. [Ord. 2007-001]

e. **Development Patterns**
The proposed amendment will result in a logical, orderly, and timely development pattern. [Ord. 2007-001]

f. **Adequate Public Facilities**
The proposed amendment complies with Art. 2.F, Concurrency (Adequate Public Facility Standards). [Ord. 2007-001]

g. **Changed Conditions or Circumstances**
There are demonstrated changed site conditions or circumstances provided by the Applicant’s Justification Statement that necessitate the amendment. [Ord. 2007-001] [Ord. 2018-002]

3. **Effect of a Map Amendment**
   a. **General**
   Approval of a rezoning shall be deemed to authorize only the particular zoning district for which it is approved.
   
   b. **Time Limitations**
   A rezoning with a COZ may be reviewed pursuant to Art. 2.E, Monitoring of Development Orders (DOs) and Conditions of Approval. [Ord. 2005-002] [Ord. 2018-002]

4. **Development Order Amendment to a Standard Zoning District with a COZ**
   A DO for a Standard Zoning District with a COZ may be modified through a DOA pursuant to the Conditions of Approval established with its original approval, or as otherwise set forth in this Code. The Applicant shall demonstrate and the BCC must find that a change of circumstances or site conditions has occurred which make it necessary or reasonable to amend, extend, vary or alter the COZ. [Ord. 2005-041] [Ord. 2009-040] [Ord. 2018-002]

5. **Rezoning of Mobile Home Parks**
   Any rezoning of property having an existing mobile home park shall comply with the requirements of F.S. § 723.083, Governmental Action Affecting Removal of Mobile Home Owners. [Ord. 2017-025]

B **Conditional Uses and Official Zoning Map Amendment (Rezoning) to a PDD or TDD**

1. **Purpose**
   Conditional Uses and Rezoning to a PDD or TDD, require individual review of the subject property's location, proposed design, site configuration, intensity or density to ensure the appropriateness, and compatibility of the use with its surrounding land uses. [Ord. 2007-001] [Ord. 2011-016] [Ord. 2017-007] [Ord. 2018-002]

2. **Standards**
   When considering a DO application for a Rezoning to a PDD or a TDD, or a Conditional Use, excluding Conditional Use requests for Density Bonus pursuant to Art. 5.G.1, Workforce Housing Program (WHF), the BCC or ZC shall utilize the Standards a through h indicated below. An application which fails to meet any of these Standards shall be deemed adverse to the public interest and shall not be approved. [Ord. 2007-001] [Ord. 2011-016] [Ord. 2012-003] [Ord. 2017-007] [Ord. 2018-002] [Ord. 2019-033]
   a. **Consistency with the Plan**
   The proposed use or amendment is consistent with the purposes, goals, objectives and policies of the Plan, including standards for building and structural intensities and densities, and intensities of use. [Ord. 2007-001]
   b. **Consistency with the Code**
   The proposed use or amendment is not in conflict with any portion of this Code, and is consistent with the stated purpose and intent of this Code. [Ord. 2007-001] [Ord. 2018-002]
c. **Compatibility with Surrounding Uses**
The proposed use or amendment is compatible and generally consistent with the uses and character of the land surrounding and in the vicinity of the land proposed for development. [Ord. 2007-001]

d. **Design Minimizes Adverse Impact**
The design of the proposed use minimizes adverse effects, including visual impact and intensity of the proposed use on adjacent lands.

e. **Design Minimizes Environmental Impact**
The proposed use and design minimizes environmental impacts, including, but not limited to, water, air, stormwater management, wildlife, vegetation, wetlands, and the natural functioning of the environment. [Ord. 2007-001]

f. **Development Patterns**
The proposed use or amendment will result in a logical, orderly, and timely development pattern. [Ord. 2007-001]

g. **Adequate Public Facilities**
The extent to which the proposed use complies with Art. 2.F, Concurrency (Adequate Public Facility Standards). [Ord. 2007-001]

h. **Changed Conditions or Circumstances**
There are demonstrated changed site conditions or circumstances, provided by the Applicant’s Justification Statement that necessitate a modification. [Ord. 2007-001] [Ord. 2018-002]

3. **Standards**
When considering a DO application for a Conditional Use request for Density Bonus pursuant to Art. 5.G.1, Workforce Housing Program (WHP), the BCC shall utilize the Standards indicated in Art. 5.G.1.B.2.e.2)b), Factors for Consideration. [Ord. 2019-033]

4. **Effect of an Issuance of a DO or a Map Amendment**
   a. **General**
      Issuance of a DO for a Conditional Use or a Rezoning to a PDD or TDD shall be deemed to authorize only the particular site configuration, layout, and level of impacts which were approved pursuant to this Code. [Ord. 2018-002] [Ord. 2019-034]
      1) Permitted uses may occur in conjunction with or in place of a Conditional Use; and [Ord. 2018-002]
      2) Approval of a Rezoning shall be deemed to authorize only the particular zoning district for which it is approved. [Ord. 2018-002]
   b. **Time Limitations**
      The DO shall be reviewed pursuant to Art. 2.E, Monitoring of Development Orders (DOs) and Conditions of Approval. [Ord. 2018-002]
   c. **Zoning Plan Compliance and Initiation of Use**
      Development, benefit, or use of a Conditional Use shall not be permitted until the Applicant has secured and complied with all other DOs and site improvements required by this Code. [Ord. 2017-007] [Ord. 2018-002]
      The approval of a DO shall not ensure that subsequent approvals for other Development Permits will be granted unless the relevant and applicable portions of this Code are met. [Ord. 2018-002]

5. **Authorized Class A Conditional Uses**
Only those uses that are authorized as Class A Conditional Use in the Use Matrices in Art. 4, Use Regulations, may be approved as Class A Conditional Use, unless stated otherwise herein. The designation of a use as a Class A Conditional Use in a district does not constitute an authorization of such use or an assurance that such use will be approved under this Code. [Ord. 2017-007] [Ord. 2018-002]

6. **Authorized Class B Conditional Uses**
Only those uses that are authorized as Class B Conditional Use in the Use Matrices in Art. 4, Use Regulations, may be approved as Class B Conditional Use. The designation of a use as a Class B Conditional Use in a district does not constitute an authorization of such use or an assurance that such use will be approved under this Code. [Ord. 2017-007]

7. **Requested Use**
All prior approvals for a Requested Use shall correspond to a Conditional Use. [Ord. 2017-007] [Ord. 2018-002]
C. Development Order Amendment (DOA)

1. Purpose
   A DO for a COZ, Conditional Use, PDD, or TDD may be amended only pursuant to the standards and procedures established for its original approval, or as otherwise set forth in this Chapter. A Type 2 Waiver or a Type 2 Variance shall not be amended through a DOA process. [Ord. 2007-001] [Ord. 2011-016] [Ord. 2017-007] [Ord. 2018-002]

2. Standards
   Pursuant to the Standards indicated in Art. 2.B.7.B.2, Standards, Conditional Uses and Rezoning to a PDD or TDD. [Ord. 2018-002]

3. Expedited Application Consideration (EAC)
   DO amendments may be eligible for expedited consideration and review subject to the following criteria: [Ord. 2016-042] [Ord. 2018-002]
   a. Criteria
   The application shall meet all of the following criteria in order to be reviewed under the EAC process; [Ord. 2016-042] [Ord. 2018-002]
   1) Approval of the Zoning Director and the County Engineer shall be obtained prior to submission. The Zoning Director and the County Engineer shall consult with any other Department responsible for the Conditions of Approval. They shall approve or deny the request to obtain expedited consideration based on compatibility of the request with the surrounding area. The magnitude of the requested modification shall also be considered. The County Engineer and the Zoning Director shall only permit expedited consideration for proposals which have minimal site design impact, and which, if approved, will be compatible with surrounding areas; [Ord. 2007-001] [Ord. 2016-042] [Ord. 2018-002]
   2) The proposed application, if approved, will not increase intensity or density of the project; [Ord. 2007-001]
   3) Proof of compliance with all previous conditions of development approval; [Ord. 2007-001]
   4) No change to the threshold certificate, except alteration of legal description, shall occur; [Ord. 2007-001]
   5) The proposed amendment does not affect uses or intensities/densities within a DRI; [Ord. 2007-001] [Ord. 2016-042] [Ord. 2018-002]
   6) All impacts shall be internal to the project; and, [Ord. 2007-001] [Ord. 2016-042]
   7) Addition of land area limited to abandoned R-O-W or easements along the perimeter of the development. [Ord. 2016-042]

   b. Procedures
   The Applicant shall submit a written request for an EAC to the County Engineer and the Zoning Director ten days prior to the Submittal date of the application. After approval by the County Engineer and the Zoning Director to participate in an EAC process, the application shall be submitted and reviewed pursuant to the applicable development approval procedure, except that: [Ord. 2018-002]
   1) After the application is certified by the DRO, the proposed modification may proceed directly to the next BCC hearing for which advertising requirements can be met. [Ord. 2007-001]

4. Effect of an Issuance of a DO
   Pursuant to Art. 2.B.7.B.4, Effect of an Issuance of a DO or a Map Amendment for Conditional Uses or a Rezoning to a PDD or TDD. [Ord. 2018-002]

D. Type 2 Waiver

1. Purpose
   A Type 2 Waiver is to allow flexibility for mixed use or infill redevelopment projects, or architectural design, site design or layout, where alternative solutions can be allowed, subject to performance criteria or limitations. Type 2 Waivers are not intended to relieve specific financial hardship nor circumvent the intent of this Code. A Type 2 Waiver may not be granted if it conflicts with other Sections of this Code, or the Florida Building Code. [Ord. 2011-016] [Ord. 2012-027] [Ord. 2018-002]
2. Applicability
Requests for Type 2 Waivers shall only be permitted where expressly stated within the ULDC or indicated in the following Table. [Ord. 2011-016] [Ord. 2012-027] [Ord. 2018-002]

3. Standards for a Type 2 Waiver
When considering a DO application for a Type 2 Waiver, the BCC shall utilize the Standards indicated below and any other standards specific to a Type 2 Waiver. For a Unique Structure, refer to the Standards listed in Art. 2.B.7.D.4 below, and for a Commercial Communication Tower, refer to Art. 4.B.9.H.5.d, Criteria for Granting a Type 2 Waiver. For Minimum Legal Access for Collocated Landscape Service, refer to Art. 11, Subdivision, Platting, and Required Improvements. A Type 2 Waiver, which fails to meet any of the Standards, shall be deemed adverse to the public interest and shall not be approved. [Ord. 2011-016] [Ord. 2012-027] [Ord. 2018-002] [Ord. 2020-007]

a. The Waiver does not create additional conflicts with other requirements of the ULDC, and is consistent with the stated purpose and intent for the zoning district or overlay; [Ord. 2010-022] [Ord. 2011-016] [Ord. 2012-027] [Ord. 2018-002]
b. The Waiver will not cause a detrimental effect on the overall design and development standards of the project, and will be in harmony with the general site layout and design details of the development; and, [Ord. 2010-022] [Ord. 2012-027] [Ord. 2018-002]
c. The alternative design option recommended as part of the Waiver approval, if granted, will not adversely impact adjacent properties. [Ord. 2010-022] [Ord. 2012-027] [Ord. 2018-002]
d. For the purpose of Medical Marijuana Dispensing Facility in Art. 4.B.2.C.3 5.i, the BCC shall make the determination that the location of a medical marijuana dispensing facility promotes the health, safety, and welfare of the community. [Ord. 2017-028] [Ord. 2018-002]

4. Standards for a Unique Structure
When considering a DO application for a Unique Structure, the BCC and ZC shall utilize the standards a-e indicated below in addition to the requirements as stated in Art. 2.B.7.D.4, [Ord. 2009-040] [Ord. 2018-002]

a. Consistency with the Plan
The proposed architectural composition is consistent with the purposes, goals, objectives and policies of the Plan, including standards for building and structural intensities and densities. [Ord. 2009-040] [Ord. 2018-002]
b. Complies with Other Standards of Code
The proposed architectural composition complies with all standards imposed on it by all other applicable provisions of this Code for use, layout, function, and general development characteristics. [Ord. 2009-040] [Ord. 2018-002]
c. Architectural Compatibility
The proposed architectural composition is consistent with the Architectural Style, (see Technical Manual for examples) and generally consistent with the: scale, proportion, unity, harmony, and context of the architecture in the surrounding area. [Ord. 2009-040] [Ord. 2018-002]
d. **Design Minimizes Environmental Impact**
   The proposed architectural composition minimizes environmental impacts, including but not limited to water, air, stormwater management, wildlife, vegetation, wetlands, and the natural functioning of the environment. [Ord. 2009-040] [Ord. 2018-002]

e. **Circumstances**
   Whether and to what extent it can be demonstrated that there are any circumstances that support the designation. [Ord. 2009-040] [Ord. 2018-002]

5. **Effect of an Issuance of a DO**
   Pursuant to **Art. 2.B.7.B.4, Effect of an Issuance of a DO or a Map Amendment** for Conditional Uses or a Rezoning to a PDD or TDD. [Ord. 2018-002]

E. **Type 2 Variance**

1. **Purpose**
   A Type 2 Variance is to allow adjustment from certain Code requirements as it applies to land development. Type 2 Variances are not intended to relieve specific financial hardship nor circumvent the intent of this Code. Variance requests for density or intensity beyond the stated limits of the Plan shall be prohibited. [Ord. 2011-001] [Ord. 2012-003] [Ord. 2018-002]

2. **Prohibition**
   Variance requests for density or intensity beyond the stated limits of the Plan shall be prohibited. In addition, the ZC is not authorized to grant Variances from Code regulations with prohibited provisions, or the following Articles of the ULDC: [Ord. 2006-036] [Ord. 2011-001] [Ord. 2014-001] [Ord. 2018-002]
   c. **Art. 3.B.3, COZ, Conditional Overlay Zone**; [Ord. 2018-002]
   d. **Art. 3.B.16, Urban Redevelopment Area Overlay (URAO)**, except for parking requirements within the URAO; [Ord. 2018-002]
   f. **Art. 5.C.1.H.1.f, Design Elements Subject to ZC or BCC Approval**; [Ord. 2011-001] [Ord. 2018-002]
   h. **Art. 5.C.1.I, Large Scale Commercial Development**; [Ord. 2011-001] [Ord. 2018-002]
   j. **Art. 5.F, Legal Documents** (excluding provisions in **Art. 5.F.2, Easements**); [Ord. 2018-002]
   k. **Art. 5.G, Density Bonus Programs**; [Ord. 2018-002]
   m. **Art. 13, Impact Fees**; [Ord. 2018-002]
   o. **Art. 15, Health Regulations**; and, [Ord. 2018-002]

3. **Type 2 Variance Applications**
   Type 2 Variance applications include those that are processed by the Zoning Division and the Land Development Division. Variance applications may be submitted concurrently or separately with a request for a DO unless determined by the DRO that the Variance is subject to a Standalone application, and must be approved prior to the submittal of the DO application. [Ord. 2018-002]
   a. **Zoning Type 2 Variance (ZV)**
      The ZV shall only apply to applications requesting Variances that exceed the request limitations of **Art. 2.C.5.E, Type 1 Variance**. [Ord. 2018-002] [Ord. 2020-020]
   b. **Subdivision Variance (SV)**
      A Variance from **Art. 11, Subdivision, Platting, and Required Improvements**, shall be submitted to the County Engineer and shall comply with the application procedures and requirements of this Article. [Ord. 2018-002]
4. **Sequence of Submittal**
   An application for a Variance shall be submitted as a Concurrent or a Standalone Variance, and shall comply with the following: [Ord. 2018-002]
   a. **Concurrent Variance**
      A Concurrent Variance shall be submitted with the DO application. The Variance and the DO application shall be scheduled for the same hearings to be considered by the ZC. Approval of a Variance by the ZC shall be obtained prior to Final Plan approval by the DRO, plat recordation, or issuance of a Building Permit, whichever occurs first. [Ord. 2018-002]
   b. **Standalone Variance**
      If an application for a DO is contingent upon approval of a Variance, then the Variance shall be submitted as a Standalone Variance application. The approval of the Variance by the ZC shall be obtained prior to certification or Final Approval of the DO by the DRO. [Ord. 2018-002]

5. **Application Requirements**
   a. **Description**
      All properties described in one application must be contiguous. The DRO may require more than one application if the property concerned contains more than 40 acres, or the fee paid for one application would not equal the cost of processing multiple applications. [Ord. 2018-002]

6. **Standards for Zoning or Subdivision Variance**
   The ZC shall consider and find that all seven criteria listed below have been satisfied by the Applicant prior to making a motion for approval, of a Zoning or Subdivision Variance: [Ord. 2006-036]
   a. Special conditions and circumstances exist that are peculiar to the parcel of land, building, or structure, that are not applicable to other parcels of land, structures, or buildings in the same district;
   b. Special circumstances and conditions do not result from the actions of the Applicant;
   c. Granting the Variance shall not confer upon the Applicant any special privilege denied by the Plan and this Code to other parcels of land, buildings, or structures, in the same district;
   d. Literal interpretation and enforcement of the terms and provisions of this Code would deprive the Applicant of rights commonly enjoyed by other parcels of land in the same district, and would work an unnecessary and undue hardship;
   e. Granting the Variance is the minimum Variance that will make possible the reasonable use of the parcel of land, building, or structure;
   f. Granting the Variance will be consistent with the purposes, goals, objectives and policies of the Plan and this Code; and,
   g. Granting the Variance will not be injurious to the area involved or otherwise detrimental to the public welfare.

7. **Noise Variance**
   For requests for a Noise Variance, the ZC shall consider in addition to the Standards listed above: [Ord. 2010-022] [Ord. 2018-002]
   a. Additional time is necessary to alter the activity to comply with the provisions of Art. 5.E.4.B, Noise Limitations and Prohibitions; [Ord. 2010-022] [Ord. 2018-002]
   b. The activity, operation, or noise source will be of temporary duration which cannot be done in a manner that complies with Art. 5.E.4.B, Noise Limitations and Prohibitions; [Ord. 2010-022] [Ord. 2018-002]
   c. No reasonable alternative is available. Any Variance granted pursuant to this Section contains all conditions upon which the Variance has been granted, including but not limited to the effective date, time of day, location, sound level, limit or equipment limitation, and duration of the Variance. [Ord. 2010-022] [Ord. 2018-002]

8. **Effect of Issuance of a DO**
   Issuance of a Type 2 Variance DO shall be deemed to authorize any permitted use in the underlying zoning district, unless a specific Condition of Approval limits the specific use for which it is issued. [Ord. 2018-002]
   a. **Time Limitation**
      Unless otherwise specified in the DO or a Condition of Approval, construction shall be commenced pursuant to Art. 2.E.2.C, Time Limitations for Commencement, within 12 months of the Variance approval date, otherwise it shall become null and void. If more than one Variance was granted, the use of one of the Variances shall vest the other Variances. Permitted time frames do not change with successive owners. [Ord. 2018-002]
1) Request for Time Extension
Upon written request, an extension of time for the Variance or any condition thereof may be granted for a maximum of 24 months. No request for an extension shall be considered unless a written application requesting the extension is submitted to the appropriate Department prior to the date the Development Order or condition is to expire. Failure to submit an application for an extension within the time limits established by this Section shall render the Development Order for the Variance null and void. [Ord. 2018-002]

2) Exemption for Applications Not Subject to Building Permit
If a Type 2 Variance is requested that does not require a Building Permit to implement, then the Applicant shall include a written statement with the application requesting a Condition of Approval to grant an exemption from time limitation requirements. Granting of the exemption from time limitations shall be subject to ZC approval of a Condition of Approval specifying that no Building Permit is necessary to vest the Type 2 Variance. [Ord. 2018-002]

b. Conforming
Approval of a Variance by the ZC shall render a parcel of land, building, or the structure to be conforming. Use of the Variance shall be limited to the exact dimensions and configuration of the parcel of land, building, or structure as indicated on the Site Plan as submitted in the application. The parcel of land, building, or structure may not be further expanded, except in accordance with the standards of the Code. [Ord. 2018-002]

F. Development Order Abandonment (ABN)
1. Purpose
A DO for a Conditional Use or similar DO granted under Zoning Resolution No. 3-57, Ordinance No. 73-2, Ordinance No. 92-20, or Ordinance No. 2003-067, as amended, may be abandoned according to the procedures in this Section and pursuant to Art. 2.B, Public Hearing Processes. DOs, that are partially or fully implemented, or have not been completed may be abandoned subject to the requirements of this Section. [Ord. 2010-022] [Ord. 2018-002] [Ord. 2019-034]

2. Authority
The same Authority that granted the original DO shall render a decision on a request for abandonment. [Ord. 2019-034]

3. Applicability
This Section shall apply to DOs granted by the BCC or ZC, and are requested to be abandoned by an Applicant. DOs granting approval for a Rezoning may not be abandoned. A DO for a Rezoning with a Conditional Overlay Zone (COZ), may be processed for an abandonment of the COZ. [Ord. 2019-034]
   a. In determining the applicable process for an ABN application, the Applicant shall review the approved DO Resolution, including the Whereas Clauses, Conditions of Approval, and indicate in the application whether a new use will be requested concurrent with the abandonment. An application for an abandonment of a prior approval will be processed based on whether the DO has not been: partially or fully implemented, or has not been implemented. [Ord. 2019-034]

   b. Exception
   DOs reviewed pursuant to the time requirements, or for failure to comply with Conditions of a DO shall be reviewed under the requirements of Art. 2.E, Monitoring of Development Orders (DOs) and Conditions of Approval. [Ord. 2019-034]

4. Sequence of Submittal
An application for an abandonment may be submitted as follows: [Ord. 2019-034]
   a. Concurrent Abandonment
   A Concurrent Abandonment may be submitted with a separate application requesting a new DO or a DOA as follows: [Ord. 2019-034]
   1) Abandon previous resolution granting the entire DO and submit concurrently a new DO subject to a Public Hearing approval process; [Ord. 2019-034]
   2) Abandon previous resolution granting the entire DO and submit concurrently with a new DO subject to an Administrative or Building Permit approval process; or, [Ord. 2019-034]
   3) Abandon a DO that was approved with multiple requests, and may include Rezoning and Conditional Uses in the same resolution. [Ord. 2019-034]
      a) The ABN application and the resolution shall clearly identify those Use(s) that are subject to the abandonment. [Ord. 2019-034]
      b) The DOA application shall delete those conditions that are tied to the abandoned Use(s); and, [Ord. 2019-034]
c) If the multiple requests included a Rezoning and were approved under the same resolution, then the resolution shall remain in effect for the zoning district of the subject property unless the Applicant is requesting a Rezoning of the property to a different zoning district. [Ord. 2019-034]

b. Standalone Abandonment
Reviewed for abandonment with no proposed use. Any future use would be subject to the requirements of the Code at time of approval. [Ord. 2019-034]

5. Application Requirements
In addition to the Submittal Requirements pursuant to Art. 2.A.6.A, Zoning Application Requirements, the Applicant shall provide the following: [Ord. 2019-034]

a. Consent of all Property Owners of the subject property, if applicable; and [Ord. 2019-034]

b. Status of all Conditions of Approval, whether the Conditions are no longer applicable, implemented, or pending implementation. The Applicant must confirm that there are no reliance of other interested parties on additional performance or activities related to the proposed ABN. [Ord. 2019-034]

6. Standards
When considering an ABN application, the BCC and ZC shall consider the standards indicated below. [Ord. 2019-034]

a. Consistency with the Plan
The proposed abandonment is consistent with the Plan. [Ord. 2019-034]

b. Consistency with the Code
The proposed abandonment, is not in conflict with any portion of this Code, and is consistent with the stated purpose and intent of this Code. The abandonment of a DO does not create any new nonconformities. [Ord. 2019-034]

c. Adequate Public Facilities
The proposed abandonment of the DO shall not impact the approved requirements of Art. 2.F, Concurrency (Adequate Public Facility Standards). When a non-implemented DO is abandoned, all concurrency affiliated with the DO is no longer valid. For implemented DOs, concurrency for the remainder of the non-affected area shall remain. Concurrency for any new uses on the subject property shall be subject to the requirements of Art. 2.F, Concurrency (Adequate Public Facility Standards). [Ord. 2019-034]

d. Changed Conditions or Circumstances
There are demonstrated changed site conditions or circumstances provided by the Applicant’s Justification Statement that necessitate the abandonment. Abandonment of the resolution approving the DO will not impact other DOs approved on the same site. There is no reliance by other parties for additional performances, or tasks to be implemented, that were required in the original DO. [Ord. 2019-034]

7. Scheduling of a Hearing
Once an ABN application has been certified by the DRO, the DRO shall schedule a public hearing in accordance with the dates established in the Annual Zoning Calendar. The scheduling of the application of public hearing shall ensure the public notice requirements are satisfied. [Ord. 2019-034]

a. An application for abandonment processed under Art. 2.B.7.F.4.a.2), Concurrent Abandonment or Art. 2.B.7.F.4.b, Standalone Abandonment only need to be reviewed by the board making the final decision, and a staff report would not need to be prepared. The Findings of Fact for compliance with the Standards will be contained within the Abandonment DO. [Ord. 2019-034]

b. An application for abandonment processed under Art. 2.B.7.F.4.a.3), Concurrent Abandonment, may be processed as an EAC, provided it meets the criteria pursuant to Art. 2.B.7.C.3.a, Criteria. [Ord. 2019-034]
G. Public Ownership (PO) Deviations

1. Purpose

A PO Deviation is to allow adjustment from certain Code requirements as it applies to land development that supports government facilities within the PO Zoning District. [Ord. 2019-005]

2. Applicability

Requests for PO Deviation shall only be permitted as indicated in the following Table. [Ord. 2019-005]

<table>
<thead>
<tr>
<th>Table 2.B.7.G – PO Deviations</th>
</tr>
</thead>
<tbody>
<tr>
<td>Art. 4.B.4.C.10.d, Location and Separation Requirements, for a Homeless Resource Center</td>
</tr>
<tr>
<td>Art. 5, Supplementary Standards</td>
</tr>
<tr>
<td>Art. 6, Parking, Loading, and Circulation</td>
</tr>
<tr>
<td>Art. 7, Landscaping</td>
</tr>
</tbody>
</table>

3. Standards

Development supporting government facilities within the PO Zoning District, subject to an application established by the Executive Director of PZB and approval by the BCC utilizing the following standards:

- the proposed deviation(s) maintains compatibility with the uses and character of land surrounding and in the vicinity of the land proposed for development; [Ord. 2007-013] [Ord. 2010-022] [Ord. 2019-005]
- adverse effects on adjacent uses and lands, including but not limited to visual impact, are determined to be minimal or otherwise negligible upon review and consideration of surrounding lands, uses, zoning, Future Land Use (FLU), character, or other preexisting conditions; [Ord. 2007-013]
- special or unique circumstances or factors exist that are applicable to the proposed use, structure, feature, or land proposed for development; [Ord. 2007-013]
- the proposed deviation(s) allows for reasonable or practical use of the land proposed for development; [Ord. 2007-013]
- approval of the deviation(s) is consistent with the purpose, goals, policies, and objectives of the Plan and this Code; and, [Ord. 2007-013]
- approval of the deviation(s) is not injurious to the surrounding area or otherwise detrimental to public health, safety, and general welfare. [Ord. 2007-013]

4. Effect of Issuance of a DO

Issuance of a PO Deviations DO shall be deemed to authorize any permitted use in the underlying zoning district, unless a specific Condition of Approval limits the specific use for which it was issued. [Ord. 2019-005]

Section 8 Conditions of Approval

A. BCC Approved DOs

The DRO and ZC may recommend, and the BCC may impose, such conditions in a DO that are necessary to accomplish the purposes of the Plan and this Code; to prevent or minimize adverse effects upon the public, the environment and neighborhoods; and to ensure compatibility, including, but not limited to, limitations on function, size, bulk, location of improvements and buildings, standards for landscaping, buffering, lighting, adequate ingress and egress, conveyance of property, on-site or off-site improvements, duration and hours of operation. Conditions shall be included if conventional standards are inadequate to protect the public interest and surrounding land uses or if additional improvements are needed to facilitate a transition between different uses. Conditions are not intended to restate Code provisions. Any Code provision which is expressly restated as a Condition of Approval, shall not be eligible for a variance unless otherwise specified in the condition. Fixed time periods may be set for compliance with conditions and shall be governed by Art. 2.E. Monitoring of Development Orders (DOs) and Conditions of Approval. [Ord. 2007-001] [Ord. 2011-016] [Ord. 2017-007] [Ord. 2018-002]

B. ZC Approved DOs

The DRO may recommend, and the ZC may impose, such conditions in a DO for the same purposes as stated in above. [Ord. 2017-007] [Ord. 2018-002]
Section 9  Effect of Issuance of a Development Order

A. General
Issuance of a DO for a Conditional Use, DOA or a Type 2 Waiver, shall be deemed to authorize only the particular site configuration, layout and level of impacts which were approved pursuant to this Code, unless the approval is abandoned. Permitted uses may occur in conjunction with or in place of a Conditional Use, provided there are no Conditions of Approval that prohibit the permitted uses to be added to the building or a bay of the building. [Ord. 2011-016] [Ord. 2017-007] [Ord. 2018-002]

1. Zoning Plan Compliance and Initiation of Use
Development, benefit, or use of a Conditional Use or DOA shall not be permitted until the Applicant has secured and complied with all other Development Orders and site improvements required by this Code. [Ord. 2017-007] [Ord. 2018-002]

The approval of a DO shall not ensure that subsequent approvals for other DO will be granted unless the relevant and applicable portions of this Code are met. [Ord. 2018-002]

B. Type 2 Variance
Issuance of a Type 2 Variance DO shall be deemed to authorize any permitted use in the underlying zoning district, unless a specific Condition of Approval limits the specific use for which it is issued. A DO for a variance shall run with the land. [Ord. 2018-002]

1. Time Limitation
Unless otherwise specified in the DO or a Condition of Approval, construction shall be commenced pursuant to Art. 2.E.2.C, Time Limitations for Commencement, within 12 months of the variance approval date, otherwise it shall become null and void. If more than one variance was granted, the use of one of the variances shall vest the other variances. Permitted time frames do not change with successive owners. [Ord. 2012-027] [Ord. 2018-002]

a. Request for Time Extension
Upon written request, an extension of time for the variance or any condition thereof may be granted for a maximum of 24 months. No request for an extension shall be considered unless a written application requesting the extension is submitted to the appropriate Department prior to the date the Development Order or condition is to expire. Failure to submit an application for an extension within the time limits established by this Section shall render the Development Order for the variance null and void. [Ord. 2012-027]

b. Exemption for Applications Not Subject to Building Permit
If a Type 2 Variance is requested that does not require a Building Permit to implement, then the Applicant shall include a written statement with the application requesting a Condition of Approval to grant an exemption from time limitation requirements. Granting of the exemption from time limitations shall be subject to ZC approval of a Condition of Approval specifying that no Building Permit is necessary to vest the Type 2 Variance. [Ord. 2012-027] [Ord. 2018-002]

2. Conforming
Approval of a variance by the ZC shall render a parcel of land, building or the structure to be conforming. Use of the variance shall be limited to the exact dimensions and configuration of the parcel of land, building, or structure as indicated on the Site Plan as submitted in the application. The parcel of land, building, or structure may not be further expanded, except in accordance with the standards of the Code. [Ord. 2006-036]
CHAPTER C ADMINISTRATIVE PROCESSES

Section 1 Purpose

To establish procedures and standards for: [Ord. 2018-002]
A. Sufficiency determination of applications that are subject to the Administrative processes; [Ord. 2018-002]
B. Submittal, Review, Resubmittal, and Approval of applications that are subject to Table 2.C.3, DRO, Administrative Processes; [Ord. 2018-002]
C. Finalization of approved BCC or ZC DOs by the DRO; [Ord. 2018-002]
D. Review and final decisions on requests that are subject to the Administrative processes by the DRO; and, [Ord. 2018-002]
E. Considerations for other Administrative types of processes that will not result in the issuance of a DO. [Ord. 2018-002]

Section 2 Sufficiency Review

A. Sufficiency
   1. The DRO shall ensure the applications meet all Submittal requirements pursuant to the Zoning Technical Manual, and the requests are consistent with Art. 2.A. General. If the application is determined to be sufficient by the DRO, the DRO shall provide written notification to the Applicant and the application shall be distributed to the applicable County Agencies for review pursuant to the procedures and standards of this Article. [Ord. 2018-002] [Ord. 2020-001] [Ord. 2020-020]
   2. Exemptions
      a. A DROE application may be exempt from sufficiency review subject to the following: [Ord. 2020-020]
         1) The Justification Statement and supporting documents provided as part of the ZC or BCC application approval, previously identified all applicable Type 1 Waivers which were reviewed as part of the approved Preliminary Plans; [Ord. 2020-020]
         2) Revisions to the plan(s) are limited to only those amendments to address specific Conditions of Approval due at Final DRO; or any site modifications requested specifically by the Board; [Ord. 2020-020]
         3) Revisions are to reflect amendments necessary to address an approved Type 2 Waiver or a Type 2 Variance. [Ord. 2020-020]
      b. BCC or ZC Preliminary Plans such as a Master Plan or Site Plan that are not required to be amended at Final DRO, may be processed and finalized pursuant to Art. 2.C.5.A.2, Exceptions. [Ord. 2020-020]
   3. Application Review
      a. A DROE application may be exempted from sufficiency review, if the Applicant indicates at time of application submittal if the application meets any of the exemptions in Art. 2.C.2.A.2, Exemptions. Staff shall determine within five days of submittal if an application meets the exemptions for sufficiency review in order to continue to be processed. Applications not meeting the exemptions shall be subject to sufficiency review. [Ord. 2020-020]
      b. The 120-calendar-day review timeframe for DROE applications exempted for sufficiency shall commence on the date when the application is submitted to the Zoning Division. [Ord. 2020-020]

B. Insufficiency
   If an application is determined to be insufficient pursuant to the Zoning Technical Manual, the DRO shall provide written notification to the Applicant specifying the deficiencies. The notification shall be forwarded to the Applicant within 30-calendar days from the date of the Application’s Submittal. [Ord. 2018-002] [Ord. 2020-001]
   1. No further action shall be taken on the application until the deficiencies are remedied. [Ord. 2018-002]
   2. The Applicant shall address all insufficiencies no more than 30-calendar days after the application was determined to be insufficient, and resubmit the application on the Submittal date. [Ord. 2018-002] [Ord. 2020-001]
   3. If the application is amended and determined to be sufficient by the DRO, the application shall be processed for review. [Ord. 2018-002]
   4. If the deficiencies are not remedied, the DRO shall issue a second written notification to the Applicant indicating the application shall be considered withdrawn unless a written request for a time extension has been submitted and approved by the Zoning Director, pursuant to Art. 2.C.2.C, Time Extension. [Ord. 2018-002] [Ord. 2020-001]
C. Time Extension
The Applicant may submit a written request for an extension of time to the Zoning Director should additional time be required to address deficiencies of the application. Such request shall be submitted to the Zoning Director no later than five days after the issuance of the second Insufficiency notification. [Ord. 2018-002] [Ord. 2020-001]

D. Administrative Withdrawal
If the Applicant fails to address the insufficiencies; or request and receive a time extension, it may result in an Administrative withdrawal of the application. [Ord. 2018-002] [Ord. 2020-001] [Ord. 2020-020]

Section 3 General

The DRO shall coordinate the review of applications with all the applicable Agencies based on the request(s), and in accordance with Table 2.C.3, DRO, Administrative Processes. The application(s) shall be assigned by the DRO to be reviewed either through the Full DRO, which consists of all applicable County Agencies, or the Zoning Agency Review (ZAR), which consists of one to a maximum of five Agencies pursuant to Art. 2.C.4.A.3, Zoning Agency Review (ZAR). An Applicant may also request Concurrent Review by the DRO. [Ord. 2018-002] [Ord. 2020-020]

Notes:
2. There shall be an approved Zoning Plan (Site or Subdivision) for those requests to add a new use or replacement of a use through the ZAR process.
3. May be reviewed and approved concurrent with a Final Master Plan that was approved by the BCC.
4. Includes Type 1 Waiver for Landscaping.
5. This type of request will not issue a DO for the subject property.
6. Shall be processed as a Special Permit.
7. Limited to NEO and Structural Setback as outlined in Table 2.C.5.F, Summary of Type 1 Waivers. [Ord. 2020-020]

A. Finalization of BCC or ZC DOs
1. After the BCC or ZC hearing and approval of a DO, the Applicant shall submit to the DRO for Final Plan approval subject to Art. 2.C.5.A, Finalization of BCC or ZC DOs. Final Plan approval shall be required for all DOs even for those applications that do not include graphic changes to the Plan(s) such as tables required for Variance or Waiver requests and approvals. [Ord. 2018-002] [Ord. 2020-020]
2. DRO Expedited Review (DROE)
Final DRO applications may be expedited when they are consistent with the requirements in Art. 2.C.5.A.1, DRO Expedited Review (DROE). [Ord. 2018-002] [Ord. 2020-020]
3. Concurrent Review
Applications may be reviewed pursuant to Art. 2.A.4.D, Type 2 or 3 Concurrent Review. [Ord. 2018-002] [Ord. 2020-020]
B. Administrative Approval
1. The DRO shall make a final decision on uses pursuant to Art. 3, Overlays and Zoning Districts, and Art. 4. Use Regulations; Administrative applications pursuant to Table 2.C.3, DRO, Administrative Processes; or, where required by this Code. [Ord. 2020-020]

2. Concurrent Review
   Applications may be reviewed pursuant to the Concurrent Review process, in Art. 2.A.4.D, Type 2 or 3 Concurrent Review. [Ord. 2020-020]

3. All Zoning Plans shall be approved by the DRO prior to applying for a Building Permit; commencing related land development activities; or, utilizing any use subject to DRO approval, unless stated otherwise herein. [Ord. 2018-002] [Ord. 2020-020]

Section 4 Review, Resubmittal, and Final Decision

Review of an application shall be initiated by the DRO on the date it is deemed sufficient. The deadlines for Staff Comments, Resubmittal by the Applicant, and Certification or Final Decision shall be indicated on the Annual Zoning Calendar [Ord. 2018-002] [Ord. 2020-001]

A. Review
   Staff review shall be based on applications that are deemed sufficient, and any subsequent resubmittals. The DRO shall prepare a list of issues and comments and make it available to the Applicant. The Applicant shall provide a written response and revised document(s), if applicable, addressing all outstanding issues and comments and revised document(s) on the Resubmittal date indicated on the Annual Zoning Calendar. The written responses and revised document(s) shall address the issues and comments prepared by Staff and shall not significantly modify the application that was determined to be sufficient. [Ord. 2018-002] [Ord. 2020-001]

   1. Significant modifications shall include, but not limited to the following: [Ord. 2020-001]
      a. Additional requests to the application; or [Ord. 2020-001]
      b. Modifications to the site layout or submitted document(s) that would require a new review of the document(s) or impact the timing of a final decision by the DRO. [Ord. 2020-001]

   2. If the DRO determines that the revised requests and documents are significantly modified from the original request that was determined to be sufficient, the DRO shall provide a written notification to the Applicant describing what changes significantly modified the application. The Applicant shall: [Ord. 2020-001]
      a. revise the requests and modify plans to eliminate the significant modification; [Ord. 2020-001]
      b. submit a written request for a time extension to the Zoning Director to determine if the application is still sufficient or if a new sufficiency review is required. Both parties may agree to a reasonable request for an extension of time; or, [Ord. 2020-001]
      c. request withdrawal of the application. [Ord. 2020-001]

3. Zoning Agency Review (ZAR)
   DRO applications may be reviewed through the ZAR process, which requires five or less Agencies to review an application. Based on the application request, the Applicant shall indicate what Agencies may be required to review the ZAR application as contained in the Zoning Technical Manual. Zoning Staff shall verify whether the Agencies to review the application are correct and confirm if the application is subject to ZAR. If it is determined that more than five Agencies are required, the application shall be subject to the Full DRO process, however the Zoning Director shall render the final decision in cases of a dispute between the Applicant and Staff. [Ord. 2020-020]

B. Action by the DRO for DO Administrative Applications, except Type 1 Variance

1. Not Approved
   If the revised document(s) fail to address all listed outstanding issues and comments, the DRO shall issue a Result List indicating that the application is not approved. [Ord. 2018-002] [Ord. 2020-001]
   a. Resubmittal Requirements
      The Applicant shall provide a written response addressing all outstanding issues and comments for those applications that were not approved in a manner and form acceptable to the DRO. The revised document(s) shall be submitted on the Resubmittal date as established on the Annual Zoning Calendar. [Ord. 2008-003] [Ord. 2018-002] [Ord. 2020-001]
b. Time Extension
Applicants who have applications for a DO that are not approved within 120-calendar days of Sufficiency determination by the DRO, must submit a written request and receive approval for an extension of time from the Zoning Director within the 120-calendar day deadline. Both parties may agree to a reasonable request for an extension of time. [Ord. 2005-002] [Ord. 2018-002] [Ord. 2018-018] [Ord. 2020-001]

c. Failure to Address Issues and Comments
If the Applicant fails to address the listed outstanding issues and comments within the 120-calendar day deadline, and fails to request and receive approval for a reasonable request for an extension of time from the Zoning Director, within the 120-calendar day deadline, the application shall receive a decision of denial from the DRO for failure to comply with the Standards pursuant to Art. 2.C.5, Types of Applications, including the outstanding issues and comments provided by Staff. [Ord. 2020-001]

2. Approved
If the resubmitted document(s) satisfy Code requirements and address the DRO’s list of outstanding issues and comments, the DRO shall issue a written notification indicating the approval of the application. [Ord. 2018-002] [Ord. 2020-001] [Ord. 2020-020]

C. Action by the DRO for Type 1 Variance DO Applications

1. Not Certified
If the revised document(s) fail to address all listed outstanding issues and comments, the DRO shall issue a Result List indicating that the application is not certified. [Ord. 2020-001]

a. Resubmittal Requirements
The Applicant shall provide a written response addressing all outstanding issues and comments for those applications that were not certified in a manner and form acceptable to the DRO. The revised document(s) shall be submitted on the Resubmittal date as established on the Annual Zoning Calendar. [Ord. 2020-001]

b. Time Extension
Applicants who have applications for a DO that are not certified within 90-calendar days of Sufficiency determination by the DRO, must submit a written request and receive approval for an extension of time from the Zoning Director. Both parties may agree to a reasonable request for an extension of time. [Ord. 2020-001]

2. Certification
a. If the resubmitted document(s) satisfy Code requirements and address the DRO’s list of outstanding issues and comments, the DRO shall issue a written notification indicating the certification of the application. [Ord. 2020-001] [Ord. 2020-020]

b. If the Applicant fails to address the listed outstanding issues and comments within the 90-calendar day deadline, and fails to request and receive approval for a reasonable request for an extension of time from the Zoning Director within the 90-calendar day deadline, the application shall be scheduled to proceed to a public meeting to comply with the timeframes enumerated in the F.S. An Applicant shall receive a recommendation of denial from Staff for failure to comply with the Standards pursuant to Art. 2.C.5.E, Type 1 Variance, including the outstanding issues and comments provided by Staff. [Ord. 2020-001]

3. Application Modification after Certification
Applications shall not be significantly modified after certification, unless requested or agreed to by the DRO. Significant modifications to the certified plan(s) and applications within ten days of a scheduled public meeting date shall result in a postponement when a decision can be rendered within the timeframe enumerated in the F.S., or if both parties agree to a reasonable request for an extension of time. For the purposes of the Article, a modification shall be considered significant if it exceeds 30 percent or more change from the certified plan or application request. The DRO may consider, but not limited to, intensity, density, land area, or vehicular use areas, to determine whether the certified plans or document(s) exceed the 30 percent threshold. [Ord. 2020-001]

D. Public Meeting Procedures for Type 1 Variance

1. Notification
Refer to Art. 2.B.5, Notification. [Ord. 2018-018]

2. Scheduling
Once an application has been certified by the DRO, the DRO shall schedule a public meeting in accordance with the dates established in the Annual Zoning Calendar and pursuant to the F.S. The scheduling of the application for public meeting shall ensure the public notice requirements are satisfied and a decision is rendered pursuant to F.S. [Ord. 2018-018] [Ord. 2020-001]
a. **Number of Meetings**
   The DRO shall hold at least one public meeting on applications that are subject to the Type 1 Variance process. [Ord. 2018-018]

3. **Continuance or Postponement of the Meeting**
   The DRO conducting the public meeting, may on its own motion or at the request of an Applicant, consider an application be continued or postponed, when a decision can be rendered within the timeframe enumerated in the F.S., or if both parties agree to a reasonable request within the timeframe enumerated in the F.S., or if both parties agree to a reasonable request for an extension of time. The DRO shall determine if an application shall be postponed when an Applicant fails to submit a written request from postponement five days prior to the meeting. All subsequent requests for continuance or postponement shall be granted at the discretion of the DRO. [Ord. 2020-001]

   a. **Postponement by Right**
      An Applicant may submit a written request to the Zoning Director, no less than five days prior to the public meeting, for an application be postponed when a decision can be rendered within the timeframe enumerated in the F.S., or if both parties agree to a reasonable request for an extension of time. If the postponement is requested less than five days prior to the date of the scheduled meeting, the request for postponement shall be presented at the hearing and at the discretion of the DRO. [Ord. 2020-001]

Section 5. **Types of Applications**

A. **Finalization of BCC or ZC DOs**
   Plans approved by the BCC or ZC are required to be submitted to the DRO for final approval. The DRO shall review the application under the Full DRO process, and shall ensure the DO is consistent with the BCC or ZC approved plan and Conditions of Approval. The Final Plan review shall include any DOs that do not involve changes on the plan. All Preliminary Zoning Plans shall be finalized by the DRO prior to the application of a Building Permit; commencement of any related land development activities; or utilization of any use or approval granted by the BCC or ZC. An Applicant may submit an Expedited Review or for a Concurrent Review under the Full DRO process. [Ord. 2018-002] [Ord. 2020-020]

   1. **DRO Expedited Review (DROE)**
      a. Final DRO applications are considered DROE when they are submitted within the next two submittal dates indicated in the Zoning Calendar, after the final decision date of the BCC or ZC. [Ord. 2018-002] [Ord. 2020-020]
      b. The DROE shall not be utilized for applications that are subject to the Administrative Approval. [Ord. 2018-002] [Ord. 2020-020]

   2. **Exceptions**
      a. Applications approved by the BCC or ZC may be exempt from the submittal requirements for a DROE or Final DRO when the application meets the following: [Ord. 2020-020]
         1) The Preliminary Plans do not require changes other than labeling “Final” Plans; [Ord. 2020-020]
         2) The Final Plan is required to reflect the Type 2 Waiver or Type 2 Variance tables that do not result in modifications to the plan(s). [Ord. 2020-020]
      b. After the BCC or ZC approval, the Applicant shall indicate intent to take advantage of this provision to submit the Final Plan(s) and obtain final application approval. An application shall be finalized once the resolution is signed. [Ord. 2020-020]

B. **Administrative Approval**

   1. **Purpose**
      To establish standards for Administrative Approval of new uses by the DRO; developments that exceed the limitations stated in Table 4.A.9.A, Thresholds for Projects Requiring DRO Approval; or, where a Full DRO process is required by this Code. [Ord. 2018-002] [Ord. 2020-020]

      a. **New Use**
         These uses require individual review by the DRO of the subject property’s location, proposed design, site configuration, intensity or density to ensure the appropriateness, and compatibility of uses with its surrounding land uses. If there is a previously approved Plan, an application for a new use may be reviewed through the ZAR process pursuant to Art. 2.C.4.A.3, Zoning Agency Review (ZAR). [Ord. 2018-002] [Ord. 2020-020]
2. Standards
When considering a DO application that are subject to the Administrative Approval processes, the DRO shall utilize the Standards a through c indicated below: [Ord. 2018-002]
   a. Consistency with the Plan
      The proposed use is consistent with the purposes, goals, objectives and policies in the Plan, including standards for densities, and intensities of use. [Ord. 2018-002]
   b. Consistency with the Code
      The proposed use or amendment is not in conflict with any portion of this Code, and is consistent with the stated purpose and intent of this Code. [Ord. 2018-002]
   c. Adequate Public Facilities

3. Conditions
   The DRO may impose conditions pursuant to Art. 2.C.6, Conditions of Approval. [Ord. 2020-020]

4. Effect of an Issuance of a DO
   Shall be in effect pursuant to Art. 2.C.7, Effect of an Issuance of a DO. [Ord. 2009-040] [Ord. 2020-020]

C. Administrative Modifications to Prior DOs
1. Purpose
   To establish review criteria for the evaluation of Administrative Modifications to DOs that are approved by the BCC, ZC or the DRO. [Ord. 2008-003] [Ord. 2010-005] [Ord. 2010-022] [Ord. 2011-001] [Ord. 2018-002] [Ord. 2020-020]
   a. Exceptions
      1. All Class A or Class B Conditional Uses shall remain in the location consistent with the plan(s) approved by the BCC or ZC; unless a Condition of Approval allows an alternative location on the same site. [Ord. 2018-002]
      2. Modifications shall not be allowed if there is a Condition of Approval that prohibits the amendment request. [Ord. 2018-002] [Ord. 2020-020]

2. Modifications to BCC or ZC Approved Plans
   The DRO shall have the authority to approve modifications to a DO approved by the BCC or ZC. The original Final DRO plan(s) shall be used as the controlling document(s) to show proposed modifications, unless stated otherwise. The requests shall meet the intent of the BCC or ZC approval, and comply with the Conditions of Approval. [Ord. 2018-002] [Ord. 2020-020]

3. Standards
   When considering a DO request for Administrative Modifications, the DRO shall utilize the same Standards a through c pursuant to Art. 2.C.5.B.2, for Administrative Approval of a new use. The DRO shall also consider the criteria stated in Table 2.C.5.C, Administrative Modifications to Prior DOs. [Ord. 2018-002] [Ord. 2020-020]

4. Applicability
   The authority of the DRO to modify a prior approval shall include but not be limited to Table 2.C.5.C, Administrative Modifications to Prior DOs. [Ord. 2020-020]
   a. The DRO shall consider the request(s) to determine which Agencies will review the application, and whether the review shall be subject to the Full DRO or ZAR process pursuant to Art. 2.C.4.A.3, Zoning Agency Review (ZAR). A combination of requests may require review through the Full DRO process. In making a decision on the requested modification(s), the DRO shall evaluate the application based on the Table listed below. [Ord. 2020-020]
   b. The Zoning Director shall maintain PPM #ZO-O-029, Administrative Modifications to Approved Site Plans, outlining a list of minor amendments and establishing items that are exempt from the Administrative Modifications process. [Ord. 2020-020]
<table>
<thead>
<tr>
<th>Request/Allowable Modification</th>
<th>Criteria</th>
</tr>
</thead>
</table>
| Relocation of Building Square Footage (1)(2)(5) | • Allow relocation of no more than 25 percent of the total approved square footage or other area indicated as being covered by buildings or structures to portions of the site not previously covered;  
• Relocation of square footage to a building shall not enlarge the footprint of the building more than 50 percent of the building area as indicated on the latest applicable BCC or ZC approved plan;  
• Relocated square footage may be requested in conjunction with the increase of square footage;  
• Relocated square footage shall not be used to create additional freestanding buildings or structures;  
• Relocation of square footage may be integrated vertically provided the overall height will not exceed ten percent of the approved height and meet setback requirements; and,  
• Shall not be relocated or constructed closer to perimeter property lines than what was shown on the latest applicable BCC or ZC approved plan, unless the FLU designation, zoning district, or existing use of the adjacent parcel is compatible. |
| Increase in Square Footage for a Use, Building, Structure, or Outdoor Area that is Considered as Square Footage (1)(2)(4)(5) | • Allow an increase of a maximum of five percent or 5,000 square feet of any building, structure or outdoor area that is considered as square footage; whichever is less;  
• The increase shall not exceed a maximum of 5,000 square feet of the total square feet approved by the BCC or ZC;  
• The increase shall not exceed a maximum of five percent or 5,000 square feet of any building, structure or outdoor area considered as square footage, whichever is less;  
• The increase shall not be used to create new freestanding building(s) or structure(s);  
• Shall not be relocated or constructed closer to perimeter property lines than what was shown on the BCC or ZC approved plan, unless the FLU designation, zoning district, or existing use of the adjacent parcel is compatible;  
• Relocated square footage may be requested in conjunction with the increase of square footage; and,  
• Subject to Adequate Public Facilities Review. |
| Reduction in Building Size or Elimination of Building Area | • The reduction or elimination of building square feet shall not negatively impact the layout and design of the approved plan; and  
• The approved Adequate Public Facilities (Concurrency) is amended to indicate a reduction in or elimination of square feet. |
| Overall Height Increase of any Building or Structure | • Allow a maximum of ten percent.  
• Shall meet setback requirements. |
| Architectural Elevations | • The proposed modifications shall be consistent with the approved Architectural Elevations, and Art. 5.C, Design Standards. |
| Relocation of Site Elements | • Change in location of freestanding ground-mounted signs is based on an approved Master Sign Plan.  
• Relocation of parking or loading spaces does not affect pedestrian and vehicular safety. |
| Relocation, Addition, or Deletion of Internal Access Points | • Determine whether the proposed location is in proximity to a street intersection; and  
• Whether the proposed location will not negatively impact the existing sidewalk, and maintain the safety of pedestrians. |
| Addition of External Access Way for Properties within the URAO | • The property is in the UC or UI Zoning District;  
• Interconnectivity shall comply with Art. 3.B.16.F.5, Interconnectivity Standards;  
• Interconnectivity shall align with the existing access way located on an adjacent UC or UI parcel;  
• Both parcels shall have a recorded cross-access easement and agreement;  
• No significant increase in traffic above that approved by the BCC as determined by the County Engineer; and,  
• Notice to the District Commissioner by the Zoning Division. |
| Addition of External Emergency Access Ways | • Required by the PBC Fire-Rescue Department;  
• Notice to the District Commissioner by the Zoning Division; and,  
• Access point(s) shall be secured by a gate that has the necessary mechanism to ensure it is closed and secured after each Fire-Rescue emergency call. |
Table 2.C.5.C – Administrative Modifications to Prior DOs

<table>
<thead>
<tr>
<th>Request/Allowable Modification</th>
<th>Criteria</th>
</tr>
</thead>
</table>
| Addition of an External Access Way to a Civic Pod | - Pod supports a Fire-Rescue station, Government-Owned Towers, or a Government Facility;  
- Notice to the District Commissioner by the Zoning Division prior to DRO approval; and,  
- No substantial increase in traffic impact above that approved by the BCC as determined by the County Engineer. |
| Relocation of Open Space or Recreation Area(s) | - Relocation shall be within the same overall site or pod;  
- The acreage of the required open space or recreation area(s) shall remain the same; and,  
- By relocating the open space or recreation area, it will not result in an incompatibility issue from the adjacent properties or pods that are internal to the site. |
| Phase Lines Addition, Deletion, or Modification | - The addition or modifications are consistent with the intensity or density of the approved DO; and  
- Addition or modification of the phase lines shall not exceed the approved concurrence. |
| Phase Lines Relocation | - The ZC or BCC DO has approved phase lines;  
- Relocation is allowed if the phase lines are consistent with the intensity or density of the approved DO; and,  
- Relocation of the phase lines shall not exceed the approved concurrence. |
| Addition or Modification of ATM or Freestanding Unmanned Retail Structure | - Proposed location shall not impede vehicular or pedestrian traffic circulation. |
| Reconfiguration of a Type 1B Excavation | - Modification shall not bring the excavation closer to the property line. |
| Increase Number of Renewable Energy Wind Facilities within the AP Zoning District | - Allow an increase of ten percent or a maximum of ten wind turbines approved by the BCC if the separation or setback requirements from streets, and residential uses and districts as contained for the use in Art. 4, Use Regulations. (3) |
| Relocation of Wind Turbines, Buildings, or Structures of a Renewable Energy Wind Facility within the AP Zoning District | - Provided they comply with separation or setback requirements from streets, and residential uses and districts as contained for the use in Art. 4, Use Regulations. (3) |
| Density Transfer | - Units must be from one Residential Pod to another Residential Pod in the same PDD; and  
- The maximum number of units transferred to a Residential Pod or TDD Neighborhood shall not exceed 30 percent above the number of units approved by the BCC for that pod or TDD Neighborhood. |
| Change in Housing Classification for PDD or TDD (Table 3.E.1.E, Housing Classification) | - No height increase from the original BCC DO; and  
- If there is a density transfer along with this request, comply with criteria listed below. |
| Density Decrease | - The reduction in the number of units shall not negatively impact the layout and design of the approved plan; and  
- The approved Adequate Public Facilities (Concurrency) is amended to indicate a reduction in the number of units. |
| Relocation/Transfer of WHP Between Pods of the Same Project or Off-Site Construction Units | - Allow transfer of WHP units between the sending and the receiving projects that have received an approved DO.  
- Both sending and receiving projects for the WHP units shall be submitted concurrently. |
| Type 2 Waiver or Type 2 Variance | - Modification of the approved Waiver or Variance shall increase the degree of conformity with the current Code requirements. |

Notes:
1. Shall not apply to accessory structures which are not subject to concurrency review in accordance with PPM #ZO-049, Permits Not Subject to Concurrency Review. [Ord. 2020-020]
2. Clubhouse located in the Recreation Pod of a PDD shall be exempt from the relocation thresholds. [Ord. 2016-016]
3. Applicable to the Project Boundary instead of the individual property lines. [Ord. 2020-020]
4. Except for Freestanding ATMs and accessory structures. [Ord. 2020-020]
5. Relocation and increase of building square footage can be combined between multiple buildings on sites with one single use and ownership for the entire development, as long as the location of buildings adjacent to residential uses keep the setbacks shown on the original Final DRO plan(s) following the BCC or ZC approval. [Ord. 2020-020]
5. **Other Modifications**
   a. Modifications to plans that were administratively approved by the DRO may be subject to the ZAR process pursuant to [Art. 2.C.4.A.3, Zoning Agency Review (ZAR)]. [Ord. 2020-020]
   b. Additional modifications to a prior DO approved by the DRO may be processed through the ZAR pursuant to [PPM #ZO-O-029]. [Ord. 2018-002] [Ord. 2020-020]

6. **Conditions**
The DRO may impose conditions pursuant to [Art. 2.C.6, Conditions of Approval]. [Ord. 2020-020]

7. **Effect of an Issuance of a DO for Administrative Modifications**
   Shall be in effect pursuant to [Art. 2.C.7, Effect of an Issuance of a DO]. [Ord. 2018-002] [Ord. 2020-020]

**D. Temporary Use**

1. **Purpose**
   To create standards and an approval process for certain uses, which are generally temporary in nature, but require monitoring for compliance with Code requirements to ensure compatibility with surrounding land uses. A Temporary Use may be accommodated in a temporary structure or a permanent structure that is legally approved. A Temporary Use shall include, but not limited to those items listed in [Art. 4.B.11, Temporary Uses]. [Ord. 2007-013] [Ord. 2015-006] [Ord. 2018-002]

2. **Prior Approved and Authorized Special Permits**
   Any prior approved Special Permits that have expired shall be considered invalid, and the Applicant shall be required to submit a new application for a Temporary Use. Special Permits shall be issued only for [Art. 8.H.2, Billboards], subject to the applicable standards and Code requirements. [Ord. 2018-002]

3. **PAA**
   The Applicant shall request a PAA to meet with Staff prior to the submittal of a Temporary Use application to ensure the proposed use complies with Code requirements, and to determine whether the application is subject to the review and permit process by other County Agencies. [Ord. 2018-002]

4. **Sufficiency Determination**
   All Temporary Use requests are subject to the requirements of [Art. 2.C.2, Sufficiency Review]. [Ord. 2015-006] [Ord. 2018-002]

5. **Review and Final Decision**
   The application shall be submitted to the DRO subject to the ZAR review process. If the request complies with Code requirements and the Standards listed below, and is not subject to Building Permit Review, the Applicant shall receive a Temporary Use DO 15 days prior to the date of the event. [Ord. 2018-002]
   a. **Building Permit Process**
      The Applicant shall submit any required Permit application to the Building Division a minimum of 30 days prior to the date of the event. Prior to issuance of the DO approval of the Temporary Use, any associated Building Permits shall be secured and all required inspections scheduled with the Building and Code Enforcement Divisions and Fire Department. [Ord. 2007-013] [Ord. 2009-040] [Ord. 2015-006] [Ord. 2018-002]

6. **Standards**
   When considering a DO request for a Temporary Use, the DRO shall utilize the Standards a through b, the DRO shall also consider the limitations and criteria stated for each Temporary Use pursuant to [Art. 4.B.11.C, Definitions and Supplementary Use Standards for Specific Uses]. [Ord. 2018-002] [Ord. 2018-018]
   a. **Consistency with the Plan**
      The proposed use is consistent with the purposes, goals, objectives and policies in the Plan, including standards for building and structural intensities and densities, and intensities of use. [Ord. 2018-002]
   b. **Consistency with the Code**
      The request meets all applicable standards and provisions of this Code, including but not limited to all applicable portions of [Art. 4.B, Use Classification], and the proposed location, design, layout, access, and duration of the use will not create potential adverse impacts on surrounding land uses. [Ord. 2018-002]

7. **Conditions**
   The DRO may impose conditions pursuant to [Art. 2.C.6, Conditions of Approval]. [Ord. 2018-002] [Ord. 2020-020]
8. **Limited Timeframe**  
   A Temporary Use shall be limited to the dates of approval shown on the DO. Each Temporary Use shall be reviewed as a new application and subject to the most current Code requirements, unless otherwise stated herein. [Ord. 2018-002]

9. **Expiration**  
   Failure to utilize the Temporary Use DO within one year of the date of approval, or by the date specified in the DO or in a Condition of Approval, shall result in the approval becoming null and void. [Ord. 2018-002]

10. **Discontinuance**  
    A Temporary Use DO shall expire if the use or activity is discontinued for more than 90 days. [Ord. 2018-002]

11. **Abandonment**  
    A Temporary Use may be abandoned by filing a letter to the Zoning Director. [Ord. 2020-020]

12. **Violation of Code Requirements or Conditions of Approval**  
   a. **Revocation**  
      A Temporary Use DO may be revoked at any time by the Zoning Director if it is determined that the recipient is in violation of the Code or a Condition of Approval. Revocation of a Temporary Use DO shall result in the approval becoming null and void. The use or activity permitted by the DO shall cease immediately and the affected area shall be returned to its original state before the Temporary Use DO was issued. [Ord. 2018-002] [Ord. 2020-020]

   b. **Withholding Application**  
      If a Temporary Use is found in violation of any condition or Code requirement, the DRO may withhold the Applicant from requesting the same Temporary Use for a period of 24 months. In making a determination to withhold an application, the DRO shall consider the magnitude of the violation of the Conditions of Approval; which includes but not limited to, whether: [Ord. 2018-002] [Ord. 2020-020]
      1) it is a reoccurring violation; [Ord. 2018-002]
      2) the violation has created an impact on the surrounding properties or uses; and, [Ord. 2018-002]
      3) the Applicant has demonstrated an effort to correct the violation. [Ord. 2018-002]

E. **Type 1 Variance**  
1. **Purpose**  
   To allow minor variation from certain standards of this Code when special circumstances peculiar to the property exist, and the literal enforcement of this Code would result in undue and unnecessary hardship; and to provide the DRO the authority to review, approve, deny, and render conditions to an administrative Variance as necessary to accomplish the goals, objectives and policies of the Plan and this Code, including, but not limited to, limitations on size, bulk, location, requirements for landscaping, buffering, lighting, and provisions of adequate ingress and egress. [Ord. 2018-002]

2. **Application Procedures**  
   This Section may not be combined with any other Section that allows variations from the same PDRs. [Ord. 2015-006] [Ord. 2018-002]

3. **Variance Request Limitations**  
   Request that exceeds more than five Variances or the following limitations shall be subject to a Type 2 Variance. Variance requests for density or intensity beyond the stated limits of the Plan shall be prohibited. Type 1 Variances may be considered for the following: [Ord. 2006-036] [Ord. 2008-003] [Ord. 2012-003] [Ord. 2018-002]
   a. **Residential Lots with Three Units or Less**  
      Reductions or increases of PDRs greater than five percent of the minimum or maximum requirement. Reduction or increase of PDRs less than or equal to five percent of the minimum or maximum shall be processed in accordance with Art. 2.C.5.F, Type 1 Waiver. [Ord. 2006-036] [Ord. 2008-003] [Ord. 2012-003] [Ord. 2018-002] [Ord. 2020-020]
   b. **Accessory Uses and Structures**  
      Relief from Art. 5.B.1.A, Accessory Uses and Structures as follows: General; Fences and Walls; Docks; Entry Features; Fuel, Gas, or Chemical Storage Tanks; Dumpsters; Neighborhood Recreation Facility; Outdoor Recreation Amenities; Screen Enclosures; and, Permanent Generators. [Ord. 2008-003] [Ord. 2013-001] [Ord. 2018-002] [Ord. 2020-020]

e. Non-Residential Projects

1) Setback reduction greater than five percent but not exceeding 15 percent of the minimum requirement. [Ord. 2008-003] [Ord. 2018-002]

2) Reduction in the number of parking spaces not exceeding 15 percent of the minimum requirement for those parcels that do not meet the criteria pursuant to Art. 6.C.1.A.1.a, Reduce Required Parking. [Ord. 2006-036] [Ord. 2008-003] [Ord. 2018-002] [Ord. 2020-020]

4. Standards

When considering a Type 1 Variance request, the DRO shall consider Standards a through g, indicated below. A Type 1 Variance which fails to meet any of these Standards shall be deemed adverse to the public interest, and shall not be approved. [Ord. 2018-002]

a. Special conditions and circumstances exist that are peculiar to the parcel of land, building, or structure, that are not applicable to other parcels of land, structures, or buildings in the same district; [Ord. 2006-036] [Ord. 2018-002]

b. Special conditions and circumstances do not result from the actions of the Applicant; [Ord. 2006-036] [Ord. 2018-002]

c. Granting the Variance shall not confer upon the Applicant any special privilege denied by the Plan and this Code to other parcels of land, structures, or buildings in the same district; [Ord. 2006-036] [Ord. 2018-002]

d. Literal interpretation and enforcement of the terms and provisions of this Code would deprive the Applicant of rights commonly enjoyed by other parcels of land in the same district, and would work an unnecessary and undue hardship; [Ord. 2006-036] [Ord. 2018-002]

e. Granting the Variance is the minimum Variance that will make possible a reasonable use of the parcel of land, building, or structure; [Ord. 2006-036] [Ord. 2018-002]

f. Granting the Variance will be consistent with the purposes, goals, objectives and policies of the Plan and this Code; and, [Ord. 2006-036] [Ord. 2018-002]

g. Granting the Variance will not be injurious to the area involved or otherwise detrimental to the public welfare. [Ord. 2006-036] [Ord. 2018-002]

5. Staff Report and Recommendation

The DRO or the PBC Official responsible for reviewing the application shall prepare a report for the application. The DRO shall incorporate the analysis and Conditions of Approval of the Agencies who are responsible for reviewing the application, and a recommendation of approval, approval with conditions, or denial based on the applicable Standards. The report shall be made available to the public at least five days prior to the hearing date. [Ord. 2018-018]

6. Conditions

The DRO may impose Conditions of Approval in a Type 1 Variance DO, as necessary to accomplish the goals, objectives and policies of the Plan and this Code, including, but not limited to, limitations on size, bulk, location, requirements for landscaping, buffering, lighting, and provisions of adequate ingress and egress. Any violation of the Variance or condition shall be a violation of this Code. [Ord. 2018-002]

7. Time Limitation

Unless otherwise specified in the DO or a Condition of Approval, failure to utilize Type 1 Variance within one year of issuance, or by date specified in a Condition of Approval, shall result in the Variance becoming null and void. If more than one Variance was granted in the application, the use of one Variance shall vest all other Variances. Permitted time frames do not change with successive owners. Applications for extensions shall be submitted a minimum of 30 days prior to expiration. [Ord. 2008-003] [Ord. 2018-002]

8. Effect of a Type 1 Variance DO

Approval of a Type 1 Variance shall render a parcel of land, building, or structure to be conforming. Use of the Variance shall be limited to the exact dimensions and configuration of the parcel of land, building, or structure as indicated on the Site Plan as submitted in the application. The parcel of land, building, or structure may not be further expanded, except in accordance with the standards of the Code. [Ord. 2006-036] [Ord. 2018-002]
F. Type 1 Waiver

1. Purpose
To establish procedures and evaluation standards for a Type 1 Waiver. A Type 1 Waiver is to allow flexibility and minor adjustments to the property development regulations, site design, preservation, or incorporation of existing native vegetation; or for an improved site design where alternative solutions can be permitted subject to the criteria. Waivers are not intended to relieve specific financial hardship nor circumvent the intent of this Code. A Waiver may not be granted if it conflicts with other Sections of this Code, or the Florida Building Code. [Ord. 2011-016] [Ord. 2016-042] [Ord. 2018-002]

2. Applicability
Requests for Type 1 Waivers shall only be permitted where expressly stated within this Code. [Ord. 2011-016] [Ord. 2012-027] [Ord. 2018-002] [Ord. 2020-020]

Notes:
1. This Waiver shall only be utilized for detached housing types on individual lots, and shall not be utilized for multiple lots under one application, i.e. “blanket” application.

3. Standards
When considering a DO application for a Type 1 Waiver, the DRO shall consider the following Standards in addition to any other Standards applicable to the specific Waiver as contained in this Code. For a Waiver application that requires the submittal of an ALP, the Applicant shall comply with additional standards pursuant to Art. 7.B.4, Type 1 Waiver for Landscaping. [Ord. 2010-022] [Ord. 2011-016] [Ord. 2012-027] [Ord. 2016-042] [Ord. 2018-002]

a. The Waiver does not create additional conflicts with other requirements of the ULDC, and is consistent with the stated purpose and intent for the zoning district or overlay; [Ord. 2010-022] [Ord. 2011-016] [Ord. 2012-027] [Ord. 2018-002]

b. The Waiver will not cause a detrimental effect on the overall design and development standards of the project, and will be in harmony with the general site layout and design details of the development; and, [Ord. 2010-022] [Ord. 2012-027] [Ord. 2018-002]

c. The alternative design option recommended as part of the Waiver approval, if granted, will not adversely impact adjacent properties. [Ord. 2010-022] [Ord. 2012-027] [Ord. 2018-002]

4. Conditions
The DRO may impose conditions pursuant to Art. 2.C.6, Conditions of Approval. [Ord. 2018-002] [Ord. 2020-020]

5. Effect of a Type 1 Waiver DO
Shall be in effect pursuant to Art. 2.C.7, Effect of an Issuance of a DO. [Ord. 2020-020]
G. Development Order Abandonment (ABN)

1. General
   An Administrative DO granted under a prior Ordinance, may be abandoned according to the procedures in this Chapter. DOs, that are partially or fully implemented, or have not been implemented may be abandoned subject to the requirements of this Section. [Ord. 2018-002] [Ord. 2019-034]

2. Authority
   The same Authority that granted the original DO shall render a decision on a request for abandonment. [Ord. 2019-034]

3. Applicability
   This Section shall apply to all DOs for uses approved by the DRO, or similar DOs granted by the DRO, and requested by the Applicant. DOs reviewed pursuant to Art. 2.E, Monitoring of Development Orders (DOs) and Conditions of Approval for time requirements identified in Art. 2.E.2.C, Time Limitations for Commencement, or failure to comply with Conditions of a DO shall be reviewed under the requirements of Art. 2.E, Monitoring of Development Orders (DOs) and Conditions of Approval. [Ord. 2019-034]

4. Sequence of Submittal
   An application for an abandonment may be submitted as follows: [Ord. 2019-034]
   a. Concurrent Abandonment
      A Concurrent Abandonment may be submitted with a separate application requesting a new DO as follows: [Ord. 2019-034]
      1) Abandon previous DO approved by the DRO, for the entire DO and submit concurrently with a new DO through an Administrative Approval process; or [Ord. 2019-034]
      2) Abandon previous DO approved by the DRO, for the entire DO and submit concurrently with a new DO through a Building Permit approval process. [Ord. 2019-034]
   b. Standalone Abandonment
      Reviewed for abandonment with no proposed use. Any future use would be subject to the requirements of the Code at time of approval. [Ord. 2019-034]

5. Application Requirements
   In addition to the submittal requirements pursuant to Art. 2.A.6.A. Zoning Application Requirements, the Applicant shall provide status of all DRO Conditions of Approval as outlined in the DRO notifications. The Applicant shall state whether these conditions are no longer applicable, implemented, or pending implementation. The Applicant must confirm that there is no reliance of other interested parties on additional performance activities related to the proposed abandonment. Staff shall determine if the conditions are satisfied, if not, Staff shall notify the Applicant to coordinate with the Agency that imposed the condition, and determine the action to achieve compliance. If the Applicant is seeking a new DO, Staff shall determine if the current conditions should be carried forward under the new DO request. [Ord. 2020-020]

6. Standards
   When considering an ABN application, the DRO shall utilize the Standards indicated below. A request for an ABN which fails to meet any of these Standards shall be deemed adverse to the public and shall not be approved. An application for a DO abandonment to a Temporary Use shall demonstrate compliance with only Art. 2.C.5.G.6.d, Changed Conditions or Circumstances. [Ord. 2019-034] [Ord. 2020-020]
   a. Consistency with the Plan
      The proposed abandonment is consistent with the Plan. [Ord. 2019-034]
   b. Consistency with the Code
      The proposed abandonment, is not in conflict with any portion of this Code, and is consistent with the stated purpose and intent of this Code. The abandonment of a DO does not create any new non-conformities. [Ord. 2019-034]
   c. Adequate Public Facilities
      The proposed abandonment of the DO shall not impact the approved requirements of Art. 2.F, Concurrency (Adequate Public Facility Standards). When a non-implemented DO is abandoned, all concurrency affiliated with the DO is no longer valid. For implemented DOs, concurrency for the remainder of the non-affected area shall remain. Concurrency for any new uses on the subject property shall be subject to the requirements of Art. 2.F, Concurrency (Adequate Public Facility Standards). [Ord. 2019-034]
   d. Changed Conditions or Circumstances
      There are demonstrated changed site conditions or circumstances provided by the Applicant’s Justification Statement that necessitate the abandonment. Abandonment of the resolution approving the DO will not impact other DOs approved on the same site. There is no reliance by
other parties for additional performances, or tasks to be implemented, that were required in the original DO. [Ord. 2019-034]

Section 6 Conditions of Approval

A. DRO Authority
The DRO shall have the authority to impose Conditions of Approval for administrative DOs. Conditions of Approval may be imposed to: [Ord. 2009-040] [Ord. 2018-002] [Ord. 2020-020]
1. Ensure compliance with Code requirements; [Ord. 2009-040]
2. Ensure compatibility of the proposed development or use with surrounding land uses, address the location of uses on the site to minimize potential adverse off-site impacts, and ensure on-site safety; [Ord. 2009-040]
3. Require the execution of a unity of title, unity of control, shared parking and other legal documentation necessary to satisfy requirements of this Code; [Ord. 2009-040]
4. Require road construction necessary to mitigate project impacts including but not limited to drainage, turn lanes, sidewalks, and signalization; [Ord. 2009-040]
5. Reduce negative impacts from agricultural uses in the urban services area on surrounding properties including but not limited to: controlling objectionable odors, fencing, sound limitations; inspections, reporting or monitoring preservation areas, mitigation, and/or limits of operation; and, [Ord. 2009-040]
6. Allow specific requirements of the Code to be waived, provided the proposed development meets the specific requirements for a Type 1 Waiver. [Ord. 2009-040] [Ord. 2012-027]

2. Condition Limitations
1. Conditions imposed by the DRO shall be reasonable, not be contrary to law, limited to on-site improvements, except for off-site road improvements or conveyances specifically attributable to the project's impact.
2. Conditions shall not amend BCC or, ZC imposed conditions or affect previously approved conditions. [Ord. 2018-002]
3. For modifications or additions to previously approved DOs, conditions shall only be imposed to address the specific impacts of the new use or development. [Ord. 2018-002]
4. Conditions shall not restrict land uses otherwise permitted by the Code, unless necessary for parking or concurrency purposes, or require payment of any fees not otherwise required.

C. Completion of Conditions
A DO with Conditions of Approval imposed by the DRO that are required to be completed prior to a specific date, event or action, shall comply with the procedures established in Art. 2.E.3.D, Decision of the DRO. [Ord. 2020-020]

Section 7 Effect of an Issuance of a DO

A DO approved by the DRO shall have the following effect and authority: [Ord. 2009-040] [Ord. 2020-020]
A. Any Permitted by Right uses may occur in conjunction with or in place of a DRO approved use, provided there are no Conditions of Approval that prohibit the permitted use to be added to site; [Ord. 2018-002] [Ord. 2020-020]
B. Issuance of a DO approved by the DRO shall be deemed to authorize only the particular site configuration, layout, design, level of impacts, and intensity or density which were approved pursuant to this Code, unless the approval is abandoned, expired, or revoked; [Ord. 2018-002] [Ord. 2020-020]
C. A DO may only be amended pursuant to the procedures and standards in Art. 2.C.5.C, Administrative Modifications to Prior DOs; [Ord. 2018-002] [Ord. 2020-020]
D. The approval of a DO shall not ensure that subsequent approvals for other Development Permits will be granted unless the relevant and applicable portions of the Code are met; and, [Ord. 2020-020]
E. Time Limitation for a DO shall be reviewed pursuant to Art. 2.E, Monitoring of Development Orders (DOs) and Conditions of Approval. [Ord. 2020-020]
Section 8 Applications Not Issuing a Development Order

A. Zoning Confirmation Letter (ZCL)
   1. Purpose
      Confirmation of information regarding a particular parcel of land, or interpretation of how the Code applies to a given parcel, may be obtained through a Formal ZCL, Site Specific, or Non-Site Specific, or through an Informal ZCL from the DRO pursuant to the procedures in this Section. The scope of the Formal or Informal ZCL shall be limited to those matters under the authority of the Executive Director of PZB pursuant to Art. 1.B.1.A, Authority. [Ord. 2018-002] [Ord. 2020-020]

   2. Types of ZCL
      The request for a ZCL by an Applicant may be in form of an Informal ZCL, a Non-Site Specific Formal ZCL or a Formal ZCL. [Ord. 2018-002]
      a. Informal ZCL
         Any individual may request standard land use and zoning information that exists as a matter of record pertinent to a parcel of land. The response from the Zoning Division shall provide a summary of the requested information, including but not limited to FLU designation, zoning district, any prior approvals, and whether the property conforms to applicable Code requirements. The informal ZCL request may include plans or other relevant documents pertinent to the parcel of land. The Informal ZCL is not considered a final action of the Zoning Division and therefore, is not subject to appeal. [Ord. 2018-002]
      b. Non-Site Specific ZCL
         Any individual may request a Non-Site Specific ZCL to determine how the Code may apply in a particular zoning district, overlay, or other zoning designation. The Non-Site Specific ZCL may contain the same information contained in the Informal ZCL, but may also include a request for clarification or interpretation of Code requirements, prior approvals, or other similar matters. The Non-Site Specific ZCL is not considered a final action of the Zoning Division and therefore, is not subject to appeal. [Ord. 2018-002]
      c. Formal ZCL
         An owner of a parcel of land, any person with a contractual interest in a parcel of land, or any person submitting a DO application for a parcel of land, may request a Formal ZCL to determine how the Code applies to that parcel of land based on an existing DO or a specific plan to seek a DO for a particular use. The Formal ZCL may contain the same information contained in the Informal ZCL, but may also include a request for clarification or interpretation of Code requirements, existing Conditions of Approval, prior approvals or other matters pertinent to the parcel of land. A request for a Formal ZCL is subject to a mandatory PAA. A Formal ZCL is subject to appeal pursuant to Art. 2.A.14., Appeal. [Ord. 2018-002]

   3. Processing
      Applicants requesting an Informal or a Formal ZCL shall submit same to the DRO subject to the ZAR process. All applications are subject to sufficiency review pursuant to Art. 2.C.2., Sufficiency Review. The BCC may establish an administrative fee by Resolution for processing both Informal and Formal ZCLs. [Ord. 2018-002]

   4. ZCL Response
      a. Informal ZCL Response
         Within 30 days after the date of which the request is deemed sufficient for review, the DRO shall provide a response to the Applicant. [Ord. 2018-002]
      b. Formal ZCL and Non-Site Specific ZCL Response
         Within 60 days after the date of which the request is deemed sufficient for review, the DRO shall provide a response or render an interpretation to the Applicant. A response by the DRO may be extended, based on the complexity of the request(s). During the review, the Applicant may be required to submit additional information to assist the DRO in preparing the response. Resubmittal of information to the DRO will restart the response period. [Ord. 2018-002]
B. Administrative Inquiry (AI)

1. Purpose
   To establish procedures for PBC Officials when submitting inquiries to the BCC asking for direction on procedural matters or to resolve an inconsistency in a DO. [Ord. 2011-016] [Ord. 2018-002] [Ord. 2020-020]

2. Applicability
   An inquiry is not a public hearing, but is subject to the notice requirements of Table 2.B.5.A, Notification Applicability. The decision of the BCC shall be final. [Ord. 2011-016] [Ord. 2018-002]

3. Procedures
   An AI may be made by a public agency through the Zoning Director using forms and procedures established by the Zoning Division. The AI shall be placed on the BCC agenda by the Zoning Division for the date the inquiry is intended to be presented. Courtesy Notice pursuant to Art. 2.B.5, Notifications, is required for an AI applicable to a parcel for a specific inquiry or to provide development status not monitored by the provisions in Art. 2.E, Monitoring of Development Orders (DOs) and Conditions of Approval. [Ord. 2011-016] [Ord. 2017-002] [Ord. 2018-002]

C. Reasonable Accommodation

1. Purpose
   The purpose of this Section is to establish procedures for processing requests for reasonable accommodation from the County’s Unified Land Development Code and related rules, policies, practices, and procedures, for persons with disabilities as provided by the Federal Fair Housing Amendments Act (42 U.S.C. 3601 et seq.) (FHA), or Title II of the Americans with Disabilities Act (42 U.S.C. 12131 et seq.) (ADA). Any person who is disabled, or qualifying entities, may request a reasonable accommodation, pursuant to the procedures set out in this Section. [Ord. 2011-016] [Ord. 2018-002] [Ord. 2020-020]

2. Applicability
   An Applicant shall be required to apply for all applicable Development Review processes available in the ULDC prior to filing a request for reasonable accommodation, unless compliance with available Development Review processes would deprive the Applicant, or persons with disabilities served by the Applicant, of an equal opportunity to use and enjoy housing. [Ord. 2015-006] [Ord. 2018-002]

3. Notice to the Public of Availability of Accommodation
   The County shall endeavor to provide notice to the public, advising that disabled individuals or qualifying entities may request a reasonable accommodation. [Ord. 2011-016] [Ord. 2018-002]

4. Application Procedures
   The application forms and requirements for submitting a request for reasonable accommodation shall be on forms specified by the County Administrator or designee. [Ord. 2011-016] [Ord. 2018-002]

   a. Application Contents
      The following considerations shall be applicable for any application information or documentation required: [Ord. 2011-016] [Ord. 2018-002]

      1) Confidential Information
         Upon submittal of any medical information or records, including but not limited to condition, diagnosis, or history related to a disabled individual, an Applicant may request that the County, to the extent allowed by law, treat the information or records as confidential. The County shall thereafter endeavor to provide notice to the disabled individual, or their representative, of any request received by the County for disclosure of the medical information or documentation previously requested to be treated as confidential. The County will cooperate with the disabled individual, to the extent allowed by law, in actions initiated by such individual to oppose the disclosure of such medical information or documentation, but the County shall have no obligation to initiate, prosecute, or pursue any such action, or to incur any legal or other expenses, whether by retention of outside counselor, or allocation of internal resources in connection therewith, and may comply with any judicial order without prior notice to the disabled individual. [Ord. 2011-016] [Ord. 2018-002]

      2) Address of Applicant
         Address of the Applicant is requested, unless governed by 42 U.S.C. 290dd, in which case the address shall not be required, but the Applicant may be requested to provide documentation to substantiate a claim verifying applicability. [Ord. 2011-016] [Ord. 2015-006] [Ord. 2018-002]
3) **Address of Housing**
Address of housing or other location at which accommodation is requested unless governed by 42 U.S.C. 290dd, in which case address shall not be required, but the Applicant may be requested to provide documentation to substantiate a claim verifying applicability. [Ord. 2011-016] [Ord. 2018-002]

b. **Sufficiency Determination**
The County Administrator or designee shall determine whether the application is sufficient or insufficient within ten days of submittal by reviewing the information required in the application. If Staff determines the application is not sufficient, a written notice shall be sent to the Applicant specifying the deficiencies within the ten-day determination timeframe set forth herein. [Ord. 2015-006] [Ord. 2018-002]

c. **Fee**
There shall be no fee imposed by the County for a request for reasonable accommodation under this Section or an appeal of a determination on such request, and the County shall have no obligation to pay an Applicant's, or an appealing party as applicable, attorneys’ fees or costs in connection with the request, or an appeal. [Ord. 2011-016] [Ord. 2015-006] [Ord. 2018-002]

d. **County Assistance**
The County shall provide such assistance and accommodation as is required pursuant to FHA and ADA in connection with a disabled person's request for reasonable accommodation, including assistance with reading application questions, and responding to questions related to completing application or appeal forms, among others, to ensure the process is accessible. [Ord. 2011-016]

[Ord. 2018-002]

e. **Findings for Reasonable Accommodation**
In determining whether the reasonable accommodation request shall be granted or denied, the Applicant shall be required to establish that they are protected under the FHA or ADA by demonstrating that they are handicapped or disabled, as defined in the FHA or ADA. Although the definition of disability is subject to judicial interpretation, for purposes of this Ordinance the disabled individual must show: [Ord. 2011-016] [Ord. 2015-006] [Ord. 2018-002]
1) a physical or mental impairment which substantially limits one or more major life activities; [Ord. 2011-016] [Ord. 2018-002]
2) a record of having such impairment; or, [Ord. 2011-016] [Ord. 2018-002]
3) that they are regarded as having such impairment. [Ord. 2011-016] [Ord. 2018-002]
The Applicant shall demonstrate that the proposed accommodations being sought are reasonable and necessary to afford disabled persons equal opportunity to use and enjoy housing. The foregoing, as interpreted by the Courts, shall be the basis for a decision upon a reasonable accommodation request made by the appropriate PBC Official. [Ord. 2011-016] [Ord. 2015-006] [Ord. 2018-002]

f. **Authority**
The determination of which appropriate PBC Official has the authority to consider and act on requests, or appeals of a decision for reasonable accommodation, shall be consistent with Art. 1.B.1.A, Authority. [Ord. 2011-016] [Ord. 2018-002]

g. **Action by Appropriate PBC Official**
A written response shall be issued within 45 days of the date of sufficiency advising the Applicant of the PBC Official's action. [Ord. 2011-016] [Ord. 2015-006] [Ord. 2018-002]

1) **Request for Additional Information Timeframes**
If additional information is required to make a final decision, the following shall apply: [Ord. 2011-016] [Ord. 2015-006] [Ord. 2018-002]

a) Within 45 days of Sufficiency determination, a written notice requesting additional information may be requested, specifying what information is required. [Ord. 2011-016] [Ord. 2015-006] [Ord. 2018-002]

b) The Applicant shall have 15 days from the date of the written notice to respond to the request for additional information not to exceed 60 days from the date of the Sufficiency determination. [Ord. 2011-016] [Ord. 2015-006] [Ord. 2018-002]

(1) If the additional information provided by the Applicant satisfies Staffs’ request, a written determination shall be issued within 30 days. [Ord. 2011-016] [Ord. 2015-006] [Ord. 2018-002]
(2) If the Applicant fails to provide the requested additional information within the 15-day period, a notification shall be issued to the Applicant advising the Applicant that the application is considered withdrawn. [Ord. 2011-016] [Ord. 2015-006] [Ord. 2018-002] [Ord. 2020-020]

2) Determination
In accordance with Federal law, the appropriate PBC Official, shall: [Ord. 2011-016] [Ord. 2018-002]
   a) grant the accommodation request; [Ord. 2011-016] [Ord. 2018-002]
   b) grant a portion of the request and deny a portion of the request; [Ord. 2011-016] [Ord. 2018-002]
   c) impose conditions upon the grant of the request; or, [Ord. 2011-016]
   d) deny the request. Any such denial shall be in writing and shall state the grounds therefore. [Ord. 2011-016] [Ord. 2018-002]

3) Notice of Proposed Decision
All written determinations shall give notice of the right to appeal. The notice of determination shall be sent to the requesting party (i.e. the disabled individual or his/her representative) by certified mail, return receipt requested. [Ord. 2011-016] [Ord. 2018-002]

h. Appeal
Within 30 days after the appropriate PBC Official has rendered a decision on a reasonable accommodation, the Applicant may appeal the decision. This timeframe shall be based upon the date of the letter mailed to the requesting party. All appeals shall contain a statement containing sufficient detail of the grounds for the appeal. Appeals shall be to a Hearing Officer as set forth in this Code. The Hearing Officer shall, after duly noticing the Applicant of the public hearing for appeal, render a determination as soon as reasonably practicable, but in no event later than 60 days after an appeal has been filed. Such hearing shall be de novo. A Hearing Officer’s decision may be appealed to the 15th Judicial Circuit Court by Petition for Writ of Certiorari. [Ord. 2011-016] [Ord. 2018-002]

i. Stay of Enforcement
While an application for reasonable accommodation, or appeal of a determination of same, is pending before the County, the County will not enforce the subject ULDC requirement, or related rules, policies, practices or procedures, against the Applicant. [Ord. 2011-016] [Ord. 2018-002]

j. Time Limitation
A determination granting, partially granting, or granting with conditions, a reasonable accommodation, may remain valid either for one year from the date of issuance, or by the date specified in a DO or associated Condition of Approval, otherwise it shall become null and void. This provision shall retroactively apply to all prior determinations for a reasonable accommodation prior to the effective date of this Ordinance. [Ord. 2017-002] [Ord. 2018-002] [Ord. 2020-020]

k. Change of Owner/Operator
When a facility that has received a Reasonable Accommodation Approval changes ownership, the new owner/operator must apply for new reasonable accommodation. The County will review the request and make a new case-by-case determination based on an individualized assessment. [Ord. 2019-034]
CHAPTER D  ULDC PRIVATELY INITIATED AMENDMENT (PIA)

Section 1  Purpose and Intent

The PIA is a discretionary process based on BCC authority to initiate, hear, consider, approve, or deny amendments to the ULDC. The BCC or responsible PBC Official, as specified in Art. 1.B.1.A, Authority, initiate ULDC amendments, which typically includes input or requests from other governmental entities, industry, or the public. [Ord. 2018-002]

The PIA is established to provide for a transparent application process to allow non-government entities to make a formal request to the BCC to initiate amendments to the ULDC, in scenarios where the responsible PBC Official does not support initiating the amendment, or recommends Staff address the request in a future scheduled ULDC Amendment Round. [Ord. 2018-002] [Ord. 2020-001]

The PIA process is comprised of two phases, the first of which serves to minimize both Applicant and Staff resources, by allowing for an abbreviated application for initial Staff and LDRAB review, and presentation to the BCC to confirm or deny a request to initiate the amendment process. If initiated, the second phase requires additional specificity and supporting information from the Applicant, coordination with Staff and any interested parties to refine and calibrate the amendment, but otherwise follows the standard procedure for the processing of ULDC amendments. The BCC may request a Subcommittee be established by the LDRAB to provide expertise and additional time to review and consider the final language before presenting it for a final decision to the BCC [Ord. 2018-002] [Ord. 2020-001]

Under no circumstance will a PIA be processed that is in violation of State, Federal, or other applicable local government laws, or where inconsistent with the Comprehensive Plan, except where submitted with a concurrent amendment to the Plan. [Ord. 2018-002]

Section 2  Authority

Acceptance of a PIA application to amend the ULDC shall be at the discretion of the responsible PBC Official as specified in Art. 1.B.1.A, Authority, in consultation with the Zoning Director. Any private application to amend the Comprehensive Plan that will require a concurrent or subsequent amendment to the ULDC, shall comply with the following: [Ord. 2018-002]

A. The Applicant shall include documentation confirming that the responsible PBC Official and the Zoning Director have been consulted prior to Submittal of an amendment to the Comprehensive Plan; and [Ord. 2018-002] [Ord. 2020-001]

B. Submittal of a concurrent PIA application to amend the ULDC, unless the responsible PBC Official specifies an alternative submittal deadline. The responsible PBC Official, in consultation with the Zoning Director, shall have the discretion to waive the Phase 1 PIA requirement, provided that this is specified in the initiation requests to the Planning Commission and BCC. [Ord. 2018-002]

Section 3  Standards

Evaluation of a PIA shall include consideration of the following standards: [Ord. 2018-002]

A. Extent to which any other alternatives to a Code amendment have been evaluated, a summary of any recommendations or direction provided by the BCC, County Staff in prior meetings, and where applicable, why the amendment is being requested in lieu of such alternatives. [Ord. 2018-002]

B. Does not violate State, Federal, or other local government laws; [Ord. 2018-002]

C. Will be consistent with the Comprehensive Plan, or will otherwise be submitted pursuant to or concurrent with an application to amend the Plan; [Ord. 2018-002]

D. Will not be in conflict with any other ULDC provisions or amendment will also address the other inconsistencies; [Ord. 2018-002]

E. The request has been demonstrated to be a new industry trend not anticipated by the Comprehensive Plan or ULDC; and, [Ord. 2018-002]

F. Identification of examples of similar land development regulations adopted in other jurisdictions under the same circumstances, such as similar FLU designation or zoning districts, compatibility, buffering, roadway frontage, and other similar site considerations. [Ord. 2018-002]
Section 4  Mandatory Pre-Application Appointment (PAA)

A. Applicability
A PAA is mandatory for any request for a PIA, or for any proposed Plan amendment that will require an amendment to the ULDC. [Ord. 2018-002]

B. Purpose
The purpose of the PAA is to confirm that a potential Applicant has coordinated with Staff to evaluate or exhaust all other potential options and has performed sufficient due diligence to ascertain the viability of the request. [Ord. 2018-002]

C. PAA Requirements
The Applicant shall provide a Justification Statement and any necessary supporting documentation outlining the rationale for the proposed amendment, to include a preliminary evaluation of the Standards cited above. [Ord. 2018-002]

D. Decision
The applicable responsible PBC Official shall provide a written response within seven working days affirming if a PIA will be supported, not supported, or if additional follow up is required by the Applicant. Other options may be applicable, including where the Applicant and responsible PBC Official may agree to a Staff-initiated amendment based on currently two Rounds of Amendments each year or a standalone Ordinance based on BCC direction when the amendment is requested to be expedited. [Ord. 2018-002] [Ord. 2020-001]

Section 5  Application Procedures

As the PIA is a discretionary process, acceptance of an application is typically determined through a higher level of collaboration between the Applicant and applicable PBC Official, or designee. Upon completion of the mandatory PAA and affirmation by the responsible PBC Official that the PIA may be processed, the application shall be submitted in accordance with the following Application Procedures. [Ord. 2018-002] [Ord. 2020-001]

A. General Overview
The PIA is comprised of two phases as outlined under Purpose and Intent above. [Ord. 2018-002]

1. Phase 1
The Phase 1 PIA allows an Applicant to submit a preliminary request for Staff evaluation and recommendation, presentation to the LDRAB for recommendation, and final presentation to the BCC to deny the request, or direct the responsible PBC Official to accept a request for a Phase 2 PIA, or other direction including scheduling, limitations, or other similar. [Ord. 2018-002]

2. Phase 2
The Phase 2 PIA requires the Applicant to coordinate with Staff and any interested parties, and requires a more detailed analysis with supporting documentation to substantiate the request. Once the review and analysis of the proposed amendment is completed, it shall be scheduled for presentation to the LDRAB and LDRC for a final recommendation and determination of consistency with the Comprehensive Plan. The request will be scheduled for a BCC Hearing for a presentation and Request for Permission to Advertise. Pursuant to approval of the request to advertise, one or more duly noticed Public Hearings are required, in accordance with F.S. § 125.66. [Ord. 2018-002] [Ord. 2020-001]

B. Application Requirements
Applications shall be in a form established by the responsible PBC Official, in consultation with the Zoning Director. [Ord. 2018-002] [Ord. 2020-001]

C. Sufficiency Review
The Applicant shall be notified whether or not the application is sufficient or insufficient no more than 30 calendar days from the date of receipt of a Phase 1 PIA application. Sufficiency review is not required for Phase 2. [Ord. 2018-002] [Ord. 2020-001]

1. Sufficiency
If the application is determined to be sufficient by the applicable PBC Official, it shall be reviewed and evaluated pursuant to the procedures and standards of this Chapter. [Ord. 2018-002]

2. Insufficiency
If an application is determined to be insufficient, Staff shall provide written notification to the Applicant summarizing the deficiencies. [Ord. 2018-002] [Ord. 2020-001]

a. No further action may be taken on the application until the deficiencies are remedied. [Ord. 2018-002] [Ord. 2020-001]
b. The Applicant shall address all insufficiencies and resubmit the application to the Zoning Division within 30-calendar days after the application was determined to be insufficient. [Ord. 2018-002] [Ord. 2020-001]

c. If the application is amended and determined to be sufficient, the application may be processed for review. [Ord. 2018-002] [Ord. 2020-001]

d. If the deficiencies are not remedied in the revised Submittal, or fails to submit revised documents within 30-calendar days, a second written notification shall be sent to the Applicant. The letter shall indicate that the application is considered withdrawn unless a written request for a time extension has been submitted and approved by the Zoning Director pursuant to Art. 2.D.5.C.3, Time Extension. [Ord. 2020-001]

3. Time Extension
The Applicant may submit a written request for an extension of time to the Zoning Director if an additional 30-calendar days is needed to address unresolved issues. Such request shall be submitted to the Zoning Director no later than five days after the issuance of the second written notification. [Ord. 2020-001]

4. Administrative Withdrawal
If the Applicant fails to address the insufficiencies or request and receives a time extension, it shall result in an Administrative withdrawal of the application. [Ord. 2020-001]

D. Review and Resubmittal, Phase 1 and Phase 2
Staff review shall be based on the application deemed sufficient and the subsequent resubmittals. Staff shall prepare a list of issues and comments and make it available to the Applicant. The Applicant shall provide written responses and revised documents, if applicable, addressing the outstanding issues and comments. The Applicant shall demonstrate that the application has met the Standards cited in Art. 2.D.3, Standards. When all of the issues and comments have been addressed, the PIA may be scheduled for the LDRAB or LDRC Hearing, as applicable. [Ord. 2018-002] [Ord. 2020-001]

1. Staff Report and Recommendation
The responsible PBC Official reviewing the application shall prepare a report for both Phase 1 and 2 PIA applications, which incorporates an analysis of the Standards cited above, confirmation of consistency with the Plan, and evaluation of any other issues identified through the amendment process, and make a recommendation of approval, denial, or an alternative amendment. In the case of a Phase 1 PIA, the recommendation for approval may be limited to indicating that the request merits consideration. The report shall be made available to the public at least five days prior to the hearing date. [Ord. 2018-002]

E. Application Modification after Completion of Staff Review
Applications shall not be modified after completion of Staff review, unless requested or agreed to by the responsible PBC Official, the latter of which may be subject to postponement of any scheduled meetings or Hearings. Modifications after presentation to the LDRAB/LDRC may not be permitted where substantially different from what the LDRAB reviewed, or where such may alter the original LDRC consistency determination. [Ord. 2018-002] [Ord. 2020-001]

F. Scheduling
Once Staff has completed the review of the application, it shall be scheduled for the appropriate public hearings established on the Annual Zoning Calendar, or such time as mutually agreed upon between the Applicant and the PBC Official, in consultation with the Zoning Director. [Ord. 2018-002] [Ord. 2020-001]

1. Phase 1
A Phase 1 PIA shall be scheduled for presentation to the LDRAB to obtain a preliminary recommendation, and to the BCC at a Public Hearing for direction on initiating the amendment. [Ord. 2018-002]

2. Phase 2
A Phase 2 PIA shall be scheduled for presentation to the LDRAB to obtain a recommendation, the LDRC for a consistency determination with the Plan, and the BCC for Request for Permission to Advertise, and one or more Public Hearings, in accordance with F.S. § 125.66. [Ord. 2018-002]

a. Scheduling Options
Applicants are encouraged to process a PIA within the timeframes for Amendment Rounds established annually by the Zoning Division. Applicants may opt to request that a PIA be scheduled for the first available LDRAB, LDRC, or BCC Zoning Hearings, but this may result in additional fees to cover required notifications. [Ord. 2018-002]
Section 6 Notification

A. Applicability
Public notification is required for LDRC meetings and BCC Public Hearings, excluding Requests for Permission to Advertise for Public Hearings. [Ord. 2018-002]

B. Newspaper Publication
Notice shall be posted in a newspaper of general circulation in PBC, as follows: [Ord. 2018-002]
1. LDRC Meeting
   In accordance with PBC PPM #CW-L-038. [Ord. 2018-002]
2. BCC Public Hearings
   In accordance with F.S. § 125.66. [Ord. 2018-002]

C. Postponements
All applications postponed for three or more consecutive LDRC meetings or Public Hearings, shall require that the newspaper notification be republished. [Ord. 2018-002]

Section 7 Action by LDRAB and LDRC

A. Advisory Board
The LDRAB is the designated advisory board for the majority of the ULDC; however, there may be other entities tasked with reviewing specific ULDC provisions. All ULDC amendments are subject to LDRC review. [Ord. 2018-002]
1. Meeting
   The advisory board shall consider the application, staff report, relevant support materials, and public testimony given at the meeting. [Ord. 2018-002]
2. Recommendation
   In concluding that portion of the meeting designated on the agenda for a PIA, the advisory board shall recommend to the BCC that the application be approved, approved with modifications, or denied, based on the standards for a PIA, unless the Applicant and responsible PBC Official agrees to a continuance or postponement. [Ord. 2018-002]

B. LDRC
   A Phase 2 PIA shall be presented to the LDRC, which shall make a determination of consistency with the Plan. [Ord. 2018-002]

Section 8 Action by the BCC
After review and recommendation by the LDRAB, including LDRC consistency determination for a Phase 2 PIA, the application shall be considered at the next available regularly scheduled Public Hearing by the BCC, or such time as is mutually agreed upon between the Applicant and responsible PBC Official. [Ord. 2018-002]

A. Public Hearing
   At the public hearing(s), the BCC shall consider the application, staff report, relevant support materials, the recommendation of the LDRAB, the testimony given, and the evidence introduced into the record at the public hearing(s). [Ord. 2018-002]

B. Postponements, Continuance, or Remand
   The BCC shall have the discretion to postpone or continue any PIA application at any time, or remand the application back to the LDRAB. [Ord. 2018-002]

C. Decision
   1. Phase 1
      At the conclusion of the hearing, the BCC may elect to initiate the amendment, initiate with additional modifications or stipulations, or deny the request. [Ord. 2018-002]
   2. Phase 2
      A Phase 2 PIA shall require a Public Hearing to Request for Permission to Advertise required Public Hearings, and one or more Public Hearings in compliance with F.S. § 125.66. At the conclusion of the final Public Hearing, the BCC may approve, approve with modifications, or deny the PIA application. [Ord. 2018-002] [Ord. 2020-001]

D. Conduct at Hearing
Section 9   Appeals

The PIA process is discretionary and not subject to appeals. [Ord. 2018-002]

CHAPTER E   MONITORING OF DEVELOPMENT ORDERS (DOs) AND CONDITIONS OF APPROVAL

Section 1   General

A. Purpose and Intent
The purpose of this Chapter is to establish procedures to ensure compliance with Development Orders (DOs) and Conditions of Approval in a timely manner, through a mandatory review process. The procedures create a system that ensures compliance with Conditions of Approval, timely commencement and completion of development, and revocation or modification of development approvals. The intent of monitoring DOs and Conditions of Approval (including buildout) is to preserve the availability of public facilities and services for proposed future development, require compliance with improved performance and site design standards, and ensure that DOs are implemented in a timely manner. The intent of monitoring Community Development District (CDD) and FLUA ordinance conditions is to ensure that conditions imposed by the BCC are met in a timely manner and to provide a mechanism to address the violation [Ord. 2020-001]

B. Applicability
1. This Chapter shall apply to: [Ord. 2020-001]
   a. All DOs with a time limitation for Conditions of Approval, or as a part of the development process as required by specific Articles of this Code; [Ord. 2020-001]
   b. All DOs as required by the ULDC; [Ord. 2020-001]
   c. All CDD ordinances with Conditions of Approval; and, [Ord. 2020-001]
   d. All FLUA ordinances with Conditions of Approval. [Ord. 2020-001]

2. Responsibilities
   a. The Applicant or owner shall communicate with the responsible agency, and demonstrate completion of the applicable Conditions of Approval. [Ord. 2020-001]
   b. Upon completion of the Conditions of Approval, PZB will allow issuance of the Building Permit or relevant event to occur. [Ord. 2020-001]
   c. Projects not meeting the Conditions of Approval due dates or event action shall be subject to the provisions set forth in Art. 2.E.3, Procedures for Compliance. [Ord. 2020-001]

C. Exemptions
1. Any DOs in whole or in part, that apply to lands that are owned by a unit of Local, State, and/or Federal Government, provided the DO is utilized for buildings or facilities that are owned by a government entity and support customary government operations and/or delivery of public services; [Ord. 2020-001]
2. Any DOs for a Rezoning of a single lot to a Residential Zoning District for a Single Family residential use; and, [Ord. 2020-001]
3. A Rezoning to a Standard Zoning District, unless it has a COZ. [Ord. 2020-001]
Section 2 Monitoring Elements

A. Commencement of Development
Approved DOs shall be monitored for commencement of development. Commencement of development shall consist of the following requirements: [Ord. 2020-001]
1. For development with a single building, the first inspection approval for the foundation of the structure; [Ord. 2020-001]
2. For development with multiple buildings, the first inspection approval for the first component of the primary structure; [Ord. 2020-001]
3. For residential development, the subdivision of land into parcels through the recordation of a plat; [Ord. 2020-001]
4. For Type 3 Excavation sites, extraction of minerals for commercial purposes. [Ord. 2020-001]

B. Commencement of Development is Not
1. Demolition of a structure; [Ord. 2020-001]
2. Deposit of refuse, solid, or liquid waste; or fill on the parcel, unless the DO is exclusively and specifically for such a use; or, [Ord. 2020-001]
3. Clearing of land. [Ord. 2020-001]

C. Time Limitations for Commencement
1. All DOs shall comply with a time limitation requirement for commencement as follows: [Ord. 2020-001]
   a. DOs shall commence within four years of adoption date. [Ord. 2020-001]
   b. Standalone Variances shall be utilized within one year, unless stated otherwise by the Resolution or Result Letter. [Ord. 2020-001]
   c. Each additional phase of a phased development shall commence within four years of commencement of the previous phase. [Ord. 2020-001]
   d. Each phase of a Type 3 Excavation shall be established by a Condition of Approval. [Ord. 2020-001]
2. Projects not meeting the time limitations for commencement shall be subject to the provisions set forth in Art. 2.E.3, Procedures for Compliance. [Ord. 2020-001]

D. Time Limitations for Buildout
The Buildout Period shall be determined by Art. 12.C.1.B.3, Projected Buildout Period, and monitored for compliance. However, Conditions of Approval with a time-certain Project Buildout date may be provided an additional 90-days if a complete Building Permit application has been submitted to the Building Division prior to this deadline. [Ord. 2020-001]

E. DOs with Conditions of Approval
1. All DOs with Conditions of Approval that must be completed prior to a date, event, or action shall be monitored for compliance. [Ord. 2020-001]
2. All monitoring DOs shall comply with the provisions of Art. 2.E.3, Procedures for Compliance. [Ord. 2020-001]

F. Community Development District Ordinances with Conditions of Approval
1. All Community Development District (CDD) ordinances with Conditions of Approval that must be satisfied prior to a date or action shall be monitored for compliance. [Ord. 2020-001]
2. No Administrative Time Extensions may be applied to CDD ordinances. [Ord. 2020-001]
3. In the event of a failure to comply with a CDD ordinance Condition of Approval, the Planning Director, or designee, shall: [Ord. 2020-001]
   a) Notify Applicant of potential violation and enforcement procedures as established in Art. 10, Enforcement; or
   b) Prepare a Status Report per Art. 2.E.3.C, Status Reports. [Ord. 2020-001]

G. FLUA Ordinances with Conditions of Approval
1. All FLUA ordinances with Conditions of Approval that must be satisfied prior to a date or action shall be monitored for compliance. [Ord. 2020-001]
2. No Administrative Time Extensions may be applied to FLUA ordinances. [Ord. 2020-001]
3. Failure to comply with an FLUA ordinance Condition of Approval shall require the Planning Director, or designee, to bring the item before the BCC at the next regularly-scheduled Planning or Zoning Public Hearing for consideration of noncompliance. [Ord. 2020-001]

H. Notification Prior to a Due Date
No later than 30 days prior to a due date for any of the above items, a letter shall be issued to the address of the owner of record as it appears in the official records of the PBC Property Appraiser’s Office. [Ord. 2020-001]
Section 3 Procedures for Compliance

A. General
An Applicant, not in compliance with this Chapter, may utilize and exhaust all procedures established in this Chapter in order to comply with the Conditions of Approval and commencement of development that must be satisfied prior to a date or action. [Ord. 2020-001]

B. Administrative Extension of Time
1. The Applicant may file for an Administrative Time Extension to the Executive Director, or designee. The Executive Director, or designee, may grant an extension of time to comply with a requirement and shall consider changed circumstances or mitigating factors that prevent compliance. [Ord. 2020-001]
2. An Administrative Time Extension may be applied to an expiring buildout condition due date. The application must be accompanied by a traffic study. [Ord. 2020-001]
3. The maximum duration of an Administrative Time Extension is as follows: [Ord. 2020-001]
   a. Commencement of Development Public Hearing DO
      24 months, unless stated otherwise. [Ord. 2020-001]
   b. Commencement of Development Administrative DO
      Each separate Administrative Time Extension shall not exceed 12 months. [Ord. 2020-001]
   c. Buildout Conditions
      Extension will reflect the results of the traffic review. [Ord. 2020-001]
   d. Conditions of Approval not Requiring the Posting of Performance Security
      1) 12 months, unless stated otherwise in the Condition of Approval. [Ord. 2020-001]
      2) Subsequent applications may be filed; however, the total administrative extensions approved shall not exceed 24 months for the current DO. [Ord. 2020-001]
   e. Conditions of Approval Requiring the Posting of Performance Security
      A one-time Administrative Time extension not to exceed six months shall be the maximum. [Ord. 2020-001]
5. When the Executive Director of PZB, or designee, approves an extension of time for completion of a time-certain requirement, the Property Owner may be required to guarantee the completion by furnishing a cash deposit, letter of credit, or surety bond. [Ord. 2020-001]
6. A time extension for a government-caused delay shall not exceed 24 months. [Ord. 2020-001]
   a. It is the responsibility of the Property Owner to notify Staff in writing of the reason and cause of the delay. [Ord. 2020-001]
   b. No application or fee will be required. [Ord. 2020-001]
   c. If the delay prevents compliance with this Chapter, an additional extension may be granted. [Ord. 2020-001]

C. Status Reports
1. General
   An application for a Status Report may be requested by the Property Owner, or initiated by the Executive Director of PZB, or designee, if one of the following occurs: [Ord. 2020-001]
   a. A Property Owner fails to comply with a time limitation and has not requested a time extension. [Ord. 2020-001]
   b. The project received a public hearing approval and has exhausted all available administrative extensions. [Ord. 2020-001]

2. Scheduling
   a. PZB shall advertise a Status Report public hearing for the Decision Making Bodies that approved the DO. [Ord. 2020-001]
   b. A Status Report may be requested by a Property Owner, but a request for a time extension may not be made prior to six months before commencement due date. [Ord. 2020-001]

3. Staff Report and Recommendation
   The PZB Director or designee, shall prepare a Status Report for each application. The report shall incorporate the analysis and Conditions of Approval in question and a recommendation of approval, approval with conditions, or denial based on the applicable standards for the BCC to consider. [Ord. 2020-001]
4. Status Report Submittal and Review Criteria
   a. The Property Owner/Applicant shall submit to the Monitoring Section the following:
      1) summary of the background and current status of the development including any 
         documentation provided to Staff of efforts to comply with the requirement, or circumstances 
         beyond the control and cause of the Property Owner, other than economic conditions, which 
         have prevented compliance; [Ord. 2020-001]
      2) a description of any Code violations; [Ord. 2020-001]
      3) a description of any uncompleted condition or time-certain requirements. [Ord. 2020-001]
   b. Summary of items to be reviewed by Staff: [Ord. 2020-001]
      1) a review of previous extensions of time (for a Status Report prepared for noncompliance with 
         a time-certain requirement); [Ord. 2020-001]
      2) evaluate and consider any changed circumstances and mitigating factors; and, [Ord. 2020-
         001]
      3) a determination of whether the Development Order is consistent with the Plan and is consistent 
         with the Code. [Ord. 2020-001]

5. Procedures
   Consideration of all actions permitted by Art. 2.E.3.B, Administrative Extension of Time, except a 
   Rezoning, shall occur in the following manner: [Ord. 2020-001]
   a. Public Hearing
      1) At least one public hearing shall be held by the ZC or by the BCC, as applicable. [Ord. 2020-
         001]
      2) If the project involves a Rezoning for ten acres or more, two public hearings shall be held by 
         the BCC. [Ord. 2020-001]
   b. Mail Notice
      The owner of record shall be notified in writing of the Status Report and recommendation to the 
      BCC or ZC. Written notice shall consist of a letter send at least 14 calendar days prior to the hearing 
      by certified mail; 30 calendar days for a Rezoning, return receipt requested, to the last known 
      address of the owner of record as it appears in the records of the PBC Property Appraiser's Office. 
      In the event that the owner fails to acknowledge receipt of mail notice or the notice is returned 
      unopened, newspaper publication in accordance with F.S. § 125.66(2)(a) shall be deemed 
      sufficient notice, published at least ten days prior to the hearing. [Ord. 2020-001]

6. Decision of the BCC or ZC
   The BCC or ZC shall consider the factors enumerated in Art. 2.E.3.C.4, Status Report Submittal and 
   Review Criteria above and the recommendation of Staff. After deliberation, the BCC or ZC shall take 
   one or more of the following actions: [Ord. 2020-001]
   a. Grant a Time Extension
      1) To commence development, utilize a Conditional Use, or record a plat for a period not to 
         exceed 36 months from the date of BCC or ZC approval. [Ord. 2020-001]
      2) To comply with a Condition of Approval for a period not to exceed 24 months from the date of 
         the BCC or ZC approval with the exception of time-certain Project Buildout date condition(s) as 
         mandated by the Traffic Performance Standards. A Project Buildout date condition may receive 
         approval of a time extension up to the Buildout Period assumed in the traffic study. [Ord. 2020-
         001]
   b. Adopt a resolution which will rezone the property to an appropriate zoning district; [Ord. 
      2020-001]
   c. Adopt a resolution which will revoke or amend the approval for all or a portion of the 
      Conditional Use, Special Exception, or Development Order Amendment; [Ord. 2020-001]
   d. Adopt a resolution which will impose additional or modified conditions, voluntary 
      commitments, or permit the Property Owner to initiate an application to add or modify 
      conditions or voluntary commitments, as directed by the BCC or ZC. New or modified 
      conditions or voluntary commitments shall include bring the development into conformity 
      with current codes and regulations; [Ord. 2020-001]
   e. Direct Staff to cite the Property Owner for violating the provisions of this Code; [Ord. 2020-
      001]
   f. Adopt a resolution to amend or revoke the Development Order or Map Amendment for the 
      undeveloped or unplatted portion of the project; [Ord. 2020-001]
g. Exempt from further review of any DO which rezoned property to a district which does not exceed the density or intensity permitted by the Future Land Use designation, provided there is no Concurrency Reservation or exemption for the property. This exemption may be applied to any advertised Status Report after adoption of this Amendment; and/or, [Ord. 2020-001]

h. Deny or revoke a Building Permit; issue a stop work order; deny or revoke a Certificate of Occupancy (CO) on any building or structure; revoke any concurrency; deny or revoke any permit, license, or approval for any developer, owner, lessee, or user of the subject property. [Ord. 2020-001]

D. Decision of the DRO
A Property Owner may submit an application for a time extension to the DRO for any Condition of Approval imposed by the DRO. The DRO must receive the application prior to the compliance deadline stated in the Condition of Approval. [Ord. 2020-001]
1. The DRO shall consider changed circumstances or mitigating factors. [Ord. 2020-001]
2. The DRO may take the following action: [Ord. 2020-001]
   a. Grant a time extension not to exceed 12 months; [Ord. 2020-001]
   b. Revoke the approval of DO; [Ord. 2020-001]
   c. Amend or delete the Condition of Approval; or, [Ord. 2020-001]
   d. Direct Code Enforcement Staff to seek enforcement procedures. [Ord. 2020-001]

E. Failure to Use Variance
If a Property Owner fails to utilize a Variance within the timeframe as provided, the Variance shall become invalid. [Ord. 2020-001]

Section 4 Noncompliance

A. General
If the procedures for compliance are exhausted and a Property Owner continues to violate a Condition of Approval, suspension of all development activity authorized by a DO shall occur. Once the matter is compliant, development activity may resume. [Ord. 2020-001]

B. Suspension of Development Orders
Suspension of DOs may occur upon failure to comply with one or more time limitations or failure to comply with a Condition of Approval. [Ord. 2020-001]
1. Expiration of Time Periods
   Upon expiration of any time period established by this Chapter or failure to comply with, or continued violation of a Condition of Approval, no new DOs affecting the property shall be issued by PBC, and no action to vest the DO shall be permitted, until a final determination is made by the Executive Director, or BCC or ZB pursuant to Art. 2.E.3, Procedures for Compliance. This suspension of development rights shall not preclude the Property Owner from filing a new application for the subject property to amend or supersede an existing Development Order, or the BCC or ZC from approving this application. [Ord. 2020-001]
2. Effect of Suspension
   The suspension of development rights shall have the following effect on new applications and Code Enforcement actions: [Ord. 2020-001]
   a. If a Property Owner files a new application, no new DOs shall be issued until the completion of the Zoning process to resolve the noncompliance, except the DO which approves the application. [Ord. 2020-001]
   b. If the Property Owner is referred to Code Enforcement for violating the provisions of the DO, no new DOs shall be issued until the alleged violation has been ruled upon by the Code Enforcement Special Master, and any enforcement action is completed, or penalty is satisfied. This shall not, however, prelude compliance with the specific condition cited in the Status Report after the BCC or ZC has directed the Code Enforcement Division to cite the Property Owner for noncompliance with that condition. [Ord. 2020-001]
CHAPTER F  CONCURRENCY (ADEQUATE PUBLIC FACILITY STANDARDS)

Section 1  General

A. Purpose and Intent
The purpose and intent of this Section is to ensure that adequate potable water, sanitary sewer, solid waste, drainage, park, road and mass transit public facilities, and fire-rescue are available to accommodate development concurrent with the impact of development on such public facilities, consistent with the LOS standards for those public facilities adopted in the Plan. This objective is accomplished by (1) establishing a management and monitoring system to evaluate and coordinate the timing and provision of the necessary public facilities to service development; and (2) by establishing a regulatory program that ensures that each public facility is available to serve development concurrent with the impacts of development on public facilities. [Ord. 2018-002]

B. Authority
The BCC has the authority to adopt this Article pursuant to Art. VIII, § 1, Fla. Const., the PBC Charter, F.S. § 125.01, et seq., F.S. § 163.3161(8), F.S. § 163.3177(10)(h), and F.S. § 163.3202(2)(g).

C. Applicability
1. General
Concurrency shall be obtained for all Development Orders and subsequent Development Orders unless the project is exempt from the requirements of this Article.

D. Exemptions
The following shall be exempt from the requirements of this Article:
1. All Development Orders that have received a Concurrency Exemption Certificate or Concurrency Exemption Extension Certificate, pursuant to the “Concurrency Exemption Ordinance of PBC” and the “Concurrency Exemption Extension Ordinance;”
2. A lot of record which (a) meets the density requirements of the Plan, as amended, or (b) qualifies for an administrative order exempting it from the density requirement of the Plan;
3. An alteration or expansion of a development that does not create additional impact on public facilities;
4. The construction of accessory buildings and structures that does not create additional impact on public facilities;
5. The replacement of a dwelling unit within one year of its removal; and,
6. The official list of additional specific permit types as established by the Zoning Director which are deemed to have no impact on public facilities.

E. Unified Planning Area
1. If a unified planning area is adopted and implemented by the BCC, through resolution, such unified planning area shall be considered concurrent through the date specified in the resolution, provided:
   a. The terms of the resolution adopting and implementing the unified planning area are being met in good faith; and
   b. The impacts of the unified planning area on the public facilities have been addressed.
2. Adequate public facility standards for the unified planning area shall be maintained providing Art. 2.F.1.E.1.a, Art. 2.F.1.E, Unified Planning Area, have been met, regardless of the impact of subsequently approved or background traffic that may generate traffic in the unified planning area, on affected roadways or other public facilities.
Section 2  LOS Standards

The LOS standards for public facilities are contained in the Plan and shall apply in the review of development pursuant to the procedures and standards of this Article.

Section 3  Review for Adequate Public Facilities

A.  General
To ensure that adequate potable water, sanitary sewer, solid waste, drainage, parks and recreation, road, mass transit, and fire-rescue public facilities are available concurrent with the impacts of development on each public facility, PBC shall establish the following development review procedures. [Ord. 2018-002]

B.  Procedure for Review of Application for a Concurrency Reservation
1. Submission of Application
   a.  Concurrency Reservation
   An application for a Concurrency Reservation shall be submitted jointly with an application for a Development Order (joint review), to the Zoning Director in a form established by the Zoning Director and made available to the public. If the proposed development does not require Site Plan approval, the application shall be submitted at scheduled intake times (separate review) as specified on the Annual Zoning Division Calendar. The application shall be accompanied by a fee established by the BCC for the filing and processing of each application. The fee shall be non-refundable. [Ord. 2006-055]

   b.  WHP Traffic Concurrency Hall Pass
   A WHP Traffic Concurrency Hall Pass is a provisional traffic concurrency approval that may be used for Projects subject to Art. 5.G.1, Workforce Housing Program (WHP). A WHP Traffic Concurrency Hall Pass Certificate shall be considered a traffic Concurrency Reservation only for the purposes of Art. 12.C.1.C.4.c, TPS Database, and shall be valid for a period of not more than 90 days.

   An application for a WHP Traffic Concurrency Hall Pass may be submitted separate from an application for a Development Order to the Traffic Director in a form established by the Traffic Director and made available to the public. The application may be submitted at any time and shall be accompanied by a fee established by the BCC for the filing and processing of each application. The fee shall be non-refundable. [Ord. 2006-055]

2.  Determination of Sufficiency
   a.  Separate Review
   Upon receipt of the application, the Zoning Director (or Traffic Director, in the case of a WHP Traffic Concurrency Hall Pass) shall initiate a review and within ten days determine whether the application is sufficient. If it is determined that the application is not sufficient, written notice shall be sent to the Applicant specifying the deficiencies. The Zoning Director (or Traffic Director, in the case of a WHP Traffic Concurrency Hall Pass) shall take no further action on the application unless the deficiencies are remedied. If the deficiencies are not remedied within 20 days of written notification, the application shall be considered withdrawn. [Ord. 2006-055]

   b.  Joint Review
   Sufficiency determination is subject to the regulations for the specific Development Order requested as outlined in Art. 2.B.7.C, Development Order Amendment (DOA). Insufficiency of any portion of an application submitted under joint review shall result in the insufficiency of the concurrency application.

3.  Determination of Review
   The Zoning Director shall also determine whether all service providers are required to review the application. If the Director determines that two or less public facilities are impacted by the proposed development, the application may be eligible for a reduced concurrency review fee. The Zoning Director, where appropriate, shall consult with the service providers in making such determination.
4. Review and Recommendation
   a. Separate Review
      Within ten days of submittal or resubmittal, the application shall be forwarded to the PBC
      Departments and service providers for review. Within 15 working days of its receipt, the appropriate
      PBC Departments and service providers shall file a statement with the Zoning Director as to
      whether or not adequate public facilities are available, pursuant to the standards of Art. 2.F.3.C,
      Standards for Review of Application for Adequate Public Facilities Determination and Concurrency
      Reservation. In the case of an application for a WHP Traffic Concurrency Hall Pass, the same
      review time frames shall apply and the statement as to whether or not adequate public facilities are
      available pursuant to the standards of Art. 2.F.3.C, Standards for Review of Application for
      Adequate Public Facilities Determination and Concurrency Reservation, shall be filed with the
      Traffic Director, with a copy to the Zoning Director. [Ord. 2006-055]

   b. Joint Review
      The application shall be distributed to the PBC Departments and service providers for review
      together with application for Development Order.

5. 90-Day Negotiation
   a. Separate Review
      If the Zoning Director (or Traffic Director, in the case of a WHP Traffic Concurrency Hall Pass)
      determines that an application fails to meet any one of the public facility component standards of
      Art. 2.F.3.C, Standards for Review of Application for Adequate Public Facilities Determination and
      Concurrency Reservation, the Applicant shall be notified of such deficiency(s) in writing. If the
      Applicant does not notify the Zoning Director (or Traffic Director, in the case of a WHP Traffic
      Concurrency Hall Pass) in writing that he/she wishes to withdraw the application, the application
      shall be entered into a 90-day negotiation period with the service provider. [Ord. 2006-055]
      1.) If during the 90-calendar day negotiation period, the Applicant addresses the deficiencies, the
          application shall be reconsidered by the Zoning Director (or Traffic Director, in the case of a
          WHP Traffic Concurrency Hall Pass) and approved or denied consistent with the standards of
          this Chapter. [Ord. 2006-055]
      2.) If the deficiencies are not resolved within 90 calendar days, the application shall be denied.

   b. Joint Review
      The timing and review of an application shall be consistent with the timing and review procedures
      outlined in the Article, for the requested Development Permit. Approval of the Development Permit
      shall not be granted until Concurrency is approved. [Ord. 2010-022]

   c. Extension of 90-Day Negotiation Period
      Prior to expiration of a reservation, if it is documented that a government-caused delay the failure
      of a Development Order to be issued, the Zoning Director shall grant such extensions as necessary
      to offset government-caused delays, not necessarily equal to the time of the delay. Each extension
      shall be based only on a delay that has already occurred.

6. Approval
   a. Separate Review
      If it is determined by the service providers that adequate public facilities are available, the Zoning
      Director shall review the statements and the application for compliance with all the public facility
      component standards of Art. 2.F.3.C, Standards for Review of Application for Adequate Public
      Facilities Determination and Concurrency Reservation, and the density requirements of the Plan,
      and shall issue a Certificate for Concurrency Reservation. [Ord. 2005-002]

   b. Joint Review
      Concurrency approval shall be indicated directly on the Certified Plan pursuant to the DRO
      Technical Standards, for projects that require Site Plan approval. For projects that do not require
      Site Plan approval, a reservation shall be issued.

   c. WHP Traffic Concurrency Hall Pass Certificate
      If it is determined that adequate public facilities are available in compliance with the Art. 2.F.3.C.3,
      Traffic Facilities, the Traffic Director shall issue a Hall Pass Certificate. An application for a
      Concurrency Reservation in conjunction with a Development Order application shall be submitted
      within 90 days of issuance of the Traffic Concurrency Hall Pass Certificate or else it shall expire.
      [Ord. 2006-055]
C. Standards for Review of Application for Adequate Public Facilities Determination and Concurrency Reservation

The following standards for each facility shall be used in deciding whether to approve or deny a Concurrency Reservation.

1. **Potable Water, Sanitary Sewer, Solid Waste and Park and Recreation and Linked Open Space and Fire-Rescue Facilities**
   
   Facilities to provide the proposed development sufficient services based on the LOS for facilities are in place, or under construction and bonded; or the subject of a binding and executed contract; or are included in PBCs Capital Improvement Annual Budget or the service provider’s annual budget; or the PBCHD has verified and approved that capacity is available.

2. **Drainage Facilities**
   
   The drainage component shall be approved if the proposed development has a legal right to convey stormwater to a point of legal positive outfall or meets the exemption provisions of Art. 5.C, Design Standards.

3. **Traffic Facilities**
   
   The roads component shall be approved if the proposed development complies with Art. 12, Traffic Performance Standards. In determining whether the road component meets the requirements of this Subsection, the Five Year Road Improvement Schedule in the Capital Improvement Element may be considered only if the development proposed in the application is phased so that the impacts of the proposed development and the capacity provided by the road projects in the Five-Year Road Improvement Schedule will occur concurrently. The phasing of development and transportation improvements to ensure the LOS for road facilities is met may be addressed through a development or road agreement. [Ord. 2006-055]

4. **Mass Transit Facilities**
   
   The mass transit component shall be approved if the travel demand of the proposed development does not deteriorate the LOS for mass transit facilities below the adopted LOS for mass transit facilities.

D. Rules of General Applicability for a Concurrency Reservation

1. **Expiration**
   
   Unless revoked by the BCC or the ZC reservation is valid for the life of a specific Development Order pursuant to this Chapter, or shall expire one year from the date of issuance of the reservation, whichever is applicable. If the Concurrency Reservation was based upon a converted WHP Traffic Concurrency Hall Pass, then the Reservation shall be valid for one year from the date of issuance of the Traffic Concurrency Hall Pass Certificate or for the life of the specific Development Order pursuant to this Chapter, whichever is applicable. If the required Development Order is a Building Permit, then the application for the Building Permit must be submitted prior to the expiration date of the reservation. In such cases, the Building Permit must be issued within six months from the date of intake of the Building Permit application, or the reservation shall expire. If a reservation either expires or becomes invalid, the public facility capacity reserved by the reservation expires, and becomes additional available public facility capacity. An Applicant cannot apply for a new reservation until the previous reservation has expired. The expiration or revocation of a Development Order shall result in the automatic expiration or revocation of the reservation. A reservation shall not expire if an application for a specific Development Order is pending. All Concurrency Reservations shall be issued for the number of units or square footage shown on the approved Site Plan or Master Plan most recently certified by the DRO. For any Master Plan or Site Plan, which was approved for acreage only, the capacity for the approved use shall be calculated by the Applicant and affirmed by the Zoning Division and each service provider. Any Concurrency Reservation shall be adjusted accordingly. Any increase in units or square footage above that shown on the current Site Plan/Master Plan shall be subject to concurrency review. [Ord. 2006-055]

2. **Effect**
   
   Reservation will remain valid provided:
   
   a. the Development Order for which the certificate was approved has not expired or been revoked or abandoned;
   
   b. all annual fees necessary to maintain the reservation are paid each year;
   
   c. the development is not altered to increase the impact of the development on public facilities; and,
   
   d. the reservation is not revoked by the BCC or the ZC.

3. **Assignability and Transferability**
   
   A reservation may be assignable or transferable, within the same approved development or to successors in interest for the same property.
4. **Extension of a Reservation**  
Prior to expiration of a reservation, it is documented that a government-caused failure of a Development Order to be issued, the Zoning Director shall grant such extensions as necessary to offset government-caused delays, not necessarily equal to the time of the delay. Each extension shall be based only on a delay that has already occurred.

5. **Phasing of a Reservation**  
In determining whether an application for a reservation complies with the requirements of Art. 2.F.3.C, Standards for Review of Application for Adequate Public Facilities Determination and Concurrency Reservation, the Zoning Director may consider the phasing of development and its coordination with public facility capital improvements for a period of up to five years, or some other period consistent with the terms of an agreement.

6. **Receipt of a Concurrency Reservation with Conditions**  
If the appropriate service provider can ensure there will be adequate public facilities with condition(s) or an agreement approved by the Zoning Director, the Certificate of Concurrency Reservation shall be approved. The issuance of a Building Permit shall be based upon compliance with the conditions contained on certified Site Plan or the Concurrency Reservation.

   a. **Consideration in Conjunction with an Agreement**  
      1) If an agreement is to be part of an application for a Development Order, then prior to the proposed Development Order application being considered for consistency, the agreement shall be:
         a) found to be in sufficient form and contain sufficient information by the County Attorney and the Zoning Director; and
         b) accompanied by applicable fee, as set forth in the adopted fee schedule.
      2) If the Zoning Director determines that the standards of Art. 2.F.3.C, Standards for Review of Application for Adequate Public Facilities Determination and Concurrency Reservation, are met if the agreement is approved, a Certificate of Concurrency Reservation shall be issued, conditioned on the approval of the agreement with the express terms related to the provision of the public facilities for the proposed development.
      3) Upon approval of the agreement by the BCC, the Concurrency Reservation shall become final. If the agreement is denied, then the Certificate of Concurrency Reservation shall expire.

   b. **Performance Security Required**  
      1) In accordance with Art. 12.C.2, Conditions, a Concurrency Reservation with conditions may be granted to ensure compliance with the TPS. Performance security to install improvements resulting from the impact of the project may be required to be posted within six months from the date the Development Order is approved. The performance security shall be in a form acceptable to the DEPW.
      2) A one-time six-month Administrative Time Extension in accordance with Art. 2.E.3.B, Administrative Extension of Time, or a six-month BCC time extension in accordance with Art. 2.F.2, LOS Standards, of this Code, may be permitted, provided the following standards are met:
         a) The project is located on a roadway, which did not meet the TPS prior to a Concurrency Reservation being issued for the project;
         b) The traffic approval was based solely on the posting of security for roadway improvements; and,
         c) The project approval does not delay any other Property Owner from development since no capacity was available for the project, therefore, no trips had been reserved for the project.
      3) If an Administrative Time Extension is not requested and granted, or a previously approved time extension expires without security being posted, the Development Order shall be subject to the review requirements of Art. 2.F.2, LOS Standards and Art. 2.F.3, Review for Adequate Public Facilities. If the BCC revokes the Development Order, the Certificate of Concurrency Reservation shall immediately expire. The Development Order shall be revoked if security is not posted within 12 months of approval of the Development Order.

   c. **Extension of Date Certain Conditions Prior to Issuance of Development Order**  
      Prior to the expiration of a date certain condition, one extension of the condition up to nine months may be provided by the service provider imposing the condition, if it is determined that a valid public governmental purpose will be achieved by granting the extension. In no other case may an extension be granted.
7. Amendment of Certificate of Concurrency Reservation
   An amendment to a Concurrency Reservation shall be required prior to the approval of any amendment to a Development Order which results in a change to the impact on public facilities addressed by this Chapter. The amendment of a Concurrency Reservation shall only require reservation of the additional public facility capacity demanded by the proposed development or modification of the reservation of the public facility capacity if the demand is decreased.

8. Revision of a Concurrency Reservation
   A revision to a Concurrency Reservation shall be required prior to the approval of any reduction in approved square footage on the certified plan.

9. Effect of Agreement in Conjunction with a Certificate of Concurrency Reservation
   A developer may enter into an agreement with PBC and relevant service providers, for those public facilities specifying that an agreement is acceptable, in conjunction with the approval of a Development Order and a Certificate of Concurrency Reservation, to ensure adequate public facilities are available concurrent with the impacts of development on the public facility. The effect of the agreement shall be to bind PBC and the developer pursuant to Art. 2.F.4, Entitlement Density and Entitlement Intensity, that adequate public facilities are available to serve the proposed development concurrent with the impacts of the development on the public facilities. Any public facility Capital Improvement in the Six Year Capital Improvement Schedule in the CIE on which such a Concurrency Reservation is made in conjunction with the approval of a Development Order and an agreement, shall not be delayed, deferred, or removed from the Six Year Capital Improvement Schedule in the CIE, except that any Capital Improvement may be deferred by one year if the deferral is identified pursuant to the terms of an agreement.

E. Procedure for Equivalency Determination

1. Submission of Application
   An application for an equivalency determination shall be submitted jointly with an application for a specific Development Permit. If the equivalency is for a use or uses that do not require Site Plan approval, it may be submitted separately at scheduled intake times as specified in the Annual Zoning Division Calendar. The Applicant shall complete the Equivalency Matrix in the concurrency supplemental application itemizing the following in the appropriate column:
   a. All approved and existing uses for the development shall be listed;
   b. All proposed uses including those uses that are not changing; and,
   c. The amount of change for those uses that did change.

2. Review and Recommendation
   a. Separate Review
      Within ten days of submittal or resubmittal, the application shall be forwarded to the PBC Departments and service providers for review. Within 15 working days of its receipt, the PBC Departments and service providers shall file a statement with the Zoning Director as to whether or not adequate public facilities are available, pursuant to the standards of Art. 2.F.3.C, Standards for Review of Application for Adequate Public Facilities Determination and Concurrency Reservation.
   b. Joint Review
      The application is distributed to the PBC Departments and service providers for review with the distribution of the application for Development Permit.

3. Approval of Equivalency
   a. Separate Review
      If it is determined by the providers that the approved existing uses are equivalent to the proposed uses, the Concurrency Section will either:
      1) Amend and reissue the existing Reservation or Exemption to include the new uses, or
      2) Issue an Administrative Exemption if the development exists and there is no valid reservation or exemption.
   b. Joint Review
      Concurrency approval shall be indicated directly on the certified plan pursuant to the DRO technical standards for projects that require Site Plan approval. For projects that do not require Site Plan approval, a reservation shall be issued.

4. Denial of Equivalency
   If it is determined by one or more of the providers that the proposed uses are equivalent to the approved/existing uses, the Applicant shall apply for a reservation for those proposed uses, which will require additional capacity.
Section 4 Entitlement Density and Entitlement Intensity

A. General
If after an appeal on an application for a Concurrency Reservation is denied by the PZB Executive Director and that decision is affirmed by the DRAB, the Applicant may submit an application for entitlement density or entitlement intensity pursuant to the procedural and substantive requirements of this Section. [Ord. 2011-016]

B. Submission of Application
An application for entitlement density or entitlement intensity shall be submitted to the PZB Executive Director on a form established by the PZB Executive Director and made available to the public. The application shall be accompanied by a fee established by the BCC from time to time for the filing and processing of each application. The fee shall be non-refundable. [Ord. 2011-016]

C. Determination of Sufficiency
The PZB Executive Director shall initiate review of an application for entitlement density or entitlement intensity upon receipt of the application, and within 15 working days, determine whether the application is sufficient and includes data necessary to evaluate the application. [Ord. 2011-016]

1. If it is determined that the application is not sufficient, written notice shall be sent to the Applicant specifying the deficiencies. The Zoning Director shall take no further action on the application unless the deficiencies are remedied.

2. If the application is determined sufficient, the Zoning Director shall notify the Applicant in writing of the application's sufficiency, and that the application is ready for review pursuant to the procedures and standards of this Section.

D. Decision by PZB Executive Director
Within 30 working days after the PZB Executive Director determines the application is sufficient, the PZB Executive Director shall review the application and shall approve, approve with conditions, or deny the application based upon whether it complies with the standards in Art. 2.F.4.E, Standards for Entitlement Density and Entitlement Intensity. [Ord. 2011-016]

E. Standards for Entitlement Density and Entitlement Intensity

1. An entitlement density for the proposed development must be consistent with the entitlement densities permitted in the FLUE of the Plan or a minimum of one dwelling unit, provided that the maximum density (dwelling unit per gross acre) as depicted on Figure 2 of the FLUA of the Plan is not exceeded. [Ord. 2011-016]

2. An entitlement intensity for the proposed development must be consistent with the entitlement intensities permitted in the FLUE of the Plan provided the square footage does not exceed two and one-half percent of the maximum square footage allowed under this Code. [Ord. 2011-016]

3. If the above conditions are met, an entitlement density or entitlement intensity for the proposed development shall be granted if:

   a. A Concurrency Reservation has been denied for the proposed development pursuant to the requirements of Art. 2.F.3.C, Standards for Review of Application for Adequate Public Facilities Determination and Concurrency Reservation, and an appeal to the DRAB has affirmed that decision;

   b. The LOS for drainage facilities for the development proposed in the application is met pursuant to the requirements of Art. 2.F.3.C, Standards for Review of Application for Adequate Public Facilities Determination and Concurrency Reservation;

   c. A plan demonstrates how the proposed development will be designed (a) at its entitlement density or entitlement intensity and (b) at its allowable density or entitlement intensity under the Plan and this Code at the time the necessary public facilities are available to adequately serve the development. Any Development Order issued for an application for Development Permit for which entitlement density or entitlement intensity has been approved shall be consistent with the plans for development in this Subsection. The review of a plan for development at the allowable density or intensity under this Section shall in no way reserve capacity for public facilities; [Ord. 2011-016]

   d. Approval of the entitlement density or entitlement intensity is conditioned on the initiation of development of the proposed project at its allowable density or intensity subject to receipt of a Concurrency Reservation within two years of the time the necessary public facilities are available to serve the proposed development at its allowable density or intensity; and,

   e. In the USA, Development Orders for development proceeding at entitlement densities or entitlement intensities may be permitted at rural LOS for potable water and sanitary sewage while the development is at its entitlement density or entitlement intensity. [Ord. 2011-016]
Section 5 Administrative Appeal Process

A. General
An Applicant may appeal a decision of the PZB Executive Director denying an application for a Concurrency Reservation, Entitlement Density, Entitlement Intensity, or a Concurrency Exemption Extension by filing a petition with the Zoning Director appealing the decision to the DRAB within 20 days of the rendition of the decision by the Zoning Director. [Ord. 2011-016]

B. Procedure
The DRAB shall consider the appeal petition within 60 calendar days of filing. In considering the appeal, the DRAB shall consider only the record before the Zoning Director at the time of the decision, testimony of the petitioner and the petitioners' agents and testimony of PBC Staff.

C. Standard
The DRAB shall reverse the decision of the Zoning Director only if there is competent substantial evidence in the record that the application complies with the standards of Art. 2.F.3.C, Standards for Review of Application for Adequate Public Facilities Determination and Concurrency Reservation.

D. Written Order
The decision of the DRAB shall be in writing and a copy of the decision shall be forwarded to the appealing party.

E. Appeal to Circuit Court
An applicant may appeal a final decision of the DRAB within 30 calendar days of the rendition of the decision by filing a Petition for Writ of Certiorari in Circuit Court of the Fifteenth Judicial Circuit in and for PBC.

CHAPTER G DECISION MAKING BODIES

Section 1 Board of County Commissioners

A. Powers and Duties
In addition to any authority granted to the Board of County Commissioners (BCC) by general or special law, the BCC shall have the following powers and duties under the provisions of this Code:
1. to initiate, hear, consider, and approve, approve with conditions, or deny applications to amend the text of the Plan;
2. to initiate, hear, consider, and approve, approve with conditions, or deny applications for Site Specific amendments to the FLUA of the Plan;
3. to initiate, hear, consider, and approve, or deny requests to amend the text of this Code; [Ord. 2009-040]
4. to initiate, hear, consider, and approve, approve with conditions, or deny applications for DO to amend the Official Zoning Map of this Code; [Ord. 2018-002]
5. to hear, consider, and approve, approve with conditions, or deny applications for DO for Class A Conditional Uses; [Ord. 2018-002]
6. to initiate, hear, consider, and approve, approve with conditions, or deny applications for Transfer of Development Rights (TDRs) and Workforce Housing Program (WHP) Programs; [Ord. 2018-002]
7. to hear, consider, and approve, approve with conditions, or deny applications for DO for Preliminary Plans for those specific PDDs, TDDs, or Class A Conditional Uses pursuant to Art. 2.A.6.B, Plan Requirements; [Ord. 2018-002]
8. to hear, consider, and approve, approve with conditions, or deny applications for DO for Preliminary Plans for those specific PDDs, TDDs, or Class A Conditional Uses pursuant to Art. 2.A.6.B, Plan Requirements; [Ord. 2018-002]
9. to hear, consider, and approve, approve with conditions, or deny applications for ABN; [Ord. 2018-002]
10. to hear, consider, and approve, approve with conditions, or deny applications for Status Report of a prior approved DO; [Ord. 2018-002]
11. to review, hear, consider, and approve, approve with conditions, or deny requests for PO Deviations described in Art. 2.B.7.G, Public Ownership (PO) Deviations; [Ord. 2018-002] [Ord. 2019-005]
12. to hear, consider, and approve, approve with conditions, or deny applications for Type 2 Waivers; [Ord. 2018-002]
13. to hear, consider, and approve, approve with conditions, or deny applications for Unique Structures; [Ord. 2018-002]
14. to hear and consider release of agreement; [Ord. 2018-002]
15. to hear and consider AI; [Ord. 2018-002]
16. to review, hear, consider, and approve, or deny applications for Corrective Resolutions; [Ord. 2018-002]
17. to establish fees for the review of applications for Development Orders or permits, and appropriate funds to defray the costs of administering this Code; [Ord. 2018-002]
18. to act to ensure compliance with Development Orders or permits as approved and issued; [Ord. 2018-002] [Ord. 2019-005]
19. to hear and consider appeals from, and affirm or reverse decisions of the Zoning Commission on applications for Development Permits for Class B Conditional Uses; [Ord. 2018-002]
20. to hear, consider, and decide appeals from decisions of the DRO on applications for URAO Type 1 Waivers, [Ord. 2018-002]
21. to designate and appoint hearing officers to make decisions as the BCC may deem appropriate; [Ord. 2018-002]
22. to appoint other advisory boards that are determined necessary to assist in the implementation of this Code or the Plan; and, [Ord. 2018-002]
23. to take such other action not delegated to the decision-making bodies set forth in this Article or other officials of PBC Departments, as the BCC may deem desirable and necessary to implement the provisions of the Plan and this Code. [Ord. 2009-040] [Ord. 2018-002]

Section 2 General Provisions

Unless otherwise noted, the following provisions shall apply to each appointed body described in this Article. In addition, each board shall be governed by PBC Resolution No. R-2013-0193. In case of conflict between the general provisions in this Section, and the specific provisions of each appointed body, the specific provisions shall prevail. [Ord. 2014-001]

A. Board Membership
   1. Qualifications
      Unless otherwise noted, each member of a board described in this Article, Decision-Making Bodies shall be a qualified elector of PBC for at least two years prior to appointment. No member of the BCC, BCC aide, or PBC employee shall serve on a board described herein.
   2. Term of Office
      The term of office for each member shall be three years. All members serving on a board on the effective date of this Code shall complete their terms according to their prior appointments.
   3. Vacancy
      a. The BCC shall fill a vacancy within 60 days.
      b. When a person is appointed to fill out the term of a departing member, that person’s term shall end at the same time the departing member’s term would have ended.
   4. Maximum Number of Boards
      The maximum number of boards a person may serve on at one time shall be three. [Ord. 2006-004]
   5. Elected Office
      Members shall not be prohibited from qualifying as a candidate for elected office.

B. Appointments and Termination
   1. Appointments
      a. Individual BCC Appointments
         A board member shall serve at the pleasure of the member of the BCC who appointed that member and may be removed by the BCC member without cause at any time.
      b. At-Large BCC Appointments
         A board member shall serve at the pleasure of the BCC and may be removed by the BCC without cause at any time.
      c. Attendance
         Members of boards shall be automatically removed for lack of attendance. Lack of attendance is defined as a failure to attend three consecutive meetings or a failure to attend at least two-thirds of the meetings scheduled during a calendar year. Participation for less than three-fourths of a meeting shall be the same as a failure to attend a meeting. Only regular meetings shall be counted towards the attendance requirements. Special meeting shall not be counted towards the attendance requirements.
      d. Termination
         In the event that any board member is no longer a qualified elector, or the member is convicted of a felony, or an offense involving moral turpitude while in office, the BCC shall terminate the appointment of the member.
e. **Immediate Removal**

   Members removed pursuant to [Art. 2.G.2.B.1, Appointments](#) through [Art. 2.G.2.B.1.d, Termination](#), above, shall not continue to serve on the board and such removal shall create a vacancy.

C. **Conflict of Interest**

   1. **Substantive Conflict**

      No board member shall have any interest, financial or otherwise, direct or indirect, or engage in any business transaction or professional activities, or incur any obligation of any nature which is in substantial conflict with the proper discharge of duties as a board member.

   2. **Provisions Related to Conflict of Interest**

      To implement this policy, members are directed to:

      a. be governed by the applicable provisions of state and local law;
      b. not accept any gift, favor or service that might reasonably tend to improperly influence the discharge of official duties;
      c. make known by written or oral disclosure, on the record at a meeting, any interest which the member has in any pending matter before that board, before any deliberation on that matter;
      d. abstain from using membership on the board to secure special privileges or exemptions;
      e. refrain from engaging in any business or professional activity which might reasonably be expected to require disclosure of information acquired by membership on the board not available to members of the general public, and to refrain from using such information for personal gain or benefit;
      f. refrain from accepting employment which might impair independent judgment in the performance of responsibilities as a member of the board; and,
      g. refrain from participation in any matter in which the member has a personal investment which will create a substantial conflict between private and public interests.

   3. **Board Action**

      Willful violation of this Section which affects a vote of a board member shall render that action voidable by the BCC.

D. **Officers**

   1. **Chair and Vice-Chair**

      At an annual organizational meeting, each board shall elect a Chair and Vice-Chair from among the members. The term of the Chair and Vice-Chair's terms shall be one year. The Chair shall administer oaths, be in charge of all procedures before the board and shall take such action as shall be necessary to preserve the order and integrity of all proceedings before the board. In the absence of the Chair, the Vice-Chair shall act as Chair and shall have all the powers of the Chair.

E. **Rules of Procedure**

   1. **Quorum and Voting**

      The presence of a majority of the members of the board shall constitute a quorum necessary to take action and transact business. All actions shall require a simple majority of the quorum present and voting at the meeting. In the event of a tie vote, the motion shall fail. No member shall abstain from voting unless the member has a voting conflict pursuant to State of Florida law.

   2. **Robert's Rules of Order**

      All meetings shall be governed by Robert's Rules of Order. Each board may by majority vote of the entire membership adopt additional rules of procedure for the transaction of business and shall keep a record of meetings, resolutions, findings, and determinations.

   3. **Meetings**

      a. The location of all meetings shall be in PBC, Florida.
      b. If a matter is postponed due to lack of a quorum, the item shall be rescheduled to the next meeting.
      c. All meetings and public hearings shall be open to the public.
      d. All meetings shall be set for time certain after due public notice. Due public notice shall include notification that a record is required to appeal a final decision of the board pursuant to [F.S. § 286.0105](#).

   4. **County Attorney's Office**

      The County Attorney's Office shall provide counsel and interpretation on legal issues.

F. **Compensation**

   Board members shall receive no compensation for their services with exception of Code Enforcement Special Master and Hearing Officers who may be compensated for their services at discretion of the BCC. Travel reimbursement for members shall be limited to expenses incurred only for travel outside PBC necessary to fulfill the responsibilities of membership on the particular board. Travel reimbursement shall be made only when sufficient funds have been budgeted and are available, and upon prior approval of the
Section 3  Appointed Bodies

A. Land Development Regulation Advisory Board
   1. Land Development Regulation Advisory Board
      There is hereby established a Land Development Regulation Advisory Board (LDRAB).
      2. Powers and Duties
         The LDRAB shall have the following powers and duties under the provisions of this Code:
         a. to periodically review the provisions to this Code that are not reviewed by another advisory board
            established by BCC for that purpose, and to make recommendations to the BCC for those
            provisions reviewed;
         b. to make its special knowledge and expertise available upon written request and authorization of
            the BCC to any official, department, board, commission or agency of PBC, the State of Florida or
            Federal Governments;
         c. to serve as Land Development Regulation Commission (LDRC) as provided by F.S. § 163.3164(25)
            and F.S. § 163.3194; and, [Ord. 2019-005]
         d. to serve as the Airport Zoning Commission pursuant to F.S. § 333.05(2). [Ord. 2019-005]
   3. Board Membership
      a. Appointment
         1) The LDRAB shall be composed of 16 members and two at-large alternate members. [Ord.
            2015-006]
         2) Nine of the members shall be appointed by a majority of the BCC upon a recommendation by
            the organizations listed in Table 2.G.3.A, LDRAB Expertise. [Ord. 2015-006]
         3) Seven members shall be appointed by the BCC. Each PBC Commissioner shall appoint one
            member with consideration of the expertise in Art. 2.G.3.A.3.b, Qualifications.
         4) The BCC shall appoint two at-large alternate members, by a majority vote of the BCC, with
            consideration of the expertise in Art. 2.G.3.A.3.b, Qualifications.
      b. Qualifications
         1) The Board shall be composed of members with the expertise recommended for appointment
            by the corresponding organization as outlined in Table 2.G.3.A, LDRAB Expertise.
         2) Each BCC appointment shall be with consideration in the following areas of expertise:
            a) Landscape Architecture.
            b) Redevelopment Expertise.
            c) Fiscal Impact Analysis Expertise.
            d) Land Use/Real Estate Law.
            e) Natural Sciences.
            f) Business Development.
         3) No more than two members of the LDRAB shall represent the same occupation or business.
            [Ord. 2010-022]

   [Ord. 2010-022]  [Ord. 2015-006]

c. Terms of Office
   Members of the LDRAB shall hold office until the first Tuesday after the first Monday in February
   of the year their term expires. Beginning on or after March 2, 2013, no person shall be appointed
   or reappointed to this Board for more than three consecutive terms. [Ord. 2014-001]
4. **Staff**
   The Zoning Director of PZB shall serve as the Secretary and the professional staff of the LDRAB.

5. **Meetings**
   a. **General**
      General meetings of the LDRAB shall be held as needed to dispense of matters properly before the LDRAB. Special meetings may be called by the Chair or in writing by a majority of the members of the LDRAB. Staff shall provide 24-hour written notice to each LDRAB member before a special meeting is convened.
   b. **Subcommittees**
      The LDRAB shall consider recommendations from the Zoning Director and determine by majority vote to create subcommittees with the expertise necessary to make recommendations on specific Code amendments. Subcommittee appointments shall be made at a regular LDRAB meeting. [Ord. 2009-040]
   c. **Alternate Members Vote**
      The alternate members may vote on a matter only when serving in place of an absent regular member. [Ord. 2018-002]

B. **Code Enforcement Special Master**

1. **Creation and Appointment**
   Code enforcement hearings pursuant to this Code shall be conducted by a designated Special Master. Applications for Special Master positions shall be directed to the County Administrator pursuant to a notice published in a newspaper of general circulation. The BCC shall select a pool of candidates from the applications filed with the County Administrator on the basis of experience and qualifications. The County Administrator shall appoint a Special Master to conduct hearings from the pool of candidates selected by the BCC as necessary. For a period of two years from the date of termination as holder of office, a former Special Master shall not act as agent or attorney in any proceeding before any decision-making body of PBC on any matter that was the subject of a proceeding which was considered by the former Special Master. [Ord. 2015-006]

2. **Qualification**
   A Special Master shall have the following minimum qualifications:
   a. be a graduate of a law school accredited by the American Bar Association;
   b. demonstrate knowledge of administrative laws, land use law, and Local Government regulation and procedures;
   c. be a current member, in good standing, of the Florida Bar Association;
   d. have such other qualifications that may be established by Resolution of the BCC; and,
   e. in the event the County Administrator does not receive a sufficient number of applications from qualified members of the Florida Bar Association, the BCC may select attorneys who are not members of the Florida Bar Association as candidates for Special Master. Among those attorneys who are not members of the Florida Bar Association, the BCC and County Administrator shall give preference to those attorneys who have prior experience in a judiciary capacity, or as a hearing officer, mediator or special master. No attorney, who has been disciplined by the Florida Bar Association or a bar association of any other jurisdiction, shall be appointed as a Special Master.

3. **Rules of Procedure**
   The BCC shall have the authority prescribe rules of procedure for the conduct of hearings before the Special Master by resolution

4. **Term**
   A Special Master shall serve a term of one year from the date of appointment by the County Administrator. A Special Master may be reappointed at the discretion of the County Administrator. There shall be no limit on the number of terms a person may serve as a Special Master.

5. **Removal**
   At any time during the appointment, the County Administrator shall have the authority to remove a Special Master with or without cause upon ten days written notice.

6. **Vacancy**
   If any Special Master resigns or is removed prior to expiration of his or her term or the County Administrator determines that the Special Master should not be reappointed, the County Administrator shall appoint a Special Master from the pool of candidates previously selected by the BCC to fill the vacancy within 30 days.
7. **Conflicts of Interest**
   A Special Master shall not be considered outside or special counsel and shall not be subject to PPM #CW-O-52 relating to outside counsel conflicts of interest.

8. **Meetings**
   a. **Scheduling**
      The Code Enforcement Division shall be responsible for scheduling meetings of a Special Master. In the case of an alleged violation as set forth in Article 10.B.1, Procedure, a hearing may be called as soon as practical.
   b. **Operating Procedures**
      All cases brought before a Special Master shall be presented by either the Code Enforcement Division or an attorney representing the Division.

C. **Development Review Appeals Board**
   1. **Establishment**
      There is hereby established a Development Review Appeals Board (DRAB).
   2. **Powers and Duties**
      The DRAB shall have the following powers and duties under the provisions of this Code:
      a. to hear, consider, and decide appeals, decisions of the Zoning Director on applications for Certificates of Concurrency Reservation and Concurrency Exemption Extension; and
      b. to hear and decide appeals from, decisions of, and conditions imposed by the DRO with regard to action taken on an application for a final Development Permit.
   3. **Board Membership**
      The DRAB shall consist of the Executive Director of PZB, County Engineer, and County Attorney or Deputy County Attorney.
   4. **Officers and Staff**
      a. **Chair and Vice-Chair**
         The Executive Director of PZB shall be the Chair of the DRAB.
      b. **Staff**
         PZB staff shall be the professional staff for the DRAB.
   5. **Meetings**
      a. **General**
         General meetings of the DRAB shall be held as needed to dispose of matters properly before the DRAB. Special meetings may be called by the Chair or in writing by two members of the DRAB. Staff shall provide 24-hour written notice to all DRAB members.

D. **Environmental Appeals Board**
   1. **Establishment**
      There is hereby established an Environmental Appeals Board (EAB).
   2. **Powers and Duties**
      The EAB has the following powers and duties:
      a. to hear appeals from certain requirements, interpretations, or determinations of Article 15, Health Regulations, made by the PBCHD or the Environmental Control Officer.
   3. **Board Membership**
      a. **Qualifications**
         The EAB shall be composed of five members appointed by the Environmental Control Board (ECB). The membership of the EAB shall consist of one professional engineer registered by the State of Florida and nominated by the Palm Beach branch of the American Society of Civil Engineers, one water resource professional employed by SFWMD, one drinking water engineer employed by the FDEP, one member of the Gold Coast Builders Association, and one attorney nominated by the PBC Bar Association. [Ord. 2011-016]
      b. **Terms of Office**
         All EAB members shall serve a term of three years. Beginning on or after March 2, 2013, no person shall be appointed or reappointed to this Board for more than three consecutive terms. [Ord. 2014-001]
   4. **Officers**
      a. **Secretary**
         PBC Environmental Control Officer shall provide a staff person to the EAB and that staff member shall be designated as Secretary of the EAB.
      b. **Staff**
         The PBCHD shall be the professional staff of the EAB.
5. Meetings
   a. General or Special Meetings
      General meetings of the EAB shall be held no less frequently than once every 60 days. Special
      meetings may be called by the Chair of the EAB, or in writing by a majority of the members of the
      Board. Staff shall provide 24-hour written notice to each EAB member for a special meeting.

E. Environmental Control Hearing Board
   1. Establishment
      There is hereby established an Environmental Control Hearing Board (ECHB).
   2. Powers and Duties
      The ECHB has the following powers and duties:
      a. to conduct hearings into the merits of alleged violations to Sections promulgated under Chapter
         77-616, Special Acts, Laws of Florida, and PBC Ord. No. 78-5, as amended; and
      b. after due public hearing, to reach a decision setting forth such findings of fact and conclusions of
         law as are required in view of the issues presented. The decision shall contain an order which may
         be framed in the manner of a writ of injunction requiring the violator to conform to either or both of
         the following requirements:
            1) to refrain from committing, creating, maintaining, or permitting the violations;
            2) to take such affirmative action as the ECHB deems necessary and reasonable under the
               circumstances to correct such violation;
            3) to issue orders imposing civil penalties of up to $500 dollars for each day of violation;
            4) to issue subpoenas to command the appearance of any person before a hearing at a specified
               time and place to be examined as a witness. Such subpoenas may require such person to
               produce all books, papers and documents in that person's possession or under that person's
               control, material to such hearings; and,
            5) to administer oaths to any or all persons who are to testify before the ECHB.
   3. Qualifications
      The ECHB shall be composed of five members. The membership of the ECHB shall consist of one
      attorney recommended by the PBC Bar Association; one medical doctor recommended by the PBC
      Medical Society; one engineer recommended by the PBC chapter of the Florida Engineering Society;
      and two citizens at-large.
   4. Officers
      a. Secretary
         The Environmental Control Officer shall serve as Secretary of the ECHB.
      b. Staff
         The PBCHD shall be the professional staff of the ECHB.
   5. General or Special Meetings
      General meetings of the ECHB shall be held no less frequently than every 45 days. The ECHB may
      set the date of future meetings during any meeting. Special meetings may be called by the Chair of the
      ECHB, or in writing by a majority of the members of the Board. Staff shall provide 24-hour written notice
      to each ECHB member for a special meeting.
   6. Term Limits
      Beginning on or after March 2, 2013, no person shall be appointed or reappointed to this Board for
      more than three consecutive terms. [Ord. 2014-001]

F. Groundwater and Natural Resources Protection Board
   1. Establishment
      There is hereby established a Groundwater and Natural Resource Protection Board (GNR PB).
   2. Powers and Duties
      The GNRPB shall have the following powers and duties:
      a. to hold hearings as necessary to enforce Art. 14, Environmental Standards. ERM may refer alleged
         violations of Art. 14, Environmental Standards, and applicable Art. 4.B.10, Excavation Uses, Ord.
         Criteria, Ord. No. 2004-050, Stormwater Pollution Prevention, Ord. No. 94-13, Natural Areas, and
         Ord. No. 93-3, Water and Irrigation Conservation as amended to the GNR PB, if there has been a
         failure to correct a violation within the time specified by the Code Inspector, if the violation has been
         repeated, or is of such a nature that it cannot be corrected; [Ord. 2006-004] [Ord. 2010-022] [Ord.
         2017-007]
      b. to adopt rules of procedure for the conduct of hearings;
c. to issue subpoenas compelling the presence of persons at Board hearings. Subpoenas may be served by the PBC Sheriff’s Department, or other authorized persons consistent with Florida Law;
d. to issue subpoenas compelling the provision of evidence at GNRPB hearings;
e. to take testimony under oath;
f. to issue orders having the force of law commanding whatever steps are necessary to achieve compliance with the violation of Article 14, Environmental Standards;
g. to lien property; and,
h. to assess administrative fines and costs pursuant to Article 14, Environmental Standards.

3. Board Membership
   a. Qualifications
   The GNRPB shall be composed of seven members appointed by the BCC upon a recommendation by the organization listed in Table 2.G.3.F. GNRPB Membership. The membership of the Board shall consist of a professional engineer registered by the State of Florida, an attorney licensed to practice in Florida, a hydrologist or a hydrogeologist, a citizen possessing expertise and experience in managing a business, a biologist or a chemist, a member of an environmental organization, and a concerned citizen. [Ord. 2011-001]

   b. Terms of Office
   All members shall serve a term of three years. Beginning on or after March 2, 2013, no person shall be appointed or reappointed to this Board for more than three consecutive terms. [Ord. 2014-001]

4. Secretary and Staff
   The Director of ERM shall serve as Secretary of the GNRPB. ERM shall be the professional staff of the GNRPB.

5. Meetings
   a. General
   General meetings of the GNRPB shall be held no more frequently than once every month. Special meetings may be called by the Chair of the GNRPB, or in writing by a majority of the members of the Board. Staff shall provide 24-hour written notice to each Board member prior to a special meeting.

6. Hearing Officers
   1. Creation and Appointment
   The County Administrator may, from a pool selected by the BCC, appoint one or more hearing officers to hear and consider such matters as may be required under any provision of this Code or under any provision of any other Palm Beach County Ordinance as may be determined to be appropriate by the BCC from time to time. Such hearing officers shall be selected pursuant to the procedures and minimum qualifications provided for in Article 2.G.3.B. Code Enforcement Special Master, and shall serve at the pleasure of the BCC for such period as is determined by the Board. Code Enforcement Special Masters may serve ex officio as Hearing Officers as set forth in this Section. [Ord. 2010-022] [Ord. 2015-006]

   2. Duties
   A hearing officer shall have the following duties:
   a. to conduct hearings and issue administrative orders on such matters as may be requested by the BCC;
   b. to issue subpoenas to compel the attendance of witnesses and production of documents, and to administer oaths to witnesses appearing at the hearing; and,
   c. to perform such other tasks and duties as the BCC may assign.
H. Historic Resources Review Board

1. Establishment

There is hereby established a Historic Resources Review Board (HRRB).

2. Powers and Duties

The HRRB shall have the following powers and duties under the provisions of this Code:

a. develop, administer and update an accurate inventory of historic resources in unincorporated PBC and on PBC owned property in municipalities. The inventory shall be used to formulate a map of historic district boundaries and historically significant properties meriting protection to be incorporated into the land use element of the Plan;

b. pursuant to Art. 9.B. Historic Preservation Procedures, nominate and accept nominations for public and private properties for designation and regulate and administer such properties, structures, buildings, sites, districts, etc. so designated as historic sites and/or districts. The Department, in conjunction with the HRRB, shall establish a schedule for nominations for public and private properties for designation;

c. participate in the National Register program in Florida to the greatest possible extent, as defined by the 1981 and subsequent amendments to the Historic Preservation Act of 1966 and regulations and rules drafted pursuant to those amendments by the National Park Service and the Florida State Bureau of Historic Preservation;

d. act as a regulatory body to approve, deny or modify Certificates of Appropriateness as specified by Art. 9. Archaeological and Historic Preservation;

e. make recommendations concerning amendments to the Plan, this Code, Building and other development related codes as they relate to the preservation of Historic Resources;

f. make recommendations regarding historic and archeological resources on property owned by PBC;

g. pursuant to Art. 9.B.4.B. Waiver of the Code Provisions, review and comment to the BCC concerning waiver of Code provisions for properties within historic districts and for properties designated as historic or archaeological sites or listed on the PBC Register of Historic Places; [Ord. 2012-027]

h. develop, establish, and administer guidelines concerning contemporaneous architectural styles, colors, building materials and so forth for historic sites and historic districts. Such guidelines will be subject to approval by the BCC;

i. coordinate with other entities to support increased public awareness of the value of historic preservation;

j. after PBC qualifies as a Certified Local Government, make recommendations to PBC Commission concerning the use of grants from Federal and State agencies, to augment PBC funding in order to promote the preservation and conservation of archaeological sites of historic significance, historic sites and historic districts;

k. cooperate and coordinate with Property Owners, public and private organizations, businesses, and other individuals to help ensure the conservation and preservation of archaeological sites, contents within said sites, buildings, structures, and districts of historic significance, especially those for which demolition or destruction is proposed;

l. create and approve the design of standardized historic markers and plaques and issue recognition to designated historic sites and historic districts within PBC;

m. execute any other needed and appropriate historic resource preservation functions which may be approved by the BCC;

n. develop and administer a Historic Preservation Manual for PBC to help Property Owners fulfill the regulations and requirements of this Ordinance;

o. hear, consider, and approve, approve with conditions or deny applications for Certificate to Dig;

p. make recommendations to the BCC regarding proposed amendments to the map of known archeological sites;

q. initial resources shall be dedicated to those functions which shall qualify PBC as a Certified Local Government;

r. make every effort to be represented at meetings, conferences and workshops pertaining to the functions of the HRRB scheduled by the State Historic Preservation offices or the Florida Conference of Preservation Boards and Commissions;

s. seek expertise or proposals of matters requiring evaluation by a professional of a discipline not represented on the HRRB; and,

t. the HRRB’s responsibilities shall be complementary to the powers of the State Historic Preservation Office.
3. **Board Membership**
   a. **Qualifications**
      There shall be nine members of the HRRB. Members of the HRRB shall be residents of PBC, Florida and demonstrate an interest in local history. One member with professional experience shall be appointed from each of the following five professional disciplines: history, architecture, archeology, architectural history and historic architecture. Other historic preservation related disciplines, such as Urban Planning, American Studies, American Civilization, Cultural Geography or Cultural Anthropology shall be considered when choosing appointments for these five of the nine members of the HRRB. Each of these five positions shall meet the requirements outlined in the Professional Qualifications Standards of the Florida Certified Local Government Guidelines. In addition to the above five positions, there shall be a sixth person with a demonstrated interest, degree or experience in one of the above professional disciplines who is also a resident of the area of PBC West of Twenty Mile Bend, including any of the incorporated or unincorporated communities in proximity to Lake Okeechobee. There are no specific requirements for the other three positions as a prerequisite to appointment but consideration shall be given to the following with a demonstrated interest in history, architecture or related disciplines: business person, engineer, contractor in a construction trade, landscape architect, urban planner, attorney, and resident of areas identified by 1990 PBC Historic Sites Survey as containing 25 or more structures with potential for historic preservation. Persons seeking appointment to the HRRB shall be willing to invest time to assist staff in site evaluations, establishing priorities, public education efforts, survey and planning activities of the Certified Local Government Program and the other responsibilities of the HRRB. Board members shall attend pertinent educational conferences and seminars.
   b. **Appointment**
      The members of the HRRB shall be appointed at-large by the BCC.
   c. **Terms of Office**
      Each appointment shall be made for a term of three years. Any member may be reappointed upon approval of the BCC as provided for herein. [Ord. 2013-001]

4. **Secretary and Staff**
   a. **Secretary**
      The Planning Director of the PZB shall serve as Secretary to the HRRB.
   b. **Staff**
      The Planning Division shall be the professional staff of the HRRB. The Board shall make every effort to minimize demands on staffing in consideration of budgetary constraints.

5. **Meetings**
   a. **General**
      General meetings of the HRRB shall be held at least four times per year. Special meetings may be called by the Chair of the HRRB, or in writing by a majority of the members of the Board. Staff shall provide 24-hour written notice to each Board member prior to a special meeting. [Ord. 2020-001]
   b. **Quorum**
      The presence of a majority of the appointed members of the HRRB shall constitute a quorum necessary to take action and transact business. [Ord. 2020-001]

I. **Impact Fee Review Committee**
   1. **Establishment**
      There is hereby created an Impact Fee Review Committee (IFRC).
   2. **Powers and Duties**
      The IFRC shall have the following powers and duties under the provisions of this Code:
      a. submit a Report to the BCC whenever PBC conducts a full review or update of the impact fee system relating to:
         1) the implementation of Art. 13, Impact Fees;
         2) actual levels of service for the impact fees exacted in Art. 13, Impact Fees;
         3) the collection, encumbrance, and expenditure of all impact fees collected pursuant to Art. 13, Impact Fees;
         4) the validity and assumptions in the technical memoranda used to support the impact fee schedules in Art. 13, Impact Fees; and,
         5) any recommended amendment to Art. 13, Impact Fees.
      b. review amendments to Art. 13, Impact Fees prior to their consideration by the BCC; and,
      c. perform such other duties as the BCC deems appropriate.
3. **Board Membership**
   a. **Qualifications**
      The IFRC shall be composed of seven members and three alternate members appointed by the BCC. The membership of the IFRC shall include three representatives from municipalities within PBC, three representatives from the business community, and one member selected at-large. The voting membership of the IFRC shall include three representatives from municipalities within PBC, three representatives from the business community, and one member selected at-large. The alternate members shall include one representative from each of the three categories above. An alternate member shall be authorized to vote in place of an absent voting member appointed from the same category and shall count toward a quorum.

4. **Officers**
   a. **Secretary**
      The Impact Fee Coordinator shall serve as Secretary of the IFRC.

5. **Meetings**
   a. **General or Special Meetings**
      General meetings of the IFRC shall be held as needed consistent with its powers and duties. Special meetings may be called by the Chair of the IFRC, or in writing by a majority of appointed members of the IFRC. 24-hour written notice shall be given to each IFRC member for a special meeting.

6. **Term Limits**
   Beginning on or after March 2, 2013, no person shall be appointed or reappointed to this Board for more than three consecutive terms. [Ord. 2014-001]

J. **Planning Commission**
1. **Establishment**
   There is hereby established a Planning Commission (PLC). [Ord. 2008-003]

2. **Powers and Duties**
   a. to serve as the Local Planning Agency (LPA) per F.S. § 163.3174, and to provide recommendations on the preparation of the Plan, or any element or portion thereof, and any text amendments thereto to the BCC;
   b. to initiate, review, hear, consider, and make recommendations to the BCC to approve, approve with conditions, approve with modifications, or deny applications to amend the Plan, including Site Specific (Future Land Use Map) amendments to the Plan; [Ord. 2018-002] [Ord. 2018-002]
   c. to make its special knowledge and expertise available upon written request and authorization of the BCC to any official, department, board, commission or agency of PBC, the State of Florida or Federal Governments;
   d. to make additional or amended rules of procedure not inconsistent with this Section to govern the PLC’s proceedings; [Ord. 2008-003]
   e. to make studies of the resources, possibilities and needs of PBC and to report its findings and recommendations, with reference thereto, from time to time, to the BCC;
   f. to submit an Annual Report to the BCC summarizing its annual activities; and,
   g. to review and make recommendations to the BCC on Transportation Concurrency Management Area (TCMA) and Constrained Road at Lower Levels of Service (CRALLS) or a major thoroughfare on which a lower LOS is set pursuant to Art. 12, Traffic Performance Standards.

3. **Board Membership**
   a. **BCC Appointed Members**
      The PLC shall be comprised of 16 members; 15 BCC appointed members and one representative of the School District of PBC. [Ord. 2008-003]
      1) **Qualifications**
         Although no specific experience requirements shall be necessary as a prerequisite to appointment, consideration shall be given to Applicants who have experience or education in planning, law, architecture, natural resource management, real estate, and related fields.
      2) **Appointment**
         Although no specific experience requirements shall be necessary as a prerequisite to appointment, consideration shall be given to Applicants who have experience or education in planning, law, architecture, natural resource management, real estate, and related fields.
3) Terms of Office
Members of the PLC shall hold office until the first Tuesday after the first Monday in June of the year their term expires. Beginning on or after March 2, 2013, no person shall be appointed or reappointed to this Board for more than three consecutive terms. [Ord. 2008-003] [Ord. 2014-001]

b. School District Member
The School District of PBC shall appoint a representative to attend those meetings at which the PLC will consider a Plan amendment which would, if approved, increase residential density of the property that is the subject of the application. The school member shall be a non-voting member and shall not count toward quorum. [Ord. 2008-003]

4. Officers, Secretary, and Staff
a. Chair and Vice-Chair
The Chair and Vice-Chair positions shall rotate annually and shall only be held by regular members. No Board member shall serve consecutive terms as Chair or Vice-Chair. [Ord. 2008-003]

b. Secretary
The Planning Director of PZB shall serve as Secretary of the PLC. The Secretary shall keep minutes of all proceedings, which minutes shall be a summary of all proceedings before the PLC, which shall include the vote of all members upon every question, and be attested to by the Secretary. The minutes shall be approved by a majority of the PLC members voting. In addition, the Secretary shall maintain all records of PLC meetings, hearings, proceedings, and the correspondence of the PLC. The records of the PLC shall be stored with the agency serving as Secretary herein, and shall be available for inspection by the public, upon reasonable request, during normal business hours. [Ord. 2008-003]

c. Staff
The Planning Division of PZB shall be the professional staff of the PLC. The Planning Division Staff shall be responsible for, providing a recommendation to the PLC on all items scheduled for its consideration. Plan amendments, including amendments to any maps included as part of the Plan. [Ord. 2008-003]

5. Rules Applicable to Local Planning Agency
a. The agenda of the PLC sitting as the LPA shall be as prepared and presented by the PBC Planning Division and such agenda shall not be deviated from without a two-thirds vote of a quorum of the LPA. [Ord. 2008-003]

b. Failure of the LPA to make a recommendation on any Plan Amendment to the BCC prior to the final transmittal hearing of the amendments shall constitute the item being sent to the BCC with an LPA recommendation of denial pursuant to F.S. § 163.3174, as may be amended from time to time.

c. Quorum and Voting
The presence of a majority of the appointed members of the Board shall constitute a quorum necessary to take action and transact business. All actions shall require a simple majority of the quorum present and voting at the meeting. In the event of a tie vote, the motion shall fail. No member shall abstain from voting unless the member has a voting conflict pursuant to State of Florida law. [Ord. 2020-001]

6. Meetings
General meetings of the PLC shall be held as needed to dispense of matters properly before the PLC. Special meetings may be called by the Chair or in writing by a majority of the members of the PLC. Staff shall provide 24-hour written notice to each PLC member before a special meeting is convened. [Ord. 2008-003]

K. Traffic Performance Standards Appeals Board
1. Establishment
There is hereby established a Traffic Performance Standards Appeals Board (TPSAB).

2. Powers and Duties
The TPSAB shall have the following powers and duties under the provisions of this Code:
a. to hear and decide appeals from decisions of PBC Engineer or a Municipal Engineer pursuant to Art. 12, Traffic Performance Standards; and
b. to issue subpoenas to compel attendance of witnesses and production of documents.
3. **Board Membership**
   a. **Qualifications**
      There shall be five members of the TPSAB appointed by the BCC. They shall consist of the Director of the Metropolitan Planning Organization (MPO), a professional Traffic Engineer employed by a municipality in PBC as a Traffic Engineer, a professional Traffic Engineer employed by another Florida County, a professional Traffic Engineer employed by FDOT District IV, and a professional Traffic Engineer who generally represents developers. Any person serving on the TPSAB shall not be a person who participated in the decision being appealed, or shall not work for or be retained by a party to an appeal, or be a person who would be directly affected by the matter being appealed. The members of this Board do not have to be PBC residents.

   b. **Terms of Office**
      All TPSAB members shall serve a term of four years.

   c. **Vacancy**
      When a TPSAB member resigns or is removed, the BCC shall fill the vacancy within 20 working days.

4. **Officers**
   a. **Staff**
      The County Engineer’s office shall be the professional staff of the TPSAB.

5. **Meetings**
   a. **General or Special Meetings**
      General meetings of the TPSAB shall be held as needed to dispense of matters properly before the TPSAB. Special meetings may be called by the Chair of the TPSAB, or in writing by three members of the Board. Staff shall provide 24-hour written notice to each TPSAB member for a special meeting.

L. **Zoning Commission**
   1. **Establishment**
      There is hereby established a Zoning Commission (ZC).

   2. **Powers and Duties**
      The ZC shall have the following powers and duties under the provisions of this Code.
      a. to initiate, review, hear, consider, and make recommendations to the BCC to approve, approve with conditions, or deny applications to amend the Official Zoning Map, Class A Conditional Use, Development Order Amendment (DOA) of a prior DO approved by the BCC, Type 2 Waiver, and Unique Structure; [Ord. 2009-040] [Ord. 2019-005]
      b. to review, hear, consider, approve, approve with conditions, or deny applications for Development Permits for Class B Conditional Uses and Type 2 Variance applications; [Ord. 2006-036] [Ord. 2018-002]
      c. to review, hear, consider, and approve, approve with conditions, or deny applications for Development Orders for DOA for a prior approved DO approved by the ZC; [Ord. 2018-002] [Ord. 2019-005]
      d. to review, hear, consider, and approve, approve with conditions, or deny applications for ABN; [Ord. 2018-002]
      e. to review, hear, consider, and approve, approve with conditions, or deny applications for Status Reports; [Ord. 2018-002]
      f. to review, hear, consider, and approve, approve with conditions, or deny applications for Unique Structures; [Ord. 2018-002]
      g. to review, hear, consider, and approve, or deny applications for Corrective Resolutions; [Ord. 2018-002]
      h. to make its special knowledge and expertise available upon request of the BCC to any official, department, board, commission or agency of PBC, the State of Florida or Federal Government;
      i. to make studies of the resources, possibilities and needs of PBC and to report its findings and recommendations, with reference thereto, from time to time, to the BCC;
      j. to recommend to the BCC additional or amended rules of procedure not inconsistent with this Section to govern the ZC’s proceedings; [Ord. 2006-036]
      k. to consider and render a final decision on appeals of Green Architecture application; and, [Ord. 2009-040] [Ord. 2011-016] [Ord. 2018-002]
      l. to hear, consider, and decide appeals from decisions of the DRO on applications for Type 1 Waivers, except URAO. [Ord. 2011-016] [Ord. 2012-027]
3. **Commission Membership**  
   a. **BCC Appointed Members**  
      The ZC shall be composed of nine members, to be appointed by the BCC. Each member of the BCC shall appoint one member to the ZC. The remaining two members shall be appointed by a majority vote of the BCC. [Ord. 2009-040]

   1) **Qualifications**  
      a) Consideration shall be given to Applicants who have experience or education in planning, law, architecture, landscape architecture, interior design, land planning, natural resource management, real estate, and related fields. [Ord. 2009-040]
      b) The two members appointed by a majority vote of the BCC shall be architects registered in the State of Florida and shall be nominated by the PBC Chapter of the American Institute of Architects. [Ord. 2009-040]

   2) **Terms of Office**  
      Members of the ZC shall hold office until the first Tuesday after the first Monday in February of the year their term expires. Beginning on or after March 2, 2013, no person shall be appointed or reappointed to this Board for more than three consecutive terms. [Ord. 2009-040] [Ord. 2014-001]

4. **Officers, and Quorum and Voting**  
   a. **Chair and Vice-Chair**  
      No member shall serve as Chair for more than two consecutive terms.
   b. **Quorum and Voting**  
      A simple majority of a quorum shall be necessary in order to forward a formal recommendation of approval, approval with conditions, denial, or other recommendation to the BCC. A simple majority shall be necessary for the ZC to make a final decision approving an application for a Development Permit. In the event the ZC fails to make a final decision due to a tie vote, the petition shall be continued to the next meeting. After a second tie, the proposed motion shall be considered to have failed.

5. **Meetings**  
   a. **General**  
      General meetings of the ZC shall be held as needed to dispense of matters properly before the ZC. Special meetings may be called by the Chair or in writing by a majority of the members of the ZC. Staff shall provide 24-hour written notice to each ZC member before a special meeting is convened.
Section 4  Staff Officials

A. Building Official
   1. Creation and Appointment
      The Building Director of PZB shall be the division head of the Building Division of PZB, and shall be
      appointed and serve at the pleasure of the Executive Director of PZB, subject to the provisions of
      Chapter 1 (Administration) of the Florida Building Code with PBC Amendments.
   2. Jurisdiction, Authority, and Duties
      In addition to the Jurisdiction, Authority, and Duties which may be conferred upon the Building Official
      of PZB by other provisions of the PBC Code, the Building Official of PZB shall have the following
      jurisdictions, authority and duties under this Code: [Ord. 2011-016]
      a. to interpret Art. 18, Flood Damage Prevention when the Building Official is also the Flood Damage
         Prevention Administrator; [Ord. 2011-016]
      b. to interpret Art. 5.B.1.C, Temporary Structures; [Ord. 2019-005]
      c. to review and approve, approve with conditions, or deny applications for Development Permits for
         Building Permits; and,
      d. to review and approve, approve with conditions, or deny applications for Development Permits for
         Certificates of Occupancy or Completion.

B. Code Enforcement Director
   1. Creation and Appointment
      The Code Enforcement Director shall be the head of enforcement of this Code, and shall be appointed
      and serve at the pleasure of the Executive Director of PZB.
   2. Jurisdiction, Authority, and Duties
      In addition to the Jurisdiction, Authority, and Duties which may be conferred upon the Code
      Enforcement Director of PZB by other provisions of the PBC Code, the Code Enforcement Director of
      PZB shall have the following jurisdictions, authority and duties under this Code:
      a. to monitor and assist in the enforcement of this Code; and
      b. to ensure compliance with conditions of a Development Order.

C. County Administrator
   1. Creation and Appointment
      The PBC Administrator shall be the head of the PBC Staff, and shall be appointed and serve at the
      pleasure of the BCC.
   2. Jurisdiction, Authority, and Duties
      In addition to the Jurisdiction, Authority, and Duties which may be conferred upon the PBC Administrator
      by other provisions of the PBC Code and PBC Charter, the County Administrator shall have the
      following jurisdiction and authority under this Code:
      a. to administer PBC administrative officials charged with regulatory authority under this Code;
      b. to appoint Hearing officers as set forth in Art. 2.G.3.G, Hearing Officers; and,
      c. to approve, approve with conditions, or deny, applications for murals. [Ord. 2013-021]

D. County Attorney
   1. Jurisdiction, Authority, and Duties
      In addition to the Jurisdiction, Authority, and Duties which may be conferred upon the County Attorney
      by other provisions of the PBC Code and PBC Charter, the County Attorney and his/her designated
      Staff shall have the following jurisdictions, authority, and duties under this Code:
      a. to review and approve as to form and legal sufficiency all orders and resolutions issued by all
         decision making and administrative bodies described in this Article;
      b. to review and approve as to form Agreements, PDD Agreements, easements, declarations of
         covenants, letters of credit, performance bonds or other such documentation in connection with
         any requirement of this Code; and,
      c. to advise the BCC, PBC Departments, and the decision making and administrative bodies, in regard
         to the legal issues which may arise in the implementation of this Code and the Plan.
E. County Engineer

1. Creation and Appointment

   The County Engineer shall be the agency head of the Department of Engineering and Public Works (DEPW), and shall be appointed and serve at the pleasure of the County Administrator.

2. Jurisdiction, Authority, and Duties

   In addition to the Jurisdiction, Authority, and Duties which may be conferred upon the County Engineer by other provisions of the PBC Code and PBC Charter, the County Engineer shall have the following jurisdictions, authority and duties under this Code:

   a. to review and render interpretations to Art. 6.B.3.a.3), Driveways and Access, Art. 11, Subdivision, Platting, and Required Improvements, and Art. 12, Traffic Performance Standards;

   b. to review and approve or deny applications for Technical Compliance for Subdivision;

   c. to review applications and approve Development Orders for Land Development Permits;

   d. to review and acknowledge the completion of Required Improvements for Subdivision;

   e. to review and approve or deny applications for Development Permits for Final Plats of subdivisions, including replats of lands within record plats previously approved for recording by Resolution of the BCC, and approve such plats on behalf of PBC for recordation in the public records. Said approval authority may be delegated only as follows:

      1) to either the Deputy County Engineer or the Assistant County Engineer during a prearranged absence of the County Engineer, such as for vacation or seminar attendance, for a period of five or more consecutive days, provided that said delegation shall be in writing and signed by the County Engineer; or

      2) to the Deputy County Engineer in the event that the County Engineer is absent or otherwise incapacitated for a period of five or more days due to an emergency or other unforeseen circumstances, provided that said delegation shall be in writing and signed by the County Administrator.

   The Clerk of the Circuit Court shall be notified of each incident of delegation made pursuant to the above, and said delegation shall terminate upon the County Engineer’s return to normal duty;

   f. to review, consider, and approve, approve with conditions, or deny requests for deviations from Art. 11, Subdivision, Platting, and Required Improvements within the PO Zoning District; and, [Ord. 2007-013]

   g. to accept maintenance responsibility on behalf of PBC for those streets dedicated to the BCC on a duly approved plat of record and constructed pursuant to a Land Development Permit for subdivision required improvements.

F. PBC Health Department Director

1. Creation and Appointment

   The PBC Health Department Director shall be the agency head of the PBC Health Department (PBCHD) and shall be appointed by the Secretary of the Department of Health after consultation with the State Health Officer and the District Administrator, and concurrence by the BCC.

2. Jurisdiction, Authority, and Duties

   In addition to the Jurisdiction, Authority, and Duties which may be conferred upon the PBC Health Department Director by other provisions of the PBC Code, the PBC Health Department Director shall have the following jurisdictions, authority and duties under this Code:

   a. to review, consider, enforce, and render interpretations to Art. 15, Health Regulations; and

   b. to review and approve, approve with conditions, or deny all applications for Development Permits pursuant to Art. 15, Health Regulations.

G. Development Review Officer (DRO)

1. Establishment

   There is hereby established a Development Review Officer (DRO).

2. Powers and Duties

   The DRO shall have the following powers and duties under the provisions of this Code:

   a. to coordinate all PAC and PAA; [Ord. 2018-002]

   b. to accept, review, approve, and update all applicable application requirements; [Ord. 2018-002]

   c. to accept and determine sufficiency of applications for review, certify, and prepare staff reports recommending approval, approval with conditions, or denial of applications for Rezonings, Class A and Class B Conditional Uses, Type 2 Waivers, and Type 2 Variances; [Ord. 2017-007] [Ord. 2018-002]
d. to accept applications for review and approve, approve with conditions, or deny applications for applications subject to Administrative processes pursuant to Table 2.C.3, DRO, Administrative Processes; [Ord. 2018-002]

e. to request other PBC Officials and other agencies to provide factual information on applications for Development Permits as is deemed appropriate; [Ord. 2011-016] [Ord. 2018-002]

f. to review, consider, and finalize Zoning Plans that were approved by the BCC or ZC; [Ord. 2018-002]

g. to hear, review, consider, and approve, approve with conditions, or deny applications for Development Orders for Final Subdivision or Site Plans; [Ord. 2018-002]

h. to hear, review, consider, and approve, approve with conditions, or deny applications for TDRs for subdivisions requesting a two-unit per acre or less density increase pursuant to Art. 5.G.3, Transfer of Development of Rights (TDRs) – Special Density Program; and, [Ord. 2018-002]

i. to recommend to the BCC additional or amended rules of procedure not inconsistent with his Section to govern the DRO. [Ord. 2011-016] [Ord. 2018-002]

3. Comments and Recommendations

a. The DRO may seek comments and recommendations from the following PBC Departments and Divisions, as well as other Local Government and State Government agencies, as deemed appropriate by the DRO: [Ord. 2008-037]
   1) Zoning Division;
   2) Building Division; [Ord. 2018-002]
   3) Department of Airports; [Ord. 2018-002]
   4) Department of Environmental Protection (DEP) for Type 3 Excavation; [Ord. 2018-002]
   5) Engineering Department; [Ord. 2018-002]
   6) Environmental Resources Management Department; [Ord. 2018-002]
   7) Fire-Rescue Department;
   8) Housing and Community Development (HCD); [Ord. 2018-002]
   9) Lake Worth Drainage District; [Ord. 2018-002]
  10) Parks and Recreation Department; [Ord. 2018-002]
  11) PBC HD; [Ord. 2018-002]
  12) PBC School Board; [Ord. 2018-002]
  13) Planning Division; [Ord. 2018-002]
  14) PREM; and,

b. Recommendations and comments shall be forwarded to the DRO no less frequently than two times a month to dispose of matters properly and may be called for by the DRO.

4. Procedures

a. DRO
   The Executive Director of PZB shall designate a DRO for overseeing different types of Zoning applications and processes. [Ord. 2018-002]

b. Secretary
   The DRO shall designate a Secretary. The Secretary shall maintain all records of the DRO. The records shall be stored with the agency serving as Secretary herein, and shall be available for inspection by the public, upon reasonable request, during normal business hours.

c. Staff
   The Zoning Division of PZB shall be the professional staff for the DRO.

d. Certification for Public Hearing Processes
   All actions by the DRO shall be in accordance with the procedures established in Art. 2.A, General and Art. 2.B, Public Hearing Processes. [Ord. 2018-002] [Ord. 2020-001]

e. Approval for Administrative Processes
   All actions by the DRO shall be in accordance with the procedures established in Art. 2.A, General and Art. 2.B, Public Hearing Processes. [Ord. 2018-002] [Ord. 2020-001]

f. Record of DRO
   Upon request, the DRO may provide, at cost, copies of recommendations upon which a decision is based.

g. Appeal
   Appeal of any decision of the DRO shall be made to the DRAB based on the requirements in Art. 2.A.14.C.2.b, Administrative DO, unless stated otherwise. [Ord. 2011-016]
H. Director of ERM
1. Creation and Appointment
   The Director of the Department of Environmental Resources Management (ERM) shall be the agency head of the ERM, and shall be appointed and serve at the pleasure of the County Administrator.

2. Jurisdiction, Authority, and Duties
   In addition to the Jurisdiction, Authority, and Duties which may be conferred upon the Director of ERM by other provisions of the PBC Code and PBC Charter, the Director of ERM shall have the following jurisdictions, authority and duties under this Code:
   a. to review, consider, and render interpretations to Art. 14, Environmental Standards;
   b. to review and approve, approve with conditions or deny applications for development or permits for sea turtle protection and sand preservation, wetlands protection, wellfield protection, upland vegetation preservation and protection, Agricultural Excavation in the WCAA, water and irrigation conservation, stormwater pollution prevention, and other Ordinances as may be assigned by the BCC; [Ord. 2017-007]
   c. to initiate enforcement action pursuant to Art. 14, Environmental Standards, whenever evidence has been obtained or received establishing that a violation has been committed. The Director of ERM shall issue a notice to correct the violation, a citation to cease the violation, or a notice of violation and cause same to be served upon the violator;
   d. to terminate an investigation or an enforcement action commenced under the provisions of Art. 14, Environmental Standards, and to resolve the alleged violations by execution of a written consent (settlement) agreement between PBC and the person(s) who is/are the subject of the investigation or action. The consent agreement shall provide written assurance of voluntary compliance with all the applicable provisions of the Code by said person(s). The consent agreement may, at the discretion of the Director of ERM, provide the following: remedial or corrective action; environmental mitigation; compensatory damages; punitive damages; civil penalties; costs and expenses of PBC in tracing the source of any discharge, in controlling and abating the source of the pollutants and the pollutants themselves, and in restoring the waters and property, including animal, plant and aquatic life of PBC to their former conditions; and costs of PBC for investigation, enforcement, testing, monitoring, and litigation executed written consent agreements are hereby deemed to be lawful orders or contracts of PBC; and,
   e. to refer unresolved violations to the appropriate enforcement board or to make recommendations to the BCC for initiation of suits in the appropriate courts of competent jurisdiction.

I. Director of Land Development
1. Creation and Appointment
   The Director of the Land Development Division of the DEPW shall be the division head of the Land Development Division of DEPW, and shall be appointed and serve at the pleasure of the County Engineer.

2. Jurisdiction, Authority, and Duties
   In addition to the Jurisdiction, Authority, and Duties which may be conferred upon the Director of the Land Development Division by other provisions of the PBC Code, the Director of the Land Development Division shall have the jurisdiction, authority and duty under this Code to administer PBC Staff review of Art. 11, Subdivision, Platting, and Required Improvements.

J. Director of Parks and Recreation
1. Creation and Appointment
   The Director of the Parks and Recreation Department shall be the agency head of the PBC Parks and Recreation Department and shall be appointed and serve at the pleasure of the PBC Administrator.

2. Jurisdiction, Authority, and Duties
   In addition to the jurisdiction, authority, and duties which may be conferred upon the Director of Parks and Recreation by other provisions of the PBC Code and PBC Charter, the Director of Parks and Recreation shall have the following jurisdiction, authorities, and duties under this Code:
   a. to review and render interpretations on park related land development regulations and to assure park related land development regulations are met; and
   b. to administer the Parks and Recreation Department, including the Parks Division and the Recreation Division.
K. Executive Director of Planning, Zoning and Building

1. Creation and Appointment
   The Executive Director of PZB shall be the agency head of the PZB, and shall be appointed and serve at the pleasure of the County Administrator.

2. Jurisdiction, Authority, and Duties
   In addition to the jurisdiction, authority, and duties which may be conferred upon the Executive Director of PZB by other provisions of the PBC Code and PBC Charter, the Executive Director of PZB shall have the following jurisdiction, authorities, and duties under this Code:
   a. to review and render interpretations to all provisions of this Code and the Official Zoning Map, except for those articles listed under Art. 1.B.1.A. Authority. The PZB Executive Director may delegate interpretation of articles subject to his/her authority and Official Zoning Map to the appropriate Division Director within the Department; [Ord. 2011-016]
   b. to administer PBC’s TDR Program including accepting applications, and reviewing and preparing staff reports recommending approval, approval with conditions, or denial of applications for receiving area designation;
   c. to administer the PZB Department, including the Planning Division, the Zoning Division, the Building Division, the Code Enforcement Division, the Contractors Certification Division and the Administrative Division; [Ord. 2012-027] [Ord. 2018-002]
   d. to waive or modify development review fees upon demonstration that the Applicant is indigent pursuant to PBCHD standards, or the Applicant can demonstrate review fees are in excess of actual Staff costs; and, [Ord. 2012-027] [Ord. 2018-002]
   e. to waive certain requirements as may be stated within this Code when a State of Emergency is declared. [Ord. 2012-027]

L. Impact Fee Coordinator

1. Creation and Appointment
   The Impact Fee Coordinator shall be responsible for the administration of PBC’s impact fee program, and shall be appointed and serve at the pleasure of the Director of the Office of Financial Management and Budget.

2. Jurisdiction, Authority, and Duties
   In addition to the Jurisdiction, Authority, and Duties which may be conferred upon the Impact Fee Coordinator by other provisions of the PBC Code, the Impact Fee Coordinator shall have the following jurisdictions, authority and duties under this Code:
   a. to review and render interpretations to Art. 13, Impact Fees;
   b. to administrate Art. 13, Impact Fees;
   c. to review and approve or deny applications for independent calculation studies pursuant to Art. 13, Impact Fees;
   d. to review and approve or deny applications for credit pursuant to Art. 13, Impact Fees, with the input, assistance, and approval of PBC department or agency receiving the impact fees for which the credit is sought;
   e. to provide assistance to the IFRC;
   f. to present appeals to the IFAB;
   g. to coordinate PBC, municipalities, and agencies receiving impact fee funds; and,
   h. to provide technical assistance and advice to the municipalities in their administration of Art. 13, Impact Fees.

M. Planning Director

1. Creation and Appointment
   The Planning Director of PZB shall be the division head of the Planning Division of PZB, and shall be appointed and serve at the pleasure of the Executive Director of PZB.

2. Jurisdiction, Authority, and Duties
   In addition to the Jurisdiction, Authority, and Duties which may be conferred upon the Planning Director of PZB by other provisions of the PBC Code, the Planning Director of PZB shall have the following jurisdictions, authority and duties under this Code:
   a. to undertake the current and long range comprehensive planning responsibilities of PBC under F.S. § 163.3161 et seq., as amended;
   b. to review the Plan every seven years;
   c. to recommend annually any necessary amendments to the Plan;
d. to accept, review and prepare staff reports recommending approval, approval with conditions, approval with modifications, or denial of applications for Site Specific (FLUA) amendments to the Plan; [Ord. 2018-002]

e. to administer the process of Development of Regional Impact (DRI) review for projects within municipalities in PBC;

f. to review and render interpretations of Art. 5.G, Density Bonus Programs; [Ord. 2019-033]

g. to interpret and decide on application for Entitlement Density and Intensity for Workforce Housing Program (WHP) and Affordable Housing Program (AHP); and, [Ord. 2011-016]

h. to interpret the Agricultural Enclave Overlay (AGEO) Conceptual Plan. [Ord. 2011-016]

N. Zoning Director

1. Creation and Appointment

The Zoning Director of PZB shall be the division head of the Zoning Division of PZB, and shall be appointed and serve at the pleasure of the Executive Director of PZB.

2. Jurisdiction, Authority, and Duties

In addition to the Jurisdiction, Authority, and Duties which may be conferred upon the Zoning Director by other provisions of the PBC Code, the Zoning Director shall have the following jurisdictions, authority and duties under this Code:

a. to set the Annual Zoning Calendar, as required by Art. 2.A, General: [Ord. 2020-001]

b. to recommend annually any necessary amendments to this Code;

d. to review and approve or deny applications for Adequate Public Facilities (Concurrency); [Ord. 2016-016]

e. to revoke or suspend, if necessary, any Development Order or permit which was issued in violation of this Code; [Ord. 2016-016] [Ord. 2018-002]

f. to oversee the preservation and maintenance of vegetation not covered under the provisions of Art. 14, Environmental Standards, through design review, Conditions of Approval, and inspections; and,

[Ord. 2016-016]

CHAPTER H FLU PLAN AMENDMENTS

Section 1 General

A. Purpose

The purpose of this Chapter is to establish a review process for proposed Site Specific amendments to change Future Land Use (FLU) designations on the FLUA of the Palm Beach County Comprehensive Plan. [Ord. 2009-040] [Ord. 2012-027] [Ord. 2018-002]

B. Authority

Pursuant to F.S. § 163.3184, the BCC may adopt Site Specific FLUA amendments to change the FLU subject to the provisions of this Section. [Ord. 2012-027] [Ord. 2018-002]

C. Initiation

An application for a Site Specific FLUA amendment shall be initiated only by the Property Owner of the parcel, the authorized agent of the Property Owner or the BCC. An application for a Site Specific FLUA amendment may also include a request for an associated text amendment to the Comprehensive Plan subject to an additional fee set by the BCC. In order for the requested text amendment to be processed, it must be initiated by the BCC and the associated FLUA amendment application must be submitted and found sufficient. [Ord. 2009-040] [Ord. 2012-027] [Ord. 2018-002]

D. Established Dates and Fees

1. Timing

The County accepts privately proposed applications for Large and Small Scale Amendments up to four times per year as scheduled by the Planning Director. Scheduled intake dates shall be announced in advance by the Planning Director. Additional amendment intake dates outside the scheduled rounds require approval by a supermajority vote of the BCC. [Ord. 2009-040] [Ord. 2012-027] [Ord. 2018-002]
2. **Fees**

   The application for a FLUA amendment, and any associated text amendment, shall be accompanied by a fee established by the BCC. Any request for a refund shall be in writing, based upon the current PZB refund policy, and approval by the Planning Director. [Ord. 2012-027] [Ord. 2018-002]

**E. Pre-Application Meeting**

The purpose of the pre-application meeting is to identify issues relating to the proposed application prior to the intake date. A pre-application meeting with the Planning Division prior to the FLUA amendment intake is mandatory. [Ord. 2012-027] [Ord. 2018-002]

**F. Application Procedures**

   An application for a Site Specific amendment shall be submitted to the Planning Director along with application fees established by the BCC. [Ord. 2012-027] [Ord. 2018-002]

   1. **Concurrent Small Scale Amendments**

      If a Small Scale land use amendment requires a Rezoning, Conditional Use, Development Order Amendment, or Abandonment application(s), all applications shall be reviewed concurrently and considered by the BCC at the same public hearing. The Applicant shall submit a Site Plan or Conceptual Site Plan as part of the zoning application(s). The complete zoning application must be submitted at a scheduled zoning application intake within 45 calendar days of receipt of the Small Scale land use amendment application. If a complete zoning application is not timely submitted, the Small Scale land use amendment shall be administratively withdrawn immediately. [Ord. 2009-040] [Ord. 2018-002]

   2. **Contents of Application**

      a. **General**

         The application shall be submitted in a form established by the Planning Director. The application must contain applicable data and analysis to substantiate any claims made within the application. Failure of an Applicant to disclose relevant information shall serve as grounds for postponement by the board holding the public hearing. [Ord. 2009-040] [Ord. 2018-002]

      b. **Amendments to the Application**

         After the amendment is determined to be sufficient for processing, applications shall not be significantly modified unless requested by the Planning Division. Significant changes to the application submitted following a finding of sufficiency shall serve as grounds for administrative postponement by the Planning Director to the next amendment round. Significant changes to the application include, but are not limited to, changes to the proposed Future Land Use designation, changes to proposed Conditions of Approval, changes to associated private text amendments. Information provided by an Applicant following the distribution of the staff report to the LPA shall serve as grounds for postponement, as appropriate, of the public hearings by the board holding the public hearing. [Ord. 2009-040] [Ord. 2018-002]

   3. **Sufficiency Review**

      The Planning Director shall determine whether the application is sufficient or insufficient within ten days of submittal by reviewing the information required in the application and any additional data necessary to evaluate the application. The determination of sufficiency shall be based upon whether or not the application responds to all the requested information and meets minimum application criteria, as provided by the Planning Director in the application instructions. [Ord. 2009-040] [Ord. 2012-027] [Ord. 2018-002]

      a. **Sufficiency**

         If the application is determined to be sufficient, it shall be reviewed pursuant to the procedures and standards of this Article. [Ord. 2012-027] [Ord. 2018-002]

      b. **Insufficiency**

         If an application is determined to be insufficient, the Planning Director shall provide a written notice to the Applicant specifying the deficiencies within ten working days of the receipt of the application. The Planning Director shall take no further action on the application until the deficiencies are remedied. If the deficiencies are not remedied within ten working days of the notice of insufficiency, the application shall be administratively withdrawn. [Ord. 2012-027] [Ord. 2018-002]

   4. **Review, Report, and Recommendation by Planning Director**

      When the application is determined sufficient, the Planning Director shall review the application, consult with other agencies, prepare a staff report (which incorporates the comments of the other agencies), and make a recommendation of approval, approval with conditions, approval with modifications, or denial based on applicable data and analysis and consistency with the Palm Beach County Comprehensive Plan. The Planning Director shall publish a copy of the staff report online at least five working days prior to the LPA public hearing. [Ord. 2009-040] [Ord. 2012-027] [Ord. 2018-002]
5. **Notification**

Notice of a proposed amendment for any public hearing shall be provided by publication of advertisement, mailed or electronically transmitted notice and posting as pursuant to the terms of this Section. The Planning Director shall notify the Intergovernmental Plan Amendment Review Committee (IPARC) of proposed land use amendments pursuant to the Plan Amendment Coordinated Review Interlocal Agreement. [Ord. 2009-040] [Ord. 2012-027] [Ord. 2018-002]

a. **Newspaper Publication**

The required advertisements shall meet the requirements of F.S. § 163.3184(11)(b) and F.S. § 125.66(4)(b)2, as amended from time to time. [Ord. 2012-027] [Ord. 2018-002]

b. **Courtesy Notice**

A copy of such notice shall be kept available for public inspection during regular business hours at the office of PZB. If the property is undergoing a simultaneous land use change and rezoning, the notice for the rezoning may be included in the notice required for the land use change. Courtesy notices shall be mailed a minimum of 15 calendar days prior to the date of the first public hearing by depositing such notice in the mail by first class mail, properly addressed and postage. [Ord. 2012-027] [Ord. 2018-002]

1) **Applicability and Mailing Boundary**

a) **Property Owners**

A courtesy “notice” of a proposed plan amendment shall be sent to all owners of real property located within 500 feet of the periphery of the subject site in the Urban/Suburban, Agricultural Reserve, and Glades Tiers, and within 1,000 feet of the periphery of the subject site in the Exurban and Rural Tiers, whose names and addresses are known by reference to the latest published ad valorem tax records of PBC Property Appraiser, except that when real property consists of a condominium, the courtesy notice shall be given to the condominium association and all real Property Owners living within 500 feet. If the area within 500 feet is owned by the Applicant or partner in interest, the 500-foot notification boundary shall be extended from these parcels. Notification shall be sent to each owner as the ownership appears on the last approved tax roll. [Ord. 2012-027] [Ord. 2018-002]

b) **POAs and Cooperatives**

All POAs and Cooperatives located within 500 feet of the periphery of the subject site in the Urban/Suburban, Agricultural Reserve, and Glades Tiers, and within 1,000 feet of the periphery of the subject site in the Exurban and Rural Tiers, shall be notified. [Ord. 2012-027] [Ord. 2018-002]

c) **Municipalities and Counties**

All municipalities and counties within one mile of the subject site shall be notified. If a site is located within a future annexation area as identified in a municipality’s Comprehensive Plan, the associated municipality shall be notified. [Ord. 2012-027] [Ord. 2018-002]

d) **Interested Parties**

A courtesy notice of all public hearings may be sent upon request to all organizations, associations, and other interested persons or groups known to the Planning Director. An annual fee may be assessed to defray the cost. [Ord. 2012-027] [Ord. 2018-002]

2) **Notice Content**

All notices shall include the following information: [Ord. 2012-027] [Ord. 2018-002]

a) a general summary of the application; [Ord. 2012-027] [Ord. 2018-002]

b) a date, time and place for the public hearings; [Ord. 2012-027] [Ord. 2018-002]

c) a general location map indicating the subject site including major streets; and, [Ord. 2012-027] [Ord. 2018-002]

d) a statement that interested parties may appear at the public hearing and be heard regarding the amendment. [Ord. 2012-027] [Ord. 2018-002]

3) **Failure to Receive Courtesy Notice**

Failure to receive a courtesy notice shall not be deemed a failure to comply with this requirement, and shall not be grounds to challenge the validity of any decision made by BCC. [Ord. 2012-027] [Ord. 2018-002]

c. **Signs**

1) The land subject to the application shall be posted with a notice of the public hearing by the Applicant on a sign meeting standards and specifications issued by the County within 45 calendar days of the determination that the application is sufficient for processing. The Applicant shall submit photographs and a written affidavit confirming the signs have been...
posted. One sign shall be posted for each 500 feet of frontage along a street up to a maximum of ten signs. All signs shall be: [Ord. 2012-027] [Ord. 2018-002]

a) Evenly spaced along the street or in a location acceptable to the Planning Director. [Ord. 2012-027] [Ord. 2018-002]

b) Setback no more than 25 feet from the property line fronting the street. [Ord. 2012-027] [Ord. 2018-002]

Signs shall be posted in a location acceptable to the Planning Director, where the land does not have significant frontage on a street. The failure of any such posted notice to remain in place after the notice has been posted shall not be deemed a failure to comply with this requirement, or be grounds to challenge the validity of any decision made by the BCC. The Applicant shall ensure the signs have been removed no later than five days after the final hearing. [Ord. 2012-027] [Ord. 2018-002]

d. Public Notice of County Initiated Amendments
   The County shall provide written notification to each Property Owner of property subject to a County Initiated Future Land Use change a minimum of 30 calendar days prior to the first public hearing. [Ord. 2018-002]

e. Exceptions to Mailing and Posting
   The courtesy mailing notice and posting notice requirements shall not apply to County Initiated Site Specific FLUA amendment for a land use change to a Conservation (CON) designation following acquisition by a public agency or a corrective land use change. [Ord. 2012-027] [Ord. 2018-002]

6. Action by the Planning Commission Sitting as the Local Planning Agency (LPA)
   The LPA public hearing shall be advertised in a newspaper of general circulation in accordance with requirements set forth in F.S. § 163.3164(39), as amended from time to time. The LPA shall conduct a public hearing on the application pursuant to the procedures in Art. 2.H.1.F.8, Conduct of Hearings, and make recommendations regarding the proposed amendments to the BCC. At the public hearing, the LPA shall review the application, the staff report, the relevant support materials, and public testimony given at the hearings. At the close of the public hearing, the LPA shall vote on its recommendations (approval, approve with conditions, or denial). [Ord. 2009-040] [Ord. 2012-027]

7. Action by BCC
   Action by the BCC shall be governed by F.S. § 163.3184, as amended from time to time. [Ord. 2012-027]

a. Transmittal Public Hearing
   Large Scale Amendments require a transmittal public hearing. The transmittal public hearing shall be held on a weekday at least seven calendar days after notice is published pursuant to F.S. § 163.3184(11)(b)(1), as amended from time to time, pursuant to the procedures in Art. 2.H.1.F.8, Conduct of Hearings. At the public hearing, the BCC shall consider the application, the staff report, the relevant support materials, the recommendations of the LPA, and the public testimony given at the public hearing, and by an affirmative vote of a majority of the members of the BCC present at the hearing, vote to approve, approve with conditions, or deny the transmittal of the application. Failure of the BCC to approve the transmittal of an application for a Site Specific amendment shall be deemed a denial of the proposed Site Specific amendment. [Ord. 2009-040] [Ord. 2012-027]

b. Adoption Public Hearing
   The adoption public hearing shall be on a weekday at least five calendar days after the day the notice for the public hearing is published pursuant to F.S. § 163.3184(11)(b)(2), as amended pursuant to the procedures in Art. 2.H.1.F.8, Conduct of Hearings. At the public hearing, the BCC shall consider the application, the staff report, the relevant support materials, the State Land Planning Agency comments, and the public testimony given at the public hearing, and by affirmative vote of a majority of the members of the BCC present at the meeting, vote to adopt, adopt with conditions, or not to adopt an Ordinance making a Site Specific amendment. Small Scale Development Amendments shall require only one public hearing before the BCC, which shall be an adoption public hearing, pursuant to F.S. § 163.3187(2), and provisions of F.S. § 125.66(4)(a) as amended from time to time. Actions approving Site Specific Plan amendments shall be adopted by Ordinances pursuant to F.S. § 163.3187, as amended from time to time. [Ord. 2009-040] [Ord. 2012-027] [Ord. 2018-002]
8. **Conduct of Hearings**
   a. **Rights of All Persons**
      Any person may appear at a public hearing and submit evidence, either individually or as a representative of an organization. Anyone representing an organization shall present evidence of their authority to speak on behalf of the organization in regard to the matter under consideration. Each person who appears at a public hearing shall be identified, state an address, and if appearing on behalf of an organization, state the name and mailing address of the organization. [Ord. 2012-027] [Ord. 2018-002]
   b. **Due Order of Proceedings**
      The order of the proceedings shall be pursuant to Art. 2.B.6.D, Conduct of Hearings. [Ord. 2018-002]
   c. **Postponement of Public Hearing for Small Scale Amendments**
      1) **Administrative Postponements**
         a) An Applicant shall have the right to request and be granted one administrative postponement, of no more than 60 days, of the LPA public hearing without an additional fee; provided that the request is made in writing at least 20 days prior to the hearing and is submitted along with an additional set of the required 500-foot public notice envelopes. [Ord. 2012-027] [Ord. 2018-002]
         b) An Applicant shall have the right to request and be granted one entitlement continuance, of no more than 60 days, of the BCC Adoption public hearing; provided that the request is made in writing at least 20 days prior to the hearing and is submitted along with an additional set of the required 500-foot public notice envelopes. [Ord. 2009-040] [Ord. 2012-027] [Ord. 2018-002]
      2) **LPA or BCC Public Hearing Continuances**
         The body conducting the public hearing may by its own motion, or at the request of any Applicant or the Planning Director, continue the public hearing or meeting to a fixed date, time and place. Such continuances shall be granted at the discretion of the body conducting the hearing only upon good cause shown. The Applicant may be required to provide an additional set of the required courtesy notice envelopes and may be subject to a fee as established by the BCC. [Ord. 2009-040] [Ord. 2012-027] [Ord. 2018-002]
   d. **Postponement of Large Scale Amendments**
      In order to provide most current data, the Applicant of an amendment postponed to the next round shall submit the fee with an updated application including a new traffic analysis on the intake date of the next round, along with a new set of courtesy notices. Failure to submit the fee and an updated application will result in the amendment being administratively withdrawn. [Ord. 2018-002]
      1) **Administrative Postponements**
         An Applicant shall have the right to request and be granted one administrative postponement, to a subsequent amendment round and will be subject to a fee as established by the BCC; provided that the request is made in writing at least 20 days prior to the LPA public hearing. The Planning Director may approve administrative postponements provided that the request is made in writing at least five days prior to the publication of the agenda for the public hearing. [Ord. 2009-040] [Ord. 2012-027] [Ord. 2018-002]
      2) **Non-Administrative Postponements**
         Following the publication of the agenda for a public hearing, postponements shall be granted at the discretion of the body conducting the hearing and shall be subject to a fee established by the BCC. The LPA may continue a public hearing within the same amendment round. The LPA may postpone an amendment to a subsequent amendment round at the request of an Applicant provided that the BCC public hearing has not been advertised. [Ord. 2012-027] [Ord. 2018-002]
   9. **Withdrawal of Applications and Refunds**
      An Applicant shall have the right to withdraw an application for a Site Specific amendment at any time prior to the advertised adoption public hearing by the BCC. Any request for a refund shall be in writing, based upon the current PZB refund policy, and approval by the Planning Director. [Ord. 2009-040] [Ord. 2012-027] [Ord. 2018-002]
CHAPTER I   COORDINATED SCHOOL PLANNING

Section 1   Purpose

The purpose of this Chapter is to establish a mechanism for collaborative planning and decision making with the Palm Beach County School District and Palm Beach County to measure district school capacity available to accommodate new development pursuant. [Ord. 2018-002]

Section 2   Authority

The Board of County Commissioners has the authority to adopt this Chapter pursuant to the PBC Charter, and F.S. § 163.01, F.S. § 163.3177(6)(h), F.S. § 1013.33, the Palm Beach County Comprehensive Plan, and the Interlocal Agreement for Coordinated Planning (Resolution No. R-2015-1864). [Ord. 2018-002]

Section 3   Applicability

The requirements of the Interlocal Agreement for Coordinated Planning, as amended, shall apply to all DOs for the safe, convenient, orderly and adequate provision of public school facilities. [Ord. 2018-002]

Section 4   School Capacity Availability Determination

The County shall notify the School District of any land use or rezoning applications that may increase Residential FLUE Designation or density at least 30 days prior to the date of the applicable public hearing. The County will transmit to School District all applicable support material, and the date, time, and place of the applicable public meeting. Within 20 days of receipt of completed application, the School District shall submit to the County a school capacity availability determination providing the District’s findings and recommendations. [Ord. 2018-002]

ARTICLE 3

OVERLAYS AND ZONING DISTRICTS

CHAPTER A  GENERAL

Section 1  Districts

A. Purpose and Intent
In order to ensure that all development in unincorporated PBC is consistent with the Plan, it is necessary
to establish a series of districts and overlays to ensure that each use is compatible with surrounding uses,
served by adequate public facilities, and sensitive to natural resources. Standard, PDD and TDD Zoning
Districts, and Overlays, where applicable, have been adopted to be in compliance with the Plan. Each
district and overlay has its own purpose and permitted uses, conditional uses, special uses and other
regulations that control the use of land. All development within each district shall be consistent with the
purposes stated in this Article. [Ord. 2011-016]

B. Overlays and Zoning Districts
In order to carry out and implement the Plan, the following Overlays, Standard Zoning Districts, Planned
Development Districts (PDDs), and Traditional Development Districts (TDDs) are hereby established. [Ord.
2011-016]

1. Overlays
   AGEO, Agricultural Enclave Overlay [Ord. 2011-016]
   AZO, Airport Zone Overlay
   BRPO, Bioscience Research Protection Overlay [Ord. 2016-042]
   COZ, Conditional Overlay Zone
   GAO, Glades Area Overlay
   IOZ, Indiantown Road Overlay
   IRO, Infill Redevelopment Overlay [Ord. 2011-016]
   LCSO, Lion Country Safari Overlay [Ord. 2016-042]
   LOSTO, Lake Okeechobee Scenic Trail Overlay
   NBOZ, Northlake Boulevard Overlay Zone
   NEO, Native Ecosystem Overlay
   PBIAO, Palm Beach International Airport Overlay
   RTO, Research and Technology Overlay
   SCGCFO, Sugar Cane Growers Cooperative of Florida Protection Area Overlay [Ord. 2004-040]
   SR 80, Non-Residential Overlay
   TAPO, Turnpike Aquifer Protection Overlay
   URAO, Urban Redevelopment Area Overlay [Ord. 2011-016]
   WCRAO, Westgate Community Redevelopment Agency Overlay
   WCRO, Western Communities Residential Overlay [Ord. 2017-011]

2. Standard Districts
   AGR, Agricultural Reserve
   AP, Agricultural Production
   AR, Agricultural Residential
   CC, Commercial Community
   CG, Commercial General
   CHO, Commercial High Office
   CLO, Commercial Low Office
   CN, Neighborhood Commercial
   CRE, Commercial Recreation
   IG, General Industrial
   IL, Industrial Light
   IPF, Institutional and Public Facilities
   IR, Infill Redevelopment Overlay [Ord. 2011-016]
   PC, Preservation Conservation
   PO, Public Ownership
   RE, Residential Estate
   RM, Residential Multifamily
RS, Residential Single Family
RT, Residential Transitional
UC, Urban Center [Ord. 2011-016]

RVPD, Recreational Vehicle Planned Development

4. Traditional Development Districts (TDD)
TND, Traditional Neighborhood Development
TMD, Traditional Marketplace Development
TTD, Traditional Town Development

Section 2 Zoning Map and District Boundaries

A. Establishment of Official Zoning Map
The location and boundaries of the districts established in this Article shall be set forth on the Official Zoning Map which is hereby incorporated by reference. A copy of the Official Zoning Map shall be located for inspection at all times by the general public during regular business hours in the office of PZB.

B. Amendment to the Official Zoning Map
If amendments are made to the boundaries of the Official Zoning Map, the Zoning Director shall update the Official Zoning Map within 30 days after the amendment.

C. Replacement of the Official Zoning Map
1. Damage or Destruction
In the event that the Official Zoning Map becomes damaged, destroyed, lost or difficult to interpret due to changes and additions, the BCC shall adopt a new Official Zoning Map that shall supersede the prior Official Zoning Map.

2. Map Errors
The new Official Zoning Map may correct drafting and clerical errors or omissions in the prior Official Zoning Map, but no such corrections shall have the effect of amending the original Official Zoning Map, or subsequent amendments thereto, without a duly noticed public hearing pursuant to the procedures and standards of this Code.

D. Prior Approvals Corresponding to Current Districts
In order to promote ease of use and the consistent application of this Code, the Official Zoning Map may be updated administratively to delineate the Planned Development District that corresponds to certain prior approvals specified in Art. 3.A.3.E.2, Planned Development Districts. Updating the Official Zoning Map by delineating the current zoning category or terminology on a particular property is not a rezoning and does not change the land development regulations that are applicable to a particular property. [Ord. 2012-003]

Section 3 Zoning District Consistency with the Future Land Use Atlas (FLUA)

A. Purpose and Intent
A parcel’s zoning district shall be consistent with its Future Land Use (FLU) designation. Any request for a Development Order shall be reviewed to determine consistency with the requirements of this Section. Unless exempted otherwise, all applications for a Development Order shall be in a zoning district corresponding to the FLU designations indicated in the following Tables: [Ord. 2011-016]

2. Planned Development Districts: Table 3.A.3.C, FLU Designation and Corresponding Planned Development Districts; or
3. Traditional Development Districts: Table 3.A.3.D, TDD Corresponding Land Use.
B. Standard Districts

Any application for a rezoning to a Standard Zoning District shall correspond to a FLU designation indicated in the Table below.

Notes:
1. Unless exempted otherwise all applications for a Development Order shall require the subject site be rezoned to a shaded district.
2. Existing zoning districts by FLU designation that may qualify for SFD exemption in accordance with the exceptions listed below.
4. The zoning district is consistent as described in the Plan. [Ord. 2019-005] [Ord. 2020-001]

1. Standard District Exceptions and Limitations

The following list of exceptions shall be permitted:

a. A rezoning shall not be required for an existing legal lot of record for the development of a SFD with accessory uses, provided the existing zoning is identified in Table 3.A.3.B, Future Land Use (FLU) Designation and Corresponding Standard Zoning Districts. [Ord. 2011-016]
b. The AR district is consistent with the SA FLU designation in the Rural and Exurban Tiers only.
c. The AR district may be considered consistent with all FLU designations in the U/S Tier for existing agricultural uses or the purpose of permitting new agricultural uses, where in accordance with Art. 3.C.1.C.1.c, Agricultural Uses in the U/S Tier. [Ord. 2011-016]
d. The PO district is consistent with all FLU designations.

e. The AGR district is consistent with the SA FLU designation in the AGR Tier only. [Ord. 2011-016]
f. Within the Glades Tier, the AP district is consistent with all FLU designations, excluding Conservation. [Ord. 2011-016] [Ord. 2016-042]
g. The RM district is consistent with the MR-5 designation only for those areas already zoned RM or RH, prior to the Plan’s August 31, 1989 adoption. [Ord. 2011-016] [Ord. 2017-025]
h. The RS district is consistent with the LR-1 designation only for those areas already zoned RS, RTU, RM, or RH on the Plan’s August 31, 1989 adoption. [Ord. 2016-042]

i. Certain uses in the CRE district over three acres require rezoning to IL. See Supplementary Use Standards. [Ord. 2011-016]

j. Existing institutional or civic uses in the AR, RE, RT, RS, or RM districts with an INST FLU designation shall not be considered non-conforming. However, a rezoning shall be required for any action exceeding DRO Authority. [Ord. 2011-016]

k. A rezoning shall not be required for any Palm Beach County Natural Area with a CON FLU designation provided that any subdivision or development is consistent with all development standards and use regulations for the PC district. [Ord. 2011-016]

l. A rezoning shall not be required for the installation or replacement of a SFWMD telemetry tower in accordance with Article 5.B.1.A.13.c, Exceptions for SFWMD Telemetry Towers in the Glades Tier. [Ord. 2014-025]

m. The UC or UI Zoning Districts may be permitted to utilize the FLU designation and zoning district in place prior to the adoption of the Urban Redevelopment Area Overlay (URAO), in accordance with Article 3.B.16.B.5.b, Alternative Future Land Use and Zoning. [Ord. 2017-002]

n. The IPF district shall only be consistent with the U/T FLU designation for the purposes of accommodating privately-owned or operated utility uses, including those considered publically-held utilities that are not owned or operated by the State of Florida or local PBC governmental entity. [Ord. 2017-007]

C. Planned Development Districts (PDDs)

Any application for a rezoning to a PDD shall correspond to a FLU designation indicated in the Table below. [Ord. 2011-016]

| Table 3.A.3.C – FLU Designation and Corresponding Planned Development Districts (1) |
|---------------------------------|---------------------------------|---------------------------------|---------------------------------|---------------------------------|---------------------------------|---------------------------------|---------------------------------|---------------------------------|---------------------------------|---------------------------------|---------------------------------|---------------------------------|---------------------------------|---------------------------------|---------------------------------|
| AGR (2) | RR | WCR | AGE | L1R | L2R | L3R | MR5 | HR8 | HR12 | HR18 | MLU | CLR |
| PUD | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ |
| MHPD | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ |
| MUPD (1) | RR | AGE | CL | CH | CLO | CHO | IND | INST | CRE | MLU | EDC | CLR (5) |

| PIPD | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ |
| RVPD | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ |

Notes:
1. Check (✓) indicates the PDD corresponds to the FLU designations. Any application for a rezoning to a PDD shall be to a PDD that corresponds to a FLU designation. [Ord. 2008-037]
2. PDDs in the AGR Tier are limited to the 80/20 PUD OR 60/40 PUD. [Ord. 2006-004]
3. A PUD or MUPD Pod may be permitted within a TTD with an AGE FLU designation in accordance with Table 3.F.5.C, Traditional Town Development Land Use Allocations. [Ord. 2014-031]
4. An MXPD is consistent with the MLU FLU designation in the Urban/Suburban Tier only. [Ord. 2017-025]
5. The CLR designation is consistent with MUPD and MXPD when applied as an underlying designation for a mixed or multiple use project. [Ord. 2019-005]

D. Traditional Development Districts (TDDs)

Any application for a rezoning to a TDD shall correspond to a FLU designation indicated in the Table below. [Ord. 2011-016]

| Table 3.A.3.D – TDD Corresponding Land Use |
|---------------------------------|---------------------------------|---------------------------------|---------------------------------|---------------------------------|---------------------------------|---------------------------------|---------------------------------|---------------------------------|---------------------------------|---------------------------------|---------------------------------|---------------------------------|---------------------------------|---------------------------------|
| AGE | AGR | RR | L1R | L2R | L3R | MR5 | HR8 | HR12 | HR18 | MLU | EDC |
| TND (1) | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ |
| TTD | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ |
| TMD (1) | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ |

Notes:
1. Check (✓) indicates the TDD corresponds to the FLU category. Any application for a rezoning to a TDD shall be to a TDD that corresponds to a FLU designation. [Ord. 2008-037]
E. Exemptions/Applicability for Prior Approvals
Any application for a Development Order that requires Public Hearing approval, excluding Status Reports, EAC, Class B Conditional Uses, Type 2 Variances, and prior Special Exception or Conditional Use for a Planned Unit Development (PUD), are required to rezone. Other prior Special Exceptions for Planned Developments such as PCD, PCND, PGCD, POBP, or PID, are encouraged but not required to rezone when submitting an application for amendment to the prior approval. Any application for a Development Order to any of the prior approvals listed herein shall comply with the applicable requirements of the corresponding district, except for any information permitted to be carried forward from a prior approval. [Ord. 2011-016] [Ord. 2012-003] [Ord. 2013-021]

1. Standard Districts
The following previously established zoning districts shall correspond to the current districts indicated:
[Ord. 2011-016]

   a. The Specialized Agriculture (SA) district shall correspond to the AP district in the Glades Tier, the AGR district in the AGR Tier, and the AR district in the Rural Tier. Property with an SA district located in the Glades Area Protection Overlay (GAPO) shall be exempt from the rezoning requirement. [Ord. 2011-016] [Ord. 2012-003]
   b. Rural Services (RSER) district shall correspond to the AR district. [Ord. 2011-016]
   c. Residential Transitional Suburban (RTS) district shall correspond to the RT district. [Ord. 2011-016]
   d. Residential Transitional Urban (RTU) district shall correspond to the RS district. [Ord. 2011-016]
   e. Multifamily Residential High Density (RH) district shall correspond to the RM district. [Ord. 2011-016]
   f. Specialized Commercial High (CSH) and Specialized Commercial (CS) district shall correspond to the Commercial High Office (CHO) district. [Ord. 2011-016]

2. Planned Development Districts
The following previous approvals shall correspond to the current districts indicated: [Ord. 2011-016]

   a. Special Exceptions for PUDs shall correspond to a PUD. [Ord. 2011-016]
   b. Special Exceptions for Large Scale Community or Regional Shopping Centers (30,000 square feet or 50,000 square feet of total floor area or more), Planned Commercial Developments (PCDs), Planned Neighborhood Commercial Developments (PNCDs), Planned General Commercial Developments (PGCDs), and Planned Office Business Parks (POBPs) shall correspond to an MUPD. [Ord. 2011-016] [Ord. 2018-018]
   c. Special Exceptions for Planned Industrial Developments (PIDs) shall correspond to IL or IG Zoning District of the subdivision. [Ord. 2018-018]
   d. Special Exceptions for PIPDs shall correspond to a PIPD. [Ord. 2011-016]
   e. Special Exceptions for MHDPs shall correspond to an MHPD. [Ord. 2011-016]
   f. Special Exceptions for RVPDs shall correspond to an RVPD. [Ord. 2011-016]
   g. Any of the above where approved as a Conditional Use approval as opposed to a Special Exception. [Ord. 2011-016]
CHAPTER B  OVERLAYS

Section 1   General

A. Boundaries
The boundaries of each overlay shall be depicted on the Official Zoning Map.

B. Applicability
The provisions of each overlay shall apply to all proposed development and expansion of existing uses within the overlay unless otherwise noted below.

C. Relationship to Other Regulations in this Code
The provisions of an overlay are intended to supplement the other regulations in this Code.

D. Conflict with Other Applicable Regulations
If a conflict exists between provisions of an overlay and other Articles in this Code, the provisions of the overlay shall prevail except where superseded by State or Federal laws.

Section 2   AZO, Airport Zoning Overlay

A. Purpose and Intent
The purpose and intent of the Airport zoning regulations is to promote the maximum safety of aircraft using publicly-owned airports, the safety of residents and property in areas surrounding the airports, and the full utility of the airports, including non-airport related uses. These regulations apply to properties around publicly-owned airports in PBC; and uses located on the Airport Master Plans required by Plan Objective TE 1.7. [Ord. 2006-036]

B. Applicability
1. Off-Airport Uses
For those properties around publicly-owned airports, the provisions of the Airport zoning regulations create zones, based on the approach and departure pattern of aircraft, and regulate the height of structures and the use of land within these zones. The Airport zoning regulations for properties around publicly-owned airports are contained in Art. 16, Airport Regulations. [Ord. 2006-036]

2. Uses on Airport Properties
The provisions of this Section shall apply to airport-related and non-airport related uses within the boundaries of the Airport Master Plans for those parcels with a U/T Land Use designation and in the PO district for the four County-operated airports identified as follows: PBIA, PBC Glades Airport, PBC Park Airport (a.k.a. Lantana Airport), and North Palm Beach County General Aviation Airport. Development of these airports shall be in accordance with the Airport Master Plans as required by Plan Objective TE 1.7, Future Airport Expansion. [Ord. 2006-036]

a. Use Regulations
1) Airport-Related Uses
Airport-related uses are directly related to general airport operations and maintenance including, but not limited to, maintenance facilities, cargo distribution terminals, car rental operations, warehouses, hotels, airport administrative offices, and communication facilities, as well as uses found within the terminals, including, but not limited to, restaurants, general retail sales and personal services. [Ord. 2006-036]

2) Non-Airport Related Uses
Non-airport related uses are not related to the operation and maintenance of the airport, and can coexist in close physical proximity to airports and their related facilities. Non-airport related uses are additional uses that are encouraged by the Federal Aviation Administration (FAA) to generate income to help offset the costs of operating the airport and are compatible with surrounding development. These uses may include, but are not limited to, commercial, public and civic, recreation, agricultural, utilities and excavation, and industrial uses, but more specifically including, but not limited to, professional, business, and medical offices, retail centers, restaurants and hotels. [Ord. 2006-036]

3) Prohibited Uses
Prohibited uses include Adult Entertainment and billboards. [Ord. 2006-036] [Ord. 2009-040]

4) Specific Use Regulations
The following uses are permitted in the AZO on airport properties: [Ord. 2006-036]

Notes:
1. For purposes of determining the applicable property development regulations (PDRs) for non-airport related uses, the corresponding zoning district’s PDR identified in Table 3.D.1.A, Property Development Regulations (PDRs) shall apply to lot dimension, density, FAR, building coverage, and setbacks. [Ord. 2018-002]
2. Reference Art. 4, Use Regulations for additional Supplementary Use Standards which includes exceptions, restrictions, or prohibitions. [Ord. 2017-007] [Ord. 2018-018]
3. Temporary Use through the ZAR Process. [Ord. 2018-002]

Key:
P  Permitted by Right
D  Permitted subject to approval by the DRO
B  Permitted only if approved by the Board of County Commission (BCC)
A  Permitted only if approved by the Board of County Commission (BCC)
1  Palm Beach International Airport (PBIA)
2  PBC Glades Airport
3  PBC Park Airport (a.k.a. Lantana Airport)
4  North PBC General Aviation Airport
All  PBIA, PBC Glades Airport, PBC Park Airport (a.k.a. Lantana Airport), and North PBC General Aviation Airport

5) Development Review Procedures

The approval process for airport and non-airport related uses shall be in accordance with the above Table 3.B.2.B, Airport Use Regulations and Art. 2, Application Processes and Procedures. It is not necessary for the parcels to be rezoned. [Ord. 2006-036]

a) Development Requirements

Only airport-related uses owned, operated or directly regulated by the DOA or other governmental entity shall be eligible for PO district exemptions. Examples of these uses include tenants leasing space in airport terminal or other related service facilities. Leased land areas used for non-airport related development, including vehicle rental, restaurants, hotels and other non-airport related uses, shall be subject to applicable ULDC requirements. [Ord. 2006-036]

b) Development Exceeding PDD or TDD Design Thresholds

Any such development that meets or exceeds the maximum square footage thresholds of Table 3.B.2.B, PDD or TDD Design Thresholds, shall be subject to either the property development regulations of a PDD or TDD. The DOA shall be responsible for determining which specific PDD or TDD shall apply. It is not necessary for the parcels to be rezoned. [Ord. 2006-036]
c) Other Development
All other development shall be in accordance with the property development regulations for the corresponding zoning districts indicated in Table 3.B.2.B, Airport Use Regulations. [Ord. 2006-036]

d) Other Requirements
All proposed Airport-Related and Non-Airport Related Uses must be developed in accordance with all applicable Federal and State guidelines, regulations and requirements, as amended, including but not limited to all Federal Aviation Regulations (F.A.R.), FAA Advisory Circulars, and all FAA Orders, as well as all applicable Florida Statutes and Florida Department of Transportation guidelines. [Ord. 2006-036]

e) Conflict with Other Applicable Regulations
Where the provisions of this Section are in conflict with other regulations applicable to this district, the provisions of this Section shall prevail. Where provisions of the AZO district are not in conflict with other applicable regulations, the most restrictive regulations shall prevail. [Ord. 2006-036]

Section 3  COZ, Conditional Overlay Zone

A. Purpose and Intent
A COZ district is to modify or restrict the use and site development regulations authorized in the underlying Standard Zoning District to prevent, minimize, or mitigate adverse impacts upon the surrounding land uses. Conditions shall be included if the applicable regulations are inadequate to protect the surrounding land uses. Requirements of the COZ district are in addition to and supplement other applicable requirements of this Code. [Ord. 2008-037]

B. Boundaries
The boundary of the COZ is applied to the property considered for rezoning. [Ord. 2008-037]

C. Applicability
The provisions of the COZ shall apply to lands in unincorporated PBC pursuant to BCC approval. In application of the COZ, the BCC shall find that the proposed rezoning is appropriate only if the applicable regulations are modified. The BCC shall find one or more of the following reasons for the COZ district: [Ord. 2008-037]
1. potential impact to surrounding land uses requires mitigation;
2. compatibility will be furthered between the requested zoning district and adjacent zones if uses and property development regulations (PDRs) are modified; and/or,
3. intensity limits reflect available capacity of public facilities.

D. District Regulations
Restrictions which may be imposed in the COZ district include: limitations on uses, size, height, bulk, mass, scale, and location of improvements; standards for landscaping, buffering, lighting, adequate ingress and egress, on-site or off-site improvements; hours of operation; and, any other specific site development regulations required or authorized by this Code.

E. COZ
1. Process
During the Zoning review process, the Property Owner shall either: [Ord. 2008-037]
   a. apply for a COZ overlay; or [Ord. 2008-037]
   b. voluntarily agree to a COZ overlay recommended by staff for the property being considered for rezoning. [Ord. 2008-037]

2. Authority
The COZ authorizes specific development restrictions, including but not limited to, traffic performance standards, use limitations, etc. to proactively address potential incompatibilities with the adjacent properties. The BCC may impose Conditions of Approval to address these restrictions. [Ord. 2008-037]

[Ord. 2006-036]
3. Exception
In the case when a rezoning is requested or required to maintain consistency with the Comprehensive Plan or any conditions to a site specific Plan amendment initiated by the Planning Division, consent of the Property Owner(s) or agreement with the COZ shall not be required. [Ord. 2008-037]

Section 4 GAO, Glades Area Overlay

A. Purpose and Intent
The GAO is established to promote economic diversification in the Glades Area and facilitate development or redevelopment opportunities emanating from the U.S. Department of Housing and Urban Development Community Challenge Planning Grant Glades Region Master Plan (GRMP). The GAO provides flexibility or streamlined procedures for obtaining development approvals, critical to ensuring a timely response to development or redevelopment opportunities that may increase job opportunities and improve the economic vitality of the area. In addition, the GAO may include regulations that recognize the character of the area. [Ord. 2014-025] [Ord. 2016-016]

B. Applicability
The GAO shall apply to all land within the Urban Service Area (USA) of the Glades Tier. All Development Orders within the GAO shall also comply with all applicable Joint Planning Area Agreements, pursuant to Florida Statutes. [Ord. 2014-025] [Ord. 2016-016]

C. Boundaries
The boundaries of the GAO coincide with the USA in the Glades Tier, which is delineated on Comprehensive Plan Map LU 2.1, Service Areas, and is generally comprised of those lands lying near or around the Cities of Belle Glade, Pahokee, and South Bay, and the unincorporated community of Canal Point. [Ord. 2005-002] [Ord. 2014-025]

1. Tier Requirements
The Urban/Suburban Tier Requirements of the ULDC shall apply. [Ord. 2014-025]

D. Approval Process
1. DRO and BCC Thresholds
The density, intensity and acreage thresholds of Table 4.A.9.A, Thresholds for Projects Requiring DRO Approval, and Table 4.A.9.B, Thresholds for Projects Requiring Board of County Commissioners Approval, shall be multiplied by two within the GAO. [Ord. 2016-016] [Ord. 2018-002]

2. Administrative Approvals
a. General
Uses shown in a Use Matrix as Permitted by Right (P), or Development Review Officer (DRO) shall remain subject to the same approval process shown in the Use Matrix. [Ord. 2014-025]

b. Conditional Uses
Uses allowed as Conditional Uses in a non-residential zoning district and Cottage Homes may be approved by the DRO after compliance with Art. 2.B.7.B.2, Standards. [Ord. 2016-016] [Ord. 2018-002] [Ord. 2019-034]

c. Nonconformities
1) Nonconforming Use
A nonconforming use permitted to expand subject to DRO approval may be expanded through the ZAR process. [Ord. 2006-036] [Ord. 2014-025] [Ord. 2016-016] [Ord. 2018-002]

2) Permitted Uses and Uses Subject to DRO Approval within Nonconforming Structures
Uses Permitted by Right and uses subject to DRO approval may exceed the allowable percentages of Table 1.F.1.G, Nonconformities – Percentage and Approval Process for Maintenance, Renovation, and Natural Disaster Damage Repair, provided all the standards below are met: [Ord. 2016-016]

a) Exterior Building and Site Elements Improvements
A minimum 25 percent of the total maintenance, renovation, or natural disaster damage repair improvement value shall be dedicated to exterior building and site elements. Of that percentage, a minimum of ten percent shall be dedicated to façade improvements abutting the R-O-W (frontage and side street frontages) and a minimum ten percent shall be dedicated to landscape improvements; [Ord. 2016-016]

b) Limitation
The total maintenance, renovation, or natural disaster damage repair improvements for the proposed use(s) may be allowed only if the proposed improvements will not cause an increase in building square footage or generate additional parking, unless the additional
parking requirements or design is required to bring the site into compliance with the ULDC to the greatest extent possible; and, [Ord. 2016-016]

c) **Certification of Improvements**
The detailed justification statement of compliance to the above standards and calculations of the improvements, including the total improvement value for the project, shall be signed and sealed by the architect of record for the project, and shall be reviewed and certified by the Zoning Division Permitting Section for compliance with this Section prior to submittal to the Building Division. [Ord. 2016-016]

d) **Exceptions for Glades Area Housing Authorities**
The following developments shall be exempt from limits on maintenance, renovations, and natural disaster damage repairs for conforming residential, administrative, recreational, or maintenance uses in nonconforming structures, provided that any addition or expansion is in compliance with the ULDC: [Ord. 2016-016]
1) Pahokee Housing Authority, Padgett Island, and Fremd Village developments. [Ord. 2016-016]
2) Belle Glade Housing Authority, Everglades, and Osceola developments. [Ord. 2016-016]

3. **Public Hearing Approvals**
a. **Prohibited Uses in Non-Residential Districts**
   Uses not otherwise permitted in a non-residential zoning district may be approved as a Class A Conditional Use provided the BCC makes a finding that the proposed use meets the following: [Ord. 2014-025] [Ord. 2016-016] [Ord. 2018-002]
   1) Increases jobs or provides needed housing; [Ord. 2016-016]
   2) Does not adversely affect adjacent land uses; and, [Ord. 2016-016]
   3) Helps to support existing or encourage additional Glades Area economic development or the GRMP. [Ord. 2016-016]

E. **Property Development Regulations (PDRs) Exceptions**

   1. **Density and Intensity – Conditional Use Approval**
      The BCC may consider an increase in the density and intensity allowed by the Plan within the GAO subject to approval of a Conditional Use. [Ord. 2014-025] [Ord. 2018-002] [Ord. 2019-005]

   2. **Location of Structures**
      Building Permits in the GAO may be permitted between the 120-foot and 220-foot R-O-W line within the R-O-W of State Road 700 through Canal Point, from Third Street on the north to Triangle Park on the east, subject to approval of the County Engineer. [Ord. 2014-025]

F. **Planned Industrial Park Development (PIPD)**

   1. **Development Standard Exceptions**
      Planned Industrial Park Developments (PIPDs) located in the GAO shall be subject to the following exception provisions: [Ord. 2014-025]
      a. **Public Street**
         For the purposes of this Section, a public street within a PIPD shall not include private streets that comply with the following: [Ord. 2014-024]
         1) Located within or adjacent to an Industrial Pod; and [Ord. 2014-025]
         2) Services industrial uses only. [Ord. 2014-025]
      b. **Minimum Frontage**
         The PIPD is not required to have minimum frontage on an Arterial or Collector Street but at a minimum must connect to an Arterial or Collector Street through a Non-Plan Collector roadway, subject to approval of the Zoning Director and County Engineer. [Ord. 2014-025]
      c. **Maximum Commercial Acreage – Conditional Use Approval**
         The BCC may consider an increase in the maximum commercial acreage allowed pursuant to Table 3.E.5.C, PIPD Land Use Mix, subject to approval of a Conditional Use; and, upon finding that the increase will serve the projected workforce and residential population of the PIPD, and encourage internal automobile trip capture. [Ord. 2014-025] [Ord. 2018-002]
      d. **Architectural Review**
         Industrial buildings visible from a public street or residential zoning district may be exempt from the Roofline, Façade, and Additional Design Elements of Art. 5.C.1.H Guidelines, if the adjacent perimeter R-O-W or Incompatibility Buffer is doubled in width and planting requirements, and upon demonstration by line of sight that the majority of the affected area of the building will be screened by the increased buffering. For those parcels that use this exemption, only that portion of the building façade with the main public and employee entrances, and extending along the façade a
minimum of 100 feet in each direction from each entrance, including around corners, unless interfering with a loading area/space/dock/bay, are subject to the provisions of Art. 5.C.1.H, Guidelines. If the distance between entry treatments is less than ten percent of the overall length of the building façade, the treatment shall be extended. [Ord. 2014-025]

e. Parking and Loading in Industrial Pods

1) Loading Area Screening

Loading spaces, docks, and associated maneuvering areas not visible from a public street are exempt from screening requirements of Art. 6.E.4.A.3.b, Loading Area Screening. [Ord. 2014-025] [Ord. 2020-020]

f. Landscaping in Industrial Pods

1) Foundation Planting

Industrial buildings visible from a public street or residential zoning district may be exempt from the foundation planting requirements of Art. 7.C.3.B, Foundation Planting if the adjacent perimeter R-O-W or Incompatibility Buffer is increased in width by eight feet and the foundation planting requirements are relocated to the buffer. For those parcels that use this exemption, only that portion of the building façade with the main public and employee entrances, and extending along the façade a minimum of 100 feet in each direction from each entrance, including around corners unless interfering with a loading area/space/dock/bay, are subject to the provisions. If the distance between foundation planting treatments is less than ten percent of the overall length of the building façade, the treatment shall be extended. If the Architectural Review exemption in Art. 3.B.4.F.1.d, Architectural Review is utilized, the additional buffer width and planting is not required to utilize the Foundation Planting exemption. [Ord. 2014-025]

2) Interior Landscaping Exceptions

a) Interior Tree and Shrub Requirements

(1) One tree per 4,000 square feet; and [Ord. 2014-025]

(2) Three shrubs per 4,000 square feet. [Ord. 2014-025]

b) Interior Vehicular Use Areas not used for parking of passenger vehicles are not required to provide landscape islands. [Ord. 2014-025] [Ord. 2018-002]

c) Perimeter Compatibility Buffers are not required between parcels supporting compatible industrial uses. Where fences or walls are installed along the perimeter, they shall be protected from vehicles by a curb or similar barrier, and shall not encroach into the drive aisle (excluding gates) or impede vehicular circulation. [Ord. 2014-025]
2. **Type 1 Waivers for Industrial Pods**

An Applicant may apply for Waivers for development standards within an Industrial Pod in accordance with Art. 2.C.5.F, Type 1 Waiver. Applications for Type 1 Waivers shall be expressly limited to the requirements listed below: [Ord. 2014-025]

**Table 3.B.4.F – Type 1 Waivers for Industrial Pods**

<table>
<thead>
<tr>

| **Art. 5.B.1.A.2.e, Dangerous Materials** | Barbed wire on the top of fences or walls may be allowed. | • When the Applicant demonstrates that an increased level of security is necessary.  
• The Applicant shall provide written justification and support documentation to support the need for barbed wire. |
| **Art. 5.B.1.A.3.b, Outdoor Storage Location** | Outdoor storage may be allowed within required building setbacks. | • When all parcels adjacent to the outdoor storage are within an Industrial Pod of the PIPD. |
| **Art. 5.B.1.A.19, Permanent Generators** | Permanent generators may be allowed within required side or rear building setbacks. | • When all parcels adjacent to the generator location are within an Industrial Pod of the PIPD. |
| **Art. 5.B.1.A.20.a.2)a), Screening Requirements** | Screening for ground-mounted mechanical equipment is not required. | • If the equipment cannot be viewed from a R-O-W or any commercial, civic, recreation, or residential parcels. |
| **Table 5.E.4.E, Illumination Levels** | Increased illumination levels in outdoor work areas of up to 25 percent may be allowed when all adjacent parcels are within an Industrial Pod, as follows: | Demonstration in writing and with supporting documentation that increased illumination levels will not adversely impact other uses within or abutting the PIPD;  
• Demonstration that the need for additional lighting is for employee safety or site security; and,  
• Provided the illumination level complies with the Table at the perimeter property line adjacent to a public R-O-W or to residentially zoned property. |
| **Table 5.E.4.E, Maximum Permitted Luminaire Height** | Luminaire heights may be increased by 25 percent. | • When all adjacent parcels are within an Industrial Pod. |
| **Art. 6.B.3.A.2.d, Pedestrian Circulation** | Canopy trees, benches, and accented walkways are not required. | • Demonstration in writing and supporting documentation that these amenities conflict with site security;  
• Demonstration in writing and supporting documentation that either manned or electronic security access is provided for employees; and,  
• That a minimum of 25 percent of the required amenities or equivalent improvements are utilized at the public or employee entrances to the facility or in outdoor break areas, if applicable. |
| **Table 8.G.2.A, Freestanding Sign Standards** | Maximum sign area for freestanding signs may be increased by 25 percent to accommodate additional address information for multiple tenant buildings. | • With uses that generate heavy truck traffic, as documented within the traffic study for the project. |
| **Table 8.G.2.B, Outparcel Identification Signs** | Maximum sign area for freestanding outparcel identification signs may be increased by up to 50 percent to accommodate additional address information for multiple tenant buildings. | • With uses that generate heavy truck traffic, as documented within the traffic study for the project. |

Section 5 IOZ, Indiantown Road Overlay

A. Purpose and Intent
The IOZ is intended to implement the site development regulations of uses within the established Indiantown Road Corridor Study Area pursuant to the interlocal agreement that has been adopted between PBC and the Town of Jupiter. The Town has adopted the IOZ pursuant to the recommendation of the Indiantown Road Corridor Study (IRCS) and F.S. ch. 163, pt. II.
The purpose of the IOZ is to protect residential neighborhoods, limit uses, improve the overall aesthetics of the Indiantown Road Corridor Study Area, and establish development incentives to accomplish the various objectives of the corridor study.
Through the interlocal agreement the Town and PBC shall provide for a means of intergovernmental cooperation in implementing the IOZ standards throughout all appropriate incorporated and unincorporated portions of the Indiantown Road Corridor and in accordance with F.S. ch. 163, pt. IV. The Town and PBC agree to use a joint review process to advance the public health, safety, and general welfare and adopt procedures for the joint administration of land development regulations.

B. Applicability
The provisions of the IOZ district and the Indiantown Road Corridor Study Area, incorporated by reference, shall apply to all proposed Development Order applications within the boundaries of the IOZ district, except for applications for Variances.

C. Boundaries
The IOZ generally is located along incorporated portions of Indiantown Road east of I-95 and west of the Atlantic Ocean, including certain portions of U.S. Highway One, Military Trail, Center Street, Maplewood Drive, and Central Boulevard, and certain unincorporated portions of the Indiantown Road corridor east of I-95. Unincorporated portions of the Indiantown Road corridor include portions of Section 3, Township 41, Range 42 as indicated on the Official Zoning Map.

D. Additional Regulations
The IOZ district regulations are contained in the interlocal agreement.

E. Joint Review Process
Development approval submitted to the PZB located within the unincorporated IOZ shall be reviewed by the Town of Jupiter. The review process shall be provided for in the adopted interlocal agreement. The Town and PBC are specifically granted authority to jointly plan for unincorporated areas adjacent to incorporated municipalities and to adopt procedures for the joint administration of land development regulations.

Section 6 LOSTO, Lake Okeechobee Scenic Trail Overlay

A. Purpose and Intent
The LOSTO is to encourage nature and heritage based tourist related uses, such as lodging, restaurants, and trail outfitters, around the Herbert Hoover Dike to facilitate development of the Lake Okeechobee Scenic Trail. The LOSTO is also intended to provide flexibility in the range of uses and land development regulations allowed in the underlying districts within its boundaries.

B. Boundaries
The LOSTO includes the area located between the Herbert Hoover Dike and 250 feet South of U.S. 27, or between the Herbert Hoover Dike and 250 feet East of Conners Highway as depicted on the Official Zoning Map.

C. Use Regulations
Uses Permitted by Right in the underlying district are Permitted by Right in the LOSTO. In addition, the following uses shall be permitted subject to Art. 4.B, Use Classification: [Ord. 2017-007]
1. Bed and Breakfast; [Ord. 2017-007]
2. Camping Cabin; [Ord. 2017-007]
3. Catering Service; [Ord. 2017-007]
4. Office, Business or Professional; [Ord. 2017-007]
   Within the LOSTO, an office limited to a maximum of 1,500 square feet of GFA and for the sole purpose of arranging nature or heritage based activities, such as bicycle tours and bus tours to natural, agricultural, or historic points of interest of the area, shall be allowed subject to ZAR process. [Ord. 2017-007] [Ord. 2018-002]
5. Retail Sales. [Ord. 2017-007]
Additional standards for Retail Sales shall be limited to specialty shops selling merchandise such as hand-crafted items, nature books, prepackaged meals, snacks, and non-alcoholic beverages for consumption off the premises, hiking supplies such as backpacks and walking sticks, and outfitters renting equipment for recreational use including bicycles, skates, canoes, and kayaks and 3,000 square feet of total floor area shall be allowed subject to ZAR process. [Ord. 2017-007] [Ord. 2018-002]

7. Stable, Commercial. [Ord. 2017-007]

Section 7 NEO, Native Ecosystem Overlay

A. Purpose and Intent
A NEO is to ensure the protection of environmentally sensitive lands in unincorporated PBC, while ensuring development options by permitting flexibility in development regulations.

B. Boundaries
The NEO shall include the following lands within its boundaries.
1. Environmentally Sensitive Lands (ESL)
2. Other “A” Quality Ecosystems
   Lands identified as “A” Quality Ecosystems in the Plan, Conservation Element, Policy 2-a and LU Element, Policy 1-d.
3. 25-Percent Set Aside Areas
4. Water Resources Protection Areas
   Lands that have a high potential for water resources protection, such as aquifer recharge areas and present and potential wellfield areas.

C. Use Regulations
In the NEO district, the use regulations shall be the same as the underlying district.

D. Property Development Regulations (PDRs)
The development of lands within the NEO shall be subject to the PDRs of the underlying district, except that the following PDRs may be modified by the Zoning Director upon a written request up to the maximum allowed deviations below.
1. On-Site Parking
   On-site parking standards may be reduced by up to a maximum of 30 percent if:
   a. Environmentally Sensitive Lands (ESL)
      A development permitted by the underlying district cannot be feasibly designed with the required on-site parking spaces, because of the location of ESL, the 25-percent set aside on the subject property, or water resource protection areas.
   b. Alternative Plan
      An alternative plan of development is prepared for the property that provides the maximum number of on-site parking spaces that are feasible, with a total impervious surface area design that does not exceed 50 percent of the lot coverage requirement, while ensuring the proposed development is not disruptive to ESL, lands set aside pursuant to the 25 percent set aside requirement, or the alternative plan of development shall be consistent with the purpose and intent of the NEO district water resource protection areas.

2. Density and Intensity
   The calculation of maximum density or lot coverage shall be based on gross lot area.

3. Setbacks and On-Site Loading
   Setbacks and on-site loading requirements may be modified providing the following standards are met:
   a. ESL
      A development permitted by the underlying district cannot be feasibly designed with the required setbacks and on-site loading space because of the location of ESL, the 25-percent set aside on the subject property, or water resource protection areas; and
   b. Alternative Plan
      1) On-Site Loading
         An alternative plan of development is prepared for the property with a total impervious surface area not exceeding 65 percent of the maximum building coverage requirements, while ensuring that the proposed development is not disruptive to ESL, the 25-percent set aside requirement, or water resource protection areas; and
2) **Setbacks**
An alternative plan of development is prepared for the property that complies to the greatest extent practicable, as determined by Staff, with the setback requirements, while ensuring the proposed development is not disruptive to ESL, lands set aside pursuant to the 25-percent set aside requirement, or water resource protection areas. The alternative plan of development shall be consistent with the purpose and intent of the NEO district.

4. **Height**
Height restrictions may be modified to implement the permitted FAR or building coverage if the building coverage does not exceed 60 percent of that otherwise allowed by the underlying district, and the total impervious surface area does not exceed 65 percent of the maximum building coverage requirement.

5. **Lighting**
All exterior lighting shall be shielded and directed away from native vegetation.

**Section 8  NBOZ, Northlake Boulevard Overlay Zone**

A. **Purpose and Intent**
The purpose and intent of the NBOZ is to encourage improvement, enhancement, renovation, and/or redevelopment of the Northlake Boulevard Corridor and to provide criteria by which to review development/redevelopment within the Overlay Zoning District. The criteria outlined in "Design Guidelines: Northlake Boulevard Overlay Zoning District (NBOZ)" will serve to unify commercial development along the corridor and provide a positive collective identity for the corridor. These regulations were prepared under the guidance of the Northlake Boulevard Corridor Task Force (NBCTF)—an intergovernmental task force created by Interlocal agreement composed of two representatives each from PBC, the Town of Lake Park, the Village of North Palm Beach, and the City of Palm Beach Gardens. [Ord. 2011-016]

B. **Applicability**
The provisions of the NBOZ, as outlined in "Design Guidelines: Northlake Boulevard Overlay Zoning District (NBOZ)" prepared by Michael Redd & Associates, and dated March 11, 2002, which are incorporated herein by reference, shall apply to all proposed Development Order applications within the boundaries of the NBOZ, as described in Art. 3.B.8.C, Boundaries.

C. **Boundaries**
The NBOZ includes the public R-O-W for Northlake Boulevard and all properties along Northlake Boulevard from Military Trail to U.S. Highway One for one property depth north and south of Northlake Boulevard, including the street intersection properties at U.S. Highway One and at Military Trail. Unincorporated portions of the NBOZ include portions of Section 18, Township 42, Range 43; Section 17, Township 42, Range 43; Section 24, Township 42, Range 42; and, Section 19, Township 42, Range 43, as indicated in the Official Zoning Map.

D. **Conflict**
In the event of a conflict between the NBOZ and other applicable regulations, the more restrictive regulation shall prevail.
E. **Type 1 Waivers for NBOZ Design Guidelines**

An Applicant may apply for Type 1 Waivers for development standards contained within the NBOZ Design Guidelines in accordance with [Art. 2.C.5.F. Type 1 Waiver](#). Applications for Type 1 Waivers shall be expressly limited to Sections listed in Table 3.B.8.E, Type 1 Waivers for NBOZ Design Guidelines. Type 1 Waiver requests shall be submitted concurrently with any other DRO application request for Public Hearing certification, where applicable. [Ord. 2016-016]

[Ord. 2016-016]
Section 9  PBIAO, Palm Beach International Airport Overlay

A. Purpose and Intent
The PBIAO recognizes that some airplane noise-affected lands surrounding the PBIA are most suitable for campus-style industrial development, and other quality non-residential land uses, as described in Art. 16, Airport Regulations. The purposes of the PBIAO district, therefore, are as follows: [Ord. 2004-051]
1. to protect neighborhoods surrounding the PBIA from incompatible land development; [Ord. 2004-051]
2. to protect airport operations from incompatible land development, and provide development regulations that will assure safe, unobstructed access for all aircraft that enter and exit the airport; [Ord. 2004-051]
3. to allow Property Owners to initiate conversion to industrial use where appropriate; and, [Ord. 2004-051]
4. to allow Property Owner participation in the land use decision-making process. [Ord. 2004-051]

B. Applicability
Nothing herein shall require modification of an existing use, except as provided below. [Ord. 2004-051]

C. Boundaries
The PBIAO district consists of those lands in unincorporated PBC bounded by Belvedere Road on the north, Southern Boulevard on the south, PBIA on the east, and Florida’s Turnpike on the west, except for incorporated municipal areas. [Ord. 2004-051]

D. Uses
All development within the PBIAO district shall be compatible with Airport Operations, as determined by the BCC, using the standards established in the Plan and Art. 16, Airport Regulations. [Ord. 2004-051]

1. Permitted Uses
All residential, commercial, and industrial uses Permitted by Right in the underlying district shall be permitted in the PBIAO district. [Ord. 2004-051]

2. Prohibited Uses
Adult Entertainment establishments, bulk storage of gas and oil, and outdoor retail sales (other than greenhouses, shade houses, or nurseries) shall be prohibited in the PBIAO district. [Ord. 2004-051]

3. Conditional Uses
All uses allowed as Conditional Uses in the underlying district, shall be permitted in the PBIAO district after compliance with the Conditional Use regulations. [Ord. 2004-051]

4. Administrative Approval
All uses that are subject to the Administrative Approval process in the underlying district shall be allowed in the PBIAO after compliance with applicable Code requirements. [Ord. 2004-051] [Ord. 2018-002]

5. Non-Conforming Uses
   a. Existing Residential Uses
      All residential uses that existed within the PBIAO on the date that the PBIAO provisions were adopted shall be considered conforming uses. [Ord. 2004-051] [Ord. 2017-007]
   b. Existing Non-Residential Uses
      Commercial uses that existed within the PBIAO on the date that the PBIAO were adopted and that meet the provisions of this Section shall be classified as conforming uses. Commercial uses that existed within the PBIAO on the date that the PBIAO provisions were adopted, but do not meet the provisions of this Section, shall be classified as non-conforming uses. [Ord. 2004-051]

E. Review Procedures
All development requests within the PBIAO shall comply with the following: [Ord. 2004-051]

1. Industrial Rezoning in Residential FLUA Designations
   Land shall be eligible for rezoning to the IL district or PIPD district, regardless of FLUA designation, except in non-conversion areas described below. Industrial development using either zoning district shall be in the form of a PIPD or campus-like industrial development. Notwithstanding the provisions of Art. 2.B, Public Hearing Processes, every application for industrial rezoning within the boundaries of the PBIAO district, shall comply with the following: [Ord. 2004-051] [Ord. 2012-027]
   a. Non-Conversion Areas
      1) Areas designated as Parks and Recreation on the FLUA shall remain as such. [Ord. 2004-051]
      2) The following areas shall be limited to the uses permitted in the residential FLU designation and the applicable residential zoning district: [Ord. 2004-051]
         a) Timber Run subdivision; [Ord. 2004-051]
         b) Lake Belvedere Estates subdivision; [Ord. 2004-051]
c) Overbrook subdivision; and, [Ord. 2004-051]
d) The area defined by the following boundaries beginning at Wallis and Jog Roads. [Ord. 2004-051]
   1) Western boundary: Jog Road between Wallis Road and Belvedere Road; [Ord. 2004-051]
   2) Northern boundary: Belvedere Road between Jog Road and the Timber Run subdivision; [Ord. 2004-051]
   3) Eastern boundary: The western limits of the Timber Run subdivision and the Royal Palm Estates subdivision; [Ord. 2004-051]
   4) Southern boundary: Southern Boulevard extending to the western side of Sunbeam Avenue; [Ord. 2004-051]
   5) Southwestern boundary: Sunbeam Avenue between Southern Boulevard and Wallis Road. [Ord. 2004-051]

b. Rezoning Criteria
Lands may be rezoned to the IL district, except for those areas described as non-conversion areas, provided one of the following conditions are met: [Ord. 2004-051]
1) Lands that support existing residential development or that have a Development Order for residential development may be rezoned to the IL or PIPD district, if they: [Ord. 2004-051][Ord. 2010-022]
   a) are at least five acres; and [Ord. 2004-051]
   b) abut a R-O-W identified on the County's Thoroughfare Identification Map; or [Ord. 2004-051]
   c) are at least ten acres; and [Ord. 2004-051]
   d) do not abut a R-O-W identified on the County’s Thoroughfare Identification Map; or [Ord. 2004-051]
2) Lands that are currently vacant or do not have a Development Order may be rezoned to the IL or PIPD district provided the parcel is contiguous on no more than two sides to existing residential development and they: [Ord. 2004-051][Ord. 2010-022]
   a) are at least five acres; and [Ord. 2004-051]
   b) abut a R-O-W identified on the County's Thoroughfare Identification Map; or [Ord. 2004-051]
   c) are at least ten acres; and [Ord. 2004-051]
   d) do not abut a R-O-W identified on the County’s Thoroughfare Identification Map, or [Ord. 2004-051]
3) Lands within the PBIAO that are bounded by Southern Boulevard on the south, the L-4 Canal on the north, Military Trail on the east, and the western boundary of the Royal Palm Estates subdivision on the west, shall only be allowed to have residential uses converted to industrial uses subject to the following: [Ord. 2004-051]
   a) All new industrial uses shall be developed as a PIPD; and [Ord. 2004-051]
   b) All new PIPDs shall be a minimum size of 25 acres; and [Ord. 2004-051]
   c) The following uses shall be prohibited: salvage junk yards, machine or welding shops, hazardous waste facilities, solid waste facilities, bulk storage facilities, transportation and multi-modal facilities, large-scale repair and heavy equipment repair and service facilities, petroleum and coal-derivations-manufacturing and storage facilities, heliports, helipads, airstrips, hangers, and accessory facilities, and Type 3 Excavation. [Ord. 2004-051][Ord. 2017-007]
4) Lands located in the transitional area on the west side of Jog Road and continuing along and adjacent to the north and south sides of Alexander and Bishoff Roads shall require a minimum lot size of one acre to be rezoned. [Ord. 2004-051]

2. Commercial Rezoning
An application for commercial zoning of land within the overlay cannot be submitted unless the land is designated commercial on the FLUA. [Ord. 2004-051]
3. **Notification**

If vacant land within the overlay is developed as residential, the developer shall provide notification to Property Owners within the new residential areas, that they are located within the PBIAO, and may experience some airport-related noise. [Ord. 2020-020]

a. The developer shall include a disclosure statement in all Property Owners’ Association documents, as well as, but not limited to written sales brochures, sales contracts, Master Plans, and related Site or Subdivision Plans, notifying prospective residents that the community is within the PBIAO. [Ord. 2020-020]

b. The disclosure shall state that the residence is located within the Palm Beach International Airport Overlay and will be subject to aircraft noise at varying levels, vibrations, odors, fumes, and other impacts from the aircraft operations conducted at the airport or within the vicinity. It shall be in a prominent location within each document described above with a bold font no less than nine point. [Ord. 2020-020]

c. The developer shall provide documentation evidence of compliance with the notification requirements on an annual basis to the Planning and Development Division of the Department of Airports, until all units within the development have been sold or the Property Owner turns over control to the Property Owners’ Association. [Ord. 2020-020]

F. **Property Development Regulations (PDRs)**

Applications shall comply with the PDRs of the underlying districts except as follows. [Ord. 2004-051]

1. **Lot Dimensions, Yard Setbacks, and Building Height**

Setbacks and lot dimensions for commercial and industrial development shall comply with the PDRs in Art. 3.D, Property Development Regulations (PDRs), unless modified herein. [Ord. 2004-051]

a. **Lot Size**

   The minimum lot size shall be one acre unless a Legal Lot of Record pursuant to Art. 11.A.8.B, Legal Lots of Record. [Ord. 2004-051] [Ord. 2008-037]

b. **Setbacks**

   The minimum building setbacks shall be as follows: [Ord. 2004-051]

   1) No rear setbacks shall be required where an industrial lot abuts an existing or proposed railroad R-O-W or spur. [Ord. 2004-051]

   2) Setbacks from all other property lines shall be required according to Table 3.B.9.F, PBIAO Setbacks. [Ord. 2004-051]

<table>
<thead>
<tr>

<td>15</td>
</tr>
<tr>
<td>Side, Street</td>
<td>25</td>
</tr>
<tr>
<td>Rear</td>
<td>50</td>
</tr>
</tbody>
</table>

[Ord. 2004-051]

c. **Height**

   1) **Maximum Height for Industrial and Commercial Development**

   When adjacent to an existing residential use, building height shall be limited to a maximum of 35 feet. The building height may be increased provided that two feet is added to all setbacks for each foot of building height above 35 feet. [Ord. 2004-051]

2. **Commercial Vehicle Parking and Loading**

   No truck, or tractor-trailer parking or loading shall be permitted closer than 75 feet to the lot lines abutting a residential district (inclusive of the buffer), unless the area is designated as display parking as permitted by Art. 4.B, Use Classification. [Ord. 2004-051]

3. **Lighting**

   In addition to the standards of Art. 5.E.4.E, Outdoor Lighting, and Art. 16, Airport Regulations, lighting within the PBIAO shall comply with the following: [Ord. 2004-051] [Ord. 2020-020]

   a. Rooftop lighting shall be permitted; [Ord. 2004-051]

   b. Lighting fixtures shall be limited to the minimum needed for essential lighting of the site and building; and, [Ord. 2004-051]

   c. Lighting shall be scaled to pedestrians for sites or buildings adjacent to residential uses. [Ord. 2004-051]
G. Supplemental Regulations
   1. Unified Control
      Any development within PBIAO district shall be developed under common ownership or Unity of Control
      as provided in Art. 3.E, Planned Development Districts (PDDs). [Ord. 2004-051] [Ord. 2020-020]
   2. Enclosed Activities
      In addition to standards in Art. 5.B.1.A.3, Outdoor Storage and Activities, all activities except storage
      and sales of landscape material, shall be operated within enclosed buildings. [Ord. 2004-051]
   3. Renovation and Expansion of Non-Residential Uses
      When a structure used for industrial or commercial uses, lying in a residential district or adjacent to a
      residential district, is renovated or expanded by more than 20 percent of GFA, in any one or more
      expansions or the cumulative total of previous expansions, the PDRs of the PBIAO district shall apply.
      [Ord. 2004-051]

Section 10 RTO, Research and Technology Overlay

A. Purpose and Intent
   The purpose and intent of the RTO is to protect critical industrial, manufacturing, research and development
   activities from the encroachment of incompatible land uses and activities; provide opportunities to locate
   accessory, auxiliary, and supporting industrial land uses in close proximity to existing facilities; and, ensure
   the location of land uses and activities in the district that are compatible with or complement manufacturing
   and high-tech operations that are related to the continuation and expansion of PBC's manufacturing and
   industrial base. The RTO is specifically included in this Code to meet provisions in the Plan related to the

B. Boundaries
   The RTO consists generally, of those lands in unincorporated PBC lying east and north of the Beeline
   Highway and the Pratt-Whitney facility, which includes all or portions of Sections 1, 2, 3, 4, 5, 7, 8, 9, 10,
   11, 12, 13, 14, 15, 16, 17, 18, Township 41, Range 40; Sections 5, 6, 7, 8, 9, 17, 18 Township 41, Range
   41; and, Section 13, Township 41, Range 39.

C. Use Regulations
   Development in the RTO shall comply with the use regulations of the underlying district.
   1. Prohibited Noise Sensitive Uses
      a. Residential (excluding Caretaker Quarters);
      b. Hotels or Motels;
      c. Medical or Dental Offices; and,
      d. Hospitals [Ord. 2017-007]
   2. Accessory Uses
      Uses not listed above, which generally would not be allowed within the RTO may be permitted as
      accessory uses to a permitted principal use.

D. Property Development Regulations (PDRs)
   All development within the RTO shall be subject to the property development regulations of the underlying
   district. However, development proposed in the NEO shall be subject to the development regulations of the
   NEO district.

E. Performance Standards
   All development within the RTO shall comply with the rules and regulations of all governmental agencies
   having appropriate jurisdiction, and with all applicable requirements of this Code.
Section 11 SCGCFO, Sugar Cane Growers Cooperative of Florida Protection Area Overlay

A. Purpose and Intent
The purpose and intent of the SCGCFO is to maintain the integrity of bona fide agricultural operations related to the cultivation and processing of sugar cane, by prohibiting the encroachment of incompatible land uses or activities. It will also provide opportunities for the inclusion of related accessory and supporting uses and/or activities in close proximity to the existing mill. [Ord. 2004-040]

B. Boundaries
The SCGCFO includes all of Sections 21 and 28, the eastern half of Sections 20 and 29, Township 43, Range 37, excluding completely the western half of Sections 20 and 29. [Ord. 2004-040]

C. Use Regulations
The following uses may be permitted in the SCGCFO, subject to Art. 4, Use Regulations, and the following: [Ord. 2004-040] [Ord. 2017-007]

<table>

</tbody>
</table>

Notes:
1. Reference Art. 4, Use Regulations for additional Supplementary Use Standards, which includes exceptions, restrictions, or prohibitions. [Ord. 2018-018]

D. Property Development Regulations (PDRs)
All development within the SCGCFCO shall be subject to the PDRs for the Light Industrial (IL) Zoning District, pursuant to Table 3.D.1.A, Property Development Regulations (PDRs).

Section 12 SR 80 Non-Residential Overlay

A. Purpose and Intent
To maintain the character of the Rural Tier, and to implement the goals and objectives in the Plan, the ZC and BCC may impose Conditions of Approval on non-residential uses in the Rural Tier along SR 80 as follows.

B. Conditions
Conditions may exceed Code requirements by up to 500 percent based on the size, depth, and width of the site, compatibility with surrounding land uses, and impact of the proposed use on the surrounding area. Conditions may include, but are not limited to: additional setbacks, landscaping, buffering, screening; a requirement to provide equestrian trails; and, more restrictive signage, lighting, access, and hours of operation.

C. Retention/Detention Areas
If a condition requires a landscape buffer which is twice as large as a required buffer, dry retention/detention areas may overlap the buffer provided up to 50 percent of the width. Wet retention/detention areas, water management tracts, and easements may overlap up to 25 percent of the additional width provided.
Section 13 TAPO, Turnpike Aquifer Protection Overlay

A. Purpose and Intent
The purpose and intent TAPO district is to: (1) protect and safeguard the public health, safety, and welfare by enhancing the functions of natural groundwater recharge areas; (2) minimize any potential adverse impacts on the surficial aquifer system, known locally as the “Turnpike” aquifer by limiting or restricting certain incompatible uses and developments; and, (3) prevent the continuing loss of prime public water supply sites by requiring certain developments and uses to identify and/or dedicate public water supply sites.

B. Applicability
1. The provisions of the TAPO shall apply to all new development, new uses, or expansions of existing uses within its boundaries.
2. All new development, new uses, or expansion of existing uses located within the TAPO shall be designed and constructed to protect and preserve the identified groundwater resources of the area.
   For the purposes of this Section, all improvements shall be designed and constructed in accordance with the public supply water well site location criteria contained within this Section.

C. Exemption
All development and uses which existed within the revised TAPO boundaries, as described in Art. 3.B.13.D, Boundaries around Water or Wastewater Treatment Plant (WTP) 3 on June 16, 1992, and around WTP 8 on the effective date of this Code shall be exempt from the requirements of this Section. [Ord. 2017-007]

D. Boundaries
The TAPO boundaries shall generally be described as two areas around Water or Wastewater Treatments Plants (WTP) 3 and 8. [Ord. 2017-007]
1. The TAPO around WTP-3 includes portions of the area north of Woolbright Road, south of Boynton Beach Boulevard, east of Hagen Ranch Road, and west of Jog Road.
2. The TAPO around WTP-8 includes portions of the water plant property; the area north of Belvedere Road, west of Jog Road, and south of the Turnpike; and the area north of Southern Boulevard, south of Belvedere Road, east of the Turnpike, and west of Drexel Road.
The specific boundaries are depicted on maps and legal descriptions incorporated herein and made a part of this Code. See Appendix 1, Legal Description Water or Wastewater Treatment Plant No. 3, and Appendix 2, Legal Description Water or Wastewater Treatment Plant No. 8. [Ord. 2017-007]

E. Conflict with Other Applicable Regulations
The requirements of this Section, unless superseded by Art. 14.B, Wellfield Protection, of this Code or applicable State or Federal law, shall apply to all new development, new uses, or expansion of existing uses within the TAPO.

F. General Provisions
1. All new development, new uses, or expansion of existing uses within the TAPO which occur following the effective date of this Section shall comply, at a minimum, with the Zone 3 requirements of Art. 14.B, Wellfield Protection, of this Code for the storage, handling, use, or production of Regulated Substances.
2. All new development, new uses, or expansion of existing uses within the TAPO shall comply with the public supply water well location criteria as provided herein.
3. All requests for development approval for new uses or expansion of existing uses within the TAPO submitted after the effective date of this Section shall comply with the provisions of this Section.

G. Mandatory Identification and Dedication of Public Supply Water Well Sites
Development approvals for new development, new uses, or expansion of existing uses within the TAPO submitted after the effective date of this Section shall identify public supply water well sites. Dedication of public supply water well sites shall be required when there is rough proportionality between the required dedication and the needs of the community because of the development. The amount of well sites to be identified or identified and dedicated shall be based upon the total size of the proposed project as provided below:
1. Developments consisting of at least 25 acres, but less than 100 acres, shall be required to identify or identify and dedicate one public supply water well site;
2. Developments consisting of at least 100 acres, but less than 200 acres, shall be required to identify or identify and dedicate two public supply water well sites; and,
3. Developments consisting of more than 200 acres shall be required to identify or identify and dedicate one public supply water well site for each 100 acres or part thereof.
H. Public Supply Water Well Site Compatibility and Location Criteria

1. Public supply water well sites shall be located to be compatible with the groundwater resources of the area. To ensure compatibility, public supply water well sites shall be designed to achieve the following:
   a. maximize natural groundwater recharge;
   b. minimize potential drawdown impacts to surrounding natural resources, environmental resources, and artificial surface water management systems; and,

2. The following criteria shall be used in locating public supply water well sites in all new development, new uses, or expanded uses located within the TAPO:
   a. Public supply water well sites shall be located along the perimeter of the affected property in a manner acceptable to the PBCWUD;
   b. Public supply water well sites shall be located, in a manner acceptable to the PBCWUD, to facilitate connection to any existing or proposed raw water line located along the R-O-W of Jog Road or Hagen Ranch Road;
   c. Public supply water well sites, to the extent possible and in a manner acceptable to the PBCWUD, shall be evenly spaced, with a minimum separation distance of 500 feet between such sites;
   d. Public supply water well sites shall be located in accordance with setbacks required by the FDEP and by Art. 15.B, Environmental Control Rule II – Drinking Water Supply Systems;
   e. Public supply water well sites shall be located within new or expanded land uses in a manner acceptable to the PBCWUD to minimize drawdown impacts to natural water bodies, surface water management systems with planted littoral shelves, and wetlands;
   f. Public supply water well sites to be dedicated, unless other dimensions are approved by the PBCWUD, shall be a minimum size of 60 feet by 40 feet; and,
   g. Public supply water well sites, to the maximum extent possible, shall be located on properties acquired, dedicated, or reserved for public or common purposes such as parks, open space, or easements.

I. Dedication of Well Site within Required Open Space
For the purposes of this Code, well sites dedicated to the PBCWUD shall be included in any calculation to determine required open space.

J. Access Easement to Dedicated Public Supply Water Well Site
1. A permanent access easement from each dedicated public supply water well site to the closest public R-O-W shall be provided in a manner acceptable to the PBCWUD for such purposes as maintenance of equipment and installation of water pipes.
2. If a public R-O-W does not exist adjacent to a public supply water well site, a permanent access easement shall be provided in a manner acceptable to the PBCWUD.
K. Temporary Construction Access Easement
A temporary construction access easement shall be provided from each dedicated public supply water well site to the closest public R-O-W or other R-O-W acceptable to the PBCWUD.

L. Hold Harmless Agreements
Each dedication of a public supply water well site shall include a hold harmless agreement to relieve PBC from liability for impacts to on-site irrigation wells, aesthetic lakes, and surface water management systems. The agreement shall be in a form acceptable to the County Attorney's Office.

M. Dedication of Public Water Supply Sites
1. Upon approval of each future well site or sites by the PBCWUD, a conditional letter of acceptance will be issued. Prior to application for Building Permits, each public supply water well site shall be identified or identified and dedicated as provided below:
   a. If a new development, a new use or an expanded use does not require recording of a plat then each public supply water well site to be dedicated shall be conveyed within 90 days following Final Site Plan certification by the DRO. The conveyance shall be in a form approved by the County Attorney's Office.
   b. If a new development, a new use, or expanded use requires recording a plat, the location and recordation information of each public supply water well site shall be shown on such plat.
   c. If a new development, a new use, or expanded use does not require a recorded plat or final DRO site plan or subdivision certification, then each public supply water well site to be dedicated shall be conveyed prior to issuance of the first required Development Permit, including a Vegetation Removal Permit other than a prohibited species removal permit, excavation permit, or building permit. However, the PBCWUD may stipulate an alternate time when the public supply water well site dedication shall occur. The conveyance shall be in a form approved by the County Attorney's office.

2. The location of each well site to be dedicated shall be approved by the PBCWUD.

N. Developer's Agreements
The PBCWUD may require, as part of a developer's agreement to provide water or sewer service to a new or expanded land use, dedication of public supply water well sites consistent with the provisions of this Section.

Section 14 WCRAO, Westgate Community Redevelopment Area Overlay

A. Purpose and Intent
The Westgate/Belvedere Homes Community Redevelopment Agency (WCRA) was created pursuant to F.S. ch. 163 pt. III, Community Redevelopment, to remove blighted conditions, enhance the PBC's tax base, improve living conditions, and preserve areas of low and moderate cost housing in the Westgate/Belvedere Homes area of unincorporated PBC.

The use of community redevelopment powers enables the BCC and the WCRA to make public improvements that encourage and enhance investment while providing neighborhood stability, prevent continuation of inefficient and incompatible land use patterns, and assist revitalization and rehabilitation of older commercial and residential areas in the Westgate/Belvedere Homes area. The WCRAO is established with the purpose and intent of encouraging development and redevelopment of the Westgate/Belvedere Homes area through regulatory incentives, arresting deterioration of property values, preserving and protecting existing, viable affordable housing, providing opportunity for the future development of affordable housing, implementing the 2004 Westgate/Belvedere Homes Community Redevelopment Plan (WCRA Plan), providing for mixed use development, and providing for increased residential densities and commercial intensities, without amendment to the Plan.

The WCRA Plan proposes to use smart growth and form based code principles that incorporates urban design and mixed use development to achieve infill, residential, and commercial redevelopment. Mixed use development is required to implement the goals of the WCRA Plan to allow for a pedestrian friendly environment, the vertical integration of uses, and higher intensity and density. The BCC finds that the secondary effects of Adult Entertainment establishments, as set out in the various studies, affidavits, and other materials cited in Art. 4.B.2.C.1.i, Findings of Fact, are incompatible with the stated purpose and intent of the WCRAO. Therefore, the BCC determines that Adult Entertainment establishments shall be prohibited within the WCRAO. [Ord. 2006-004] [Ord. 2009-040]
B. General Development Standards

1. Nonconformities

   Nonconforming uses, structures, and lots shall be allowed to continue subject to the provisions of Art. 1.F. Nonconformities and the following: [Ord. 2006-004] [Ord. 2010-022]

   a. Expansion of Existing Non-Conforming Parking

      The addition of parking to a non-conforming structure that does not meet the location requirements of this Section, shall be permitted subject to a Type 2 Waiver approval. [Ord. 2006-004] [Ord. 2018-002]

   b. Permitted Uses, Uses Subject to DRO Approval within Nonconforming Structures, and Nonconforming Single Family Dwellings

      The WCRA Plan encourages rehabilitation of existing commercial and residential properties to prevent and eliminate slums and urban blight, to promote physical and economic revitalization of the neighborhoods and commercial areas, and to improve the visual appearance of existing structures and the overall experience of the area. Uses Permitted by Right, uses subject to DRO approval, and nonconforming Single Family dwellings therefore may exceed the allowable percentages of Table 1.F.1.G, Nonconformities – Percentage and Approval Process for Maintenance, Renovation, and Natural Disaster Damage Repair, provided all the standards below are met: [Ord. 2010-022] [Ord. 2020-001]

      1) Exterior Building and Site Elements Improvements

         A minimum 25 percent of the total maintenance, renovation, or natural disaster damage repair improvement value shall be dedicated to, façade improvements abutting the R-O-W per Art. 1, General Provisions, landscaping, pedestrian amenities, and other site elements as determined by the Westgate CRA Executive Director to address specific site constraints that include, but are not limited to, lot size, lot configuration, and/or adjacent redevelopment efforts; [Ord. 2010-022] [Ord. 2020-001]

      2) Limitation

         The total maintenance, renovation, or natural disaster damage repair improvements for the proposed use(s) may be allowed only if the proposed improvements will not cause an increase in building square footage or generate additional parking unless the additional parking requirements or design is required to bring the site into compliance with the ULDC to the greatest extent possible; and, [Ord. 2010-022]

      3) Certification of Improvements

         The detailed justification statement of compliance to the above standards and calculations of the improvements, including the total improvement value for the project, shall be signed and sealed by the architect of record for the project, and shall be reviewed and certified by the Westgate CRA for compliance with this Section prior to submittal to the Building Division. [Ord. 2010-022]

   2. Exemptions

      All properties in the PO district or any publicly-owned properties developed to serve a public use shall be exempt from the requirements of Art. 3.B.14, WCRAO, Westgate Community Redevelopment Area Overlay. [Ord. 2006-004]
C. Boundaries

1. WCRAO Boundaries

The WCRAO consists of those lands within unincorporated PBC bounded by Okeechobee Boulevard on the north, Belvedere Road on the south, Florida Mango Road on the east, and Military Trail on the west. See Figure 3.B.14.C, Map of WCRAO Boundaries and Sub-areas. [Ord. 2006-004]

Figure 3.B.14.C – Map of WCRAO Boundaries and Sub-areas

2. Sub-area Boundaries and Descriptions

To implement the WCRAO Plan, Sub-areas are hereby established to identify additional use regulations, PDRs, and supplemental standards that may differentiate from related requirements of the ULDC. Unless expressly stated herein, development shall comply with the requirements of a site’s zoning district and FLU designation. Sub-area boundaries are based on the WCRAO Plan and the need for special protective measures, additional design standards, and redevelopment incentives within specific geographic areas. See Figure 3.B.14.C, Map of WCRAO Boundaries and Sub-areas, for the location of each Sub-area. [Ord. 2006-004]

   a. NR, Neighborhood Residential
      Intended to maintain and encourage the redevelopment of existing Single Family residential dwellings. [Ord. 2006-004]

   b. NRM, Neighborhood Residential – Medium Density
      Intended to encourage mixed use development based on CL neighborhood based uses and Single Family, Townhouse, and Multifamily dwelling units. [Ord. 2006-004]

   c. NG, Neighborhood General
      Intended to encourage mixed use development, including more intense commercial uses, and Townhouse and Multifamily dwelling units. [Ord. 2006-004]
d. NC, Neighborhood Commercial
   Intended to be the key focal point of the redevelopment area, with provisions to encourage and
   incentivize mixed use development. [Ord. 2006-004] [Ord. 2018-002]

e. UG, Urban General
   Additional redevelopment area allowing for mixed use development with more intense commercial
   and residential uses, including multi-story towers where feasible. [Ord. 2006-004]

f. UH, Urban Highway
   Existing commercially developed corridors with little or no changes proposed to current Zoning
   PDRs or use regulations. [Ord. 2006-004]

g. UI, Urban Industrial
   Existing commercial and industrial areas that will be encouraged to be redeveloped by the recent
   adoption of FLU amendments allowing CH or IND development. [Ord. 2006-004]

3. Redevelopment or Expansion in the UH and UG Sub-areas
   Redevelopment projects or the expansion of an existing project in the UH and UG Sub-areas that
   include parcels in the NG, NC, or NRM Sub-areas that are shaded in Figure 3.B.14.C, Map of WCRAO
   Boundaries and Sub-areas, may elect to develop in accordance with the requirements of the majority
   Sub-area. [Ord. 2006-004]

D. Development Review Procedures

1. WCRA Recommendation
   Applicants must obtain a recommendation from the WCRA, prior to submittal of any application for the
   development of Single Family or duplex residential structures on a non-conforming lot, or application
   outlined under Art. 2, Application Processes and Procedures, for the following: Official Zoning Map
   Amendments, Conditional Uses, Development Order Amendments, Plan Amendments, Density
   Bonuses, Variances, and projects requiring DRO approval. An application for a WCRA
   recommendation must be made in accordance with the following: [Ord. 2006-004] [Ord. 2007-013]
   [Ord. 2018-002]

   a. Application Requirements
      The form and application requirements for a WCRA recommendation shall be submitted as
      specified by the WCRA; however, in no case shall supporting documents required by the WCRA
      exceed the requirements of the Development Review Procedures listed above. [Ord. 2006-004]

   b. Timeframe for Response
      WCRA staff shall determine whether or not the application is sufficient or insufficient within ten
      working days. Any amendment to an application shall require the timeframe for response to restart.
      [Ord. 2006-004]

      1) Sufficiency and Recommendation
         If the application is determined to be sufficient, a recommendation shall be mailed to the
         Applicant within 30 days of application submittal. If a recommendation is not made within this
         timeframe, the application shall be considered to have received a recommendation for
         approval, and the WCRA shall provide a letter indicating such. [Ord. 2006-004]

      2) Insufficiency
         If an application is determined to be insufficient, WCRA staff shall provide a written notice
         specifying the deficiencies to the Applicant, to be mailed within ten days of receipt of the
         application. No further action shall be taken until the Applicant remedies the deficiencies. If the
         deficiencies are not remedied within 20 days of the date of the written notice, the application
         shall be considered to have a recommendation for denial. If amended and determined to be
         sufficient, the application shall be processed in accordance with Art. 3.B.14.D.1.b.1)
         Sufficiency and Recommendation. [Ord. 2006-004]
2. **Public Hearing Procedures**
   In addition to the requirements of Art. 2, Application Processes and Procedures, the following shall apply: [Ord. 2006-004]
   a. **Official Zoning Map Amendments**
      All Official Zoning Map Amendment requests shall comply with the following standards: [Ord. 2006-004]
      1) **Industrial Districts**
         Any request to rezone lots located in the flight path of the PBIA to an industrial district shall not require a Plan Amendment, in accordance with Policy 1.2-3-d of the Plan. [Ord. 2006-004]
      2) **Commercial Districts**
         Any request to rezone lots to a commercial district or PDD that were not designated commercial on the FLUA as of the Plan’s August 31, 1989 adoption shall not require a FLUA amendment, in accordance with Policy 1.2-3-c of the Plan, subject to the following: [Ord. 2006-004]
         a) **Purpose**
            The rezoning advances the purpose and intent of the WCRA Plan, and does not have an adverse impact on surrounding uses. [Ord. 2006-004]
         b) **20-Percent Limitation**
            The rezoning must not cause the total amount of acreage in the WCRAO shown as commercial on the FLUA as of the August 31, 1989 adoption of the Plan to be increased by more than 20 percent. [Ord. 2006-004]
         c) **WCRA Approval**
            The Applicant receives a recommendation for approval from the WCRA in accordance with Art. 3.B.14.D.1, WCRA Recommendation. [Ord. 2006-004]
   b. **Class A Conditional Uses on Lots Two Acres or Less**
      A DOA or new application for a Class A Conditional Use, with a Gross Land Area of two acres or less, may be approved as a Class B Conditional Use. [Ord. 2006-004]

3. **Use Regulations**
   1. **Mixed Use**
      In the WCRAO, mixed use means the combination of residential and one or more non-residential uses that are functionally integrated. Mixed use may be required or permitted in commercial districts that have a commercial with underlying residential FLU designation, as indicated in Table 3.B.14.E, WCRAO Mixed Use. [Ord. 2006-004]

   **Notes:**
   1. Non-residential uses on parcels that have a commercial FLU with underlying residential designation, approved as part of Plan Amendment Round 2005-01, Ord. No. 2005-032, shall be permitted in the NRM and NG Sub-areas. Non-residential uses shall only be permitted if all permitted residential density is utilized, but in no case shall it be less than one unit. Density shall be calculated meeting the requirements of FLUE Table 2.2.1-g.1, and other related Policies of the Plan. [Ord. 2006-004] [Ord. 2015-031] [Ord. 2018-002] [Ord. 2019-005] [Ord. 2020-001]
   2. Minimum and maximum percentages for residential and non-residential uses are calculated by dividing the total GFA for either use (residential OR non-residential) type by the total GFA (residential AND non-residential). Projects that vertically integrate a minimum of 20 percent of the site's approved (includes allowed density and any density bonus units) residential density with commercial uses may be allowed to utilize up to 100 percent of both the site's commercial intensity and residential density. [Ord. 2006-004] [Ord. 2020-001]
   3. Residential-only developments are permitted within the NC, NRM, and NG Sub-areas. [Ord. 2015-031] [Ord. 2018-002] [Ord. 2020-001]
   4. Within the NC, UG, and UH Sub-areas, residential-only Multifamily and Townhouse developments with five dwelling units or more shall be permitted. Residential-only developments with under five units shall not be permitted. [Ord. 2020-001]
2. Sub-area Use Regulations
   a. Use Regulations
      In addition to the requirements of Art. 4.B, Use Classification, the following uses shall be prohibited or permitted in the WCRAO Sub-areas: [Ord. 2006-004]

Notes:

1. Use allowed by floor only where permitted by existing zoning district, and the mixed use provisions of Table 3.B.14.E, WCRAO Mixed Use. [Ord. 2006-004]

F. Property Development Regulations (PDRs)

1. Sub-area PDRs

In order to implement the form based code outlined in the WCRA Plan, additional PDRs are established for the seven Sub-areas. Development in the WCRAO shall be in compliance with all Standard Zoning District, PDD, or TDD PDRs, unless specified otherwise in Table 3.B.14.F, WCRAO Non-Residential and Mixed Use Sub-area PDRs and Table 3.B.14.F, WCRAO Residential Sub-area PDRs. Accessory uses and structures shall be in accordance with Art. 5.B.1, Accessory Uses and Structures, unless stated otherwise. [Ord. 2006-004] [Ord. 2008-003] [Ord. 2017-007] [Ord. 2019-005] [Ord. 2020-001]

a. NRM, NG, and NC Side Setback Reduction

A building in the NRM, NG, and NC Sub-areas may be built along the interior side property line with a zero setback, subject to the following: [Ord. 2006-004] [Ord. 2015-031]

1) No windows, doors or other openings are permitted. No portion of the building, including roof eaves, gutters, and soffits may encroach onto adjacent property. [Ord. 2006-004] [Ord. 2015-031]

2) No form of opening, attachment, or any item or method of construction requiring maintenance other than cleaning and painting when visible, shall be permitted. [Ord. 2006-004]

3) A maintenance easement is granted allowing for a minimum of two feet for access to any portion of a structure left exposed and requiring limited maintenance. [Ord. 2006-004] [Ord. 2015-031]

4) Height shall be limited to a maximum of 36 feet for properties in the NRM and NG Sub-areas abutting existing Single Family uses. [Ord. 2006-004] [Ord. 2010-022] [Ord. 2015-031] [Ord. 2020-001]

**Key:**
- PDRs not specified in this Table shall be subject to the PDRs of the lot’s zoning district.
- C For commercial uses.
- MU For mixed uses.

**Notes:**
1. PDRs for Single Family dwellings in the NR Sub-area shall be in accordance with Table 3.B.14.F. WCRAO Residential Sub-area PDRs. [Ord. 2020-001]
2. Building coverage may be increased to 60 percent if all parking is provided curbside or in a parking structure. [Ord. 2006-004] [Ord. 2020-001]
4. Side setbacks may be reduced to zero in accordance with Art. 3.B.14.F.1.a, NRM, NG, and NC Side Setback Reduction. [Ord. 2006-004]
5. Mid-block separation a minimum of 20 feet in width is required at the first floor level for building length in exceeding 200 feet, and must be 50 feet or more from either end of the building. [Ord. 2006-004]
6. Minor increases in maximum height may be permitted subject to all of the standards of Art. 5.C.1.E.4.a-c and as exempted by Art. 3.D.1.E.4, Height Exceptions, and as defined by Art. 1, General Provisions. [Ord. 2010-022]
7. Buildings shall be articulated so that the longest side faces the front build-to-line. Where a parcel is located at the intersection of two or more streets, at least one building shall be placed at a corner in accordance with Art. 3.B.14.F.2.b.2), R-O-W/Easement Exception, and comply with the build-to-line for both streets. [Ord. 2015-031]
8. Minimum building frontage shall only apply to the front build-to-line, and may be reduced in accordance with Art. 3.B.14.F.2.b.1(a), Minimum Building Frontage Exception. [Ord. 2015-031] [Ord. 2017-025]

| [Ord. 2020-001] |

**Notes:**

2. Building coverage may be increased to 60 percent if all parking is provided curbside or in a parking structure.
3. Side setbacks may be reduced to zero in accordance with Art. 3.B.14.F.1.a, NRM, NG, and NC Side Setback Reduction.
4. Minor increases in maximum height may be permitted subject to all of the standards of Art. 3.C.1.E.4.a-c and as exempted by Art. 3.D.1.E.4, Height Exceptions, and as defined by Art. 1, General Provisions.
5. Maximum height of Multifamily projects of five units or more shall be in accordance with Maximum Stories and Height by Sub-area in Table 3.B.14.F, WCRAO Non-Residential and Mixed Use Development Sub-area PDRs.
6. Multifamily developments with five units or more shall be permitted only on the condition that the number of stories within the NC, UG, and UH Sub-areas shall meet a minimum of two stories in the NC, UG, and UH Sub-areas.
7. Minimum building frontage of 80 percent is required for all Townhome and all Multifamily developments in the NC Sub-area.

2. **Build-to-Line and Frontages**
   a. **Build-to-Line**
      The first three floors of all main structures, excluding parking garages, shall be constructed at the build-to-line, unless specified otherwise. Maximum encroachments for balconies, and entryways shall comply with Table 3.B.14.G, WCRAO Supplementary Standards by Sub-area. [Ord. 2006-004] [Ord. 2011-001] [Ord. 2017-025]
      1) **General Exceptions**
         The following exceptions to the build-to-line shall be Permitted by Right: [Ord. 2017-025]
         (a) An additional ten or 12-foot setback is permitted where a gallery is used in lieu of an arcade. [Ord. 2017-025]
         (b) Up to 25 percent of the building frontage or footprint that is required to be on the build-to-line may be either setback or projected beyond the build-to-line to accommodate requirements for balconies, stoops, porches, or other architectural features designed to enhance the pedestrian streetscape environment, provided that ground floor improvements do not conflict with the placement of street trees. [Ord. 2017-025]
         (c) Recesses and projections of the building façade up to a maximum of three feet. [Ord. 2017-025]
         (d) Plazas and squares are optional. References to such shall not be misconstrued as a requirement, except that dimensions for Plazas and Squares shall be met when applied as an exception to build-to-line in accordance with Art. 3.B.14.F.2.a, Build-to-Line. [Ord. 2017-002] [Ord. 2017-025]
   2) **R-O-W/Easement Exception**
      The build-to-line may be adjusted by the DRO where a site plan is required, or at Building Permit Review for projects Permitted by Right, to accommodate requirements such as increased R-O-W buffers due to location of existing utility easements, or required safe sight distance or corner clips. [Ord. 2017-025] [Ord. 2018-002]
b. Minimum Building Frontage

1) The minimum building frontage shall be in accordance with the requirements of Table 3.B.14.F, WCRAO Non-Residential and Mixed Use Sub-area PDRs or Table 3.B.14.F, WCRAO Residential Sub-area PDRs. The portion of the structure required to meet the building frontage shall be located on the build-to-line unless otherwise stated. [Ord. 2006-004] [Ord. 2010-022] [Ord. 2011-001] [Ord. 2015-031] [Ord. 2017-025] [Ord. 2020-001]

(a) Minimum Building Frontage Exception

This provision is established for lots that only have frontage on one street, or where side or rear access to required parking is unobtainable, or where a narrow lot with side or rear access cannot meet minimum building frontage and setback requirements. The minimum building frontage may be reduced, provided that the reduction shall be the minimum necessary to accommodate required side setbacks, perimeter buffers, foundation planting areas and a maximum of one vehicular access point for required parking, as well as any pedestrian sidewalk up to five feet in width. [Ord. 2017-025]

Figure 3.B.14.F – Typical Example of Minimum Building Frontage Exception

2) For parcels with multiple street frontages, the WCRA Executive Director shall determine the hierarchy of street frontages after consultation with the PBC Zoning Division and Engineering and Public Works Department. In establishing the hierarchy of frontages, the WCRA Executive Director will consider the proposed building design, orientation, and programming, and other site elements, including but not limited to: CPTED practices, landscaping, and streetscape to support a pedestrian-friendly environment. [Ord. 2015-031]
3. Sky Exposure Planes
In the NC, UG, and UI Sub-areas, the maximum height of a structure at the build-to-line shall be in accordance with Table 3.B.14.F, Sky Exposure Plane, and Figure 3.B.14.F, Sky Exposure Plane. [Ord. 2006-004] [Ord. 2008-003]

Notes:
1. Slope is expressed as a ratio of vertical distance to horizontal distance. [Ord. 2006-004]
2. A narrow street has a R-O-W of 60 feet or less, and a wide street has a R-O-W of 60 feet or greater. [Ord. 2006-004]

4. Base Building Line
The 40-foot-wide visual buffer requirement of Art. 3.D.1.D.1, Base Building Line, shall not apply to those lots abutting Westgate Avenue between Congress Avenue and Military Trail. The base building line for said lots shall be the existing R-O-W line of Westgate Avenue. [Ord. 2006-004]
G. Supplementary Standards

In addition to the requirements of Art. 5, Supplementary Standards, and Table 3.B.14.G, WCRAO Supplementary Standards by Sub-area, the following shall apply: [Ord. 2006-004]

Key:
- Subject to the supplementary standards of the lot’s zoning district
- Required second floor shall meet minimum frontage and depth requirements. [Ord. 2006-004]
- Excludes stoops. [Ord. 2006-004]
- Access from the front or side may be permitted for lots with no rear street frontage. [Ord. 2006-004]
- Chain link fences may be installed for the following: [Ord. 2009-040]
  a. Single Family residential use provided a continuous native hedge is planted along the exterior side of the fence and adequate room for maintenance is provided along the property lines adjacent to public R-O-W. The hedge shall be maintained at the same height as the chain link fence. Black or green vinyl-coated chain link fence may be installed along remaining perimeter property lines not adjacent to a public R-O-W. [Ord. 2009-040]
  b. Non-residential uses within the UI Sub-area if the chain link fence is black or green vinyl coated; or,
  c. When a landscape barrier is required pursuant to Art. 4.B.2.C.17.d, Accessory Uses – Green Market. [Ord. 2019-005]
- The maximum encroachment for porches, balconies, and entryways located in NC Sub-area shall only apply to permitted residential or hotel uses. These ground floor improvements shall not conflict with the placement of street trees. [Ord. 2011-001]
- Single Family dwellings and Cottage Homes – Single Unit on a Single Lot are not required to provide porches, balconies, and entryways, but may elect to utilize setback exceptions provided encroachment complies with other applicable maximum dimensions. [Ord. 2015-031] [Ord. 2020-001]
- Shall not apply to residential uses, except Multifamily developments with five units or more. [Ord. 2015-031] [Ord. 2020-001]
- Lots with 100 feet or less of frontage and residential development may be exempt from this requirement. [Ord. 2017-002] [Ord. 2020-001]
1. Accessory and Prohibited Uses

a. Accessory Structures
   1) Except as otherwise stated within Art. 3.B.14, WCRAO, Westgate Community Redevelopment Area Overlay, accessory structures shall meet the setbacks of the underlying zoning district and Supplementary Regulations as stated within Art. 5.B.1.A.1, General. [Ord. 2019-005]
   2) Accessory structures shall be architecturally compatible with the principal building, with exception to accessory structures such as small sheds associated with Single Family residences (excluding garages), when less than 150 square feet in size and ten feet in height, and completely screened from all public right-of-ways. [Ord. 2006-004] [Ord. 2009-040]
   3) Accessory structures permitted pursuant to Art. 4.B.6.C.10.c, Community Vegetable Garden and Art. 4.B.2.C.17.d, Accessory Uses -- Green Market shall comply with the PDRs of the zoning district in which the parcel is located and Supplementary Standards in Art. 5, and shall not be subject to Table 3.B.14.F, Build-to-Line/Setbacks and Minimum Building Frontage requirements. [Ord. 2019-005] [Ord. 2020-001]

b. Accessory Quarters and Garages
   Accessory Quarters and garages shall meet the requirements of Table 3.B.14.G, WCRAO Supplementary Standards by Sub-area and Figure 3.F.3.D, TND Garages. [Ord. 2006-004] [Ord. 2017-007]

c. Prohibited Uses in Front Yards
   In the NR, NRM, NG Sub-areas, the following uses are prohibited in front yards or building façades: [Ord. 2006-004]
   1) Parking on unpaved surfaces. [Ord. 2006-004]
   2) Clotheslines and other clothes-drying apparatus. [Ord. 2006-004]
   3) Electrical meters. [Ord. 2006-004]
   4) Air conditioning equipment, including window units on the building façade. [Ord. 2006-004]
   5) Antennas and satellite dishes. [Ord. 2006-004]

2. Fences, Walls, and Hedges
   Interior fences and walls in the NRM, NG and NC Sub-areas shall be decorative in nature, and shall not obstruct views of pedestrian access ways, courtyards, or parking entrances. Lots developed for Single Family residential use may be exempted from this requirement. [Ord. 2006-004] [Ord. 2010-022]
   a. Mixed Use Development and NC Sub-area
      Fences and walls shall be prohibited in the front or side street setbacks for mixed use development or any project in the NC Sub-area. [Ord. 2006-004]
   b. NRM and NG Sub-areas
      Fencing for residential uses in front yard setbacks may be increased to six feet in height if limited to decorative wrought iron or other similar materials that do not obstruct vision. [Ord. 2006-004]

3. Architectural Guidelines
   a. Porches and Balconies
      Notwithstanding the requirements of Art. 5.C.1.H.2.b, Balconies and Patios, a minimum of 20 percent of all Townhouses or the total number of Multifamily dwelling units on each floor shall have individual balconies or porches. A minimum of one balcony or porch shall be required for any project with less than five units. [Ord. 2006-004]
   b. Building Entrance Orientation
      All uses in the NRM, NG, NC, and UG Sub areas shall have a principal entrance on the first floor oriented towards the street used as the primary frontage for the building. Cottage Homes – Multiple Units on a Single Lot may also be oriented to a common entryway or open space courtyard which is oriented towards the street used as the primary frontage. [Ord. 2006-004] [Ord. 2010-022] [Ord. 2020-001]
   c. Fenestration Details – Windows and Doors
      All mirrored or reflective glass, sliding glass doors and glass blocks shall be prohibited. Where required, glazing shall have a minimum 70 percent transparency. A minimum of six square feet of glazing per linear foot of façade shall be provided at a pedestrian scale, on the first floor frontage or side street frontage. For the purpose of applying minimum fenestration required, the first floor shall be considered the area located up to a maximum of 12 feet above finished grade. Window or door frames and Mullions shall be included to be included in the calculation. [Ord. 2006-004] [Ord. 2010-022] [Ord. 2015-031]
d. Arcades and Galleries
Arcade or gallery dimensions shall be in accordance with Figure 3.B.14.G, WCRAO Arcade and Gallery Standards. Where arcades and galleries are required, galleries shall not exceed 50 percent of the total building frontage. [Ord. 2006-004] [Ord. 2010-022]

![Figure 3.B.14.G – WCRAO Arcade and Gallery Standards](image)

e. Drive-Throughs and Gas Station Canopies
In the NRM, NG, and NC Sub-areas, a drive-through, gas station canopy, or fueling area shall be located to the rear of all buildings. [Ord. 2006-004]

f. Mezzanines
Mezzanines shall be counted as a floor, but cannot be used to meet the NC Sub-area two-story requirement. [Ord. 2006-004]

4. Non-Conforming Lot Combination
A non-conforming lot that is a legal lot of record, has a minimum of 25 feet of frontage and is located in the NRM, NG, or NC Sub-areas, may be combined with an adjacent lot meeting the same standards, or a conforming lot, provided it serves to reduce the non-conformity and creates a new lot with a minimum of 50 feet of frontage. The subdivision may be approved in accordance with Art. 11.A.8.D, Plat Waiver with Certified Boundary Survey. [Ord. 2008-003]
H. Density Bonus Programs

1. Density Bonus Pool

Notwithstanding the provisions of Art. 5.G, Density Bonus Programs, an additional 1,300 residential units are available in the WCRAO in accordance with Plan Policy 1.2.3-b, and the following: [Ord. 2006-004]

<table>
<thead>
<tr>
<th>Sub-areas</th>
<th>NR</th>

</tr>
</tbody>
</table>

[Ord. 2006-004]

Notes:
1. Additional Density Bonus Pool Units are only permitted where a project utilizes all allowed density as indicated by FLU designation and the Plan. [Ord. 2006-004]

a. WCRA Recommendation

Any proposed project that includes a request from the Density Bonus Pool shall obtain a recommendation from the WCRA in accordance with the standards of Art. 3.B.14.D.1.b, Timeframe for Response. A project shall receive a recommendation for approval from the WCRA that either meets three of the following six factors, for: (1) The UH Sub-area; (2) That portion of the NRM Sub-area located west of the LWDD L-2B Canal and between Suwanee Drive and the E-3½-8 Canal; or, (3) The UG Sub-area; or meets four of these six factors for: (1) That portion of the NRM Sub-area located between the LWDD L-2B Canal and Suwanee Drive; (2) The NG Sub-area; or, (3) The NC Sub-area: [Ord. 2006-004] [Ord. 2007-013] [Ord. 2011-001]

1) The proposed project meets the minimum building frontage requirements of Table 3.B.14.F, WCRAO Non-Residential and Mixed Use Sub-area PDRs or Table 3.B.14.F, WCRAO Residential Sub-area PDRs. [Ord. 2006-004]

2) The proposed project has a rear lot line abutting a R-O-W to ensure that vehicular access to parking is limited to the rear of the lot, in accordance with Art. 3.B.14.I.1.a.1). [Ord. 2006-004] [Ord. 2011-001]

3) Where permitted, the proposed project includes mixed use with a minimum of ten percent and a maximum of 50 percent of the GFA dedicated to non-residential uses. [Ord. 2006-004]

4) A minimum of five percent of the gross lot area is set aside for open space with a public amenity or a public plaza, with a minimum size of 800 square feet and 25 feet in width, including but not limited to public art (not depicting any advertising); fountains of at least eight feet in height and 16 feet in diameter; pergolas; bell or clock tower; and public seating areas (not in conjunction with any restaurant seating). [Ord. 2006-004]

5) A minimum of 40 percent of the projects allowed density is reserved for affordable housing meeting the requirements of Art. 3.B.14.H.1.c, Affordability Standards. [Ord. 2006-004]

6) Preferred uses: [Ord. 2006-004]

a) NRM Sub-area: business or professional office, medical or dental office, personal services, and Townhouses. [Ord. 2006-004]

b) NG Sub-area: business or professional office, medical or dental office, personal services, printing and copying services, Type 1 Restaurants that meet the requirements of Art. 4.B.2.C.33.b.2), Permitted by Right, and Type 2 Restaurants. [Ord. 2006-004] [Ord. 2007-013]

c) NC, UG and UH Sub-areas: business or professional office, personal services, printing and copying services, Type 1 Restaurants that meet the requirements of Art. 4.B.2.C.33.b.2), Permitted By Right, and Type 2 Restaurants. [Ord. 2006-004]
b. Approval Process
The review process for a WCRAO Density Bonus Pool approval is based on the density bonus requested in accordance with Table 3.B.14.H, WCRAO Density Bonus Pool Approval. Notice of all proposed projects shall be forwarded to the BCC administratively by the Division responsible for reviewing the application. [Ord. 2006-004] [Ord. 2007-013] [Ord. 2010-022]

[Ord. 2006-004] [Ord. 2007-013]

Notes:
1. The transfer of density to a PDD or TDD requires approval as a Class A Conditional Use. [Ord. 2006-004] [Ord. 2018-002]
2. Up to one unit may be Permitted by Right for projects less than one acre in size. [Ord. 2006-004]
3. Affordable units shall consist of WHP units pending the adoption of the WCRA Inclusionary Housing Policy, as mandated by the Plan, to include very low through middle-income households. [Ord. 2006-004] [Ord. 2008-003]

c. Affordability Standards
Where required by Table 3.B.14.H, WCRAO Density Bonus Pool Approval, units required to be affordable shall comply with the following: [Ord. 2006-004] [Ord. 2007-013] [Ord. 2008-037]

1) Design Requirements
All density bonus units required to be affordable shall be designed to a compatible exterior standard as other units within the development or pod. These units may be clustered or dispersed throughout the project. [Ord. 2007-013]

2) Sales and Rental Prices
Affordable units shall be offered for sale or rent to very low through middle-income households. The sale and rent prices may be updated annually by the County Administrator, or designee, based on the AMI, and household income limits for PBC (West Palm Beach/Boca Raton metropolitan statistical area) as published annually by HUD. [Ord. 2007-013] [Ord. 2008-037]

3) Master Covenant
Prior to Final DRO approval, the Applicant shall record in the public records of Palm Beach County a Covenant binding the entire project, in a form provided by the County, which identifies each required affordable unit. In the event the project is not subject to Final DRO approval, the Applicant must submit a recorded copy of the Covenant to the Building Division prior to issuance of the first Building Permit. The Covenant shall include but not be limited to restrictions requiring: that all identified affordable units shall be sold, resold, or rented only to very low through middle-income qualified households at an attainable housing cost for each of the targeted income ranges; that these restrictions remain in effect for a minimum of ten years for units sold to eligible households, and a minimum of 20 years for rental units, from the date of each unit is first purchased or designated as a rental unit; and that in the event a unit is resold before the ten or 20-year periods conclude, a new ten or 20-year period shall take effect on the date of resale. The Covenant shall further provide monitoring and compliance requirements including but not limited to those set forth below to ensure compliance with Plan TE Policy 1 2-r. Every deed for sale of an affordable housing unit shall incorporate by reference the controlling Covenant. [Ord. 2007-013] [Ord. 2008-037]

4) Monitoring and Compliance
Shall be in accordance with the monitoring and compliance requirements of the applicable Sections of Art. 5.G.1, Workforce Housing Program, or Art. 5.G.2, Affordable Housing Program. [Ord. 2007-013] [Ord. 2011-001]

5) Enforcement
Shall be in accordance with the enforcement requirements of the applicable Sections of Art. 5.G.1, Workforce Housing Program, or Art. 5.G.2, Affordable Housing Program. [Ord. 2007-013] [Ord. 2011-001]

6) Limitations on Restrictions
Shall be in accordance with the limitations and restriction requirements of Art. 5.G.2, Affordable Housing Program. [Ord. 2007-013] [Ord. 2011-001]
7) **Affordability Ranges**

Required affordable WCRAO Density Bonus units shall be distributed in accordance with Table 3.B.14.H, WCRAO Affordability Ranges. Multifamily or Townhouse developments less than ten dwelling units may be excluded from this requirement. [Ord. 2008-037] [Ord. 2011-001]

[Ord. 2008-037]

**Notes:**

1. Requirements are applicable to for-sale and rental units.
2. Percentage is a combination of very low, low, moderate, and middle-income requirements. However, a single project shall be limited to a maximum of 40 percent low or 40 percent very low-income units.
3. Percentage is a combination of very low and low-income requirements.
4. Percentage is a combination of moderate and middle-income requirements.

2. **Other Density Bonus Programs**

The Applicant may request to modify or reduce the landscape requirements pursuant to Art. 7, Landscaping subject to a Type 2 Waiver process. The request shall be consistent with the Plan and a WCRA recommendation for approval. [Ord. 2006-004]
I. Parking and Streets
   1. Parking
      a. General
         1) For properties located east of the LWDD L-2B Canal and west of Suwanee Drive within the NRM, NG, and NC Sub-areas, parking shall be accessed from the rear of the lot from a street or alleyway, when available. [Ord. 2006-004] [Ord. 2011-001]
         2) Reserved parking, including spaces reserved for valet parking, shall be prohibited except for parking provided above the minimum required, or for individual garages for residential units. [Ord. 2006-004]
      b. Parking Exemption in the NC Sub area
         Projects on lots less than 10,000 square feet in size shall be exempt from on-site parking requirements if fronting on a street with on-street parking. [Ord. 2006-004]
      c. Allowable Reductions in Required On-Site Parking
         The required amount of on-site parking may be reduced in accordance with any of the following provisions. These provisions may be applied cumulatively. [Ord. 2006-004]
         1) UG, UH, NRM, NG, and NC Deviations
         2) Curbside Parking
            On-street parking available along the frontage, side, or rear lot lines that directly abuts the subject lot may be applied toward the parking requirements of the uses on the lot. Applicable spaces shall be calculated by taking the total linear distance of parking spaces and abutting the site’s lot lines and dividing by the average length of spaces. [Ord. 2006-004] [Ord. 2007-013]

Notes:
1. Unless stated otherwise in this Section, parking and loading shall be in accordance with Table 6.B.1.B, Minimum Parking and Loading Requirements. [Ord. 2006-004] [Ord. 2007-013]
2. A parking ratio of 1.5 spaces per unit plus required guest parking shall also be permitted for any unit required to be deed restricted for very low and low-income households. [Ord. 2007-013]

3) Connections to Adjacent Parking
   Parking areas connecting to adjoining or future adjoining lots shall be granted a five-percent reduction in the amount of required parking. This five-percent reduction shall be deducted from the final calculated parking requirement, after all other eligible reductions are taken into consideration. [Ord. 2006-004]

2. Redevelopment Loading Option
   To further development of WCRAO smaller parcels in the NRM, NG, NC, UG, or UI Sub-areas that promote the form based code principles of the WCRA Plan, the WCRA Executive Director may authorize the use of access aisles or other similar location on a site with structures less than 25,000 square feet in size, to also be used as loading areas, subject to the following: [Ord. 2007-013]
   a. Application
      An application shall be submitted to the WCRA in a form established by the Executive Director of the WCRA. The application shall include a loading demand study that addresses the minimum standards of this Section. [Ord. 2007-013]
b. **Standards**

The following standards shall apply to any shared location for a required loading zone: [Ord. 2007-013]

1) Demonstrate that site constraints or the benefits of an alternate loading zone is needed to allow for the development, including efforts to maximize potential FAR or density; [Ord. 2007-013]

2) Identify the size and types of uses that will be using the alternate loading zone, to include turnover rates and peak loading hours; [Ord. 2007-013]

3) Demonstrate that the proposed alternate loading zone will not adversely impact required vehicle stacking at entrances, block building entrances, emergency vehicle access, or parked vehicles; [Ord. 2007-013]

4) Identify the dimensions and types of vehicles that will use the alternate loading zone; [Ord. 2007-013]

5) Incorporate other available data, including but not limited to: traffic engineering or other Planning studies demonstrating the feasibility of the request; [Ord. 2007-013]

6) The use of the site may be limited to the size and types of uses indicated in the approved loading zone study; [Ord. 2007-013]

7) The site design shall provide sufficient maneuvering area and turning radii for proposed delivery vehicles; and, [Ord. 2007-013]

8) If located in an access aisle, a minimum ten-foot-wide by-pass shall be maintained along the entire length of the designed alternative loading area. [Ord. 2007-013]

**c. Approval Letter and Documentation**

The WCRA Executive Director shall recommend approval or denial of the application within the timeframes established under Art. 3.B.14.D.1.b, Timeframe for Response. The WCRA Executive Director shall issue a letter to the Applicant indicating their recommendation. [Ord. 2007-013]

3. **Access and Circulation System**

a. **Construction in Existing R-O-Ws**

The County Engineer may approve alternatives to PBC Standard design sections for Local Street construction, where streets are maintained by PBC, in order to accommodate construction or reconstruction of paving and drainage improvements to an existing public Local Street, or segment thereof. The eligible R-O-Ws shall have a width of less than 50 feet. The alternative design(s) shall provide for paved travel-way widths, structural sections, drainage, pedestrian access, dead end turnarounds, and safe sight corners as prescribed by PBC Standards for Local Streets, or as deemed equivalent by the County Engineer. All required treatment and discharge control of storm-water runoff to the street drainage system shall be provided by secondary storm-water management facilities located outside the street R-O-W, permitted and constructed in accordance with applicable regulations of all agencies having jurisdiction over the receiving waters at the point of legal positive outfall. [Ord. 2006-004]

b. **Access to Residential Subdivision Lots**

In lieu of minimum legal access requirements pursuant to Art. 11.E.1.A.1, Access and Circulation Systems, a Local Street improved pursuant to Art. 3.B.14.I.3.a, Construction in Existing R-O-Ws, and having continuous paved access to at least one public street on the perimeter of the WCRAO, shall be deemed by the County Engineer to meet the requirement of Local Street access for residential lots created by subdivision of abutting property. Nothing herein shall prohibit the owner of abutting property from making application for and receiving appropriate approval of a final subdivision plan or waiver of platting prior to completion of the above-noted improvements; provided, however, that the applicable plat or affidavit of waiver shall not be approved for recordation until construction has commenced for said improvements. [Ord. 2006-004]

c. **Alleys**

Removal of existing alleys is prohibited, unless approved by the WCRA. [Ord. 2006-004]

d. **Driveways**

In the NRM, NG, NC, and UG Sub-areas, a maximum of one driveway is permitted for lots less than 100 feet wide, or for one driveway for each 100 linear feet of frontage (or rear property line for double frontage where applicable). [Ord. 2006-004]
J. WCRAO Landscape Modifications

1. Foundation Planting
   a. Build-to-Line
      Required foundation planting along any façade with a required build-to-line may be deleted. [Ord. 2010-022]
   b. Foundation Planting Deviations
      The following modifications shall be permitted subject to DRO approval of an ALP: [Ord. 2010-022] [Ord. 2018-002]
      1) The width of side foundation planting areas may be reduced from eight to five feet in width for buildings with a ten-foot side setback if the overall volume of reduced planting area is relocated on site or the required landscaping within the foundation planting area, at installation, be increased in height by 25 percent. [Ord. 2010-022]
      2) Side foundation planting may be eliminated for buildings using a zero side setback. [Ord. 2010-022]
      3) Side foundation planting may be relocated on site or the equivalent required landscaping within the site, be increased in height by 25 percent if the Applicant can demonstrate that proposed building heights will adversely limit sunlight and viability of planting area. [Ord. 2010-022]

2. Perimeter Buffer Width Reductions
   A required R-O-W or Incompatibility Buffer width may be reduced by up to 50 percent in the NRM, NG, NC, UG, and UI Sub-areas for commercial or mixed use projects, provided that a minimum five-foot-wide planting areas is provided with no encroachments, and that all other code requirements are met, unless indicated otherwise. A side interior perimeter buffer shall not be required when a zero side setback is used. [Ord. 2010-022] [Ord. 2018-002]

3. R-O-W Planting Reductions
   Shrubs and hedges shall not be required for any R-O-W Buffer along the Westgate Avenue corridor from Congress Avenue to the L-10 Canal, provided that required trees are planted 20 feet on center. This provision may also be used along the frontage of any mixed use project in the NRM, NC, NG, and UG Sub-areas. [Ord. 2010-022]
   a. Clustering
      In the WCRAO, clustering is not permitted in conjunction with the R-O-W Buffer in the NRM, NG, and NC Sub-areas. [Ord. 2006-004] [Ord. 2018-002]

4. Parking Lots
   Side interior perimeter buffers are not required where adjacent to a surface parking lot that shares a common border with and is interconnected to an adjacent surface parking lot, subject to DRO approval. [Ord. 2010-022]

K. Drainage

1. Surface Water Management Permit
   For subdivision of land where all of the land proposed to be subdivided, is included within an active Surface Water Management Permit issued by the SFWMD, where all water quality and water quantity requirements of the SFWMD have been met under said permit, the requirements for control of discharge pursuant to Art. 11.E.4.F, Secondary Stormwater System Design and Performance, shall be deemed in compliance. [Ord. 2006-004]
Section 15  Infill Redevelopment Overlay (IRO)

A. Purpose and Intent

The purpose and intent of the Infill Redevelopment Overlay (IRO), is as follows: [Ord. 2010-005]
1. Establish optional development regulations to facilitate revitalization of commercially designated lands in the Urban/Suburban Tier, by incrementally retrofitting commercial corridors and isolated land uses with sustainable development that creates a sense of place, improves streetscapes, and successfully integrates into the surrounding community; [Ord. 2010-005]
2. Offer property development incentives that will encourage developers, property, or business owners to utilize the IRO (e.g., reduced setbacks and parking ratios, increased FAR, and flexible landscaping regulations to maximize the efficient use of property); [Ord. 2010-005]
3. Implement the Goals, Objectives and Policies of the Comprehensive Plan that mandate sustainable, walkable urban/suburban redevelopment; [Ord. 2010-005]
4. Utilize Smart Growth and Form Based Coding principles to establish standards that create a predictable built form that improves the streetscape and establishes an enhanced pedestrian realm; [Ord. 2010-005]
5. Advocate walking, cycling, and mass transit as viable alternatives to automobile use; [Ord. 2010-005]
6. Promote interconnectivity between uses; [Ord. 2010-005]
7. Promote sustainability by integrating the social, economic, and ecological needs of the community with overall regional, State, and national policy advocating management of resources for future generations; [Ord. 2010-005]
8. Mitigate adverse impacts of commercial development to surrounding residential uses and the community as a whole; [Ord. 2010-005]
9. Promote non-residential and residential mixed use; [Ord. 2010-005]
10. Respect market realities, industry trends, and property rights; [Ord. 2010-005]
11. Address multi-disciplinary regulatory and development review processes; and, [Ord. 2010-005]
12. Establish expedited review process. [Ord. 2010-005]

B. Applicability

The provisions of the IRO are optional, with the stipulation that when selected all new development will be in compliance with this Section, excepting any permitted Type 1 Waivers. An Applicant may elect to use the IRO regulations for parcels that meet the following criteria: [Ord. 2010-005] [Ord. 2012-027]
1. **Boundaries**
Parcels shall be located in the U/S Tier, defined as that area being located within the USA, as depicted on Map LU 2.1 Service Areas, of the Plan. [Ord. 2010-005]

2. **Other Overlays**
Where applicable, the IRO may be used in conjunction with the following overlays: GAO, LOSTO, NEO, PBIAO, TAPO, WCRAO-UH Sub-area, and URA where a parcel does not have a URA Urban Center (UC) or Urban Infill (UI) FLU designation. Where there is a conflict between the provisions of the IRO and any of the above overlays, the specific provisions of the other overlay shall prevail. [Ord. 2010-005]

3. **FLU Designation**
Eligible parcels shall have one or any combination of the following: CL-O, CL, CH-O, or CH FLU designation. [Ord. 2010-005]

4. **Zoning District Requirements**
Use of the IRO shall require Rezoning to the IR district, unless allowed otherwise herein. Any IRO project that requires Public Hearing approval, excluding a Development Order Abandonment (ABN), shall submit a concurrent application to rezone the subject property to the IR district. [Ord. 2010-005]
   a. **IR Rezoning Alternative**
   To assist in expediting IRO projects that do not require any Public Hearing approvals, a Rezoning shall not be required subject to the following: [Ord. 2010-005]
      1) **Eligible Districts**
      Parcels shall have a CN, CL-O, CC, CH-O, CG, or MUPD Zoning District, or combination thereof. MUPD may also include applicable prior approvals identified in Art. 3.E.3.A.2, Applicability [Ord. 2010-005]
      2) **Intensity Limits**
      Application of IRO standards shall be made based upon the lesser of either the actual FLU designation for the site, or the zoning district equivalent as identified in the Table below: [Ord. 2010-005]

<table>
<thead>
<tr>
<th>Zoning District(s) of Subject Site</th>

5. **Conflicts**
If a conflict exists, the provisions of this Section shall apply to the extent of the conflict, unless stated otherwise herein. [Ord. 2010-005]

C. **Future Land Uses and Density/Intensity**
Density and intensity shall be in accordance with the FLU designation and related Zoning PDRs for the subject site as described herein. [Ord. 2010-005]

1. **Split by FLU Designations**
Uses permitted, PDRs, density, and intensity shall be determined by the land use designation on the affected area. Density may be transferred from one portion of the site to another. [Ord. 2010-005]

2. **Density**
The allowable density shall be in accordance with FLUE Table 2.2.1-g.1 and other related Policies of the Plan and related Policies, and Art. 5.G, Density Bonus Programs. [Ord. 2010-005] [Ord. 2019-005]
3. **Intensity Bonus Incentive (FAR Increases)**
   The maximum allowable FAR for an IRO project with a CL or CH FLU designation may be increased up to 1.0 in accordance with Table 3.B.15.C, IRO FAR Increase. The maximum permissible increase is limited to those subject sites having sufficient land area to allow for establishment of the core transect zone, so as to encourage the assembly of smaller parcels. [Ord. 2010-005]

<td>1.0</td>
</tr>
</tbody>
</table>
   [Ord. 2010-005]

   **Notes:**
   1. May be increased up to 0.50 for accessory retail projects, in accordance with the Plan.
   2. Applicable when a project achieves sufficient points to be classified as Green Architecture pursuant to Art. 5.C, Design Standards.

4. **Mixed Use Projects**
   A mixed use project that vertically integrates at least 20 percent of allowed residential units with non-residential uses shall be allowed to utilize up to 100 percent of both a site’s residential density and commercial intensity. [Ord. 2010-005]

D. **Application Requirements**

1. **Pre-Application Conference (PAC)**
   All applications for an IR rezoning or an IRO project shall require a PAC pursuant to procedures in Art. 2.A.5.A, Pre-Application Conference (PAC). [Ord. 2010-005]

2. **Plan Requirements**
   a. **Preliminary Master Plan**
      The BCC shall approve a Preliminary Master Plan for a rezoning to the IR district. [Ord. 2010-005]
      1) **Effect of BCC Approval**
         BCC approval of a Preliminary Master Plan, or any other plans submitted voluntarily by the Applicant, shall be binding upon the Property Owners subject to the Development Order, their successors, or assignees, and shall constitute the development regulations for the land. [Ord. 2010-005]
      2) **Additional Requirements**
         The Preliminary Master Plan shall also include the following, as applicable: [Ord. 2010-005]
         a) Intensity or density, including any mix of uses and vertical integration for any project proposing to use Art. 3.B.15.C.4, Mixed Use Projects; [Ord. 2010-005]
         b) Transect zones assigned to all land; [Ord. 2010-005]
         c) Vehicular and pedestrian circulation, including location of access points and interconnectivity to adjacent parcels; perimeter streets; and, the internal street network, including alleys; [Ord. 2010-005]
         d) General building location, including any tenants 65,000 square feet or larger and pedestrian streetscape realm for all perimeter street frontages; [Ord. 2010-005]
         e) Location of any Conditional Uses; [Ord. 2010-005] [Ord. 2018-002]
         f) General location of parking, loading, and service areas; and, [Ord. 2010-005]
         g) General location of required usable open space. [Ord. 2010-005]
b. Other Plans
   1) Regulating Plan
      The DRO shall approve a Regulating Plan. [Ord. 2010-005] [Ord. 2016-042]
   2) Master Sign Plan
      Shall not be required for BCC approval if no freestanding signs are proposed, excluding
directional signage. [Ord. 2010-005]
   3) Architectural Elevations
      Shall be in accordance with Art. 5.C, Design Standards. [Ord. 2010-005]

c. Final Plans
   Shall include the additional requirements listed above under the Preliminary Master Plan, as
applicable. [Ord. 2010-005]
   1) Final Site Plan or Subdivision Plan
      The DRO shall approve a Final Site Plan or Final Subdivision Plan(s) for all land areas located
within an IRO project. [Ord. 2010-005]

E. General Design Standards
An IRO project shall be designed in a manner that establishes an enhanced pedestrian environment by
providing a functional interface with perimeter streets and abutting uses. This is accomplished by regulating
the following: site layout; interconnectivity; location of intensity and density; building and parking placement;
building form; and, provision of an enhanced streetscape and usable pedestrian amenities. [Ord. 2010-005]
1. Streets, Access, and Interconnectivity
The IRO is primarily intended to accommodate smaller parcels fronting commercial corridors, and establishes perimeter frontage standards for building setbacks and streetscape improvements based upon the size or intensity of such streets. Larger IRO projects shall be designed to create block configurations composed of primary and secondary streets, and alleys. Access from perimeter streets shall be limited to primary streets where feasible, and rear alley access, with exception to smaller parcels which may use access ways to comply with rear alley requirements. IRO projects shall provide for the establishment of an alley system that connects to abutting commercial parcels, providing for an alternative slow speed vehicular access system running parallel to commercial corridors. Additional connectivity shall be required where larger parcels establish new intersections from internal streets and alleys. [Ord. 2010-005]

2. Transect Zones (TZ)
Transect Zones are distinct categories that define and organize density and intensity ranging from the most urban to the least urban. The IRO requires the application of one or more of the following four transect zones to all land within an IRO project: Core, General, Edge, and Open Space. The primary intent is to facilitate the development of urban forms while providing for gradual transitions in building scale and use intensity, rather than rigid distinctions. The following describes the four TZ types: [Ord. 2010-005]

![Table 3.B.15.E – Generalization of IRO Transect Zones](image)

[Ord. 2010-005]

a. Core
The most intense TZ typically comprised of larger interconnected commercial or mixed use buildings that create a continuous street wall along one or more streetscapes. Using the Core TZ may also require the use of the General or Edge TZ if the parcel is adjacent to residential uses or parcels with a residential FLU designation, so as to provide a compatible transition. [Ord. 2010-005]

b. General
A moderately intense TZ comprised of a wide range of building types including smaller interconnected commercial, mixed use, and Multifamily buildings. The General TZ may be used as a transition between the Core TZ and less intense zones or abutting uses, or for smaller parcels with size constraints. [Ord. 2010-005]

c. Edge
A low-intensity TZ comprised of residential or work/live uses that are compatible with or similar in scale to adjoining residential neighborhoods. The Edge TZ may be used to provide an appropriate transition between the Core or General TZs and abutting residential uses. [Ord. 2010-005]

d. Open Space
A passive TZ comprised primarily of unbuilt, landscaped areas. Open space may be surrounded by another TZ or used as a buffer between the General TZ and development on abutting parcels. Typical uses include passive civic, recreation, or other public open spaces such as plazas and squares, or drainage retention areas, environmental preservation, or perimeter landscape buffers. [Ord. 2010-005]
3. Buildings
All buildings shall be located along perimeter streets first, and then may be located internally, provided they front a primary street and are clustered with perimeter buildings. [Ord. 2010-005]

a. Building Types
There are five general building types permitted in the IRO: block, liner, courtyard, and Townhouse, with additional standards for civic uses, accessory structures and related outdoor uses. [Ord. 2010-005]

1) Block
A type of building with little or no substantial deviations in any façades typically used to accommodate single floor uses of up to 65,000 square feet per floor. [Ord. 2010-005]

2) Liner
A specialized type of building, used to conceal parking garages, large footprint building (large scale development or multi-tenant) in excess of 65,000 square feet in size, and may also include green spaces, plazas, or squares. Liner buildings may be attached to, or have rear alley access separating the use to be concealed, and shall be the same height as the use to be concealed. [Ord. 2010-005]

3) Courtyard
A type of building arranged around a courtyard, such as a garden, patio, plaza or, square that is open to the sky, and dedicated for common use. [Ord. 2010-005]

4) Civic
A type of building used to accommodate public or private civic uses. Deviations from IRO property development regulations may be permitted, where stated, when a public plaza, square, or other passive open space area is incorporated into the site. [Ord. 2010-005]

5) Townhouse
A type of building primarily intended for residential use that may also be used as a work/live space or unit. While a Townhouse building is intended to be developed using individual lots and party walls, it may also be developed as Multifamily if developed consistent with all Townhouse requirements. A Townhouse building shall comply with Art. 3.D.2.A, Townhouse and all other related ULDC provisions, unless expressly stated otherwise herein. [Ord. 2010-005]

b. Accessory Structures and Outdoor Uses
Shall be located so as to be screened from view from streets and to minimize any adverse impacts to adjacent residential properties. [Ord. 2010-005]

4. Parking and Loading
Required parking and loading for each tenant shall be located to the rear of buildings. Parking shall only be permitted in front of buildings in the form of on-street parking. Parking may be allowed on the side of buildings only if minimum frontage requirements have been addressed. [Ord. 2010-005]

5. Streetscape and Usable Open Space
a. A pedestrian-oriented streetscape shall be provided along all perimeter, primary, and secondary street frontages; [Ord. 2010-005]

b. Plazas, squares, and other forms of usable open space shall be located in front of or adjacent to buildings; and, [Ord. 2010-005]

c. Additional sidewalks or pathways shall be provided to establish a complete pedestrian network that links all uses and parking lots to perimeter street frontages. [Ord. 2010-005]

6. Landscaping and Open Space Transitional Elements
Landscaping in an IRO project shall be designed to enhance pedestrian areas, allow for improved visual surveillance from building windows, and minimize impacts to adjacent residential developments. Drainage retention areas, preserves, and other similar low-intensity open space areas shall be located so as to provide a transition between commercial uses and existing adjacent residential uses, or parcels with a residential FLU designation, when possible. [Ord. 2010-005]

F. Design and Development Standards
An IRO project shall comply with the following: [Ord. 2010-005]

1. Access and Frontage
Access shall be limited to minimize curb cuts to streets so as to improve traffic flow and reduce adverse impacts to pedestrian walkways. Where feasible, access from rear alleys is encouraged. [Ord. 2010-005]

a. External
No more than one access point shall be permitted for each 160 linear feet of street frontage, and shall be in the form of a street or alley, unless exempted otherwise herein. Parcels with side street
frontages shall be required to provide rear alley access or a larger street, unless bounded by a street along the rear property line. [Ord. 2010-005]

b. **Internal**
No more than one access point or alley shall be permitted for each 160 linear feet of street frontage to allow for access to parking and loading, drive-through facilities, or other similar uses. [Ord. 2010-005]

c. **Small Parcel Exception**
Parcels with less than 160 feet of frontage shall be permitted to establish one access point along a perimeter street; however, alley access shall be encouraged as the primary means of vehicular access where feasible. [Ord. 2010-005]

2. **Block Standards**
Blocks shall be created by utilizing streets and alleys to provide continuous pedestrian and vehicular circulation, interconnectivity, and accessibility in IRO projects. Any new blocks created, whether required or voluntary, shall be in accordance with the following: [Ord. 2010-005]

   a. **Applicability**
   Blocks are required for projects five or more acres in size, or where the subdivision of land is proposed, excluding lot recombination. [Ord. 2010-005]

   b. **Minimum Dimensions**

<table>
<thead>
<tr>
<th>Block Perimeter (Total)</th>
<th>Minimum</th>
<th>Maximum</th>
</tr>
</thead>
<tbody>
<tr>
<td>No Pedestrian Pass Through, or</td>
<td>640 feet</td>
<td>1,600 feet</td>
</tr>
<tr>
<td>With Pedestrian Pass Through</td>

<td>2,200 feet</td>
</tr>
<tr>
<td>Block Length (Single Side)</td>
<td>Minimum</td>
<td>Maximum</td>
</tr>
<tr>
<td>No Pedestrian Pass Through, or</td>
<td>160 feet</td>
<td>600 feet</td>
</tr>
<tr>
<td>With Pedestrian Pass Through</td>
<td>160 feet</td>
<td>750 feet</td>
</tr>
</tbody>
</table>

   c. **Block Frontage**
   All blocks shall have frontage on a perimeter or internal street frontage. Streets shall be used to interconnect blocks. When using alleys to meet block requirements, they shall only be permitted along the side or rear of a block where streets are not required. [Ord. 2010-005]

   d. **Subdivision**
   Any subdivision of land shall comply with all lot dimensions applicable to the IR district, with exception to Townhouse lots. [Ord. 2010-005]

   e. **PDD Subdivision Alternative**
   An IRO project may apply for an exemption from subdivision recordation requirements and subdivide by fee title conveyance of individual lots in accordance with the approval process and requirements of Art. 11.A.6.B, Subdivision of Commercial and Industrial Building Sites. [Ord. 2010-005]

   f. **Exceptions**
   Where new blocks are required, exceptions shall be permitted only where PBC DEPW requirements preclude required vehicular access points necessary to complete the block structure. [Ord. 2010-005]
3. Street Standards
This Code addresses the design of external and internal streets, and establishes related standards to ensure that pedestrian amenities and walkways, buildings, and other improvements are properly and safely situated. Vehicular circulation and interconnectivity shall be established using a system of streets and alleys, unless exempted herein. Streets are used to create connections between parcels, establish blocks, and provide frontage for buildings that are not located with frontage on a perimeter street. Alleys provide links between adjacent parcels along the rear of lots, behind buildings, and to link parking areas. [Ord. 2010-005]

a. Perimeter Street Types
Building perimeter frontages and setbacks shall be determined by the width of the ultimate street R-O-W. All perimeter streets shall be classified as indicated in Table 3.B.15.F, Perimeter Street Types. [Ord. 2010-005]

<table>
<thead>
<tr>
<th>Street Type</th>
<th>Ultimate R-O-W Width</th>
</tr>
</thead>
<tbody>
<tr>
<td>Type 1 R-O-W</td>
<td>✓ Less Than 60 Feet</td>
</tr>
<tr>
<td>Type 2 R-O-W</td>
<td>✓ 60-79 Feet</td>
</tr>
<tr>
<td>Type 3 R-O-W</td>
<td>✓ 80 Feet or More</td>
</tr>
</tbody>
</table>

[Ord. 2010-005]

Notes:
✓ Means applicable.

1) Exceptions
A Type 1 or Type 2 street type may be used to apply the standards of this Code if the street meets one of the following situations: [Ord. 2010-005]
   a) Street has a limited number of travel lanes and large medians, or on-street parking; or [Ord. 2010-005]
   b) Where streets are designed with narrower lanes and official posted speed limits are 35 miles per hour or less, a Type 2 R-O-W may be applied, or where 30 miles per hour or less, a Type 1 R-O-W may be applied. [Ord. 2010-005]

b. Internal Street Types
Internal streets shall include primary streets, secondary streets, slip streets, and alleys. For the purposes of the IRO, internal streets may include access ways or driveways, provided they comply with the design standards herein; however, new internal streets or alleys designated as private or public R-O-W shall also comply with any Engineering requirements. [Ord. 2010-005]
1) Primary Street
The design for the street, on-street parking, and streetscape shall comply with Figure 3.F.2.A, TDD Commercial Street, or the TMD design exception summarized in Article 3.F.4.C.2.a.1, Design Exception as illustrated in Figure 3.F.4.C, Typical Example of TMD Commercial Street with Angled Parking. If required, primary streets shall serve to establish the main pedestrian routes of a project. [Ord. 2010-005]

2) Secondary Street
Secondary streets may be permitted where necessary to comply with block structure requirements. Secondary streets shall be designed to be consistent with primary streets, except that on-street parking shall not be required, and minimum sidewalk width may be reduced to five feet in width. [Ord. 2010-005]

3) Slip Street Option
The slip street option allows for the establishment of a parallel street immediately abutting a commercial corridor. The slip street establishes a pedestrian-oriented streetscape along perimeter frontages that also accommodates on-street parking. Eligible parcels shall have a minimum frontage of 400 feet along a perimeter street, and shall be generally consistent with the standards for a primary street, with exception to the following: [Ord. 2010-005]
   a) Vehicular traffic shall be one way, in the direction of the closest lanes on the abutting R-O-W; [Ord. 2010-005]
   b) The street shall be a minimum of 12 feet wide, or as required by the County Engineer; [Ord. 2010-005]
   c) Vehicle stacking and interaction with any access points shall be as required by the County Engineer; and, [Ord. 2010-005]
   d) On-street parking shall only be required on one side of the street. [Ord. 2010-005]

4) Alleys
Alleys shall not be permitted from primary streets. Alleys shall conform to the requirements of Article 3.F.2.A.1.e, Alleys. [Ord. 2010-005]

c. Streetscape
Street trees, street lights, sidewalk dimensions, and other pedestrian amenities shall be in accordance with the streetscape standards defined in Article 3.B.15.F.8, Streetscape Standards. [Ord. 2010-005]

4. Interconnectivity Standards
Interconnectivity to adjacent residential parcels is encouraged, but not required. Interconnectivity shall be required to any non-residential development or vacant parcel with a non-residential use, FLU designation, or zoning district abutting an IRO project. In addition, the following shall apply. [Ord. 2010-005]
   a. Street Connections
   Parcels required to or proposing to establish a block structure, shall provide interconnectivity where any new internal intersections abut adjacent parcels. [Ord. 2010-005]
   b. Parallel Alley
   All parcels with frontage on a commercial corridor shall install an alley running parallel to the corridor. The alley shall be generally located along the rear property line, or at a point that allows interconnectivity to shallower abutting lots. Where new blocks are not required or proposed, alleys may be incorporated as drive aisles within parking lots. In the event the adjacent parcel is undeveloped, a stub out shall be provided to accommodate future connections. [Ord. 2010-005]
   c. Gates
   The use of gates or other similar barriers is prohibited. Exceptions are permitted for the following: dumpsters, loading areas, and private garages or parking lots. [Ord. 2010-005]
   d. Cross Access Agreement
   Where interconnectivity is required, an irrevocable cross access easement shall be provided prior to final DRO plan approval. [Ord. 2010-005]

5. Transect Zone Standards
Transect zone boundaries shall follow proposed lot lines or be clearly dimensioned for parcels developed under one entity. No land may be assigned two or more transect zones.

Overall parcel size, dimensions, R-O-W frontages, and other abutting parcel uses or FLU designations dictate the type and location of allowable TZs, with the most intense being located along commercial corridors or where adjacent to similar IRO projects, commercial, or industrial uses, transitioning to the least intense where needed to address the context of adjacent uses. [Ord. 2010-005]
a. General Standards
The following general standards shall be followed when assigning TZs: [Ord. 2010-005]
1) The Core TZ should be located adjacent to busy highways, Arterials, or Collectors; [Ord. 2010-005]
2) Changes in TZs should generally occur at the rear of buildings or lots, rather than along streets, with exception to the Open Space TZ; [Ord. 2010-005]
3) The Open Space TZ may face other TZs across streets. When the Open Space TZ is used to designate a public open space within the proposed development, it should be surrounded by streets on one or more sides; [Ord. 2010-005]
4) When a parcel adjoins existing or approved development, either a similar transect zone or a zone that establishes a compatible transition shall be assigned. [Ord. 2010-005]

b. Minimum Standards
The following Table establishes minimum standards for assigning each of the four TZs: [Ord. 2010-005]

Table 3.B.15.F – IRO TZ Standards

[Ord. 2010-005]

Notes:
✓ Means applicable or permitted. [Ord. 2010-005]
1. Maximum Core TZ may be increased up to 95 percent, and minimum General TZ may be reduced commensurately, where parcel is abutting on all sides by Arterials, Collectors, and commercial or industrial parcels up to a depth of a minimum of 200 feet from the property line. [Ord. 2010-005]
2. See Art. 3.B.15. L, for minimum “Usable Open Space” requirements. [Ord. 2010-005]
3. General TZ shall be exempt from Arterial or Collector requirement when a Core TZ is used, or where an eligible parcel only fronts on a Local Commercial Street. [Ord. 2010-005]
4. General TZ frontage only permitted for parcels less than one acre in size. [Ord. 2010-005]
5. Includes any access way meeting IRO street standards. [Ord. 2010-005]

6. Building Standards
The provisions of this Section shall be applied in conjunction with any other applicable ULDC standards or limitations for buildings, unless stated expressly herein. [Ord. 2010-005]

a. Building Placement
Table 3.B.15.F. Block Dimension Requirements, provides the dimensional requirements for building placement for IRO projects. All building types excluding outdoor uses and related structures, shall comply with the following: [Ord. 2010-005]

1) Corners
Where a parcel is located at the intersection of two streets, at least one building shall be placed so as to meet the build-to-lines for both streets. [Ord. 2010-005]

2) Building Hierarchy
Building placement shall follow an established order, with initial buildings required to meet minimum placement and frontage requirements along the most intense perimeter streets. Additional buildings may be located on interior main streets, but shall be ordered so as to create a consistent streetscape. [Ord. 2010-005]
b. Building Property Development Regulations

The primary façade of all buildings shall front a street and shall be designed in compliance with the following. [Ord. 2010-005]

1) Perimeter Street Building Frontage

   Building frontage is the percentage of the total width of a lot which is required to be occupied by the primary façade of a building. [Ord. 2010-005]

   a) The primary façade shall be parallel to a street, and located in accordance with the build-to-line requirements of the street type. [Ord. 2010-005]

   b) Frontage requirements must be addressed for the most intense perimeter streets first. [Ord. 2010-005]

2) Perimeter Frontage Exceptions

   Once the frontage requirement has been addressed for the most intense perimeter street, exceptions for other perimeter streets shall be permitted where insufficient building intensity is proposed or for less intense side streets. Frontage requirements may be reduced for lots with no rear or side access to required parking as necessary to accommodate a drive aisle for ingress/egress. [Ord. 2010-005]

3) Internal Building Frontage

   Internal buildings shall only be permitted when located fronting a primary street, unless exempted herein. [Ord. 2010-005]

4) Setback Measurement

   Setbacks shall be in accordance with Table 3.B.15.F, Block Building Configuration PDRs, and the following: [Ord. 2010-005]

   a) Perimeter Frontage

      Setbacks shall be measured from the edge of ultimate R-O-W, or from the property line, whichever is applicable. [Ord. 2010-005]

   b) Internal Frontage

      Setbacks shall be measured from the proposed building frontage façade to the outside edge of curb. [Ord. 2010-005]

   c) Townhouses

      For the purposes of Townhouse units, building placement setbacks shall be used to establish the location of Townhouse lots. Additional Townhouse building setbacks may be permitted. This may also be applied to Multifamily buildings that are constructed to Townhouse standards. [Ord. 2010-005]

   d) Side Setback Reduction

      Where permitted, buildings permitted to use a zero side setback reduction shall comply with the following: [Ord. 2010-005]

      1) No windows, doors, or other openings are permitted. No portion of a building, including roof eaves, gutters, and soffits may encroach onto adjacent parcels; [Ord. 2010-005]

      2) No form of opening, attachment, or any item or method of construction requiring maintenance other than cleaning and painting, when visible, shall be permitted; [Ord. 2010-005]

      3) A maintenance easement is granted allowing for a minimum of two feet for access to any portion of the building left exposed; and, [Ord. 2010-005]

      4) Height shall be limited to two stories and maximum of 30 feet. Additional height may be permitted subject to the standard setback and any other setback requirements. [Ord. 2010-005]

[Ord. 2010-005]

**Notes:**

1. Required maximum build-to-line may be increased, where necessary, to accommodate utility easements, landscape buffer, slip street, safe sight distance, corner clips, or other similar need as may be required by the County Engineer. [Ord. 2010-005] [Ord. 2018-002]
2. May be reduced to zero feet where in compliance with provisions for side setback reduction. [Ord. 2010-005]
3. Shall be exempt for parcels eligible to use parking drive aisles to comply with alley requirements. [Ord. 2010-005]
4. Percentage shall be based upon length of applicable property line. Where multiple buildings are proposed, the applicable length shall be the result of the overall length divided by the number buildings. [Ord. 2010-005]
5. Maximum pedestrian pass thru requirement does not apply for buildings with a length of 300 feet or less. [Ord. 2010-005]
6. Means adjacent residential parcels that are not located within a development using IRO regulations. [Ord. 2010-005]

[Ord. 2010-005]

Notes

1. Required maximum build-to-line may be increased, where necessary, to accommodate utility easements, landscape buffer, slip street, safe sight distance, corner clips, or other similar need as may be required by the County Engineer. [Ord. 2010-005] [Ord. 2018-002]
2. May be reduced to zero feet where in compliance with provisions for side setback reduction. [Ord. 2010-005]
3. Shall be exempt for parcels eligible to use parking drive aisles to comply with alley requirements. [Ord. 2010-005]
4. Percentage shall be based upon length of applicable property line. Where multiple buildings are proposed, the applicable length shall be the result of the overall length divided by the number buildings. [Ord. 2010-005]
5. Maximum pedestrian pass thru requirement does not apply for buildings with a length of 300 feet or less. [Ord. 2010-005]
6. Liner dimensions shall apply to all façades used to conceal a large footprint tenant that front a perimeter-street, slip street, primary street, and usable open space. Additional standards may apply to parking garage structures. [Ord. 2010-005]
7. Means adjacent residential parcels that are not located within a development using IRO regulations. [Ord. 2010-005]

Notes:
1. Required maximum build-to-line may be increased, where necessary, to accommodate utility easements, landscape buffer, slip street, safe sight distance, corner clips, or other similar need as may be required by the County Engineer. [Ord. 2010-005] [Ord. 2018-002]
2. Percentage shall be based upon length of applicable property line. Where multiple buildings are proposed, the applicable length shall be the result of the overall length divided by the number buildings. [Ord. 2010-005]
3. Townhouses, including wings, garages, or Accessory Quarters shall comply with minimum common wall requirements unless set back from the side PL a minimum of five feet and, shall comply with Art. 3.D.2.C.8, Prohibited Openings and Attachments except for any first floor that is set back a minimum of ten feet from the PL. [Ord. 2010-005] [Ord. 2017-007]
4. Means adjacent residential parcels that are not located within a development using IRO regulations. [Ord. 2010-005]

c. Building Type by Transect Zone

The implementation of the transect zones includes identifying the placement of buildings by type so as to allow for the proper location of higher intensity uses while ensuring consistency with the context of less intensive neighboring uses, where applicable. [Ord. 2010-005]

Table 3.B.15.F – Building Type by Transect Zone

Notes:
✓ Means applicable or permitted.
1. Building type may be permitted where located a minimum of 200 feet from adjacent parcels with residential FLU designation or uses.

d. Special Building Standards

1) Pedestal Building

The following standards shall apply where any building exceeds either four stories or 48 feet in height. [Ord. 2010-005]

a) A horizontal recess line of at least 15 feet is required along at least 50 percent of building façades facing streets; and [Ord. 2010-005]

b) Massing is regulated using a percentage of maximum size of the floor footprint of the building footprint per each story above the height limit threshold. All additional construction above this threshold shall be limited to 65 percent of the first floor footprint, as follows: [Ord. 2010-005]
(1) The main volume of the building shall be oriented toward perimeter or primary streets, away from side or rear lot lines to reduce impact on adjacent properties; [Ord. 2010-005]

(2) Tower elements shall be located to appropriately respond to the condition of the site. Desirable tower locations emphasize street corners, main building entrances, gateways, or the visual axis of another street or usable open space; and, [Ord. 2010-005]

(3) Massing articulation shall not wholly occur within the center of the block and must be evident on the street façade(s) using architectural variations such as changes in the number of stories, articulations in the eave or roofline, or adjusting the location of the front façade to accommodate civic open space. [Ord. 2010-005]

2) Civic Building
An Applicant for a civic building may apply any one or combination of block, liner or courtyard building type, or apply for a Type 1 Waiver in accordance with Table 3.B.15.G, Type 1 Waivers. [Ord. 2010-005] [Ord. 2012-027]

e. Additional Building Standards
Additional building standards are established to provide design standards to facilitate pedestrian access and circulation. [Ord. 2010-005]

1) Primary Entrances
The primary entrance for all first floor tenants must directly face a street, or a courtyard, plaza, square or other form of usable open space facing a street. Access for tenants located on upper floors shall provide similar entrances, but may be permitted to deviate from this requirement on sites less than one acre in size. In either situation, street access may be in the form of common lobbies, elevators, stairwells, or other form of consolidated access. There are no limits on the allowable number of primary entrances. [Ord. 2010-005]

2) Secondary Entrances
Each tenant may be permitted to have additional entrances located at side or rear façades facing a parking lot or other area, subject to the following limitations: [Ord. 2010-005]
   a) Shall not exceed the number of primary entrances. [Ord. 2010-005]
   b) Limitations shall not apply to service access or emergency exits. [Ord. 2010-005]

3) Windows on Façades Facing Streets
Non-residential and Multifamily building façades facing perimeter and primary streets or usable open space must have transparent windows covering between 35 to 75 percent of the wall area of each story as measured between finished floors, to allow transmission of visible daylight. [Ord. 2010-005]

4) Outdoor Uses
Additional standards are established for non-residential outdoor uses, excluding passive recreation areas or other similar uses, to ensure compatibility with the streetscape, usable open space areas, and any abutting residential uses or parcels with a residential FLU designation. [Ord. 2010-005]

a) Residential Setbacks
Outdoor uses shall be set back a minimum of 200 feet from any abutting residential use or parcel with a residential Future Land Use designation, unless approved through a Type 2 Waiver process. This shall include vehicular access and parking for vehicular related uses such as gasoline sales, Car Washes, or drive-through facilities. [Ord. 2010-005] [Ord. 2018-002]

b) Screening
Outdoor uses shall be framed by either of the following, or a combination of both: [Ord. 2010-005]
   (1) Buildings or similar structures on all four sides; or [Ord. 2010-005]
   (2) A five-foot-wide landscape strip that includes a 30-inch-high hedge or concrete street wall, with multi-trunk or flowering trees planted 30 feet on center. Breaks to allow for pedestrian access shall be permitted. [Ord. 2010-005]

c) Drive-Through and Gasoline Service Location
A minimum of 50 percent of all drive-through lanes and gasoline service areas, inclusive of pump islands, canopies, and queuing areas shall be located behind buildings that comply with minimum frontage standards, and shall be consistent with Figure 3.B.15.F, Typical Gasoline Service Facilities and Figure 3.B.15.F, Typical Drive-Through Configurations. [Ord. 2010-005]
d) **Drive-Through Facility Exception**

Exceptions shall be permitted for drive-through facilities that are located inside a building or side façade where vehicular traffic exits onto a Type 1 R-O-W, subject to approval by the County Engineer, where designed similar to Figure 3.B.15.F, Typical Drive-Through Configurations. [Ord. 2010-005]

5) **Building Elevations, Height, and Use by Floor**

The following Tables establish regulations for building height and building encroachment in each TZ to address compatibility and visual impact issues. [Ord. 2010-005]

Notes:
- ✓ Means applicable or permitted.
- 1. Encroachment for stoop or front porch shall not impede required streetscape sidewalk area or be located within five feet of the streetscape street tree planting area. [Ord. 2010-005]
- 2. Shall only be permitted where uses on the seconds floor or higher is limited to residential. [Ord. 2010-005]
- 3. Allowances shall be permitted for single floor units located on the first floor to accommodate ADA requirements. [Ord. 2010-005]

### 7. Use Standards

The standards of the IRO allow only those uses that have been indicated on a DRO approved FSP or FSBP to be eligible to apply for Building Permits or a Business Tax Receipt (BTR). Where permitted, uses may also be further restricted by TZ, building type and number or floor location. [Ord. 2010-005]

**a. Permitted Uses**

See Art. 4, Use Regulations. [Ord. 2010-005] [Ord. 2017-007]

**b. Accessory Uses**

Accessory uses shall be permitted in accordance with Art. 5.B, Accessory Uses and Structures. Any proposed use that exceeds the limitations of an accessory use shall only be permitted if allowed above and where in compliance with the requirements of this Code. [Ord. 2010-005]

### 8. Streetscape Standards

Streetscape standards are established to improve both the physical and visual appearance of the streetscape while creating a pedestrian friendly environment along commercial corridors, other perimeter street frontages, and for any new internal streets. [Ord. 2010-005]

**a. General Standards**

The following standards shall apply to all streetscapes. [Ord. 2010-005]

1. Required buffer areas or street trees shall be located between streets and pedestrian sidewalks and other hardscaped areas; [Ord. 2010-005]

2. Required pedestrian sidewalks shall be free and clear of all encumbrances; [Ord. 2010-005]

3. All paving materials for the pedestrian sidewalks shall be compliant with ADA accessibility standards, and shall be constructed of concrete acceptable to the Engineering Department; [Ord. 2010-005]

4. Consistency in paving pattern and materials for streetscapes are required for all individual projects, and are encouraged for abutting IRO projects. The first application for an IRO of a commercial corridor or a block shall establish the paving pattern. [Ord. 2010-005]

5. Where a sidewalk or a path crosses curb cuts at ingress/egress points and internal drives, the pedestrian crossing shall be paved with a material that provides a different texture or a color contrast with the vehicular surface, but preferably consistent with the paving material of the path; [Ord. 2010-005]
6) Where a street tree planting area is required, area may be landscaped with appropriate ground cover; however, Applicants are encouraged to install required trees in tree grates with appropriate root barrier or other similar structures to promote tree growth, and areas in between may be hardscaped; [Ord. 2010-005]

7) Consistency in street tree species shall be encouraged within a block, if applicable, and shall be reflective of the character of the surrounding area. The first application for an IRO of a commercial corridor or a block shall establish preferred species. [Ord. 2010-005]

8) Streetscape shall be provided along both sides of primary and secondary streets; [Ord. 2010-005]

9) Where applicable, sidewalks located within a perimeter R-O-W may be incorporated into the streetscape requirements of this Section, subject to a sidewalk easement agreement with the DEPW; and, [Ord. 2010-005]

10) Where an existing or proposed utility easement is located adjacent to subject roadways, streetscape requirements shall be applied from the inner edge of the utility easement, and shall be landscaped with appropriate groundcover, with exception to the following: [Ord. 2010-005]
   a) Applicants are encouraged to improve utility easement areas with improved surfacing or landscaping to be consistent with required streetscape areas; [Ord. 2010-005]
   b) Utility easements may encroach into required streetscape areas up to a maximum of five feet, subject to Engineering approval and consent from easement holder; and, [Ord. 2010-005]
   c) Street trees may be located in utility easements subject to use of tree root barrier approved by County Landscape and easement holder. [Ord. 2010-005]

b. Design Standards

The IRO establishes three general forms of streetscape configurations, as follows: enhanced sidewalk, buffered sidewalk, and slip street. While the enhanced sidewalk may be applicable to both perimeter and internal streets, the remaining two are generally limited to commercial corridors or other perimeter streets. The Applicant may choose one of the streetscape configurations to use; however, the streetscape design should be consistent with the surrounding character. [Ord. 2010-005]

1) Enhanced Sidewalk

The enhanced sidewalk streetscape option establishes a continuous sidewalk with regularly spaced shade trees along the street. [Ord. 2010-005]
   a) The street tree planting area shall be a minimum of five feet in width; [Ord. 2010-005]
   b) The pedestrian sidewalk area shall be a minimum of six feet in width, and shall be free and clear of any obstructions or uses. Width may be reduced to five feet where abutting a Type 3 R-O-W or secondary street. [Ord. 2010-005]
   c) Street trees shall be installed in accordance with Art. 3.F.2.A.4.d, Street Trees, except that exceptions to tree spacing may be permitted where necessary to accommodate bisecting utility easements, or other similar improvements; [Ord. 2010-005]
   d) Street lights shall be required for all perimeter and internal streets in accordance with Art. 3.F.2.A.1.f.2), TDD Street Lighting; [Ord. 2010-005]
   e) Any areas remaining between required street tree and pedestrian sidewalk area and building frontages shall be improved with additional pedestrian sidewalk area, or other decorative pavement treatment to be used as outdoor dining areas, usable open space, or to encourage a pedestrian interface display windows, where applicable; [Ord. 2010-005]
   f) Decorative planter boxes or potted trees may be located within two feet of building frontages, provided they do not screen views to building windows or doors, or adversely impact pedestrian use areas; [Ord. 2010-005]
   g) No temporary or permanent physical structures may be affixed to building frontages in the streetscape so as to preclude views of windows or doorways; and, [Ord. 2010-005]
   h) A minimum of 75 percent of buildings fronting on a Type 2 or 3 R-O-W, primary or slip street shall have arcaded sidewalks or other architectural element that provides shade to pedestrians, such as permanent canopies and awnings. [Ord. 2010-005]
2) Buffered Sidewalk
The buffered sidewalk streetscape option is similar to the enhanced sidewalk option, except that the street tree planting area is replaced with a wider planting area to provide additional buffering between streets and pedestrian areas. The following Table shows dimensional standards for planting areas based on perimeter street type. [Ord. 2010-005]

<table>
<thead>
<tr>
<th>Width of R-O-W</th>
<th>Planting Area Width</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Minimum</td>
</tr>
<tr>
<td>Type 1 R-O-W</td>
<td>5 feet</td>
</tr>
<tr>
<td>Type 2 R-O-W</td>
<td>8 feet</td>
</tr>
<tr>
<td>Type 3 R-O-W</td>
<td>10 feet</td>
</tr>
</tbody>
</table>

[Ord. 2010-005]
a) The planting area shall not be paved, except that paved access shall be provided to crosswalks and transit stops; [Ord. 2010-005]
b) One Canopy tree for each 25 feet of the property's frontage shall be provided. Trees may be installed in a formal, uniform spacing or may be arranged within the planting area in informal clusters so long as the required quantity is satisfied; [Ord. 2010-005]
c) In addition to the required Canopy trees, flowering trees, palms, shrub layers, grass, and groundcovers shall be required to provide design variations and colors. Quantity of plant materials shall be established depending on the width of the Planting Area, and shall be calculated in compliance with Art. 7, Landscaping; [Ord. 2010-005]
d) Grass shall be permitted; however, groundcover shall be encouraged as a substitute for grass for water conservation and maintenance purposes; [Ord. 2010-005]
e) Berms shall only be permitted in order to create a streetscape with an informal, naturalistic design; [Ord. 2010-005]
f) Meandering pedestrian walkways are encouraged to be incorporated into larger sidewalk buffer planting areas; and, [Ord. 2010-005]
g) All other requirements shall be in compliance with the enhanced sidewalk defined above, with exception to street tree planting requirements. [Ord. 2010-005]
3) **Slip Street**

Slip street streetscape shall be required for any proposed slip streets, and shall be designed as follows: [Ord. 2010-005]

a) A landscape planting area shall be required between a perimeter R-O-W and the slip street ranging from ten to 15 feet in width. Additional width may be permitted to accommodate utility easements or Engineering requirements, but shall not be increased otherwise. Area shall be hardscaped or covered with appropriate ground cover. [Ord. 2010-005]

b) Street trees shall be planted in the landscape area in accordance with Art. 3.F.2.A.4.d, **Street Trees**, but shall be generally consistent with the tree species and spacing provided in the enhanced sidewalk area; and, [Ord. 2010-005]

c) All other requirements shall be in compliance with enhanced sidewalk, where applicable. [Ord. 2010-005]
9. Usable Open Space
A minimum of five percent of the gross acreage of the project shall be dedicated or provided as usable open space. Plazas or squares that provide a concentrated focal point for pedestrians shall be the preferred method for providing usable open space, but credit may be given for required pedestrian streetscapes or other similar usable open space amenities. All usable open space areas shall meet the minimum dimensions provided under Table 3.B.15.F, Dimensions for Usable Open Space, unless exempted otherwise herein. [Ord. 2010-005]

a. Required Plazas and Squares
Projects ten acres or more shall provide at least one central plaza, square, or other similarly dimensioned usable open space area.

Table 3.B.15.F – Dimensions for Usable Open Space

</tr>
<tr>
<td>Other Plazas or Square</td>
<td>5,000 sq. ft.</td>
<td>60’</td>
<td>40’</td>
</tr>
</tbody>
</table>

b. Streetscape Credit
Projects that have net land areas of less than two and one-half acres in size may count all streetscape areas towards the usable open space requirement. All others may count up to 50 percent of streetscape areas towards usable open space requirements. [Ord. 2010-005]

c. Street Frontage
Minimum required usable open space shall front on a perimeter or primary street on at least one side. [Ord. 2010-005]

d. Shade
A minimum of 15 percent of each plaza, square, or other usable open space area shall be shaded by landscape material or shade structures at time of construction. Where applied to streetscape galleries, awnings or other building amenities may be counted towards shade requirement. A minimum of 30 percent of the total square footage shall be pervious. [Ord. 2010-005]

e. Pervious Areas and Landscaping
A minimum of 30 percent of all usable open space areas, excluding streetscape where applicable, shall be pervious, and covered with appropriate ground cover in accordance with Art. 7, Landscaping. [Ord. 2010-005]

f. Pedestrian Amenities
Required usable open space areas shall have a minimum of one linear foot of seating for each 200 square feet of overall area. [Ord. 2010-005]

10. Parking and Loading Standards
Parking and loading shall comply with Art. 6, Parking, Loading, and Circulation, unless otherwise stated below: [Ord. 2010-005]

a. Location and Access
Parking and service areas shall be located at the side or rear of building(s) in accordance with Table 3.B.15.F, Parking Location, except for slip streets. The most intense street shall be considered the frontage for corner lots. These standards provide flexibility in dimensional and layout requirements to address site restrictions, and provide for reductions in the number of required on-site parking spaces for sites that are located in close proximity to public transit, or have a potential for interconnectivity and shared parking areas between contiguous developments. [Ord. 2010-005]

[Ord. 2010-005]

Notes:
1. On-street parking only, with additional located in parking lots. [Ord. 2010-005]
2. Exceptions may be permitted for parking courts located internal to a development where all building placement standards have been addressed. [Ord. 2010-005]
3. On-street parking only, including slip streets where applicable. [Ord. 2010-005]
1) **On-Street Parking**
Parking in front of buildings shall only be permitted where on-street parking is allowed. [Ord. 2010-005]

2) **Parking Lots**
It is the intent that parking lots shall be screened from all streets. The perimeter of parking lots shall be framed by either of the following, or a combination of both: [Ord. 2010-005]
   a) Buildings; or [Ord. 2010-005]
   b) A five-foot-wide landscape strip that includes a minimum 30-inch-high hedge or concrete Street Wall, with Canopy trees planted 30 feet on center. Breaks to allow for pedestrian access shall be permitted. [Ord. 2010-005]
   c) Alternatively, there shall be no required separation between parking and parallel alleys for any project that does not have streets or blocks, and alleys may be incorporated into parking lots as standard drive aisles. [Ord. 2010-005]

---

### Figure 3.B.15.F – Typical Parking Location and Access

![Preferred Alley Access](Preferred_Avenue.png)

![Side Street Access](Side_Street.png)

![Small Mid-Block Parcel Access](Small_Mid-Block_Parcel.png)

---

3) **Parking Structures**
Parking for any use in excess of six spaces per 1,000 square feet of non-residential floor area shall be located in a parking structure configured as a liner building, subject to the following: [Ord. 2010-005]
   a) When fronting perimeter and primary streets, usable open space, or other similar areas, shall comply with liner building PDRs; or [Ord. 2010-005]
   b) When fronting secondary streets, alleys, parking lots, or other similar areas, shall be screened by a façade that incorporates landscaping or architectural features consistent with the Primary Frontage, or any combination. [Ord. 2010-005]

4) **Townhouse Parking**
The requirements for Townhouse parking may also be applied to Multifamily buildings that are designed to appear and function as Townhouses. Individual parking spaces or garages shall be permitted to the rear of Townhouses, with access from an alley or street. Garage setbacks shall be in accordance with PDRs for Townhouse buildings. [Ord. 2010-005]

5) **Service and Loading Areas**
All service and loading areas shall be located along the rear or side of buildings, and shall not be visible from perimeter or primary streets, or any usable open space. The service areas shall be located within the footprint of the building or immediately adjacent to the building. Required loading space areas may be waived, reduced in number or dimension, in accordance with Art. 6.E., Loading Standards, or by IRO Waivers. [Ord. 2010-005]

---

b. **Parking Ratios**
The required number of parking spaces shall correspond to broad uses and not to a specific use, and shall be responsive to the long-term transition of tenants within a non-residential or mixed use development. The Applicant may choose from the following parking requirements: [Ord. 2010-005]

1) **Non-Residential**
   a) Minimum: one space per 333 square feet of GFA (3/1,000); [Ord. 2010-005]
   b) Maximum: one space per 200 square feet of GFA (5/1,000), unless parking is accommodated in a parking structure; [Ord. 2010-005]
   c) Where uses are not intended to allow for transition to other uses, the general parking standards outlined in Art. 6., Parking, Loading, and Circulation may be applied, provided that use limitations are identified on the DRO approved Site Plan; [Ord. 2010-005]
Article 3 – Overlays and Zoning Districts

11. Landscape Standards

Perimeter Buffers

1) Streetscape Exemptions

Required landscape perimeter buffers pursuant to Art. 7, Landscaping shall not be required where an IRO streetscape is required. [Ord. 2010-005]

2) Compatibility Buffers

A side interior Compatibility Buffer shall not be required when a zero side setback is proposed or exists. [Ord. 2010-005]

3) Alternative Incompatibility Buffer Option

The following Incompatibility Buffer option may be utilized where projects are in compliance with minimum setbacks for non-residential outdoor use areas: [Ord. 2010-005]

a) Landscape buffer planting area shall be a minimum of ten feet in width; [Ord. 2010-005]

b) No easement encroachment shall be permitted; [Ord. 2010-005]

c) An eight-foot-tall solid concrete block or panel wall shall be installed along the affected property line, with a setback a minimum of two feet to allow for maintenance of the exterior side of the wall. Setback may be increased as needed to accommodate required footers; [Ord. 2010-005]

d) The required wall shall be constructed of materials and with a design consistent with the principal building of the IRO, and shall have the same architectural finish treatment and color on both sides of the wall. [Ord. 2010-005]

e) Exterior landscape areas shall have groundcover that is low maintenance and does not impede necessary access for maintenance; [Ord. 2010-005]

f) Canopy trees shall be planted along the internal side of the wall to be spaced a minimum of 20 feet on center; [Ord. 2010-005]

g) A hedge shall be installed in accordance with the standards for medium shrubs, as specified in Table 7.D.3.A, Shrub Planting Requirements. [Ord. 2010-005]

b) Foundation Planting

Foundation planting requirements may be subject to the exemptions, exceptions, and deviations as permitted for WCRAO projects, as indicated in Art. 3.B.14.J.1.b, Foundation Planting Deviations. [Ord. 2010-005]

c) Alternative Parking Lot Design Options

This Section allows alternative parking lot designs through modifications to Art. 7.C.4. Landscape Requirements for On-Site Parking to promote innovative design or use of green building materials. The following may be used individually or in combination, unless stated otherwise: [Ord. 2010-005]

1) Option 1

Projects that are one-half acre or less in size, with 20 or fewer parking spaces may consolidate all required landscape island areas and planting materials into one or more locations anywhere within the project; [Ord. 2010-005] [Ord. 2014-025] [Ord. 2018-002]

2) Option 2

Projects that are two acres or less in size may reduce required landscape island width to a minimum of five feet in width of landscape area. This option may not be used in conjunction with any option relocating these landscape areas; [Ord. 2010-005] [Ord. 2014-025] [Ord. 2018-002]

d) Reduction in required parking through use of a shared parking study, as defined in Art. 6, Parking, Loading, and Circulation; or, [Ord. 2010-005]

e) Where eligible, Applicant may receive credit for any perimeter on-street parking spaces located along Type 1 streets, subject to approval by the County Engineer. Use of this option may be limited to where the developer pays for required improvements to existing Type 1 streets. [Ord. 2010-005]

2) Residential

Multifamily residential parking ratios may be reduced in accordance with Table 3.B.14.I, WCRAO Mixed Use and Residential Parking Deviations. [Ord. 2010-005]
3) **Option 3**
Landscape shrub or groundcover requirements for landscape islands and divider median islands may be replaced with bio-swales and appropriate landscaping, provided that required Canopy trees can be accommodated. Alterations to required curbing may be permitted subject to demonstration that vegetated areas are protected from vehicles; [Ord. 2010-005] [Ord. 2014-025] [Ord. 2018-002]

4) **Option 4**
Up to a maximum of 25 percent of required landscape islands and divider median landscape islands shall not be required provided that covered parking that utilizes appropriate solar reflectance index (SRI) materials are installed where islands are removed; [Ord. 2010-005] [Ord. 2014-025] [Ord. 2018-002]

5) **Option 5**
Landscape shrub or groundcover requirements for terminal, interior, and divider median landscape areas shall not be required, subject to the following: [Ord. 2010-005] [Ord. 2014-025]
   a) The number of required terminal, interior, and divider median trees are doubled; and [Ord. 2010-005] [Ord. 2014-025]
   b) Green building standards for tree wells and related root growth areas are utilized; [Ord. 2010-005]

6) **Option 6**
No landscape islands are required if parking spaces are abutting landscape buffers, Street Walls, or tree planting areas. [Ord. 2010-005] [Ord. 2014-025] [Ord. 2018-002]

d. **Rear or Side Entrances**
Buildings with additional entrances located on the side or rear façades shall either provide an enhanced streetscape between any abutting parking lots that meets the standards for a primary street; or shall provide foundation planting along a minimum of 50 percent of the applicable façade, with a minimum depth of five feet, to be planted in accordance with Art. 7, Landscaping, with a sidewalk a minimum of five feet in width as needed to separate pedestrians from abutting vehicle use areas along the building façade. [Ord. 2010-005]
G. Type 1 Waivers
The Applicant may apply for Type 1 Waivers for development standards in accordance with Art. 2.C.5.F, Type 1 Waiver and Table 3.B.15.G, Type 1 Waivers. The following Table summarizes the IRO development requirements eligible for the Type 1 Waiver process: [Ord. 2010-005] [Ord. 2011-016] [Ord. 2012-027]

<table>

[Ord. 2010-005] [Ord. 2012-027] [Ord. 2017-007] [Ord. 2017-007]
Section 16 Urban Redevelopment Area Overlay (URAO)

A. Purpose and Intent

The purpose and intent of the Urban Redevelopment Area Overlay (URAO) is as follows: [Ord. 2010-022]

1. Implement the concepts of the July 2007 Palm Beach County Urban Redevelopment Area Planning Study and Corridor Master Plan, prepared by the Treasure Coast Regional Planning Council, inclusive of the 2009 Planning Division addendum, and the 2016 amendments to the Plan (Ord. 2016-037), URA Alternative Revisions. [Ord. 2010-022] [Ord. 2017-002]

2. Implement the Urban Redevelopment Area (URA) Objectives and Policies of the Plan, with an emphasis on Priority Redevelopment Area (PRA) Policies; [Ord. 2010-022]

3. Utilize Smart Growth and Form Based Coding principles to establish standards that create a predictable regulatory framework and built form that improves the aesthetics of the streetscape and establishes, enhances the pedestrian realm, and encourages redevelopment of the PRAs; [Ord. 2010-022]

4. Encourage a compact, mixed use, and walkable development form, with an emphasis on safety, comfort, and ecological responsibility; [Ord. 2010-022]

5. Create an interconnected pedestrian friendly street network that establishes parallel, alternate vehicular routes between the PRAs and creates new blocks that are a walkable scale; [Ord. 2010-022]

6. Advocate walking, cycling, mass transit, or other modes of transportation as viable alternatives to automobile use by encouraging the development of commercial, civic, and recreational uses that provide for the daily needs of residents within walking distance; [Ord. 2010-022]

7. Promote mixed use development that balances housing with employment, commercial, and civic uses; [Ord. 2010-022]

8. Provide a variety of housing types to support residents of diverse ages, incomes, family sizes, ethnicities, and lifestyles; [Ord. 2010-022]

9. Promote sustainability by integrating the social, economic, and ecological needs of the community with overall regional, State, and national policy advocating management of resources for future generations; [Ord. 2010-022]

10. Redevelop retail uses along the PRA corridors along stipulated street frontages; [Ord. 2010-022] [Ord. 2011-016]

11. Simplify and facilitate the permitting process; and, [Ord. 2010-022] [Ord. 2011-016]

12. To encourage redevelopment and revitalization of commercial corridors by establishing standards that recognize various opportunities, challenges, and constraints. Certain standards may be altered through a Waiver process. [Ord. 2011-016]

B. Applicability

1. Interconnectivity

Any Development Order within the boundaries of the URAO shall be subject to the requirements of Art. 3.B.16.F.5, Interconnectivity Standards. [Ord. 2011-016]

2. Priority Redevelopment Areas (PRAs)

Any application for a Development Order or change in use for parcels with an Urban Center (UC) or Urban Infill (UI) FLU designation shall comply with all URAO requirements, unless permitted otherwise under Art. 1.E, Prior Approvals, Art. 1.F, Nonconformities, or any other provisions herein. [Ord. 2011-016]

3. Boundaries

The exact boundaries of the URA are depicted in Map LU 3.1 of the Plan, but can be generally described as being bound by Community Drive to the north, the Lake Worth Drainage District L-14 Canal to the south, I-95 to the east, and extending as far west as Jog Road at some points. The UC and UI parcels are located within the Priority Redevelopment Area, generally located along the east and west sides of Military Trail and Congress Avenue and bordered by Southern Boulevard to the north and extend as far south as the Lake Worth Drainage District L-8 Canal. Additional locations are along Lake Worth Road and 10th Avenue North. The PRA boundaries are depicted in Maps LU 9.1 and 9.2 of the Plan. [Ord. 2010-022] [Ord. 2011-016]

4. Other Overlays

Development Orders with UC or UI FLU designation may not be used in conjunction with any other overlays. [Ord. 2010-022] [Ord. 2011-016]
5. **Zoning District Requirements**  
The zoning districts permitted within the PRAs are as follows:

   a. **Urban Center (UC) and Urban Infill (UI)**  
   As of August 2010, all parcels that have a UC or UI FLU designation, were rezoned to the corresponding UC and UI districts (Zoning Applications 2010-00667 and 00668, respectively). Rezoning applications shall only be required for parcels which initially opted out of the PRA and are applying for a concurrent FLU amendment to the UC or UI FLU designation. [Ord. 2010-022] [Ord. 2011-016]

   b. **Alternative Future Land Use and Zoning**  
   On August 22, 2016, the BCC adopted Plan amendments (Ord. No. 2016-037), which may allow flexibility for Property Owners to utilize the FLU designations and zoning districts that were in place prior to the adoption of rezoning to the UC or UI Zoning Districts. [Ord. 2017-002]

      1) **Mandatory Pre-Application Meeting**  
      A Pre-Application meeting with Zoning and Planning staff is required to review any requests for this option, prior to confirmation of eligibility and final determination of the applicable FLU designation and zoning district that may be utilized [Ord. 2017-002]

      2) **Decision**  
      If the alternative zoning district is found to be consistent with the alternative FLU designation, as specified in Art. 3.A.3, Zoning District Consistency with the Future Land Use Atlas (FLUA), then the property may be developed in accordance with the standards for the alternative zoning district. If inconsistent, the Applicant may be required to rezone the property to a consistent zoning district. [Ord. 2017-002]

C. **Future Land Uses and Density/Intensity**  
Deviations from FLU and Density/Intensity requirements shall be prohibited. [Ord. 2010-022] [Ord. 2011-016]

   1. **Density and Intensity**  
   The maximum density and intensity for a PRA Development Order shall only be limited by any applicable site development requirements of this code or the PRA TCEA (TE Policy 1.2-v of the Plan). [Ord. 2010-022] [Ord. 2011-016]

   2. **Density Bonus Program**  
   The use of TDR, AFH, or WHP density bonus incentives are not eligible within the PRAs. [Ord. 2010-022] [Ord. 2011-016]

   3. **Workforce Housing Units**  
   Residential projects comprised of 10 units or more shall comply with Art. 5.G.1, Workforce Housing Program. [Ord. 2010-022] [Ord. 2011-016]

   4. **Mixed Use**  
   Only those projects that are subject to the requirements of the PRA TCEA may be required to develop as mixed use. [Ord. 2010-022]

D. **Application Requirements**

   1. **Pre-Application Conference (PAC)**  
   All PRA applications requiring DRO approval shall require a PAC pursuant to procedures in Art. 2.A.5.A, Pre-Application Conference (PAC), with exception to amendments to prior approvals and nonconformities that do not comply with the provisions of the URAO. [Ord. 2010-022]

   2. **Plan Requirements**  

E. **Additional PRA Use Regulations**

   The list of uses permitted within the URAO shall be in accordance with Art. 4, Use Regulations, and the following. [Ord. 2011-016] [Ord. 2017-007]

   1. **Right to Continue or Change Uses**  
   Those uses that were legally established prior to the adoption of Zoning Resolutions No. R-2010-1344 and R-2010-1345 (Applications 2010-00667 and 2010-00668, UC and UI districts, respectively) shall be permitted to continue in accordance with Art. 1.E, Prior Approvals, or Art. 1.F, Nonconformities. A change in use shall only be permitted if the proposed use complies with all of the following: [Ord. 2011-016]

      a) Listed in the Use Matrices contained in Art. 4, Use Regulations; [Ord. 2011-016] [Ord. 2017-007]
      b) Does not exceed the limitations of Art. 1.F, Nonconformities; [Ord. 2011-016]
      c) Is entirely located within existing buildings; and, [Ord. 2011-016]
      d) Parking is provided in accordance with the minimum parking requirements of Art. 6, Parking, Loading, and Circulation, inclusive of the minimum parking requirements of Table 6.B.1.B, Minimum
Parking and Loading Requirements. Previously approved PDDs may apply any vested parking requirements in accordance with Art. 1.E, Prior Approvals, with exception to applications for Conditional Uses. [Ord. 2011-016]

2. Residential Uses
Residential uses may be allowed on any floor, with exception to the following: [Ord. 2011-016] [Ord. 2017-007]
   a. Where located in the same building as non-residential uses, residential uses shall either be located above or internally separated from any non-residential uses; and [Ord. 2011-016]
   b. Single Family and Type 1 CLF shall not front on Slip Street or Primary Street Frontages. [Ord. 2011-016] [Ord. 2017-007]

3. Outdoor Uses
Additional standards are established for non-residential outdoor uses, excluding passive recreation areas, ATMs, or other similar uses, to ensure compatibility with the streetscape, usable open space areas, and any abutting residential uses or parcels with a residential FLU designation. [Ord. 2010-022] [Ord. 2011-016]
   a. Residential Setbacks
      Outdoor uses shall be set back a minimum of 200 feet from any abutting non-PRA residential use or parcel with a residential Future Land Use designation, unless approved through a Type 2 Waiver. This shall include vehicular access and parking for vehicular related uses such as gasoline sales, Car Washes, or drive-through facilities, but shall not include drive-through facilities for Financial Institutions or ATM lanes. [Ord. 2010-022] [Ord. 2011-016] [Ord. 2018-002]
   b. Screening
      Outdoor uses, excluding uses such as outdoor dining uses in compliance with residential setbacks, walk up restaurant take out windows, shall be screened from all streets by the use of a Street Wall comprised of either or a combination of the following: [Ord. 2010-022] [Ord. 2011-016]
         1) Buildings or similar structures; or [Ord. 2010-022]
         2) A five-foot-wide landscape strip that includes a minimum 30-inch-high hedge or concrete wall, and Canopy, multi-trunk, or flowering trees planted 30 feet on center. Breaks to allow for pedestrian or vehicular access shall be permitted. [Ord. 2010-022] [Ord. 2011-016]
c. Drive-Through Uses and Gasoline Service Facilities
All drive-through lanes and gasoline service areas, inclusive of pump islands, canopies, and queuing areas shall be located behind buildings or the Street Wall screening requirements above, and shall be consistent with Figure 3.B.16.E, Typical Gasoline Service Facilities and Figure 3.B.16.E, Typical Drive-Through Configurations. Exceptions shall be permitted for drive-through facilities that are located inside a building or side façade, subject to approval by the County Engineer, where designed similar to Figure 3.B.16.E, Typical Drive-Through Configurations. [Ord. 2010-022] [Ord. 2011-016]
F. PRA Design and Development Standards

1. PRA Transect Zones (TZ)

Transect Zones are distinct categories that define and organize density and intensity ranging from the most urban to the least urban. The URAO establishes the Urban Center (UC) and Urban Infill (UI) FLU designations for the PRAs, and further refines these designations using Sub-areas as transect zones. Transect zones facilitate the development of urban forms while providing for gradual transitions in building scale and use intensity, rather than rigid distinctions. The default location for the URAO Transect Zones shall be in accordance with the PRA GIS Regulating Plan maintained by PZB. [Ord. 2010-022] [Ord. 2011-016]

a. Urban Center (UC) Sub-area Transects

The UC is designated at prominent intersections and is the most intense PRA district, typically comprised of larger interconnected commercial and buildings containing a wide variety of uses, of at least two stories in height that create a continuous street wall along designated street frontages. A well-balanced mix of residential, commercial, civic, and recreational uses is encouraged, but may also be a requirement of the PRA TCEA. The UC is broken down into three distinct Sub-areas, as follows: [Ord. 2010-022] [Ord. 2011-016]

![Figure 3.B.16.F – PRA Transect Zones and Sub-areas](image)

1) UC 1 Sub-area
The most intense Sub-area accommodates the most intense types of uses and largest building scale permitted in the PRAs. [Ord. 2010-022] [Ord. 2011-016]

2) UC 2 Sub-area
This Sub-area allows for the same intensity of uses, but begins a physical transition to the UC 3 Sub-area. [Ord. 2010-022] [Ord. 2011-016]

3) UC 3 Sub-area
The least intense UC Sub-area intended to provide for a transition between the more intense UC 1 and 2 Sub-areas, and abutting residential neighborhoods or adjacent UI Sub-areas. [Ord. 2010-022] [Ord. 2011-016]

b. Urban Infill (UI) Sub-area Transects

The UI accommodates mixed use redevelopment along the corridors, while providing a transition to the adjacent, existing residential neighborhoods. The UI is broken down into two distinct Sub-areas, as follows: [Ord. 2010-022] [Ord. 2011-016]
1) **UI 1 Sub-area**
   A moderately intense Sub-area accommodating commercial, mixed use, and residential uses. [Ord. 2010-022]

2) **UI 2 Sub-area**
   The least intense UI Sub-area intended to provide for a gradual transition between the UI 1 Sub-area and adjacent residential areas. [Ord. 2010-022] [Ord. 2011-016]

3. **TZ Sub-area Modifications**
   The DRO shall have the authority to allow modifications to the location and boundaries of the default UC or UI Sub-area Transects illustrated in the PRA GIS Regulating Plan, where in compliance with the standards of Table 3.B.16.F, PRA Sub-area Transect Standards. [Ord. 2010-022] [Ord. 2011-016]

### Table 3.B.16.F – PRA Sub-area Transect Standards

</tr>
</tbody>
</table>

[Ord. 2010-022] [Ord. 2011-016]

2. **Access and Lot Frontage**
   Access shall be limited to minimize curb cuts to streets to improve traffic flow and reduce pedestrian-vehicular conflicts. Where available, access from rear alleys is required. [Ord. 2010-022] [Ord. 2011-016]

   a. **External Access**
      One access point shall be permitted for each 160 linear feet of street frontage. Access shall be in the form of a street or alley, unless exempted otherwise herein. [Ord. 2010-022] [Ord. 2011-016]

   b. **Internal Access**
      No more than one access point or alley shall be permitted for each 160 linear feet of street frontage to allow for access to parking and loading, drive-through facilities, or other similar uses. A maximum of two access points shall be permitted per block face. [Ord. 2010-022] [Ord. 2011-016]

   c. **Existing Small Parcel Exception**
      Parcels that existed prior to the adoption of the URAO with less than 160 feet of frontage shall be permitted to establish one access point along a perimeter street. [Ord. 2010-022] [Ord. 2011-016]

3. **Block Standards Design**
   Where applicable, blocks shall be created by utilizing streets and alleys to provide continuous pedestrian and vehicular circulation, interconnectivity and accessibility in PRA projects. Cul-de-sacs and other dead end streets shall not be permitted unless it can be demonstrated that physical constraints prohibit practical alternatives. Any new blocks shall comply with the following: [Ord. 2010-022] [Ord. 2017-002]
a. Applicability
Blocks may be required when subdividing land in order to meet the minimum frontage required for new parcels, or when additional buildings internal to the site must comply with Art. 3.B.16.F.6, Building Standards. [Ord. 2010-022] [Ord. 2017-002]

b. Minimum Dimensions

<table>
<thead>
<tr>
<th>Transect Zone</th>

</tr>
<tr>
<td>UI</td>
<td>1,200-1,500 feet</td>
<td>1,800 feet</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Notes:
1. Exceptions may be permitted only where PBC DEPW requirements preclude required vehicular access points necessary to complete the block structure.

Figure 3.B.16.F – Typical Example of PRA Blocks, Streets, and Subdivision

4. Frontage Classifications and Street Standards
This code addresses the design of perimeter and internal streets and establishes related standards to ensure that pedestrian amenities and walkways, buildings and other improvements are properly and safely situated. [Ord. 2010-022] [Ord. 2011-016]

a. Frontage Classifications
Frontage classifications define the details of the pedestrian realm located between the public R-O-W or internal streets and the building façade. Three frontage types are established, as follows: Slip Street, Primary, and Secondary. The default location for the PRA Frontage Types shall be in

1) Slip Street Frontage
The Slip Street is an optional designation for areas that were determined to have sufficient depth to accommodate landscaping along the existing thoroughfare, a one-way vehicular lane, a parallel parking lane, and a wide pedestrian zone. [Ord. 2010-022] [Ord. 2011-016]

a) Applicability
(1) The parcel, or group of parcels, has 400 feet of frontage; or [Ord. 2011-016]
(2) The parcel, or group of parcels, is located between two side streets; or [Ord. 2011-016]
(3) The parcel, or group of parcels, is located adjacent to an existing slip street. Applicants may opt to utilize the slip street in areas not designated for slip street, provided the parcel or group of parcels has at least 400 feet of frontage where a Primary Frontage type is identified. [Ord. 2010-022] [Ord. 2011-016]

b) Standards
(1) Vehicular traffic shall be one way, in the direction of the closest lanes on the abutting R-O-W; [Ord. 2010-022] [Ord. 2011-016]
(2) The street shall be a minimum of 12 feet wide, or as required by the County Engineer; [Ord. 2010-022] [Ord. 2011-016]
(3) Vehicle stacking and interaction with any access points shall be as required by the County Engineer; and, [Ord. 2010-022] [Ord. 2011-016]
(4) On-street parking shall only be required on one side of the street. [Ord. 2010-022] [Ord. 2011-016]

[Ord. 2010-022] [Ord. 2011-016]

Figure 3.B.16.F – Typical Example of Slip Street Frontage

2) Primary Street Frontage
Primary Frontages are located along adjacent thoroughfares or new internal streets, and accommodate a wide pedestrian zone, lined by the main building façade and entrance(s). Shall comply with streetscape standards. [Ord. 2010-022] [Ord. 2011-016]
3) **Secondary Street Frontages**
Secondary frontages are located along existing side streets that intersect the main commercial thoroughfare, or new internal side streets. Secondary frontages provide a planting strip for street trees and a pedestrian zone appropriate for less intense uses and building sides. Shall comply with streetscape standards. [Ord. 2010-022] [Ord. 2011-016]

b. **Internal Streets**
The design for the street and on-street parking shall comply with Figure 3.F.2.A, TDD Commercial Street, or the TMD design exception summarized in Art. 3.F.4.C.2.a.1), Design Exception as illustrated in Figure 3.F.4.C, Typical Example of TMD Commercial Street with Angled Parking. Internal streetscapes shall be designed as either Primary or Secondary Frontages. Internal streets may include access ways designed to comply with minimum street standards. [Ord. 2010-022]

c. **Alleys**
Alleys shall provide primary access to parking lots, service areas, residential garages or driveways. A continuous network of alleys may serve as the primary means of vehicular ingress/egress to individual parcels. Alleys shall provide rear access to all buildings except for Block and Liner Buildings. Alleys shall conform to the requirements of Art. 3.F.2.A.1.e, Alleys. [Ord. 2010-022] [Ord. 2011-016]
5. **Interconnectivity Standards**

Interconnectivity to adjacent residential parcels is encouraged, but not required. Interconnectivity shall be required between similar uses. In the event the adjacent parcel is undeveloped, a stub out shall be provided to accommodate future connections. In addition, the following shall apply. [Ord. 2010-022] [Ord. 2011-016] [Ord. 2017-002]

a. **Street Connections**

Parcels required to or proposing to establish a block structure, shall provide interconnectivity where any new internal intersections abut adjacent parcels. [Ord. 2010-022]

b. **Optional Parallel Alley**

Applicants are encouraged to develop parcels that have frontage on a commercial corridor with an alley running parallel to the corridor. The alley may be generally located along the rear property line, or at a point that allows interconnectivity to shallower abutting lots. Where new blocks are not required or proposed, alleys may be incorporated as drive aisles within parking lots. [Ord. 2010-022] [Ord. 2017-002]

c. **Gates**

The use of gates or other similar barriers is prohibited. Exceptions are permitted for the following: dumpsters, loading areas, and private garages or parking lots. [Ord. 2010-022]

d. **Cross Access Agreement**

When interconnectivity is required, an irrevocable cross access easement shall be provided prior to final DRO plan approval. [Ord. 2010-022]

e. **Small Parcel Exemptions**

Legal lots of record of less than one acre in size prior to the adoption of the URAO, may be exempt from interconnectivity standards, by complying with any of the following standards: [Ord. 2011-016]

1) Interconnectivity has been provided to adjacent parcels establishing or allowing for a future cross access point, or, [Ord. 2011-016] [Ord. 2017-002]

2) Applicant can demonstrate that interconnectivity requirements would adversely impact the development potential of the project. [Ord. 2011-016] [Ord. 2017-002]

6. **Building Standards**

The provisions of this Section shall be applied in conjunction with any other applicable ULDC standards or limitations for buildings or structures, unless stated otherwise herein. [Ord. 2010-022]

a. **Building Placement**

1) **General**

   a) To maximize the street frontage of buildings and minimize the visibility of parking areas from the street, a building should be articulated so that the longest side fronts the street. When located at an intersection, the façade with the greatest length shall be considered the front. This standard does not preclude two or more façades from being designated as front façades. [Ord. 2010-022] [Ord. 2011-016]

   b) Taller buildings should not cast a shadow line on existing neighborhoods. To avoid this, building height should be compatible with adjacent development, which may require reducing building heights or stepping back upper stories in certain instances. [Ord. 2010-022] [Ord. 2011-016]

2) **Corners**

   Where a parcel is located at the intersection of two streets, at least one building shall be placed at the corner meeting the build-to-lines for both streets. [Ord. 2010-022]

3) **Building Hierarchy**

   Building placement shall follow an established order, with initial buildings required to meet minimum placement and frontage requirements along the most intense perimeter streets. Additional buildings may be located on interior streets, but shall be ordered so as to create a consistent streetscape. [Ord. 2010-022] [Ord. 2011-016]

4) **Civic Buildings**

   If civic buildings are proposed they shall be located in visually prominent centralized locations, easily recognizable and accessible to the public. [Ord. 2010-022]

5) **Parking Structures**

   Parking structures may be allowed provided they are located in the interior of a block and are completely screened by buildings with habitable uses on all stories for Slip Street and Primary Frontages. Parking structures located on a Secondary Frontage shall be completely screened by habitable uses on at least the first story. Parking structures are allowed to face an alley without meeting the requirement for habitable screening on the alley façade. [Ord. 2010-022] [Ord. 2011-016]
b. Building Property Development Regulations

1) Perimeter Street Building Frontage
   Building frontage is the percentage of the total width of a lot which is required to be occupied by the primary façade of a building. [Ord. 2010-022]

2) Perimeter Frontage Exceptions
   Buildings located on secondary frontages, except for Row Houses, are not required to meet minimum building frontage requirements. Frontage requirements may be reduced for lots with no rear or side access to required parking as necessary to accommodate a drive aisle for ingress/egress. [Ord. 2010-022]

3) Internal Building Frontage
   Internal buildings shall only be permitted when located facing an internal street frontage, unless exempted herein. [Ord. 2010-022]

4) Setback Measurement
   a) Perimeter Streets
      Setbacks shall be measured from the edge of ultimate R-O-W, or from the property line, whichever is applicable. [Ord. 2010-022]
   b) Internal Streets
      Setbacks shall be measured from the proposed building frontage façade to the outside edge of curb. [Ord. 2010-022]
   c) Townhouse
      Townhouse PDRs may also be applied to Multifamily buildings that are constructed to Townhouse standards. [Ord. 2010-022] [Ord. 2011-016]
   d) Side Setback Reduction
      If permitted, a zero side setback reduction shall comply with the following: [Ord. 2010-022]
      (1) Windows, doors or other openings shall not be permitted. No portion of a building, including roof eaves, gutters, and soffits may encroach onto adjacent parcels; [Ord. 2010-022]
      (2) Openings, attachments, or any item requiring maintenance other than cleaning and painting, when visible, shall not be permitted; and, [Ord. 2010-022]
      (3) A maintenance easement a minimum of two feet in width shall be provided to ensure access to exposed portions of the building. [Ord. 2010-022]

### Notes:

1. Required maximum build-to-line may be increased, where necessary, to accommodate utility easements, landscape buffer, slip street, safe sight distance, corner clips, or other similar need as may be required by the County Engineer. [Ord. 2010-022] [Ord. 2018-002]
2. May be reduced to zero feet where in compliance with provisions for side setback reduction. [Ord. 2010-022]
3. Shall be exempt for parcels eligible to use parking drive aisles to comply with alley requirements. [Ord. 2010-022]
4. Shall apply for any PRA Single Family or Multifamily building 35 feet in height or less within 30 feet of property line. [Ord. 2010-022]
5. Means adjacent residential parcels that are not located within a development using PRA regulations. [Ord. 2010-022] [Ord. 2011-016]
6. Shall be based upon length of applicable property line. Where multiple buildings are proposed, the applicable length shall be the result of the overall length divided by the number buildings. [Ord. 2010-022] [Ord. 2011-016]
7. Maximum pedestrian pass thru requirement does not apply for buildings with a length of 300 feet or less. [Ord. 2010-022] [Ord. 2011-016]
8. An existing SFD that has a greater setback than the maximum permitted shall not be considered a non-conforming structure. [Ord. 2012-027]
9. Setbacks for Single Family residential units shall be seven and one-half feet for side setbacks and 15 feet for rear setbacks. Accessory structures to Single Family residential may be allowed in accordance with the standards for residential districts in Art. 5, Supplementary Standards. [Ord. 2012-027] [Ord. 2017-002]

[Ord. 2010-022] [Ord. 2011-016]

**Notes:**

- **P** Permitted.
- **-** Not permitted.

1. LEED Silver or equivalent: Building floor only permitted where in compliance with Green Building Incentive Program.
2. LEED Gold or equivalent: Building floor only permitted where in compliance with Green Building Incentive Program.

2) **Exterior Height**

   a) All building frontages abutting Slip Street, Primary or Secondary Frontages shall be exempt from Art. 3.D.1.E.2, Multifamily, Non-Residential Districts, and PDDs. [Ord. 2010-022]

[Ord. 2011-016]
b) Maximum building height shall be in accordance with Table 3.B.16.F, Maximum Building Floors, Table 3.B.16.F, Maximum Building Height, and the following: [Ord. 2010-022] [Ord. 2011-016]

<table>
<thead>
<tr>

<td>90 feet</td>
<td>105 feet</td>
<td>120 feet</td>
</tr>
</tbody>
</table>

[Ord. 2010-022] [Ord. 2017-007]

3) Green Building Incentive Program
The Green Building Incentive Program is intended to stimulate private sector investment to construct sustainable buildings by allowing for “bonus height” for projects meeting industry criteria and standards for certification. Where applicable, bonus height shall only be permitted subject to the following: [Ord. 2010-022] [Ord. 2011-016]

a) Applicability
Allowable increases in building height are indicated in Table 3.B.16.F, Maximum Building Floors. [Ord. 2010-022]

b) Standard for Certification
The standard for certification shall be the U.S. Green Building Council Leadership in Energy and Environmental Design (LEED) Green Building Rating System (LEED Silver or Gold/Platinum levels), or appropriate Florida Green Building Coalition designation standards, or other similar standard approved by the County. [Ord. 2010-022]

c) Application Procedures
All applications for bonus height shall be submitted concurrently with an application for Public Hearing or DRO approval, as applicable. The application form and requirements shall be submitted on forms specified by the PBC Official responsible for reviewing the application. [Ord. 2010-022]

d) Review Process
(1) Public Hearing Certification
If applicable, projects requiring BCC approval and including a request for bonus height shall provide a LEED scorecard accompanied by a detailed analysis of each credit and why the standard can or cannot be achieved. [Ord. 2010-022]

(2) DRO Approval
Documentation indicating the project has been registered with the Green Building Certification Institute (GBCI) as a LEED project or other standard for Certification as noted above. If applicable, bonus height requested at time of BCC approval may be reduced if the GBCI registration is inconsistent with the original LEED scorecard and proposed level of certification. [Ord. 2010-022]

(3) Monitoring
During plan review and construction, the Applicant’s LEED certified inspector or architect will provide documentation and submit quarterly reports to Planning/Monitoring demonstrating compliance with the LEED standards and scorecard and the approved site plan. If during construction, the developer is unable to include required green building components, or if the inspector/architect finds that the developer failed to include these components, the County shall pursue enforcement, actions which may include revocation of Building Permits, remand back to DRO to remove the bonus height awarded, or release of surety to the County. [Ord. 2010-022]

(4) Amendments
If during construction of the building, the developer is unable to include all of the approved green building components previously identified in the GBCI registration, the developer may be permitted to replace components not provided with other green building components where documented as approved by the GBCI for the project. Any amendment to an exterior component shall require DRO approval. [Ord. 2010-022]

(5) Completion
UGCI certification shall be obtained within two years of the date of issuance of Certificate of Occupancy. [Ord. 2010-022]
e) Surety
Prior to DRO approval of the site plan, the County (Planning Division) and the developer shall enter into a development agreement requiring that the green building components identified in the GBCI registration be constructed or installed in the building and that any third-party inspection fees will be paid for by the developer. Furthermore, the developer shall post a surety with the County. The amount of the surety shall be based on the number of dwelling units contained within the “bonus height” stories. Non-residential uses shall be based upon the equivalent of one dwelling unit for each 1,000 square feet of non-residential use area (measured by gross square footage). The number of dwelling units shall be multiplied by the BCC’s established price for TDRs at the date of the application. [Ord. 2010-022]

1) Default
If the Applicant fails to comply with the requirements above after CO, the County may, at its discretion collect the surety and apply the funds to a TDR contract to purchase an equivalent number of units to those proposed for the original bonus height consideration. [Ord. 2010-022]

2) Release of Surety
If in compliance with the review process requirements above, upon receipt of the GBCI certification by the County, the Property Owner shall submit in writing to the Planning Director a request that the posted surety shall be returned. [Ord. 2010-022]

d. Additional Architectural Design Standards
Architecture shall be in accordance with Art. 5.C. Design Standards, unless specified otherwise herein. [Ord. 2010-022] [Ord. 2011-016]

1) Primary Entrances
The primary entrance for all first floor tenants must directly face a street, courtyard, plaza, square, or other form of usable open space fronting a street. [Ord. 2010-022] [Ord. 2011-016]

2) Secondary Entrances
Each tenant may be permitted to have additional entrances located at side or rear façades facing a parking lot or other area. [Ord. 2010-022] [Ord. 2011-016]

3) Fenestration
Non-residential and Multifamily building façades facing perimeter and primary streets or usable open space shall provide transparent windows covering a minimum of 35 percent of the wall area of each story as measured between finished floors, to allow transmission of visible daylight. [Ord. 2010-022]

4) Storefronts
The storefront is a first floor façade improvement required for all non-residential uses that face a street or usable open space area: [Ord. 2010-022] [Ord. 2011-016]

a) Storefronts shall extend across 70 percent of the non-residential space; [Ord. 2010-022]

b) Storefronts shall have transparent glazing of at least 70 percent of the linear width of the applicable façade area, comprised of storefront windows and doors; [Ord. 2010-022] [Ord. 2011-016]

c) Storefront windows shall have a base one and one-half feet to three feet high, with transparent glazed areas extending from the base to at least eight feet in height as measured from sidewalk grade. [Ord. 2010-022]

d) A minimum of 50 percent of all required storefronts shall have an awning, gallery, or arcade shading the sidewalk. [Ord. 2010-022]

5) Architectural Appurtenances
Table 3.B.16.F, PRA Appurtenances by Building Type identifies where appurtenances shall be required, and what additional appurtenances are permitted. Where indicated by a checkmark, each building type shall be required to provide a minimum of one appurtenance. [Ord. 2010-022]

Notes:

- ✓ A minimum of one of the appurtenances checked shall be required for each building type.
- P The appurtenance may be permitted.

1. The clear height of appurtenances that project or hang from a building shall be at a minimum eight feet above the sidewalk elevation, unless specified otherwise.
2. Appurtenance may project into pedestrian circulation zone, subject to a minimum five-foot setback from utility easements.
3. Shall not encroach into the pedestrian circulation zone, and may only encroach into the shy zone for upper stories.
4. Shall not encroach into the pedestrian circulation zone.

Additional minimum standards shall apply to the following types of appurtenances [Ord. 2010-022]

- **Arcades and Galleries**
  - Arcades shall comply with [Figure 3.B.14.G, WCRAO Arcade and Gallery Standards]. [Ord. 2010-022]

- **Balcony**
  - A balcony above a storefront shall be a minimum of three feet in depth. [Ord. 2010-022]

- **Porch or Stoop**
  - (1) Required to be open, un-air conditioned. [Ord. 2010-022] [Ord. 2011-016]
  - (2) Minimum three feet deep by four feet wide. [Ord. 2010-022] [Ord. 2011-016]
  - (3) Minimum elevation 18 inches above the adjacent sidewalk elevation. [Ord. 2010-022] [Ord. 2011-016]

### 7. Streetscape Standards

Streetscape standards are established to improve both the physical and visual appearance of the streetscape while creating a pedestrian friendly environment for the areas located between building façades and abutting streets. [Ord. 2010-022] [Ord. 2011-016]

#### a. General Standards

- The following standards shall apply to all streetscapes: [Ord. 2010-022]
  1) Required street trees shall be located in the planting amenity zone; [Ord. 2010-022]
  2) Required pedestrian sidewalks shall not be encumbered; [Ord. 2010-022]
  3) All paving materials for the pedestrian sidewalks shall be compliant with ADA accessibility standards; [Ord. 2010-022] [Ord. 2017-002]
  4) Where a sidewalk or a path crosses curb cuts at ingress/egress points and internal drives, the pedestrian crossing shall be paved with a material that provides a different texture or a color contrast with the vehicular surface, but preferably consistent with the paving material of the path; [Ord. 2010-022] [Ord. 2011-016]
  5) Where a street tree planting area is required, improvements shall be in accordance with the requirements of the planting/amenity zone; [Ord. 2010-022] [Ord. 2011-016]
  6) Consistency in street tree species shall be encouraged within a block, if applicable, and shall be reflective of the character of the surrounding area; [Ord. 2010-022] [Ord. 2011-016]
  7) Where applicable, sidewalks located within a perimeter R-O-W may be incorporated into the streetscape requirements of this Section, subject to a sidewalk easement agreement with the DEPW; [Ord. 2010-022] [Ord. 2011-016]
  8) All paving materials in planting/amenity and pedestrian circulation zones shall be constructed entirely of pervious/porous materials, allowing some storm-water to percolate into the underlying soil and promote healthy street tree growth; and, [Ord. 2010-022] [Ord. 2011-016]
  9) If an existing or proposed utility easement is located adjacent to subject roadways, streetscape requirements shall be applied from the inner edge of the utility easement, and shall be landscaped with appropriate groundcover, with exception to the following: [Ord. 2010-022] [Ord. 2011-016]
a) Utility easements may be improved hardscaped or landscaped to be consistent with required streetscape areas; [Ord. 2010-022]

b) Utility easements may encroach into required streetscape areas up to a maximum of five feet, subject to Engineering approval and consent from easement holder; and, [Ord. 2010-022]

c) Street trees may be located in utility easements subject to use of tree root barrier approved by County Landscape and easement holder. [Ord. 2010-022]

b. Streetscape Components

The area between a front façade and the vehicular lanes of required, primary, secondary and side streets shall include two distinct zones: planting/amenity zone and pedestrian circulation zone. [Ord. 2010-022]

1) Planting/Amenity Zone

The planting/amenity zone shall be a minimum of five feet in width, and serves as the transition between the vehicular and pedestrian areas. Bus stop locations, lighting, benches, trash receptacles, art, street trees, groundcovers and pavers may be placed in these areas. [Ord. 2010-022]

a) Street trees shall be installed in accordance with Art. 3.F.2.A.4.d, Street Trees. Exceptions to tree spacing may be permitted where necessary to accommodate bisecting utility easements, or other similar improvements; [Ord. 2010-022]

b) Street lights shall be required for all perimeter and internal streets in accordance with Art. 3.F.2.A.1.f.2), Lighting; [Ord. 2010-022]

c) Trees shall be planted in tree wells/grates with an approved groundcover or other acceptable treatment over the top to protect the roots, when planted along a street frontage. [Ord. 2010-022]

d) A minimum of one bench shall be provided along each streetscape, or one bench for every 150 linear feet of street frontage, whichever is greater. Signage or advertising is prohibited on benches. [Ord. 2010-022] [Ord. 2017-002]

e) A minimum of one trash receptacle shall be provided at each bench location. [Ord. 2010-022]

f) Moveable chairs and sidewalk cafes are strongly encouraged in the planting/amenity zone, but may not encroach into the pedestrian circulation zone. [Ord. 2010-022]

2) Pedestrian Circulation Zone

The pedestrian circulation zone is a continuous unobstructed space reserved for pedestrian movement typically located adjacent to the planting/amenity zone. Minimum width shall be eight feet for slip street and primary frontages, and five feet for secondary frontages. [Ord. 2010-022]

a) The pedestrian circulation zone shall function as a continuous unobstructed space along the street frontage, with the exception of an arcaded sidewalk and gallery. [Ord. 2010-022]

3) Slip Street Planting/Amenity Zone

The following standards shall apply for all slip street frontages: [Ord. 2010-022]

a) A ten-foot-wide landscape planting area shall be required between a perimeter R-O-W and the slip street;

b) Additional width may be permitted to accommodate utility easements or Engineering requirements, but shall not be increased otherwise;

c) Street trees shall be planted in the landscape area in accordance with Art. 3.F.2.A.4.d, Street Trees, but shall be generally consistent with the tree species and spacing provided in the enhanced sidewalk area; and,

d) Ground treatment shall comply with the standards for the planting/amenity zone.

8. Civic and Usable Open Space Standards

A minimum of five percent of the gross acreage of all PRA projects shall be dedicated or provided as usable open space. Plazas or squares that provide a concentrated focal point for pedestrians shall be the preferred method for providing usable open space, but credit may be given for required pedestrian streetscapes or other similar usable open space amenities such as playgrounds and greens. All required usable open space areas shall meet the minimum dimensions provided under Table 3.B.16.F, PRA Dimensions for Usable Open Space, unless exempted otherwise herein. [Ord. 2010-022]

[Ord. 2010-022]

a. General
1) Required usable open space areas shall be provided prior to the issuance of CO for 50 percent any residential units within the subject site, if applicable. [Ord. 2010-022]
2) At least 95 percent of the residences within the subject site must be within a 1/4 mile walk of usable open space. [Ord. 2010-022]
3) Usable open space areas shall feature visible, open, and unimpeded pedestrian access from adjacent streets and sidewalks, allowing passersby to see directly into the open space. [Ord. 2010-022]

b. Plazas and Squares
A plaza or square shall be defined by building façades or streets. It is primarily comprised of hardscape/pavers, with trees and containerized plants serving as the primary vegetative material. [Ord. 2010-022]

c. Greens
Greens are commonly developed with grassy lawn areas unstructured recreation, intended for less intensive foot traffic. It shall be defined by building façades or streets on two or more sides. The minimum size shall be 0.25 acre and the maximum shall be six acres. It may also be partially depressed below the street grade for the purposes of accommodating temporary storm-water retention. [Ord. 2010-022] [Ord. 2011-016]
1) Minimum 80 percent unpaved surface area (turf, groundcover, soil, or mulch). [Ord. 2010-022]
2) The remaining balance may be any paved surface up to a maximum 20 percent of the green. [Ord. 2010-022]

d. Streetscape Credit
Projects that have net land areas of less than two and one-half acres in size may count all streetscape areas towards the usable open space requirement. All others may count up to 50 percent of streetscape areas towards usable open space requirements. [Ord. 2010-022] [Ord. 2011-016]

e. Street Frontage
If applicable, required usable open space areas shall front on a secondary or side street frontage and be located in a prominent or central area internal to the development. Frontage on a required or primary frontage shall not be permitted unless there are no secondary or side streets abutting or internal to the development. [Ord. 2010-022] [Ord. 2011-016]

f. Shade
A minimum of 15 percent of each plaza, square or other usable open space area shall be shaded by landscape material or shade structures at time of construction. Where applied to streetscape galleries, awnings or other building amenities may be counted towards shade requirement. [Ord. 2010-022] [Ord. 2011-016]

g. Pedestrian Amenities
1) Required usable open space areas shall have a minimum of one linear foot of seating for each 200 square feet of overall area. Movable chairs are encouraged, and shall count as two-and one-half linear feet of seating area. [Ord. 2010-022]
2) One trash receptacle for each 5,000 square feet of each physically separated civic open space. [Ord. 2010-022]
3) Art is encouraged to be placed within usable open space areas. [Ord. 2010-022] [Ord. 2011-016]
4) One drinkable water fountain for each 5,000 square feet of each landscaped civic open space. [Ord. 2010-022]

9. Parking and Loading Standards
Parking and loading for each tenant shall be located behind buildings or a street wall. Parking shall only be permitted in front of buildings in the form of on-street parking. Parking and loading shall comply with Art. 6, Parking, Loading, and Circulation, unless otherwise stated below: [Ord. 2010-022] [Ord. 2011-016]
a. Location and Access
   Parking may be provided in surface lots, attached/detached garages or outbuildings, or a parking structure. [Ord. 2010-022] [Ord. 2011-016]

1) On-Street Parking
   Parking in front of buildings shall only be permitted where on-street parking is allowed. [Ord. 2010-022]

2) Parking Lots
   It is the intent that parking lots shall be located behind buildings to screen from view from all street frontages and usable open space areas, unless specified otherwise herein. Exceptions shall be permitted for parking lots adjacent to a building where a Street Wall is used, or lots on secondary streets. The perimeter of parking lots shall be framed by a Street-Wall using: [Ord. 2010-022] [Ord. 2011-016]
   a) Buildings; or
   b) A five-foot-wide landscape strip that includes a minimum 30-inch-high hedge or concrete street-wall, with Canopy, multi-trunk, or flowering trees planted 30 feet on center. Breaks to allow for pedestrian and vehicular access shall be permitted. [Ord. 2011-016]
   c) Separation between parking and parallel alleys shall not be required for any project that does not have streets or blocks, and alleys may be incorporated into parking lots as standard drive aisles.

Figure 3.B.16.F – Typical Parking Location and Access

Preferred Alley Access

Side Street Access

Small Mid-Block Parcel Access

[Ord. 2010-022]

3) Requirement for Parking Garages
   Parking for any use in excess of five spaces per 1,000 square feet of non-residential floor area shall be located in a parking structure/garage, with exception to a Development Order for a project located on one parcel (inclusive of any outparcels) that requires a minimum of or provides 100 or fewer parking spaces. [Ord. 2010-022] [Ord. 2011-016]

4) Townhouse
   Parking for Townhouses shall only be permitted to the rear and shall meet the requirements for Townhouse parking. Garage setbacks shall be in accordance with PDRs for Row Houses. [Ord. 2010-022] [Ord. 2011-016]

5) Service and Loading Areas
   All service and loading areas shall be located along the rear or side of buildings, and shall not be visible from usable open space areas, streets or abutting residential neighborhoods. The service areas shall be located within the footprint of the building or immediately adjacent to the building. Required loading space areas may be waived, reduced in number or dimension, in accordance with Art. 6.E, Loading Standards, or by Art. 3.B.16.G, Type 1 and 2 URAO Waivers. [Ord. 2010-022] [Ord. 2012-027]
   1) Waste and recycling containers shall be integrated within in the building or entirely screened from view. [Ord. 2010-022]
   2) Loading docks, service areas and trash disposal facilities shall not face usable open space areas, a street frontage or an abutting residential neighborhood unless screened from view or integrated within a building. [Ord. 2010-022]
   3) Trash collection and other services shall be accessed through the alley or other vehicular use areas behind buildings. [Ord. 2010-022] [Ord. 2011-016]
b. Parking Ratios

The required number of parking spaces shall correspond to broad uses and not to a specific use, and shall be responsive to the long-term transition of tenants within a non-residential or mixed use development. The Applicant may choose from the following parking requirements: [Ord. 2010-022]

1) Non-Residential

a) Minimum: one space per 333 square feet of GFA (3/1,000) excluding assembly, and one space per five seats for assembly uses; [Ord. 2010-022]

b) Where uses are not intended to allow for transition to other uses, the general parking standards outlined in Art. 6, Parking,Loading, and Circulation, may be applied, provided that use limitations are identified on the DRO approved Site Plan; [Ord. 2010-022]

c) Reduction in required parking through use of a shared parking study, as defined in Art. 6, Parking,Loading, and Circulation; or, [Ord. 2010-022]

d) If eligible, credit may be given for any perimeter on-street parking spaces located along secondary streets, subject to approval by the County Engineer (use of this option may be limited to where the developer pays for required improvements), or for any new slip street or internal street parking developed. [Ord. 2010-022]

2) Residential

Multifamily residential parking ratios may be reduced in accordance with Table 3.B.14.I, WCRAO Mixed Use and Residential Parking Deviations. [Ord. 2010-022]

c. Bicycle Parking

One parking area shall be provided for every five units in Multifamily housing and for every 20 vehicle parking spaces serving non-residential uses. Bicycle parking spaces shall be indicated on the Site Plan in visible, well-illuminated areas. For each bicycle parking space required, a stationary object shall be provided to which a user can secure the bicycle. The stationary object may either be a freestanding bicycle rack or a DRO approved alternative. [Ord. 2010-022]

10. Landscape Standards

Landscaping in the PRA shall be in an urban form that compliments the intended intensity and density of the PRA corridors, with an emphasis on the use of materials and design that enhances pedestrian areas, allows for improved visual surveillance from building windows, but also minimizes impacts to adjacent residential developments. Drainage retention areas, preserves, and other similar low-intensity open space areas shall be located to provide a transition between commercial uses and existing adjacent residential neighborhoods, or parcels with a residential FLU designation, when possible. Landscaping shall be in accordance with Art. 7, Landscaping, unless stated otherwise herein: [Ord. 2010-022] [Ord. 2011-016]

a. Perimeter Buffers

1) Streetscape Exemptions

Required landscape perimeter buffers pursuant to Art. 7, Landscaping shall not be required where a PRA streetscape is required. [Ord. 2010-022]

2) Compatibility Buffers

The PRAs shall be exempt from Compatibility Buffer requirements. [Ord. 2010-022]

3) Alternative Incompatibility Buffer

The following Incompatibility Buffer option may be utilized subject to the following: [Ord. 2010-022]

a) Shall be a minimum of ten feet in width, and, easement encroachment shall be prohibited, with exception to drainage easements; [Ord. 2010-022]

b) A six-foot-tall solid concrete block or panel wall shall be installed along the affected property line, with a setback a minimum of two feet to allow for maintenance of the exterior side of the wall. Setback may be increased as needed to accommodate required footers; [Ord. 2010-022] [Ord. 2011-016]

c) The required wall shall be constructed of materials and with a design consistent with the principal building, and shall have the same architectural finish treatment and color on both sides of the wall. [Ord. 2010-022]

d) Exterior landscape areas shall have groundcover that is low maintenance and does not impede necessary access for maintenance; [Ord. 2010-022]

e) Canopy trees shall be planted along the internal side of the wall to be spaced a minimum of 20 feet on center; [Ord. 2010-022]

f) A hedge shall be installed in accordance with the standards for medium shrubs, as specified in Table 7.D.3.A, Shrub Planting Requirements; and, [Ord. 2010-022]
g) A drainage easement may be permitted within the buffer on the interior side of the wall to be used as a stormwater management system, subject to approval by Land Development. [Ord. 2010-022]

b. **Foundation Planting**
   The PRAs shall be exempt from foundation planting requirements, unless stated otherwise herein. [Ord. 2010-022] [Ord. 2011-016]

c. **Alternative Parking Lot Design Options**
   This Section allows alternative parking lot designs through modifications to Art. 7.C.4, Landscape Requirements for On-Site Parking to promote innovative design or use of green building materials. The following may be used individually or in combination, unless stated otherwise: [Ord. 2010-022] [Ord. 2014-025]

   1) **Option 1**
      Projects that are one-half acre or less in size, with 20 or fewer parking spaces may consolidate all required interior landscape island areas and planting materials into one or more locations anywhere within the project; [Ord. 2010-022] [Ord. 2014-025]

   2) **Option 2**
      Projects that are two acres or less in size may reduce required terminal island landscape width to a minimum of five feet in width of landscape area. This option may not be used in conjunction with any option relocating these landscape areas; [Ord. 2010-022] [Ord. 2014-025]

   3) **Option 3**
      Landscape shrub or groundcover requirements for terminal, interior, and divider median islands may be replaced with bio-swales and appropriate landscaping, provided that required Canopy trees can be accommodated. Alterations to required curbing may be permitted subject to demonstration that vegetated areas are protected from vehicles; [Ord. 2010-022] [Ord. 2014-025]

   4) **Option 4**
      Up to a maximum of 25 percent of required terminal, interior, and divider median landscape islands shall not be required provided that covered parking that utilizes appropriate solar reflectance index (SRI) materials are installed where islands are removed; [Ord. 2010-022] [Ord. 2014-025]

   5) **Option 5**
      Landscape shrub or groundcover requirements for terminal, interior, and divider median landscape areas shall not be required, subject to the following: [Ord. 2010-022] [Ord. 2014-025]

      a) The number of required terminal, interior, and divider median trees are doubled; and [Ord. 2010-022] [Ord. 2014-025]

      b) Green building standards for tree wells and related root growth areas are utilized; [Ord. 2010-022]

   6) **Option 6**
      No interior islands are required if parking spaces are abutting landscape buffers, Street Walls, or tree planting areas. [Ord. 2010-022] [Ord. 2014-025]

d. **Rear or Side Entrances**
   Buildings with secondary entrances located on the side or rear façades shall either apply the streetscape standards for a side street building frontage; or shall provide foundation planting along a minimum of 50 percent of the applicable façade, with a minimum depth of five feet, to be planted in accordance with Art. 7, Landscaping, with a sidewalk a minimum of five feet in width as needed to separate pedestrians from abutting vehicle use areas along the building façade. [Ord. 2010-022]
11. Signage Standards
Signage shall be in accordance with Art. 8, Signage, unless stated otherwise herein. [Ord. 2010-022] [Ord. 2011-016]

a. Freestanding Signage Prohibitions
Freestanding signs, including outparcel identification signs, shall be prohibited, with exception to the following: [Ord. 2016-020]

1) Interior Buildings
Development Orders that include buildings located on internal streets that do not have any frontage on a perimeter street, subject to the limits of Table 8.G.2.A, Freestanding Sign Standards, or the following, whichever is more restrictive: [Ord. 2010-022]

a) Signs shall not exceed 150 square feet of sign face area, 15 feet in height, or the maximum dimensions permitted in Art. 8, Signage, whichever is less; and [Ord. 2010-022] [Ord. 2016-020]

b) A maximum of one freestanding sign per right-of-way frontage shall be permitted. [Ord. 2010-022]

2) Electronic Changeable Copy Message Sign Pilot Program
In conjunction with the Electronic Changeable Copy Message Sign Pilot Program, freestanding sign(s) shall be permitted in existing non-conforming projects within the UC or UI Zoning District, on an interim basis, subject to the following: [Ord. 2016-020]

a) The freestanding sign, whether new or existing, shall comply with all of the requirements of Art. 8, Signage; and [Ord. 2016-020]

b) Should the project be redeveloped, the freestanding sign may not be carried forward unless in accordance with Interior Buildings above. [Ord. 2016-020]

G. Type 1 and 2 URAO Waivers
An Applicant may apply for Waivers for development standards in accordance with Art. 2.B.7.D, Type 2 Waiver or Art. 2.C.5.F, Type 1 Waiver. Applications for Type 1 or Type 2 Waivers shall be expressly limited to those Articles or Requirements listed in Table 3.B.16.G, Type 1 and 2 URAO Waivers. Type 2 Waiver requests shall be submitted concurrently with any other DRO application request for Public Hearing certification, where applicable. [Ord. 2010-022] [Ord. 2011-016]

### Section 17 Agricultural Enclave Overlay (AGEO)

**A. Purpose and Intent**

These regulations are intended to provide supplemental standards for development within an Agricultural Enclave (AGE) to ensure compliance with related goals, policies and objectives of the Plan, and F.S. § 163.3162. The AGE must include appropriate new urbanism concepts to achieve clustering, mixed use development, the creation of rural village and city centers, and the transfer of development rights within the boundaries of an AGE. This is accomplished by use of Art. 3.F.5, Traditional Town Development (TTD), and an AGE Future Land Use Atlas (FLUA) amendment Conceptual Plan, which establishes the Transects within an AGE. [Ord. 2010-022] [Ord. 2014-031]

**B. Applicability**

The provisions of the AGEO shall apply to property with an AGE FLU designation. [Ord. 2014-031]

**C. Boundaries**

The boundaries of the AGEO shall be consistent with an AGE FLUA amendment. [Ord. 2010-022] [Ord. 2014-031]

**D. Development Review Procedures**

Any application for a Development Order for a Rezoning, Conditional Use approval, or Development Order Amendment, within an AGEO shall be consistent with an AGE FLUA amendment Conceptual Plan: [Ord. 2014-031] [Ord. 2018-002]
1. Master Plan and Regulating Plan
The Master Plan and Regulating Plan, or Design Standards Alternative, shall include the following information from the AGE FLUA Conceptual Plan. Previously approved Design Standards Alternative shall be considered conforming unless changed to a Regulating Plan. [Ord. 2014-031] [Ord. 2016-042]
   a. The location and boundaries of the transect zones; [Ord. 2014-031]
   b. Allocation and range of density and intensity; [Ord. 2014-031]
   c. General location of all civic sites and a summary chart for required or additional civic acreages; [Ord. 2014-031]
   d. General location of existing or proposed Arterials, thoroughfares, and Collector Streets, and access points for each pod; and, [Ord. 2014-031]
   e. Any applicable Implementing Principles. [Ord. 2014-031]

2. Final Site or Subdivision Plan
An FSP or FSBP for a TND, PUD, TMD, MUPD, or Conditional Use, shall include graphic and tabular details as required above for Master Plans and Regulating Plans. [Ord. 2014-031] [Ord. 2018-002]

E. Use Regulations and Standards
1. AGE FLUA Conceptual Plan Transects
   a. Developable Transects
      All uses within the Developable Transects, shall be located within and in accordance with the standards applicable to a TMD, TND, MUPD, or PUD Pod, as designated on the Master Plan, unless stated otherwise herein or in the AGE FLUA Conceptual Plan. [Ord. 2014-031]
   b. Natural Transect Uses and Standards
      Any uses permitted within the Natural Transect shall be developed in accordance with the FLUA Conceptual Plan. [Ord. 2014-031]

2. Economic Development Center (EDC)
An MUPD Pod developed as a TTD Economic Development Center may include a College or University subject to approval as a Conditional Use. Additional commercial uses that support employees and students may be permitted in accordance with a FLUA Conceptual Plan. [Ord. 2014-031] [Ord. 2018-002]

3. Agricultural Uses
Existing agricultural areas having an agricultural classification by the Property Appraiser at time of rezoning to a TTD shall be permitted to continue or expand, in accordance with the standards for the AR district, unless inconsistent with the FLUA Conceptual Plan. [Ord. 2014-031]

4. Government and Civic Uses
All government and civic uses owned and operated by a government entity may be permitted to utilize the standards established for the Public Ownership district in Table 3.D.1.A, Property Development Regulations (PDRs), and Table 4.B.4.A., Institutional, Public, and Civic Use Matrix, unless inconsistent with the FLUA Conceptual Plan or a Master Plan. [Ord. 2014-031]

F. Traditional Town Development (TTD) Exceptions
Exceptions from the requirements of Art. 3.F, Traditional Development Districts (TDDs) may be permitted or required for an AGE TTD, in accordance with the following: [Ord. 2014-031]

1. Required Civic Locations
   Minimum civic area required for PUDs or TDDs may be relocated outside of the boundaries of a specific pod to central areas within the AGE where designated on the AGE Conceptual Plan. [Ord. 2010-022] [Ord. 2014-031]

2. Traditional Neighborhood Center (TND) Land Use Mix
An AGE TND shall comply with Table 3.F.3.B, TND Land Use, except that the maximum percentage permitted for Single Family homes may be increased to 100 percent, and the minimum Multifamily or Townhouse requirement may be reduced to zero, if consistent with the AGE FLUA Conceptual Plan. [Ord. 2014-031]

3. Rural Collector Street Standards
Collector Streets providing connectivity between TNDs, PUDs, and Arterials or other streets outside of the AGE TTD, shall apply the Plan and Non-Plan Roadway Collector Standards for the Rural Tier as indicated in Table 3.F.2.A, TDD Street Design Standards by Tier (and related Figures), subject to the following: [Ord. 2014-031]
   a. Rural Collectors shall only be permitted along the perimeter of TMD or TND Pods; [Ord. 2014-031]
   b. Maximum number of travel lanes may be increased from two to four if required by PBC Engineering; [Ord. 2014-031]
   c. Medians of up to 30 feet in width may be permitted; [Ord. 2014-031]
d. An additional six-foot-wide bicycle lane may be permitted; and, [Ord. 2014-031]
e. Overall R-O-W width may be increased to accommodate the above. [Ord. 2014-031]

4. TMD Maximum Single Tenant Frontage
The maximum frontage per single tenant permitted within a TMD Pod may be increased in accordance with the exception permitted for the AGR Tier in Art. 3.F.4.C.1.c.4), Maximum Frontage per Single Tenant. [Ord. 2014-031]

5. TTD Landscape Buffer
A minimum 50-foot-wide Type 3 Incompatibility Buffer shall not be required around the perimeter of an AGE TTD if an alternative buffer is approved as part of a FLUA Conceptual Plan. [Ord. 2014-031]

6. TTD Land Use Allocation
The minimum and maximum land use mix for an AGE TTD shall comply with Table 3.F.5.C, Traditional Town Development Land Use Allocations, unless stated otherwise in the FLUA Conceptual Plan. [Ord. 2014-031]

Section 18 Bioscience Research Protection Overlay (BRPO)

A. Purpose and Intent
To promote the growth and stability of bioscience research/biotechnology uses in proximity to the Scripps Research Institute (TSRI) campus at Abacoa/Briger, and deterring the conversion of those uses to commercial or residential uses. This will be accomplished in coordination with the Town of Jupiter, the City of Palm Beach Gardens, the City of Riviera Beach, the Town of Lake Park, and the Town of Mangonia Park, with the objective to provide opportunity for a minimum 8,000,000 square feet of bioscience/biotechnology use cluster in Northern Palm Beach County. The BRPO does not limit the uses currently allowed consistent with the property’s existing land use designation and zoning designation including uses allowed pursuant to planned development approvals and development of regional impact approvals. [Ord. 2016-042]

B. Boundaries
Generally located and bifurcated North and South of Blue Heron Boulevard, West of the C-17 Canal and Garden Road, and East of I-95; bordered in the North by Consumer Street and in the South by Interstate Park Way; The larger portion of the overlay lying in the area to the North of Blue Heron Boulevard, with a smaller portion comprised of eight parcels to the South, as well as the area included in the Florida Research Park (Palm Beach Park of Commerce) DRI approval—shall be depicted on the Special Planning Areas Map in the Comprehensive Plan Map Series. [Ord. 2016-042]

C. Applicability

Section 19 Lion Country Safari Overlay (LSCO)

A. General
See Art. 3.E.2.G.6, Lion Country Safari Overlay, for Purpose and Intent, Boundaries and Applicability, and additional site development requirements. [Ord. 2016-042] [Ord. 2017-007]

Section 20 Western Communities Residential Overlay (WCRO)

A. General
See Art. 3.E.2.H, WCR PUD.
CHAPTER C  STANDARD DISTRICTS

Section 1  General

A. Agricultural Districts
   1. AP, Agricultural Production District
      The AP district is to conserve and protect areas for exclusive, bona fide agricultural and farming-related operations particularly where soil and water conditions favor continued agricultural production. A wide range of agricultural activities and their accessory uses shall be permitted in the AP district in order to maintain the vitality of the agricultural industry in PBC.
      a. Exempted Residential Uses
         Legal Lots of Record with an LR-1 FLU designation located in an area north of the unincorporated community of Canal Point shall be considered conforming for the purpose of renovating or developing a Single Family home, including related accessory uses and structures. [Ord. 2007-013]
      b. Agricultural Production Zoning Consistency
         Within the Glades Tier, the Agricultural Production Zoning District is consistent with all FLU designations, excluding conservation. [Ord. 2016-016]
   2. AGR, Agricultural Reserve District
      The AGR district is a portion of PBC lying between Hypoluxo Road on the north, Clint Moore Road on the south, the Ronald Reagan Turnpike on the east, and the Arthur R. Marshall Loxahatchee National Wildlife Refuge on the west. The district encompasses unique farmland, regional water management, and wetlands areas. It is designated as an area to be preserved primarily for agricultural, environmental and water resources, and open space-related activities west of SR 7, agricultural and regional water management use if possible, residential development is restricted to low densities and commercial development is limited to those uses serving farm workers and other residents of the district. Gaming, pari-mutual wagering, off-track betting, events, or activities held or broadcast for similar purposes shall be prohibited.
      a. Exempted Residential Uses
         Residential subdivisions and PUDs approved by the BCC prior to January 1, 1990 shall be exempt from the provisions of the AGR district to the minimum extent required to allow for continued development pursuant to their original Development Order and the intent of the provisions of the AGR district.
            1) Exempted Developments
               The exemption applies to the following residential developments that may continue to exist, however, they may not subdivide nor expand the boundaries of the property: Willis Glider Port, Delray Lakes Estates, Tierra del Rey, Tierra del Rey South, Rio Poco, Snow Ranch Estates (a.k.a. Horseshoe Acres), and Delray Training Center. [Ord. 2007-001]
            2) Permitted Contiguous Development
               An exception shall be permitted in accordance with FLUE Policy 1.5-c, whereas Delray Lakes Estates, Willis Glider Port, and Snow Ranch Estates (a.k.a. Horseshoe Acres) may expand, subject to a Class A Conditional Use approval, to allow development of contiguous residual parcels at a density that is consistent with the existing development, where it would serve to establish uniform boundaries. Expansion shall be subject to Table 3.C.1.A, AGR Contiguous Development PDRs. [Ord. 2006-004] [Ord. 2007-001] [Ord. 2018-002]

Notes:
1. All lots shall have an average width and depth that is consistent with lots in the Delray Lakes Estate PUD. [Ord. 2007-001]
b. Previously Approved Uses
All uses that are existing and were legally established or requested before the effective date of Ordinance No. 2001-061, but are not permitted by the provisions of the AGR district, shall be considered exempted uses as set forth below: [Ord. 2016-042]

1) Exempted Uses – 4 Points Market
May be developed in accordance with FLUE Policy 1.5-I, Pre-Existing Commercial Sites (1. 4 Points Market). [Ord. 2017-002]

2) Right to Farm
All land in the AGR and AP districts are located in areas where land is used for commercial agricultural production. Owners, residents, and other users of this property or neighboring property may be subjected to inconvenience and discomfort arising from generally accepted agricultural management practices, including but not limited to noise, odors, dust, the operation of machinery of any kind, including aircraft, the storage and disposal of manure, and the application of fertilizers, soil amendments, herbicides, and pesticides. Owners, occupants, and users of properties in these areas are hereby put on official notice that: (1) the State Right-to-Farm Act, F.S. § 823.14, may bar them from obtaining a legal judgment against such as a public or private nuisance; and (2) farm operations that conform to generally accepted agricultural and management practices in the AGR and AP districts are exempt from the following miscellaneous standards contained in Art. 5.E, Performance Standards of this Code for noise, vibration, smoke, and emissions and particulate matters. [Ord. 2005-041]

B. Conservation District
1. PC, Preservation/Conservation District
The PC district is to protect lands that provide habitats for endangered species of wildlife, fish, or flora, that are important habitats for the production of fish and wildlife, or that are sites of historical or archaeological significance.

C. Residential Districts
1. AR, Agricultural Residential District
The AR district is to protect and enhance the rural lifestyle and quality of life of residents in areas designated rural residential, to protect watersheds and water supplies, wilderness and scenic areas, conservation and wildlife areas, and to permit a variety of uses that require non-urban locations but do not operate to the detriment of adjoining lands devoted to rural and residential purposes.

   a. Previously Approved RSER and Non-Residential Uses
   The previously approved site in the RSER Zoning District (Petition 1999-011 Everglades Farm Equipment Co.) requested before the effective date of this Ordinance, may be developed as a conforming use. [Ord. 2005-002] [Ord. 2011-016]

   b. Special Agriculture Uses
   Additional non-residential uses may be allowed in the AR/Rural/Exurban district with an SA FLU.

   c. Agricultural Uses in the U/S Tier
   1) Existing Agricultural Uses in the U/S Tier
   Agricultural uses in the U/S Tier existing prior to or in accordance with any previously adopted Code permitting agricultural uses, shall be considered conforming. Any expansion of existing agricultural uses shall be subject to all applicable requirements, unless pre-empted by State law. [Ord. 2011-016] [Ord. 2016-016]

   2) New Agricultural Uses
   Agricultural uses not listed as permitted in the U/S Tier may only be permitted subject to Class A Conditional Use approval, unless pre-empted by State law. [Ord. 2011-016]

2. RE, Residential Estate District
The RE district is to provide a transition between the agricultural and conservation areas and more urban residential communities and to create a residential environment wherein natural constraints applicable to development are recognized and protected in a manner compatible with the needs of residents.

3. RT, Residential Transitional District
The RT district is to provide a transition between a suburban Single Family atmosphere and estate development, which promotes active recreational facilities within the privacy of an individual lot.

4. RS, Single Family Residential District
The RS district is to provide areas for moderate-density Single Family dwelling units.

5. RM, Multifamily Residential District
The RM district is intended primarily for the development of multiple family dwelling units.
D. Commercial Districts

1. CLO, Commercial Low Office District
   The CLO district is to encourage development of low-intensity offices and the integration of complementary uses on a Local, Collector, or Arterial Street. The CLO district may serve as a transition between residential areas and more intense commercial development.

2. CHO, Commercial High Office District
   The CHO district is to encourage development of business and professional office parks and complementary uses.

3. CN, Neighborhood Commercial District
   The CN district is to provide a limited commercial facility of a convenience nature, serving residential neighborhoods within a one-half mile radius, located on a Local, Collector, or Arterial Street.

4. CC, Community Commercial District
   The CC district is to provide a commercial facility of a community nature that services residential neighborhoods within a three to five-mile radius, located on a Collector or higher classification street.

5. CG, General Commercial District
   The CG district is to encourage the development of intensive commercial uses providing a wide range of goods and services, with access from a Collector or Arterial Street and services a consumer market of at least a three-mile radius.

6. CRE, Commercial Recreation District
   The CRE district is to provide lands for major commercial recreation uses that are either publicly or privately operated and require large amounts of land and have major effects on adjacent uses.

7. IR, Infill Redevelopment District
   The IR district is to encourage infill and redevelopment in the U/S Tier, with all new development subject to the requirements of the IRO. To further encourage the partial conversion of larger existing commercial developments, previously developed uses, buildings and improvements may be retained where information is clearly shown on prior approvals, provided that any future development in accordance with the IRO. In granting approval of a rezoning to the IR district, the BCC may adopt Conditions of Approval; or including carrying forward Conditions of Approval related to prior approvals, under the premise that such conditions shall be phased out upon conversion to an IRO development. [Ord. 2010-005]

E. PRA, Priority Redevelopment Area Districts
   PRA districts shall be subject to the requirements of Art. 3.B.16, Urban Redevelopment Area Overlay (URAO). [Ord. 2010-022]

   1. UC, Urban Center District
      The UC district is the most intense PRA district, typically comprised of larger interconnected commercial Sub-areas with buildings containing either residential, non-residential, or a well-balanced mix of residential, commercial, civic, and recreational uses. [Ord. 2010-022] [Ord. 2017-002]

   2. UI, Urban Infill District
      The UI district accommodates either residential, non-residential, or mixed use redevelopment along the corridors, while providing a transition to the adjacent, existing residential neighborhoods. [Ord. 2010-022] [Ord. 2017-002]

F. Industrial Districts

1. IL, Light Industrial District
   The IL district is to provide sufficient land in appropriate locations for certain types of businesses, light manufacturing, or processing uses likely to cause undesirable effects upon residential or commercial uses.

2. IG, General Industrial District
   The IG district is to provide land in appropriate locations for those uses with one or more of the following characteristics: industrial processes that involve significant amounts of noise, heat, mechanical, and chemical processing; large amounts of material transfer; outdoor activities; and, large structures. The IG district provides for industrial uses located with convenient access to transportation facilities.

G. Public and Institutional Districts

1. IPF, Institutional and Public Facilities District
   The IPF district is to provide land in appropriate locations for a variety of regional and community uses that are either publicly or privately operated.

   a. AGR Tier – Faith Farm Ministries
      1) Approved Uses
         Uses not permitted in the IPF district, but otherwise delineated on the approved Final Site Plan for Faith Farm Ministries, Control # 94-073, dated February 13, 2008, as amended, may
continue to exist and are to be accommodated as part of the continuation of the AG Reserve Tier. The modification or expansion of any identified uses that exceed the limits of Art. 2.C.5.C, Administrative Modifications to Prior DOs, may be allowed subject to BCC approval as a Class A Conditional Use, provided such facilities and uses are owned by and directly related to the existing Faith Farm Ministries program, and provide training opportunities and financial support for Faith Farms Ministries. [Ord. 2017-002]

2) Exception from Development Thresholds
The 87.28-acre Faith Farm Ministries development shall be exempt from Table 4.A.9.B, Thresholds for Projects Requiring Board of County Commission Approval. [Ord. 2017-002]

3) Split Zoning
Split zoning of a Legal Lot of Record wherein a portion of the property is zoned IPF, in part, and AGR-PUD Preserve Area, in part, is permitted in accordance with FLUE Policy 1.5-t and Art. 3.E.2.F.3.c.1)c), Split Zoning. No buffer shall be required between land zoned IPF and AGR-PUD Preserve Area, provided both split zoned areas are owned by Faith Farm Ministries or another single non-profit entity whose primary mission is residential treatment and recovery program. [Ord. 2020-019]

2. PO, Public Ownership District
The PO district is to provide a coordinated land planning approach to the sale, rent, lease, purchase, management, or alteration of publicly-owned or operated lands. Notwithstanding those public uses permitted elsewhere in this Code, the PO district is primarily intended for, although not limited to, public parks and recreation areas, public buildings and facilities, and other capital improvements of a significant nature.

CHAPTER D PROPERTY DEVELOPMENT REGULATIONS (PDRs)

Section 1 PDRs for Standard Zoning Districts

A. PDRs
The minimum lot dimensions, density, maximum FAR, maximum building coverage, and minimum setbacks in each Standard Zoning District are indicated in Table 3.D.1.A, Property Development Regulations (PDRs) unless otherwise stated. Front, side, side street, and rear setbacks shall be applied in accordance with the lot orientation as defined by lot frontage. [Ord. 2005-041] [Ord. 2019-005]

Notes:
1. The only density allowed in the AP Zoning District is for properties in the LR-1 FLU category located north of Pahokee, on the east side of U.S. 441, for the unincorporated community of Canal Point, in the Glades Tier only. [Ord. 2005-002]
2. The minimum lot size in the AR district corresponds to the FLU category as follows: RR-20 – 20 acres; RR-10 – 10 acres; RR-5 – 5 acres; RR-2.5 – 2.5 acres; and, U/S Tier – 5 acres.
3. Non-conforming lots in the AR district may use the setback provisions in Art. 1.F.2, Non-Conforming Lot.
4. AR lots with an RR-2.5 FLU designation may use the RE PDRs. [Ord. 2005-002] [Ord. 2016-042]
5. Density is determined by the FLU designation on each parcel of land, pursuant to FLUE Table 2.2.1.1.a, and other related Policies of the Plan. The number of units permitted on a parcel of land which complies with the applicable property development regulations and design standards, therefore, is an acceptable minimum lot size. [Ord. 2005-002] [Ord. 2005-041] [Ord. 2019-005]
6. The maximum FAR shall be in accordance with FLUE Table III.C.2 of the Plan, and other related provisions, unless otherwise noted. The 0.15 FAR for the AR district is applicable where the primary use of a lot is residential. [Ord. 2005-041]
7. Maximum FAR shall be in accordance with Table 3.B.15.C, IRO FAR Increase. [Ord. 2010-005]
8. Building setbacks shall be in accordance with Art. 3.B.15, Infill Redevelopment Overlay (IRO). [Ord. 2010-005]
9. Building setbacks shall be in accordance with Art. 3.B.16, Urban Redevelopment Area Overlay (URAO). [Ord. 2010-022]
12. Property previously developed with a RM or RH rear setback of 12 feet shall be considered conforming and subject to Art. 1.E, Prior Approvals. [Ord. 2005-002] [Ord. 2005-041]
13. Maximum Building Coverage in the AP district with an SA FLU designation may be increased to 15 percent. [Ord. 2017-007]
14. Side setback for a SFD shall be increased to ten feet when adjacent to the ZLL side property line of a ZLL home, pursuant to Art. 3.D.2.B.1.d. ZLL Adjacent to Other Housing Types. The SF lot shall have an easement recorded pursuant to Art. 3.D.2.B.9.e, Access, Maintenance, and Roof Overhang Easement. [Ord. 2020-020]

### B. General Exceptions
1. **Single Family Housing Type in RM Districts**
   The property development regulations for Single Family housing type in the RM district shall be in accordance with the RS district PDRs in Table 3.D.1.A, Property Development Regulations (PDRs). [Ord. 2019-034]
2. **Infill Subdivisions**
   Single Family dwelling units in projects in the RT Zoning District which meet the criteria in Policy 2.2.1-e of the Plan or utilize the TDR Program may develop in accordance with [Table 5.G.1.B, RT Deviations for WHP.](#)

3. **PO District**
   Development in the PO district shall be exempt from [Art. 3.D.1.A, PDRs](#) for Standard Zoning Districts. However, the PO district shall be subject to the FAR requirements of the Plan. [Ord. 2005-041](#)

C. **Lot Dimensions**

1. **Frontage Reduction**
   On curving streets, such as cul-de-sacs, the required frontage for lots between the points of curvature may be reduced by 40 percent, provided the centerline radius of the contiguous street is 125 feet or less.

D. **Setbacks**

1. **Base Building Line**
   Pursuant to County Engineering standards the front, side street, and rear setback (when the rear property line abuts a street), shall be measured from the base building line.

   **Figure 3.D.1.D.5 – Base Building Line**

   - **a. Major Street**
     The base building line for any lot abutting a major street shall be 40 feet from the existing R-O-W.
b. Minor Street
   The base building line for any lot adjacent to a minor street shall be 30 feet from the centerline of
   the existing street unless subject to the following:
   1) Minor Street over 60 Feet Wide
      The base building line for any lot adjacent to a minor street over 60 feet in width shall be the
      property line, or, if the street was created by a recorded easement, from the easement line.
   2) Platted Subdivisions
      The base building line for any lot abutting a minor street within a subdivision platted and
      recorded after February 5, 1973 shall be the property line abutting the minor street shown on
      the plat.

c. Waiver
   The County Engineer may waive this requirement and establish the base building line at a lesser
   distance. If the base building line is waived on a street created by a recorded easement, the setback
   shall be measured from the easement line.

d. Permitted Encroachments
   Pursuant to approval by the County Engineer, temporary, removable, and non-habitable structures
   such as signs and fences, may be located between a street and the base building line. Approval
   shall be subject to a removal agreement with the DEPW. Setbacks shall be measured from the
   existing street boundaries and the affected area shall be landscaped in accordance with Art. 7,
   Landscaping. [Ord. 2017-002]

e. Landscaping and Parking
   In the event the County Engineer does not waive the base building line requirement, required
   landscaping and parking shall be prohibited in the area between a street and the base building line.
   [Ord. 2017-002]

2. Multifamily Separations
   The minimum separation for Multifamily and Cottage Home structures in the RM district shall
   correspond to the setback regulations in Table 3.D.1.A, Property Development Regulations (PDRs),
   and Table 3.D.2.E, Property Development Regulations for Cottage Homes respectively. [Ord. 2019-034]

a. Cottage Homes
   The minimum separation for Cottage Homes may be reduced from 15 feet to ten feet subject to the
   approval by the Fire Department and the Building Division. [Ord. 2018-018] [Ord. 2019-034]
3. **Corner Clip Setback**
   The minimum setback from a corner clip shall be ten feet. The setback shall be measured perpendicular from the midpoint of the interior line of the corner clip.

![Figure 3.D.1.D-6 – Corner Clip Setback]

STREET INTERSECTIONS

---

Unified Land Development Code
Supplement No. 28 (Printed 09/20)

Article 3 – Overlays and Zoning Districts
4. **Setback Reductions**
   No setback reduction shall be used in combination with any other setback reduction allowed by this Code.

   a. **Open Space**
      In residential zoning districts located in the U/S Tier, or the Residential Pod of an AGR-PUD, the rear and side setbacks along the length of a property line adjacent to dedicated open space defined by a minimum of 50 feet in width may be reduced by 25 percent, unless otherwise stated by this Code. [Ord. 2008-037]

   b. ** Alleys**
      In commercial and industrial districts, the rear and side setbacks from an alley may be reduced by 50 percent.

   c. ** Railroad R-O-W**
      In industrial districts, the setback from a railroad R-O-W may be reduced to the width of the required landscape buffer.

5. **Setback Exceptions**
   The following structures, projections, and improvements shall be allowed within required setbacks:

   a. **Structures, Projections, and Improvements Permitted in Setbacks**
      1) Arbors and trellises less than ten feet in height, subject to a minimum three-foot setback;
      3) Permanent/retractable awnings, canopies, or Bahama shutters projecting a maximum of three feet into a setback, and having no support other than provided by the wall or structure to which it is attached; [Ord. 2005-041] [Ord. 2014-025]
      4) Bay windows projecting a maximum of three feet into a setback; [Ord. 2005-041]
      5) Chimneys projecting a maximum of three feet into a setback; [Ord. 2005-041]
      6) Clothes poles or clothes lines in rear yard setbacks; [Ord. 2005-041]
      8) Fire escapes projecting a maximum of three feet into a setback, provided the riser is retractable and at least 50 percent open; [Ord. 2005-041]
      9) Flagpoles, subject to Art. 8, Signage; [Ord. 2005-041]
      10) Fountains; [Ord. 2005-041]
      11) Heating, ventilation, and air conditioning units (including compressors and condensers); [Ord. 2005-041]
      12) Mailboxes; [Ord. 2005-041]
      13) Open terraces and patios, including walkways and ground level decks; [Ord. 2005-041]
      14) Open, uncovered stoops; [Ord. 2005-041]
      15) Recreational equipment and structures in the rear setback of residential districts; [Ord. 2005-041]
      16) Roof overhangs projecting into the required setback a maximum of two and one-half feet; [Ord. 2005-041]
      17) Sculpture and other similar objects of art; [Ord. 2005-041]
      18) Signs, subject to Art. 8, Signage; [Ord. 2005-041]
      19) On-site parking areas, unless otherwise specifically prohibited; [Ord. 2005-041]
      21) Landscaping planted in the ground or in planters; [Ord. 2005-041]
      22) Wells; [Ord. 2005-041]
      23) Utility transmission lines and associated structures; [Ord. 2005-041]
      24) Basketball goals, provided there is a minimum three-foot setback from the rear and side property lines and a minimum 15-foot setback from the front and side street property lines; [Ord. 2005-041]
      25) Light poles having only one structural ground member; [Ord. 2005-041]
      26) An accessory residential dock, shared by abutting residential parcels only, subject to the submittal of an executed construction and maintenance agreement, prepared in a manner and form acceptable to the County Attorney and the Zoning Director; [Ord. 2005-041]
28) Fire hydrants and other government service/utility structures required to be in certain locations by applicable Codes and Ordinances; [Ord. 2005-041] [Ord. 2014-025]

29) Impact shutters projecting a maximum of 18 inches into the setback; and, [Ord. 2014-025]

30) Decorative architectural treatment such as lintels, stone veneer, or stucco banding, projecting a maximum of six inches into a setback. [Ord. 2014-025]

E. Building Height

The maximum height for buildings and structures in all districts shall be 35 feet, unless otherwise stated. [Ord. 2005-002]

1. Airport Zones

Structures in Airport Zones are subject to the height restrictions in Art. 16.B, Airport Protection Zoning Regulations Governing Airport Hazards. [Ord. 2017-025]

2. Multifamily, Non-Residential Districts, and PDDs

In the RM, CLO, CHO, CG, IL, IG, and PDD districts, buildings may exceed 35 feet in height as follows:

Buildings over 35 feet in height shall be set back in accordance with Table 3.D.1.A, Property Development Regulations (PDRs), with one additional foot of setback to be provided in addition to the required setback for each one foot in height, or fraction thereof, over 35 feet. In the PO district, buildings over 35 feet in height shall provide one foot of setback, in addition to required perimeter landscape buffers, for each additional one foot in height or fraction thereof over 35 feet. This regulation shall have no effect on any existing structure within the PO district that is conforming as of the effective date of this Code. [Ord. 2005-002] [Ord. 2007-013]

3. Accessory Agricultural Structures

In the AGR, AP, and AR districts, structures accessory to a Bona Fide Agriculture use may exceed 35 feet in height as follows: one additional foot of setback shall be provided in addition to the required setback for each one foot in height, or fraction thereof, over 35 feet to a maximum of 100 feet.

4. Height Exceptions

The following structures shall be exempt from the height restrictions in this Section, unless otherwise stated:

a. Church spires, religious domes, and religious ornamentation attached to a Place of Worship;
b. Belfries;
c. Monuments;
d. Tanks;
e. Water towers;
f. Fire towers;
g. Stage towers or scenery lofts;
h. Cooling towers;
i. Ornamental towers and spires;
j. Chimneys;
k. Structure built over the top of a stairwell or elevator shaft providing access to the rooftop for maintenance purposes or to house elevator mechanical equipment; [Ord. 2014-001]
l. Smoke stacks;
m. Oil derricks;
n. Conveyors;
o. Flag poles, subject to Art. 8, Signage, except for Art. 4.B.9, Commercial Communication Towers;
p. Aircraft control towers;
q. Aircraft navigation aids;
r. Accessory radio towers, subject to Art. 5.B.1.A.13, Accessory Radio Tower;
s. Art. 5.B.1.A.15, Amateur Radio and Television Antennas;
t. Art. 4.B.9, Commercial Communication Towers;
u. Required parapet screening of mechanical equipment; and, [Ord. 2014-001]
v. Mechanical equipment, less than five feet in height and any required screening, measured from the roof deck. [Ord. 2006-004]
Section 2  PDRs for Specific Housing Types

A. Townhouse

The minimum lot dimensions, maximum height, maximum FAR, maximum building coverage, and minimum setbacks and separations for Townhouses in all districts where they are permitted shall be as follows:

1. Ownership
   a. Common Area
      Where any portion of the original lot is not divided among and incorporated into the resulting Townhouse lots, then that portion of the original lot shall be held by either of the following or a combination of the following, in a form and manner acceptable to the County Attorney: [Ord. 2005-002]
      1) Each lot owner shall have an undivided interest in the common area, which shall be appurtenant to that lot. The individual interest in the common areas shall not be conveyed separately from the ownership of said lot; or
      2) A Property Owners' Association (POA).
   b. Individual Lot
      The minimum area to be conveyed to the lot owner shall be no less than 100 percent of the total ground floor building area of the dwelling unit. A homeowner’s maintenance association shall be formed among the unit owners to assure compliance with exterior area maintenance regulations as may be adopted by the association.

2. Height
   No building or structure shall exceed 35 feet in height.

3. Accessory Buildings and Structures
   No detached accessory buildings or structures other than permitted fences or walls shall be permitted on any lot less than 30 feet in width.

4. Access and Parking
   Townhouse lots may be arranged in groups fronting on Residential Access Streets (if located within a PDD) or fronting on parking tracts as allowed in Art. 11.E.2, Access and Circulation Systems. Minimum parking requirements shall be in accordance with Art. 6, Parking, Loading, and Circulation.

5. Replacement
   In an effort to address current building trends and needs of homeowners to modify existing units, the following procedures have been established to facilitate replacement and expansion of existing units, and to ensure the consistency of replacement units with the character of the overall community. In the event a Townhouse unit is replaced or expanded, the following shall apply: [Ord. 2008-037]
   a. Process
      1) Building Permit Review
         An application for Building Permit shall be consistent with typical unit detail approved on the DRO site plan or the original Building Permit. If no typical unit detail is included then staff will rely on the tabular data for setbacks/separations and height. [Ord. 2008-037]
      2) DRO Zoning Review
         An application for DRO Zoning Review shall be required to reflect proposed changes to a DRO approved Site Plan, typical unit shall include tabular data, setbacks/separations, and height. [Ord. 2008-037]
   b. Standards for Review
      1) Setbacks/separations may be decreased a maximum of 30 percent of the required minimum standard provided the development was not approved utilizing flexible regulations or received prior Variance relief. [Ord. 2008-037]
      2) A 30-percent increase in the maximum allowable height may be permitted. [Ord. 2008-037]
      3) Demonstrate compliance with all applicable parking, landscaping and drainage provisions. [Ord. 2008-037]
      4) Comply with all applicable application requirements. [Ord. 2008-037]
      5) Submit a letter of support from the applicable community HOA/POA. [Ord. 2008-037]
      6) Comply with any DRO approved architectural elevations or accepted revision consistent with Code. [Ord. 2008-037]
      Any purposed deviation that exceeds the above standards will require Variance relief pursuant to Art. 2.C.5.E, Type 1 Variance, [Ord. 2008-037]
6. **Issuance of Certificate of Occupancy (CO)**
   An attached Townhouse building shall be developed as a whole, and no CO for a Townhouse unit shall be issued until completion of one or more adjacent units and the entire attached building exterior, parking, and landscaping.

7. **Townhouse Attachment**
   A Townhouse unit shall be attached to another Townhouse unit along a minimum of 50 percent of the maximum depth of the unit. This minimum attached length between Townhouses is limited to the portion of a building supporting an air conditioned living area, a garage, or a storage area and shall share a continuous foundation with the Townhouse building.

**Notes:**

1. Front and side street setbacks measured from street or parking tract. Side and rear setbacks measured from plat, parcel, or pod boundary; lake maintenance easement, canal easement, or canal R-O-W; or, required landscape buffer. [Ord. 2005-002]

2. Separations apply to the proximity of one Townhouse group to another. Separation between two Townhouse buildings shall be by drawing a centerline between the two adjacent buildings and measuring a minimum distance equal to one-half of the required separation from the centerline to ensure an equidistant separation between structures. For the purpose of this Section, a Townhouse building shall mean two or more attached townhomes.

3. Recreation buildings and other structures which are not accessory structures shall comply with the setback requirements in this Section.
B. Zero Lot Line (ZLL)

1. Property Development Regulations

The minimum lot dimensions, maximum height, maximum building coverage, and minimum setbacks for ZLL homes in all districts where they are permitted, shall be as follows: [Ord. 2020-020]

[Ord. 2005-041] [Ord. 2020-020]

a. ZLL Side Setback

1) A ZLL home shall be located on a minimum of one, but not more than two, property lines, except as stated in Art. 3.D.2.B.1.b, Side Street Home. [Ord. 2005-002] [Ord. 2020-020]

2) A minimum of 20 feet of the length of the home under air or occupied by a totally enclosed area under roof which is attached to and directly accessible from an air conditioned living area, such as a garage or storage area, shall be located on one lot line and shall have a zero-foot setback from the lot line. [Ord. 2020-020]

(a) The remaining portion of the home along the ZLL side shall be set back a minimum of four feet from the zero property line, unless otherwise stated herein Art. 3.D.2.B.1.c, Double ZLL Home, and Art. 3.D.2.B.3, Design Standards. [Ord. 2020-020]

b. Side Street Home

A Side Street home shall be located on a lot having one side of the unit abutting a street, abutting a minimum of 50 feet of open space, or a combination thereof. A Side Street home shall comply with the setbacks pursuant to Table 3.D.2.B, ZLL Property Development Regulations. [Ord. 2005-041] [Ord. 2020-020]

Figure 3.D.2.B – Typical Example of ZLL Home PDRs

[Ord. 2005-041] [Ord. 2020-020]
c. **Double ZLL Home**

A Double ZLL home is constructed with portions of the home located on two side property lines.  
**[Ord. 2020-020]**

1) The portion of the home abutting the ZLL side shall be under air or occupied by a totally enclosed area, such as a garage or storage area; and **[Ord. 2020-020]**

2) A Corner home shall have a minimum of 20 feet of the length of the home located on one lot line and shall have a zero-foot setback from the lot line; or **[Ord. 2020-020]**

3) An Interior Double ZLL home shall have a minimum of ten feet of length of the home on each ZLL side property, for a minimum total of 20 feet. **[Ord. 2020-020]**

**Notes:**

1. A minimum ten-foot setback shall be provided for the portion of the Double ZLL home that is not built with a zero-foot setback. Reduction in setbacks, as described in Art. 3.D.2.B.3.b.3), Windows and Doors, shall be prohibited. **[Ord. 2020-020]**

2. A minimum six-foot separation between the exterior walls and a minimum four-foot separation for overhangs, shall be provided between Double ZLL units located on the same ZLL side with the zero-foot setback unless waived by the Building Official based on requirements of the current edition of the Florida Building Code. **[Ord. 2020-020]**

### Figure 3.D.2.B – Typical PDRs for Double ZLL Homes

---

Unified Land Development Code  
Supplement No. 28 (Printed 09/20)
d. **ZLL Adjacent to Other Housing Types**

1) A new ZLL lot shall not have a ZLL side abutting the side or rear property lines of an existing SF lot with a SFD. A new ZLL lot abutting to a platted SF lot that is vacant may be allowed pursuant to Art. 3.D.2.B.1.d.2. [Ord. 2020-020]

2) A new subdivision may include both ZLL and SF lots. If a ZLL lot abuts a SF lot, and the shared property line is the ZLL side, the SF lot shall have a minimum ten-foot side or 15-foot rear setback. The SF lot shall have an Access, Maintenance, and Roof Overhang Easement recorded pursuant to Art. 3.D.2.B.3.e, Access, Maintenance, and Roof Overhang Easement. [Ord. 2020-020]

3) A new subdivision may include ZLL and MF or Cottage Homes (Multiple Units on a Single Lot). If a ZLL lot abuts the MF or Cottage Homes (Multiple Units on a Single Lot), and the shared property line is the ZLL side, the side setback for MF and Cottage Homes (Multiple Units on a Single Lot) shall be a minimum of 15 feet. The MF or Cottage Homes (Multiple Units on a Single Lot) lot shall have an Access, Maintenance, and Roof Overhang Easement recorded pursuant to Art. 3.D.2.B.3.e, Access, Maintenance, and Roof Overhang Easement. [Ord. 2020-020]

4) ZLL lot shall not abut a Cottage Home (Single Unit on a Single Lot) or a Townhouse lot. [Ord. 2020-020]

2. **Replacement**

In an effort to address current building trends and needs of homeowners to modify existing units, the following procedures have been established to facilitate replacement and expansion of existing units, and to ensure the consistency of replacement units with the character of the overall community. In the event an existing home is being replaced, modified, or expanded, the following shall apply: [Ord. 2008-037] [Ord. 2020-020]

a. **General**

The application of a provision in this Section, which was not allowed prior to the effective date of this Code, shall require: [Ord. 2020-020]

1) consent from the HOA;
2) submittal of an application, pursuant to Art. 2, Application Processes and Procedures, to amend the prior DO; [Ord. 2020-020]
3) the amendment to apply to an entire pod; and,
4) the pod to be brought into conformance with the remainder of this Code, to the extent possible.

b. **Process**

1) **Building Permit Review**

An application for Building Permit shall be consistent with either a typical unit detail that is shown on the Final Plan approved by the DRO or the original Building Permit. If no typical unit detail is included on the Final Plan, then Staff shall rely on the Site Data Table for setbacks/separations and height required at the time of issuance of the original DO. [Ord. 2008-037] [Ord. 2020-020]

2) **Administrative Modifications**

An application for Full DRO shall be required to reflect proposed changes on the subdivision or regulation plan typical unit detail including: tabular data, setbacks/separations, and height. [Ord. 2008-037] [Ord. 2020-020]

a) Setbacks/separations may be decreased a maximum of 30 percent of the required standard at time of issuance of the DO, provided the development was not approved utilizing flexible regulations or received prior Variance relief and the setbacks are not less than the requirements pursuant to Table 3.D.2.B, ZLL Property Development Regulations or Table 3.D.2.B, Double ZLL Property Development Regulations. [Ord. 2008-037] [Ord. 2020-020]

b) A 30 percent increase in the maximum allowable height approved in the original DO may be permitted, provided it does not exceed the height limitations described in Table 3.D.2.B, ZLL Property Development Regulations or Table 3.D.2.B, Double ZLL Property Development Regulations, and complies with the requirements of Art. 3.D.2.B.3.a, Height and Story Limitation. [Ord. 2008-037] [Ord. 2020-020]

c) The Applicant shall demonstrate compliance with all applicable parking, landscaping, and drainage provisions; [Ord. 2008-037] [Ord. 2020-020]

d) The Applicant must comply with all applicable application requirements; [Ord. 2008-037] [Ord. 2020-020]

e) The Applicant must submit a letter of support from the applicable community HOA/POA; and, [Ord. 2008-037]
f) Any proposed deviation that exceeds the above standards will require Variance relief pursuant to Art. 2.C.5.E, Type 1 Variance. [Ord. 2008-037] [Ord. 2020-020]

3. Design Standards
   a. Height and Story Limitation
      Buildings or structures shall not exceed 35 feet in height. Lots with a ZLL side that abuts the rear property line of an adjacent lot or is separated from the rear property line of an abutting lot by less than ten feet of open space shall be limited to a home one story (one floor) in height. If the lots are separated with open space ten feet or greater, the homes may have two stores (two floors). [Ord. 2009-040] [Ord. 2020-020]

![Figure 3.D.2.B – ZLL Story Limitations Based on Separation](image)

b. ZLL Side Façade
   Certain openings and attachments shall not be allowed to penetrate or be attached to any portion of the home on the ZLL side, except as otherwise listed below. [Ord. 2020-020]

   1) Prohibited Openings and Attachments
      a) Prohibited openings and attachments include, but are not limited to, the following: [Ord. 2005-002] [Ord. 2020-020]
         (1) A/C condensate drain; [Ord. 2005-002]
         (2) A/C emergency overflow drain; [Ord. 2005-002]
         (3) Exhaust ducts, such as, but not limited to, kitchens, bathrooms, clothes dryers, etc.; [Ord. 2005-002]
         (4) Garage vents; [Ord. 2005-002]
         (5) Temperature or pressure relief line; [Ord. 2005-002]
         (6) Doors, except as otherwise stated below; [Ord. 2005-002] [Ord. 2020-020]
         (7) Windows, except as otherwise stated below; [Ord. 2005-002] [Ord. 2020-020]
         (8) Electric meters; [Ord. 2005-002]
         (9) Hose bibs; [Ord. 2005-002]
         (10) Satellite dishes; and, [Ord. 2005-002]
         (11) Electrical outlets. [Ord. 2020-020]
      b) Exceptions may be considered only for those existing projects where an opening or attachment was permitted on the ZLL wall for the models or more than 30 percent of the total ZLL units of that project. [Ord. 2005-002] [Ord. 2020-020]

   2) Permitted Openings
      Clean out fittings and soffit vents shall be allowed to penetrate and/or be attached to the portion of the home on the ZLL side. [Ord. 2005-002] [Ord. 2020-020]
3) **Windows and Doors**
Window and door materials may be used along the portion of the home on the ZLL side pursuant to the following: [Ord. 2020-020]

a) **Translucent Windows or Translucent/Solid Doors**
Material which allows a maximum 60 percent of exterior light transmission according to the manufacturer's specifications shall be used. A notarized affidavit shall be submitted with the Building Permit which verifies the degree of light transmission and the translucency of the material to be used. [Ord. 2020-020]

b) **First Floor**
   (1) **ZLL Façade Constructed Less Than Five Feet from the ZLL Side Property Line**
      (a) Windows shall be constructed with translucent material. [Ord. 2020-020]
      (b) Doors shall be constructed with translucent or solid material and may not be located on any portion of a wall with a zero setback. [Ord. 2020-020]
      (c) A privacy wall/fence shall be installed pursuant to Art. 3.D.2.B.3.d.1)a). [Ord. 2020-020]
      (d) **Exceptions**
         i. Windows and doors located on the front or rear façade of the unit may be transparent. [Ord. 2020-020]
         ii. Windows and doors located on a façade that is perpendicular to the ZLL side may be transparent. [Ord. 2020-020]
         iii. A ZLL side façade that is recessed off of the ZLL side less than five feet, may have transparent windows and doors constructed on the ZLL side façade that are parallel or angled towards the ZLL side. The height of the privacy wall or fence shall be increased and installed pursuant to Art. 3.D.2.B.3.d.1)c)(1). [Ord. 2020-020]
   (2) **ZLL Façade Constructed Greater Than or Equal to Five Feet from the ZLL Side Property Line**
      (a) A ZLL side façade that is recessed off of the ZLL side five feet or greater, may have transparent or translucent windows and doors constructed on the ZLL side façade that are perpendicular, parallel, or angled towards the ZLL side. [Ord. 2020-020]
      (b) A privacy wall or fence is only required extending a minimum distance of ten feet beyond the rear of the home toward the rear property line pursuant to Art. 3.D.2.B.3.d.1)a). [Ord. 2020-020]
   (3) **Double ZLL Home**
      (a) For the portion of the ZLL home that is constructed at the ZLL side, all windows shall be constructed with translucent material, and doors shall be prohibited. Windows and doors located on a façade that is perpendicular to the ZLL side may be transparent. [Ord. 2020-020]
      (b) For the portion of the ZLL home that is constructed ten feet from the ZLL side, windows and doors may be transparent or translucent material. [Ord. 2020-020]
      (c) A privacy wall pursuant to Art. 3.D.2.B.3.d.1)a) is not required. [Ord. 2020-020]

c) **Second Floor**
   (1) **ZLL Façade Constructed Less Than Five Feet from the ZLL Side Property Line**
      (a) Windows located on a façade that is parallel or angled toward the ZLL side shall be constructed with translucent material. [Ord. 2020-020]
      (b) Windows located on a façade that is perpendicular to the ZLL side may be transparent. [Ord. 2020-020]
   (2) **ZLL Façade Constructed Greater Than or Equal to Five Feet from the ZLL Side Property Line**
      (a) A ZLL side façade that is recessed off of the ZLL side five feet or greater, may have transparent or translucent windows constructed on the ZLL side façade that are perpendicular, parallel, or angled towards the ZLL side. [Ord. 2020-020]
   (3) **Double ZLL Home**
      (a) For the portion of the ZLL home that is constructed at the ZLL side, all windows shall be constructed with translucent material; and [Ord. 2020-020]
      (b) For the portion of the ZLL home that is constructed ten feet from the ZLL side, windows and doors may be transparent or translucent material. [Ord. 2020-020]
d) Exception
Transparent windows may be permitted on the ZLL side (first or second story) if the ZLL side façade abuts a dedicated open space or landscape buffer a minimum of 50 feet in width. [Ord. 2020-020]

e) Surface Area
Use shall be limited to a maximum of 50 percent of the surface area of the wall along the portion of the home on the ZLL side.

f) Limitation
Use shall be limited to new construction only, unless consent from the HOA is submitted with the Building Permit.

Figure 3.D.2.B – ZLL Home Windows and Doors

---

c. Covered Porches, Courtyards, and Balconies

1) Covered Porch (Front of the ZLL Home)
A covered porch may be constructed along the ZLL side, at the front of the home. If windows and doors are constructed into the façade of the home adjacent to the porch, the following shall apply: [Ord. 2020-020]

   a) Windows or doors, parallel or angled toward and less than five feet from the ZLL side shall be constructed with translucent material. [Ord. 2020-020]

   b) Windows or doors, parallel or angled toward and greater or equal to five feet or perpendicular to the ZLL side may be constructed with transparent material. [Ord. 2020-020]

   c) No privacy wall is required adjacent to the covered porch. [Ord. 2020-020]

2) Covered Porch (Rear of the ZLL Home)
A covered porch, with a solid roof, may be constructed along the ZLL side, at the rear of the home. A wall shall be constructed the entire length of the porch along the ZLL side. The height of the wall shall be a minimum of eight feet. The privacy walls or fences shall be installed in accordance with ZLL wall Art. 3.D.2.B.3.c, Privacy Walls or Fences. [Ord. 2020-020]
3) Courtyard
   A courtyard may be constructed along the ZLL side. A gate shall be installed on the ZLL for emergency exit purposes provided the gate meets the following dimensions: [Ord. 2020-020]
   a) Width: minimum of 36 inches; [Ord. 2020-020]
   b) Height: minimum of five feet; [Ord. 2020-020]
   (1) Exception
      If the ZLL façade, within the courtyard, has windows and doors installed pursuant to Art. 3.D.2.B.3.b.3)b)(1)(d)ii, the privacy wall and gate shall be increased in height, six feet eight inches, pursuant to Art. 3.D.2.B.3.d, Privacy Walls or Fences.
   c) The gate shall be opaque; and, [Ord. 2020-020]
   d) Operable only from the inside with the gate opening inward toward the unit. [Ord. 2020-020]

4) Balconies (Front or Rear of the Home)
   In addition to the requirements of Art. 3.D.1.D.5, Setback Exceptions, balconies located less than five feet from the ZLL side, shall construct a wall the entire length of the porch along the ZLL side subject to the following: [Ord. 2020-020]
   a) No roof: The height of the wall shall be a minimum six feet eight inches. [Ord. 2020-020]
   b) Roof: The height of the wall shall be a minimum of eight feet from the floor of the balcony. [Ord. 2020-020]
Figure 3.D.2.B – ZLL Balcony, Rear

Legend:
W = Width
D = Depth
S = Side
R = Rear
F = Front
ZS = ZLL Side
SS = Side Street
SEP = Separation
Privacy Wall

Note: The minimum length of the privacy wall is 10 feet (3.048 meters). The height of a wall must be consistent with the height of the building and its maximum height shall not exceed a maximum of 10 feet (3.048 meters).
d. Privacy Walls or Fences
   1) Wall or Fence
      a) A minimum five-foot-high opaque wall or fence shall be provided along the ZLL side of a
         ZLL home, beginning at the end of the home with a zero setback and extending a minimum
         distance of ten feet beyond the rear of the home toward the rear property line. [Ord. 2005-
         041] [Ord. 2020-020]
      b) A minimum five-foot-high opaque wall or fence, including a gate, shall be constructed the
         entire length of an opening for a courtyard. [Ord. 2020-020]
      c) Exception
         (1) A wall or fence shall not be required if the ZLL side is adjacent to dedicated open space
             a minimum of 50 feet in width. [Ord. 2020-020]
         (2) ZLL Façade Constructed Less Than Five Feet from the ZLL Side Property Line with
             Transparent Windows or Doors
             (a) A minimum six foot eight inch high opaque wall or fence and any courtyard gate
                 shall be provided along the ZLL side of a ZLL home when transparent windows
                 and doors are constructed parallel or angled toward the ZLL side, pursuant to Art.
             (b) The length of the wall shall begin at the end of the home with a zero setback and
                 extend a minimum two feet beyond the window or door with transparent material.
                 The remaining length of the wall or fence shall be constructed a minimum 5 foot
                 high, pursuant Art. 3.D.2.B.3.d.1)a). The two foot extension provision above shall
                 not apply to courtyards fully enclosed by a minimum six foot eight inch high opaque
                 wall or fence and any courtyard gate. [Ord. 2020-020]
         (3) ZLL Façade Constructed Greater Than or Equal to Five Feet from the ZLL Side
             Property Line
             A privacy wall or fence is only required at the point extending a minimum distance of
             ten feet beyond the rear of the home toward the rear property line, pursuant to Art.
(4) Covered Porch (Rear) and Balconies (Front or Rear)
Privacy walls shall extend the length of the covered porch or balcony when less than five feet from the property line. The height of the wall shall be a minimum eight feet. [Ord. 2020-020]

2) Rear Lot Line
A minimum five-foot-high opaque wall or fence shall be provided along the rear lot line between lots with abutting rear lot lines and between lots with abutting side and rear property lines.

3) Design Requirements
If a wall is constructed, the required wall, including any extension, shall be constructed of the same material used to construct the adjoining ZLL wall of the home (e.g., brick home with a brick privacy wall) or any structurally sound, opaque, and permanent material with an exterior finish that matches the style, color, and surface texture of the exterior of the adjoining ZLL wall (e.g., CBS home with stucco finished wood frame wall painted to match the home).

4) Roof Enclosures
When a screened enclosure is attached to the ZLL wall, the length and height of the wall shall comply with Art. 5.B.1.A.11, Screen Enclosures. [Ord. 2020-020]

e. Access, Maintenance, and Roof Overhang Easement
The subdivision plan, plat, and subsequent surveys submitted with an application for a building permit, shall indicate an Access, Maintenance, and Roof Overhang Easement along the ZLL for each ZLL lot for the purpose of allowing access for emergency purposes of exiting the home and for the maintenance of the portion of the home with a zero setback and to accommodate any overhang of the roof eave and gutter. Should a fence or wall traverse or be located within the easement, written permission from the POA will be required prior to the issuance of a permit by PBC. A gate for access and maintenance purposes will be required. Access for the owner of the lot abutting the easement and the easement beneficiaries shall be provided after advanced notification and during reasonable hours except for emergency purposes as provided for above. No construction, landscaping, mechanical equipment, fence, or wall shall prevent perpetual access to said easement by the owner of the lot abutting the easement or the easement beneficiaries.

[Ord. 2013-001] [Ord. 2015-031] [Ord. 2020-020]

1) Easement Width
This easement shall have a minimum width of two feet.

2) Roof Overhang
Roof eaves, gutters, and soffits may encroach the easement up to a maximum of 24 inches. Gutters shall be installed along the entire length of the ZLL side to prevent water runoff onto the adjacent property.

3) Drainage
This easement shall not overlap a drainage easement.

4) Plat
A dedication shall be included on the plat for each ZLL subdivision for an Access, Maintenance, and Roof Overhang Easement. The easement language will incorporate the purpose and intent as described in Art. 3.D.2.B.3.e, Access, Maintenance, and Roof Overhang Easement, in a format approved by the County Engineer, and referenced in the Land Development Forms Manual. [Ord. 2020-020]

5) Easement Encroachments
Projections or improvements may be permitted to encroach into the ZLL Access, Maintenance, and Roof Overhang Easement, as follows: [Ord. 2014-025] [Ord. 2020-020]

a) Mounting hardware for impact shutters, accordion shutters, or roll-down shutters, projecting a maximum of six inches into the ZLL easement; and [Ord. 2014-025]

b) Decorative architectural treatment such as lintels, stone veneer, or stucco banding extending a maximum distance of three feet measured from the front façade, projecting a maximum of two inches into a ZLL easement. [Ord. 2014-025]
D. **Mobile Home Parks**

1. **Purpose and Intent**
   
   To recognize Florida State laws pertaining to the placement of residential manufactured buildings (a.k.a. modular homes) in mobile home park communities, to provide additional flexibility to allow for the redevelopment of fee simple mobile home park lots with either modular homes or traditional Single Family dwelling units. [Ord. 2012-027]

2. **Applicability**
   
   The provisions of this Section shall only apply to: [Ord. 2012-027]
   
   a. Existing mobile home parks identified in PZB PPM #MD-RI-003, Mobile Home Parks in Unincorporated Palm Beach County; and [Ord. 2012-027]
   
   b. Provisions allowing for alternative PDRs and related requirements for residential manufactured buildings or Single Family dwellings shall only be permitted for existing fee simple mobile home subdivisions. [Ord. 2012-027]

3. **Residential Manufactured Building (Modular Home)**
   
   An existing mobile home may be replaced with a modular home subject to the following: [Ord. 2012-027]
   
   a. Requirements of PZB PPM #MD-RI-003; and [Ord. 2012-027]
   
   b. Where applicable, subject to prior written approval of the mobile home park owner in accordance with F.S. § 553.382, Placement of Certain Housing. [Ord. 2012-027]

4. **Alternative Provisions for Fee Simple Lots**
   
   A modular home or a Single Family dwelling shall be permitted to be placed on a fee simple lot within an existing mobile home subdivision, subject to the following: [Ord. 2012-027]
   
   a. **PDRs**
      
      The following PDRs shall apply to modular homes or SFDs. Setbacks for accessory structures shall be in accordance with Art. 5.B.1.A, Accessory Uses and Structures. [Ord. 2012-027]
      
      1) Minimum lot width: 45 feet. [Ord. 2012-027]
      
      2) Maximum lot coverage: 50 percent. [Ord. 2012-027]
      
      3) Front and side street setback: 20 feet. [Ord. 2012-027]
      
      4) Side setback: seven and one-half feet. [Ord. 2012-027]
      
      5) Rear setback: 15 feet. [Ord. 2012-027]

   b. **Garages**
      
      Garages and carports may be permitted only on the rear portion of the lot. An attached garage may be permitted to encroach the front half of the lot, if set back a minimum of 20 feet from the front façade. Attached carports shall not extend past the front façade. [Ord. 2012-027]

   c. **Main Entrances and Porches**
      
      When located on lots less than 50 feet in width, main entrances shall be required to front a street, and include a porch a minimum of six feet deep, 12 feet wide and 18 inches above grade. [Ord. 2012-027]

   d. **Changes to Lot Finished Grade**
      
      Any modifications to a lot that raises the grade for the proposed foundation shall not alter the existing grade within the required side setbacks unless demonstrated that such will not alter any historical drainage patterns for adjacent lots. Where foundation elevation is required, this may require the use of a retaining wall to ensure that existing grade and drainage patterns are not adversely impacted. [Ord. 2012-027]
E. **Cottage Homes**

Cottage Homes are detached housing types that may be developed with one unit or multiple units on a single lot. [Ord. 2019-034]

Cottage Homes shall comply with the following PDRs: [Ord. 2018-018] [Ord. 2019-034]

<table>
<thead>
<tr>
<th>Lot Dimensions</th>
<th>Single Unit on a Single Lot (2)(5)</th>
<th>Multiple Units on a Single Lot (Shared)</th>

Notes:
1. Minimum Property Development Regulations except where it stated as maximum.
2. Apply to a Cottage Home that is located on a single lot. This may apply to either a subdivided lot of a pod in a PDD or in a Standard Zoning District. [Ord. 2019-034]
3. The minimum lot size of the zoning district which multiple Cottage Homes are located shall apply. [Ord. 2019-034]
4. Setbacks shall be measured from the lot. The front setback shall be measured from the property line or base building line, whichever is applicable, where the lot frontage is located. [Ord. 2019-034]
5. A Cottage Home (Single Unit on a Single Lot) shall not abut a ZLL home. [Ord. 2020-020]
6. A new subdivision may include ZLL and Cottage Homes (Multiple Units on a Single Lot). If a ZLL lot abuts the Cottage Homes (Multiple Units on a Single Lot), and the shared property line is the ZLL side, the side setback for the Cottage Homes (Multiple Units on a Single Lot) shall be a minimum of 15 feet. The Cottage Homes (Multiple Units on a Single Lot) lot shall have an Access, Maintenance, and Roof Overhang Easement recorded pursuant to Art. 3.D.2.B.3.e, Access, Maintenance, and Roof Overhang Easement. [Ord. 2020-020]

Section 3  **District Specific Regulations**

A. **District Specific Regulations**

Additional PDRs shall apply in certain districts as follows:

1. **CN District**
   a. **Enclosed Uses**
      All uses shall be operated entirely within enclosed buildings, with the following exceptions: [Ord. 2005-002]
      1) Air Curtain Incinerator, temporary; [Ord. 2005-002]
      2) Commercial Communication Tower; [Ord. 2005-002] [Ord. 2017-007]
      4) Passive Park; [Ord. 2005-002] [Ord. 2017-007]
      6) Minor Utility; and, [Ord. 2005-002] [Ord. 2017-007]
      7) Water or Wastewater Treatment Plant. [Ord. 2005-002] [Ord. 2017-007]

2. **CLO District**
   a. **Enclosed Uses**
      All uses shall be operated entirely within enclosed buildings, with the following exceptions:
      1) Air Curtain Incinerator, temporary;
      2) Commercial Communication Tower; [Ord. 2017-007]
      3) Electric Power Plant; [Ord. 2017-007]
      4) Passive Park; [Ord. 2017-007]
      5) Recreation Facility, accessory;
      6) Recycling Drop-Off Bin; [Ord. 2013-001]
      7) Solid Waste Transfer Station; [Ord. 2017-007]
      8) Minor Utility; and, [Ord. 2017-007]
      9) Water or Wastewater Treatment Plant. [Ord. 2017-007]

3. **IPF, Institutional and Public Facilities District with UT FLU Designation**

   Use of the IPF district with a UT FLU designation, shall only be permitted for privately-operated utility uses and related collocated or accessory uses. [Ord. 2017-007]
a. Accessory Uses
   Heavy Equipment Repair and Maintenance and Light Repair and Maintenance may be allowed as an accessory use to a privately-operated utility use, subject to the approval process for the applicable utility use. [Ord. 2017-007]

b. Collocated Uses
   Data and Information Processing or Warehouse uses may be allowed as a collocated use, subject to the approval process for the applicable utility use. Additional uses to allow for emergency management staging or operations may be permitted subject to Class A Conditional Use approval. [Ord. 2017-007]

CHAPTER E  PLANNED DEVELOPMENT DISTRICTS (PDDs)

Section 1  General

A. General
   1. Purpose and Intent
      The purpose of PDDs is to provide opportunities for development patterns which exceed the expectations of the Standard Zoning Districts, and allow for the creative use of land. The types of development addressed in this Chapter include those encouraged by the Managed Growth Tier System (MGTS) in the Plan. The intent of this Chapter is to encourage ingenuity, and imagination on the part of, architects, landscape architects, engineers, planners, developers, and builders to create development that promotes sustainable living, addresses traffic impacts, encourages alternative modes of transportation, creates logical street and transportation networks, preserves the natural environment, enhances the built environment, provides housing choices, provides services to the community, encourages economic growth, encourages infill development and redevelopment, and minimizes impacts on surrounding areas through the use of flexible and innovative land development techniques. [Ord. 2009-040]

   2. Applicability
      In addition to the other Articles in this Code, the requirements of this Chapter shall apply to all PDDs, modifications to previously approved PDDs, and modifications to previously approved Special Exceptions for planned developments, unless otherwise stated.
      a. Previous Approvals
         Previously Approved Planned Developments with a Development Order that does not conform to provisions in this Code shall be considered conforming in accordance with Art. 1.E, Prior Approvals, where in compliance with the requirements of Art. 3.A.3, Zoning District Consistency with the Future Land Use Atlas (FLUA). [Ord. 2009-040] [Ord. 2010-022] [Ord. 2011-016]
         1) Development Order Amendment
         2) Additional Requested Uses
            Previously approved “Additional Conditional Uses” shall remain conforming uses, and may be modified or expanded, subject to a DOA Approval. [Ord. 2005-002] [Ord. 2009-040] [Ord. 2018-002]
      b. Government Facilities
         A parcel of land in any FLU category that supports government facilities shall be exempt from the PDD threshold provisions. [Ord. 2007-013] [Ord. 2009-040]

   3. Conflicts
      If a conflict exists between this Chapter and other Articles in this Code, the provisions of this Chapter shall apply to the extent of the conflict.

   4. Site Plan/Subdivision Plan Approval Required
      All pods shown on a Master Plan shall receive approval of a Final Site Plan or a Final Subdivision Plan pursuant to Art. 2.C, Administrative Processes. [Ord. 2020-020]

B. FAR, Density, and Use Standards
   1. PDDs Split by FLU Designations
      Uses allowed, PDRs, density, and intensity shall be determined by the land use designation on the affected area. In the U/S Tier, density may be transferred from one portion of the project to another based on the gross acreage of the project. An underlying designation is not a split FLU designation. [Ord. 2009-040] [Ord. 2019-005]
2. PDDs with Underlying FLU Designations
   a. PDDs that have a non-residential FLU designation and an underlying residential FLU designation may utilize density and/or intensity for either or both FLU designations. [Ord. 2019-005]
   b. PDDs that have two non-residential FLU designations may utilize either or both FLU designations. If the Development Order utilizes both FLU designations, a Preliminary Master Plan shall be approved by the BCC depicting the locations of each FLU as a pod. Each pod will be limited to the allowable uses, for the applicable FLU designation, pursuant to Art. 4.B, Use Classification and the property development regulations pursuant to Table 3.E.3.D, MUPD Property Development Regulations. The FAR shall be in accordance with FLUE Table III.C.2 for each pod and the applicable FLU designation. Double counting of intensity is prohibited. [Ord. 2019-005]

3. Density
   The allowable density shall be pursuant to FLUE Table 2.2.1-g.1 and other related Policies. [Ord. 2009-040] [Ord. 2019-005]

4. Uses Allowed
   Uses allowed in a PDD shall be pursuant to Art. 4, Use Regulations. Previously Approved Planned Developments shall be governed by the FLU designation in the Plan or pod designation on the most recent approved Master Plan for the purpose of determining the uses allowed and applicability of this Code. Previously approved additional Conditional Uses shall be considered conforming uses, and any expansion, relocation, or increase in intensity shall be subject to BCC approval. [Ord. 2005-041] [Ord. 2017-007] [Ord. 2018-002]

5. Use Regulations
   Uses permitted in a PDD shall be according to the pod designation on the Master Plan approved by the DRO, or the land use designation of the PDD, whichever is applicable. Uses may be further limited by the Development Order, concurrency reservation, or other applicable requirement. [Ord. 2009-040]
   a. Conditional Use
      Conditional Uses shall be shown on the Master Plan or Site Plan approved by the BCC and shall remain in the location shown. All prior approvals for a Requested Use shall correspond to a Conditional Use. [Ord. 2017-007]

C. Objectives and Standards
   1. Design Objectives
      Planned developments shall comply with the following objectives:
      a. Contain sufficient depth, width, and frontage on a public street, or appropriate access thereto, as shown on the PBC Thoroughfare Identification Map to adequately accommodate the proposed use(s) and design;
      b. Provide a continuous, non-vehicular and pedestrian circulation systems which connect uses, public entrances to buildings, recreation areas, amenities, usable open space, and other land improvements within and adjacent to the PDD; [Ord. 2019-005]
      c. Provide pathways and convenient parking areas designed to encourage pedestrian circulation between uses;
      d. Preserve existing native vegetation and other natural/historic features to the greatest possible extent;
      e. Screen objectionable features (e.g., mechanical equipment, loading/delivery areas, storage areas, dumpsters, compactors) from public view and control objectionable sound;
      f. Locate and design buildings, structures, uses, pathways, access, landscaping, water management tracts, drainage systems, signs, and other primary elements to minimize the potential for any adverse impact on adjacent properties;
      g. Minimize parking through shared parking and mix of uses;
      h. Creation of a strong pedestrian system through the design and placement of buildings connected to a common public space or usable open spaces; and, [Ord. 2019-005]
      i. For PDDs with non-residential uses, a minimum of one pedestrian amenity for each 100,000 square feet of non-residential GFA, or fraction thereof, shall be incorporated into the overall development to create a pedestrian friendly atmosphere. Suggested amenities include, but are not limited to: [Ord. 2009-040] [Ord. 2019-005]
         1) public art; [Ord. 2009-040]
         2) clock tower; [Ord. 2009-040]
         3) water feature/fountain; [Ord. 2009-040]
         4) outdoor patio, courtyard, or plaza; and, [Ord. 2009-040]
         5) tables with umbrellas for open air eating in common areas and not associated with tenant use (i.e. restaurant) or outdoor furniture. [Ord. 2009-040]
2. Performance Standards
   Planned developments shall comply with the following standards:
   a. Access and Circulation
      1) Minimum Frontage
         PDDs shall have a minimum of 200 linear feet of frontage along an Arterial or Collector Street unless stated otherwise herein; [Ord. 2010-022] [Ord. 2012-027]
         a) Type 2 Waiver – Infill Development
            The BCC may grant a Type 2 Waiver to reduce the frontage requirement in the U/S Tier upon demonstration by the Applicant that the requirements cannot be satisfied by any other means and by complying with the following standards: [Ord. 2005-002] [Ord. 2010-022] [Ord. 2012-027]
               (1) the reduction is the minimum necessary to provide safe and adequate access to the project; [Ord. 2005-002]
               (2) the reduction will not result in any undue hardship or adverse impact on adjacent Property Owners; [Ord. 2005-002]
               (3) the reduction will not adversely affect the development of adjacent land in accordance with the Plan and this Code; [Ord. 2005-002]
               (4) the reduction is supported by the County Engineer and PZB; [Ord. 2005-002]
         b) PUD Minimum
            The BCC shall not reduce the frontage requirements below the following thresholds: [Ord. 2005-002]
               (1) 1,500 trips or less: 50 feet of frontage. [Ord. 2005-002]
               (2) More than 1,500 trips: 80 feet of frontage. [Ord. 2005-002]
            Further reductions from the frontage requirements shall only be allowed by the ZC as a Type 2 Variance in accordance with Art. 2.B.7.E, Type 2 Variance. [Ord. 2005-002]
      2) PDDs shall have legal access on an Arterial or Collector Street;
      3) Vehicular access and circulation shall be designed to minimize hazards to pedestrians, non-motorized forms of transportation, and other vehicles. Merge lanes, turn lanes and traffic medians shall be required where existing or anticipated heavy traffic flows indicate the need for such controls;
      4) Traffic improvements shall be provided to accommodate the projected traffic impact;
      5) Cul-de-sacs
         The objective of this provision is to recognize a balance between dead end streets and interconnectivity within the development. In order to determine the total number of Local Streets that can terminate in cul-de-sacs, the Applicant shall submit a Street Layout Plan, pursuant to the Technical Manual. The layout plan shall indicate the number of streets terminating in cul-de-sacs, as defined in Art. 1, General Provisions of this Code, and how the total number of streets is calculated. During the DRO certification process, the addressing section shall confirm the total number of streets for the development, which would be consistent with how streets are named. Streets that terminate in a T-intersection providing access to less than four lots, or a cul-de-sac that abuts a minimum 20-foot-wide open space that provides pedestrian cross access between two pods shall not be used in the calculation of total number of cul-de-sacs or dead end streets. [Ord. 2008-037]
         a) 40 percent of the Local Streets in a PDD may terminate in a cul-de-sac or a dead end by right. [Ord. 2007-001] [Ord. 2008-037]
         b) An additional 25 percent of the Local Streets in a PDD may terminate in a cul-de-sac pursuant to a Type 2 Waiver application approved by the BCC. The BCC shall consider the following additional standards when deciding whether or not to approve the Waiver. [Ord. 2007-001] [Ord. 2008-037] [Ord. 2012-027]
            (1) cul-de-sacs terminate in an open space that provides amenities accessible to the residents of the development; and [Ord. 2008-037]
            (2) cul-de-sacs connect to a pedestrian system including but not limited to sidewalks, and designated path or trail systems. [Ord. 2008-037]
      6) Non-residential PDDs shall provide cross access to adjacent properties where possible, subject to approval by the County Engineer;
      7) Streets shall not be designed nor constructed in a manner which adversely impacts drainage in or adjacent to the project; and,
      8) Public streets in the project shall connect to public streets directly adjacent to the project. If no adjacent public streets exist, and the County Engineer determines that a future public street is
possible, a connection to the property line shall be provided in a location determined by the County Engineer. This standard may be waived by the BCC.

b. Street Lighting
Streetlights shall be a maximum of 25 feet in height and shall be installed along all streets 50 feet in width or greater. The light fixture shall be designed to direct light away from residences and onto the sidewalk and street and shall comply with Art. 5.E, Performance Standards.

c. Median Landscaping
Refer to the most recent Engineering and Public Works Operations – Streetscape Standards available from the PBC Engineering Department. [Ord. 2011-001]

d. Street Trees
Street trees shall meet the Canopy tree requirements of Art. 7, Landscaping and planting standards pursuant to Engineering and Public Works Operations – Streetscape Standards, and as follows: [Ord. 2011-001]

1) Street trees shall be spaced an average of 50 feet on center. Palms meeting the requirements of Art. 7, Landscaping and Engineering and Public Works Operations – Streetscape Standards, may be planted as street trees if spaced an average of 40 feet on center. [Ord. 2011-001]

2) Street trees shall be located along both sides of all streets 50 feet in width or greater and shall be planted between the edge of pavement and sidewalk. Appropriate root barrier techniques shall be installed where applicable. [Ord. 2011-001]

3) Street trees shall be installed in accordance with the phasing of the Planned Development pursuant to Art. 7.F.2.B.1, Developments with Phasing. For residential PDDs, planting of street trees shall be completed prior to the issuance of the final Certificate of Occupancy within that phase or pursuant to Conditions of Approval. [Ord. 2011-001]

4) This requirement may be waived or modified by the County Engineer if the location of the proposed street trees conflict with requirements of Art. 11, Subdivision, Platting, and Required Improvements. [Ord. 2011-001]

e. Bike Lanes
Bike lanes shall be provided in all streets 80 feet in width or greater, unless an alternative is approved by the County Engineer in accordance with Art. 11, Subdivision, Platting, and Required Improvements.

f. Mass Transit
All non-residential PDDs over five acres and 50,000 square feet, and all PUDs over 50 units, shall comply with the following, unless waived by the DRO:

1) The location of a Bus Stop Boarding and Alighting Area shall be shown on the Master Plan and/or Final Site Plan prior to approval by the DRO, unless written conflicts that one is not required. The purpose of this easement is for the future construction of Mass Transit infrastructure in a manner acceptable to Palm Tran;

2) Prior to the issuance of the first Building Permit, the Property Owner shall convey to PBC an easement for a Bus Stop Boarding and Alighting Area, in a location and manner approved by Palm Tran. As an alternative, prior to Technical Compliance of the first plat, the Property Owner shall record an easement for a Bus Stop Boarding and Alighting Area in a manner and form approved by Palm Tran. The Property Owner shall construct continuous paved pedestrian and bicycle access compliant with the Americans with Disabilities Act (ADA) to and through the Bus Stop Boarding and Alighting Area; and,

3) All PDDs with more than 100 units shall comply with the following requirement:
Prior to the issuance of the Building Permit for the 100th unit, the petitioner shall construct a Palm Tran-approved mass transit shelter with appropriate access lighting, trash receptacle, and bicycle storage. The location of the shelter shall be within an approved Bus Stop Boarding and Alighting Area easement. Any and all costs associated with the construction and perpetual maintenance shall be funded by the petitioner.

g. Utilities
All utility services located in a utility easement, such as telephone, cable, gas, and electric, shall be installed underground or combination/alternative acceptable to the DRO.

1) Exceptions
   a) Primary facilities and high voltage wires.
   b) Lift stations, transformers, and other above-ground structures necessary for the function of utility services. Such above-ground structures shall be screened from view from adjacent R-O-W by landscaping, fences, walls, or combination.
h. Parking

1) Residential Uses
   Parking for residential uses shall comply with Art. 6, Parking, Loading, and Circulation. The DRO may require a covenant to be recorded limiting the affected area to a specific use or uses.

2) Non-Residential Uses
   Non-residential uses located within a PDD may apply the parking standards indicated in Table 6.B.1.B, Minimum Parking and Loading Requirements, based on the use or the minimum/maximum parking standards below or a combination of both. The site plan shall clearly indicate which parking standards are being utilized for the entire site. [Ord. 2009-040] [Ord. 2019-005]
   a) Minimum/Maximum Parking Standards
      (1) Minimum: one space per 250 square feet of GFA (4/1,000)
      (2) Maximum: one space per 166.66 square feet of GFA (6/1,000)
   b) Exceptions MLU/EDC
      Parking for large scale and regional facilities in excess of 500,000 gross square feet may be reduced to one space per 333.33 square feet of GFA (3/1,000).

3) Design
   Parking areas open to the public shall be interconnected and provide safe efficient flow of traffic. Parking areas directly adjacent to other parking areas in the same project shall have cross access.

4) Cross Access
   Cross access shall be provided to adjacent internal uses/properties, if required by the DRO.

5) Location – Non-Residential PDDs
   A minimum of ten percent of the required parking shall be located at the rear or side of each building it is intended to serve.

6) Distance
   All parking spaces shall be located within 600 linear feet of a public entrance of the building which it is intended to serve.
   a) Remote Parking Areas
      Paved pedestrian pathways shall be provided to all parking areas in excess of 400 feet from a public entrance. Pathways shall be unobstructed grade separated and/or protected by curbs, except when traversing a vehicular uses area, and clearly marked.

i. Way Finding Signs
   Off-site directional signs, consistent with the on-site directional sign standards in Art. 8, Signage, may be allowed along internal streets in the R-O-W, subject to approval by the County Engineer.

j. Emergency Generators
   A permanent emergency generator shall be required for all Type 2 and Type 3 CLFs, Nursing or Convalescent Facilities, and PDD clubhouses 20,000 square feet or greater, and shall meet the standards of Art. 5.B.1.A.19, Permanent Generators. [Ord. 2006-004] [Ord. 2010-022]

D. Application Requirements
   For a rezoning to a PDD, the Applicant shall comply with the requirements in, Art. 2.B.7.B, Conditional Uses and Official Zoning Map Amendments (Rezoning) to a PDD or TDD, Art. 2.A.6.A, Zoning Application Requirements, and Art. 2.A.6.B, Plan Requirements for certification and final approval by the DRO. [Ord. 2009-040]

1. Master Plan, Site Plan, or Subdivision Plan
   See Art. 2.A.6.B, Plan Requirements for preparation of plan(s) and plan labeling requirements. [Ord. 2009-040]
   a. Effect of BCC Approval
      Approval of a Preliminary Master Plan, Site Plan or Subdivision Plan, as applicable, by the BCC shall be binding upon the landowners subject to the Development Order, their successors and assignees, and shall constitute the development regulations for the land. Development of the land shall be limited to the uses, density, intensity, access, configuration, and all other elements and conditions set forth on the plan(s) and in the Development Order. Administrative modifications to a master or site plan may only be allowed in accordance with Art. 2.C.5.C, Administrative Modifications to Prior DOs and Art. 2.A.6.B, Plan Requirements. In granting an approval, the BCC relies on the oral and written representations of the petitioner both on the record and as part of the application process. Deviations from or violation of these representations shall cause the approval to be reviewed by the BCC as a DOA. [Ord. 2009-040]
b. Pods
All land within the boundaries of a Master Plan shall be designated as one of the pod types indicated for the applicable PDD, or the FLU designation, whichever is applicable [Ord. 2009-040] [Ord. 2017-007]

1) Exceptions
Perimeter landscape buffers, water management tracts not located in pods, canals, primary streets, open space, and similar areas allowed by the DRO.

c. Tabular Data
Each pod shall clearly indicate the acreage and proposed density/intensity. Tabular data for the entire project shall be provided in a form acceptable to the DRO.

d. Density
The number of units shown on a Site Plan or Subdivision Plan shall correspond to the Master Plan.

e. Intensity
The intensity (e.g., square feet, beds, seats, number of children/occupants/rooms, etc.) shown on a Site Plan or Subdivision Plan shall correspond to the Master Plan.

E. Modifications

1. Modifications by the DRO to a Master Plan, Site Plan, Subdivision Plan, or Regulating Plan
The DRO shall have the authority to approve modifications to a Master Plan, Subdivision Plan, Site Plan or Regulating Plan approved by the BCC or ZC, subject to the following limitations. In case of a conflict with Art. 2.A.6.B, Plan Requirements and, Art. 2.C.5.C, Administrative Modifications to Prior DOs the following standards shall apply. Modifications which do not comply with these procedures and requirements of this Section shall require approval by the BCC. [Ord. 2009-040] [Ord. 2018-018]

a. Consistency
Modifications shall be consistent with the representations regarding the original approval, the Conditions of Approval, and the Development Order. Modifications which change the original goals or intent of the project, such as reduce internal trip capture, reduce non-vehicular circulation or cross access, reduce the amount of affordable housing without a corresponding decrease in density, or reduce the amount of land allocated to the preservation of agriculture, farmland, or wetlands, shall require approval by the BCC.

b. Pods
The re-designation of a pod from one pod type to another shall require approval by the BCC. The reconfiguration of pods may be approved by the DRO only if determined to be an improvement to the project and no adverse impact on adjacent properties. [Ord. 2019-005]

c. Housing Classification
The housing classification(s) approved by the BCC for each Residential Pod may be changed through the ZAR process pursuant to Table 2.C.5.C, Administrative Modifications to Prior DOs or Full DRO, whichever is applicable, and subject to the limitations listed below: [Ord. 2018-002] [Ord. 2019-005]

<table>
<thead>
<tr>

</tbody>
</table>

[Ord. 2018-002] [Ord. 2019-005]

Notes:
1. Provided there is no height increase from the originally-approved housing type.
2. Housing classification Attached are Multifamily or Townhouse housing types. [Ord. 2019-005]
3. Housing classification Detached are Cottage Home, Zero Lot Line, or Single Family housing types. [Ord. 2019-005]

d. Density Transfer
The Applicant may request a density transfer or a density decrease pursuant to the Criteria listed in Table 2.C.5.C, Administrative Modifications to Prior DOs. A density transfer may be processed in conjunction with a change in housing classification. [Ord. 2019-005]
e. **Recreation**
The amount of recreation and usable open space shown on a plan approved by the BCC shall not be reduced. Alternative locations may be approved by the DRO only if determined to be an improvement to the project and no adverse impact on adjacent properties.

f. **Traffic**
There shall be no substantial increase in traffic impact above that approved by the BCC, as determined by the County Engineer.

g. **Access**
Access shall not be added to roads external to the project, internal roads indicated on the Thoroughfare Identification Map, or to roads external to a pod, except for:

1) access to roads external to a Residential Pod, but internal to the project, may be added in accordance with Art. 11, Subdivision, Platting, and Required Improvements.

2) a Civic Pod supporting a Fire-Rescue station, Government-Owned Tower, or other Government Facilities having no substantial increase in traffic impact above that approved by the BCC as determined by the County Engineer. Prior to DRO approving modifications, zoning staff shall notify the District Commissioner; and, [Ord. 2018-018]

3) the addition of emergency access ways as required by PBC Fire-Rescue. The DRO shall ensure the District Commissioner is notified of this request in advance of Final DRO approval. The access point shall be secured by a gate that has the necessary mechanism to ensure it is closed and secured after each Fire-Rescue emergency call.

h. **Non-Vehicular Circulation**
Pathways, sidewalks, and bike lanes may be relocated, however, the resulting design shall maintain a continuous non-vehicular circulation system within the project.

2. **Modifications by the BCC**
Modifications which exceed the thresholds in Art. 2.C.5.C, Administrative Modifications to Prior DOs, shall require a DOA in accordance with Art. 2.B.7.C, Development Order Amendment (DOA).

3. **Modification to Reduce or Reconfigure Existing Golf Course**
Any modifications to reduce the acreage or reconfigure the boundaries of the golf course previously approved on the Master Plan shall meet the following criteria:

a. **Notice to Homeowners**
At the time of submitting the zoning application to amend the Master Plan, the Applicant shall provide documentation that the residents of the PUD, as outlined in the latest PBC Property Appraisal list, were notified by certified mail, and shall post notice as may be allowed at appropriate common areas within the PUD. The notice mailed and posted shall describe the Applicant's request to reconfigure the boundaries of the golf course. The Applicant shall provide a copy of this notice to the Zoning Division and shall verify that the notice was provided as required by this Section. The Applicant shall further provide documentation of all additional efforts to inform association membership of the proposed golf course reconfiguration. Minutes of any association membership meeting, including the results of any vote concerning the Applicant's request, as may be required by the Association, shall also be provided to the Zoning Division for inclusion in ZC and BCC staff reports.

b. **Reduction of Open Space or Recreation**
The Applicant shall provide justification and documentation that the golf course land areas to be reduced in acreage or the reconfiguration of boundaries will not result in a reduction in required open space for the development. If a previously approved development was subject to zoning regulations for open space or recreation that have since been amended, the Applicant shall outline how the affected area for the proposed development complies with current ULDC requirements, while demonstrating that the unaffected area is consistent with the requirements in place at the time of the original or amended approval.

c. **Visual Impact Analysis Standards**
The requirements of this Subsection shall be required for any application to reconfigure an existing golf course:

1) **Visual Analysis**
To assess the compatibility and impact of a proposed reconfiguration of the golf course on adjacent properties, the Applicant shall submit a Visual Impact Analysis.

2) **Methodology**
The Visual Impact Analysis shall be prepared and sealed by an architect, engineer, landscape architect, or surveyor registered in the State of Florida. Digital imaging technology may be utilized to prepare the analysis, in a manner acceptable to the Zoning Director.
digital methods may be required by the Zoning Director in order to implement the intent and purpose of this Section. The non-digital method shall, at a minimum, provide or include the information listed below. [Ord. 2006-004]

a) The location of the proposed structures/buildings illustrated upon an aerial photograph at a scale of not more than one inch equals 300 feet (1 inch = 300 feet). All adjacent structures/buildings located within a 1,000-foot radius of all property lines of the proposed site shall be indicated. [Ord. 2006-004]

b) A line of site analysis, which shall include the following information: [Ord. 2006-004]

   1) Identification of all significant existing natural and manmade features within 1,000 feet of the boundary of the affected area and identification of features that may provide buffering and screening for adjacent properties; [Ord. 2006-004]

   2) Identification of at least three specific points within a 1,000-foot radius of the proposed site, subject to approval by the Zoning Director, for conducting the Visual Impact Analysis; [Ord. 2006-004]

   3) Copies of all calculations and description of the methodology used in selecting the points of view and collection of data submitted in the analysis; [Ord. 2006-004]

   4) Graphic illustration of the visual impact of the proposed structure(s)/building(s) on surrounding development, at a scale that does not exceed five degrees of horizontal distance, presented from the specific identified points; and, [Ord. 2006-004]

   5) Identification of all screening and buffering materials within a designated planting area under the permanent control of the Applicant (only screening and buffering materials located within the boundaries of the proposed site shall be considered for the Visual Impact Analysis). [Ord. 2006-004]

   6) Any other graphic illustrations, such as perspectives, cross sections, or elevations, shall be at a scale consistent with the Master/Site Plan. The Zoning Director may request a scale that is necessary to clearly depict the detail of what the visual analysis is trying to convey to the BCC. [Ord. 2006-004]

F. Controlling Plan(s)

1. Approved Plan

   The most recent approved Master Plan, Site Plan, or subdivision by the DRO shall be the controlling plan for the PDD. All land development shall be consistent with the controlling plan. The controlling plan shall supersede any previously approved Master Plan, Site Plan, or subdivision. [Ord. 2005-002]

2. Maximum Units/Square Feet

   The number of units and total gross square feet shown on the most recent Master Plan, Site Plan or subdivision approved by the DRO shall constitute the maximum number of units or square footage which can be constructed in the PDD and shall supersede the density or intensity approved by the BCC and the density or intensity shown on any previously approved Master Plan, Site Plan, or subdivision. In case of a conflict between plans, an approved Master Plan shall control to the extent of the conflict.

G. Sales Office and Models

1. General

   A Real Estate Sales and Management Office is allowed as a Temporary Use in a PDD or TDD pursuant to Art. 4.B.11.C.5, Real Estate Sales and Management Office, PDD or TDD and Art. 4.B.11.C.6, Real Estate Sales Model, PDD or TDD. A permanent Real Estate Sales Office is permitted in a Commercial Pod only, except where allowed otherwise within a Recreational Vehicle Park Development (RV PD). [Ord. 2014-025] [Ord. 2019-005]

2. Sales Models

   See Art. 4.B.11.C.6, Real Estate Sales Model, PDD or TDD. [Ord. 2019-005]

H. Accessory Structures

1. Standards

   Building Permits for gatehouses, entry features, and utilities may be issued prior to recording a Final Plat, but not before approval of a Final Site or Subdivision Plan by the DRO. The following accessory uses and structures in permanent or temporary structures shall comply with the following standards: [Ord. 2019-005]

   a. Gatehouses

      Gatehouses for security of the project may be permitted, subject to approval by the DRO.

   b. Utilities

      Public or private utilities, accessory buildings/structures, and related infrastructure shall be permitted, subject to compliance with all applicable rules and regulations governing such facilities.
c. Temporary Structures
   Temporary structures, such as construction trailers, shall be permitted in accordance with Art. 5.B.1.C, Temporary Structures. [Ord. 2019-005]

d. Permits
   Building Permits for temporary and accessory structures may be issued in accordance with Art. 3.E.1.G.1.a, Permits.

I. Unified Control
   All land in a PDD shall be contiguous, unless otherwise stated, and owned or under the control of the Applicant or subject to Unified Control. Unified Control shall be in a form acceptable to the County Attorney and shall provide for the perpetual operation and maintenance of all shared/common facilities and improvements, which are not provided, operated, or maintained at the public’s expense. [Ord. 2019-005]

1. Exception
   Public civic uses and AGR Preservation Areas shall not be subject to Unified Control, unless required by a Condition of Approval.

2. Approval
   Unified Control shall be approved by the County Attorney and recorded by the Applicant prior to approval by the DRO of the initial Master Plan, Site Plan, or subdivision, whichever occurs first.

3. Control
   Unified Control for a PDD shall be approved by the County Attorney and recorded by the Applicant prior to approval of the first plat.

4. Architectural Guidelines
   All buildings and signage shall maintain architectural consistency between all building, signage and project identification. Consistency shall include, a minimum, an overall unified image and character created by the use of common elements such as building and roofing materials, rooflines, muted colors, fenestration, architectural features, and architectural elements. Infrastructure, such as Minor Utility, Water and Wastewater Treatment Plants which are approved for construction in a PDD prior to the approval of other buildings will not be used to set the architectural standards for a PDD. [Ord. 2007-013] [Ord. 2017-007]

5. Successive Owners
   The Unified Control shall run with the land and shall be binding on all successors in interest to the property.

6. Amendments
   Prior to approval of a modification to a Master Plan, Site Plan, or subdivision by the DRO, the Unified Control shall be amended to include/exclude all land added to/deleted from the PDD, and incorporate any revisions modified by the new Development Order that may be in conflict with the original Unified Control. [Ord. 2019-005]

J. Phasing and Platting
   1. Phasing
      PDDs shall be subject to the phasing, time limitations and review requirements of Art. 2.E, Monitoring of Development Orders (DOs) and Conditions of Approval, any Conditions of Approval, and shall proceed in a reasonably continuous and timely manner. If a PDD other than a PUD has multiple phases, each of the first two phases shall contain a minimum of 20 percent of the land area unless otherwise approved in the Development Order approved by the BCC. [Ord. 2005-002] [Ord. 2012-003]

2. Plating
   All land in a PDD shall be platted in accordance with Art. 11, Subdivision, Platting, and Required Improvements. [Ord. 2005-002] [Ord. 2011-001] [Ord. 2012-003]

   a. Exemptions
      The following shall be exempt from platting requirements: [Ord. 2012-003]
      1) Right of way dedicated to a government agency when approved by the County Engineer; or [Ord. 2012-003]
      2) A DOA to a prior approval which includes a rezoning to a current PDD, where the proposed amendments do not involve any subdivision or other modifications which would require platting or a replat. [Ord. 2012-003]

   b. Timing
      All land within the PDD, including private civic tracts, golf courses and open space areas (including but not limited to recreation and water retention) shall be platted prior to Technical Compliance for the last residential, commercial, or industrial tract. [Ord. 2012-027]
c. Dedications
Required landscape buffers within or around Residential Pods, for the development of Single Family, Zero Lot Line, Townhouse, or Cottage Homes (when designed as a single unit on a lot), within a Planned Development, shall be platted and dedicated as separate tracts of land. [Ord. 2018-002] [Ord. 2020-001]

Section 2 Planned Unit Development (PUD)

A. General
1. Purpose and Intent
The purpose of a PUD district is to offer a residential development alternative, which provides a living environment consisting of a range of living opportunities, recreation and civic uses and a limited amount of commercial uses. Residential PUDs shall correspond to a range of land uses in the Plan.

The intent of a PUD is to promote imaginative design approaches to the residential living environments. These approaches include but are not limited to:
   a. the preservation of the natural environment;
   b. the integration and connection of land uses with perimeter landscape areas which provide vegetation preservation, buffering, and circulation areas;
   c. the creation of a continuous non-vehicular circulation system;
   d. the establishment of private civic and/or public civic and recreation area to serve the PUD;
   e. provide for a limited amount of commercial uses to serve the residents of the PUD;
   f. provide for efficient use of land and public resources by co-locating harmonious uses to share civic uses and public facilities and services for the residents of PBC;
   g. the reduction of land consumption by roads and other impervious surface areas; and,
   h. the provision for flexible PDRs to promote innovative and quality site design.

2. Applicability
The requirements of this Section shall apply to all PUDs, modifications to previously approved PUDs, and modifications to previous approvals specified in Art. 3.A.3.E.2, Planned Development Districts. [Ord. 2009-040] [Ord. 2011-016]

3. Conflicts
If a conflict exists between this Section and other Sections in this Code, the provisions of this Section shall apply to the extent of the conflict.

4. Exemplary
A Rezoning to the PUD district or a Development Order Amendment (DOA) to a previously approved PUD shall only be granted to a project exceeding the goals, policies and objectives in the Plan, the minimum requirements of this Code, and the design objectives and performance standards in this Article which include, but are not limited to, sustainability, trip reduction, cross access, buffering, aesthetics, creative design, vegetation preservation, recreational opportunities, mix of uses, mix of unit types, safety, and affordable housing. See the PBC Zoning Division Technical Manual for examples. A DOA to a previously approved PUD shall be reviewed pursuant to Art. 1.E.1.B, Prior Approvals. [Ord. 2006-055]

B. Objectives and Standards
1. Design Objectives
A PUD shall comply with the following objectives:
   a. Designed as a predominantly residential district;
   b. Provide a continuous non-vehicular circulation system for pedestrians and non-motorized vehicles;
   c. Provide perimeter landscape areas to buffer incompatible land uses, or where residential uses are adjacent to other incompatible design elements such as roadways, usable open space areas, where a more intense housing type is proposed, or where residential setbacks are less than adjacent residential development outside the perimeter of the PUD; [Ord. 2006-055]
   d. May offer limited commercial uses for the population of the PUD;
   e. Establish neighborhood character and identity;
   f. Preserve the natural environment to the greatest extent possible; and,
   g. Provide incentives for civic uses to reduce public capital improvements and expenditures by encouraging joint acquisition, development, and operation of publicly-owned and operated facilities to serve the residents of the PUD and PBC.
2. **Required Performance Standards**

   A PUD shall comply with the following standards: Standards a-d are required and must be met. A minimum of two of the four standards listed in e-h are required: [Ord. 2006-055]

   a. **Proximity to Other Uses**

      All Residential Pods with five or more units per acre shall be located within 1,320 feet of a neighborhood park, Recreation Pod, Private Civic Pod, Commercial Pod, or a public recreational facility. [Ord. 2006-055]

      1) **Measurement of Distance**

         For the purpose of this Section, distance shall be measured by drawing a straight line between the property lines of a Residential Pod to the property line of the pod where the commercial/personal services are located. [Ord. 2004-040]

   b. **Focal Points**

      A focal point shall be provided at the terminus of 15 percent of the streets in the project. The focal point may be in the form of a plaza, fountain, landscaping, or similar amenity deemed acceptable to the DRO. The focal point shall not be located on a private residential lot. [Ord. 2006-055]

   c. **Neighborhood Park**

      Neighborhood parks shall have a direct connection to the pedestrian system and include a tot lot, gazebo, fitness station, rest station, or similar recreation amenity. Neighborhood parks shall not be used towards the Parks and Recreation Departments minimum recreation requirements and shall not be located within areas designated for drainage, stormwater management or other utility purposes. [Ord. 2006-055]

   d. **Decorative Street Lighting**

      Decorative street lights shall be provided along the development entrances. [Ord. 2008-037]

   e. **Decorative Paving**

      Decorative pavers shall be provided at the development entrances and incorporated into recreational areas. [Ord. 2006-055]

   f. **Fountains**

      A minimum of one fountain shall be located in the main or largest lake or water body. [Ord. 2006-055]

   g. **Benches or Play Structures**

      Benches or play structures shall be provided in usable open space areas and along pedestrian pathways. [Ord. 2006-055]

   h. **Interspersed Housing**

      WFH units shall be interspersed with market rate units within a pod. [Ord. 2006-055]

   i. **Pedestrian Circulation System**

      An interconnected pedestrian sidewalk, path, or trail system shall be provided linking pods to recreational amenities within the development. [Ord. 2008-037]
C. Thresholds

1. Thresholds

Projects that meet or exceed the acreage threshold indicated in Table 3.E.2.C, PUD Minimum Thresholds (Acreage) may be submitted and reviewed as a PUD. [Ord. 2006-004]

Notes:
1. Minimum Civic Pod requirement may be waived, subject to the following: [Ord. 2011-001]
   - Public civic may not be required where two percent of the gross acreage of a PDD is less than one and one-half acres in size, subject to FDO approval; and [Ord. 2011-001]
   - If located in a CCRT area, shall be labeled as private civic unless waived by the BCC. [Ord. 2011-001]
3. Calculation of open space may include Recreation Pods, Civic Pods, and open space areas within residential. [Ord. 2006-004]
4. See 80/20 option exception.

3. Land Use Calculation

The calculation for the mix of land uses shall be based on the gross acreage of the PUD. Neighborhood parks, water management tracts and local roads, which are internal to a Residential Pod rather than a separate pod or tract may be credited toward the minimum residential land area requirement in Table 3.E.2.C, PUD Land Use Mix.

a. AGR Exceptions

   In the AGR FLU designations, the required land use mix shall be based on the gross acreage of the development portion of the PUD only. [Ord. 2006-004]

4. Other Land Uses

The acreage for open space tracts, water management tracts, R-O-W, shall be provided on the Master Plan.
D. Property Development Regulations (PDRs)

The minimum lot dimensions, density, maximum FAR, maximum building coverage, and minimum setbacks in each pod are indicated in Table 3.E.2.D, PUD Property Development Regulations, unless otherwise stated. [Ord. 2019-005]

1. Setbacks

For residential development, except MF and Type 3 CLF, building setbacks shall be measured from the inside edge of the perimeter landscape buffers. For MF, Type 3 CLF, and non-residential development, building setbacks shall be measured from the property line, provided the structures do not encroach the landscape buffer. Rear or side setbacks may be reduced pursuant to Art. 3.D.1.D, Setback Reductions. [Ord. 2020-001]

Notes:
1. Preservation includes the Preservation Areas in a PUD allowed in the AGR FLU designations.
2. The maximum FAR shall be in accordance with FLUE Table III.C.2 of the Plan, and other related provisions, unless otherwise noted. [Ord. 2007-001]
3. Recreation Pods required for Multifamily units, CLFs, or Cottage Homes in an MF Pod or lot may be exempt from the following: [Ord. 2020-001]
   a. Minimum lot frontage may be reduced or eliminated where the pod does not front on a street, and is located within the MF or CLF structures, surrounded by the MF, CLF, or Cottage Homes, or located on a shared driveway. A sidewalk shall be provided from the Recreation Tract to the internal pedestrian network; and [Ord. 2016-042] [Ord. 2020-001]
   b. Minimum PDRs may be reduced proportionate to or in accordance with Art. 5.D, Parks and Recreation – Rules and Recreation Standards, Table 5.D.2.B, Property Development Regulations. [Ord. 2016-042] [Ord. 2020-001]
4. SF and ZLL residential units may be allowed to increase building coverage by ten percent subject to the following: [Ord. 2020-001]
   a. Maximum one story; and [Ord. 2020-001]
   b. Increase in building coverage cannot be in conjunction with other reductions, Waivers, or Variances for building coverage. [Ord. 2020-001]

E. Pods

1. Residential Pod

A Residential Pod shall be designated on the Master Plan as follows:

a. **Range of Housing**

   A PUD in excess of 100 acres and 300 dwelling units shall provide a minimum of two residential use types. A minimum of ten percent of the residential dwellings in a PUD in excess of this threshold shall be of a second use type.

b. **Side Loading Garage**

   A side loading garage is permitted in a SF Pod, subject to a minimum front setback of 15 feet.
2. **Commercial Pod**
   A Commercial Pod is intended to provide personal services, retail opportunities, and professional or business offices for use primarily by the residents of the PUD. A Commercial Pod shall be designated on the Master Plan as follows:
   a. **Location**
      A Commercial Pod shall comply with the following location and design criteria:
      1) **Frontage**
         A Commercial Pod shall not have frontage on a public Arterial or Collector Street traversing or bordering the PUD. Access shall be limited to an Arterial or Collector Street internal to the PUD only.
         a) **Exception**
            A private Arterial or Collector Street traversing the PUD is exempt from this requirement.
      2) **Setback**
         a) A Commercial Pod shall be set back a minimum of 1,000 feet from the perimeter of the PUD.
         b) A Commercial Pod shall be set back a minimum of 1,000 feet from a public Arterial or Collector Street traversing the PUD.
   b. **Design**
      1) Any single use exceeding 10,000 square feet of GFA shall obtain approval as a Conditional Use. [Ord. 2018-002]
      2) A Type 3 Incompatibility Buffer, including a six-foot-high opaque concrete wall, shall be required adjacent to a Residential Pod.
      3) In addition to the landscape requirements in Art. 7.C, Landscape Buffer and Interior Landscaping Requirements, R-O-W Buffers shall include a two to three-foot-high continuous or undulating berm.
      4) Freestanding point of purchase signs shall be monument style only and shall be limited to a maximum of ten feet in height with a maximum sign face area of 80 square feet per side. A maximum of one freestanding point of purchase sign shall be allowed per frontage.
      5) Outdoor lighting shall not exceed 30 feet in height, and shall be shielded, oriented, and directed away from residential uses.
      6) Dumpsters, compactors and loading areas shall be set back a minimum of 50 feet from the property line and oriented away from residential uses.
      7) Outdoor storage of any merchandise, equipment, refuse or similar material shall be prohibited.
      8) A continuous non-vehicular circulation system shall provide access to commercial uses from adjacent Residential Pods.
   c. **Architecture**
      Proposed buildings shall be subject to Art. 5.C, Design Standards.
   d. **Property Development Regulations (PDRs)**
      The PDRs for a Commercial Pod are in Table 3.E.2.D, PUD Property Development Regulations.
      1) **Multiple Uses**
         A Commercial Pod meeting the requirements for an MUPD with a CL FLU designation may be developed in accordance with the PDRs in Table 3.E.3.D, MUPD Property Development Regulations.
      2) **Mixed Use**
         A Commercial Pod meeting the requirements for an MXPD with a CL FLU designation may be developed in accordance with the PDRs in Table 3.E.4.D, MXPD Property Development Regulations.
      3) **Market Place**
         A Commercial Pod meeting the requirements for TMD or a TMD with a CL FLU designation may be developed in accordance with the PDRs in Table 3.D.1.A, Property Development Regulations (PDRs).
   e. **Accessory Commercial Areas**
      Ten percent of the floor area in a Recreation or Civic Pod may be utilized for commercial uses Permitted by Right in the CC Zoning District.
f. **Non-Conforming Commercial Pods**
   In addition to the criteria in Art. 3.E.2.E.2.b, Design, above, the following standards shall apply to a Commercial Pod in a PUD approved prior to June 16, 1992, but which has not received Site Plan approval by the DRO:
   1) A single use shall not exceed 15,000 square feet GFA; and
   2) Auto repair and gasoline sales shall be prohibited.

3. **Recreation Pod**
   Recreation areas shall be designated on the Master Plan as Recreation Pods and shall comply with Art. 5.D, Parks and Recreation – Rules and Recreation Standards, in addition to the requirements of this Section. [Ord. 2011-001] [Ord. 2013-001] [Ord. 2016-042] [Ord. 2020-001]

4. **Civic Pod**
   A Civic Pod is intended to promote a coordinated land planning approach for providing and encouraging publicly and privately-owned civic, institutional, educational, and additional recreational uses for the community.
   a. **Applicability**
      1) **Public Civic**
         Where two percent of a PUD is less than one and one-half acres, Public Civic Pods may not be required subject to FDO approval. [Ord. 2011-001]
      2) **Private Civic**
         If a Public Civic Pod is not required in a CCRT area, a Private Civic Pod shall be provided unless waived by the BCC. For any other PUD, Private Civic Pods shall be optional. [Ord. 2011-001]
   b. **AGR-PUD Calculation**
      A PUD in AGR FLU areas shall use two percent of the developable portion of the PUD. [Ord. 2011-001]
   c. **Public and Private Civic**
      All Civic Pods so designated shall be identified as public or private. PBC may require all or a portion of a Civic Pod to be dedicated to PBC for public purposes. [Ord. 2011-001]
      1) **Public Civic**
         a) Public Civic Pods shall be located adjacent to publicly-owned, or anticipated to be owned, lands. The location of, and access to, a Public Civic Pod shall be acceptable to FDO prior to certification of the Master Plan by the DRO. [Ord. 2019-005]
            (1) Where a Public Civic Pod is located adjacent to publicly-owned, or anticipated to be owned, lands outside the boundary of the PUD, the required landscape buffer along the common boundary may be reduced or eliminated on both properties subject to the following: [Ord. 2019-005]
               (a) A minimum five-foot setback shall be required for all permanent structures, measured from the common interior boundary; and
               (b) The remaining setbacks for the Public Civic Pod shall be applied pursuant to Table 3.E.2.D, PUD Property Development Regulations. [Ord. 2005-002] [Ord. 2008-037] [Ord. 2019-005]
         b) **Conveyance**
            Conveyance of a Civic Pod to PBC shall be in a form and manner acceptable to FDO as outlined in the FDO Property Acquisition Policy and Procedures, and by the County Attorney. Documentation, such as a deed, survey, environmental assessment, and evidence of a clear title shall be required to be provided by the Applicant prior to acceptance by PBC. Site shall also be conveyed with: [Ord. 2005-002]
               1) concurrency;
               2) drainage accommodated within and allowed to discharge into the stormwater management system of the PUD;
               3) filled and stabilized;
               4) sufficient sized water, sewer, and other associated utilities stubbed to the site; and,
               5) direct access to a utility easement for phone, electric, and cable.
c) **Uses**

Public civic parcels shall consist of civic uses and other typical uses provided by governmental agencies, which are required to provide services to meet concurrency requirements such as, but not limited to, regional parks, water treatment facilities and fire stations, and services required to mitigate other impacts of the development to service providers such as, but not limited to, public schools, libraries or other civic uses. [Ord. 2005-002]

d) **Frontage**

A Public Civic Pod shall have frontage on a Collector or Arterial Street unless waived by FDO. [Ord. 2005-002] [Ord. 2011-001]

e) **Alternative Civic Pod Designation**

A Public Civic Pod may have an alternative pod designation in addition to the Public Civic Pod designation on the Master Plan approved by the BCC. The alternative pod designation may only be utilized following preliminary approval by FDO and final approval by the BCC of a cash-out, off-site dedication agreement, or other proposal that satisfies a public civic obligation. A Public Civic Pod may be excluded from the Master Plan approved by the BCC or DRO provided that prior approval of a cash-out, off-site dedication agreement or other proposal that satisfies a public civic obligation has been rendered acceptable by FDO and granted by the BCC. [Ord. 2011-001]

2) **Private Civic**

Private civic parcels shall be labeled as “Private” on the Master Plan and may be underscored for a particular use as defined in this Section or as outlined in the Use Matrices contained in Art. 4, Use Regulations. Such pods may be located anywhere within the PUD but should remain as one singular parcel. [Ord. 2005-002]

a) **Use Limitations**

Private civic sites shall consist of civic uses which: provide services to PUD residents or fulfill recreational or educational needs for the residents of PBC; are customarily privately-owned and operated; such as but not limited to, private schools or libraries, day care centers, churches, temples, and Property Owners’ Association meeting areas. Private civic uses may include parking if such use benefits the intended private civic site function. Private civic sites may not be used as PUD overflow parking areas or to fulfill any other non-civic site related requirements. [Ord. 2005-002]

d. **PDRs**

The PDRs for a Civic Pod shall be in accordance with Table 3.E.2.D, PUD Property Development Regulations. Public Civic Pods may be exempt from Table 3.E.2.D, PUD Property Development Regulations, by the DRO if the PDRs hinder the proper functioning of the intended civic use. [Ord. 2011-001]

F. **AGR-PUD**

1. **General**

   The following regulations have been created to fulfill goals, policies and objectives in the AGR FLU designations.

   a. **Purpose and Intent**

   In addition to provision in Art. 3.E.2.A.1, Purpose and Intent, a PUD is permitted in the AGR FLU designations in order to accommodate low-density residential development in conjunction with the preservation of agriculture, wetlands or other significant open space areas. It is the intent of a PUD in this land use designation to provide for the residential development of land in a manner compatible with agriculture, wetlands or other significant open space, which does not detract from the protection and perpetuation of such uses in the area.

   b. **Applicability**

   AGR-PUDs with AGR FLU designation, unless noted otherwise. [Ord. 2017-002]

2. **Development Options.**

   a. **Options**

   The following two options are allowed with the AGR FLU designation: 80/20 and 60/40. [Ord. 2017-002]

   1) **Minimum Land Area**

   The minimum gross land area (GLA) for the 80/20 option is 40 acres and 250 acres for the 60/40 option.
2) Areas
Each PUD shall consist of two areas, the Preservation Area and the Development Area. Both areas shall be rezoned to the AGR-PUD district. [Ord. 2017-002]

b. Density
The maximum density for both options shall be based on the total GLA of the PUD calculated at one dwelling unit per acre. The residential density in the Development Area is not restricted, except as necessary to meet applicable development standards and to assure compatibility with adjacent land uses. [Ord. 2017-002]

c. Land Use Mix
The land area allocated for the Preservation Area and the Development Area shall be based on the ratio specified for each development option as described below.

1) 80/20 Option
A minimum of 80 percent of the GLA of the PUD shall be designated as Preservation Area on the Master Plan. The remaining land area (20 percent) may be designated on the Master Plan as residential, civic, commercial, recreation, or open space in accordance with Table 3.E.2.C, PUD Land Use Mix.

a) Exception
Up to an additional five percent of the GLA of the PUD may be allocated to the Development Area where the allocation can be accounted for as R-O-W for streets or water retention areas. In no event shall the Development Area, including R-O-W and water retention areas, exceed 25 percent of the GLA.

2) 60/40 Option
A minimum of 60 percent of the gross land area of the PUD shall be designated as a Preservation Area on the Master Plan. The remaining land area (40 percent) may be designated on the Master Plan as residential, civic, commercial, recreation, or open space in accordance with Table 3.E.2.C, PUD Land Use Mix.

3) Both Options
Credit shall not be given that would reduce the size of the Preservation Area for encroachment of R-O-W, water retention, open space, landscape buffers, or natural habitats preserved in the Development Area. Native vegetation required to be set aside in a Development Area by Art. 14.C, Vegetation Preservation and Protection, shall not be credited toward satisfying the minimum Preservation Area requirement.

3. Preserve Area
A Preserve Area is intended to support Bona Fide Agriculture uses, wetlands, or other significant open space. Adjacent residential development in the PUD should be designed to be compatible with a Preserve Area and shall not detract from its operation or function. [Ord. 2015-047]

a. Location and Access
A Preserve Area may be situated anywhere in the AGR Tier on a Legal Lot of Record with an AGR FLU designation, provided it is accessible by a street. [Ord. 2015-047] [Ord. 2017-002]

b. Uses
Uses allowed in a Preserve Area are indicated in the Use Matrices contained in Art. 4, Use Regulations, and where specified by the Preserve Management Plan as approved by ERM. [Ord. 2006-004] [Ord. 2012-027] [Ord. 2015-047] [Ord. 2017-002] [Ord. 2017-007]

c. Configuration

1) Property Development Regulations
A Preserve Area and any remaining portion of a lot used to create a Preserve Area shall meet the minimum PDRs for the AGR district, inclusive of Table 3.D.1.A, Property Development Regulations (PDRs), with exception to the following: [Ord. 2006-004] [Ord. 2017-002]

a) General Exceptions
The minimum width of an AGR-PUD Preserve Area may be reduced as follows: [Ord. 2017-002]
(1) 100 feet for a Rural Parkway, as defined in the Plan; or [Ord. 2006-004] [Ord. 2015-047] [Ord. 2017-002]
(2) for an equestrian use that meanders through a 60/40 Development Area; or [Ord. 2006-004] [Ord. 2015-047] [Ord. 2017-007]

b) Non-Conforming Legal Lot of Record
A Legal Lot of Record that does not meet the minimum acreage or dimensions of the AGR district may be used as a Preserve Area if in compliance with all other requirements of this Section; or, [Ord. 2006-004] [Ord. 2017-002]
c) Split Zoning

(1) In cases of split zoning, where a Legal Lot of Record is partially zoned AGR and AGR-PUD Preserve Area where permitted in accordance with FLUE Policy 1.5-j, the following shall apply: [Ord. 2017-002]
   (a) Subdivision shall be prohibited unless each newly subdivided parcel meets the minimum PDRs for the AGR district; [Ord. 2017-002]
   (b) The Preserve Area shall be configured in one reasonably compact contiguous location within the subject parcel; [Ord. 2017-002]
   (c) That portion of the lot not designated as a Preserve Area, shall be configured as one reasonably compact and contiguous area; [Ord. 2017-002]
   (d) Access to either zoning district may be through the designated Preserve Area on the subject parcel, or vice versa; [Ord. 2017-002]
   (e) Where applicable, setbacks shall be measured from the perimeter of the subject parcel, unless stated otherwise herein; and, [Ord. 2017-002]
   (f) A Farm Residence and all accessory structures accessory to the Farm Residence, excluding fences or walls, shall be set back a minimum of five feet from an AGR-PUD Preserve Area located on the same lot. [Ord. 2017-002]

(2) In cases of split zoning, where a Legal Lot of Record is partially zoned IPF and AGR-PUD Preserve Area where permitted in accordance with FLUE Policy 1.5-t, the following shall apply: [Ord. 2020-019]
   (a) Subdivision shall be prohibited unless each newly subdivided parcel meets the minimum PDRs for the IPF or AGR district; [Ord. 2020-019]
   (b) The Preserve Area shall be configured in one reasonably compact contiguous location within the subject parcel; [Ord. 2020-019]
   (c) That portion of the lot not designated as a Preserve Area, shall be configured as one reasonably compact and contiguous area; [Ord. 2020-019]
   (d) Access to either zoning district may be through the designated Preserve Area on the subject parcel, or vice versa; [Ord. 2020-019]
   (e) Where applicable, setbacks shall be measured from the perimeter of the subject parcel, unless otherwise stated herein; and, [Ord. 2020-019]
   (f) All structures and accessory structures within the IPF portion of the lot, excluding fences or walls, shall be set back a minimum of five feet from an AGR-PUD Preserve Area located on the same lot. [Ord. 2020-019]

2) General

Preserve Areas shall be arranged so as to maximize the purpose, function, and perpetuation of the preserve use. This shall be accomplished, in part, through the following: [Ord. 2015-047]

a) Agriculture
   Agricultural areas shall have boundaries that allow for efficient agricultural operation, and shall not be encroached upon by a Development Area. [Ord. 2006-004]

b) Wetlands
   The boundary of preserved wetlands shall be determined by the ecological function of the viable area, as determined by the BCC upon recommendations from ERM and/or the SFWMD. Wetland areas shall be preserved in the following order of priority: adjacent to off-site wetlands; open space; fallow land; or, agricultural land. Primary consideration shall be given to preserved wetland areas adjacent to off-site wetlands.

d. 80/20 Contiguity Requirement

The Preserve Area in the 80/20 option shall be located contiguous to the Development Area. [Ord. 2015-047]

e. Plans

Plans submitted to the DRO shall depict the Preservation Area as specified below.

1) Contiguous Area
   When the Preservation Area is contiguous to the Development Area, the Preservation Area shall be shown and designated on the Master Plan and all applicable subdivision plans at the same scale and in the same detail as the Development Area.

2) Non-Contiguous Area
   When the Preservation Area is not contiguous to the Development Area, the Preservation Area shall be referenced by a location sketch and notes on the Master Plan.
f. Perpetual Preservation
Prior to recording the first plat for a Development Area, the Preservation Area shall be established in perpetuity in a form acceptable to the County Attorney. The Preservation Area shall be established by fee simple dedication to and acceptance by the BCC, or by recordation of an Agricultural Conservation Easement. [Ord. 2008-037]

4. Development Area
The Development Area shall contain the development-related pods, residential, commercial, civic, and recreational as described in Table 3.E.2.D, PUD Property Development Regulations, allowed in a Development Area are based on the pod designation indicated in the Use Matrices contained in Art. 4, Use Regulations. [Ord. 2017-007]

a. Location
The Development Area for the 60/40 option shall not be located west of SR 7 (U.S. 441).

1) Frontage
All Development Areas shall have frontage on either SR 7, SR 806 (Atlantic Avenue), SR 804 (Boynton Beach Boulevard), Clint Moore Road, Lyons Road extending north of Boynton Beach Boulevard or Lyons Road extending south of Atlantic Avenue, and Acme Dairy Road extending south of Boynton Beach Boulevard to the L-28 Canal. [Ord. 2012-027]

2) Adjacency
Development areas shall be located, to the greatest extent practical, adjacent to existing, planned or projected Development Areas.

3) Connectivity
Development Areas adjacent to potential or existing TMD locations shall have at least one paved pedestrian and vehicular connection.

b. Configuration

1) General
The Development Area shall be a single, compact, contiguous area, which possesses the characteristics listed below. An equestrian community may deviate from these characteristics only to the extent that contiguous pasture land may meander throughout the Development Area:

a) at least two sides of the Development Area shall share a common border with the perimeter of the PUD;

b) the Development Area shall be designed as a single unified whole within a tightly compact area with continuous common boundaries with other pods in the PUD;

b) isolated Development Areas and Preservation Areas shall not be created within a contiguous PUD; and,

d) lakes, water retention areas, golf courses, and other similar amenities shall be located within the Development Area to provide a buffer from adjacent Preservation Areas or off-site agricultural uses.

c. Contiguity
A Development Area shall be situated in only one location and shall be contiguous within itself.

5. Special Provisions

a. Water and Sewer Service
All Development Areas shall utilize central water and wastewater service provided by WUD. The use of package treatment facilities shall not be permitted.
G. RR-PUD
1. Rural Residential
   The following additional regulations apply to the PUDs in the RR FLU designation.
   a. **Purpose and Intent**
      A PUD is permitted in the RR FLU designations to accommodate low density residential
development in conjunction with the protection and maintenance of rural, equestrian, agricultural
communities, or to address preservation of specific uses within the Lion Country Safari (LCS). It is
the intent of a PUD in these land use designations to provide for the residential development of
land in a manner compatible with agriculture, wetlands or other significant open space and which
does not detract from the protection and perpetuation of such uses in the area. The areas in which
this development alternative is offered are characterized by agriculture, small farming operations,
equestrian activities, and open spaces where residents are attracted to low-density lifestyles. [Ord.
2011-016]
   b. **Conflicts**
      If a conflict exists between this Section and other Sections of this Code, the provisions of this
Section shall apply to the extent of the conflict.
   c. **Option 1 – Rural Cluster**
      1) **Land Area**
         A minimum of 100 acres.
      2) **Open Space**
         A minimum of 60 percent of the land area shall be designated on the Master Plan as contiguous
         and compact open space, unless otherwise determined by the Existing Resources and Site
Analysis. Open space satisfying this requirement shall have a minimum width of 150 feet and
be designated as common area on the Master Plan or dedication in perpetuity as a preserve,
in accordance with Art. 3.E.2.F.3.f, Perpetual Preservation.
         a) **Exception**
            (1) Existing environmental, geological and historic resources identified in the site analysis
            required by Art. 3.E.2.G.4, Existing Resources and Site Analysis, and having a
            minimum area of five acres are not required to be contiguous.
            (2) A PUD within the LCS may comply with minimum Open Space requirements through
            use of an Overall Master Plan which identifies Preserve Areas within the Lion Country
            Safari MUPD or RVPD, subject to the following: [Ord. 2011-016]
            (a) Open Space is limited to preservation, conservation, passive recreation, wetlands,
            bona-fide agriculture, regional water management projects and equestrian trails;
            or [Ord. 2011-016]
            (b) The Safari Park MUPD (excluding hotel site) and RVPD shall be permitted to count
            towards the 60 percent Open Space requirement provided that prior to issuance
            of the final Development Order, a deed restriction/conservation easement, subject
            to approval by the PZ&B Executive Director in consultation with the County
            Attorney, is recorded that limits the use of the site to those listed above, in the
            event commercial recreation uses were to cease. This shall not preclude any
            renovation or expansion of park facilities where permitted by this Code. [Ord.
            2011-016]
      b) **Common Area**
         If designated as common area, maintenance of the open space shall be the perpetual
         responsibility of the HOA.
      c) **Separate Tract**
         All areas designated as open space on the Master Plan shall be platted and maintained as
         a separate tract of land. No area designated as open space on the Master Plan shall be
         platted with, nor made part of, a lot or land in the Development Area, excluding alternative
         LCS Open Space Preserve Areas. [Ord. 2011-016]
      d) **Plat**
         All open space shall be platted simultaneously with the first plat in the Development Area,
         excluding any previously platted areas identified on an LCS Overall Master Plan. [Ord.
         2011-016]
   3) **Development Area**
      A maximum of 40 percent of the land area shall be designated on the Master Plan as the
      Development Area. All Residential, Civic, and Recreation Pods shall be limited to the
      Development Area. All improvements, including streets, water management tracts for on-site
and street drainage (including R-O-W), excavation, and accessory structures shall be limited to the Development Area.

a) Exception

Mitigation projects, excavation with jurisdictional wetlands, and excavation by public agencies, as defined as exempt in Art. 4.B.10, Excavation Uses, and regional water management facilities certified by the SFWMD, shall be permitted in open space areas. [Ord. 2017-007]

4) Design

The Development Area shall be designed to emphasize the open space areas identified in the site analysis in accordance with Art. 3.E.2.G.4, Existing Resources and Site Analysis. The Development Areas shall be designed so as to not interfere with the continued or future function of any designated open spaces preserves or areas, identified as environmentally, geologically, or historically significant in the site analysis required by Art. 3.E.2.G.4, Existing Resources and Site Analysis. Pods should be located and designed to ensure compatibility with open space and preserves areas. All streets shall terminate in a vista or focal point such as trail head, passive park, waterviews, open space, or an alternative acceptable to the BCC.

e. Option 2 – Variable Lot Size

1) Minimum Land Area

A minimum of 100 acres

2) Open Space

No minimum percentage of open space shall be required in a PUD with an RR land use designation utilizing the variable lot size option (Option #2).

3) Development Areas

The Development Area shall be required to have an equestrian lifestyle. Development shall be designed so as to not interfere with the continued or future function of any area identified as environmentally, geologically, or historically significant in the site analysis required in Art. 3.E.2.G.4, Existing Resources and Site Analysis. Residential Pods should be located and designed to ensure compatibility with non-residential pods and open space areas. All streets shall terminate in a vista or focal point, such as a trail head, passive park, waterview, agricultural structure, or an alternative acceptable to the BCC.

a) Exception

All drainage improvements, such as water management tracts, street drainage, and excavation for water management purposes, shall be developed as common areas and platted as separate tracts of land. Type 1 Excavation, for the purposes of building a Single Family residence, shall not be permitted on individual lots.

4) Design

A PUD with an RR land use designation utilizing the variable lot size option (Option #2) may subdivide parcels into a range of lot sizes as accepted by the BCC. The minimum lot size shall not be less than indicated in Table 3.E.2.G, RR-PUD Property Development Regulations. The gross density of the PUD shall not exceed the density assigned to the project by the Plan.

2. Pods

a. Residential Pod

Housing type and classification shall be limited to Single Family detached only, typical residential accessory uses/structures, and accessory agricultural or equestrian uses/structures.

1) Lion Country Safari Exception

Townhouses may be permitted within an LCS RR-PUD up to a maximum of 20 percent of all residential units, to the extent necessary to accommodate any density transferred from Open Space Preserve Areas, provided that the units are located within the center of the Development Area. [Ord. 2011-016]

b. Commercial Pod

A Commercial Pod is prohibited, with exception of allowances for a 3,500-square foot neighborhood store within the LCS. [Ord. 2011-016]

c. Civic Pod

Civic and institutional uses shall be limited to government services only. No private civic uses shall be permitted

d. Recreation Pod

Active recreation uses, such as golf courses and common outdoor recreation areas shall be limited to the Development Area only. Equestrian uses shall be allowed in accordance with the AGR/P Pod provisions in the Use Matrices contained in Art. 4, Use Regulations. [Ord. 2017-007]
3. Property Development Regulations (PDRs)
The PDRs for residential lots are in Table 3.E.2.G, RR-PUD Property Development Regulations. Accessory residential uses/structures may use with the nonconforming lot provisions in the AR district.

Notes:

1. The following PDRs shall be permitted within the Development Area of an LCS RR-PUD, to the extent necessary to accommodate density relocated from the Safari Park Open Space Preserve Areas within the MUPD or RVPD:
   a. Where Townhouses are permitted, the PDRs of Art. 3.D.2.A. Townhouses;
   b. SFD lots located within the center of the Development Area may apply the PDRs for the RS Zoning District, in accordance with Table 3.D.1.A., Property Development Regulations (PDRs); and,
   c. SFD lots located along the perimeter of the LCS adjacent to residential uses may apply the PDRs for the RT Zoning District (LR-1) in accordance with Table 3.D.1.A, Property Development Regulations (PDRs).

4. Existing Resources and Site Analysis
The application shall include an analysis and maps of existing environmental, geological, and historic conditions on the proposed site. At a minimum, the analysis shall contain the following information and be subject to review and approval by the DRO prior to certification of the project.

a. Natural Resources and Environmentally Sensitive Areas
   Location and identification of environmentally sensitive lands, habitats of endangered species, significant areas of native vegetation, wetlands, canals, ditches, and natural drainage.

b. Historic Resources
   Location and identification of all historically and archaeologically significant features, sites and structures.

c. Preservation
   Significant environmental, geological, and historic conditions identified in the site analysis shall be incorporated and preserved in open space areas on the Master Plan or as required by ERM and/or the SFWMD.

d. Open Space Management Plan
   The Applicant shall submit an Open Space Management Plan for review and approval by the DRO, which ensures that all areas designated as open space on the Master Plan are maintained in perpetuity. The Open Space Management Plan shall include a bond, or the funding mechanism, in an amount necessary to ensure maintenance of the Preserve Area on a permanent basis. Bona fide agricultural land shall remain in agricultural production or returned to a natural state acceptable to ERM. Fallow land shall remain free of prohibited species and maintained to prevent the creation of a nuisance on adjacent properties. Wetlands shall remain viable and subject to the permitting and maintenance requirements of the SFWMD.

1) Lion Country Safari Exemption
   The required bond or other funding mechanism shall not be required for any Open Space areas located within the LCS MUPD or RVPD that have been counted towards an LCS PUD, until such time as the Safari Park ceases operations. [Ord. 2011-016]

e. Plat
   All open space shall be platted simultaneously with the first plat in the development area.
5. **Landscape Buffer**

A landscape buffer shall only be required around the Development Area, adjacent to the perimeter of the project. The buffer shall be a minimum of 150 feet in width and consist of 100 percent native vegetation. Landscape buffers providing continuity between open space areas to be preserved may be counted toward meeting the minimum open space requirement.

a. **Landscape Requirements**

Portions of the buffer which are not adjacent to a street shall comply with the compatibility landscape requirements in Art. 7, Landscaping. All landscape material shall be planted in groups and/or a naturalistic pattern.

b. **Trails**

A continuous equestrian trail, fitness trail, bike path, walking path, or similar trail system shall be incorporated into the internal street R-O-W sections, around lakes, and/or within the buffers in the Development Area. Trails and paths in open space areas shall only be paved with pervious materials.

6. **Lion Country Safari Overlay (LCSO)**

In addition to the standards for an RR-PUD, an application for an RR-PUD within the LCSO that includes the transfer of density from the Lion Country Safari MUPD or RVPD, shall be limited to Option 1, Rural Cluster, and the following: [Ord. 2011-016] [Ord. 2016-042]

a) **Purpose and Intent**

The purpose of the LCSO is to acknowledge the importance of the Lion Country Safari Park as a unique tourist attraction and recognize that the viability of the park is important for the County’s tourism industry, pursuant to Plan Objective 1.11, Lion Country Safari Overlay. The Overlay establishes a mechanism to encourage the preservation of the Safari Park (MUPD), RV Park (RVPD) and related commercial recreation activities, while allowing for residential development at an overall density that is compatible with the surrounding area. This is accomplished by allowing the density of the Safari and RV Parks (excluding hotel approval) to be transferred to the Development Area of an RR-PUD within the boundaries of the Overlay. [Ord. 2011-016] [Ord. 2016-042]

b) **Applicability**

The LCSO is approximately one square mile in size, generally located north of Southern Boulevard and West of Seminole Pratt and Whitney Road in Section 23, Range 40, Township 43, as depicted in the Special Areas Planning Map LU 3.1, in the Map Series of the Plan. The provisions of the LCSO are optional, and shall only apply to projects that propose to relocate density from the Safari Park to a PUD within the boundaries of the Overlay. [Ord. 2011-016] [Ord. 2016-042]

c) **Application Requirements**

Any application that proposes to relocate density from the Safari or RV Parks to an RR-PUD within the Overlay shall comply with the following: [Ord. 2011-016]

1) **Pre-Application Conference**

2) **Master Plan**

A Preliminary or Final Master Plan shall be required to depict the overall boundaries of the LCSO, include any Zoning approvals, identify Open Space Preserve Areas from which density will be relocated to the Development Area of an RR-PUD, location of access and interconnectivity, and related tabular data. [Ord. 2011-016] [Ord. 2016-042]

d) **RR-PUD Development Area**

In addition to the Development Area requirements for a Rural Cluster PUD, the following shall apply: [Ord. 2011-016]

1) Clustered residential units which provide a variety of lot sizes to allow for a range of housing choices; [Ord. 2011-016]

2) Smaller sized lots shall be located towards the center of the Development Area and should transition to larger lot sizes located at the edge, adjacent to the existing residential neighborhoods. [Ord. 2011-016]
e) Other Requirements

1) Existing native vegetation and other natural features located within the LCSO, including a minimum of 37 acres of upland native vegetation, shall be preserved. At the time a PUD is requested, higher quality upland native vegetation shall be preserved in accordance with Art. 14.C.7.B.3, Establishing Native Upland Preserves. This requirement shall not preclude the relocation of existing native upland preserves to other areas with higher quality upland native vegetation. [Ord. 2011-016] [Ord. 2016-042]

2) Interconnectivity shall be provided between uses within the LCSO. This shall not preclude the use of security gates within the RR-PUD. [Ord. 2011-016] [Ord. 2016-042]

3) A neighborhood serving commercial store of up to 3,500 square feet shall be permitted within the RVPD to serve campers, or should the RVPD be abandoned, the neighborhood store may be incorporated into an RR-PUD. [Ord. 2011-016]

4) Golf courses are prohibited within the LCSO. [Ord. 2011-016] [Ord. 2016-042]

f) Additional Notification Requirements

Pursuant to the adoption of an LCSO Overall Master Plan, any subsequent applications for a Development Order Amendment within the boundaries of any designated Open Space Preserve Areas or associated RR-PUD shall provide for the following notification to all affected land owners and Property Owners’ Associations, as follows: [Ord. 2011-016] [Ord. 2016-042]

1) The Notice shall describe the Applicant's request for a DOA; [Ord. 2011-016]

2) The list of landowners and Property Owners’ Association(s) shall be pursuant to the latest PBC Property Appraisal list; [Ord. 2011-016]

3) The Notice shall be sent to the landowners and Property Owners’ Association(s) by certified mail within ten days of filing its applications; and, [Ord. 2011-016]

4) The Applicant shall provide to the Zoning Division a copy of the Notice and written confirmation the Notice requirements have been satisfied. [Ord. 2011-016]

H. WCR PUD

1. Purpose and Intent

To enable the appropriate transition between rural, suburban, and other uses including existing and future conservation areas, specifically the J.W. Corbett Wildlife Management Area and Everglades restoration programs and projects. It achieves compatibility with the existing residential development pattern in the surrounding area while furthering remediation of the historic land use imbalance in that area through additional non-residential uses, and residential support for other non-residential projects. This is accomplished through use of the Planned Unit Development (PUD) Zoning District, a site specific WCR FLUA amendment Conceptual Plan, hereinafter referred to as “FLUA Conceptual Plan,” and the following additional standards. [Ord. 2017-011]

2. Applicability

The provisions of the WCRO shall apply properties within a Planning Conceptual Plan for a WCR FLU designation. [Ord. 2017-011]

3. Development Review Procedures

Any application for a Development Order shall be consistent with the FLUA Conceptual Plan. [Ord. 2017-011]

   a. Rezoning

All land areas included within the FLUA Conceptual Plan shall be rezoned to a single PUD. [Ord. 2017-011]

   b. FLUA Conceptual Plan Interpretation

Any interpretation of the FLUA Conceptual Plan shall be made by the Planning Director, or by the Zoning Director in consultation with the Planning Director. [Ord. 2017-011]

   c. Commercial Pod(s) – BCC Preliminary Site Plan Approval

The BCC shall approve a Preliminary Site Plan for each Commercial Pod within a WCR PUD, with Commercial Pods developed in accordance with the standards for a Traditional Marketplace Development (TMD). [Ord. 2017-011]
4. Planned Unit Development (PUD) Exceptions
   a. Contiguity
      For the purposes of contiguity, any land area included within the FLUA Conceptual Plan, shall be considered contiguous in accordance with FLUE Policy 1.12-d. [Ord. 2017-011]
   b. Minimum Acreage
      As indicated on the FLUA Conceptual Plan. [Ord. 2017-011]
   c. PUD Land Use Mix
      The following deviations shall be permitted from Table 3.E.2.C, PUD Land Use Mix, where specified otherwise on the FLUA Conceptual Plan. [Ord. 2017-011]
      1) Minimum Residential
         The minimum required residential may be reduced. [Ord. 2017-011]
      2) Maximum Commercial
         The maximum required commercial may be increased. [Ord. 2017-011]
      3) Open Space
         Minimum or maximum required open space area shall be in accordance with the FLUA Conceptual Plan. [Ord. 2017-011]
   d. TMD Requirements for Commercial Pods
      Commercial Pods shall be located in accordance with the FLUA Conceptual Plan, developed in accordance with the standards for a TMD as specified in Art. 3.F, Traditional Development Districts (TDDs), and exempt from the PUD Commercial Pod requirements for use regulations, location, design, and PDRs. [Ord. 2017-011]
   e. Standards for Open Space
      If designated on the FLUA Conceptual Plan, additional required open space set aside areas not located within the Development Area of the WCR PUD shall be further limited to preservation, conservation, passive recreation, perimeter landscape buffers, Rural Parkways, pedestrian/equestrian pathways and greenways, wetlands, agricultural uses in accordance with f. below, regional water management, and fallow land uses. [Ord. 2017-011]
   f. Agricultural Uses
      Agricultural uses shall be permitted within a WCR PUD Development Area as an interim use, or where otherwise designated on the FLUA Conceptual Plan, provided that existing or new agricultural uses have or are eligible to be agriculturally classified by the Property Appraiser. Unless stated otherwise on the FLUA Conceptual Plan, agricultural uses shall be permitted in accordance with the standards for the AR or AP Zoning Districts, whichever is applicable based on the prior Zoning for the subject area. [Ord. 2017-011]
   g. Landscape Buffer Exceptions
      The following exceptions to landscape buffer requirements may be allowed: [Ord. 2017-011]
      1) Rural Parkways
         Landscape buffers shall not be required adjacent to Rural Parkways approved as part of the FLUA Conceptual Plan. The Planning Division shall establish Conditions of Approval on the Rezoning for all planting and pathway requirements. [Ord. 2017-011]
      2) Contiguous Open Space
         Landscape buffers shall not be required around the boundary of the required large contiguous Open Space land area (33.33 percent of the overall site) approved on the FLUA Conceptual Plan. [Ord. 2017-011]
      3) Optional Agriculture Use Compatibility Buffer
         Landscape buffers required between residential and agricultural uses located within a WCR PUD, shall only be required to be a minimum five-foot-wide Compatibility Buffer, provided the residential lots and agricultural use(s) are separated by a minimum of 50 feet of dedicated open space. [Ord. 2017-011]
      4) Section Line Easements within the WCRO
         Within the WCRO, WCR PUDs may be encumbered by ingress, egress, maintenance, drainage and irrigation easements. Collectively, when specified in the Development Order for a WCR PUD Rezoning, these easements are hereinafter referred to as “Section Line Easements.” The following may apply to Section Line Easements, except where encumbered by any other easements, including those dedicated to Palm Beach County, the Indian Trail Improvement District, a POA, or other similar: [Ord. 2017-011]
         (a) When road right of way dedication to Palm Beach County is required, Palm Beach County will accept these rights of way encumbered with only ingress, egress, irrigation, maintenance, and drainage easements, provided the dedicator/grantor, on behalf of itself
and its successors and assigns, agrees to rectify to the reasonable satisfaction of the County Engineer any impacts resulting from later construction of improvements within such right of way which are made by easement beneficiaries done without the consent of the County that materially and adversely impact the use or functionality of then existing or future County improvements within the right of way. Other types of easements shall be released prior to dedication of rights of way to Palm Beach County. The limit of the right of way conveyance shall establish the WCR PUD Base Building Line. [Ord. 2017-011]

(b) Overlap or encroachment of landscape buffer easements or tracts shall be prohibited in the Section Line Easements; [Ord. 2017-011]

(c) A minimum five-foot-wide Compatibility Buffer may be allowed in lieu of a R-O-W Buffer, where adjacent to a Section Line Easement for ingress or egress, subject to the following: [Ord. 2017-011]

(1) The Section Lines Easement is not used for ingress or egress purposes, and there are no proposed streets; [Ord. 2017-011]

(2) There is a minimum 50-foot-wide dedicated open space between the Development Area and adjacent uses. [Ord. 2017-011]

(3) Adjacent uses within the Development Area of the WCR PUD are designated for agriculture, water management, residential, or conservation uses, or external parcels support residential, agricultural, or conservation uses, or have a residential or conservation FLU designation. [Ord. 2017-011]

(d) Required landscape buffer material may be relocated into the Section Line Easements;

(e) Improvements such as, but not limited to landscaping, undulating berms, pedestrian pathways, equestrian trails, signage, drainage, utilities, and irrigation may be allowed within Section Line Easements; and, [Ord. 2017-011]

(f) The WCR PUD property line shall establish the Base Building Line. [Ord. 2017-011]

5. Traditional Marketplace Development (TMD) Exceptions

a. Minimum Square Footage
   As designated on the FLUA Conceptual Plan. [Ord. 2017-011]

b. Permitted Locations
   As designated on the FLUA Conceptual Plan. [Ord. 2017-011]

I. Supplemental Standards

1. HOA
   Concurrent with the first recorded plat a POA shall be formed to manage the common areas and govern the operations of the HOA. The Preservation Area of an RR-PUD is not required to be governed by a POA.

2. Declaration of Covenants and Restrictions
   All properties included in the legal description of a PUD shall be subject to a Declaration of Covenants and Restrictions acceptable to the County Attorney's office which shall, among other things, provide for formation of a single “master” HOA, automatic voting membership in the master association by any party holding title to any portion of the subject property, and assessment of all members of the master association for the cost of maintaining all common areas. The property shall not be subjected to the Declaration of Restrictions in phases. Approval of the Declaration must be obtained from the County Attorney's office prior to the recordation of the first plat for any portion of the Planned Development. This Declaration shall be amended if additional units or land area are added to the PUD.

3. Incompatible Uses
   The petitioner shall include in the homeowner's documents, as well as written sales brochures and sales contracts, a disclosure statement identifying and notifying of the existence of agricultural, equestrian, or cellular communication towers in the vicinity of the development.

J. Phasing and Platting
   A PUD shall be subject to the time limitation and review requirements of Art. 2.E, Monitoring of Development Orders (DOs) and Conditions of Approval and Art. 3.E.1.J, Phasing and Platting, and shall proceed in a reasonably continuous and timely manner complying with these phasing requirements and the requirements listed below.

1. Plat Requirements
   All land within the PUD, including golf courses, shall be platted. All golf courses and open space areas (including but not limited to recreation and water retention) shall be platted prior to Technical Compliance for the last residential, commercial, or civic site plat.
Section 3   Multiple Use Planned Development (MUPD)

A. General

1. Purpose and Intent
   The purpose of an MUPD is to provide for the efficient use of land by the integration of multiple uses, or large single uses, within a unified development. The intent of an MUPD is to provide opportunities for enlightened and imaginative approaches to community planning and site design by: [Ord. 2014-025]
   a. allowing flexibility from standard PDRs;
   b. applying PDRs to the entire project rather than individual lots, such as: access, parking, lot dimensions, lot frontage, and landscaping; and,
   c. encouraging the creation of a unified image between buildings and signage through architecture and linkages between land uses.

2. Applicability
   The requirements of this Section shall apply to all MUPDs, modifications to previously approved MUPDs, and modifications to previous approvals specified in Art. 3.E, Planned Development Districts (PDDs) unless otherwise stated. [Ord. 2009-040] [Ord. 2011-016]

3. Conflicts
   If a conflict exists between this Section and other Sections of this Code, the provisions of this Section shall apply to the extent of the conflict.

B. Objectives and Standards

1. Design Objectives
   An MUPD shall comply with the following objectives:
   a. Allow for both residential and non-residential uses within a project that is designed in a manner to foster compatibility within and adjacent to the project; [Ord. 2019-005]
   b. Provide innovative building location and orientation;
   c. Protect adjacent residential uses from potential adverse impacts;
   d. Provide interconnection between uses in and adjacent to the project;
   e. Allow for landscape design that enhances the appearance of the project; and, [Ord. 2014-025]
   f. An MUPD with an EDC FLU designation shall be primarily utilized by office and research parks, which may also include manufacturing and processing, research and development, wholesale distribution, and storage of products. [Ord. 2014-025]

2. Performance Standards
   An MUPD shall comply with the following standards:
   a. Freestanding Buildings
      The maximum number of freestanding buildings in an MUPD with continuous vehicular circulation on all four sides is indicated in Table 3.E.3.B, Freestanding Buildings. [Ord. 2019-005]
      1) This Section shall not apply to mixed use or residential structures. [Ord. 2019-005]
      2) For the purpose of this Section, circulation shall mean any portion of a driveway, drive aisle, or other means of vehicular access located within 50 feet of a building, excluding one-way drive-through lanes, dedicated bypass lanes, and one primary building.
      3) For the purpose of this Section, circulation shall not include vehicular access ways for uses including but not limited to Self-Service Storage facility, Data and Information Processing, Manufacturing and Processing, or Warehouses, when limited to access to individual storage units or warehouse bays, or facilities not open to the public and under the control of one business. This exception shall not apply to other vehicular circulation, or access ways providing ingress/egress to other uses or tenants within a development. [Ord. 2017-007]

       | FLU Designations | CL | CH | CLO | CHO | IND | EDC | CR | INST |
       |------------------|----|----|-----|-----|-----|-----|----|-----|
       | Number of Buildings | 1 | 3 | 1 | 3 | 3 | 3 | 3 | 3 | [Ord. 2014-025]

   b. Non-Vehicular Circulation
      An MUPD shall be designed to provide for a pedestrian and bicycle-oriented circulation system throughout the development.
      1) Sidewalks
         Where sidewalks cross vehicular use areas, they shall be constructed of pavers, brick, decorative concrete, or similar pavement treatment.
c. **Landscape Buffers**
   A Type 3 Incompatibility Buffer shall be provided along the property lines of an MUPD, where mixed use and non-residential uses are adjacent to a residential use type or undeveloped land with a residential FLU designation. The Applicant may request for an alternative buffer subject to a Type 2 Waiver process. [Ord. 2018-002] [Ord. 2019-005]

d. **Cross Access**
   Parking lots and vehicular circulation areas shall be designed to facilitate cross access directly to adjacent parcels. Cross access shall be provided between an MUPD and adjacent land with a non-residential FLU designation, if required by the DRO. The cross access shall be in a location and manner acceptable to the DRO.

e. **Parking**
   On-site parking areas shall comply with Art. 6, Parking, Loading, and Circulation, Art. 7, Landscaping, and the following:
   1) **Parking Areas**
      a) Groundcover or small shrubs 18 to 24 inches in height at installation, and maintained to achieve a maximum of 30 inches in height shall be planted in all landscape islands and divider medians. [Ord. 2018-002]
      b) Where pedestrian access ways cross landscape islands or are provided within divider medians, they shall consist of brick, decorative concrete, or similar paving treatment. [Ord. 2018-002]
   2) **Loading Area Screening**
      Internally oriented loading areas shall provide an opaque wall of a height necessary to screen vehicles from view. Foundation planting shall be provided on the exterior side of the wall.

f. **Residential**
   An MUPD with residential uses shall comply with the following additional performance standards: [Ord. 2019-005]
   1) **Proximity of Uses**
      All dwelling units shall be located within 1,320 linear feet of a recreation use or usable open space. [Ord. 2019-005]
   2) **Pedestrian Circulation**
      Internal sidewalks shall connect residential to both the non-residential use(s), and the usable open space(s). Elements of human scale shall be incorporated along these systems including but not limited to light fixtures, seating, gathering spaces, water features, statuary, and landscaping. [Ord. 2019-005]
   3) **Compatibility**
      The MUPD shall be designed to create a transition between non-residential and residential land uses within the project and between less intensive residential housing located on abutting property to the MUPD. These transitional areas may vary in width based on the adjacent housing type or residential land use designations. The elements of transition between the use types may include but is not limited to changes in housing types, variations in buildings heights, increases in building setbacks and separations, orientation of buildings, and placement of open spaces. [Ord. 2019-005]
   4) **Usable Open Space**
      In addition to the requirements of Art. 5.D, Parks and Recreation – Rules and Recreation Standards for the residential use, a minimum of five percent of the total Development Area shall be usable, open space. This open space is encouraged to be located between the non-residential and residential uses as a central gathering area in order to integrate the two uses. Trees shall be installed within this area at one tree for each 1,000 square feet of usable open space. [Ord. 2019-005]

3. **Civic Dedication**
   The BCC may require that a portion of the gross acreage of the development be dedicated to PBC for public purposes, when insufficient facilities are available to allow for the provision of government services required for the proposed development. The dedication of such property shall be in accordance with Art. 3.E.2.E.4.c.1), Public Civic. The PDRs for the PO district shall apply to the civic parcel. [Ord. 2006-004]
4. **EDC FLU – Use Limitations**

   All permitted commercial, public and civic, agricultural, utility, or industrial uses shall comply with the following: [Ord. 2014-025]
   
   a. Shall be clustered within the overall project so as to minimize any adverse impacts, including heavy truck traffic, on office and research portions of the project; and, [Ord. 2014-025]
   
   b. Outdoor storage or activity areas shall be buffered and screened from view of office or research areas, or operate completely in enclosed buildings. [Ord. 2014-025]

C. **Thresholds**

   Projects that meet or exceed the requirements of Table 3.E.3.D, MUPD Property Development Regulations, in addition to all other minimum MUPD requirements, may be submitted and reviewed as an MUPD. [Ord. 2006-004] [Ord. 2007-013] [Ord. 2015-031]

D. **Property Development Regulations**

   The minimum lot dimensions, maximum FAR, maximum building coverage, and minimum setbacks in the MUPD district are indicated in Table 3.E.3.D, MUPD Property Development Regulations, unless otherwise stated.

Residential Uses and Recreation

| MF (Mixed Use)      | Apply the RM district regulations in Table 3.D.1.A, Property Development Regulations (PDRs). |
| Recreation Pod      | Apply PUD Recreation Pod regulations. |

Notes:

C Indicates the building setback if the lot abuts a parcel with a non-residential zoning district or FLU designation, that does not support a residential use. [Ord. 2015-031]

R Indicates the setback from an adjacent parcel with residential zoning. [Ord. 2015-031]

1. Setbacks are measured in linear feet from the boundary of the MUPD.

2. The maximum FAR shall be in accordance with FLUE Table III.C.2 of the Plan, and other related provisions, unless otherwise noted, and shall include all residential and non-residential buildings. [Ord. 2019-005]

---

E. **Use Regulations**

   1. **MUPDs with Non-Residential and Residential Uses**
      
      a. **Hours of Operation**
         
         Hours of operation described in Art. 5.E.5, Hours of Operation, shall only apply to non-residential uses that meet the Proximity to Residential Requirements to an abutting property. The hours of operation Proximity to Residential Requirements do not apply to the residential within the same MUPD. [Ord. 2019-005]
      
      b. **Open Storage**
         
         No open storage or placement of any material, refuse equipment, or debris shall be permitted in the rear of any structure. [Ord. 2019-005]
      
      c. **Outdoor Speakers**
         
         No outdoor loudspeaker systems shall be permitted. [Ord. 2019-005]
F. AGR MUPD
The following standards shall apply to MUPDs in the AGR Tier. [Ord. 2017-002]

1. Conflict with Other Applicable Regulations
If a conflict exists between provisions for an AGR MUPD and other Articles of this Code, the AGR MUPD provisions shall prevail except where superseded by State or Federal laws. [Ord. 2017-002]

2. 60/40 Preserve/Development Requirements
New applications for an MUPD in the AGR Tier greater than 16 acres in size as of January 1, 2016, as determined by FLUE Policy 1.5.1 of the Plan, shall consist of two areas, the Preservation Area and the Development Area. Both areas shall be rezoned to the MUPD district and comply with the following: [Ord. 2017-002]
   a) Preserve Area
      1) Minimum Land Area
         A minimum of 60 percent of the gross acreage, less roadways identified on the Thoroughfare Identification Map, shall be designated as an AGR Preserve Area. [Ord. 2017-002]
   2) Standards and Requirements
      (a) Use Regulations
         Permitted uses shall be the same as those permitted in the Preserve Area of an AGR TMD. [Ord. 2017-002]
      (b) Requirements
         The Preserve Area shall comply with the requirements of Art. 3.E.2.F.3, Preserve Area, with exception to the following: [Ord. 2017-002]
            (1) References to residential development or PUD shall be considered synonymous with residential or non-residential development or MUPD, respectively; [Ord. 2017-002]
            (2) Art. 3.E.2.F.3.b, Uses; and, [Ord. 2017-002]
   b) Development Area
      The remaining land area, not to exceed 40 percent of the gross acreage less right-of-way as shown on the Thoroughfare Identification Map, may be developed as an MUPD, subject to the following: [Ord. 2017-002]
      1) Agriculture Reserve Design Elements
         The Development Area shall comply with FLUE Policy 1.5.1-r, Ag Reserve Design Elements. [Ord. 2017-002]
      2) Residential Mixed Use
         Residential uses shall be permitted in accordance with the standards for residential uses in an AGR-TMD. [Ord. 2017-002]

Section 4 Mixed Use Planned Development (MXPD)

A. General
   1. Purpose and Intent
      The purpose and intent of the MXPD district is to provide for the compatible development and integration of residential and non-residential uses into a unified development with enlightened and imaginative approaches to community planning, including: [Ord. 2007-001]
      a. the use of vertical or horizontal integration with residential and non-residential uses;
      b. the selection of land uses which allows for compatibility with residential uses; [Ord. 2017-025]
      c. the design of a Site Plan which provides for the integration of residential and non-residential uses;
      d. the design of safe and efficient circulation systems for pedestrians, bicycles, and automobiles; and,
      e. the utilization of multiple family homes to provide a transition area between non-residential uses and adjacent residential development.

   2. Applicability
      The requirements of this Section shall apply to all MXPDs, whether new or amended.

   3. Conflict
      If a conflict exists between this Section and other Sections in this Code, the provisions of this Section shall apply to the extent of the conflict.

B. Objectives and Standards
   1. Design Objectives
      An MXPD shall comply with the following objectives:
      a. Provide vertical or horizontal integration of residential and non-residential uses; [Ord. 2017-025]
      b. Provide a continuous non-vehicular circulation system for pedestrians;
c. Allow for innovative building design and orientation;
d. Provide for interconnection between all uses in and adjacent to the project; and, [Ord. 2017-025]
e. Provide recreational opportunities for the residential population of the MXPD. [Ord. 2017-025]

2. Performance Standards
An MXPD shall comply with the following standards:

   a. Proximity of Uses
   All dwelling units shall be located within 1,320 linear feet of a non-residential and/or recreation use.

   b. Non-Vehicular Circulation
   1) Sidewalks
   Internal sidewalks shall connect to sidewalks located along adjacent streets. Where sidewalks pass over vehicular use areas, they shall be constructed of pavers, brick, decorative concrete, or similar paving treatment.

   c. Compatibility
   An MXPD shall be designed to create a transition between non-residential and residential land uses within the project, and between less intensive residential housing located outside the MXPD. These transitional areas may vary in width based on the adjacent housing type or residential land use designations.
   1) Detached Housing
   Buildings within an MXPD adjacent to existing detached housing types, or property with a FLU designation of MR-5 or less, shall not exceed three stories or 35 feet in height within 40 feet of the common boundary.

   d. Landscape Buffers
   1) Interior Open Space
   A minimum ten-foot-wide Compatibility Buffer is required between land uses within the interior of the MXPD.

   e. Neighborhood Parks
   In addition to the requirements of Art. 5.D, Parks and Recreation – Rules and Recreation Standards, an MXPD may provide neighborhood parks which are passive in nature. [Ord. 2017-025]

3. Civic Dedication
The BCC may require that a portion of the gross acreage of the development be dedicated to PBC for public purposes, when insufficient facilities are available to allow for the provision of government services required for the proposed development. The dedication of such property shall be in accordance with Art. 3.E.2.E.4.c.1), Public Civic. The PDRs for the PO district shall apply to the civic parcel. [Ord. 2006-004]

C. Thresholds
Projects that meet or exceed the requirements of Table 3.E.3.D, MXPD Property Development Regulations, in addition to all other minimum MXPD requirements, may be submitted and reviewed as an MXPD. [Ord. 2006-004] [Ord. 2007-013] [Ord. 2015-031]

1. Land Use Mix
Table 3.E.4.C, MXPD Land Use Mix, indicates the minimum and maximum percentage of each land use allowed in an MXPD.

<table>
<thead>
<tr>
<th>Use Type</th>
<th>Min.</th>
<th>Max.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Residential</td>
<td>50%</td>
<td>75%</td>
</tr>
<tr>
<td>Non-Residential</td>
<td>25%</td>
<td>50%</td>
</tr>
</tbody>
</table>

Notes:
1. Minimum and maximum land use percentages for residential and commercial uses are calculated by dividing the total GFA of the specific land use type (either residential or non-residential) by the total GFA (residential and non-residential) of the MXPD.

2. Density
The maximum density for an MXPD shall be as indicated by the FLU in the Plan. In cases where an underlying residential density is not indicated, the Planning Director shall assign a density based on the residential densities surrounding the proposed MXPD.
D. Property Development Regulations (PDRs)
The minimum lot dimensions, maximum FAR, maximum building coverage, and minimum setbacks in an MXPD are indicated in Table 3.E.4.D, MXPD Property Development Regulations, unless otherwise stated.

Table 3.E.4.D – MXPD Property Development Regulations

Residential Apply RM district regulations.
Recreation Pod Apply PUD Recreation Pod regulations.
Neighborhood Park Apply PUD neighborhood park regulations.

[Ord. 2007-001] [Ord. 2015-031]

Notes:
C Indicates the setback from an adjacent parcel with a non-residential zoning district or FLU designation that does not support a residential use. [Ord. 2015-031]
R Indicates the setback from an adjacent parcel with residential zoning. [Ord. 2015-031]

1. The maximum FAR shall be in accordance with FLUE Table III.C.2 of the Plan, and other related provisions, unless otherwise noted. [Ord. 2007-001]

1. Setbacks
Setbacks shall be measured in linear feet from the inside of the perimeter buffer.
   a. Commercial Districts
      The front and side street setbacks in Table 3.E.4.D, MXPD Property Development Regulations, may be reduced to zero in a mixed use development which provides vertically integrated live/work or residential uses in the structure. At least 50 percent of the square feet in the structure shall be provided on the second or higher floors as live/work or Multifamily dwelling units. The required landscape buffer may be relocated subject to approval of an ALP in accordance with Art. 7.B.4, Type 1 Waiver for Landscaping.

2. FAR
Maximum FAR shall include the GFA of all residential and commercial buildings within the MXPD.

3. Integration

4. Parking
Within an MXPD, parking shall meet the following:
   a. 20 percent of the required parking shall be located on the side or rear of non-residential uses; and
   b. All required parking shall be located within 400 feet of a public entrance to a non-residential building.

E. Use Regulations
1. Residential Use
Residential uses in an MXPD shall be regulated by maximum density and maximum residential GFA.

2. Commercial Uses
   a. Open Storage
      No open storage or placement of any material, refuse equipment, or debris shall be permitted in the rear of any structure.
   b. Outdoor Speakers
      No outdoor loudspeaker systems shall be permitted.
   d. Rooftop Screening
      All rooftop mounted mechanical and electrical equipment shall be screened so as not to be visible from adjacent land uses. The screen shall be opaque and extend from the roof of the building to a minimum of six inches above the height of the object intended for screening.
Section 5 Planned Industrial Park Development (PIPD)

A. General
1. Purpose and Intent
   The purpose of the PIPD district is to create an industrial development alternative, which provides employment opportunities for industries, manufacturing, research and development, and encourages internal trip capture by offering support uses. The intent of a PIPD is to promote creative design approaches to community planning and site design for planned industrial developments. Support uses, such as hotels, offices, commercial, institutional, residential, and recreation are intended to serve the PIPD workforce and residential populations, with exception to regional serving recreation uses permitted within the Regional Recreation Pod. [Ord. 2004-040] [Ord. 2014-025] [Ord. 2017-032]

2. Applicability
   The requirements of this Section shall apply to all PIPDs, modifications to previously approved PIPDs, and modifications to previous approvals specified in Art. 3.A.3.E.2, Planned Development Districts, unless otherwise stated. [Ord. 2009-040] [Ord. 2011-016]

3. Conflicts
   If a conflict exists between this Section and other Sections in this Code, the provisions of this Section shall apply to the extent of the conflict. [Ord. 2010-022] [Ord. 2016-042]

B. Objectives and Standards
1. Design Objectives
   A PIPD shall comply with the following objectives: [Ord. 2014-025]
   a. Provide a balanced mix of land uses to provide for the needs of the residential population (if proposed) and the projected workforce;
   b. Be designed as a predominantly industrial development, with exception to: [Ord. 2016-042]
      1) the EDC FLU designation, which shall be primarily utilized by office and research parks, but may also include manufacturing and processing, research and development, wholesale distribution, and storage of products. [Ord. 2014-025]
   c. Preserve natural features, scenic areas, and native vegetation to the extent possible;
   d. Encourage the colocation of industrial processes, products, and services;
   e. Provide for support uses intended to serve the PIPD workforce and residential populations, or on-site essential services for industries, employees, and clients; [Ord. 2017-032]
   f. Protect nearby existing and future non-industrial land uses and activities;
   g. Arrange buildings and land use intensities to minimize and mitigate negative impacts;
   h. Be located near convenient access to transportation facilities such as interstate highways, major trucking routes, shipping, and/or railroad lines; and,
   i. Encourage the expansion to PBC’s economic base through new industrial investment or regional-serving recreation uses. [Ord. 2017-032]

2. Performance Standards
   A PIPD shall comply with the following standards:
   a. Perimeter Buffers
      Industrial Pods adjacent to the boundary of a PIPD shall provide a minimum 25-foot-wide Type 3 Incompatibility Buffer along the perimeter.
   b. Residential – Proximity to Other Uses
      All pods with residential units in a PIPD shall be located within 1,320 feet of commercial and personal service uses. A pedestrian accessible route shall be provided. For the purpose of this Section, distance shall be measured by drawing a straight line between the property line of a Residential Pod to the property line of the pod where the commercial/personal services are located. [Ord. 2004-040] [Ord. 2008-003]
   c. Internal Trip Capture
      A PIPD with Commercial or Residential Pod shall demonstrate the ability to achieve a ten-percent internal trip capture concurrent with the build-out of the PIPD.

C. Thresholds
1. General
   A PIPD shall comply with Table 3.A.3.C, FLU Designation and Corresponding Planned Development Districts, and with the following thresholds: [Ord. 2006-004]
   a. Lot Size
      The minimum gross land area required for a PIPD shall be as follows: [Ord. 2006-004] [Ord. 2014-025]
      1) IND FLU designation: 40 contiguous acres; or [Ord. 2014-025]
2) EDC FLU designation: 20 acres, except for parcels approved with a lower acreage as part of a FLUA amendment. [Ord. 2014-025]

b. Land Use Mix

Land uses shall be grouped into pods which limit and define the types of uses within a specific area of a PIPD. Table 3.E.5.C, PIPD Land Use Mix, indicates the range of each pod within a PIPD. [Ord. 2014-025]

<table>

Notes:
1. A General Industrial Pod shall only be permitted with an IND FLU designation. General Industrial Pods shall be prohibited with an EDC FLU designation. [Ord. 2014-025]
2. The maximum commercial acreage shall not apply to an Economic Development Center (EDC).
3. Minimum Recreation Pod requirement only applies to Residential Pods. Other residential uses such as live/work located in other than a Residential Pod shall still comply with Art. 5.D, Parks and Recreation – Rules and Recreational Standards. [Ord. 2014-025] [Ord. 2017-032]

The calculation for the mix of land uses shall be based on the gross acreage of the PIPD, excluding Preserve Areas. Neighborhood parks, water management tracts, and local roads which are internal to a pod rather than a separate pod or tract shall be credited toward the maximum land area requirement in Table 3.E.5.C, PIPD Land Use Mix.

c. Land Use Calculation

The calculation for the mix of land uses shall be based on the gross acreage of the PIPD, excluding Preserve Areas. Neighborhood parks, water management tracts, and local roads which are internal to a pod rather than a separate pod or tract shall be credited toward the maximum land area requirement in Table 3.E.5.C, PIPD Land Use Mix.

D. Property Development Regulations

The minimum lot dimensions, maximum FAR, maximum building coverage, and minimum setbacks in each pod are indicated in Table 3.E.5.D, PIPD Property Development Regulations. [Ord. 2004-040]

Notes:
1. The maximum FAR shall be in accordance with FLUE Table III.C.2 of the Plan, and other related provisions, unless otherwise noted. [Ord. 2007-001]
2. Land uses, which abut open space 40 feet in width or greater, may substitute a 20-foot side or rear setback if a 40-foot setback is required. [Ord. 2004-040] [Ord. 2017-032]
E. Pods

1. Industrial Pods
   An Industrial Pod is intended to provide areas for light and general industrial uses, and accessory uses.
   [Ord. 2004-040]
   a. EDC Future Land Use Designation
      1) Industrial Pods
         General Industrial Pods are prohibited. [Ord. 2014-025]
      2) Use Limitations
         All commercial, public and civic, agricultural, utility, or industrial uses permitted within a Light
         Industrial Pod shall comply with the following: [Ord. 2014-025]
         a) Shall be clustered within the overall project so as to minimize any adverse impacts,
            including heavy truck traffic, on office and research portions of the project; and [Ord. 2014-
            025]
         b) Outdoor storage or activity areas shall be buffered and screened from view of office and
            research areas, or operate completely in enclosed buildings. [Ord. 2014-025]

2. Commercial Pod
   A Commercial Pod is intended to provide commercial service, retail and professional office uses to
   serve the needs of the population and workforce within a PIPD. Commercial uses within a PIPD shall
   comply with the following additional use regulations:
   a. Additional Requirements
      Commercial uses within a PIPD shall comply with the following additional use regulations: [Ord. 2014-040]
      1) Outdoor Storage
         Outdoor storage of any merchandise, equipment, or refuse or similar material shall be
         prohibited.
      2) Outdoor Speakers
         No outdoor loudspeaker systems shall be permitted.
   b. Mixed Use
      Mixed use development is intended to provide residential and commercial land uses integrated
      vertically into one building or horizontally into groups of buildings. A PIPD with a BCC approval for
      a Commercial Pod may apply to the DRO to re-designate the pod as a Mixed Use Pod on the
      Master Plan. A mixed use development in a PIPD shall comply with the following:
      1) Thresholds
         A mixed use development shall have a minimum land area equal to or larger than five acres or
         a minimum GFA of 50,000 square feet.
      2) Development Regulations
         A Mixed Use Pod shall comply with the requirements for an MXPD or TMD.

3. Residential Pod
   A Residential Pod is intended to provide areas for residential housing, including units to aid in
   accommodating the workforce of a PIPD. [Ord. 2004-040]
   a. Use Regulations
      Uses shall be permitted in accordance with the provisions for a PUD Residential Pod. [Ord. 2004-
      040] [Ord. 2008-003] [Ord. 2010-022] [Ord. 2016-042] [Ord. 2017-007]
   b. Transitional Land Uses
      Housing or recreational land uses shall be located between the PIPD and adjacent residential uses
      outside of the PIPD, as determined by PZB to provide a transitional area between on-site non-
      residential uses and adjacent residential uses.

4. Recreation Pods
   a. Neighborhood Recreation Pod
      A PIPD with a Residential Pod shall provide recreation uses based on the number of units provided.
      Site improvements shall be provided in accordance with Art. 5.D, Parks and Recreation – Rules
      and Recreation Standards.
      1. Use Regulations
         Uses shall be permitted in accordance with the provisions for a PUD Recreation Pod. [Ord. 2004-
         040] [Ord. 2008-003] [Ord. 2017-007]
      2. Location
         A Recreation Pod shall not have vehicular access from an Arterial or Collector that is not part
         of the interior circulation system of the PIPD. No recreation facility shall maintain direct physical
         access to any Arterial or Collector bordering or traversing the PIPD.
3. Recreation Area
In Residential Pods, recreation areas shall be provided in accordance with Art. 5.D, Parks and Recreation – Rules and Regulations Standards, for use by the residents of the pod and their guests. [Ord. 2017-007]

4. Neighborhood Park
Neighborhood parks shall be provided in Residential Pods developed in accordance with Table 3.E.2.D, PUD Property Development Regulations.

b. Regional Recreation Pod
A Regional Recreation Pod is intended to accommodate regional serving recreation uses that further the intended economic activity center and value added activities envisioned for and allowed within a PIPD. [Ord. 2017-032]

1. Use Regulations
Uses shall be limited to Outdoor Entertainment in accordance with the Supplementary Standards of Art. 4.B.3.C.4, Entertainment, Outdoor. [Ord. 2017-032]

2. Location
A Regional Recreation Pod shall have frontage on an Arterial or Collector. [Ord. 2017-032]

5. Civic Pod
A Civic Pod is intended to provide areas for the provision of civic needs for residents and the workforce of a PIPD. [Ord. 2004-040]

a. Use Regulations
Uses shall be permitted in accordance with the provisions for a PUD Civic Pod. [Ord. 2008-003] [Ord. 2017-007]

Section 6 Mobile Home Planned Development District (MHPD)

A. General
1. Purpose and Intent
The purpose of the MHPD district is to offer a mobile home residential development alternative which allows a limited amount of commercial uses and corresponds to a range of residential FLU designations in the Plan. The intent of the MHPD is to promote the efficient design of mobile home communities, provide imaginative design approaches to community planning and, accommodate the housing needs of those residents who prefer mobile home living and those who desire an economic alternative to conventional dwellings.

2. Applicability
The requirements of this Section shall apply to all MHPDs, modifications to previously approved MHPDs, and modifications to previous approvals specified in Art. 3.A.3.E.2, Planned Development Districts, unless otherwise stated. [Ord. 2009-040] [Ord. 2011-016]

3. Conflicts
If a conflict exists between this Section and other Sections in this Code, the provisions in this Section shall apply to the extent of the conflict.

B. Objectives and Standards
1. Design Objectives
An MHPD shall comply with the following objectives:

a. Provide sufficient separation between units to ensure privacy;

b. Provide creative and safe circulation systems;

c. Provide sufficient parking and storage areas;

d. Provide accessible recreation and civic opportunities; and,

e. Offer limited commercial opportunities.

2. Performance Standards
An MHPD shall comply with the following additional standards.

a. Separation
The minimum separation between units shall be ten feet.

b. Traffic Calming
Streets shall be designed to include traffic calming measures, such as chicanes, landscaped medians, speed humps, roundabouts, etc., if required by the County Engineer.

c. Parking
A minimum of one visitor space shall be provided for every five mobile homes.
d. Storage
The Site Plan shall contain an area for outdoor storage of boats, trailers, RVs, etc., if required by the DRO.

e. Proximity to Other Uses
Each residential lot shall be located within 600 feet of a neighborhood park or Civic, Commercial, or Recreation Pod.

C. Thresholds
An MHPD shall comply with Table 3.A.3.C, FLU Designation and Corresponding Planned Development Districts, and the following: [Ord. 2006-004]

1. Thresholds
The minimum gross land area required for an MHPD is ten contiguous acres. [Ord. 2006-004]

2. Density
The density in an MHPD shall be in accordance with the Plan. [Ord. 2006-004]

3. Land Use Mix
A mix of land uses shall be provided in an MHPD by designating pods on the Master Plan as Residential, Civic, Commercial, or Recreation. The mix of uses shall be calculated based on the gross acreage of the MHPD and Table 3.E.6.C, MHPD Land Use Mix.

<table>
<thead>
<tr>

Notes:
C Indicates the required building setback for land uses abutting a non-residential zoning district, a Civic, Mixed Use Commercial, or Industrial Pod. [Ord. 2005-002]

R Indicates the required setback for land uses abutting a residential zoning district or a Residential Pod.

1. Pods that abut a lake, canal, or Preserve Area that is greater than or equal to 40 feet in width along the boundary of the land use, may reduce the required 40-foot setback by 50 percent. Setbacks shall be measured from the inside edge of perimeter landscape buffer and internal road R-O-Ws for recreation, civic, and commercial uses. Setbacks shall be measured from individual lot lines, rental lines, and from condominium lines. [Ord. 2005-002] [Ord. 2020-001]
E. Pods

1. General
   The MHPD allows a limited amount of flexibility in establishing the proper amounts of pods. Land uses shall be grouped into pods which define the types of uses within a specific area of an MHPD, (see Article 3.E.6.C.3, Land Use Mix). Percentages of pods may vary as outlined in Table 3.E.6.C, MHPD Land Use Mix, and the requirements listed below.
   a. An MHPD shall comply with the required site improvements for a Single Family subdivision in Article 11, Subdivision, Platting, and Required Improvements.
   b. The County Engineer shall approve a site improvement implementation schedule and all construction plans prior to construction.
   c. The construction plans shall coincide with the approved Site Plans/Subdivision Plans.
   d. The following improvements shall be provided, as required by Article 11, Subdivision, Platting, and Required Improvements: bridges, grading, drainage, fire hydrants, monuments, potable water system, sanitary sewer system, streets, street markers, street lighting, and traffic controls.

2. Residential Pod
   The site design and layout for each Residential Pod shall be indicated on a Site Plan and/or Subdivision Plan approved by the DRO. The site design shall indicate the fee simple, rental, lease, or condominium lot configuration and circulation systems. The layout shall indicate compliance with Table 3.E.6.D, MHPD Property Development Regulations, and the setbacks for accessory structures such as storage buildings, covered parking areas, screen enclosures, and pools.

3. Civic Pod
   The Civic Pod is intended to promote a coordinated land planning approach for providing and encouraging publicly and privately-owned land uses to serve the community.
   a. Threshold
      An MHPD with a gross land area equal to or larger than 50 acres shall designate a minimum of two percent of the gross area of the MHPD as civic.
   b. Public/Private Dedication
      A Civic Pod in an MHPD shall comply with the standards for a Civic Pod in a PUD.

4. Commercial Pod
   A limited amount of neighborhood-oriented commercial development may be provided in an MHPD for the convenience of the residents.
   a. Location
      A Commercial Pod in an MHPD shall comply with the standards for a Commercial Pod in a PUD.
   b. Architecture
      A Commercial Pod shall be subject to Article 5.C, Design Standards.
   c. Building Permits
      Building Permits for commercial structures shall not be issued until tie down permits have been finalized for a minimum of 20 percent of the total number of units.

5. Recreation Pod
   a. Parking
      Parking is not required for neighborhood parks or Recreation Pods less than one acre.

F. Supplementary Standards

1. Emergency Shelter
   A permanent hurricane evacuation and emergency shelter shall be provided prior to the issuance of tie down permits for 20 percent of the total number of units. The shelter shall be designed to accommodate the population of the MHPD based on a minimum of 40 square feet/person.

2. Temporary Structures
   Temporary structures, such as construction trailers and security quarters, may be allowed, subject to Article 5.B, Accessory Uses and Structures. A mobile home may be used as a rental office.

G. Rezoning or Other Application for Redevelopment of Mobile Home Parks
   Any Rezoning, or other application for a DO, for property having an existing mobile home park shall comply with the requirements of F.S. § 723.083, Governmental Action Affecting Removal of Mobile Home Owners. [Ord. 2011-001] [Ord. 2017-025]
Section 7  Recreational Vehicle Planned Development District (RVPD)

A. General
   1. Purpose and Intent
      The purpose of the RVPD district is to promote the design of recreation-oriented development for land which has a Commercial, Industrial, Commercial Recreation, or Rural Residential FLU designations. The intent of an RVPD is to provide tourist-oriented uses in a park-like environment for temporary residents.
   2. Applicability
      The requirements of this Section shall apply to all RVPDs, modifications to previously approved RVPDs, and previous approvals specified in Art. 3.A.3.E.2, Planned Development Districts, unless a rezoning is required pursuant to Art. 3.A.3, Zoning District Consistency with the Future Land Use Atlas (FLUA). [Ord. 2011-016]
   3. Conflicts
      If a conflict exists between this Section and other Sections in this Code, the provisions in this Section shall apply to the extent of the conflict.

B. Thresholds
   1. Acreage
      The minimum gross land area required for an RVPD is ten contiguous acres. [Ord. 2006-004]
   2. Sites
      The number of RV and campsites allowed shall be as specified in Table 4.B.3.C, Campground Intensity. [Ord. 2017-007]
   3. Land Use Mix
      A mix of land uses shall be provided by designating pods on the Master Plan as recreation or commercial. The mix of uses shall be calculated based on the gross acreage of the RVPD and Table 3.E.7.B, RVPD Land Use Mix.

<table>
<thead>

</thead>
<tbody>
<tr>
<td>Recreation</td>
<td>98%</td>
<td>100%</td>
</tr>
<tr>
<td>Commercial</td>
<td>-</td>
<td>2%</td>
</tr>
</tbody>
</table>

C. Pods
   1. Recreation
      A minimum of ten percent of the land area in a Recreation Pod shall be devoted exclusively to recreation uses.
   2. Commercial
      No commercial use, building, or structure shall front or have direct legal access on any Arterial or Collector Street bordering or traversing the RVPD. Commercial uses shall be intended for the use of temporary residents in the RVPD only, with exception to a permanent Real Estate Sales Office for the sale of RV sites located within the RVPD. [Ord. 2014-025]

D. Time Limitations
   RV sites, campsites, and camping cabins shall comply with standards in Art. 4.B.3.C.2.f, Duration of Stay. [Ord. 2017-007]

E. Property Development Regulations (PDRs)
The PDRs for an RVPD are indicated in Table 3.E.7.E, RVPD Property Development Regulations.

Notes:
1. Setbacks shall be measured from the inside edge of the landscape buffers. [Ord. 2020-001]
2. All other recreation buildings include the clubhouse and accessory structures.
3. Lot dimensions are the minimum, except where noted.
F. Landscape Buffer
Perimeter landscape areas shall comply with the following:

1. R-O-W Buffer
   The R-O-W Buffer shall include a minimum six-foot-high opaque landscape barrier in the form of a
   berm, wall, fence, hedge, or combination.

2. Perimeter Buffer
   A Type 3 Incompatibility Buffer shall be provided around the perimeter of an RVPD. This requirement
   may be modified by an ALP, pursuant to Art. 7.B.4, Type 1 Waiver for Landscaping.

G. Supplemental Standards
1. Permanent Structures or Additions
   a. Permanent structures or additions attached to an RV, such as screen rooms, carports, or utility
      sheds, shall be prohibited except as provided for under b. below. [Ord. 2014-001]
   b. Detached accessory structures used for storage, utilities or entertainment are permitted on
      individual RV sites subject to the following: [Ord. 2014-001]
      1) Maximum of 200 square feet in size; [Ord. 2014-001]
      2) Minimum ten-foot separation between buildings; [Ord. 2014-001]
      3) Sleeping accommodations are prohibited; [Ord. 2014-001]
      4) Full kitchens or cooking facilities shall be prohibited. Sinks, refrigerators, and cabinets/counters
         shall be allowed; and, [Ord. 2014-001]
      5) HVAC and bathroom facilities may be permitted. [Ord. 2014-001]
      6) Minimum RV site size shall be 3,000 square feet; [Ord. 2014-001]
      7) Accessory structures shall be exempt from the requirements of Art. 5.C.1.H.1.g.4), Porches
         and Entryways; and, [Ord. 2014-001]
      8) Accessory structures shall be exempt from the Foundation Planting requirements of Art.
         7.C.3.B, Foundation Plantings, provided that a minimum of 40 percent of the perimeter façade
         shall have a foundation planting a minimum of two feet in width. [Ord. 2014-001]

2. Parking
   Parking or storage of vehicles in areas not designed or designated for parking or storage is prohibited.

3. Temporary Structures
   Temporary structures, such as construction trailers, RV site Real Estate Sales Office, and security
   quarters, may be allowed, subject to Art. 5.B.1.C, Temporary Structures. A mobile home may be used
   as a Caretaker Quarters, security quarters, Watchman Trailer, or temporary structure. [Ord. 2014-025]
   [Ord. 2019-005]

4. Storage
   The Site Plan shall contain an area for outdoor storage of boats, trailers, RVs, etc. if required by the
   DRO.

5. Real Estate RV Site Sales
   A permanent Real Estate Sales Office for RV sites may be collocated with an accessory management
   office in a Recreation Pod. [Ord. 2014-025]
CHAPTER F  TRADITIONAL DEVELOPMENT DISTRICTS (TDDs)

Section 1  General Provisions for TDDs

A. Purpose and Intent
The purpose and intent of TDDs is to implement the Traditional Town Development (TTD), the Traditional Marketplace Development (TMD), and the Traditional Neighborhood Development (TND) provisions of the Plan and to:
1. Encourage mixed use, compact development that is pedestrian in scale and sensitive to environmental characteristics of the land, and facilitates the efficient use of services within PBC;
2. Have residences, shopping, employment, and recreational uses located within close proximity with each other and efficiently organized to provide for the daily needs of the residents;
3. Provide for a range of housing types within pedestrian-oriented, human-scale neighborhoods;
4. Provide efficient circulation systems for pedestrians, non-motorized vehicles, and motorists that serve to functionally and physically integrate the various land use activities; and,
5. Allow for a cohesive neighborhood identity and focus.

B. Applicability and Definitions
1. Applicability
The requirements of this Chapter shall apply to all TDDs, whether new or amended, within unincorporated PBC, in accordance with Art. 1, General Provisions and Art. 1.E, Prior Approvals. To the extent this Section conflicts with other Sections of this Code, the provisions of this Section shall apply.
2. Definitions

C. Review and Approval Process
All development within TDDs are subject to the review and approval procedures that apply to planned developments; see Art. 3.E, Planned Development Districts (PDDs).
1. Traditional Town Development (TTD) Required Plan Options
The BCC may approve a Preliminary Master Plan for a TTD, including TMD, MUPD, TND, and PUD Pods, and Conditional Uses, without concurrent submittal of Preliminary Site Plans or Subdivision Plans. The BCC shall approve a Preliminary Site Plan for a TMD, MUPD, and any Requested Uses prior to Final Site Plan approval. Preliminary Site Plan or Subdivision Plan approval shall not be required for a TND or PUD Pod, unless the Applicant is requested Waivers or other standard requiring BCC approval. [Ord. 2014-031] [Ord. 2018-002]

D. Types of TDDs
TDDs include the following:
1. Traditional Neighborhood Development (TND)
TNDs are primarily residential areas with neighborhood-scale commercial, civic, and open-space uses.
2. Traditional Marketplace Development (TMD)
TMDs are mixed use commercial, residential, and office areas that function as town activity centers serving residents in the vicinity. The Lifestyle Commercial Center (LCC) is a type of TMD in the Urban/Suburban Tier limited only to sites required by Condition of Approval by Ord. No. 2008-048 and Ord. No. 2017-025.
3. Traditional Town Development (TTD)
TTDs are intended for the coordinated development of larger sites that include a combination of traditional development districts. Standards focus on connections between these districts.

E. FLUA Consistency, FAR and Density
1. Land Use Categories
2. TDDs Split by Land Use
a. TMD Exception
A TMD with more than one underlying non-residential FLU designation may utilize either land use, or combination, to satisfy the minimum required land use mix for a TMD. [Ord. 2005-002]
3. Density
The allowable density shall be in accordance with FLUE Table 2.2.1-g.1 and other related Policies of the Plan and related Policies. [Ord. 2019-005]
F. Use Regulations

Uses permitted in a TDD shall be according to the land use zone designation on the Master Plan approved by the DRO, or the land use designation of the TDD, whichever is applicable, and Art. 4, Use Regulations. Uses may be further limited by the Development Order, Concurrency Reservation, or other applicable requirement. [Ord. 2005-002] [Ord. 2017-007]

1. Conditional Use

The location, or alternative locations for each Conditional Use must be approved by the BCC, and the Conditional Use must be located in only one of the locations approved by the BCC. All prior approvals for a Requested Use shall correspond to a Conditional Use. [Ord. 2005-002] [Ord. 2005-041] [Ord. 2017-007]

G. Design Objectives

TDDs shall comply with the following design guidelines:

1. Neighborhoods

a. A mix of residential uses shall be required in a TND, to provide a variety of housing opportunities. TND residential uses include: [Ord. 2005-002]
   1) Single Family dwellings;
   2) Zero Lot Line (ZLL) dwellings;
   3) Townhouses;
   4) Multifamily dwellings;
   5) Accessory dwellings; or,
   6) Congregate Living Facilities.

   ![Figure 3.F.1.G – TDD Mixed Housing Types](image)

   Residential neighborhoods include a mixture of housing types from Multifamily buildings integrated with commercial and office uses, to Single Family detached houses.

b. Centrally-located community focal points for the formal and informal interaction of neighborhood residents, such as a neighborhood square, community meeting hall, or neighborhood commercial center. These uses are within walking distance (within 1,320 feet) of all neighborhood residents. [Ord. 2005-002]

c. A variety of open spaces and recreation areas to allow for both passive and active recreation. Small neighborhood parks and playgrounds should be located throughout the neighborhood, so all residents are closely located (within 1,320 feet) to a neighborhood park. Large outdoor recreation areas should be located at the periphery of neighborhoods rather than in central locations. [Ord. 2005-002]

   ![Figure 3.F.1.G – TDD Focal Points](image)
d. An interconnected network of streets, bike lanes, and sidewalks throughout the neighborhood, providing multiple routes for vehicle, bicycle, and pedestrian travel, diffusing traffic and shortening walking distances. Streets are designed for slower speeds to encourage pedestrian safety. Alleys shall provide vehicular access to garages and open spaces in the rear of buildings. [Ord. 2005-002]

Figure 3.F.1.G – TDD Interconnected Street Grid

e. A safe and attractive pedestrian environment enhanced by the design of buildings which provide windows and entrances to reduce the amount of blank walls. Sidewalks include pedestrian amenities such as shade trees and street furniture.

2. Commercial Districts
a. Public spaces, such as plazas and squares, integrated within commercial development providing places for people to gather or rest. Walkways provide pedestrian connections throughout the development. Lighting and landscaping accent public spaces and provide for security and shading.

b. Parking is provided on-street, behind buildings, and in shared parking lots. Parking lots in front of buildings create barriers between pedestrians and storefronts and shall be discouraged. [Ord. 2005-002]

c. Buildings are human-scaled in design with a range of architectural features, which create an attractive and varied streetscape. Building frontages shall be set near the sidewalk and building sizes are generally consistent, providing a sense of enclosure for the street, except where separations are permitted. Architectural detailing and applied decoration enliven façades and add texture. Building entrances and windows shall be located along street frontages to break up blank walls and enhance the pedestrian environment. [Ord. 2005-002]

H. Phasing and Platting
1. Phasing
   TDDs shall be subject to the phasing, time limitations and review requirements of Art. 2.E, Monitoring of Development Orders (DOs) and Conditions of Approval. [Ord. 2005-002]

2. Platting
   All land in a TDD shall be platted in accordance with Art. 11, Subdivision, Platting, and Required Improvements. All land within the TDD, including private civic tracts and open space areas (including but not limited to recreation and water retention) shall be platted prior to Technical Compliance for the last residential or commercial tract. [Ord. 2005-002]

I. Development Phasing
   Phasing of TDD developments in the U/S Tier shall be limited to a maximum of four phases of up to three years each. The first phase of the project shall include a minimum of 25 percent of the total project, unless otherwise approved by the BCC. [Ord. 2005-041]

Section 2 General Standards

A. Applicability
   The following standards shall apply to all TDDs:

1. Streets, Sidewalks, and Alleys
   The circulation system within a traditional development shall allow for different modes of travel within the TDD and between adjacent uses, based upon a hierarchy of transportation methods. The street and sidewalk network shall be designed around a series of blocks which provide visual and functional links within and between residential, commercial, office, civic, and open space areas, and shall be connected to existing and proposed external development.
a. **TDD Definition for Street**
For the purposes of this Section, the term streets shall include private access ways. [Ord. 2005-002]

b. **Block Structure**
To ensure compact, contiguous development and to facilitate connectivity and pedestrian accessibility, the layout of streets and alleys shall conform to the following standards.

**Table 3.F.2.A – Block Dimension Requirements**

<table>
<thead>
<tr>
<th></th>

<td>1,500-1,800'</td>
<td></td>
</tr>
</tbody>
</table>

[Ord. 2014-031]

**Notes:**
1. The maximum block face within a TND district or pod may be increased to up to 1,000 feet subject to the following:
   - Pedestrian pass through shall be a minimum of 50 feet in width, and comply with the TND requirements for neighborhood parks;
   - Pedestrian pass through shall interconnect with other pedestrian pass through or streets to provide enhanced interconnectivity between the outer edges of each TND and a required Neighborhood Center; and,

2. Parcels located along the perimeter of a TDD may be exempt from the block perimeter requirements where a TMD or TND district or pod abuts open space, roads external to the development or pod, or where DEPW requirements preclude vehicular access points necessary to complete the block structure.

**Figure 3.F.2.A – TDD Block Structure**

*Max 4 alley outs. 2 per side.
*Max Ratio of Block length to width 2:1 (for TND Neighborhoods only).
1) **Maximum Number of Alley Curb Cuts**
   Four per block and two per side.

2) **Minimum Spacing between Alley Curb Cuts**
   80 feet.

c. **Streets**
   1) **Street Design**
      Public streets shall conform to the standards in Table 3.F.2.A, TDD Street Design Standards by Tier.

**Notes:**

1. Unless otherwise stated herein, exceptions to dimensions shall only be permitted to accommodate turn lanes at the perimeter of a TMD, TND or TTD for turn lanes required by the PBC Engineering Department, or for roundabouts or other traffic calming measures typically associated with a TDD. This exception shall not be permitted for divider medians. [Ord. 2008-003]

2. Parking lane dimensions include the curb and gutter dimensions. [Ord. 2008-003]

3. Easements may be collocated with alleys. [Ord. 2008-003]

4. Includes a minimum ten-foot-wide pedestrian sidewalk that may be reduced for arcades, and a minimum five-foot-wide strip for street trees and street lights. This dimension may be increased by up to ten feet in width (for a total of 20 feet) to accommodate outdoor dining areas, or larger street tree and street light areas. [Ord. 2008-003]
Figure 3.F.2.A – TDD Commercial Street

Figure 3.F.2.A – TDD U/S (Local Residential Street)
Figure 3.F.2.A – TDD U/S (Collector: With On-Street Parking)

Figure 3.F.2.A – TDD U/S (Collector: Without On-Street Parking)
2) Connectivity

All streets and alleys shall connect to other streets and alleys to form a continuous vehicular and pedestrian network within the district. Streets shall connect to streets in adjacent development or vacant parcels, except for AGR TMDs. The use of gates or other preventative barriers shall not be permitted on Collector Streets. [Ord. 2005-041]

a) Dead End Streets

No more than 20 percent of all streets may be dead end streets, such as cul-de-sacs and T-turnarounds. The maximum length for dead end streets shall be 660 feet and up to 750 feet, with a mid-block pedestrian pass thru. The maximum length for dead end streets shall be: [Ord. 2005-002]
(1) Single Family Residential
660 feet. Up to 750 feet with a mid-block pedestrian pass thru.

(2) All Others
500 feet.

e. Alleys
A minimum of one alley shall be required in all blocks, except blocks of Single Family and ZLL residential uses and AGR TMDs. Alleys shall conform to the standards in Art. 11, Subdivision, Platting, and Required Improvements, and the following: [Ord. 2005-041]
1) Alleys shall conform to the design standards in Table 3.F.2.A, TDD Alley Design Standards. Alleys providing access to residential buildings shall be built to residential alley standards. Alleys providing access to commercial or office buildings shall be built to commercial alley standards. Where an alley provides access to a block with both residential and commercial uses, the alley shall be built to the commercial alley standards.

f. Utilities and Lighting
1) Utilities
Public utilities and lighting shall be installed in accordance with the standards of Art. 11.E.7, Utilities.
2) Lighting
a) Street Lighting
Street lighting shall be provided along all streets and alleys, subject to Art. 5.E.4.E, Outdoor Lighting, and the standards in Table 3.F.2.A, TDD Street Lighting Standards. A minimum of one light fixture shall be located at every crosswalk.
(1) Exurban-Rural Tiers
   (a) Lights are optional for residential streets.
   (b) All lights must be fully shielded utilizing full cut off luminaries per the Illuminating Engineer Society of North America (IESNA) definition for full cutoff which allows for zero percent of lumens above 90 degrees from nadir. [Ord. 2014-031]
(2) AGEO
   All lights must be fully shielded in accordance with the standards for the Exurban and Rural Tiers. [Ord. 2014-031]

<table>
<thead>

</tbody>
</table>

[Ord. 2005-041]
b) Parking Lot Lighting
All parking lot lighting shall be fully shielded. All lighting fixtures shall be a maximum of 35 feet in height.

2. Parking and Access
   a. Number of Spaces
      Parking shall be provided as follows. On-street spaces may be used to meet these parking requirements.
      1) Residential
         Parking shall be provided in accordance with Art. 6, Parking, Loading, and Circulation.
      2) Non-Residential
         a) Minimum Number of Parking Spaces
            One parking space per 400 square feet of GFA (2.5/1,000). [Ord. 2005-002]
         b) Maximum Number of Parking Spaces
            (1) Exurban and Rural Tiers
                One space per 250 square feet of GFA (4/1,000). [Ord. 2005-002]
            (2) AGR Tier
                One space per 200 square feet of GFA (5/1,000). [Ord. 2005-002]
   b. Reduction in Requirement
      The number of required spaces may be reduced by either of the following methods:
      1) The shared parking requirements of Art. 6, Parking, Loading, and Circulation; or
      2) A parking demand study prepared by a traffic engineer licensed by the State of Florida
demonstrating that the parking demand for the project will be less than the requirements of this Section.
   c. Location of Parking
      On-site parking is prohibited in required front or side street setbacks. No parking space shall be
located further than 750 feet from a building entrance. Parking shall be equitably distributed
throughout the project. [Ord. 2005-002]
   d. Parking Structures
      1) U/S and AGR Tiers
         Structured parking is required for any spaces in excess of one space per 250 gross square feet
         of non-residential floor area.
            a) Type 2 Waiver
               The requirement for structured parking in the AGR Tier may be waived by the BCC upon
               approval of a Type 2 Waiver. [Ord. 2005-002] [Ord. 2012-027]
      2) Exurban and Rural Tiers
         Structured parking is prohibited. [Ord. 2005-002]
   e. Bicycle Parking
      One parking area shall be provided for every five units in Multifamily housing and for every 20
vehicle parking spaces serving non-residential uses. Bicycle parking spaces shall be indicated on
the Site Plan in visible, well-illuminated areas. For each bicycle parking space required, a stationary
object shall be provided to which a user can secure the bicycle. The stationary object may either
be a freestanding bicycle rack or a DRO approved alternative. [Ord. 2005-002]
3. Minimum Pervious Surface
   a. U/S and AGR Tiers
   b. Exurban and Rural Tiers
      30 percent of the project site. [Ord. 2005-002] [Ord. 2005-041]

4. Landscaping and Buffering
   In addition to the requirements in Art. 7, Landscaping, the following standards apply: [Ord. 2005-002]
   a. Buffer around Districts
      1) No buffers are required where one TDD abuts another TDD. [Ord. 2005-002]
      2) AGR TMD Perimeter Buffer
         a) Incompatibility Buffer
            A Type 3 Incompatibility Buffer shall be required between the Development Area and all
            abutting properties zoned AGR that support agricultural uses, or are vacant (unless deed
            restricted to non-agricultural or residential uses). The minimum buffer width shall be 25
            feet. [Ord. 2005-002]
         b) R-O-W Buffer
            (1) The R-O-W Buffer width reduction permitted under Art. 7.C.2.A, R-O-W Buffer, shall
                only be permitted for any property line which abuts a 100-foot-wide Rural Parkway. In
                the AGR Tier, a R-O-W Buffer abutting open space a minimum of 100 feet in width and
                designated as a Rural Parkway may be deleted subject to DRO approval of a
                Regulating Plan that demonstrates that the landscaping in the Rural Parkway exceeds
                required R-O-W planting and buffering requirements. Required landscaping must be
                located within or adjacent to the Rural Parkway. [Ord. 2005-041]
            (2) A minimum four-foot high-hedge, fence, or wall visual screen shall be required in a R-
                O-W Buffer adjacent to any surface parking area having more than two rows of parking.
                [Ord. 2005-041]
   b. Internal Compatibility and Incompatibility Buffers
      Buffers are not required within TDDs, except that a solid six-foot-high wall or five-foot-wide
      landscape planting area providing a visual screen at least six feet in height is required along an
      interior property line where a non-residential use abuts a residential use. The height of the wall or
      landscape screen shall not exceed three feet within required front setback areas. The internal buffer
      requirement for Multifamily and Townhouse units may be waived when the units are constructed
      on a Main Street; are attached to a commercial structure; are separated from a commercial
      structure by streets or an alley, pedestrian walkway, or plaza; or, when adjacent to open space,
      plazas, or private recreational uses associated with units requiring a buffer. [Ord. 2005-002] [Ord.
      2005-041]
   c. On-Site Parking Areas
      1) Trees
         One Canopy tree shall be planted for every eight parking spaces. In a Neighborhood Center,
         one Canopy tree shall be planted for every six parking spaces. Trees shall not be spaced more
         than 80 feet apart.
      2) Terminal Islands
         Terminal landscape islands, subject to the requirements of Art. 7.C.4, Landscape
         Requirements for On-Site Parking. Terminal and interior landscape islands shall be provided
         on both sides of all vehicular access points.

Figure 3.F.2.A – TDD On-Site Parking Landscaping Standards
d. **Street Trees**

Street trees shall be provided along sidewalks, subject to the following standards:

1) **Number**

   A minimum of one Canopy tree shall be required for every 40 lineal feet of street frontage. Palm trees may be substituted for a Canopy tree on a 4:3 basis along a frontage with a covered walkway. [Ord. 2014-031]

2) **Minimum Height**

   14 feet.

3) **Minimum Diameter**

   Two and one-half inches, measured four and one-half feet above grade.

4) **Spacing**

   Trees shall be spaced between a maximum of 40 feet on center. [Ord. 2014-031]

   ![Figure 3.F.2.A – TDD Street Tree Standards](image)

5. **Fencing and Walls**

   Fences and walls shall be subject to the standards of Art. 5.B.1.A.2, Fences and Walls. Fences shall be made of wood, wrought iron, reinforced concrete with stucco, brick, vinyl-covered chain link, plastic composite, or a combination of these materials. Fences in the Exurban, Rural, and AGR Tiers shall be made of wood or other materials consistent with the rural design standards that demonstrate a vernacular or rural character.

6. **Signage**

   All signs shall be located on site in a manner that ensures consistency within the development; with site, architectural, and landscape plans; site layout; ultimate maturity of vegetation; and, final architectural elevation. When preparing a sign plan the Applicant shall consider and give attention to the placement of the sign to provide clear visibility for the tenants. In addition to the regulations in Art. 8, Signage, the following shall apply: [Ord. 2009-040]

   a. **Building-Mounted Signs**

      Building-mounted signs, including wall signs, awning and canopy signs, and projecting signs shall be permitted, subject to the following additional requirements: [Ord. 2009-040]

      1) **Size**

         0.75 square foot of signage for every linear foot of tenant frontage shall be permitted, up to a maximum of 64 square feet. [Ord. 2009-040]

      2) **Sign Placement**

         a) Signs shall be located between the first and second story of the building. If the second story is non-residential, the signage shall comply with the minimum vertical separation requirements in Table 8.G.1.A, Wall Sign Standards. [Ord. 2009-040]

         b) All significant decorative elements on the building shall be considered when locating wall signs to ensure they are in harmony with each other. In addition, the architecture features, elements, or building lines shall not be modified to accommodate the location of the signs. [Ord. 2009-040]
3) **Projection**
   Sign projection shall not exceed a maximum of 30 inches from any building face. [Ord. 2009-040]

b. **Freestanding Signs**
   Unless otherwise provided herein, all freestanding signs shall be prohibited.
   1) **AGR-TMD Exceptions**
      Freestanding signs shall be permitted in an AGR-TMD pursuant to the following requirements: [Ord. 2009-040]
      a) **Maximum Size and Height**
         Signs shall not exceed 150 square feet of sign face area, and shall be limited to 15 feet in height. [Ord. 2009-040]
      b) **Maximum Number Allowed**
         One freestanding sign shall be permitted per right-of-way frontage. [Ord. 2009-040]

   2) **A-frame Signs**
      Temporary freestanding A-frame signs shall be allowed in front of arcades and covered walkways for commercial or mixed use buildings, provided they do not conflict with pedestrian walkways. [Ord. 2009-040]

c. **Entrance Wall Signs**
   Entrance wall signs are permitted for the purpose of identification, subject to the standards in Art. 8, Signage. Sign copy and graphics shall identify only the name of the development and the address.

7. **Recreation Clubhouse Emergency Generators**
   A permanent emergency generator shall be required for all TDD clubhouses 20,000 square feet or greater, and shall meet the standards of Art. 5.B.1.A.19, Permanent Generators. [Ord. 2006-004] [Ord. 2011-016]

Section 3 Traditional Neighborhood Development (TND)

A. **Specific Purposes**
   The purpose of the TND district is to:
   1. Establish a specific neighborhood identity and focus with a pedestrian-oriented design consistent with the Tier in which the development is located;
   2. Provide a range of residential, commercial, civic, and open space land uses in close proximity to one another within the neighborhood;
   3. Encourage a variety of non-vehicular modes of transportation, such as walking, bicycling, Segways, equestrian, golf carts where permitted by F.S., and water-oriented uses such as kayaks, canoes, or stand-up paddle boards, to reduce the need for local automobile trips; [Ord. 2014-031]
   4. Offer a range of housing opportunities;
   5. Preserve natural features and scenic areas; and,
   6. Provide a safe and efficient circulation system for pedestrians, non-motorized vehicles, and automobiles, and emphasize connectivity within and to adjacent uses.

B. **Thresholds**
   A TND shall comply with **Table 3.A.3.D, TDD Corresponding Land Use**, and the following: [Ord. 2006-004]
   1. **Minimum Size**
      The minimum gross land area required for a TND is 40 contiguous acres. Within the U/S Tier, the minimum size may be reduced to 25 acres for infill projects that are adjacent to existing residential, civic, or commercial development on at least two sides. [Ord. 2006-004]
   2. **Land Use Mix**
      TNDs shall provide residential, recreational, civic, and neighborhood commercial land uses, as provided in **Table 3.F.3.B, TND Land Use**. A TND developed as part of a TTD is subject to the minimum land use allocations provided in **Table 3.F.5.C, Traditional Town Development Land Use Allocations**, [Ord. 2006-004]
Table 3.F.3.B – TND Land Use

</tbody>
</table>

[Ord. 2006-004] [Ord. 2010-022]

Notes:
1. Civic uses may be collocated with the Neighborhood Centers.

3. Minimum Development Threshold
   Any TND or single project of TNDs with more than 320 acres shall be developed as a TTD. [Ord. 2006-004] [Ord. 2010-022] [Ord. 2014-031]

C. General Standards
   The following standards apply to all TND development:
   1. Neighborhoods
      The basic component of a TND is the neighborhood, organized in blocks around a neighborhood center. Each neighborhood within a TND shall not exceed 80 acres. No TND shall include more than four neighborhoods unless the TND is included within a TTD Refer to Art. 3.F.5, Traditional Town Development (TTD).
   2. Connections
      All uses in a TND shall be connected by sidewalks or pedestrian paths, bicycle paths or bicycle lanes, and vehicular streets. A minimum of 80 percent of all streets shall connect at both ends to other streets at an intersection. All paths or trails, including bicycle paths or lanes, shall interconnect to form a continuous network throughout the TND and to paths or trails linked adjacent neighborhoods. Vehicular gates are prohibited on all streets, except alleys serving residential uses. Vehicular gates are not allowed on alleys serving commercial uses. [Ord. 2006-004]

D. Land Use Zones
   1. Neighborhood Center
      A Neighborhood Center is intended to accommodate neighborhood-oriented non-residential uses and services. It may include professional offices, community facilities, and civic uses to serve the population of the TND and adjacent neighborhoods. Multifamily is encouraged when located above non-residential uses. [Ord. 2012-027] [Ord. 2017-025]
      a. General Standards
         1) Location
            Each Neighborhood Center shall be centrally located in its neighborhood and shall be adjacent to a minimum of one side of a neighborhood square. A non-central location is permitted on an infill site, provided it is within 1320 linear feet of 100 percent of the units in the TND and also can serve the local shopping needs of an adjacent neighborhood.
         2) Maximum and Minimum Site Area
            Each individual Neighborhood Center shall be a minimum 0.5 acre and a maximum of 2.5 acres in size.
         3) Parking
            Parking shall be provided in accordance with Art. 3.F.2.A.2, Parking and Access.
         4) Maximum Floor Area Ratio (FAR)
            1.0, FAR for residential uses counted as density shall not be calculated as square footage subject to the maximum FAR. [Ord. 2012-027]
         5) Maximum building coverage
            50 percent.
         6) Maximum Total Floor Area
            40,000 square feet of GFA, excluding Multifamily units. [Ord. 2012-027] [Ord. 2017-025]
      b. Building Standards
         1) Maximum Floor Area per Tenant
            8,000 square feet.
a) Exception
Up to 30,000 square feet is allowed for a food store. If a TND is developed as part of a TTD, the maximum allowed for a food store in a Neighborhood Center shall be 20,000 square feet.

2) Setbacks
Minimum and maximum building setbacks shall conform to the standards in Table 3.F.3.D, TND Non-Residential Setback Regulations.

<table>
<thead>
<tr>
<th>Regulation</th>
<th>Neighborhood Center and Civic</th>
<th>Open Space/Recreation</th>

<tr>
<td></td>
<td>10 feet – adjacent to residential</td>
<td></td>
</tr>
<tr>
<td>Rear Setback</td>
<td>10 feet minimum</td>
<td>20 feet</td>
</tr>
</tbody>
</table>

3) Multifamily
Multifamily units shall only be permitted subject to the following: [Ord. 2012-027] [Ord. 2017-025]

a) Permitted residential uses are located above non-residential uses; and [Ord. 2012-027]
b) The FAR of residential uses shall not exceed 30 percent of the combined FAR of non-residential and residential uses. The calculation of residential FAR in determining compliance herein does not alter that residential uses are calculated as density, unless otherwise stated within the ULDC. [Ord. 2012-027]

c. Maximum Building Height

d. Building Orientation
Buildings shall front a street. All principal buildings shall have their entrance facing the street or an intersection.

e. Build-to-Lines
A minimum of 50 percent of a commercial building shall have a zero setback. The remaining 50 percent may be set back a maximum of ten feet.

f. Covered Walkways
A minimum of 50 percent of all first floor building frontages shall be constructed as storefronts and be adjacent to a covered sidewalk, with features such as awnings, colonnades, or arcades. Colonnades and arcades shall be a minimum of ten feet in width, including any support column intrusions. All covered walkways shall have a minimum interior height clearance of 12 feet from ground to ceiling.

Figure 3.F.3.D – TND Neighborhood Center Standards
2. Civic
   The civic designation is intended to accommodate publicly and privately-owned institutional land uses intended to serve the neighborhood.
   a. Location
      Civic parcels used for community buildings shall be located adjacent to a neighborhood square or park, or on a lot terminating a street vista.
   b. Public Land Dedication
      Based on the proportional impacts of development on the demand for public services and facilities, a portion of a TND may be required to be conveyed or voluntarily committed in simple fee title to the PBC for civic purposes. These conveyances shall be in a form approved by the County Attorney or in the form of a development agreement.

3. Open Space/Recreation
   Areas designated for open space/recreation include neighborhood parks, neighborhood squares, and active or passive recreation uses.

4. Neighborhood Square
   a. Each neighborhood within a TND shall include a centrally located neighborhood square or “commons.” The square and abutting neighborhood commercial and civic uses should serve as a focal point for the surrounding residential neighborhoods.
      1) Size
         The square shall have a minimum lot size of 20,000 to 140,000 square feet, see Figure 3.F.3.D, TND Neighborhood Park and Square.
      2) Street Access
         A minimum of 75 percent of a square perimeter shall abut a street.
      3) Minimum Pervious Area
         The minimum required area of a neighborhood park that must be pervious surface is:
         a) U/S Tier
            25 percent.
         b) Exurban and Rural Tiers
            50 percent.
   b. Neighborhood Parks
      1) Minimum Area
         A minimum of 25 percent of the open space/recreation area required by Table 3.F.3.B, TND Land Use, must be common open space or park accessible to the public. Each neighborhood park shall have a minimum area of 20,000 square feet.
      2) Location
         Neighborhood parks shall be located within each neighborhood of a TND and shall be distributed so that 100 percent of all dwelling units are located within 1320 linear feet from a park or other recreation area.
      3) Minimum Pervious Area
         The minimum required area of a neighborhood park that must be pervious surface is:
         a) U/S Tier
            50 percent.
         b) Exurban and Rural Tiers
            66 percent.
      4) Pedestrian Access
         A minimum of 50 percent of a neighborhood park perimeter shall abut a street.
      5) Active Recreation Areas
         Common active recreation uses, such as playing fields and swimming pools, shall be buffered by a perimeter landscape area that complies with the Compatibility Buffers in Art. 7, Landscaping. The neighborhood square shall be exempt from this requirement.
         a) Active Recreation Areas in Residential Buildings
            Penthouse and rooftop active and passive recreation shall not be counted towards the minimum open space/recreation area requirement.
      6) Required Amenities
         Neighborhood squares shall include street furniture for outdoor seating and other amenities such as gazebos, fountains, statuary, flag poles, kiosks, and benches. At least one lineal foot of seating area shall be provided for each 100 square feet of park area. Seating area may include wooden benches, seating walls, and retaining walls where the seating area is between 16 inches and 30 inches above grade. [Ord. 2014-031]
5. Residential Uses
   a. Lot Size and Setbacks
      Minimum and maximum lot sizes and building setbacks shall conform to the standards in Table 3.F.3.D, TND Residential Lot Size and Setback Regulations, with exception to Multifamily units located in a Neighborhood Center. [Ord. 2012-027]
   b. Maximum Building Height
      35 feet.
         1) U/S Tier
            One foot of additional height may be allowed for Multifamily residential buildings for each additional foot of front and side setback, or upper story setback, provided beyond the minimum required setback, up to a total building height of 45 feet.
   c. Building Orientation
      Residential buildings shall front a street, neighborhood square, or neighborhood park and be directly accessible from a street.
   d. Accessory Buildings
      Accessory buildings shall not exceed 25 feet in height and may be used as a garage or Accessory Quarters. [Ord. 2017-007]
         1) Calculation of Density
            Accessory Quarters are not considered “dwelling units” for the purposes of calculating the maximum allowable density in a TND. [Ord. 2017-007]
         2) Maximum Number
            Up to one Accessory Quarters unit per principal dwelling unit is permitted. [Ord. 2017-007]
         3) Required Parking
            One additional parking space per Accessory Quarters is required. [Ord. 2017-007]
   e. Garages
      Garages are permitted in the rear half of the lot only. Garages accessible from an alley shall be set back a minimum of five feet from the rear property lot line.
1) **Exception for Single Family or ZLL.**

Garages may be attached to a Single Family house or ZLL if recessed a minimum of 20 feet from the front façade of the house. Attached garages shall occupy a maximum of 30 percent of the total frontage of the house, as determined by the total length between the two main exterior walls nearest to the interior property lines, including the garage but excluding any attached structures, such as a porch, deck or patio. Attached garages may be increased to a maximum of 40 percent of the total frontage of the house, when a porte cochere is connected to the dwelling and located in front of the garage, and the driveway is limited to a maximum of 16 feet in width. [Ord. 2014-031]
f. **Main Entrances**
   All residential structures shall have their main entrance fronting a street or an intersection. Corner entries at street intersections are preferred for Multifamily structures.

g. **Porches**
   All Single Family and ZLL dwellings shall have a front porch, raised a minimum of 18 inches from the finished grade, or from the sidewalk located in the front yard within the R-O-W. [Ord. 2014-031]
   1) **Size**
      Porches shall have a minimum depth of six feet and a minimum width of 12 feet.
   2) **Enclosure**
      Porches shall comply with the definition of TND, porch in Art. 1.H, Definitions and Acronyms.
   3) **Setback Encroachment**
      A porch, and attached porte cochere where applicable, may encroach a maximum of 25 percent into a front or side street setback, provided there is no utility easement overlap. [Ord. 2014-031]

h. **Balconies and Patios**
   A minimum of 20 percent of the total number of dwelling units on each floor in a Multifamily structure shall have individual balconies and/or patios.
   1) **Setback Encroachment**
      A Single Family or ZLL patio may encroach a maximum of 25 percent into a front or side street setback, provided there is no utility easement overlap. A balcony may encroach a maximum of six feet into a front or side street setback, provided there is no utility easement overlap. [Ord. 2014-031]

**Notes:**
1. Multifamily units located in a Neighborhood Center shall be subject to the lot sizes of that Use Zone.

### Section 4  Traditional Marketplace Development (TMD)

**A. Purpose**

The purpose of the TMD district is to: [Ord. 2005-041]

1. Provide a concentrated area for shopping, entertainment, business, services and cultural opportunities by allowing a mix of commercial and institutional uses and establishing physical development and design standards that create pedestrian-oriented development; [Ord. 2005-002]
2. Provide housing opportunities through integrated residential uses; [Ord. 2005-002] [Ord. 2014-031]
3. Promote a mix of uses in a manner that creates a stronger pedestrian orientation through design, placement and organization of buildings, plazas, common public space, and dispersed parking; and [Ord. 2005-002]
4. Ensure traditional marketplaces are compatible with the overall design objectives of the Plan and the MGTS. [Ord. 2005-041]

B. **Purpose of the TMD District in the AGR Tier (AGR-TMD)**
In addition to the above, the purpose of the AGR-TMD is to: [Ord. 2005-041]
1. Promote the preservation of agriculture by providing for compact commercial areas and preserved agricultural land; [Ord. 2005-002]
2. Provide for commercial uses serving AGR residents at accessible locations on major arterials; and [Ord. 2005-002]
3. Encourage design that is compatible with the surrounding agricultural or rural area; [Ord. 2005-002]
4. Implement the conceptual designs that submitted to the BCC on April 6, 2005; and [Ord. 2005-041]
5. Implement the requirements of FLUE Policy 1.5-m, 1.5.1-m, 1.5.1-n, and 2.4-c of the Plan, as amended, and FLUE Policy 1.5.1r, Ag Reserve Design Elements, adopted in 2016. [Ord. 2005-041] [Ord. 2017-002]

C. **Development Standards for all TMDs**
The following standards apply to TMDs located in all Tiers: [Ord. 2005-002]

1. **General Standards**
The following standards apply to all TMDs; however, additional standards or provisions shall apply to the AGR Tier, per Art. 3.F.4.D, Standards Applicable to AGR Tier, and Urban/Suburban Tier, per Art. 3.F.4.E, Urban/Suburban Tier – Lifestyle Commercial Center (LCC). [Ord. 2005-002] [Ord. 2005-041] [Ord. 2017-025]

a. **Thresholds**
A TMD shall comply with Table 3.A.3.D, TDD Corresponding Land Use, and the following: [Ord. 2006-004]
1) **Minimum Site Area**
The minimum gross land area required for a TMD is ten contiguous acres. [Ord. 2005-002] [Ord. 2006-004]
2) **Minimum Total Floor Area**
The following MGTS thresholds shall apply to all non-residential development within a TMD, unless stated otherwise herein: [Ord. 2010-022]
   a) **U/S Tier**
   In the U/S Tier, 200,000 square feet is required, with a minimum of 125,000 square feet in the first phase. [Ord. 2010-022]
   b) **Exurban/Rural Tiers**
   In the Exurban and Rural Tiers, 125,000 square feet is required. Additional development may be phased but shall not exceed a total of 200,000 square feet for the Exurban and Rural Tiers. [Ord. 2010-022]
   (1) **Agricultural Enclave (AGE) Exception**
   The minimum square footage for TMDs within an AGE shall be in accordance with an AGE Site Specific FLUA Conceptual Plan. [Ord. 2010-022]
   c) **AGR Tier**
   See Art. 3.F.4.D, Standards Applicable to AGR Tier, for AGR Standards. [Ord. 2010-022]
   d) **Civic and Institutional Exception**
   Civic and institutional uses are not subject to these floor area limitations. [Ord. 2005-002] [Ord. 2006-004] [Ord. 2010-022]
3) **Minimum FAR**
0.4 in the U/S Tier. [Ord. 2005-002] [Ord. 2006-004]

b. **Permitted Locations**
1) Within the CL designations in Exurban, Rural and AGR Tiers. [Ord. 2005-002]
2) Within the CL/CH designations in the U/S Tier. [Ord. 2005-002]
3) Within an area designated as a TMD Pod within a TTD. [Ord. 2010-022] [Ord. 2014-031]
4) A TMD must have at least 200 feet of frontage along an Arterial or Collector Street. [Ord. 2005-002]

c. **Maximum Floor Area per Single Tenant**
1) **U/S Tier**
Variance from these requirements shall be prohibited. No single tenant may occupy more than 50,000 square feet, except as follows: [Ord. 2017-025]
a) **CL FLU**
   A maximum of 65,000 square feet may be permitted subject to Class A Conditional Use approval. [Ord. 2017-025]

b) **CH FLU**
   A maximum of 100,000 square feet may be permitted subject to Class A Conditional Use approval. [Ord. 2005-002] [Ord. 2017-025]

2) **Exurban/Rural and AGR Tiers**
   No single tenant may occupy more than 25,000 square feet unless approved as a Conditional Use. Single tenants occupying 65,000 square feet or more are prohibited. [Ord. 2005-002] [Ord. 2017-025]

3) **Maximum Ground Floor Area per Establishment**
   No single tenant may occupy more than 40 percent of the total ground floor area of a TMD. [Ord. 2005-002]

4) **Maximum Frontage per Single Tenant**
   No single tenant may occupy more than 200 feet of frontage. An increase of up to 240 feet of frontage per single tenant is permitted in the AGR Tier, provided that any increase over 200 feet incorporates the appearance of a separate storefront on the subject façade, to include the following: a distinct architectural style a minimum of 40 feet in length, a similar percentage of transparency, and an additional building entrance, or appearance of an entrance. [Ord. 2005-002] [Ord. 2005-041]

Figure 3.F.4.C – TMD Maximum Frontage Per Establishment

---

2. **Street Designations and Configurations**
   All streets and alleys in a TMD dedicated to the public or meeting the definition of a private street shall conform to the standards of [Art. 11, Subdivision, Platting, and Required Improvements]. All neighborhood centers and the central plaza of a TMD shall be directly connected by a non-gated street network. [Ord. 2005-002]

   a. **Mainstreet**
      At least two two-way streets forming an intersection shall be designated as Main streets. A minimum of one mainstreet shall cross through the entire length or width of a TMD, unless waived
Main streets designed as an access way or non-residential parking lot may increase the overall width to provide for angled parking, not to exceed a 70-degree angle, as indicated in Figure 3.F.4.C, Typical Example of TMD Commercial Street with Angled Parking. The required width of travel lanes shall be as approved by the County Engineer based upon such factors as anticipated average daily traffic and overlap of back-out maneuvers. Parking stall dimensions shall be in accordance with Table 6.B.3.A, Minimum Parking Dimensions for Non-Residential Uses and Residential Uses with Shared Parking Lots. [Ord. 2005-002] [Ord. 2007-013]
b. Sidewalks
Sidewalks are required on both sides of all streets and shall be designed to be consistent with Figure 3.F.2.A, TDD Commercial Street, except for: alleys; drive aisles between rows of parking or providing access to a surface parking lot; service streets; the side of a street abutting a Preserve Area of an AGR-TMD; and, where one side of a street abuts a surface parking lot or open space. All sidewalks shall conform to the requirements of Art. 3.F.2.A.1, Streets, Sidewalks, and Alleys. [Ord. 2005-002] [Ord. 2005-041]

c. Alley Access
Alley access is not allowed from a Main Street. [Ord. 2005-002]
d. Prohibition of Vehicular Gates
Vehicular gates are not allowed in a TMD. [Ord. 2005-002]

3. Building Form
a. Maximum Building Height
   1) U/S Tier
      a) 45 feet and two stories unless waived through a Type 2 Waiver. A third story is allowed if the top floor is dedicated to residential uses. [Ord. 2005-002] [Ord. 2017-025]
   2) Exurban, Rural, and Agricultural Reserve Tiers
      35 feet and two stories. [Ord. 2005-002]
      a) AGR Tier Exception
         1) A third story is allowed if limited to residential uses where a garage is provided on the ground floor for each residential unit. [Ord. 2005-002]

Figure 3.F.4.C – TMD Building Form U/S Tier
Three-Story Maximum

[Ord. 2005-002]
4. **Frontages and Residential PDRs**

All buildings shall be designated on the Site Plan as either Primary or Secondary Frontage and shall conform to the following requirements: [Ord. 2005-002] [Ord. 2005-041]

**Figure 3.F.4.C – Primary and Secondary Frontage for TMD**
a. Standards for Primary Frontage
   1) A minimum of 60 percent of the length of a Main Street shall be designated as a Primary Frontage. [Ord. 2005-002]

   Figure 3.F.4.C – TMD Frontage Designation and Standards

   * A minimum of 60 percent of the contiguous length of a Main Street shall be designated as a Primary Frontage.

   * Whenever a plaza or square is bounded by buildings, the building frontages shall conform to Standards for a Primary Frontage, including requirements for arcaded walkways and buildings.

   * At least 50 percent of contiguous Primary Frontages shall have arcaded sidewalks. Arcades shall be at least 10 feet in width, including any support column intrusions, and have a minimum height clearance of 12 feet from ground to ceiling. Building floor area is allowed above an arcade.

[Ord. 2005-002]
2) **Continuity and Separations**

   Primary Frontage shall be continuous, except as follows: [Ord. 2005-002]
   a) A central plaza or square may be located at the end of a block. [Ord. 2005-002]
   b) One separation between buildings is allowed for each 120 linear feet of frontage, provided it is located a minimum of 120 feet from the end of a block. [Ord. 2005-002]
      (1) The width of this separation shall not exceed: [Ord. 2005-002]
         (a) 20 feet for pedestrian access to internal parking areas, on-site loading, refuse collection, or recessed building entrances. [Ord. 2005-002]
         (b) 30 feet for outdoor dining areas or pedestrian shade and rest areas. [Ord. 2005-002]
         (c) 60 feet for a mid-block plaza, other than the central plaza. [Ord. 2005-002]

3) **Build-to-Lines**

   All building and structures along a Primary Frontage shall abut the required sidewalk. [Ord. 2005-002]
   (a) **Exception**

      A maximum of ten percent of Primary Frontage structures may be set back a maximum of 20 feet from the build-to-line to provide for outdoor dining areas and/or usable open space, subject to the following: [Ord. 2005-002]
      (1) No more than one area described above shall be permitted at any intersection or at any intersection created by permitted separations; and [Ord. 2005-002]
      (2) The area shall not exceed 40 feet in length, nor be within 40 feet of any other setback area or building separation, except as permitted above. [Ord. 2005-002]

4) **Arcaded Sidewalk**

   At least 50 percent of the Primary Frontages shall have arcaded sidewalks. Arcades shall be a minimum of ten feet in width, including any support column intrusions, and have a minimum height clearance of 12 feet from ground to ceiling. Building floor area is allowed above an arcade. The arcade shall provide for a pedestrian walkway a minimum of eight feet in width with no encumbrances such as support columns, but may be reduced to six feet in width to provide for outdoor dining areas, as illustrated in Figure 3.B.14.G, WCRAO Arcade and Gallery Standards. [Ord. 2005-002] [Ord. 2008-003]

b. **Standards for Secondary Frontage**

   1) **Secondary Frontage**

      A maximum of 40 percent of the length of a Main Street may be designated as Secondary Frontage. [Ord. 2005-002]

   2) **Separations**

      Secondary Frontage may include physical separations between buildings, as follows:
      a) One separation between buildings for each 80 linear feet of frontage, provided it is located a minimum of 80 feet from the end of a block or from the edge of a plaza. [Ord. 2005-002]
      b) The width of this physical separation shall not exceed:
         (1) 20 feet for pedestrian access to internal parking areas or recessed building entrances; [Ord. 2005-002]
         (2) 30 feet for an alley or vehicular access to internal parking, outdoor dining areas, or pedestrian shade and rest areas; or, [Ord. 2005-002]
         (3) 60 feet for a mid-block plaza. [Ord. 2005-002]

   3) **Build-to-Lines**

      All building structures along a Secondary Frontage shall be located within ten feet of the required sidewalk. [Ord. 2005-002]
      (a) **Exception**

         A maximum of ten percent of Secondary Frontage structures may be set back a maximum of 20 feet from the build-to-line to provide for outdoor dining areas and/or usable open space, subject to the following: [Ord. 2005-002]
         (1) No more than one area described above shall be permitted at any intersection or at any intersection created by permitted separations; and [Ord. 2005-002]
         (2) The area shall not exceed 40 feet in length, nor be within 40 feet of any other setback area or building separation, except as permitted above. [Ord. 2005-002]

c. **Standards for Buildings Abutting Perimeter Frontages**

   Exterior façade of buildings that abut Arterial or Collector Streets shall be designed to provide views of building entrances or display windows. [Ord. 2005-002] [Ord. 2010-022]
d. Optional Standards for Residential PDRs
   Residential buildings may use the TND Residential Lot Size and Setback Regulations, or the following: [Ord. 2005-041]

1) Multifamily Alley Frontage Design Alternative
   Multifamily dwellings may be permitted to have frontage from a street built to alley standards, subject to the following: [Ord. 2005-041]
   a) Build-to-Lines and Setbacks
      Setbacks or build-to-lines must be measured from the inside alley edge, or sidewalk if provided. [Ord. 2005-041]
      (1) Front setbacks must be a minimum of five feet, and a maximum of ten feet. Garages fronting the alley shall be set back at least 20 feet. [Ord. 2005-041]
      (2) Side street setbacks must be a minimum of five feet, and a maximum of ten feet. An exception may be made for one side of a block which fronts on open space or a recreation use. [Ord. 2005-041]
      (3) The rear of each unit shall have access to and be within 20 feet of a street, open space, or plaza a minimum of 40 feet in width, with sidewalks that connect to the project’s pedestrian circulation system. [Ord. 2005-041]
   b) Continuity and Separations
      One separation between buildings is allowed for each 80 feet of frontage, provided it is located a minimum of 80 feet from the end of a block. The width of this separation shall not exceed 25 feet for pedestrian access, or 40 feet for a mid-block plaza. One mid-block plaza may be permitted to have a separation of up to 120 feet in the AGR Tier only. [Ord. 2005-041]

5. Pedestrian Circulation
   In addition to the sidewalk requirements of Art. 3.F.2.A.1, Streets, Sidewalks, and Alleys, all internal sidewalks shall provide a minimum clear width of six feet. [Ord. 2005-002]

6. Foundation Planting
   Notwithstanding the requirements of Art. 7.C.3.B, Foundation Plantings, foundation plantings shall not be required for primary and secondary building frontages, buildings along an alley or access way to a parking area, where the alley or access way is located in between non-residential buildings, or where buildings front on a plaza or square. [Ord. 2005-002] [Ord. 2005-041]

7. Parking
   On-street parking is required on both sides of all two-way streets and on at least one side of one-way streets, except within 25 feet of a street intersection or alley, or ten feet of a fire hydrant, or along Arterials, Planned Collector Streets, alleys, or a vehicular access way to internal parking. [Ord. 2005-002] [Ord. 2005-041]

8. Plazas
   Plazas are required to provide a focal point for pedestrians, and must meet the minimum standards of Table 3.F.4.C, Minimum Dimensions for Required Plazas, and the following: [Ord. 2005-002] [Ord. 2005-041]

<table>
<thead>
<tr>
<th>Table 3.F.4.C – Minimum Dimensions for Required Plazas</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Min. Size</strong></td>
</tr>
<tr>
<td>Central Plaza</td>
</tr>
<tr>
<td>Other Plazas</td>
</tr>
</tbody>
</table>

a. Minimum Total Area
   20,000 square feet or five percent of the gross Development Area within a TMD, whichever is greater, shall be used for public plazas or squares. [Ord. 2005-002]

b. Required Location
   The central plaza shall front on a Main Street; other plazas shall be bounded by a street on at least one side. [Ord. 2005-002] [Ord. 2005-041]

c. Required Landscaping and Pedestrian Amenities
   1) A minimum of 15 percent of each plaza shall be shaded by landscaping or shade structures, at time of installation. Landscaping shall provide a minimum of 50 percent of required shade. [Ord. 2005-002] [Ord. 2005-041]
   2) A minimum of 40 percent of the overall plaza areas shall be pervious. [Ord. 2005-002] [Ord. 2005-041]
3) Each plaza must provide a minimum of one linear foot of seating for each 200 square feet of overall area. [Ord. 2005-002] [Ord. 2005-041]

d. Corner and Mid-Block Plaza Abutting Buildings
Wherever a plaza is bounded by buildings, the building frontages must conform to the standards for a Primary Frontage, including requirements for arcaded walkways and building see Art. 3.F.4.C.4, Frontages and Residential PDRs. [Ord. 2005-002] [Ord. 2005-041]

Figure 3.F.4.C – TMD Plazas and Squares

9. Building Design
   a. Transparency
All commercial first story façades shall consist of transparent glass that provides views into a commercial use or window display. Calculation of transparency shall be pursuant to Art. 1.C.4.L, Building Transparency. [Ord. 2005-002] [Ord. 2010-022]

Figure 3.F.4.C – TMD Building Design Standards
1) **Percentage**
   a) Primary Frontage – 60 percent. [Ord. 2010-022]
   b) Secondary Frontage – 50 percent. [Ord. 2010-022]

2) **Exemption**
   Indoor movie or any type of theater shall be exempt from the Secondary and Perimeter
   Frontage transparency requirements. The minimum transparency requirement may be reduced
   by up to 75 percent for medical offices and other similar uses that require privacy as determined
   by the Zoning Director, subject to the following: [Ord. 2010-022] [Ord. 2014-031]
   (a) Documentation that there is no interior layout options to maximize use of lobby, reception
   or other similar areas to attain required transparency; and, [Ord. 2014-031]
   (b) Use of architectural embellishment that provide the appearance of glazing commensurate
   with the reduction in required transparency. [Ord. 2010-022] [Ord. 2014-0313]

b. **Balconies**
   Balconies may project beyond build-to-lines, subject to the following standards: [Ord. 2005-002]
   1) **Maximum Projection**
      Three feet. [Ord. 2005-002]
   2) **Maximum Size**
      24 square feet. [Ord. 2005-002]

10. **Phasing**
   a. **Phasing**
      TMDs shall be subject to the phasing and time limitations in Art. 3.F.1.H, Phasing and Platting, as
      well as Art. 2.E, Monitoring of Development Orders (DOs) and Conditions of Approval. [Ord. 2005-
      002]
   b. **First Phase**
      The following elements shall be constructed before the issuance of the first CO: [Ord. 2005-002]
      1) All plazas and squares located on required mainstreets, including required landscaping; [Ord.
         2005-002]
      2) 50 percent of required primary frontage buildings located on required main streets. [Ord. 2005-
         002]
      3) All main streets, including all sidewalks, landscaping and lighting required to service the above.
         [Ord. 2005-002]

D. **Standards Applicable to AGR Tier**
   1. Minimum Site Area
      25 acres, including Preserve Area. [Ord. 2005-002]
   2. Maximum Development Area
      40 percent of gross acreage. [Ord. 2005-002]
   3. Minimum Retail and Commercial Floor Area
      175,000 sq. ft. of commercial/civic uses (inclusive of work/live space). Of these, 125,000 square feet
      shall be retail and office space. [Ord. 2005-002]
   4. Maximum Retail and Commercial Floor Area
      375,000 square feet. [Ord. 2005-002]
   5. Maximum Floor Area Ratio FAR
      1.0. [Ord. 2005-002]
   6. Maximum Residential Density
      One dwelling unit per acre. Residential density shall be transferred from the Preserve Area to the
      Development Area at a ratio of one-to-one. [Ord. 2005-002]
   7. Permitted Locations
      A TMD shall only be located within 1,320 feet of the intersections of Lyons Road and Boynton Beach
      Boulevard and Lyons Road and Atlantic Avenue, on a site with a CL FLU designation. A maximum of
      one TMD is allowed at each of these intersections. [Ord. 2005-002]
   8. Preserve Area and Open Space Requirements
      A TMD shall conform to Objective 1, Art. 1.E, Prior Approvals, and the following additional requirements:
      [Ord. 2005-002]
      a. Minimum Preserve Area
         A minimum of 60 percent of the gross acreage, less roadways identified on the Thoroughfare
         Identification Map, shall be designated as Preserve Area. Rural Parkway easements may be
         counted toward the preserve requirement. [Ord. 2005-002]
b. Location
The Preserve Area shall be contiguous with the TMD, or noncontiguous provided it has a common border with other land that is at least 150 acres and: [Ord. 2005-002]
1) In a Conservation district; [Ord. 2005-002]
2) Designated as an AGR preserve; or, [Ord. 2005-002]
3) Has had development rights removed and is permanently restricted to usable open space or agricultural uses through a conservation easement or other legal instrument approved by the County Attorney’s Office. [Ord. 2005-002]

c. Preserve Areas
An AGR Preserve Area shall comply with the requirements of Art. 3.E.2.F.3, Preserve Area; and Art. 4, Use Regulations; all other development regulations that are applicable to the AGR Tier and proposed use(s); and policies under Objective 1.5 of the FLUE of the Plan. Nothing herein shall be misconstrued as requiring a Preserve Area to conform to Art. 3.F.4.C, Development Standards for all TMDs. [Ord. 2005-002] [Ord. 2006-004] [Ord. 2007-013] [Ord. 2017-007]

9. Block Structure
a. Type 2 Waiver
An AGR TMD shall comply with Art. 3.F.2.A.1.b, Block Structure, except for the provision below, unless waived through a Type 2 Waiver by the BCC upon the BCC determining that the block structure proposed is functionally equivalent for the purpose of Art. 3.F.1.A.4, and Art. 3.F.4.A Purpose. The Type 2 Waiver may be granted only upon the Applicant’s agreement to be bound by the block configuration of the Site Plan approved by the BCC. [Ord. 2005-002] [Ord. 2005-041] [Ord. 2012-027]

b. AGR TMD Free Standing Structures
A maximum of ten percent of the overall allowable square footage of an AGR TMD may be permitted to be developed as free standing structures, provided that a minimum of one façade is developed according to the standards for primary or secondary frontage. Buildings developed under this provision shall not be required to have circulation on all four sides, nor be subject to continuity and separation requirements. [Ord. 2005-002]

10. Definition for Street
Streets for TMD may also include access aisles in a parking lot for commercial blocks, only when located along the side or ear of a block; non-residential alleys; and, alleys in residential blocks, subject to the standards or Art. 3.F.4.C.4.d.1), Multifamily Alley Frontage Design Alternative. [Ord. 2005-041]

11. Agriculture Reserve Design Elements
Shall comply with FLUE Policy 1.5.1-r, Ag Reserve Design Elements. [Ord. 2017-002]

E. Urban/Suburban Tier – Lifestyle Commercial Center (LCC)
1. Applicable to existing sites assigned a commercial FLU designation and Condition of Approval requiring the use of the LCC within the boundaries of two Site Specific FLUA amendments: [Ord. 2017-025]
2. Unless stated otherwise, TMD provisions shall apply to all Site Specific FLUA noted above. [Ord. 2017-025]
Section 5  Traditional Town Development (TTD)

A. Specific Purpose
The purpose of the TTD district is to:
1. Provide a framework for the coordinated development of compact, walkable neighborhoods with a well-developed traditional marketplace center and a mixture of office, open space and recreation, and civic uses serving local residents;
2. Ensure an interconnected street and pedestrian circulation network that serves the needs of pedestrian, vehicles, and other non-motorized forms of transportation and that functionally and physically integrates the various land use activities;
3. Provide for larger-scale community development that retains a strong neighborhood identity through a compatible scale of development, an identifiable center and edge, and well-defined public spaces for recreation and civic activities;
4. Accommodate optional development districts to provide additional employment opportunities and housing choices interconnected with traditional neighborhoods and within close proximity to the commercial, civic, and recreation and open space amenities of the traditional town; and
5. Make traditional towns compatible with the overall design objectives of the Plan and its MGTS.

B. Organization and Applicability
The requirements of this Section, Art. 3.F.1, General Provisions for TDDs, and Art. 3.F.2, General Standards, shall apply to all TTDs. In addition, the components of a TTD shall be subject to the following requirements:
1. Traditional Neighborhood Development (TND)
The requirements of Art. 3.F.3, Traditional Neighborhood Development (TND) shall apply to Residential Pods in a TTD.
2. Traditional Marketplace Development (TMD)
The requirements of Art. 3.F.4, Traditional Marketplace Development (TMD) shall apply to Commercial Pods in a TTD.
3. Residential Planned Unit Development (PUD)
A residential Planned Unit Development (PUD) may be included within a TTD, subject to the requirements of Art. 3.E.2, Planned Unit Development (PUD) district.
4. Multiple Use Planned Development (MUPD)
An MUPD may be included within a TTD with a minimum of 320 acres, subject to the requirements for a Multiple Use Planned Development (MUPD) with an EDC FLU designation [Ord. 2014-025]

C. General Requirements
1. Thresholds
   The minimum gross land area required for a TTD is 200 contiguous acres. [Ord. 2006-004]
2. Land Use Mix
   TTDs shall consist of a balanced mix of land uses subject to the minimum land use allocations in Table 3.F.5.C, Traditional Town Development Land Use Allocations.

<table>
<thead>
<tr>
<th>Allowable Gross Acreage (Percent of Total)</th>

Notes:
1. Regional-serving civic and institutional uses may be located outside a TND but may not be used to fulfill the civic/institutional requirements of a TND as established by Table 3.F.3.B, TND Land Use.
2. Requires a TTD with a minimum of 320 acres.

3. Connectivity
   An interconnected network of streets, and sidewalks or pathways shall be provided that connects all pods within the TTD and to any adjacent thoroughfare roads.
4. Landscape Buffer
   A minimum 50-foot-wide Type 3 Incompatibility Buffer shall be provided around the perimeter of a TTD.
APPENDIX 1 – LEGAL DESCRIPTION WATER OR WASTEWATER TREATMENT PLANT NO. 3
To Accompany Sketch of Turnpike Aquifer Protection Overlay District
Those tracts of land lying in Sections 27 and 28, Township 45 South, Range 42 East, PBC, Florida, being more particularly described as follows:
The Southeast quarter of Section 28 and the Southwest quarter of Section 27.

[Ord. 2005-002]
APPENDIX 2 – LEGAL DESCRIPTION WATER OR WASTEWATER TREATMENT PLANT NO. 8
To Accompany Sketch of Turnpike Aquifer Protection Overlay District
Those tracts lying in Sections 27, 33, and 34, Township 43 South, Range 42 East, PBC, Florida, being more particularly described as follows:
The part of the West half of Section 27 laying east of Florida’s Turnpike;
The part of the Southeast quarter of Section 28 laying east of Florida’s Turnpike; [Ord. 2005-002]
The North half of Section 34 less the Northeast quarter of the Northeast quarter section;
The East half of the Southeast quarter of Section 34; and,
The part of the East half of the Northeast quarter of Section 33 laying east of Florida’s Turnpike.
APPENDIX 3 – TRADITIONAL DEVELOPMENT PROTOTYPES EXAMPLE OF LAYOUT
MARKETPLACE, NEIGHBORHOODS, AND STREET NETWORK

Traditional Town Development (Sec X.5)
APPENDIX 4 – TRADITIONAL NEIGHBORHOODS
EXAMPLE OF RESIDENTIAL DEVELOPMENTS

- Multi-Family
  - Open space or parking
  - Access to parking from alley
  - Two to three story Multi-Family buildings with parking garages or structured parking facing an alley

- Zero Lot Line
  - Access to parking from alley or streets
  - Zero Lot Line homes with garage along back alley

- Town House
  - Access to parking from alley
  - Two story town houses with parking along back alleys

- Single-Family
  - Single-family detached houses with garage at side or rear

ARTICLE 4

USE REGULATIONS

CHAPTER A USER GUIDE AND GENERAL PROVISIONS

Section 1 Overview

In order to ensure that all development in unincorporated PBC is consistent with the Comprehensive Plan, it is necessary to define uses and identify where such uses are allowed. This Chapter establishes the general provisions that address regrouping of uses by classification, approval process, and any requirements specific to a use. It also serves as a guide to assist users in determining the uses that are allowed in the various zoning districts. The Zoning Director shall maintain and publish a User Guide to assist the public with applicability of this Article.

Section 2 Variance Relief Prohibited

Variance relief from any of the requirements of this Article shall be prohibited unless expressly stated otherwise herein.

Section 3 Zoning and Future Land Use Consistency

Before utilizing this Article to confirm if a use is allowed, it must be determined that the zoning district designation of the subject site is consistent with its Future Land Use (FLU) designation. This can be accomplished by referencing the site’s FLU designation from the PBC Future Land Use Atlas (FLUA), and checking Art. 3.A.3, Zoning District Consistency with the Future Land Use Atlas (FLUA). If the zoning district is inconsistent with the FLU designation, a rezoning may be required to allow for a proposed use subject to the requirements specific to the use and other applicable project development regulations. Depending on the size and location of the site, there may be multiple options for rezoning, which may include Standard Zoning Districts, PDDs, or TDDs. Once consistency has been confirmed or if it’s determined that rezoning may be required, the appropriate zoning district or zoning districts can then be referenced to determine potential uses and applicable approval process.

A. If the zoning district is consistent with the FLU designation, then a rezoning is not required. The Applicant shall reference Use Matrices to see whether the proposed use is allowed in that zoning district and subject to what type of approval process.

B. If the zoning district is not consistent with FLU, then a rezoning is required. The Applicant shall select the most appropriate zoning district, and reference Use Matrices to identify whether the proposed use is allowed in the proposed zoning district and subject to what type of approval process.

Section 4 Overlays

The Applicant shall confirm whether the site is located in an Overlay Zone pursuant to Art. 3.B, Overlays, or as shown on the Official Zoning Map. If a site is located within an Overlay, then additional requirements and limitations may apply to those uses additional to the regulations under the Supplementary Use Standards.

Section 5 Airport Zones

Uses in Airport Zones may be further restricted or subject to special regulations as specified in Art. 16, Airport Regulations.

Section 6 Specific Regulations for Standard Zoning Districts

Special regulations apply within certain zoning districts as specified under Art. 3.D.3, District Specific Regulations.
Section 7  Determining Approval Process

Uses not specifically listed in the Use Matrices of this Chapter, but consistent with the definition of a listed use, may be considered by the Executive Director of PZB pursuant to Art. 1.B, Interpretation of the Code. All uses shall comply with all requirements of the ULDC unless expressly exempted otherwise.

A. Organization
Uses are arranged within this Chapter by Use Classification, each of which includes: a Use Matrix, General Standards, and Definitions and Supplementary Use Standards for Specific Uses. Uses listed under each Use Classification are organized alphabetically, with a corresponding number that allows for easy reference between the Use Matrix, and Definitions and Supplementary Use Standards.

B. Use Classification
Uses are grouped into 11 classifications generally based on common functional characteristics or land use compatibility, as follows:
1. Residential,
2. Commercial,
3. Recreation,
4. Institutional, Public, and Civic,
5. Industrial,
6. Agricultural,
7. Utility,
8. Transportation,
9. Commercial Communication Towers,
10. Excavation, and,
11. Temporary.

C. Use Matrix
Each Use Matrix identifies all zoning districts, uses, and approval process, except as indicated otherwise. The Use Matrix indicates the approval process for each Use Type in Standard Zoning Districts, PDDs, TDDs, URAO, and IRO. A number in the column under the “Supplementary Use Standard” of the Use Matrix refers to the Definition and Supplementary Use Standards applicable to each use. [Ord. 2018-002] [Ord. 2019-005]

1. Permitted by Right
Uses identified with a “P” are allowed in the zoning district, subject to the Supplementary Use Standards and the other applicable requirements of this Code. Uses in this category that do not require a Building Permit or Zoning Division site plan approval are still required to comply with all applicable requirements of the ULDC.

2. Development Review Officer (DRO)
Uses identified with a “D” or exceeding the thresholds of Table 4.A.9.A, Thresholds for Projects Requiring DRO Approval, are allowed subject to approval by the DRO in accordance with Art. 2.C, Administrative Processes. [Ord. 2019-005]

3. Class B Conditional Use
Uses identified with a “B” are allowed in the zoning districts only if approved by the ZC in accordance with Art. 2.B, Public Hearing Processes. [Ord. 2019-005]

4. Class A Conditional Use
Uses identified with an “A” are allowed in the zoning districts with a recommendation by the Zoning Commission, and approved by the BCC in accordance with Art. 2.B, Public Hearing Processes. [Ord. 2019-005]

5. Temporary Use
Uses identified in Table 4.B.11.A, Temporary Use Matrix with a “D” are allowed in the zoning districts with an approval by the Development Review Officer subject to the Zoning Agency Review process. Temporary uses are not permanent in nature; not intended to be permanently fixed at a location; and, are typically approved for a defined period of time. [Ord. 2017-007] [Ord. 2019-005]

6. Prohibited Use
Uses identified with a dash “-,” in a zoning districts column of the Use Matrix, are prohibited in that zoning district, unless otherwise expressly stated under the Supplementary Use Standards for the use, or within any applicable Zoning Overlays.
D. General Standards
Where applicable, each Use Classification may have a listing of General Standards that apply to all uses in that Use Classification.

E. Definitions and Supplementary Use Standards for Specific Uses
The definition for each use permitted is listed. Where applicable, additional Supplementary Use Standards may apply. In the case of a conflict with other regulations in this Code, the more restrictive requirement shall apply, unless otherwise stated.

Section 8 Use Functions
Uses may be identified as principal or accessory. A site may be developed with a single use or collocated with multiple principal uses. Functionality of uses are as follows:

A. Principal
As defined in Art. 1, General Provisions, a principal use is “the primary and major purpose for which land or building is used as allowed by the applicable zoning district.” Only those uses listed in this Chapter within the Use Matrices may be considered a principal use. A site may have more than one principal use.

B. Collocated
Certain principal uses that are not normally permitted within a zoning district by the Use Matrices may be allowed as a collocated use if expressly stated under the Supplementary Use Standards and compliance with all of the Supplemental Use Standards applicable to the use.

C. Accessory
As defined by Art. 1, General Provisions, “a permitted use that is customarily associated with the principal use and clearly incidental to the principal use, and is subordinate in area, extent, or purpose to and serves only the principal use.” Uses not allowed in a zoning district shall not be accessory to a principal use unless stated otherwise in the Supplementary Use Standards of the use intended to be accessory. Additional accessory use limitations and requirements are contained in Art. 5.B, Accessory Uses and Structures.

D. Flex Space
This option allows for limited office or retail opportunities where otherwise prohibited in industrial zoning districts, or inversely allows for a limited type of industrial uses in the commercial zoning districts that are consistent with the CH FLU designation. Flex space is only permitted when approved in accordance with Art. 5.B.1.D, Flex Space. [Ord. 2019-005]

Section 9 Development Thresholds

A. Development Review Officer
Any amendment to an existing development, or new construction of projects that meets or exceeds either the maximum square footage or number of units, shall require DRO Site Plan approval.

Notes:

1. Approval of a Subdivision Plan is required for all subdivision of land for which a plat or plat waiver has not been granted pursuant to Art. 11, Subdivision, Platting, and Required Improvements or which exceeds the threshold above.
2. Projects exceeding the thresholds above shall comply with Art. 5.C, Design Standards.
3. DROs with a Final Master Plan shall receive approval of a Final Site Plan or Subdivision Plan by the DRO pursuant to Art. 2.C, Administrative Processes. [Ord. 2020-020]
B. Public Hearing Approval

Any amendment to an existing development, or new construction of residential, commercial, or industrial projects that meets or exceeds either the maximum square footage or units, or maximum acreage of Table 4.A.9.B, Thresholds for Projects Requiring Board of County Commission Approval, shall be reviewed and approved as a PDD or TDD in accordance with Art. 2.B.7.B, Conditional Uses and Official Zoning Map Amendment (Rezoning) to a PDD or TDD. Projects that meet or exceed the thresholds of this Table that do not meet the access and dimension requirements of a PDD or TDD; are not allowed to be a PDD or TDD by the Plan; or for non-residential projects, consist of only one use, shall be approved as a Class A Conditional Use.

1. Exemptions

The following projects shall be exempt from this requirement:

a. Projects located in the PO Zoning District or that propose to rezone to the PO Zoning District, that support existing or proposed government facilities; and

b. Infill Redevelopment Overlay projects approved by the DRO.

Notes:

1. Land area devoted to retention pursuant to the requirements of the C-51 drainage basin, or land area devoted to vegetation preservation pursuant to the Environmentally Sensitive Lands Ordinance, excluding AGR or Sector Plan Preserve Areas, shall not be counted toward the maximum acreage threshold.

2. PDDs or TDDs in the AGR Tier are limited to the 80/20 PUD, 60/40 PUD, or AGR-TMD (FLUE Policy 1.5.1-a).

3. There are no thresholds for the UC or UI FLU designations.

4. Dwelling units shall include any density awarded as part of a density bonus program.

C. Density Bonus

Any amendment to an existing development, or new construction of projects, which includes an existing or proposed WHP, AHP, or TDR residential density bonus, shall require confirmation of any applicable thresholds for approval process in accordance with Art. 5.G, Density Bonus Programs. [Ord. 2017-025]

D. Agriculture Reserve Design Elements

The Development Area shall comply with FLUE Policy 1.5.1-r, Ag Reserve Design Elements.

In the case of a conflict with other regulations in this Code, the more restrictive requirement shall apply, unless otherwise stated.
### CHAPTER B  USE CLASSIFICATION

#### Section 1  Residential Uses

**A. Residential Use Matrix**

#### Use Approval Process Key:

- P Permitted by Right
- D Subject to DRO Approval
- Subject to BCC Approval (Class A Conditional Use)
- B Subject to Zoning Commission Approval (Class B Conditional Use)
- - Prohibited Use, unless stated otherwise within Supplementary Use Standards

1. Supplementary Use Standards for each use must be reviewed regardless of the approval process set forth in the Use Matrix. Refer to the numbers in the Supplementary Use Standards column.

2. The only residential use allowed in the RM or the PUD Districts, that has a CLR FLU designation, is a Type 3 Congregate Living Facility (CLF). [Ord. 2019-005]

3. Residential uses within an MUPD may only be permitted when density is available through an underlying Residential or Agricultural Reserve Future Land Use designation. [Ord. 2019-005]
B. General Residential Standards

1. Accessory Affordable Housing
   Multifamily, Single Family, Townhouse, or Zero Lot Line Home may be allowed in the IPF Zoning District as Affordable Housing in the same development of institutional, public, and civic uses such as Place of Worship. The dwelling units shall not be for sale and shall be subject to DRO approval. As part of the submittal requirement, the Applicant shall demonstrate that residential development will be under the direct supervision of a sponsoring non-profit organization or community-based group.

C. Definitions and Supplementary Use Standards for Specific Uses

1. Congregate Living Facility (CLF)
   a. Definition
      A facility which provides long-term care, housing, food service, and one or more assistive care services for persons not related to the owner or administrator by blood or marriage.
   b. Licensing
      Type 1 and 2 CLFs shall be licensed by one of the licensing entities referenced in F.S. § 419.001.
   c. Approval Process
      1) RS Zoning District
         A Type 3 CLF may be allowed in the RS Zoning District with an MR-5, HR-8, HR-12, or HR-18 FLU designation subject to a Class A Conditional Use approval. A Type 3 CLF in the RS Zoning District with an LR-1, LR-2, and LR-3 shall be prohibited. [Ord. 2019-005]
   d. Maximum Occupancy
      1) Type 1 CLF
         Six persons, excluding staff.
      2) Type 2 CLF
         14 persons, excluding staff.
      3) Type 3 CLF
         The maximum occupancy shall be determined by FLUE Table 2.2.1-g.1 of the Plan and multiplying the maximum allowable density by 2.39. A dwelling unit is equivalent to 2.39 residents/beds. [Ord. 2019-005]
   e. Separation
      The separation requirements in this Section shall be measured from the nearest point of the existing CLF structure to the nearest point of the proposed CLF structure.
      1) Type 1 CLF
         A Type 1 CLF, shall not be located within a radius of 1,000 feet of another Type 1 CLF regulated by F.S. § 419.001 and within a radius of 1,200 feet of a Type 2 CLF.
      2) Type 2 CLF – RM Zoning District
         A Type 2 CLF located in the RM Zoning District shall not be located within a radius of 1,200 feet of another CLF.
   f. Location
      A Type 3 CLF shall have frontage and access from a Collector or an Arterial Street, except for the following:
      1) A Type 3 CLF having 25 residents or less may have frontage and access from a Local Street.
      2) A Type 3 CLF having 250 or fewer residents may be located in a Multifamily, Commercial, or Civic Pod with access to a Local Street or a parking tract in a PDD.
   g. Lot Size
      1) The minimum lot dimension for a Type 2 or Type 3 CLF shall be 8,000 square feet or the zoning district minimum lot requirement, whichever is greater.
      2) The required minimum acreage for a PDD may be reduced by 50 percent if it consists exclusively of a CLF.
   h. Type 2 or Type 3 CLFs – Fire-Rescue Station
      A Type 2 or Type 3 CLF shall be located within five miles of a full-service fire-rescue station.
   i. Drop-off Area, for Type 2 and Type 3, CLFs
      A drop-off area shall be provided for group transportation, such as vans or similar vehicles.
   j. Accessory Commercial Uses
      A limited amount of commercial uses may be Permitted by Right as accessory uses in a Type 3 CLF. Such uses shall be limited to Retail Sales and Personal Services uses designed exclusively to serve the residents of the facility, such as a barber or beauty shop, convenience retail sales, and banking services. No more than ten percent of the GFA of the facility shall be used for accessory
commercial uses. There shall be no exterior signage or other indication of the existence of these uses in the facility that may attract nonresidents.

k. Signage
Signage for a Type 1 or Type 2 CLF shall be limited to one freestanding sign no more than four square feet in sign face area and six feet in height.

l. Congregate Living, Assistive Care Services
Assistance with activities of daily living and limited nursing services.

m. Emergency Generators
A permanent emergency generator shall be required for all Type 2 and Type 3 CLFs, and shall meet the standards of Art. 5.B.1.A.19, Permanent Generators.

n. Cooking Facilities
A CLF shall provide and continuously maintain a central dining facility. Food preparation shall be prohibited in sleeping areas or in individual quarters in Types 1 and 2 CLFs. Individual kitchen facilities may be provided in the living quarters of a Type 3 CLF.

2. Cottage Home
a. Definition for Cottage Homes
The use of a lot or a structure for one detached dwelling unit with reduced property development regulations. [Ord. 2018-018] [Ord. 2019-034]

b. Cottage Home Size
A maximum of 1,000 square feet per unit.

c. Cottage Homes in RS Zoning District
May be allowed in the RS Zoning District with an MR-5 or higher FLU designation, subject to Full DRO approval. [Ord. 2019-034]

d. Cottage Homes in MF Pod or Lot
If Cottage Homes are developed in an MF Pod or Lot, they shall be developed in a cluster with open space that is commonly shared by the individual tenants or owners, subject to the following: [Ord. 2019-034]
  1) Rear Garage
     May have garage and driveways located in the rear of each unit. [Ord. 2019-034]
  2) Open Space
     The units shall front on a commonly owned open space with a minimum width of 75 feet, measuring from the front façade of each unit or front porch, whichever is applicable. [Ord. 2019-034]

3. Mobile Home Dwelling
a. Definition
The use of a residential lot or unit for one mobile home.

b. Principal Use
Only Mobile Home Dwellings located within the MHPD Zoning District, or within an existing approved mobile home park, shall be treated as a principal use.

c. Accessory Use – Bona Fide Agriculture
One mobile home structure may be allowed accessory to a principal Bona Fide Agriculture use.

  1) Lot Size
     a) AR (USA) and AGR Districts
        A minimum of five acres.
     b) RR-2.5, RR-5, RR-10, and AP FLU Designation
        A minimum of ten acres.
     c) RR-20 FLU Designation
        A minimum of 20 acres.
  2) Setbacks
     A minimum of 200 feet from a public street; 100 feet from all other property lines
  3) Mobile Home Removal Agreement
     A removal agreement shall be executed and notarized between the Building Division and Property Owner and recorded on the property in the official records of the PBC Clerk prior to issuance of any Building Permit. The agreement shall be recorded against the property stating that the mobile home shall be removed within 30 days in the event the property is sold or the Bona Fide Agriculture operation ceases to exist.
4. Multifamily
   a. Definition
      The use of a structure designed for two or more dwelling units which are attached or the use of a
      lot for two or more dwelling units.
   b. Typical Uses
      Typical uses include apartments and residential condominiums.
   c. Overlay – WCRAO
      Multifamily is prohibited in the NR Sub-area per Table 3.B.14.E, WCRAO Sub-area Use
      Regulations.
   d. Zoning District
      1) TMD District
         AGR-TMDs shall be exempt from the integration requirement and shall comply with the
         Development Order approved by the BCC.
      2) RM District
         Multifamily units may be allowed in the RM Zoning District as follows: [Ord. 2017-025]
         a) MR-5 FLU Designation
            1) Planning Determination
               A written determination from the Planning Director that the property meets the criteria
               for an Infill Density Exemption in the Plan; and
            2) Existing RM Zoning
               The property was zoned RM prior to the 1989 adoption of the Plan.
            3) Approval Process
               The approval process shall be as follows:

               | Class A Conditional Use | Class B Conditional Use | DRO | Permitted by Right |
               |------------------------|------------------------|-----|------------------|
               | > 24                   | 9-24                   | 5-8 | 1-4              |

      4) Development Order
         Prior approvals for Multifamily units in the RM Zoning District with MR-5 FLU
designation shall be considered legal conforming uses.
   b) HR-8, HR-12, or HR-18 FLU Designation
      Multifamily units on parcels with an HR-8, HR-12, or HR-18 FLU designation, may be
      Permitted by Right unless Development Thresholds in Art. 4.A.9 are triggered. [Ord. 2017-
      025]
   c) Limestone Creek
      Multifamily units in the RM Zoning District shall be prohibited in the area bounded on
      the north by 184th Place North, on the south by the C-18 Canal, on the east by Central
      Boulevard and the municipal limits of the Town of Jupiter, and on the west by Narcissus
      Avenue (north of Church Street) and Limestone Creek Road (south of Church Street).

5. Single Family
   a. Definition
      The use of a lot or a structure for one detached dwelling unit.

6. Townhouse
   a. Definition
      A dwelling unit located on an individual lot and attached by at least one but no more than two party
      wall(s) along 50 percent of the maximum depth of the unit, to one or more dwelling units; has a
      continuous foundation; each on its own lot, with said party wall(s) being centered on the common
      property line(s) between adjacent lots.
   b. Approval Process – RS Zoning District
      Townhouses shall only be allowed in the RS Zoning District on parcels with LR-2 or higher FLU
designation. Townhouses on parcels with an HR-8, HR-12, or HR-18 FLU designation, may be
      allowed subject to DRO approval.
7. Zero Lot Line Home (ZLL)
   a. Definition
   The use of a lot for one detached dwelling unit with at least one wall, but not more than two walls
   or a portion thereof, located directly adjacent to a side lot line.
   b. Approval Process – RS Zoning District
   A ZLL Home shall only be allowed in the RS Zoning District with LR-2 or higher FLU designation.
   ZLL Homes on parcels with an HR-8, HR-12, or HR-18 FLU designation, may be allowed subject
   to DRO approval.

D. General Standards for Accessory Uses
Accessory uses shall comply with the specific Supplementary Use Standards contained in this Section.

1. Corresponding Accessory Use to a Principal Use
Accessory uses identified in Table 4.B.1.D, Corresponding Accessory Use to a Principal Use, shall be:
   a) Permitted by Right unless stated otherwise; and
   b) Allowed to the corresponding principal use in the Table.

Notes:
- Accessory use not allowed.
- P Permitted by Right.
- A Accessory use subject to Class A Conditional Use unless stated otherwise—See principal use and accessory use supplementary standards.
1. Farm Residence may only be accessory to Bona Fide Agriculture in the AGR and AP Zoning District.
2. Accessory uses to Single Family are Permitted by Right to a Farm Residence.
3. Limited Pet Boarding shall be allowed in the AGR and AR/RSA and AR/USA Zoning Districts only.

2. Property Development Regulations (PDRs)
Accessory residential uses shall be subject to the PDRs of the zoning district in which the use is located
unless stated otherwise.

3. Ownership
Accessory residential uses shall remain under the same ownership of the principal use and shall not
be subdivided or sold as a condominium.

4. Duplicate Use
Provided all other applicable standards in the Code are met, a principal use shall be allowed to have
no more than one of each of the accessory uses listed in Table 4.B.1.D, Corresponding Accessory Use
to a Principal Use, unless stated otherwise.

5. Discontinuation of Use
An accessory use shall continue only as long as the principal use that it serves remains active.
E. Accessory Residential Use Standards

1. Accessory Quarters
   a. Definition
      A complete, separate living facility equipped with a kitchen and provisions for sanitation and
      sleeping, located on the same lot as the owner occupied principal dwelling.
   b. Building Area
      The use shall be subject to the following:
      1) On less than one acre: a maximum of 800 square feet.
      2) On one acre or more: a maximum of 1,000 square feet.
      3) The floor area calculation shall include only the living area of the Accessory Quarters under a
         solid roof.
      4) Additional floor area under a solid roof that is utilized as a porch, patio, porte-cochere, carport,
         or garage shall not exceed 500 square feet.
   c. Compatibility
      The Accessory Quarters shall be architecturally compatible in character and materials with the
      principal dwelling.
   d. Kitchen Facilities Removal
      An agreement to remove all kitchen equipment shall be executed and notarized between the
      Building Division and Property Owner and recorded on the property in the official records of the
      PBC Clerk prior to issuance of any Building Permit. The agreement shall require the kitchen to be
      removed if the principal dwelling is no longer owner occupied.
   e. No Separate Utility Service
      There shall be no separate meters for any utilities. Both, the principal dwelling and the accessory
      dwelling shall be connected to the same utilities.
   f. Design and Development Standards – Townhouse or Zero Lot Line
      A detached Accessory Quarters associated with a Townhouse or a Zero Lot Line shall be located
      in the rear of the lot with access from a street or alley.

2. Caretaker Quarters
   a. Definition
      An accessory residence used by a caretaker engaged in providing security, custodial or managerial
      services upon the premises.
   b. Building Area, Except When Accessory to Government Facilities
      The use shall be subject to the following:
      1) On less than one acre: a maximum of 800 square feet.
      2) On one acre or more: a maximum of 1,000 square feet.
   c. Occupancy
      A Caretaker Quarters shall be for the exclusive use of the site on which it is located and shall be
      occupied only by the custodian or caretaker and their family.
   d. Temporary Use
      Unless stated otherwise, a Caretaker Quarters use shall not be allowed in association with a
      temporary use.
   e. Mobile Home
      A mobile home may be used for a Caretaker Quarters only in the AGR, AP, AR, IL, IG, PO, IPF,
      and MHPD districts. A mobile home used in the AGR, AP, or AR districts, shall be subject to the
      minimum acreage requirement pursuant to Art. 4.B.1.C.3.c, Accessory Use – Bona Fide
      Agriculture. [Ord. 2018-002]
   f. Mobile Home Removal Agreement
      A removal agreement shall be executed and notarized between the Building Division and Property
      Owner and recorded on the property in the official records of the PBC Clerk prior to issuance of the
      Building Permit. The agreement shall be recorded against the property stating that the mobile home
      shall be removed within 30 days in the event the property is sold or the principal use ceases to
      exist.

3. Estate Kitchen
   a. Definition
      A second kitchen located within a principal Single Family, Zero Lot Line, or Farm Residence.
   b. Conversion to Duplex Prohibited
      A secondary kitchen may be added provided there shall not be the presence of a second complete
      and separate living environment associated with the secondary kitchen.
4. Family Day Care Home
   a. Definition
      An occupied residence in which custodial care is rendered to one to six children, inclusive, and for which the owner or operator receives a payment, fee, or grant for any of the children receiving care, whether or not operating for profit, consistent with F.S. § 125.0109 as amended.
   b. Signage
      Signs shall not be permitted.

5. Farm Residence
   a. Definition
      A dwelling unit, other than a mobile home, located on a parcel of land used for a Bona Fide Agriculture use and occupied by the owner or operator of the farm operation.
   b. Principal Dwelling
      One principal dwelling shall be permitted for each bona fide farm operation.

6. Farm Workers Quarters
   a. Definition
      One or more residential structures providing a complete living environment, occupied by farm workers who provide labor in conjunction with a Bona Fide Agriculture operations.
   b. Building Area
      One Farm Workers Quarters may be allowed for each 25 acres, subject to the following:
      1) Limited to a maximum of four beds; and
      2) The structure shall not exceed 1,000 sq. ft. GFA under a solid roof.
   c. AGR Tier
      AGR/PUD or TMD Preserve shall be allowed one dwelling unit per acre provided such units are clustered onto a single compact area of the preserve and are restricted to occupancy by farm workers. Farm Workers Quarters shall not be located on property in the AGR Tier to which no residential density is assigned by the FLU designation.
   d. Mobile Home Removal Agreement
      A mobile home may be used for a Farm Workers Quarters. A removal agreement shall be executed and notarized between the Building Division and Property Owner and recorded on the property in the official records of the PBC Clerk prior to issuance of the Building Permit. The agreement shall be recorded against the property stating that the mobile home shall be removed within 30 days in the event the property is sold or the Bona Fide Agriculture operation ceases to exist.

7. Garage Sale
   a. Definition
      Temporary sale of household articles, in the front yard or garage of a dwelling unit, by the occupant.
   b. Duration
      A maximum of 72 hours.
   c. Number of Sales
      A maximum of two per year per dwelling unit.

8. Groom's Quarters
   a. Definition
      On-site living quarters for persons responsible for grooming and caring for horses boarded at a Stable.
   b. Zoning Districts – AGR-PUD or AGR-TMD
      1) 20 Groom’s Quarters may be allowed on the Preservation Area of an AGR-PUD or AGR-TMD.
      2) For more than 20 Groom’s Quarters, the allowable density shall be decreased by one unit for each Groom’s Quarter and shall not exceed a maximum reduction of one-half of the number of dwelling units associated with the Preservation Area.
   c. Number of Groom’s Quarters
      1) 20 Acres or Less
         One Groom’s Quarters may be allowed for every four horse stalls.
      2) More Than 20 Acres
         One Groom’s Quarters may be allowed for every three horse stalls.
d. Building Area
   
   1) Each Unit
      Each Groom’s Quarters shall not exceed 500 square feet of GFA per unit.

   2) 20 Acres or Less
      The total GFA for all Groom’s Quarters shall not exceed 5,000 square feet per lot.

   3) Occupancy
      Shall be limited to on-site employees and members of the employees’ family only.

f. Kitchen Facilities Removal

Groom's Quarters may contain individual cooking facilities and/or one common dining facility. An agreement to remove all kitchen equipment shall be executed and notarized between the Building Division and Property Owner and recorded on the property in the official records of the PBC Clerk prior to issuance of Building Permit of the Groom’s Quarters. The agreement shall require the kitchen to be removed within 90 days of the unit ceasing to operate as a Groom’s Quarters.

9. Guest Cottage

a. Definition

   An accessory sleeping quarters provided for non-paying guests by the owner/occupant of a principal dwelling unit.

b. Building Area

   The use shall be subject to the following:

   1) On less than one acre: a maximum of 800 square feet.
   2) On one acre or more: a maximum of 1,000 square feet.
   3) The floor area calculation shall include only the living area of the Guest Cottage under a solid roof.
   4) Floor area under a solid roof that is utilized as a porch, patio, porte-cochere, or carport shall not exceed 500 square feet of GFA.

c. Kitchen or Cooking Facilities

   There shall be no kitchen or cooking facilities in a Guest Cottage.

d. Compatibility

   A Guest Cottage shall be architecturally compatible in character and materials with the principal dwelling unit.

e. No Separate Utility Service

   There shall be no separate meters for any utilities. Both the principal dwelling and the Guest Cottage shall be connected to the same utilities.

10. Home Occupation

a. Definition

   A business, profession, occupation, trade, artisan, or handcraft conducted in a dwelling unit for commercial gain by a resident of the unit. A Home Occupation shall not include those businesses that are open to the public including those required by State of Florida agencies.

b. Incidental Nature

   Shall be clearly incidental and subordinate to the residential use of the dwelling property.

c. Location

   With the exception of outdoor instructional services, a Home Occupation shall be conducted within the principal dwelling or off-site, and shall not be conducted within any accessory building or structure or within any open porch or carport that is attached to and part of the principal structure. Instructional services, which by their nature must be conducted outside of the principal structure, such as swimming lessons, shall be located in a rear or side yard.

d. No Change to Character of Dwelling

   The residential character of the dwelling in terms of exterior appearance and interior space shall not be altered or changed to accommodate a Home Occupation.
e. **Employees**
Shall be conducted by members of the immediate family residing in the dwelling unit only. A maximum of one person who is not a member of the immediate family may assist in the operation of the Home Occupations at the residence.

f. **Advertising**
No external evidence or sign shall advertise, display, or otherwise indicate the presence of the Home Occupation, nor shall the street address of the Home Occupation be advertised through signs, billboards, television, radio, or newspapers. Advertising on vehicles shall be limited to the minimum necessary to meet requirements mandated by F.S. ch. 489 or Chapter 67-1876 of the PBC Contractor's Certification Division Manual.

g. **Cottage Foods**
No food preparation shall be allowed, except as allowed in accordance with F.S. § 500.80, Cottage Food Operations, as amended.

h. **On-Premise Sale of Goods and Services**
A Home Occupation shall not involve the sale of any stock, trade, supplies, products, or services on the premises, except for instructional services or incidental retail sales where the Home Occupation is a mail order or internet business.

i. **Instructional Services**
Instructional services shall meet the following additional regulations:

1. **Home Instruction, Inside**
   Teaching which takes place inside the dwelling unit of the instructor. Typical instruction includes music lessons and academic tutoring.

2. **Home Instruction, Outside**
   Teaching which takes place outside the dwelling unit, on the property of the instructor. This type of instruction is limited to subject matter which necessitates outside instruction. Typical instruction includes tennis, swimming lessons, dog training and equestrian lessons.

3. **Hours of Operation**
   Instruction shall occur only between the hours of 9:00 a.m. and 8:00 p.m. daily.

4. **Number of Students**
   A maximum of three students at a time may be allowed to receive instruction during a lesson.

5. **Parking**
   No more than two vehicles associated with the lessons may be allowed to be parked at the instructor's home at any time.

6. **Resident**
   The instruction must be conducted by a resident of the dwelling where lessons are provided. Only one instructor may be allowed to provide instruction.

j. **Home Occupation in the AR/RSA**
Additional standards and approval process apply to Home Occupation with limited Landscape Service or limited Contractor Storage Yard pursuant to this Article. [Ord. 2018-018]

k. **Outside Storage**
No equipment or materials used in the Home Occupation shall be stored or displayed outside of the dwelling, including driveways.

l. **Nuisances**
No Home Occupation shall involve the use of any mechanical, electrical, or other equipment, materials, or items which produce noise, electrical or magnetic interference, vibration, heat, glare, smoke, dust, odor, or other nuisance outside the residential building. There shall be no storage of hazardous or noxious materials on the site of the Home Occupation. [Ord. 2019-034]

m. **Violations or Hazard**
If any of the above requirements are violated, or if the use, or any part thereof, is determined by the Zoning Director to create a health or safety hazard, then the Business Tax Receipt may be revoked.

n. **Vehicles**
One business-related vehicle per dwelling unit not over one ton rated capacity may be parked at the home, provided the vehicle is registered to a resident of the dwelling, commercial vehicles are prohibited.
11. Kennel, Type 1
   a. Definition
      A residential lot with a Single Family dwelling designed or arranged to facilitate the non-commercial care of domestic dogs and cats, owned by the occupants of the premises.
   b. Private Non-Profit
      A Type 1 Kennel may include a private non-profit animal organization that is not open to the public. A PBCACC Excess Animal Habitat permit shall be prohibited.
   c. Hobby Breeder
      A person who breeds up to two litters of dogs or cats or 19 dogs or cats per one-year period, on their property. A Hobby Breeder is further defined and regulated by the PBCACC pursuant to Ord. No. 98-22, as amended.

12. Limited Pet Boarding
   a. Definition
      A Single Family dwelling with accessory boarding of domestic cats or dogs not owned by the occupants of the premises.
   b. Approval Process
      The use shall be subject to Class A Conditional Use approval process in the AGR and AR/RSA and AR/USA Zoning Districts pursuant to Art. 2, Application Processes and Procedures. In addition, the Applicant shall submit simultaneously with the Class A Conditional Use application a letter from ACC confirming the Applicant’s intent to develop the proposed use in the specific location.
   c. Lot Size
      A minimum of one acre.
   d. Separation Distance
      Shall not be located within a radius of 1,000 feet of another Limited Pet Boarding use. The separation distance shall be measured from property line to property line.
   e. Maximum Number
      No more than a total of seven cats or dogs shall be boarded at any given time. The total number of cats and dogs boarded and owned by the resident of the Single Family Dwelling shall not exceed the maximum limits for dogs and cats established by Animal Care and Control pursuant to Sec. 4-22 of the PBC Code.
   f. Boarding
      Cats or dogs shall be boarded within the Single Family structure except when outdoor activities take place. Boarding operations not conducted within the Single Family dwelling, but in an accessory structure, must be a legally conforming use as of October 1, 2016.
   g. Hours
      1) Outdoor activities shall be limited to 7:00 a.m. and 9:00 p.m. unless under the restraint or control of a person by means of a leash.
      2) Business hours including drop-off and pickup shall be between 6:00 a.m. to 7 p.m.
   h. Outdoor Areas
      1) Cats and dogs shall be personally supervised during the outdoor activity; and
      2) Shall be set back a minimum of 25 feet from all property lines.
   i. Signage
      No signage shall be allowed to advertise the Limited Pet Boarding use.
   j. ACC Permit
      The operator of the use shall obtain Zoning Approval prior to application for an Operational Permit by the ACC.

**Council of Uses**
- Permitted by Right
- Subject to Zoning Commission Approval (Class B Conditional Use)
- Prohibited Use, unless stated otherwise within Supplementary Use Standards

**Commercial Uses**
- Adult Entertainment
- Auction, Indoor
- Auction, Outdoor
- Bed and Breakfast
- Car Wash
- Catering Service
- Cocktail Lounge
- Convenience Store
- Daycare
- Electric Vehicle Charging Station Facility
- Financial Institution
- Financial Institution with Drive-Through Facilities
- Financial Institution – Freestanding ATM
- Flea Market, Indoor
- Flea Market, Outdoor

**Use Approval Process Key:**
- P Permitted by Right
- D Subject to DRO Approval
- A Subject to BCC Approval (Class A Conditional Use)
- B Subject to Zoning Commission Approval (Class B Conditional Use)
- E Prohibited Use, unless stated otherwise within Supplementary Use Standards

(1) Supplementary Use Standards for each use must be reviewed regardless of the approval process set forth in the Use Matrix. Refer to the numbers in the Supplementary Use Standards column.

(2) The change in use for a previously approved non-residential structure shall be Permitted by Right, if in compliance with **Art. 3.B.16.E.1, Right to Continue or Change Uses**.

### Use Approval Process Key:

| P Permitted by Right | D Subject to DRO Approval | A Subject to BCC Approval (Class A Conditional Use) | B Subject to Zoning Commission Approval (Class B Conditional Use) | - Prohibited Use, unless stated otherwise within Supplementary Use Standards |

(1) Supplementary Use Standards for each use must be reviewed regardless of the approval process set forth in the Use Matrix. Refer to the numbers in the Supplementary Use Standards column.

(2) The change in use for a previously approved non-residential structure shall be Permitted by Right, if in compliance with Art. 3.B.16.E.1, Right to Change or Continue Uses.

### Unified Land Development Code

 Supplement No. 28 (Printed 09/20)  
 Article 4 – Use Regulations  
 Page 27
B. General Commercial Standards
   1. Bay Doors
      Unless stated otherwise in the Article or Art. 6.E. Loading Standards, service bay doors shall not face any residential use, or vacant parcel of land with a residential FLU designation, except as follows:
      a. When separated by an Arterial or Collector Street a minimum of 80 feet in width.
      b. When separated by a Local Commercial Street, provided the R-O-W Buffer is upgraded to include a minimum six-foot-high hedge.
      c. When separated by a parcel with a non-residential use such as utilities, canal R-O-W, easements, FDOT, or County drainage, a minimum of 80 feet in width, subject to the provision of a Type 3 Incompatibility Buffer with a continuous two-foot-high berm. The required wall shall be placed on the top of the berm. Canopy trees shall be one and one-half times the required tree quantity.
      d. Requests for a Type 2 Variance from Bay Doors regulations may be allowed in accordance with Art. 2, Application Processes and Procedures.
      e. When residential uses are within the same MUPD and not vertically integrated, the non-residential structure with the bay doors shall be separated from a residential structure by a minimum of 50 feet and screened from view. [Ord. 2019-005]

C. Definitions and Supplementary Use Standards for Specific Uses
   1. Adult Entertainment
      a. Establishment
         Any adult arcade, adult theater, adult bookstore/adult video store, adult motel, or adult dancing establishment; or any establishment or business operated for commercial gain where any employee, operator, or owner exposes his/her specified anatomical area for viewing by patrons, including but not limited to: massage establishments whether or not licensed pursuant to F.S. ch. 480, tanning salons, modeling studios, or lingerie studios. The following Definitions and Supplementary Use Standards shall apply to all Adult Entertainment establishments:

      b. Definitions
         The following definitions apply for the purposes of the Adult Entertainment Establishment provisions of this Code.

         1) Adult Arcade
            Any place or establishment operated for commercial gain, which invites or permits the public to view adult material. For purposes of this Code, “adult arcade” is included within the definition of “adult theater.”

         2) Adult Bookstore/Adult Video Store
            An establishment which sells, offers for sale, or rents adult material for commercial gain and which meets either of the following two criteria:
            (a) More than 30 percent of the gross public floor area is devoted to adult material; or
            (b) More than 30 percent of the stock in trade consists of adult material.

         3) Adult Booth
            A small enclosed or partitioned area inside an Adult Entertainment establishment which is: (1) designed or used for the viewing of adult material by one or more persons; and (2) is accessible to any person, regardless of whether a fee is charged for access. The term “adult booth” includes, but is not limited to, a “peep show” booth, or other booth used to view adult material. The term “adult booth” does not include a foyer through which any person can enter or exit the establishment, or a restroom.

         4) Adult Dancing Establishment
            An establishment selling, serving, or allowing consumption of alcoholic beverages, where employees display or expose specified anatomical areas to others, regardless of whether the employees actually engage in dancing.

         5) Adult Entertainment
            a) Any adult arcade, adult theater, adult bookstore/adult video store, adult motel, or adult dancing establishment; or any establishment or business operated for commercial gain where any employee, operator, or owner exposes his/her specified anatomical area for viewing by patrons, including but not limited to: massage establishments whether or not licensed pursuant to F.S. ch. 480, tanning salons, modeling studios, or lingerie studios.

            b) Excluded from this definition are any educational institutions where the exposure of the specified anatomical area is associated with a curriculum or program.

            c) An establishment that possesses an Adult Entertainment license is presumed to be an Adult Entertainment establishment.
6) **Adult Material**
Any one or more of the following, regardless of whether it is new or used:
   a) Books, magazines, periodicals, or other printed matter; photographs, films, motion pictures, video cassettes, slides, or other visual representations; recordings or other audio matter; and, novelties or devices which have as their primary or dominant theme subject matter depicting, exhibiting, illustrating, describing, or relating to specified sexual activities or specified anatomical areas; or
   b) Instruments, novelties, devices, or paraphernalia which are designed for use in connection with specified sexual activities.

7) **Adult Motel**
A hotel, motel, or similar commercial establishment which offers accommodations to the public for any form of consideration; provides patrons with closed-circuit television transmissions, films, motion pictures, video cassettes, slides, or other photographic reproductions which are characterized by the depiction or description of "specified sexual activities" or "specified anatomical areas;" and has a sign visible from the public streets which advertises the availability of this adult type of photographic reproductions.

8) **Adult Theater**
An establishment operated for commercial gain which consists of an enclosed building, or a portion or part thereof or an open-air area used for viewing of adult material. "Adult motels," "adult arcade," "adult booth" and "adult motion picture theater" are included within the definition of "adult theater." An establishment which has "adult booths" is considered to be an "adult theater."

9) **Adult Video Store**
See Adult Bookstore.

10) **Commercial Gain**
Operated for pecuniary gain, which shall be presumed for any establishment which has received a Business Tax Receipt. For the purpose of this Code, commercial or pecuniary gain shall not depend on actual profit or loss.

11) **Educational Institution**
A premises or site within a municipality or within the unincorporated area of PBC upon which there is a governmentally licensed child care facility for six or more children, or elementary or secondary (K-12) school, attended in whole or in part by persons under 18 years of age.

12) **Employee**
Any person who works, performs, or exposes his/her specified anatomical areas in an establishment, irrespective of whether said person is paid a salary or wages by the owner or manager of the business, establishment, or premises. "Employee" shall include any person who pays any form of consideration to an owner or manager of an establishment, for the privilege to work performing or exposing his/her specified anatomical areas within the establishment.

13) **Person**
Includes an individual(s), firm(s), association(s), joint ventures(s), partnership(s), estate(s), trust(s), business trust(s), syndicate(s), fiduciary(ies), corporation(s), and all other or any other similar entity.

14) **Religious Activities**
Any daily, weekly, or periodic activity associated with or that occurs at a religious institution.

15) **Religious Institution**
A premises or site which is used primarily or exclusively for religious worship and related religious ecclesiastical or denominational organization or established place of worship, retreat, site, camp, or similar facilities owned or operated by a bona fide religious group for religious activities shall be considered a religious institution.

16) **Specified Anatomical Areas**
Less than completely and opaquely covered:
   a) Human genitals and pubic region; or
   b) the opening between the human buttocks, i.e. the anal cleft; or
   c) that portion of the human female breast encompassed within an area falling below the horizontal line one would have to draw to intersect a point immediately above the top of the areola (the colored ring around the nipple); this definition shall include the entire lower portion of the female breast, but shall not include any portion of the cleavage of the human
female breast exhibited by a dress, blouse, shirt, leotard, bathing suit, or other wearing apparel, provided the areola is not so exposed; or
d) human male genitals in a discernibly turgid state, even if completely and opaquely covered.

17) Specified Sexual Activities
a) Human genitals in a state of sexual stimulation, arousal, or tumescence; or
b) acts of human anilingus, bestiality, buggery, cunnilingus, coprophagy, coprophilia, fellation, flagellation, masochism, masturbation, necrophilia, pederasty, pedophilia, sadism, sadomasochism, sexual intercourse, or sodomy; or
c) fondling or other erotic touching of human genitals, pubic region, buttock, anus, or female breast; or
d) excretory functions as part of or in connection with any of the activities set forth in Subsections of Art. 4.B.2.C.1.b,16)-17), Specified Anatomical Areas and Specified Sexual Activities.

c. Exclusions
Excluded from this definition are any educational institutions where the exposure of the specified anatomical area is associated with a curriculum or program.

d. License per Palm Beach County Adult Entertainment Code
1) An establishment that possesses an Adult Entertainment license as indicated in Art. 4.B.2.C.1.n.1)c), is presumed to be an Adult Entertainment establishment.
2) An Adult Entertainment use approved by the DRO, after March 2, 2017, shall hold a valid Adult Entertainment License pursuant to the “Adult Entertainment Code,” Chapter 17, Article V of the PBC Code, as may be amended, prior to issuance of a Business Tax Receipt.

e. Review and Approval Process
1) Applications for new Adult Entertainment establishment or legal nonconforming establishments exceeding the thresholds in Art. 1.F, Nonconformities, shall be subject to DRO approval.
2) An Adult Entertainment establishment shall be exempt from the requirements under Development Thresholds in this Article or any thresholds in this Code that require the use to be subject to a Conditional Use approval. [Ord. 2019-005]
3) The Zoning Director shall determine what DRO agencies shall review the application, including but not limited to the Building Division, Fire Department, and Zoning Division. DRO shall approve, approve with conditions, or deny the application within 21 days of a determination of application sufficiency as contained in Art. 2.B.2, Sufficiency Review.

f. Conditions
The Zoning Director shall take into consideration DRO Agency recommended conditions that clearly implement their specific Agency Code provisions.

g. Relief from a Decision
A Person seeking a DRO approval or a Person holding a previously approved Special Permit or an Adult Entertainment Establishment License, has the right to immediately seek relief from a denial of application sufficiency for a DRO, denial of a DRO application, or revocation or suspension of a Special Permit or DRO approval, as applicable, to the Circuit Court in the Fifteenth Judicial Circuit of the State of Florida.

h. Purpose and Intent
The following standards are intended to provide for the proper location of Adult Entertainment uses in order to protect the integrity of adjacent neighborhoods, educational uses, religious uses, parks, and other commercial uses. Proper separation of Adult Entertainment uses prevents the creation of “skid-row” areas in unincorporated PBC that results from the concentration of these uses and their patrons. It is also the intent of these standards to limit the secondary effects of Adult Entertainment uses and to ensure that residential districts, religious uses, educational uses, parks, and other commercial uses are located in areas free from the secondary effects of Adult Entertainment uses. The location of residential districts, religious uses, educational uses, parks, and other commercial uses within viable, unlighted, and desirable areas supports the preservation of property values and promotes the health, safety, and welfare of the public.

i. Findings of Fact
October 1991; “Adult Entertainment Businesses in Indianapolis: An Analysis” conducted by the Department of Metropolitan Development, Division of Planning, February 1984; the “Study of the Effects of Concentration of Adult Entertainment Establishments in the City of Los Angeles” conducted by the Los Angeles City Planning Department for the Los Angeles City Council, June 1977; the study conducted by the City of Austin Texas; the “Presentation to the Orange County Commission” by the Metropolitan Bureau of Investigation (MBI) for the Ninth Judicial Circuit (Orlando area); the expert affidavit prepared for Palm Beach County by Eric Damian Kelly, Ph.D., FAICP, dated September 24, 2004; letter from Dale N. Tarvis, M.D.; “Analysis of Availability of Sites for Adult Entertainment in Palm Beach County” prepared for Palm Beach County by Duncan Associates, November 2003; Adult Entertainment Analysis for Palm Beach County, Florida, Final Report, by Cooper Planning Consultants, January 2019; the “Crime-Related Secondary Effects of Sexually-Oriented Businesses – Report to the County Attorney, Palm Beach County, Florida” prepared by Valerie Jenness, Ph.D., Richard McCleary, Ph.D., James W. Meeker, JD, Ph.D., August 15, 2007; the “Survey of Florida Appraisers – Effects of Land Uses on Surrounding Property Values” prepared for Palm Beach County by Duncan Associates, December 2007 (Report 2008); and, information from Tampa, Florida detailing the effects of Adult Entertainment establishments in the Tampa area, the BCC hereby finds the following: [Ord. 2019-034]

1) Commercial uses exist or may exist within unincorporated PBC where books, magazines, motion pictures, prints, photographs, periodicals, records, novelties, and/or other devices that depict, illustrate, describe, or relate to specified sexual activities are possessed, displayed, exhibited, distributed, and/or sold.

2) Commercial uses exist or may exist within unincorporated PBC:
   a) Where the superficial tissues of one person are manipulated, rubbed, stroked, kneaded, and/or tapped by a second person, accompanied by the display or exposure of specified anatomical areas;
   b) Where dancers, entertainers, performers, or other individuals, who, for any form of commercial gain, perform or are presented while displaying or exposing any specified anatomical area; or,
   c) Where lap dancing occurs.

3) This competitive commercial exploitation of such nudity and semi-nudity is adverse to the public's interest and the quality of life, tone of commerce, and the community environment in PBC:
   a) When the activities described in Art. 4.B.2.C.1.b, 16)-17), Specified Anatomical Areas and Specified Sexual Activities, are presented in commercial uses, other activities that are illegal, immoral, or unhealthful tend to accompany them, concentrate around them, and be aggravated by them. Such other activities include, but are not limited to, prostitution, solicitation for prostitution, lewd and lascivious behavior, possession, distribution, and transportation of obscene materials, sale or possession of controlled substances, and violent crimes against persons and land.
   b) When the activities described in Art. 4.B.2.C.1.b, 16)-17), Specified Anatomical Areas and Specified Sexual Activities, are present in commercial uses within PBC, they tend to blight neighborhoods, adversely affect neighboring businesses, lower property values, promote crime, and ultimately lead residents and businesses to move to other locations.
   c) There is a direct relationship between the display and depiction of specified anatomical areas as described in Art. 4.B.2.C.1.b, 16)-17), Specified Anatomical Areas and Specified Sexual Activities, and an increase in criminal activities, moral degradation, and disturbances of the peace and good order of the community, and the occurrence of these activities are hazardous to the health and safety of those persons in attendance and tend to depreciate the value of adjoining land and harm the economic welfare of the community as a whole. These secondary effects are adverse to the public’s interest and quality of life, the tone of commerce, and the community environment in PBC.

4) Based upon these findings, the BCC finds that there are a sufficient number of available locations for new Adult Entertainment uses within unincorporated Palm Beach County.

5) Based upon these findings, it is in the interest of the health, safety, morals, and general welfare of the citizens of PBC that Adult Entertainment uses are regulated pursuant to the following standards.
j. Separation
There shall be no variance to the location standards contained herein.

1) General
An Adult Entertainment use shall be located outside of the minimum distances indicated below including properties within a municipality or within the unincorporated area of PBC:

a) Other Adult Entertainment
   2,000 feet.

b) A Place of Worship
   1,000 feet.

c) An Educational Institution
   1,000 feet.

d) A Public Park
   500 feet.

e) A Residential Zoning District
   Which is Designated as Residential by any Local Comprehensive Plan,
   500 feet.

f) A Cocktail Lounge
   750 feet.

2) Measurement of Distance
The distance set forth above shall be measured by drawing a straight line between the nearest point on the perimeter of the exterior wall or bay housing the proposed Adult Entertainment establishment to the nearest point on the property line of the relevant Place of Worship, Educational Institution, Public Park, or residential zoning district. For the purpose of measuring the distance, also see Art. 1.C, Rules of Construction and Measurement, between Adult Entertainment uses, the distance shall be measured by drawing a straight line between the nearest point on the perimeter of the exterior wall or bay of the proposed or existing Adult Entertainment establishment and the nearest point on the exterior wall or bay of another Adult Entertainment establishment. Measurement shall be made in a straight line, without regard to intervening structures or objects.

3) WCRA Overlay
   Adult Entertainment is prohibited within the boundaries of the WCRAO, as per Art. 3.B.14.E, Use Regulations.

k. Subsequent Development within Location Standards
The subsequent approval of a Development Order for a Place of Worship, Educational Institution, Public Park, or residential district within the distances outlined above shall not change the status of the Adult Entertainment use to that of a nonconforming use.

l. Landscaping
   A Type 2 Incompatibility Buffer, pursuant to Art. 7.C, Landscape Buffer and Interior Landscape Requirements with Canopy trees spaced a minimum of 20 feet on center and a wall a minimum of six feet in height shall be installed along any property line that abuts a residential district.

m. Lighting
   Outdoor low-intensity lighting shall be provided that illuminates the entire parking and vehicular use area. The lighting shall be installed on structures that do not exceed 16 feet in height from finished grade.

n. Nonconformity
   1) Establishment of Nonconformity
      An Adult Entertainment use shall be deemed a nonconforming use, provided the establishment:
      a) Was in operation as an Adult Entertainment use, generally known and held out in the neighborhood and community as an Adult Entertainment establishment, and was open to the public as an Adult Entertainment establishment use on November 28, 1988; and
      b) Possessed a valid and current Business Tax Receipt authorizing the general type of use, which would correspond to the Adult Entertainment use being claimed as nonconforming on November 28, 1988; and
      c) Submitted an application for an Adult Entertainment license pursuant to the “Adult Entertainment Code,” Chapter 17, Article V of the PBC Code, as may be amended, with appropriate filing fees by August 15, 1992.
2) Standards for Nonconformance
A nonconforming Adult Entertainment use as determined in Art. 4.B.2.C.1.n, Nonconformity, above shall be subject to the following Supplementary Use Standards, in addition to Art. 1.F, Nonconformities.
   a) Landscape Buffer
   The Adult Entertainment shall construct and install a Type 2 Incompatibility Buffer, as defined in Art. 7.C.2.C, Incompatibility Buffer, with Canopy trees spaced a maximum of 20 feet on center along any property line that abuts a residential district, within 90 days of the date of issuance of the Adult Entertainment license by the occupational licensing department.
   b) Building Permit
   If a Building Permit for exterior structural renovation or remodeling or a paving or parking permit is issued for the Adult Entertainment use, the requirements of Art. 7, Landscaping, shall apply to the entire site of the Adult Entertainment use.

3) Modification or Improvement to Site Elements
When an Adult Entertainment establishment has been determined to be a non-conforming use, or is located within a nonconforming structure, modifications or improvements to conforming or nonconforming site elements or exterior architecture shall be permitted. The total cost associated with these improvements will not be used in determining the allowable improvements to the interior of the structure, pursuant to Art. 1.F, Nonconformities.

   o. Accessory Food Service in Industrial Districts
   In the IL and IG Zoning Districts, food service may be allowed as an accessory use to Adult Entertainment, only in conjunction with and during the hours of operation for an adult theater or an adult dancing establishment.

   p. Collocated Cocktail Lounge
   A Cocktail Lounge may be Permitted by Right as a collocated use only when operated in conjunction with and during the hours of operation for an Adult Entertainment establishment.

2. Auction
   a. Definition
   An establishment engaged in the display and sale of merchandise to the highest bidder in an enclosed building or outdoor site.

   b. Use Types
      1) Indoor
      All activities, display and sale of merchandise shall occur within an enclosed building, unless stated otherwise. An Indoor Auction may include an outdoor display area subject to the following:
      a) The merchandise shall be relocated to the interior of the enclosed building prior to the end of each business day;
      b) Shall not exceed ten percent of the GFA of the enclosed building;
      c) Shall comply with the minimum setbacks requirements of the applicable zoning district; and,
      d) Shall not be located in any required parking spaces, loading or vehicular use areas, fire lanes, or landscape buffers. The outdoor display area shall not encroach upon pedestrian pathways, sidewalks, or ADA accessible routes.

      2) Outdoor
      An Auction with all or a portion of the activity, display, and sale of merchandise occurring outdoor on-site.

      c. Zoning District – AGR District
      An Auction shall be limited to only farm equipment and supplies.

3. Bed and Breakfast
   a. Definition
   An owner-occupied Single Family dwelling that offers transient lodging and meal services only to paying guests.

   b. Signage
   One sign, a maximum of eight square feet in sign face area, and three feet in height, indicating the business name and contact information only may be allowed.
c. **Dwelling Modifications**

Only exterior alterations necessary to assure safety of the structure or enhance the compatibility with the surrounding neighborhood shall be made for the purpose of providing a Bed and Breakfast. A Single Family dwelling may require structural or other modifications to ensure compliance with the applicable Building Code and Fire-Rescue regulations.

d. **Events**

Activities such as weddings, receptions, or social events shall be prohibited, unless approved as Special Event.

4. **Car Wash**

a. **Definition**

A permanent establishment engaged in washing or detailing motor vehicles which may use production line methods with a conveyor, blower, or other mechanical devices, and which may employ some hand labor. Detailing includes hand washing and waxing, striping, and interior cleaning.

b. **Typical Uses**

A Car Wash may include but is not limited to an automatic, full-service, hand wash, or self-service Car Wash.

c. **Collocated – CG, PDD with CH FLU Designation**

A Car Wash may be Permitted by Right when collocated with a Retail Gas and Fuel Sales establishment.

d. **Accessory Use – CL FLU Designation**

An Automatic Car Wash may be allowed as an accessory use to a Retail Gas and Fuel Sales subject to DRO Approval when it is located on the same lot. Auto detailing or other extended services shall be prohibited.

e. **Zoning District – TMD**

A maximum of one Car Wash may be allowed. The Car Wash shall be located outside the main street, and may be accessed from a secondary street, alley or from a parking lot. The Car Wash shall not be visible from the main street. [Ord. 2017-025]

5. **Catering Service**

a. **Definition**

An establishment primarily engaged in providing event-based food services where food and beverages are prepared and delivered for consumption off the premises.

b. **Zoning District – CN District**

The use shall be limited to 3,000 square feet of GFA.

c. **Accessory Use**

Catering Service may be Permitted by Right as an accessory use to a Restaurant limited to food preparation. The accessory use shall be limited to three delivery vehicles.

d. **Accessory Services**

A Catering Service may also provide personnel, serving equipment, and decorations.

e. **Delivery Vehicles**

Delivery vehicles shall be located at the rear of the property and screened from view when located within 100 feet of a parcel of land with residential FLU designation or use, unless blocked from view by other existing structures.

6. **Cocktail Lounge**

a. **Definition**

A use engaged in the preparation and retail sale of alcoholic beverages for consumption on the premises.

b. **Approval Process – CG and TDD or PDD with CH FLU**

A Cocktail Lounge located in the CG Zoning District, or in a TDD or PDD with a CH FLU designation, may be subject to the following: [Ord. 2017-029]

1) Permitted by Right when located outside the Separation Requirements; or [Ord. 2017-029]
2) the BCC may allow the use within the distances established in the Separation Requirements, subject to Class A Conditional Use approval. [Ord. 2017-029]

c. **Typical Uses**

A Cocktail Lounge may include but is not limited to taverns, bars, nightclubs, and similar uses.

d. **Zoning District – CN District**

A Cocktail Lounge shall not exceed 3,000 square feet of GFA.
e. **Accessory Use**  
An accessory Cocktail Lounge to an office, Hotel, or Motel shall not exceed ten percent of the GFA.

f. **Separation Requirements**  
A Cocktail Lounge, which includes outdoor areas, shall not be located within 250 feet of a parcel of land with a residential FLU designation or use and shall be separated a minimum of 750 feet from another Cocktail Lounge. The Zoning Director may ask for a signed/sealed survey certifying that another lounge does not exist within 750 feet off the subject lounge, a residential district is more than 250 feet from the subject lounge, or the subject lounge is more than 500 feet from a school as required by the State of Florida, F.S. § 562.45, as amended. Measurement shall be taken from the structure to the property line of a residential use or FLU designation. [Ord. 2017-029]

g. **Restaurant**  
A Cocktail Lounge is distinct from a restaurant that sells alcohol when the establishment cannot qualify for a “Consumption on Premises, Special Restaurant Exemption” pursuant to the State Beverage Law.

7. **Convenience Store**  
a. **Definition**  
An establishment serving a limited market area and engaged in the retail sale of food, beverages, and other frequently or recurrently needed items for household use or consumption.

b. **Floor Area**  
A maximum of 7,000 square feet of GFA.

c. **Overlay – WCRAO**  
Convenience Store is prohibited in the NR, NRM, NG, and NC Sub-areas per Table 3.B.14.E, WCRAO Sub-area Use Regulations.

d. **Zoning Districts – CN and CC**  
Shall comply with Art. 5.E.1, Major Intersection Criteria.

e. **Collocated Use**  
A Convenience Store that is collocated with a Retail Gas and Fuel Sales shall be reviewed and approved concurrently.

8. **Dispatching Service**  
a. **Definition**  
An establishment for receiving and transmitting messages associated with the tracking of vehicles and equipment, or coordinating mobile or transportation operations, which may include storage of dispatched vehicles or equipment.

b. **Typical Uses**  
A Dispatching Service may include but is not limited to janitorial, pest control, or emergency services; and taxi, limousine, or courier operations.

c. **Approval Process**  
1) **CH FLU Designation and Commercial Pod of PIPD**  
   A Dispatching Service may be allowed subject to DRO approval in the following situations:
   a) Limited to three service or delivery vehicles; or
   b) All dispatched vehicles are stored indoor; or
   c) Outdoor storage of vehicles is separated a minimum of 250 feet from a parcel of land with a residential FLU designation or use.

2) A Dispatching Service without vehicles on site and limited to office only may be Permitted by Right in the zoning districts where the use is allowed.

9. **Dog Daycare**  
a. **Definition**  
An establishment which provides daytime care and training for domestic dogs. Overnight care of domestic dogs is prohibited.

b. **ACC Permit**  
The owner or operator shall obtain Zoning approval prior to application for an ACC Operational Permit. All Dog Daycare uses shall be licensed and regulated in accordance with ACC Ord. No. 98-22, as amended.

c. **Waste Disposal**  
A Dog Daycare shall meet the ECR I and ECR II standards and shall be subject to all applicable rules and regulations of the FDEP, PBCHD, and SWA.
d. Runs and Drop-Off
   Facilities shall be subject to the following standards:
   1) Outdoor runs, outdoor play areas, and yards shall be prohibited;
   2) Adequate drop-off areas shall be provided; and,
   3) Three drop-off spaces measuring 12 feet in width by 20 feet in length shall be provided for every 50 dogs.

e. Outdoor Areas
   Outdoor activities shall be prohibited except as follows:
   1) Shall be personally supervised and under the restraint or control of a person by means of a leash;
   2) Shall only be allowed within areas designated for such activities on the Final Site Plan, unless Dog Daycare is sole use of property; and,
   3) Waste shall be picked up immediately and disposed of properly within the establishment.

10. Electric Vehicle Charging Station Facility
a. Definitions
   A facility that provides infrastructure that supplies electric energy for the charging of electric vehicles for a fee. Electric vehicles shall include, but not limited to: battery-powered electric vehicles, plug-in hybrid electric vehicles, electric motorcycles, and fuel cell vehicles. The service is provided to the public and the facility can be manned or unmanned. [Ord. 2018-018] [Ord. 2019-034]

b. Location Criteria for Principal Use
   1) An EVCS facility shall comply with Art. 5.E.2, Location Criteria. [Ord. 2018-018]
   2) An EVCS facility with a CL FLU designation shall comply with Art. 5.E.1, Major Intersection Criteria. [Ord. 2018-018]
   3) I-95 or Turnpike Interchanges
      A parcel with a Commercial High (CH) Future Land Use designation within 0.50 miles of an I-95 or Turnpike interchange shall be exempt from the location criteria listed above. [Ord. 2018-018]

c. Design and Construction Standards for Stations for Principal or Accessory Use
   1) The location of the EVCS (charger and/or charging space(s) shall not be located in the following areas: [Ord. 2018-018]
      a) required loading areas; [Ord. 2018-018]
      b) required landscape buffers, islands, or medians; and, [Ord. 2018-018]
      c) Any other areas that will impede vehicular or pedestrian traffic circulation or visibility. [Ord. 2018-018]
   2) All EV parking spaces shall be a minimum of nine feet in width by 18.5 feet in length. The charging unit may be installed in front of the space or on the side. An optional pedestrian access aisle (between 18 inches to 2 feet) may be provided between the unit and the vehicle. Two adjacent EVCS spaces may utilize the same access aisle; [Ord. 2018-018]
   3) EV spaces shall be painted green, or shall be marked by green painted lines or curbs; [Ord. 2018-018]
   4) A canopy, if provided, shall not exceed 15 feet in height over the charging unit; [Ord. 2018-018]
   5) Each EV space shall be marked by a sign designating the parking space as an electric vehicle parking space, in accordance with Art. 8.B.2, Small Signs and the Manual on Uniform Traffic Control Devices (MUTCD) of the Federal Highway Administration. Each sign shall include the following information [Ord. 2018-018]
      a) Voltage and amperage levels; [Ord. 2018-018]
      b) Any applicable usage fees; [Ord. 2018-018]
      c) Safety information; and, [Ord. 2018-018]
      d) Contact information for the owner of the charging station, to allow a consumer to report issues relating to the charging station. [Ord. 2018-018]
   6) A generator, if provided, shall comply with Art. 5.B.1.A.19, Permanent Generators. [Ord. 2018-018]
d. Accessory Use
EVCS shall be permitted as an accessory use to non-residential uses when a parking space(s), equipped with EVCS infrastructure, is provided within the parking lot or vehicular service area of a principal use for public or private use. An accessory EVCS may be, Permitted by Right located in any zoning district subject to the following: [Ord. 2018-018] [Ord. 2019-034]
1) Accessory to Non-Residential Uses
Shall not exceed a maximum of 20 spaces or ten percent of the total required parking spaces for the use or, whichever is less. [Ord. 2018-018]

11. Financial Institution
a. Definition
An establishment engaged in deposit banking.
b. Typical Uses
A Financial Institution may include but is not limited to commercial banks, savings institutions, and credit unions.
c. Approval Process – CC District, PDD with CL or CLO FLU, and Commercial Pod of PUD
A Financial Institution 5,000 square feet or less in the CC Zoning District, PDD with CL or CLO FLU designation, or Commercial Pod of a PUD, may be Permitted by Right. [Ord. 2019-005]
d. Zoning Districts – CN and CLO Districts, and Neighborhood Center of TND
A Financial Institution in the CN and CLO Zoning Districts, and Neighborhood Center of a TND, shall be limited to a maximum of 5,000 square feet.

d. Zoning Districts – CN and CLO Districts, and Neighborhood Center of TND
A Financial Institution in the CN and CLO Zoning Districts, and Neighborhood Center of a TND, shall be limited to a maximum of 5,000 square feet.

d. Zoning Districts – CN and CLO Districts, and Neighborhood Center of TND
A Financial Institution in the CN and CLO Zoning Districts, and Neighborhood Center of a TND, shall be limited to a maximum of 5,000 square feet.

12. Financial Institution with Drive-Through Facilities
a. Definition
A Financial Institution that includes drive-through teller facilities. [Ord. 2019-005]
b. Approval Process
1) CC District, Commercial Pod of PUD, PDD with CL and CLO FLU, and TMD
A Financial Institution 5,000 square feet or less, and with three drive-through lanes or less, may be allowed subject to DRO Approval, in the following zoning districts: [Ord. 2019-005]
   a) CC;
   b) PDD with CL or CLO FLU designation; and, [Ord. 2019-005]
   c) TMD in the Rural Tier, Exurban Tier, and the Development Area of the AGR Tier. [Ord. 2019-005]
2) CG Zoning District, PDD with CH and CHO FLU, Commercial Pod of PIPD, and TDD
A Financial Institution 5,000 square feet or less in size with three or less drive-through lanes, may be Permitted by Right, in the following zoning districts: [Ord. 2019-005]
   a) CG district; [Ord. 2019-005]
   b) PDD with CH or CHO FLU designation; [Ord. 2019-005]
   c) Commercial Pod of a PIPD; and, [Ord. 2019-005]
   d) the Development Area of an AGR-TMD. [Ord. 2019-005]
3) Single Drive-Through ATM Exception
A maximum of one drive-through ATM lane shall not be considered a drive-through lane for purposes of determining the threshold above. [Ord. 2019-005]
c. Zoning Districts – TDD
Drive-up teller units shall be located in the rear of a building with access from an alley, interior parking area, or a street not designated as a main street.

13. Financial Institution – Freestanding ATM
a. Definition
An entirely automated unstaffed Financial Institution, either located in a stand-alone kiosk or the façade of a building where the owner or tenants have no managerial authority over the operation of the ATM.
b. Zoning Districts – TDD
A Freestanding ATM with a drive-through ATM lane shall be located in the rear of a building with access from an alley, interior parking area, or a street not designated as a main street.
c. Thresholds
All Freestanding ATMs shall be subject to the following requirements:
1) The owner or operator shall maintain at least one manned full-service Financial Institution within Palm Beach County;
2) The structure shall not exceed 100 square feet, excluding canopies provided for decorative aesthetics or protection from weather;
3) Customer access to the interior of the structure shall be prohibited, except for transparent glass security enclosures;
4) Shall not be located within 1,000 feet of another Freestanding ATM. When within a TMD, the 1,000-foot separation distance may be reduced to accommodate a maximum of two freestanding ATMs, provided they are constructed in common public plazas; and,
5) Shall be limited to a maximum of one drive-through ATM lane.

14. Flea Market, Indoor
   a. Definition
   Retail sales within a building permanently enclosed by walls and roof, in which floor space is rented to individual merchants to display and sell goods.

15. Flea Market, Outdoor
   a. Definition
   An outdoor retail sales area in which parcels of land are rented to individual merchants to display and sell goods.

16. Gas and Fuel Sales, Retail
   a. Definition
   An establishment engaged in the sale of gasoline or motor fuels to the general public.
   b. Nonconformities
      1) Automotive Service Station or Convenience Store with Gas Sales
         A prior approval for an Automotive Service Station or Convenience Store with Gas Sales, shall correspond to Retail Gas and Fuel Sales, and any other collocated uses such as Convenience Store, or Light or Heavy Repair and Maintenance.
      2) Approvals Prior to Establishment of Location Criteria
         An Automotive Service Station or Convenience Store with Gas Sales that was a conforming use on the effective date of Ord. No. 2001-029 (August 3, 2001), shall be exempt from the Location Criteria of 1) Intersection Criteria, and 2) Separation Criteria, listed below.
   c. Approval Process – IRO District with CH FLU Designation
      Retail Gas and Fuel Sales located on a parcel with a CH FLU designation within the Core Transect Zone may be allowed subject to DRO approval.
   d. Zoning Districts – TMD
      Retail Gas and Fuel Sales shall only be allowed on sites that are within 500 feet of the perimeter of the development. Gasoline pumps shall be located at the side or rear of a building with access from an alley, interior parking area, or a street not designated as a main street.
   e. Location Criteria
      1) Intersection Criteria
         A maximum of two Retail Gas and Fuel Sales establishments may be allowed at an intersection pursuant to Art. 5.E.2.B, Intersection Criteria.
      2) Separation Criteria
         A Retail Gas and Fuel Sales establishment shall be separated from any other Retail Gas and Fuel Sales establishment pursuant to Art. 5.E.2.C.1, Separation Criteria.
      3) Major Intersection Criteria for CL FLU in U/S Tier
         Retail Gas and Fuel Sales with a CL FLU designation shall comply with Art. 5.E.1, Major Intersection Criteria.
      4) CL FLU in Rural, Exurban, Glades and Agriculture Reserve Tiers
         Retail Gas and Fuel Sales shall be located within 1,000 feet of the intersection of one Collector and Arterial Street, or two Arterial Streets, as listed in the Florida Department of Transportation (FDOT) PBC Federal Functional Classification Table.
      5) WCRA Overlay
         Retail Gas and Fuel Sales is prohibited in the NR, NRM, NG, and NC Sub-areas, per Table 3.B.14.E, WCRAO Sub-area Use Regulations.
   6) Exceptions
      a) I-95 Interchanges
         A parcel with a Commercial High (CH) Future Land Use designation within one-half mile of an I-95 Interchange shall be exempt from the Location Criteria of 1), Intersection Criteria, and 2), Separation Criteria, listed above.
b) **MUPD**
Retail Gas and Fuel Sales located within an MUPD may be exempt from the Location Criteria for 1) Intersection Criteria, and 2) Separation Criteria, where in compliance with the following:

(1) Required perimeter landscape buffers, where located between all Retail Gas and Fuel Sales use areas, including ingress/egress, and any R-O-W or parcel of land with a residential FLU designation or use, unless obstructed from view by other existing structures; and

(2) Direct access from any perimeter R-O-W abutting the MUPD shall be prohibited. All access shall be from entrances established for the overall MUPD, and comply with minimum standards for ingress/egress, stacking, turn-lanes, and pedestrian connectivity.

f. **Accessory Use**
Retail Gas and Fuel Sales may be allowed as an accessory use to Wholesale Gas and Fuel in industrial districts, subject to Class A Conditional Use approval, and the following:

1) Gas and fuel sold retail shall be limited to motor fuels sold wholesale;
2) Maximum of four fueling positions;
3) Maximum of one wall or freestanding sign, where permitted, not to exceed six feet in height, or 25 square feet of sign face area.
4) Wholesale Gas and Fuel Sales may include regional corporate headquarters or maintenance facility for a State-regulated public utility that sells natural gas or other similar fuels.

17. **Green Market**

a. **Definition**
Gathering of vendors for the purpose of selling fresh unprocessed fruit, vegetables, flowers, and consumable items such as coffee, bread and prepared food on a retail basis.

b. **Lot Size**
A minimum of one acre with the exception of lots located in the WCRAO where a minimum of one-half of an acre is required.

c. **Location**
Vehicular access shall be from Arterial, Collector or Local Commercial Streets.

d. **Accessory Uses – Green Market**
A Green Market may be allowed as an accessory use to a Community Vegetable Garden in the WCRAO and CCRT areas subject to DRO approval and the following:  

1) The use shall be operated by a CCRT neighborhood organization or the WCRA;
2) Items for sale shall be limited to those grown or prepared by neighborhood residents.
3) The accessory use and structure shall be limited to 30 percent of the total growing area for the Community Vegetable Garden. [Ord. 2019-005]
4) Shall be limited to the hours of 7:00 a.m. and 7:00 p.m. [Ord. 2019-005]
5) Where a Green Market is allowed as an accessory use to a Community Vegetable Garden, a six-foot-high landscape barrier, which includes but not limited to: a hedge, a vinyl-coated chain link fence with hedge, or an opaque fence shall be provided along any property line that abuts a parcel with a residential FLU designation or residential use. An accessory Green Market to an existing Community Garden, approved prior to the effective date of this amendment, that has complied with the buffer requirements of Art. 7, Landscaping, is not required to provide a six-foot-high landscape barrier. [Ord. 2019-005]

e. **Duration**
The use shall operate no more than three days a week.

f. **Vendor Stands**
The stand shall remain transportable and shall be removed from the site at the close of the market each week. Motor vehicles such as vans or small trucks may be allowed subject to the preceding removal requirements.
18. Hotel or Motel
   a. Definition
      An establishment typically licensed by the State of Florida, used, maintained, or advertised as a
      place where furnished sleeping accommodations are supplied to the guest for a short period of
time.
   b. Approval Process
      1) TMD District – U/S Tier
         The use may be Permitted by Right when located in the CH FLU designation. [Ord. 2020-020]
   c. Zoning District – PO District
      1) An existing Hotel located in the PO District shall be considered a conforming use.
      2) Collocated Hotel
         a) Approval Process – PARK FLU
            A Hotel may be allowed as a collocated use to a PBC Regional Park with a PARK FLU,
subject to Class A Conditional Use approval.
         b) Park Resource Base
            The Regional Park shall include a resource base which promotes heritage tourism, eco-
tourism, or is otherwise planned to attract patrons from a Countywide or greater population
for historical, cultural, scientific, educational, or other similar purposes. Such resource base
shall be operational prior to approval of a Hotel, or approved and permitted concurrently
with a Hotel.
         c) Conceptual Master Plan
            A Hotel shall be a component of a Conceptual Master Plan or equivalent that is approved
by the Board of County Commissioners.
         d) Frontage and Access
            The Regional Park in which a Hotel is located shall have frontage on an Arterial or Collector
Street(s). Vehicular access to a Hotel shall be prohibited from any residential street
abutting the park, unless approved by the BCC as part of the Conditional Use approval for
the Hotel.
         e) Site Plan – Affected Area
            When a Site Plan is not required for the overall park site, the required Site Plan for the
Hotel shall regulate only the Development Area for the Hotel and access related thereto.
   d. Accessory Services
      Hotels and Motels may provide services and facilities, such as food and beverage, recreational,
meeting or conference rooms, ballrooms, and laundry.
19. Kennel, Type 2 (Commercial)
   a. Definition
      A commercial establishment, including any building or land, used for the raising, boarding,
      breeding, sale, or grooming of domesticated animals (e.g., dogs and cats), not necessarily owned
      by the occupants of the premises, for profit.
   b. ACC Permit
      The owner or operator shall obtain Zoning approval prior to application for an ACC Operational
      Permit. A Type 2 Commercial Kennel shall be licensed and regulated in accordance with ACC
      Ordinance No. 98-22, as amended.
   c. Lot Size
      A minimum of two acres.
   d. Frontage
      A minimum of 100 feet fronting on and access from a Collector or Arterial Street.
   e. Outdoor Runs
      1) Setbacks
         Outdoor runs or animal exercise area shall not be located within 50 feet of any property line
         adjacent to a parcel of land with a residential FLU designation or use, or where mixed use is
         required, or 25 feet of any property line adjacent to a non-residential district.
      2) Fencing and Screening
         A minimum six-foot-high safety fence shall be required around outdoor runs. If the safety fence
         is not opaque or screened from view of adjacent properties or R-O-W, a continuous solid
         opaque hedge a minimum of four feet at installation shall be provided around the outdoor
         run/area.
      3) Waste Disposal
         A Type 2 Commercial Kennel shall meet the PBCHD ECR I and ECR II standards and shall be
         subject to all applicable rules and regulations of the FDEP, PBCHD, and SWA.
   f. Accessory Residential Use – AGR District
      A Single Family dwelling unit may be Permitted by Right as an accessory use to a Type 2
      Commercial Kennel in the AGR Zoning District.

20. Kennel, Type 3 (Commercial)
   a. Definition
      A commercial establishment operated entirely within an enclosed building used for the boarding,
      sale, or grooming of domesticated animals (e.g., dogs and cats), not owned by the occupants of
      the premises, for profit.
   b. ACC Permit
      The owner or operator shall obtain Zoning approval prior to application for an ACC Operational
      Permit. A Type 3 Commercial Kennel shall be licensed and regulated in accordance with ACC
      Ordinance No. 98-22, as amended.
   c. Maximum Square Footage
      Shall not exceed 3,000 square feet in the CC and TMD districts, or 7,500 square feet in any other
      zoning district the use is allowed.
   d. Standards
      All use areas shall be within an enclosed building constructed, maintained, and operated so that
      no noise or odor nuisances related to the kennel operations can be detected outside the building.
      With exception to designated drop-off areas, no outdoor runs, playgrounds, walking areas, yards,
      or similar uses shall be permitted.
   e. Waste Disposal
      A Type 3 Commercial Kennel shall meet the PBCHD ECR I and ECR II standards and shall be
      subject to all applicable rules and regulations of the FDEP, PBCHD, and SWA.
21. Landscape Service
   a. Definition
      An establishment engaged in the maintenance or installation of landscaping. [Ord. 2019-039]
   b. Typical On-Site Activities
      Includes administrative office; customer and employee parking; and, storage or parking of
      landscape vehicles, chemicals, fertilizers, landscape materials, and equipment. [Ord. 2019-039]
   c. Typical Off-Site Activities
      May include, but are not limited to: lawn mowing; trimming of vegetation including trees, shrubs, or
      hedges; irrigation; fertilizer application; leaf blowing; landscaping design; maintenance; or, 
      installation. [Ord. 2019-039]
   d. Common Operations Area
      A common area that is shared between the Nursery and the Landscape Service, which may
      include, but is not limited to: drive aisles; customer parking; and, structures that are commonly
      shared between the Nursery and the Landscape Service. It shall not include areas, structures, or
      facilities which serve solely the Landscape Service (On-Site Activities). [Ord. 2019-039]
   e. Nursery Growing Area
      Consists of an area(s) used solely for the propagation, cultivation, growing, storage, and staging of
      plants. [Ord. 2019-039]
   f. Easements
      The Applicant may allocate drainage or street/canal right-of-way easements to the Common
      Operations, Nursery, or Landscape Service Areas based on their proximity to each respective area
      and the purpose and scope of the easement, subject to the approval by the DRO. [Ord. 2019-039]
   g. AR District in RSA
      Shall be permitted subject to applicable requirements of a Home Occupation pursuant to Art.
      4.B.1.E.10, Home Occupation; Art. 4.B.2.C.21.h, Collocated Use; or, as a Principal Use subject to
      the additional requirements as follows: [Ord. 2019-039]
      1) Shall be located on a Collector or Arterial Street; and [Ord. 2019-039]
      2) Shall be on a minimum of three acres. [Ord. 2019-039]
h. AGR-PUD Zoning District Preserve Area

1) Applicability
Landscape Service under this Section shall be permitted only for existing Landscape Service uses, on the following 28 sites, subject to the restrictions contained herein: [Ord. 2020-016]

a) 23 properties within the AGR-PUD Zoning District Preserve Area, as depicted in the list of AGR-PUD Preserve properties attached as Exhibit B in Ordinance No. 2020-016. [Ord. 2020-016]

b) Five additional properties within the AGR Zoning District, as depicted in the list of AGR-PUD Preserve properties attached as Exhibit B in Ordinance No. 2020-016. [Ord. 2020-016]

(1) These five properties shall provide sufficient evidence demonstrating that the Property Owner has entered into a private transactional agreement, such as an assignment agreement or other similar agreement, recorded in the Official Records of PBC prior to January 1, 2019, with the intent of converting the property to the AGR-PUD Zoning District Preserve Area. [Ord. 2020-016]

2) Landscape Service must be compact and contiguous in design and not located in more than two separate locations on a site; and, [Ord. 2020-016]

3) Landscape Service shall be allowed only in conjunction with a Wholesale Nursery and both uses shall be operated under the same ownership. [Ord. 2020-016]

4) Approval Process – Full DRO
a) The DRO shall determine what Agencies will review the proposed application. [Ord. 2020-016]

b) The 23 properties located within the AGR-PUD Zoning District Preserve Area shall submit an application to allow a Landscape Service and be determined to be sufficient by the DRO within 180 calendar days of the effective date of Ordinance No. 2020-016. [Ord. 2020-016]

c) Prior to January 1, 2021, the five properties within the AGR Zoning District shall submit an application and be determined to be sufficient by the DRO, for a rezoning to the AGR-PUD Zoning District Preserve Area. These five properties shall then submit an application to allow the Landscape Service and be determined to be sufficient by the DRO within 60 days of the effective date of the rezoning to the AGR-PUD Zoning District Preserve Area. [Ord. 2020-016]

d) A minimum of 70 percent of the lot area shall be a Wholesale Nursery, and may also include limited areas for Open Space. [Ord. 2020-016]

e) A maximum of 30 percent of the lot area or one and one-half acres, whichever is less, shall include Typical On-Site Activities, Common Operation Areas, and any buildings not associated with the propagation, cultivation, growing, storage, and staging of plants. [Ord. 2020-016]

f) Driveways shall be allocated to either the Wholesale Nursery or Typical On-Site Activities and Common Operation Areas based on their proximity to each respective area, subject to approval by the DRO. [Ord. 2020-016]

5) Location – Access
Minimum access shall be any Legal Access, as defined by Art. 1.H.2, Definitions, that exists at the time of application for use approval. If the existing access is not legal, then minimum access shall be in accordance with Art. 11.E.2.A.2, Minimum Legal Access Requirement, unless a Variance is approved pursuant to Art. 2.B.7.E, Type 2 Variance. [Ord. 2020-016]
i. **Collocated Use**

Shall be allowed only in conjunction with a Retail or Wholesale Nursery, and both uses shall be operated under the same ownership, subject to the following: [Ord. 2019-039]

1) **AGR, AP, CN, CRE, and PO Zoning Districts**

a) **Approval Process – Full DRO**

   (1) A minimum of 50 percent of the lot area shall be Retail or Wholesale Nursery; [Ord. 2019-039]

   (2) A maximum of 30 percent of the lot area or one and one-half acres, whichever is less, shall be Landscape Service (On-Site Activities); and, [Ord. 2019-039]

   (3) The areas designated for Common Operations Area shall be a maximum of 20 percent of the lot area. [Ord. 2019-039]

b) **Approval Process – Class A Conditional Use, except the AGR Zoning District**

   (1) A minimum of 50 percent of the lot area shall be Retail or Wholesale Nursery; [Ord. 2019-039]

   (2) A maximum of 45 percent of the lot area or two acres, whichever is less, shall be Landscape Service (On-Site Activities); and, [Ord. 2019-039]

   (3) The areas designated for Common Operations Area shall be a maximum of 20 percent of the lot area. [Ord. 2019-039]

2) **CC or CG Zoning Districts**

a) **Approval Process – Full DRO**

   (1) A minimum of 50 percent of the lot area shall be Retail and/or Wholesale Nursery; [Ord. 2019-039]

   (2) A maximum of 30 percent of the lot area or one and one-half acres, whichever is less, shall be Landscape Service (On-Site Activities); and, [Ord. 2019-039]

   (3) The area designated for Common Operations Area shall be a maximum of 20 percent of the lot area. [Ord. 2019-039]

3) **IL, IG, and IND/L, COM, or IND/G Pods of a PIPD Zoning District**

   A Landscape Service use may be Permitted by Right when collocated with Wholesale or Retail Nursery. [Ord. 2019-039]

4) **AR/RSA Zoning District**

a) Shall be on a minimum of three acres. [Ord. 2019-039] [Ord. 2020-007]

b) The area(s) designated for Landscape Service (On-Site Activities) shall be a maximum of 30 percent of the Growing Area or one acre, whichever is less. [Ord. 2019-039]

5) AR/USA, RE, RT, RM, RS, UC, UI, CH-MUPD, CH-MXPD, NC-TND, and TMD within the U/S, Rural, or Exurban Tiers

a) Shall be on a minimum of three acres; and [Ord. 2019-039]

b) **Approval Process – Class A Conditional Use**

   (1) The area(s) designated for Landscape Service (On-Site Activities) shall be a maximum of 30 percent of the Growing Area or one acre, whichever is less. [Ord. 2019-039]

6) **Location – Access**

a) **AR/RSA and AR/USA Zoning Districts**

   Minimum access shall be in accordance with Art. 11.E.2.A.2, Minimum Legal Access Requirement, unless a Type 2 Waiver is granted pursuant to Art. 2.B.7.D, Type 2 Waiver. [Ord. 2020-007]

b) **AGR Zoning Districts**

   Minimum access shall be any Legal Access, as defined by Art. 1.H.2, Definitions, that exists at the time of application for Landscape Service use approval. If the existing access is not legal, then minimum access shall be in accordance with Art. 11.E.2.A.2, Minimum Legal Access Requirement, unless a Type 2 Variance is granted pursuant to Art. 2.B.7.E, Type 2 Variance. [Ord. 2020-007]
c) Other Zoning Districts
Minimum access in the RE, RT, RM, RS, UC, UI, CH-MUPD, CH-MXPD, NC-TND, and TMD within the U/S, Rural, or Exurban Tier Zoning Districts shall be in accordance with Art 11.E.2.A.2, Minimum Legal Access Requirement, unless a Subdivision Variance is granted pursuant to Art. 2.B.7.E, Type 2 Variance. [Ord. 2020-007]

j. Hours of Operation
Landscape Service shall be prohibited to operate on Sundays within the Agricultural Residential (AR) Zoning District. [Ord. 2019-039]

k. Landscape Buffer
A Compatibility Buffer shall not be required if the use is adjacent to a property with an existing agriculture use pursuant to Art. 4.B.6, Agricultural Uses. [Ord. 2018-018] [Ord. 2019-039]

1) AGR and AP Zoning District
R-O-W and Incompatibility Buffers shall be required in accordance with the requirements for the Wholesale or Retail Nursery. [Ord. 2019-039]

l. Yard Waste Storage
Landscape Service with storage of yard waste shall front on a Collector or Arterial Street, and shall comply with the following requirements:

1) Setbacks
Loading and service areas shall be located a minimum of 50 feet from all property lines and 100 feet from adjacent property with residential use or FLU designation.

2) Standards
a) Only one yard waste storage area shall be permitted on site;

b) Shall not exceed 30 by 40 feet;

c) Yard waste shall be screened on three sides by a wall with a maximum height of 12 feet. The open end of the wall shall not face any property with residential use or FLU designation;

d) Yard waste piles shall not exceed the height of the wall;

e) Surface of the storage area shall be paved with concrete and have positive drainage; and,

f) Yard waste that is not generated by the Landscape Service shall be prohibited on site.

m. Home Occupation
A limited Landscape Service, not including yard waste or landscape installation services, may be allowed as a Home Occupation subject to the requirements of Art. 4.B.1.E.10, Home Occupation. [Ord. 2018-018]

1) Exception – AR/RSA Zoning District
A limited Landscape Service on a lot three acres or more may be allowed as follows: [Ord. 2018-018]

a) Subject to DRO approval through the ZAR process prior to issuance of a Business Tax Receipt; [Ord. 2018-018]

b) A maximum of three persons living outside of the home may be employed under the DRO approval. [Ord. 2018-018]

c) Outdoor Storage shall be limited to equipment such as lawnmowers, hedgers, weed eaters, and a small trailer. Storage shall not include heavy equipment such as bobcats, loaders, dump trucks, or heavy equipment trailers. [Ord. 2018-018]

d) Storage areas shall be screened from view from any R-O-W or parcel of land with a residential FLU designation or use through the use of opaque fences, walls, or existing or newly planted native vegetation. [Ord. 2018-018]

e) Parking spaces shall be provided for every employee in addition to the spaces required for a Single Family. All vehicle parking or storage areas shall utilize improved surfaces such as asphalt, pavement, or shell rock. [Ord. 2018-018]

2) Home Occupation having Landscape Service shall be exempt from the Incompatibility Buffer requirements. [Ord. 2018-018]
22. Laundry Service
   a. Definition
      An establishment that provides washing, drying, dry-cleaning, or ironing services or machines to be used by customers on the premises, or that is engaged in providing cleaning services.
   b. Typical Uses
      A Laundry Service may include but is not limited to coin laundry establishments, laundromats, neighborhood cleaners and dry cleaners, and industrial cleaning facilities serving commercial cleaners or the hospitality industry.
   c. Approval Process
      1) In all commercial zoning districts including Commercial Pod of PIPD and PUD, where the use is allowed, the use may be:
         a) Permitted by Right if less than 3,000 square feet of GFA.
         b) Allowed subject to DRO Approval if less than 5,000 square feet of GFA.
      2) Industrial Districts, Except Commercial Pod of a PIPD
         May be allowed subject to DRO approval if less than 15,000 square feet of GFA.
   d. Zoning District – CN
      The use shall not exceed 3,000 square feet of GFA.
   e. Zoning Districts – Industrial Except Commercial Pod of a PIPD
      1) The use shall be limited to facilities serving the hospitality industry and commercial cleaner centers; and
      2) Shall not include customer drop-off or pick-up on-site, or utilize customer-operated machinery.
   f. Business Vehicles
      Shall not be parked or stored in required parking spaces.
   g. Environmental Approval
      Prior to issuance of a Building Permit, Laundry Service Permitted by Right shall provide documentation demonstrating that the use is approved by ERM.
23. Marina
   a. Definition
      A commercial establishment related to boating, located on a navigable waterway.
   b. Typical Uses or Activities
      A Marina may include, but is not limited to servicing, fueling, pumping-out, chartering, launching, dry-storage of boats and boating equipment, dockage, yacht clubs, charter boat operations, and boatels.
   c. Setbacks
      Dry storage of boats and other Marina related uses may be set back zero feet from the water's edge.
   d. Boatel Units
      A boat used as a hotel or motel unit. The total number of units shall be prorated on the basis of one unit per 1,000 square feet of dry land.
   e. Boat Facility Siting Plan
      Any marine facility with five or more slips shall comply with the Boat Facility Siting Plan of the Palm Beach County Manatee Protection Plan.
24. Medical or Dental Office
   a. Definition
      An establishment where patients, who are not lodged overnight, are admitted for examination, elective surgical care, immediate but not emergent care or treatment by persons practicing any form of healing or health-building services whether such persons be medical doctors, chiropractors, osteopaths, podiatrists, naturopaths, optometrists, dentists, or any such profession, the practice of which is lawful in the State of Florida.
   b. Typical Uses
      A Medical or Dental Office may include, but is not limited to, an Ambulatory Surgical Center or urgent care center.
   c. INST FLU Designation
      A Medical or Dental Office may be allowed subject to DRO approval, within the boundaries of the following five Site Specific FLUA amendments:
      3) SCA 2009-002, Atlantic/Sims Medical Office, Ord. No. 2009-008;
4) LGA 2010-014, Suess Institutional (Southern & Seminole Pratt and Whitney), Ord. No. 2010-031; and,
5) LGA 2012-002, AGR Boynton Beach Institutional, Ord. No. 2012-017.

d. **Zoning Districts – CN, CLO, and CHO**
   Permitted by Right when not exceeding 3,000 square feet of GFA. [Ord. 2018-018]

25. **Microbrewery**
   a. **Definition**
      An indoor establishment engaged in the production and packaging of alcohol for distribution, wholesale or retail on or off premise.
   
   b. **Approval Process**
      1) A Microbrewery limited to 5,000 square feet of GFA, where allowed in commercial and mixed use zoning districts, may be Permitted by Right; or
      2) A Microbrewery located in the CG Zoning District or in a TDD or PDD with a CH FLU designation, may be Permitted by Right when in compliance with the separation distance below.

   c. **Zoning Districts – Commercial and Mixed Use Zoning Districts**
      Where permitted, Microbreweries shall be subject to the following:
      
      1) **Commercial Districts**
         No more than 50 percent of the total GFA shall be used for brewery manufacturing or production, including packaging with the balance consisting of office, retail sales and taprooms, or other permitted collocated uses.
      
      2) **Industrial Districts**
         No more than 30 percent of the total GFA shall be used for accessory office, retail sales, or taprooms.

   d. **Accessory Uses – Taproom**
      A Microbrewery where allowed in industrial zoning districts, FLU, and Pods, excluding the Commercial Pod of a PIPD, may include a taproom, subject to the following:
      
      1) A taproom shall be limited to the purchasing or consumption of alcoholic beverages produced on-site;
      2) Guest taps, consisting of alcohol not produced on-site, may be allowed in conjunction with a tap room not to exceed 30 percent of the number of taps or on-site production;
      3) Food service may be permitted; and,
      4) Hours of operation shall be limited from 5:00 p.m. to 10:00 p.m. weekdays and 11:00 a.m. to 10:00 p.m. weekends.

   e. **Separation Distance**
      1) A Microbrewery with accessory taproom shall not be located within 500 feet from a School as required by F.S. § 562.45, as periodically amended.
      2) A Microbrewery in an MUPD with a CL FLU designation shall be separated a minimum of 750 feet from another Microbrewery.

26. **Office, Business or Professional**
   a. **Definition**
      An establishment providing executive, management, administrative, or professional services.
   
   b. **Typical Uses**
      A Business or Professional Office may include but is not limited to property and financial management firms; employment, travel, advertising, or real estate agencies; pay day lending offices, check cashing services and currency exchange agencies; contract post offices; professional or consulting services; and, business offices of private companies, utility companies, public agencies, and trade associations.
   
   c. **Approval Process**
      The use may be Permitted by Right if limited to the following:
      
      1) A maximum of 10,000 square feet of GFA per parcel in the CN Zoning District.
      2) A maximum of 15,000 square feet of GFA per parcel in the CLO Zoning District.
      3) A maximum of 20,000 square feet of GFA per parcel in the CC Zoning District.
d. Employment Agencies
Business or Professional Offices that include employment agencies for temporary day or manual labor service for the construction, maintenance, agricultural or industrial trades, shall be subject to the additional standards:

1) **Westgate Overlay**
   Shall be prohibited within the boundaries of the WCRAO, as per Table 3.B.14.E, WCRAO Sub-area Use Regulations.

2) **Outdoor Activities**
   Outdoor loitering, waiting, or seating shall be prohibited on site. Outdoor seating areas may be allowed provided the site includes one or more architectural focal points such as fountains, architectural shaded structures, or gazebos.

e. **Accessory Office**
   Business or Professional Office Supplementary Use Standards shall not apply to:
   1) A temporary office in temporary structures associated with the construction of a building or real estate sales;
   2) Areas of a building dedicated to the administrative operation of a use listed in the Use Matrix.

27. **Parking, Commercial**
   a. **Definition**
      An establishment used for temporary parking or storage for motor vehicles as a principal use, for a fee.
   b. **Proximity to Residential**
      Commercial Parking shall not be located within 200 feet of a parcel of land with a residential FLU designation or use, except as follows:
      1) The perimeter landscape buffer along the applicable lot line complies with the minimum standards for a Type 3 Incompatibility Buffer; and
      2) Building openings used by vehicles and unglazed architectural openings shall not face a parcel of land with a residential FLU designation or use.
   c. **Access**
      Access from a Residential Street shall be prohibited.

28. **Pawnshop**
   a. **Definition**
      An establishment at which a pawnbroker, as defined in F.S. § 539.001(2)(i), does business.
   b. **Separation Distance**
      Shall be located a minimum of 2,000 feet from another pawnshop.
   c. **Setbacks**
      Shall be set back a minimum of 150 feet from any parcel of land with a residential FLU designation or use.
   d. **Hours of Operation**
      Shall not be open to the public prior to 7:00 a.m. or later than 10:00 p.m. daily.

29. **Personal Services**
   a. **Definition**
      An establishment engaged in the provision of recurrent services of a personal nature, or, the provision of informational, instructional, personal improvement or similar professional services.
   b. **Typical Uses**
      Personal Services may include but are not limited to art, music and driving schools, beauty salon, barbershops, licensed therapeutic massage studios, photography studios, spas, saunas, tattoo parlors, diet and weight reducing centers, pet grooming, and tanning salons.
   c. **Approval Process – CN District**
      The use may be Permitted by Right in the CN Zoning District, when limited to 3,000 square feet of GFA.
   d. **Accessory Use**
      Personal Services may be Permitted by Right as accessory to Business or Professional Office; or Medical or Dental Office in CLO and CHO Zoning Districts and PDDs with CLO and CHO FLU designation.
   e. **Sale or Dispensing of Controlled Substances**
      The limited accessory retail sale of products does not include the sale or dispensing of controlled substances, unless in compliance with the requirements for Medical or Dental Office, or General Retail Sales.
30. Repair and Maintenance, Heavy
   a. Definition
      An establishment engaged in the repair and maintenance of automobiles, recreational vehicles,
      boats, motorcycles, personal watercraft; or the repair and maintenance of heavy equipment or
      machinery, commercial vehicles or trailers, marine vessels, or similar; or media blasting, paint
      stripping, and paint or body work.
   b. Typical Uses
      Heavy Repair and Maintenance may include but is not limited to:
      1) Machine shops, welding services, engine and transmission shops, radiator shops;
      2) Paint or body shops, collision damage repairs and frame straightening, fiberglass repair, media
         blasting or paint stripping, powder coating, and steam cleaning;
      3) Garages for general engine type repair including rebuilding, repairing or removing engines,
         transmissions, starters, alternators, radiators, air conditioners, compressors, brake systems,
         hydraulics, fuel systems, cooling systems, exhaust, electrical or electronic systems, propulsion
         systems, drive train, and steering systems; or,
      4) Any Light Repair and Maintenance Use, which involves any of the above or requires outdoor
         storage or activities.
   c. Overlays – Westgate Community Redevelopment Area Overlay (WCRAO)
      Heavy Repair and Maintenance uses are prohibited in the NR, NRM, NG, and NC Sub-areas, as
      outlined in Table 3.B.14.E, WCRAO Sub-area Use Regulations.
   d. Setbacks
      No repair or maintenance building, structure or activity shall be allowed within 100 feet of a parcel
      of land with a residential FLU designation or use.
   e. Nuisances
      1) Enclosed Repair Activities
         All repair and maintenance activities shall be conducted within an enclosed structure, except
         in the IL and IG districts, and PDDs with an IND FLU designation, where in compliance with
         Art. 5.B.1.A.3, Outdoor Storage and Activities.
      2) Vehicle or Equipment Testing on Residential Streets
         Testing of vehicles or equipment shall be prohibited on residential streets.
   f. Outdoor Parking or Storage
      1) The outdoor storage of disassembled vehicles, equipment or parts shall be prohibited, except
         in the IL and IG districts, and PDDs with an IND FLU designation.
      2) All vehicles or equipment shall be parked in designated storage areas, except for the following:
         a) Automobiles dropped off by customers may be temporarily parked in designated parking
            spaces, not to exceed a maximum of one 24-hour period; and
         b) Automobiles placed for customer pickup may be temporarily parked in designated parking
            spaces, not to exceed a maximum of one 24-hour period.

31. Repair and Maintenance, Light
   a. Definition
      An indoor establishment engaged in the minor repair or maintenance of automobiles, light duty
      commercial vehicles rated one ton capacity or less, boats, motorcycles, personal watercraft, golf
      carts, mopeds, lawn mowers, major household appliances, or household furniture.
   b. Typical Uses
      Light Repair and Maintenance establishments may include but are not limited to tune-up stations,
      glass shops, quick-lube stations, muffler shops, upholstery shops, tire installation and service,
      alignment shops, replacement of brake linings, and lawn mower repair and maintenance.
   c. Overlay – Westgate Community Redevelopment Area Overlay (WCRAO)
      Light Repair Maintenance uses are prohibited in the NR, NRM, NG, and NC Sub-areas, as outlined
      in Table 3.B.14.E, WCRAO Sub-area Use Regulations.
   d. Zoning Districts – CN and CC District and Commercial Pod of PUD
      Shall be limited to a maximum of 5,000 square feet of GFA.
   e. Accessory Use
      Light Repair and Maintenance may be Permitted by Right as an accessory use to Heavy Repair
      and Maintenance.
   f. Setbacks
      No repair or maintenance building, structure or activity shall be allowed within 100 feet of any parcel
      of land with a residential FLU designation or use.
g. Nuisances
   1) Enclosed Repair Activities
      All repair and maintenance activities shall be conducted within an enclosed structure.
   2) Vehicle or Equipment Testing on Residential Streets
      Testing of vehicles, equipment or other similar shall be prohibited on residential streets.

h. Outdoor Parking or Storage
   1) The outdoor storage of disassembled vehicles, equipment or parts shall be prohibited.
   2) All vehicles or equipment shall be stored in designated storage areas, except for the following:
      a) Automobiles dropped off by customers may be temporarily parked in designated parking spaces, not to exceed a maximum of one 24-hour period; and
      b) Automobiles placed for customer pickup may be temporarily parked in designated parking spaces, not to exceed a maximum of one 24-hour period.

32. Repair Services, Limited
   a. Definition
      An establishment engaged in the minor repair of personal apparel or household appliances, and similar items.
   b. Typical Uses
      Limited Repair Services may include but are not limited to apparel repair and alterations, small appliance repair (excluding major appliances such as washers and dryers, refrigerators, stoves and dishwashers), bicycle repair, clock and watch repair, and shoe repair shops.
   c. Zoning Districts – CN District, Commercial Pod of PUD, and TND Neighborhood Center
      Shall be limited to a maximum of 3,000 square feet of GFA.
   d. Enclosed Repair Activities
      All repair activities shall be conducted within an enclosed structure.
   e. Storage
      Outdoor storage shall be prohibited.

33. Restaurant, Type 1
   a. Definition
      An establishment equipped to sell food and beverages in one of the following methods: drive-through sales to patrons in automobiles for takeout who place orders through a window or remote transmission device; or sales to patrons for takeout or dining in, that includes three or more of the following: food or beverage choices are advertised on a menu board; countertop sales where payment is made prior to consumption; disposable containers and utensils; limited service dining facilities with no hostess or waiters; and, self-service or prepackaged condiments.
   b. Approval Process
      1) DRO Approval
         A Type 1 Restaurant without a drive-through where the use is allowed provided the GFA including outdoor dining areas does not exceed 5,000 square feet.
      2) Permitted by Right
         A Type 1 Restaurant without a drive-through or located in an out parcel, may be Permitted by Right in any PDD or TDD with a commercial or institutional FLU designation, or Pod; the Commercial or Recreation Pod of a PUD, MHPD, or RVPD; and, all commercial zoning districts, provided the GFA including outdoor dining areas does not exceed 1,500 square feet.
   c. Tier Specific – Exurban and Rural
      A Type 1 Restaurant shall comply with the following:
      1) Shall not be the sole use on the property;
      2) Shall be located in an MUPD or TDD;
      3) Shall not have direct ingress/egress to an adjacent Arterial or Collector Street. Ingress/egress shall be from the interior of the overall vehicular circulation system for the development or interior streets, whichever is applicable; and,
      4) Shall comply with the design requirements outlined under Art. 4.B.2.C.33.f.3), Location Criteria, Exceptions.
   d. Zoning Districts – TMD
      A Type 1 Restaurant shall be limited to:
      1) 5,000 square feet of indoor dining area, for a maximum of 6,500 square feet of GFA.
      2) Located in an outparcel or freestanding building; or
      3) A drive-through, unless it is located in the rear of a building, with access from an alley or the interior of a parking area, and is covered by a canopy or the second story of a building.
e. **Accessory Alcohol Sales**
   A Type 1 Restaurant may include the on-premises sale, service and consumption of alcoholic beverages as an accessory use.

f. **Location Criteria**
   A Type 1 Restaurant with a drive-through shall be subject to the following:
   1) **Intersection Criteria**
      A maximum of two Type 1 Restaurants shall be permitted at an intersection in accordance with Art. 5.E.2.B, Intersection Criteria.
   2) **Separation Criteria**
      A Type 1 Restaurant shall be separated from any other Type 1 Restaurant in accordance with Art. 5.E.2.C.2, Separation Criteria.
   3) **Exceptions**
      a) **Design Criteria**
         A Type 1 Restaurant may be exempt from the location criteria if the site is designed to:
         - address the additional trips associated with a drive-through restaurant; as well as enhance pedestrian circulation, safety and accessibility while limiting vehicular circulation using exemplary site design and architectural treatment that incorporates the following:
           1) Drive-through facilities, including queuing and by-pass lanes that run parallel and are visible from adjacent streets, shall provide additional landscaping to mitigate views of the vehicular use areas.
           2) If located in a non-residential Planned Development District or a Commercial Pod, all the required parking spaces shall be located in close proximity to the restaurant that they serve. Required parking shall not be separated from the restaurant main entrance by a distance of more than 150 feet. The Applicant may request an increase to this distance up to a maximum of ten percent of the dimensional requirement through a Type 1 Waiver;
           3) If located in Standard Zoning Districts and required by the Zoning Director, cross-access shall be provided to all abutting parcels that have commercial FLU designation. If required, the cross-access easement shall be recorded prior to Final Approval by the DRO. The Zoning Director may elect not to require the cross-access easement based on review of the existing or approved use for the abutting property.
           4) Consideration shall be given to site design that promotes a safe pedestrian environment and addresses vehicular circulation and maneuvering. A restaurant located on a single parcel with a Standard Zoning District is allowed continuous vehicular circulation:  
              (a) on all four sides of the building if the site is limited to only one access point to the subject property; or
              (b) on all three sides of the building if site is limited to two access points to the subject property.
           5) Landscape plans and architectural elevations shall be required as part of any application for a Conditional Use, or any DOA affecting the items listed herein.
      b) **MUPD**
         A Type 1 Restaurant located within an MUPD may be exempt from the Location Criteria of 1) Intersection Criteria, 2) Separation Criteria, where in compliance with the following:
         1) Required perimeter landscape buffers, where located between all Type 1 Restaurant areas, including ingress/egress, and any R-O-W or parcel of land with a residential FLU designation or use, unless obstructed from view by other existing structures; and
         2) Direct access from any perimeter R-O-W abutting the MUPD shall be prohibited. All access shall be from entrances established for the overall MUPD, and comply with minimum standards for ingress/egress, stacking, turn-lanes, and pedestrian connectivity.
   g. **Major Intersection Criteria for CL FLU**
      A Type 1 Restaurant with a CL FLU designation shall comply with Art. 5.E.1, Major Intersection Criteria, unless the restaurant meets the requirements of one or more of the following: Art. 4.B.2.C.33.b.1), DRO Approval, Art. 4.B.2.C.33.b.2), Permitted by Right, is located within a TMD, or complies with the design requirements outlined under Art. 4.B.2.C.33.f.3), Exceptions.
   h. **Outdoor Dining**
      Shall comply with the principal structure setbacks.
34. Restaurant, Type 2
   a. Definition
   An establishment with no drive-through, equipped to sell food and beverages, served and consumed primarily on the premises, that includes three or more of the following: host or hostess assists patrons upon entry; food and beverage choices are offered from a printed menu provided by wait staff at a table; orders are taken at the table; food is served on dishes and metal utensils are provided; and, payment is made after meal consumption.
   
b. Approval Process – DRO Approval
   1) CLO and CHO Districts; PDDs with a CLO or CHO FLU; TNDs NC
      A Type 2 Restaurant less than 3,000 square feet of GFA per establishment including outdoor dining areas, may be approved by the DRO, provided the total of all Type 2 Restaurants do not exceed 30 percent of the GFA of the development.
   2) CHO District; and PDDs with a CHO FLU
      If contained in an office, hotel, or motel structure that does not exceed 30 percent of the GFA of the structure, or 5,000 square feet, whichever is less, may be approved by the DRO.
   3) CRE District; PDDs with a CL or CR FLU; PUD Commercial Pods and PIPD Commercial Pod
      A Type 2 Restaurant less than 5,000 square feet of GFA per establishment, including outdoor dining areas, may be approved by the DRO.
   
c. Zoning Districts – TND and TMD
      Take out windows designed for vehicular use are prohibited unless located in the rear of a building, with access from an alley or the interior of a parking area, and covered by a canopy or the second story of a building.
   
d. Accessory Alcohol Sales
      A Type 2 Restaurant may include the on-premises sale, service and consumption of alcoholic beverages as an accessory use.
   
e. Accessory Take Out Service
      Take out service may be allowed as an accessory use provided there are no vehicle take out windows that include exterior menu boards, queuing lanes or order services.
   
f. Outdoor Dining
      Shall comply with the principal structure setbacks.

35. Retail Sales
   a. Definition
      An establishment providing general retail sales or rental of goods, but excluding those uses specifically classified as another Use Type.
   
b. Typical Uses
      Retail Sales may include but are not limited to clothing stores, bookstores, business machine sales, food and grocery stores, window tinting, marine supply sales (excluding boat sales), auto accessories and parts, building supplies and home improvement products, monument sales, printing and copying, pharmacies and medical marijuana dispensing facilities. Uses shall also include the sale of bulky goods such as household goods, lawn mowers, mopeds. [Ord. 2017-028]
   
c. Zoning Districts
   1) TND District
      In a Neighborhood Center, Retail Sales shall not exceed 5,000 square feet of GFA per establishment.
      a) A maximum of 40,000 square feet of GFA for a food store or 20,000 square feet of GFA for a food store when the TND is developed as part of a TTD.
      b) In a Multifamily building with more than 50 units, a “corner store” may be allowed, provided it does not exceed 1,000 square feet of GFA and is integrated into the building and at a corner location.
   2) TMD District
      a) In a TMD, a single establishment shall not exceed the following:
         (1) 100,000 square feet of GFA in the U/S Tier;
         (2) 50,000 square feet of GFA in the Exurban and Rural Tiers; and,
         (3) 65,000 square feet of GFA in the AGR.
      b) A drive-through facility for a drug store is allowed subject to the following:
         (1) If located in the rear of a building;
(2) Access shall be from an alley, an interior parking area, or a street not designated as a Main Street; and,

(3) The drive-through facility shall be covered by a canopy or the second story of a building.

3) **CN District**
   Shall be limited to a maximum of 3,000 square feet of GFA per establishment.

d. **Outdoor Display Areas – Monument Sales**
   An outdoor display area for the Retail Sale of monuments, gravestones, markers, or headstones for placement on graves shall be exempt from the provisions in [Art. 5.B.1.A.3, Outdoor Storage and Activities](#) when located in a designated display area on the Final Site Plan.

e. **Fireworks**
   The retail sale or storage of fireworks as a principal use in any commercial district is prohibited. [Ord. 2018-002]
   1) **Exception**
      Temporary sale of sparklers, subject to a DRO approval through the ZAR process.

f. **Sale or Dispensing of Controlled Substances – Pharmacy**
   A pharmacy shall be subject to the following:
   1) No more than 15 percent of the total number of prescriptions filled within a 30-day period can be derived from the sale of controlled substances that are identified in Schedule II in accordance with F.S. § 893.03, and as further amended by F.S. § 893.035, F.S. § 893.0355, or F.S. § 893.0356, as determined by audits or information provided through the Florida Department of Health or any other government agency having the legal right to view such records.

g. **Collocated Use**
   A Retail Sales use may be Permitted by Right in the IL, IG, PO, IPF Zoning District or MUPD with an INST FLU designation when collocated to an Animal Shelter. [Ord. 2018-018]

h. **Unmanned Retail Structure**
   An unmanned structure which stores or dispenses items for sale, rent, or customer pick up.
   1) **Definition and Typical Uses**
      a) **Freestanding**
         Includes Unmanned Retail Structures that are not attached to a building and located further than 15 feet from the nearest principal structure.
      b) **In-Line**
         Includes Unmanned Retail Structures that are adjacent to, attached to, or located within 15 feet of a principal structure, and not separated by vehicular access drives.

   2) **Accessory Use – Industrial Zoning Districts**
      May be allowed as an accessory use to Data and Information Processing, Research and Development, Government Services, or Wholesaling.

   3) **Size**
      Shall not exceed 150 square feet, excluding canopies provided for decorative aesthetics or protection from weather.

   4) **Number**
      Shall not exceed one per development.

   5) **Design Standards**
      Shall not encroach any required site design elements, including but not limited to: drive aisles, easements, landscaping, parking spaces, and ADA paths.
      a) **Freestanding**
         (1) Shall achieve architecturally compatibility with the other structures in the development, including texture, paint and similar building materials.
         (2) Shall be limited to one story, not to exceed 15 feet in height.
      b) **In-Line**
         (1) Shall not exceed eight feet in height, or nine feet if including a weather protection canopy.
         (2) Shall not obstruct more than 20 percent of the windows.

   6) **Signage**
      a) **Freestanding**
         Wall signs may be allowed for buildings that meet the requirements for [Art. 5.C.1.H.1.a, Guidelines for Non-Residential Design Elements](#).
b) In-Line
Shall be limited to a maximum of 20 percent of each side’s facade of the structure, or a maximum of four square feet, per side, whichever is less.

i. Medical Marijuana Dispensing Facility
1) Definition
A facility, operated by a Medical Marijuana Treatment Center (MMTC) in accordance with the Florida Department of Health as a medical marijuana dispensing facility that dispenses medical marijuana to qualified patients or caregivers. A medical marijuana dispensing facility does not prepare, transfer, cultivate or process any form of marijuana or marijuana product. [Ord. 2017-028]
2) Location
Medical marijuana dispensing facility shall not be located within 500 feet of an existing Elementary or Secondary School, unless approved as a Type 2 Waiver. [Ord. 2017-028]

36. Rooming and Boarding House
a. Definition
A Single Family dwelling with lodging for a maximum of up to five persons, where meals may or may not be regularly prepared and served, and facilities such as kitchen and bathrooms may be shared with other residents.
b. Zoning District
A Rooming and Boarding House shall only be allowed in the RM Zoning District with an HR FLU designation.
c. Dwelling Modifications
Only exterior alterations necessary to assure safety of the structure or enhance the compatibility with the surrounding neighborhood. A Single Family dwelling may require structural or other modifications to ensure compliance with the applicable Building Code and Fire-Rescue regulations.

37. Self-Service Storage
a. Definition
A facility consisting of individual, self-contained units that are leased for the storage of business, household, or other personal goods.
1) Types Permitted
Self-Service Storage facilities may include but are not limited to Limited or Multi Access storage units, with or without Outdoor Storage areas, limited to the storage of personal or household goods, automobiles, recreational vehicles, boats, or personal watercraft, only, subject to the following:
a) Limited Access
Limited Access is a Self-Service Storage facility with limited access points from the exterior of the building to interior halls that serve individual storage units.
b) Multi-Access
Multi-Access is a one-story Self-Service Storage facility with multi-access points from the exterior of the building to individual storage units.
b. Overlay – Westgate Community Redevelopment Area Overlay (WCRAO)
Self-Service Storage is prohibited in the NR, NRM, NG, and NC Sub-areas, as outlined in Table 3.B.14.E, WCRAO Sub-area Use Regulations.
c. Zoning Districts – Commercial Pod of PUD or Neighborhood Center of TND
Self-Service Storage in Commercial Pods of a PUD or Neighborhood Center of a TND, shall be limited as follows:
1) Maximum of 50 percent of the overall GFA; and
2) Multi-Access shall be prohibited; and
3) Outdoor Storage shall be limited to a maximum of 30 percent of overall Self-Service Storage building square footage.
d. Accessory Uses – Industrial Districts
Where permitted in industrial districts, a Self-Service Storage use may include accessory retail use, limited to the rental and sale of retail items used for moving and storage, such as hand trucks, cartons, tape and packing materials.
e. Architecture
1) Storage Access or Storage Unit Door Screening
Access points and storage unit doors shall be screened from all public streets, residential uses, or vacant parcels with a residential FLU designation, through the use of buildings, walls,
opaque vehicular gates which primarily remain closed, or other similar barriers. [Ord. 2018-002]

2) Fenestration
The use of fenestration that allows visibility of storage unit doors or is designed in conjunction with interior signage, logos, lighting, or paint schemes intended to expand permitted exterior signage shall be prohibited. [Ord. 2018-002]

f. Landscaping – Incompatibility Buffer Screening Requirements
Where an Incompatibility Buffer is required, the minimum six-foot screening requirement may be waived, subject to the following:

1) Facades
The exterior facades of storage structures present an unbroken, wall-like appearance when seen from adjacent lots and streets.

2) Wall
Separate storage structures are connected by a solid opaque wall to give the appearance of structural continuity. This option may be permitted where Fire-Rescue may require access for emergency purposes upon demonstration that any required gates are designed and constructed to provide the same visual barrier as the required wall.

3) Access Isles
No aisle-ways or other vehicle access ways are located in the area between the building and the adjacent property line.

g. Storage
1) Hazardous Materials Prohibited
The storage of flammable, hazardous or explosive materials, goods or products shall be prohibited.

2) Outdoor Storage Standards
Outdoor storage shall be subject to the following:

a) Permitted Vehicles
Shall be limited to the storage of vehicles of the type customarily maintained by households for personal use such as recreational vehicles or pleasure boats, or a Home Occupation Vehicle.

b) Location
The storage shall occur only within a designated area.

c) Storage Area
The storage area shall not exceed 50 percent of the lot area.

d) Screening
The storage area shall be completely screened from view from adjacent properties and public streets by landscaping, fences, walls or buildings.

e) Mobility
All vehicles and trailers shall be licensed for use on public streets. Other vehicles, including recreational vehicles, boats and personal watercraft, shall be stored on wheeled trailers.

f) Repair Prohibited
Vehicle repair shall be prohibited.

h. Supplemental Circulation Standards for Multi-Access Facilities
1) Interior
The minimum width of aisle ways between storage structures shall be 20 feet for one-way traffic, and 30 feet if two-way traffic.

2) Flow
Traffic flow patterns in aisle ways shall be clearly marked. Markings shall consist at a minimum of standard directional signage and painted lane markings with arrows.

i. Business Uses Prohibited
Businesses shall be prohibited from operating within any Self-Service Storage facility or storage unit or outdoor storage area, except as follows:

1) Storage of Business Goods
A storage unit shall not be used to store inventory, equipment or material required on a daily or recurring basis necessary for a business trade or occupation.

2) Home Occupation Vehicles
A maximum of one business related vehicle per storage customer a maximum of 8,000 pounds curb weight may be stored in a Multi-Access storage unit or outdoor storage area.
38. Single Room Occupancy (SRO)
   a. Definition
   An establishment with lodging for five or more persons housed in individual rooms, where meals may or may not be regularly prepared and served, and facilities such as kitchen and bathrooms may be shared with other residents. [Ord. 2020-020]

39. Theater and Performance Venue
   a. Definition
   An establishment that hosts live performances, viewings, seminars, or exhibitions.
   b. Typical Uses
   Typical uses may include but are not limited to movie theaters, theaters, conference centers, and exhibition halls.
   c. Approval Process
   May be Permitted by Right if it is indoor and less than 15,000 square feet of GFA, and located in the zoning districts where the use is allowed, unless stated otherwise. [Ord. 2020-020]
   d. Building Area – CN Zoning District
   Shall be limited to 3,000 square feet of GFA.

40. Vehicle or Equipment Sales and Rental, Heavy
   a. Definition
   An establishment engaged in the sale, retail or wholesale, rental, or lease of new or used mobile homes or commercial vehicles, as may be defined by the Florida Department of Motor Vehicles, or equipment, including but not limited to the following: heavy trucks, truck tractors, road tractors, straight trucks, special mobile equipment, buses, school buses, farm tractors, farm implements, heavy equipment including construction and earth moving equipment, trailers, and semitrailers.
   b. Typical Uses
   Typical uses include independent dealers, franchise dealers, wholesale dealers, or mobile home dealers or brokers, or, moving truck or trailer rental, construction or farm equipment sales or rental yards, and large implement sales or rental.
   c. Approval Process
      1) Moving Truck and Trailer Rental
         Moving Truck and Trailer Rental, limited to a maximum of five vehicles per lot, may be permitted as an accessory use to Retail Gas and Fuel Sales or a Large Scale Commercial Development, subject to DRO approval.
      2) IL District, MUPD with IND FLU Designation, and Light Industrial Pod of a PIPD – Rental Equipment
         The rental of construction equipment, moving trucks or trailers, farm equipment, and farm implement and machinery sales and rental uses may be allowed subject to DRO approval.
      3) Rural Tier Farm Equipment – MUPD with CL FLU Designation
         Heavy Vehicle or Equipment Sales and Rental limited to farm equipment that supports the residents of the Rural Tier may be allowed in an MUPD with a CL FLU designation, subject to Class A Conditional Use approval.
   d. Overlay – Westgate Community Redevelopment Area (WCRA) Overlay
      Heavy Vehicle or Equipment Sales and Rental is prohibited in the NR, NRM, NG, and NC Sub-areas, as per Table 3.B.14.E, WCRAO Sub-area Use Regulations.
   e. Lot Size
      1) Commercial Districts
         A minimum of three acres.
      2) IL District
         A minimum of one acre.
   f. Accessory Uses
      1) Accessory Retail Sales
         Retail sale of parts may be provided as an accessory use.
      2) Accessory to Heavy Repair and Maintenance
         Limited Heavy Vehicle Sales and Rental, may be permitted as an accessory use to Heavy Repair and Maintenance facilities, subject to DRO approval, and the following:
         a) Limited to the display or advertising of a maximum of five vehicles per lot.
         b) All storage spaces shall be located indoors, or set back a minimum of 100 feet from the front and side street property lines, or in a location which is screened from view from any public street by a combination of buildings or walls, or opaque fences or landscaping.
         c) Vehicles on display shall be located within 100 feet of a repair bay.
g. **Nuisances – Test Drives**
Test drives of motor vehicles shall be prohibited on Residential Streets.

h. **Storage or Display**
Outdoor storage or display of vehicles or equipment shall only be permitted in areas designated for storage or display on an approved Development Order, subject to the following requirements:

1) **General**
   a) **Vehicle Operating Conditions**
      (1) The storage or display of inoperable vehicles or equipment shall be prohibited, with exception to designated storage areas permitted under an approved accessory or collocated use.
      (2) No vehicles or equipment shall be stored or displayed on site except those intended for sale, rental, or lease. An exception shall be permitted for new motor vehicle or equipment inventory owned by another dealership, provided that such vehicles or equipment is of the same type approved for the subject site.
   b) **Loading Spaces**
      Loading spaces shall be set back a minimum of 100 feet from an existing residential use or vacant parcel with a residential FLU designation.
   c) **Required Parking**
      Parking for vehicle storage, sales, or display may not be counted toward meeting the number of on-site parking spaces required for customers and employees.

2) **Standards for Bull Pen Storage**
   a) **Location or Design**
      Bull Pen Storage areas shall be located towards the side or rear of the property and designed in a manner that clearly distinguishes the storage area from vehicle showroom or Outdoor Display areas, by placement behind buildings, or through use of opaque fences, walls, or landscape barriers a minimum of six feet high.
   b) **Outdoor Storage**
      Bull Pen Storage areas shall comply with the Outdoor Storage area requirements of Art. 5, Supplementary Standards. This shall not preclude the ability to seek Variance relief.

3) **Standards for Display Areas**
   a) **General**
      No vehicle shall be parked, stored, or displayed with its hood or trunk open. Motor vehicles on display shall not be elevated in full or in part.
   b) **Barrier**
      A barrier shall be provided between display areas, and customer parking, related driveway access, or drive aisles. This barrier may be in the form of a landscape strip, curbing, removable bollards, or other suitable barrier approved by the DRO.
   c) **Design Standards**
      Display areas shall conform to Art. 6, Parking, Loading, and Circulation, except for space striping.

4) **Standards for Moving Truck and Trailer Rental**
   Designated storage spaces for each truck or trailer shall be depicted on the approved Site Plan. All storage spaces shall be set back a minimum of 100 feet from the front and side street property lines, or in a location which is fully screened from view from any public street by a combination of walls, fences, or landscaping.

41. **Vehicle Sales and Rental, Light**
   a. **Definition**
      An establishment engaged in the sale, retail or wholesale, rental, or lease of new or used motor vehicles as may be defined by the Florida Department of Motor Vehicles, or boats, and recreational vehicles, including but not limited to the following vehicles typically acquired for personal non-commercial use:
      1) Automobiles, sport utility vehicles (SUVs), and light trucks or vans with a curb weight of 8,000 pounds or less; or
      2) Boats, personal watercraft, recreational vehicles (RV), off-highway vehicles (OHV), motorcycles, golf carts, or swamp buggies.
   b. **Typical Uses**
      Typical uses include independent dealers, franchise dealers, wholesale dealers, or new and used recreational vehicle dealers, auto and truck rental, and boat or personal watercraft rental and sales.
c. Approval Process

1) Indoor Vehicle Showroom
   An indoor Vehicle Sales and Rental facility located in the CG or MUPD districts shall be exempt from the minimum three-acre lot size requirement, and may be permitted subject to DRO approval and the following criteria.
   a) Floor Area
      A maximum of 30,000 square feet and 15 display vehicles.
   b) Test Drives
      Test drives shall not be permitted from the Indoor Vehicle Showroom or on site.
   c) Vehicle Operations
      Display vehicles shall not operate engines during store hours. Engines shall only be permitted to operate during the transport of vehicle into or out of the showroom.
   d) Parking
      Vehicles for sale or lease shall not be parked or displayed outside of the showroom.
   e) Stand Alone Exception
      Stand Alone with lot frontage on an Arterial Street or Planned Collector Street, may be exempt from the limitations of a) through c) above, provided that all vehicle display, storage, detailing, or other collocated uses or activities occur indoors.

2) Neighborhood Vehicle Rental Facility
   A Neighborhood Vehicle Rental Facility may be permitted in the CN, CC, and CG Zoning Districts; the Commercial Pod of a PUD; PDDs with a CH or CL FLU designation; or, the Neighborhood Center (NC) of a TDD, subject to DRO approval and the following:
   a) Vehicle Limitations
      A maximum of six vehicles stored on site, limited to cars, SUVs, standard pick-up trucks, and minivans.
   b) Minimum Lot Size
      The lot size shall comply with the minimum required for the applicable zoning district. Legal non-conforming Lots of Record shall be able to develop a Neighborhood Vehicle Rental Facility provided all other minimum site development regulations can be met.
   c) Parking
      The rental vehicles shall be parked in specifically designated spaces or located in Bull Pen Storage.
   d) Outdoor Activities
      Maintenance, repair, detailing, washing, cleaning, or related activities shall not be conducted on site.

d. Overlay – Westgate Community Redevelopment Area (WCRA) Overlay
   Light Vehicle Sales and Rental is prohibited in the NR, NRM, NG, and NC Sub-areas, as per Table 3.B.14.E, WCRAO Sub-area Use Regulations.

e. Zoning Districts
   1) Commercial Pod of PUD and Neighborhood Center of TND
      Shall be limited to a Neighborhood Vehicle Rental Facility.
   2) TMD
      Shall be limited to Indoor Vehicle Showroom.
   3) Districts with Commercial Low FLU Designation
      The sale or rental of OHVs, RVs, boats, or motorcycles shall be subject to the standards for accessory uses.
   4) IL District – Automobile Rental
      Automobile rental may be permitted in the IL district when located on an Arterial Street, subject to Class A Conditional Use approval.

f. Lot Size
   A minimum of three acres, excluding the following:
   1) Indoor Vehicle Showrooms;
   2) Motorcycle or OHV sales and rental;
   3) Boat or watercraft sales and rental when collocated with a Marina Facility; or,
   4) Where otherwise stated within this Subsection.
g. **Accessory Uses**
   1) **Marinas**
      Vehicle Sales and Rental limited to boats and personal watercraft may be permitted as an accessory use to Marina Facilities in the CRE district or an MUPD with CR FLU designation, and shall be exempt from the minimum three-acre lot size requirement.
   2) **Accessory to Heavy Repair and Maintenance**
      Limited Light Vehicle Sales and Rental, may be permitted as an accessory use to Heavy Repair and Maintenance facilities, subject to DRO approval, and the following:
      a) Limited to the display or advertising of a maximum of five vehicles per lot.
      b) All storage spaces shall be located indoors, or set back a minimum of 100 feet from the front and side street property lines, or in a location which is screened from view from any public street by a combination of buildings or walls, or opaque fences or landscaping.
      c) Vehicles on display shall be located within 100 feet of a repair bay.

h. **Nuisances – Test Drives**
   Test drives of motor vehicles shall be prohibited on Residential Streets.

i. **Storage or Display**
   Outdoor storage or display of vehicles shall only be permitted in areas designated for storage or display on an approved Development Order, subject to the following requirements:
   1) **General**
      a) **Vehicle Operating Conditions**
         (1) The storage or display of inoperable vehicles or equipment shall be prohibited, with exception to designated storage areas permitted under an approved accessory or collocated use.
         (2) No vehicles or equipment shall be stored or displayed on site except those intended for sale, rental, or lease. An exception shall be permitted for new motor vehicle or equipment inventory owned by another dealership, provided that such vehicles or equipment is of the same type approved for the subject site.
      b) **Loading Spaces**
         Loadings spaces shall be set back a minimum of 100 feet from an existing residential use or vacant parcel with a residential FLU designation.
      c) **Required Parking**
         Parking for vehicle storage, sales, or display may not be counted toward meeting the number of on-site parking spaces required for customers and employees.
   2) **Standards for Bull Pen Storage**
      a) **Location or Design**
         Bull Pen Storage areas shall be located towards the side or rear of the property and designed in a manner that clearly distinguishes the storage area from vehicle showroom or Outdoor Display areas, by placement behind buildings, or through use of opaque fences, walls, or landscape barriers a minimum of six feet high.
      b) **Outdoor Storage**
         Bull Pen Storage areas shall comply with the Outdoor Storage area requirements of Art. 5, **Supplementary Standards**. This shall not preclude the ability to seek Variance relief.
   3) **Standards for Display Areas**
      a) **General**
         No vehicle shall be parked, stored, or displayed with its hood or trunk open. Motor vehicles on display shall not be elevated in full or in part.
      b) **Barrier**
         A barrier shall be provided between display areas, and customer parking, related driveway access, or drive aisles. This barrier may be in the form of a landscape strip, curbing, removable bollards, or other suitable barrier approved by the DRO.
      c) **Design Standards**
         Display areas shall conform to Art. 6, **Parking, Loading, and Circulation**, except for space striping.
42. Veterinary Clinic
   a. Definition
      An establishment engaged in providing medical care, treatment and temporary boarding for
      animals.
   b. Approval Process – AGR, AR, CLO Zoning Districts and MUPD with CL, CLO FLU
      Designation
      1) A Veterinary Clinic may be Permitted by Right in the AR, CLO Zoning District and MUPD with
         CL or CLO FLU designation, subject to the following limitations: [Ord. 2019-005]
         a) GFA shall not exceed 5,000 square feet; and
         b) Shall not include outdoor runs.
      2) A Veterinary Clinic may be Permitted by Right in the AGR Zoning District. The GFA shall not
         exceed 5,000 square feet. [Ord. 2019-005]
   c. Lot Size – AR and AGR Districts
      Shall be located on a minimum of five acres.
   d. Zoning District
      A Veterinary Clinic shall not have outdoor runs and limited to the following:
      1) CC and CN Zoning Districts
         Shall not occupy more than 3,000 square feet of GFA.
      2) MUPD with CL FLU Designation and TDD Districts
         Shall not occupy more than 5,000 square feet of GFA.
      3) Infill Redevelopment Overlay
         Boarding facilities shall comply with the standards for a Type 3 Commercial Kennel.
   e. Outdoor Runs
      A Veterinary Clinic with outdoor runs shall comply with the following standards:
      1) Lot Size
         A minimum of one acre.
      2) Setbacks
         Outdoor runs shall not be located within 50 feet of any property line adjacent to a parcel of land
         with a residential FLU designation or use; or 25 feet from any property line adjacent to a non-
         residential zoning district, use, or FLU.
      3) WCRAO
         Outdoor runs shall not be located within 25 feet of any property line.
      4) Standards
         A six-foot-high fence shall be required around the runs. If the fence is not opaque or screened
         from view of adjacent properties or R-O-W, a continuous opaque hedge, a minimum of four
         feet at installation, shall be provided around the run.
      5) Waste Disposal
         A Veterinary Clinic shall meet the ECR I and ECR II standards and shall be subject to all
         applicable rules and regulations of the FDEP, PBCHD and SWA.
   f. Facility without Outdoor Runs
      A Veterinary Clinic without outdoor runs shall be required to make accommodations to ensure
      animal waste is properly disposed of within the facility.
   g. Collocated Use
      1) A Veterinary Clinic may be Permitted by Right in the IG, PO, IPF Zoning District or MUPD with
         an INST FLU designation when collocated to an Animal Shelter. [Ord. 2018-018]
      2) Veterinary Clinics operated by a licensed veterinarian for the care of the animals kept in the
         shelter facility may also offer veterinary services to the public. [Ord. 2018-018]

43. Vocational Institution
   a. Definition
      An establishment, that is not an elementary or secondary school, offering regularly scheduled
      instruction and training in industrial, mechanical, construction, technical, commercial, clerical,
      managerial or artistic skills.
   b. Typical Uses
      A Vocational Institution may include but is not limited to business, real estate, building and
      construction trades; machinery operation and repair; electronics, computer programming and
      technology; automotive or aircraft mechanics and technology; beauty or art school or instruction
      leading to a high school diploma.
c. Zoning District – CN and CC
   Shall be limited to 3,000 square feet of GFA.

d. FLU Designation – Industrial
   A Vocational Institution that requires the use of heavy machinery, mechanical, construction or
   industrial equipment such as auto repair, masonry, automotive operation or repair, metal
   fabrication, welding, mechanical or electrical repair shall be limited to sites with industrial FLU
   designation excluding Commercial Pod of a PIPD.

e. Nuisances
   The use shall be conducted within an enclosed building in a non-industrial zoning district where the
   use is allowed unless separated 250 feet from a parcel of land with a residential FLU designation
   or use.

44. Work/Live Space
   a. Definition
      A space within a building that is used jointly for residential and any non-residential use permitted
      in the zoning district, where permitted by the FBC, where the residential space is accessory to the
      primary use as a place of work.
   b. Non-Residential Designation
      Both residential and non-residential square footage shall be counted towards the maximum FAR
      allowed for the district.
   c. Floor Area
      Shall not exceed 1,000 square feet of living area.
   d. Office Space
      A minimum of ten percent of the living area shall be designated as office space.
   e. WCRAO
      Work/Live Space is prohibited in the NR Sub-area per Table 3.B.14.E, WCRAO Sub-area Use
      Regulations.

#### Use Approval Process Key:

- **P**: Permitted by Right
- **D**: Subject to DRO Approval
- **A**: Subject to BCC Approval (Class A Conditional Use)
- **-**: Prohibited Use, unless stated otherwise within Supplementary Use Standards

(1) Supplementary Use Standards for each use must be reviewed regardless of the approval process set forth in the Use Matrix. Refer to the numbers in the Supplementary Use Standards column.
B. General Recreation Standards
1. Tier Specific
   Pari-mutuel betting or gaming is prohibited in the Agricultural Reserve (AGR) Tier.

C. Definitions and Supplementary Use Standards for Specific Uses
1. Arena or Stadium or Amphitheater
   a. Definition
      An establishment open, partially or fully enclosed primarily used or intended for commercial spectator sports, or performance.
   b. Typical Uses
      Typical uses include sports arenas, jai alai frontons, racetracks, and concert halls.
   c. Location
      A minimum of 200 feet of frontage on a Collector or Arterial Street from which primary point of vehicular access shall be provided.

2. Campground
   a. Definition
      A parcel of land used for temporary camping and recreational vehicle (RV) uses, and not as permanent living quarters.
   b. Lot Size
      A minimum of five acres or the minimum required by the district, whichever is greater.
   c. Use
      1. Campsite
         Campsites are predominantly intended for use by patrons occupying tents, pop-up style campers, or Camping Cabins.
      2. RV Site
         RV sites are primarily intended to accommodate RVs, and shall be improved with a paved parking pad for the RV and one passenger vehicle.
   d. Intensity
      Campgrounds may be developed at the following intensities:

      | Zoning Districts | # of Sites/Acre (2) |
      |------------------|---------------------|
      |                  | Campsites          | RVs     |
      | AP (1)           | 10/Acre            | N/A     |
      | PC               | 10/Acre            | N/A     |
      | PO               | 12/Acre            |         |
      | IPF              | 12/Acre            | 6/Acre  |
      | CRE              | 12/Acre            |         |
      | MUPD             | CR FLU             | 16/Acre | 8/Acre |
      | RVPD             | RR FLU (3)         | 10/Acre | 4/5 Acres |
      |                  | CR FLU             | 24/Acre | 12/Acre |

      Notes:
      1. In the LOSTO only.
      2. The acreage used to calculate campsites cannot be used to calculate RV sites, or vice versa. Campsites and RV sites may be interspersed throughout the site.
      3. RVPDs existing prior to March 2, 2017 shall be considered conforming for intensity.

e. Setback for RV or Camp Sites
   All sites shall be set back a minimum of 50 feet from any property line.

f. Duration of Stay
   1) Campsites and Camping Cabins
      A maximum of 30 consecutive days in a six-month period.
   2) RV Sites
      a) No person shall reside or be permitted to reside in a RV site for more than 180 days per calendar year.
b) **Record Keeping**
   The Campground owner or operator shall keep the following records:
   (1) the make, model, and year of each RV;
   (2) the lot on which each RV is/was located;
   (3) the dates of occupancy for each RV owner; and,
   (4) the name and permanent address of each RV owner.

c) **Mobility**
   The mobility of each recreational vehicle shall be maintained at all times. All recreational
   vehicles shall be currently licensed by the State of Florida, or the state of residency of the
   RV owner. The license plate shall be visible at all times.

**g. Accessory Use**
1) **Camping Cabin**
   a) **Definition**
      A rental cabin used for temporary occupancy.
   b) **Use**
      A camping cabin may be allowed as an accessory use to a campground.
   c) **Number**
      A maximum of 30 percent of the total approved campsites may be used for camping cabins.
   d) **Floor Area**
      A camping cabin shall not exceed 800 square feet of GFA.
   e) **Additional Floor Area**
      Floor area under a solid roof that is utilized as a porch, patio, porte-cochere, or carport
      shall not exceed 500 square feet.
   f) **Amenities**
      A camping cabin may contain electrical outlets (excluding 220 volt), heating, lighting, air
      conditioning, cooking facilities and plumbing.

2) **Retail Sales, General**
   A camp store selling goods intended for consumption and use by the patrons of a campground
   shall be allowed pursuant to the following:
   a) **Size**
      Shall not exceed 2,500 square feet of GFA, including storage.
   b) **Location**
      Shall be located to the interior of the campground, and shall not be accessible from any
      external roads abutting the campground property.
   c) **Parking**
      Shall provide one parking space per 500 square feet of GFA, plus one space per employee
      on duty.
   d) **Signage**
      Signage shall be limited to a maximum of 25 square feet of wall signage located on the
      front façade of the building, and shall not be visible from the exterior of the campground.
      Freestanding signs shall be prohibited.

**h. LOSTO**
A Campground or Camping Cabins may be located on parcels within the LOSTO where the use is
not allowed by the Use Matrix, subject to the following:
1) **Campground**
   A campground without RV sites may be allowed in the LOSTO subject to DRO approval.
2) **Camping Cabins**
   A camping cabin may be allowed as a principal use, or as an accessory use to a Single Family
dwelling, subject to a DRO approval through the ZAR Process and the following: [Ord. 2018-002]
   a) **Density**
      A maximum of ten camping cabins per acre when developed as principal use.
   b) **Setback**
      A minimum of 25 feet from all property lines.
   c) **Occupants**
      Only users of the LOSTO Trail, such as hikers, bikers and tourists, shall be allowed to
      occupy the cabins.
3. Entertainment, Indoor
   a. Definition
      An establishment offering recreational opportunities or games of skill to the general public for a fee
      in a wholly enclosed building.
   b. Typical Uses
      Indoor Entertainment may include, but not be limited to: bowling alleys, bingo parlors, pool halls,
      billiard parlors, banquet and reception facilities, and video game arcades.
   c. Approval Process – CC, CG, MUPD, MXPD and PIPD Zoning Districts
      An Indoor Entertainment use encompassing less than 3,000 square feet of floor area may be
      Permitted by Right.

4. Entertainment, Outdoor
   a. Definition
      An establishment offering recreational opportunities or games of skill to the general public where
      any portion of the activity takes place in the open for a fee, excluding golf courses and public parks.
   b. Typical Uses
      Typical uses include athletic fields, batting cages, golf driving ranges, water skiing facilities, tennis
      courts, go-cart tracks, miniature golf courses, paintball fields, jet skiing, and wind surfing.
   c. Approval Process – PIPD Regional Recreation Pod Exception
      An Outdoor Entertainment use that serves to promote economic benefits, such as enhanced
      tourism, job creation, and an amenity for business recruitment, and which provides for national
      recognition as a unique recreational facility, may be allowed within the Regional Recreation Pod of
      a PIPD subject to Class A Conditional Use approval, and the following: [Ord. 2017-032]

      1) Notification to Business Development Board
         The Applicant shall include documentation confirming that the Business Development Board
         (BDB) has been notified of the application for Class A Conditional Use approval, including
         tentative BCC Public Hearing dates, prior to certification for Public Hearing. [Ord. 2017-032]

      2) Residential Separation
         Shall be located a minimum of 1,000 feet from a residential use or vacant parcel with a
         residential FLU designation. [Ord. 2017-032]

      3) Collocated Special Event
         A Special Event may be collocated with an Outdoor Entertainment use subject to DRO
         approval, in accordance with the provisions of Art. 4.B.11.C.8, Special Event. [Ord. 2017-032]
         [Ord. 2019-005]

d. Location
   Access to an Outdoor Entertainment use shall be from a Collector or Arterial Street.

e. Setbacks
   No building, structure, trailer, vehicle, mechanical device, or outdoor area shall be located closer
   to the property line than as follows:

<table>
<thead>
<tr>
<th>Adjacent Use</th>
<th>Minimum Setback</th>
</tr>
</thead>
<tbody>
<tr>
<td>Non-Residential and Streets</td>
<td>50 feet</td>
</tr>
<tr>
<td>Residential District or Use (1)</td>
<td>100 feet (1)</td>
</tr>
</tbody>
</table>

   [Ord. 2017-032]

   Notes:
   1. Outdoor Entertainment within a PIPD Regional Recreation Pod shall be subject to the setbacks of Art. 4.B.3.C.4.c.2, Residential Separation. [Ord. 2017-032]

5. Fitness Center
   a. Definition
      An establishment containing multi-use facilities for conducting recreational sport activities.
   b. Typical Activities
      Typical sport activities may include but is not limited to aerobic exercises, weight lifting, running,
      swimming, racquetball, handball, squash, dance studios and martial arts studios.
c. **Approval Process**
   1) **CC Zoning District and MUPD with CL FLU Designation**
      a) A Fitness Center that has less than 8,000 square feet of GFA shall be Permitted by Right.
      b) A Fitness Center with more than 8,000 square feet but less than 15,000 square feet shall be subject to DRO approval.
   2) **Commercial Pod of PUD**
      A Fitness Center less than 10,000 square feet may be Permitted by Right. [Ord. 2018-018]

d. **Zoning District – CN Zoning District**
   The use shall be limited to 3,000 square feet of GFA when located in CN Zoning District and shall not include outdoor activities.

e. **Existing Approvals – IL Zoning District and Industrial Light Pod of PIPD**
   A Fitness Center legally established in the IL Zoning District or Industrial Light Pod of a PIPD prior to March 2, 2017 shall be considered legal conforming.

6. **Golf Course**
   a. **Definition**
      An establishment providing a golf recreation area designed for executive or regulation play along with accessory support facilities, excluding miniature golf.
   b. **Accessory Use**
      1) **Clubhouse**
         A Golf Course use may include a clubhouse. In addition to traditional and customary services, the clubhouse may also contain uses such as food service, catering, related retail sales, financial services, and other personal services.
      2) **Fencing**
         Fencing or netting may be erected to protect neighboring property, vehicles, pedestrians, or bicyclists from golf balls, subject to the following restrictions:
         a) **Maximum Height Adjacent To**
            (1) **Residential Use**
               15 feet.
            (2) **Street or Easement**
               30 feet.
            (3) **Non-Residential Use**
               30 feet.
         b) **Variance Relief**
            Request for Type 2 Variance from fence or netting maximum height shall be permitted in accordance with Art. 2, Application Processes and Procedures.

7. **Park, Neighborhood Infill**
   a. **Definition**
      A Public Park facility operated by PBC located in the Revitalization and Redevelopment Overlay as designated by the BCC.
   b. **Lot Size**
      A maximum of five acres.
   c. **Minimum Setbacks**
      1) **Playground Surface Areas**
         Ten feet.
      2) **Structures, Park Furniture and Playground Equipment**
         15 feet.
      3) **Active Recreation Facilities**
         a) A minimum of 15 feet when adjacent to R-O-Ws and parcels of land with a non-residential FLU designation or use.
         b) A minimum of 25 feet when adjacent to parcels of land with a residential FLU designation or use. The Parks and Recreation Director may authorize a setback reduction to 15 feet, when compatibility issues are addressed with any adjacent residential uses.
   d. **Restrictions**
      Sports lighting, parking spaces and permanent sanitary facilities shall be prohibited.
   e. **Recreational Amenities**
      Active recreation amenities may include playground equipment and non-regulation basketball courts.
8. Park, Passive
   a. Definition
      A public or private outdoor recreation area relying on a natural or man-made resource base and
developed with a low intensity of impact on the land.
   b. Typical Uses
      Typical uses include trail systems, wildlife management and demonstration areas for historical,
cultural, scientific, educational or other purposes that relate to the natural qualities of the area, and
support facilities for such activities.
   c. Zoning District – PC
      A Passive Park use shall generally include but not be limited to nature and foot trails; canoe trails;
wildlife management performed by official game, fish and wildlife commissions; public hunting and
fishing camps; the use of boats, airboats and wheeled and tracked vehicles under policies and
regulations prescribed by the appropriate government agencies; hunting and fishing camps on
private property under policies prescribed by official game, fish and wildlife commissions;
exploration, observation and archeological studies supervised by recognized authorities or persons
granted permission to proceed by the State of Florida; preserves and passive recreation areas, and
residences for preservation management officers or substantially similar recreational conservation
accessory uses.

9. Park, Public
   a. Definition
      A park publicly owned or operated by government agencies that provide opportunities for active or
passive recreational activities to the general public.
   b. Type of Parks
      The use includes Regional Park, District Park, Beach Park, and Community Park.
   c. Collocated Uses
      The following shall be collocated uses Permitted by Right in the PO Zoning District when included
as part of a Public Park:
      1) Outdoor Shooting Range limited to non-mechanical equipment archery;
      2) Arena or Stadium or Amphitheater separated at least 1,500 feet from parcels of land with a
conservation and residential FLU designation or use.
      3) Commercial Equestrian Arena;
      4) Marina limited to docks, wet slips or boat ramps; and,
      5) Caretaker Quarters. [Ord. 2018-018]

10. Shooting Range, Indoor
    a. Definition
       An indoor establishment used for the discharge of firearms or projectiles at targets for sport or
training, excluding private gun ranges where preempted by State law.
    b. Approval Process
       An Indoor Shooting range allowed subject to a Class A Conditional Use may be approved by the
DRO when limited to archery.
    c. Nuisances
       All use areas shall be within an enclosed building constructed, maintained and operated so that no
noise nuisances related to the range operations can be detected outside the building.
    d. Separation Distance
       An Indoor Shooting Range shall not be located within 500 feet of a parcel of land with a civic or
residential FLU designation or use or a park, unless limited to archery.
    e. Site Design
       Except where preempted by State law, during Zoning or Building Permit Review, whichever occurs
first, the Applicant shall provide documentation demonstrating acceptable industry design and
configuration standards, based on type of shooting activity, to address potential adverse safety and
nuisance concerns. Range design shall include but not be limited to: ventilation, safety baffles,
bullet traps, and impenetrable backstops, floors, walls and ceilings.
11. Shooting Range, Outdoor
   a. Definition
      An outdoor establishment used for the discharge of firearms or projectiles at targets for sport or
      training, excluding private gun ranges where preempted by State law.
   b. Separation Distance
      An Outdoor Shooting Range shall not be located within 1,320 feet of a property line with a civic or
      residential use, zoning district, or FLU designation, unless the adjacent properties are owned by a
      government agency and utilized for other than civic or residential purposes.
   c. Site Design
      Except where preempted by State law, during Zoning or Building Permit Review, whichever occurs
      first, the Applicant shall provide documentation demonstrating acceptable industry design,
      configuration and operational standards, based on type of shooting activity, to address potential
      adverse safety and nuisance concerns. Range design shall include, but not be limited to:
      backstops, sideberms, sidewalls, sound and visual baffles and target placement.
   d. Archery Range
      1. DRO Approval Process
         An Outdoor Shooting Range allowed subject to a Class A Conditional Use may be approved
         by the DRO when limited to non-mechanical archery equipment.
      2. Separation Distance
         Shall not be subject to the 1,320-foot separation distance when limited to non-mechanical
         archery equipment. An alternative separation distance may be required if warranted based on
         the site design requirements contained above.

12. Zoo
   a. Definition
      An establishment where animals are kept in captivity for the public to view or for educational
      purposes.
   b. Accessory Uses
      A Veterinary Clinic, gift shop, and food service may be Permitted by Right as accessory uses to a
      Zoo.
   c. Setbacks
      No animal containment area shall be located within 500 feet of any residential district.

**Supplementary Use Standards**

- Hospital: [11]
  - Large Family Child Care Home: [7]
  - Nursing Home or Convalescent Facility: [7]
  - Place of Worship: [13]
  - School – Elementary or Secondary: [15]

**Use Approval Process Key:**

- P: Permitted by Right
- D: Subject to DRO Approval
- A: Subject to BCC Approval (Class A Conditional Use)
- B: Subject to Zoning Commission Approval (Class B Conditional Use)
- R: Prohibited Use, unless stated otherwise within Supplementary Use Standards

(1) Supplementary Use Standards for each use must be reviewed regardless of the approval process set forth in the Use Matrix. Refer to the numbers in the Supplementary Use Standards column.
B. General Institutional, Public, and Civic Standards

1. Agricultural Reserve (AGR) Tier

In the AGR Tier, institutional, public, and civic uses are prohibited west of State Road 7.

C. Definitions and Supplementary Use Standards for Specific Uses

1. Animal Shelter
   a. Definition
      A nonprofit establishment used for the protection of unwanted or abandoned domesticated animals.
   b. Typical Services
      Typical services provided by an Animal Shelter may include, but are not limited to: sheltering, adoption, fostering, providing rescue or old age homes, medical or behavioral rehabilitation, or other accessory uses as may be permitted by ACC that are not regulated elsewhere by this Code.
   c. Approval Process – ACC Permit
      All Animal Shelters shall be licensed and regulated in accordance with ACC Ord. No. 98-22, as amended. The owner or operator shall obtain Zoning Approval prior to application for an ACC Operational Permit.
   d. Frontage
      Facilities that are open to the public shall have a minimum of 100 feet of frontage on and access from a Collector or Arterial Street.
   e. Landscaping
      Any outdoor animal use area located within 300 feet of a residential use or property with a residential FLU designation, shall upgrade the Incompatibility Buffer with either of the following:
      1) A six-foot-high fence, and double the required buffer width and planting requirements; or
      2) A six-foot-high CBS or concrete panel wall.
   f. Waste Disposal
      An Animal Shelter shall meet the PBCHD ECR I and ECR II standards and shall be subject to all applicable rules and regulations of the FDEP, PBCHD, and SWA.
   g. Accessory Residential Use
      A Single Family dwelling unit may be permitted as an accessory use to an Animal Shelter provided the property has an underlying residential FLU designation.

2. Assembly Institutional Nonprofit
   a. Definition
      An establishment open to the public, owned or operated by a nonprofit organization for social, educational or recreational purposes.
   b. Typical Uses
      An Assembly Institutional Nonprofit use may include, but is not limited to: museums, cultural centers, recreational facilities, botanical gardens and community services such as after school care or tutorial services, medical services, and employment services.
   c. Zoning District – TND District
      Assembly Institutional Nonprofit shall be limited to a maximum of 10,000 square feet of GFA.
   d. Frontage and Access
      The use shall have frontage on and access from a Collector, Arterial or Local Commercial Street, unless stated otherwise herein. An Assembly Institutional Nonprofit with collocated uses, or more than 15,000 square feet of GFA or 350 seats, including accessory uses, shall have frontage on and access from a Collector or Arterial Street.
   e. Redevelopment, Revitalization and Infill Overlay (RRIO)
      An Assembly Institutional Nonprofit use owned or operated by a neighborhood group, working with the Office of Community Revitalization (OCR) within a Countywide Community Revitalization Team (CCRT) designated area, may be allowed subject to the following:
      1) DRO approval in the zoning districts where the use is subject to a Class A Conditional Use;
      2) Located on a Local Residential Street provided the building square footage is limited to a maximum of 5,000 square feet. An Assembly Institutional Nonprofit greater than 5,000 square feet, including accessory uses, shall be located on a Local Commercial, Arterial, or Collector Street.
      3) No outdoor activities after 10:00 p.m.; and,
      4) The following accessory uses shall be Permitted by Right: Limited Day Care, Day Camp, and, Government Services limited to Community Police Substation.
3. **Assembly Membership Nonprofit**
   a. **Definition**
   An establishment owned or operated by a nonprofit organization for social, education or recreational purposes where paid membership is required.

   b. **Typical Uses**
   An Assembly Membership Nonprofit use may include but is not limited to: fraternal or cultural organizations, and union halls.

   c. **Zoning Districts**
   1) **AR/RSA District**
   May be allowed in the AR/RSA with an SA FLU, subject to a Class A Conditional Use approval.

   2) **TND District**
   Nonprofit Membership Assembly shall be limited to a maximum of 10,000 square feet of GFA.

   d. **Frontage and Access**
   The use shall have frontage on and access from a Collector, Arterial or Local Commercial Street.
   An Assembly Membership Nonprofit with collocated uses, or more than 15,000 square feet of GFA or 350 seats, including accessory uses, shall have frontage on and access from a Collector or Arterial Street.

4. **Cemetery**
   a. **Definition**
   Land used or intended to be used for human interment.

   b. **Zoning District – MUPD**
   An MUPD developed to include a Cemetery shall be limited to have Place of Worship or other Cemeteries as collocated uses.

   c. **Frontage**
   Where permitted in a residential zoning district, a Cemetery shall have frontage on and access from an Arterial or a Collector Street.

   d. **Lot Size**
   1) A Cemetery shall be located on a site with a minimum contiguous area of 30 acres. Exceptions to the minimum acreage requirement may be permitted, as follows:
   a) Cemeteries owned and operated by a Place of Worship located within Palm Beach County, whether collocated or remotely located, on sites less than 5 acres, and equal to or greater than 2 acres, which provides only single-level ground burial.
   b) County and municipal cemeteries.
   c) Community and nonprofit association cemeteries, which provide only single-level ground burial and do not sell burial spaces or burial merchandise.
   d) Cemeteries owned and operated or dedicated by a Place of Worship prior to June 23, 1976.
   e) A columbarium consisting of less than one-half acre which is collocated with a Place of Worship.
   f) A mausoleum consisting of two acres or less which is collocated with a Place of Worship.
   g) A columbarium consisting of five acres or less which is located on the main campus of a State university as defined in F.S. § 1000.21(6).
   2) An existing Cemetery having less acreage shall not be considered a non-conforming use if the acreage shown is consistent with a prior approval.

   e. **Pet Cemetery**
   1) May be allowed only in the IPF Zoning District subject to Class A Conditional Use approval.
   2) May be allowed as an accessory use to a Cemetery, provided the area dedicated for pet cemetery is in addition to the minimum lot size required for the Cemetery.

5. **College or University**
   a. **Definition**
   An institution of higher learning offering undergraduate or graduate degrees.

   b. **Approval Process**
   A College or University may be approved by the DRO, subject to the following:
   1) The property is separated from parcels of land with a residential FLU designation or use by a minimum of 150 feet;
   2) A maximum of 30,000 square feet of GFA; and,
   3) The use has frontage on and access from an Arterial, Collector, or Local Commercial Street.
c. Accessory Use – Dormitories
Dormitories may be allowed as an accessory use. If owned or operated by the College or University shall be calculated as FAR.

d. Airport Land Use Compatibility Zoning
The establishment of a new college or university shall be prohibited in accordance with Art. 16.C.1.E.2, Prohibited Land Uses. [Ord. 2019-005]

6. Crematory
   a. Definition
   A facility that employs various methods of processing human or animal remains, consistent with F.S. § 497.005, as periodically amended. [Ord. 2018-018]
   b. Equipment Location
   Crematory equipment shall be located within a fully enclosed building.
   c. Services Prohibited
   Services such as public observances, sermons, or other similar activities shall be prohibited, unless collocated with an approved Funeral Home.
   d. Collocated Use
   In the RM Zoning District, a Crematory may be collocated with a Cemetery subject to Class A Conditional Use approval, provided the use is restricted to those being buried within that Cemetery.

7. Day Care
   a. Definition
   An establishment that provides care, protection, and supervision for children when licensed by the Palm Beach County Health Department, or for adults when licensed by the Agency for Health Care Administration (AHCA).
   b. Types
      1) Day Care Limited
      A Day Care for six to 20 children, or three to 20 adults, for a period of less than 13 hours per day on a regular basis.
      a) Collocated Use – AGR Zoning District
      A Limited Day Care may be allowed as a collocated use to a Nonprofit Assembly Institutional subject to DRO approval.
      b) Use Limitations
      Limited Day Care use does not include nighttime or overnight care.
      2) Day Care General
      A Day Care for 21 or more children or adults for a period of less than 24 hours per day on a regular basis.
      3) Large Family Child Care Home (LFCCH)
      An occupied Single Family residence in which custodial care is regularly provided for up to 12 children, and for which the owner or operator receives a payment, fee, or grant for any of the children receiving care, whether or not operated for profit, and has at least two full-time child care personnel on the premises during the hours of operation. One of the full-time child care personnel must be the owner or occupant of the residence. The use shall be subject to the following:
      a) Applicability
      The Applicant or owner shall provide documentation that the establishment has operated as a licensed Family Day Care Home for at least two years and meet other licenses and regulations established by the PBC Health Department including the maximum number of children permitted.
      b) Approval Process
      The use shall be Permitted by Right when located on lots 20,000 square feet or greater.
      c) Site Requirements
      In addition to the property development regulations applicable to Single Family residential, the following shall apply:
      (1) Outdoor Activity Area
      All outdoor activity area provisions applicable to a Day Care shall apply.
      (2) Drop-Off
      Shall comply with all drop-off access standards applicable to Day Care.
(3) Parking
Shall provide at least four parking spaces including those required for a Single Family residential unit. Parking dimensions shall comply with Art. 6, Parking, Loading, and Circulation.

(4) Site Egress
Shall not allow backward egress from a driveway or parking area into a street.

(5) Signage
Shall not be permitted.

4) Family Day Care Home
See Supplementary Use Standards under Residential Use Classification, Accessory Residential Use Standards.

c. Lot Size
A minimum of 6,000 square feet, or the minimum required by the zoning district in which the Limited or General Day Care is located, whichever is greater.

d. Airport Land Use Compatibility Zoning
The establishment of new Limited or General Day Care facilities shall be prohibited in accordance with Art. 16.C.1.E.2, Prohibited Land Uses. [Ord. 2017-025]

e. Floor Area
1) Child Care
   a) For a Day Care with 40 children or less, the minimum floor area, exclusive of any area devoted to a kitchen, office, storage, and toilet facilities, shall be 1,500 square feet. [Ord. 2020-020]
   b) An additional 35 square feet of floor area or the amount required by the PBCHD shall be provided for each child over 40 children.

2) Adult Care
   For an Adult Day Care, the total amount of net floor space available for all participants shall be in accordance with Rule 58A-6.013, F.A.C., as may be amended, and as determined by the AHCA.

f. Outdoor Activity Area for Child Care
1) General
   An outdoor activity area shall be provided on the same lot as the Day Care. The area shall not be located in the required front setback or adjacent to any outdoor storage area of any existing use.

2) Square Footage
   Shall be in compliance with the Palm Beach County Rules and Regulations Governing Child Care Facilities contained in Appendix D, Chapter 1, Article X, Section B of the PBC Code, as may be amended.

3) Location of Outdoor Play Equipment
   Stationary outdoor play equipment permanently anchored to the ground shall be set back a minimum of 25 feet from any residentially zoned or used property line, and ten feet from any other property line. Outdoor play equipment shall not be located in any required landscape area or easement.

4) Shade Trees
   A minimum of one 12-foot-tall native Canopy tree shall be provided or preserved within the interior of the outdoor activity area per 1,500 square feet of area provided.

5) Fence/Wall
   A minimum four-foot-high fence or wall shall surround the outdoor activity area.

g. Drop-Off Access
1) Drop-Off
   One designated drop-off space shall be provided for every 20 children or adults. Drop-off spaces shall be a minimum of 12 feet in width.

2) Sidewalk Access
   A minimum four-foot-wide sidewalk running in front of, or adjacent to the drop-off spaces and connecting to the Day Care entrance shall be provided.

8. Funeral Home
   a. Definition
      An establishment which arranges and manages funerals and prepares human or animal remains for interment.
b. Zoning Districts – IL, IG, or MUPD with IND FLU
A Funeral Home shall be limited to preparation for interment. No public observances, sermons, or funerals shall be permitted.

c. Collocated Use
In the RM Zoning District, a Funeral Home may be collocated with a Cemetery subject to Class A Conditional Use approval, provided the use is restricted to those being buried within that Cemetery.

9. Government Services
a. Definition
Buildings or facilities owned or operated by a government entity and providing services for the public, excluding utility and recreational services, and Prisons, Jails, or Correctional Facilities.

b. Typical Uses
A Government Service use may include but is not limited to: Administrative offices for government agencies, public libraries, and police and fire stations.

c. ACC Animal Control Facilities
An ACC operated Animal Control Facility shall be considered a Government Services use in the PO and IPF Zoning Districts.

10. Homeless Resource Center
a. Definition
A public or private establishment that provides multiple services for the homeless population.

b. Typical Services
Typical services provided by a Homeless Resource Center may include but are not limited to: Counseling, kitchen and dining facilities, medical and dental outpatient facilities, temporary housing, intake, social services, employment services, and administrative offices.

c. Approval Process
A Homeless Resource Center owned or operated by a governmental entity may be allowed where Government Services uses are allowed by Table 4.B.4.A, Institutional, Public, and Civic Use Matrix, subject to Class A Conditional Use Approval; or may be Permitted by Right where Government Services uses are allowed in non-residential districts, provided that prior to development, or any modification to a previously approved development, program, or operation, an eligible government entity complies with the following:
1) Schedule and make a presentation to the BCC at a duly noticed Public Meeting(s);
2) Prepare a report documenting compliance with Palm Beach County Facilities, Development and Operations, FDO PPM #FDO-S-004, Public Outreach and Community Involvement for Homeless Resource Centers; [Ord. 2019-005]
3) Provide notice of intent to the Zoning Director a minimum of 30 days prior to requesting placement on a BCC Public Meeting agenda, to include the aforementioned report;
4) The BCC shall make a finding that the governmental entity has complied with FDO PPM #FDO-S-004, which may include Conditions of Approval; and, [Ord. 2019-005]
5) A BCC finding of compliance, or compliance subject to conditions, may remain valid for three years, or as otherwise provided by Condition of Approval.

d. Location and Separation Requirements
For the purpose of required separations, measurements shall be made from façade to façade, except where the separation required is between a structure and a zoning district boundary.
1) A minimum 250-foot separation shall be required from the property line of residentially zoned parcels. Type 2 Variance relief, in accordance with Art. 2.B, Public Hearing Processes, may be requested if this standard cannot be met.
2) A Homeless Resource Center shall not be located within a 1,200-foot radius of another Homeless Resource Center.
3) Facilities owned or operated by a governmental entity and located in the PO Zoning District may request a PO Deviation from Location and Separation Requirements, subject to BCC approval, utilizing the standards in Art. 2.B.7.G, Public Ownership (PO) Deviations. [Ord. 2019-005]

e. Facility Use
A minimum of 25 percent of the GFA shall be reserved for accessory service delivery other than temporary housing.

f. Non-Conformities
The subsequent approval of a Development Order for a residential zoning district shall not change the status of the HRC to a non-conforming use.
g. **Existing Approvals**  
A prior approval for a government-owned or operated Homeless Resource Center shall be considered a legal conforming use for sites approved between October 28, 2009 (Ordinance No. 2009-040), and March 2, 2017.

11. **Hospital**  
a. **Definition**  
An establishment that maintains and operates organized facilities for medical or surgical diagnosis, overnight and outpatient care, and treatment of human illness.

b. **Licensing**  
A Hospital shall be required to be licensed by the State of Florida.

c. **Lot Size**  
A minimum of five acres or the minimum required in the zoning district, whichever is greater.

d. **Frontage**  
A minimum of 200 feet of frontage or the minimum required in the zoning district, whichever is greater.

e. **Incinerator**  
Biohazardous waste incinerators with an allowable operating capacity equal to or less than 1,000 pounds per hour and biohazardous waste autoclaves are allowed as an accessory use, subject to the following standard:

1) **Setbacks**  
A minimum of 500 feet from any property line abutting a residential zoning district or use. Expansion of existing facilities may be allowed with lesser setbacks, provided the expansion is approved by the DRO.

12. **Nursing Home or Convalescent Facility**  
a. **Definition**  
An establishment where care is offered or provided for three or more persons suffering from illness, other than a contagious disease, sociopathic, or psychopathic behavior which is not of sufficient severity to require Hospital attention, or for three or more persons requiring further institutional care after being discharged from a Hospital, other than a mental hospital. Patients usually require domiciliary care in addition to nursing care.

b. **Licensing**  
A Nursing Home or Convalescent Facility shall be required to be licensed by the State of Florida.

c. **Lot Size**  
A minimum of 10,000 square feet or the minimum requirement of the zoning district, whichever is greater.

d. **Frontage**  
A minimum of 100 feet of frontage or the minimum requirement of the zoning district.

e. **Access**  
If located in a residential FLU designation, access shall be provided from a Collector or Arterial Street.

f. **Maximum Number of Patient Beds**  
1) All FLU designations except RR: One bed per 1,000 square feet of lot area.
2) RR FLU designation: 0.25 bed per 1,000 square feet of lot area.

13. **Place of Worship**  
a. **Definition**  
An establishment which may include a retreat, convent, or other similar use, owned or operated by a tax-exempt religious group that is used periodically, primarily, or exclusively for religious worship, activities, or related services.

b. **Existing Approvals**  
Applicants may seek abandonment of the existing Place of Worship approval and apply for DRO approval at any time. Prior approvals may be continued to be utilized or modified subject to the limitations in Art. 2.C.5.C, Administrative Modifications to Prior DOs. A DO exceeding the above thresholds shall be subject to a Development Order Abandonment (ABN) and a concurrent request for a DRO approval.

c. **Location**  
A Place of Worship shall be prohibited unless in compliance with one of the following:

1) A Place of Worship greater than or equal to 15,000 square feet, including accessory uses, shall have frontage on and access from an Arterial or Collector Street.
2) A Place of Worship greater than or equal to 5,000 square feet and less than 15,000 square feet, including accessory uses, shall have frontage on and access from an Arterial, Collector, or Local Commercial Street.

3) A Place of Worship less than 5,000 square feet, including accessory uses, may have frontage on and access from a Local Residential Street.

d. Development Thresholds
A Place of Worship shall be exempt from the requirements under Development Thresholds in this Article or any thresholds in this Code that require the use to be subject to a Conditional Use approval. [Ord. 2019-005]

e. Limited Temporary Sales
Temporary sales, such as rummage, or bake sales, shall be Permitted by Right as an accessory use to a Place of Worship for a period of up to three consecutive days, limited to four times a year.

14. Prison, Jail, or Correctional Facility

a. Definition
A government owned or operated facility in which people are legally held as a punishment for crimes they have committed or while awaiting trial.

b. Approval Exemption
Expansion of existing facilities shall be exempt from the Class A Conditional Use approval.

15. School – Elementary or Secondary

a. Definition
An institution of learning, whether public, private, or charter, which conduct regular classes and courses of study required for accreditation as an elementary or secondary school approved by the Department of Education.

b. General
1) Setbacks
All Schools shall comply with the zoning district setbacks unless stated otherwise herein. No setback shall be less than 25 feet regardless of the zoning district.

2) South Florida Water Management District (SFWMD)
Boardwalks and education learning stations may be constructed within wetland areas subject to approval by the SFWMD.

a) Preservation
Prior to commencement of construction, lot clearing or any other site development, preparation, all applicable permits shall be obtained in conformance with Art. 9, Archaeological and Historic Preservation.

b) Wetlands Permits
On site wetlands required by the SFWMD shall be preserved. Boardwalks and education learning stations may be constructed within wetland areas subject to approval by the SFWMD.

c) Construction Documents
Prior to site plan approval by the DRO review, construction documents for wetland restoration, landscaping, and vegetation restoration shall be reviewed and approved by ERM.

3) Airport Land Use Compatibility Zoning
The establishment of a new school shall be prohibited in accordance with Art. 16.C.1.E.2, Prohibited Land Uses. [Ord. 2019-005]

c. Private School
The following standards shall apply to all Private Schools:

1) Pedestrian Access/Bike Path
Pedestrian access, bike paths and crosswalks showing access to the school site from surrounding neighborhoods shall be shown on the site plan.

2) Vehicular Circulation
Designated bus and parental drop off/pick up areas, shall be provided. Pathways, which cross vehicular use areas, shall be defined by special paving, brick, striping, or other methods acceptable to the DRO.

3) Approval Process
This use shall be subject to the applicable approval process pursuant to the Use Matrices of Art. 3, Overlays and Zoning Districts and this Article.
d. Charter Schools
Charter schools are considered public schools pursuant to F.S. § 1002.33 and shall be subject to the standards and procedures applicable to Public Schools. If constructed by the PBC School Board or otherwise considered a public school facility pursuant to F.S. ch. 1013, the use shall be treated as public schools for the purposes of this Code. Charter schools with 200 or fewer students in a commercial, industrial, or non-residential planned development district shall be subject to DRO approval.

e. Public Schools
1) Applicability
Public Schools are subject to site requirements contained in Florida Building Code, Building Section 423 per F.S. § 1013.37. Public Schools are not subject to the approval process contained in the Use Matrices of this Code unless specified herein. Other types of School Board developments, such as administrative offices, warehouse buildings, etc., shall comply with the regulations of the applicable zoning district.

2) Previous Approvals and Future Amendments
Public Schools approved prior to June 16, 1992 shall be considered conforming uses.

3) Review by Zoning
a. School Site Acquisition
Comply with the procedures established by the Intergovernmental Agreement R-93-1600D adopted on December 7, 1993, as amended from time to time.

b. Development Review Officer (DRO) Administrative Review
Application shall comply with the DRO Administrative Review process as stated in Art. 2.C, Administrative Processes.

4) Accessory Uses
The following uses, subject to special regulations, shall be allowed as customarily incidental and subordinate to a Public School:

a) Accessory Radio Towers
(1) Height
Towers shall have a maximum height of 100 feet or less measured from the finished grade at the base of the tower. Towers over 100 feet in height and Commercial Communication Towers shall comply with Art. 4.B.9.

(2) Setbacks
(a) Towers shall meet a minimum setback equal to 50 percent of the height of the tower from all property lines.
(b) Commercial Communication Towers shall comply with the requirements pursuant to Art. 4.B.9. ITV antennas shall not be subject to these requirements.

(3) Anchors
All tower supports and peripheral anchors shall be located entirely within the boundaries of the school site and in no case less than 20 feet from a property line.

(4) Fencing
Security fencing or a security wall shall be installed around the base of each tower, each anchor base and each tower accessory building to limit access.

(5) Sign-Off
The School Board shall provide a written sign-off from the County Department of Airports stating the tower will not encroach into any public or private airport approach space as established by the Federal Aviation Administration.

(6) Removal
Obsolete or abandoned towers shall be removed within 12 months of cessation of use.

5) Setbacks
Setbacks for Public Schools shall be a minimum of 25 feet.

6) Supplemental Design Standards
a) All fences height shall be in compliance with Art. 5, Supplementary Standards and Art. 7, Landscaping.

b) Landscape shall comply with F.S. § 1013.64(5)(a).

c) R-O-W Dedication
Within six months of a request by the County Engineer, the School Board shall convey to the BCC all portions of the site necessary to achieve the ultimate R-O-W, as required by Art. 11, Subdivision, Platting, and Required Improvements, or as warranted by the School
District’s Traffic Study, as well as additional right of way for turn lanes and corner clips, as determined by the County Engineer and warranted by the School District’s Traffic Study for any affected road. The conveyance shall include documentation acceptable to the County Engineer that the land is free of all encumbrances and encroachments and shall be in the form of a warranty deed acceptable to the County Attorney. Time extension for R-O-W dedication may be granted if approved by the County Engineer and the School District.

d) Road Improvements
Prior to School occupancy, the School Board shall fund and construct all road improvements directly associated with the school such as paving-drainage, turn lanes, traffic circulation, sidewalks, and driveway connections as determined by the County Engineer and warranted by the School District’s Traffic Study.

**Use Approval Process Key:**

- **P** Permitted by Right
- **D** Subject to DRO Approval
- **A** Subject to BCC Approval (Class A Conditional Use)
- **B** Subject to Zoning Commission Approval (Class B Conditional Use)
- **-** Prohibited Use, unless stated otherwise within Supplementary Use Standards

(1) Supplementary Use Standards for each use must be reviewed regardless of the approval process set forth in the Use Matrix. Refer to the numbers in the Supplementary Use Standards column.

(2) The change in use for a previously approved non-residential structure shall be Permitted by Right, if in compliance with Art. 3.B.16.E.1, Right to Continue or Change Uses.
B. General Industrial Standards
Reserved for future use.

C. Definitions and Supplementary Use Standards for Specific Uses

1. Contractor Storage Yard
   a. Definition
      The storage of construction material, mechanical equipment used in construction activity, or
      commercial vehicles used by building trades and services, other than construction sites.
   b. Overlay – WCRAO
      1) Approval Process
         The use shall be limited to the UG and UI Sub-areas of the WCRAO subject to Class A
         Conditional Use approval.
      2) Accessory Office
         The use shall include a structure required to comply with the provisions of Table 3.B.14.F,
         WCRAO Non-Residential and Mixed Use Sub-area PDRs.
      3) Nonconformities
         Uses approved prior to March 2, 2017 shall be considered legal conforming uses.
   c. Home Occupation – AR_RSA
      A limited Contractor Storage Yard may be allowed as a Home Occupation subject to the
      1) Exception – AR_RSA Zoning District
         A limited Contractor Storage Yard on a lot five acres or more, may be allowed as follows: [Ord.
         2018-018]
         a) Subject to a DRO approval through the ZAR Process prior to issuance of a Business Tax
            Receipt; [Ord. 2018-018]
         b) A maximum of three persons living outside of the home may be employed under the DRO
            approval. [Ord. 2018-018]
         c) Hours of Operation
            The loading or unloading, or movement of any stored vehicles, equipment, or other similar
            activities, or additional employees shall be prohibited between the hours of 8:00 p.m. and
            6:00 a.m.
         d) Provided parking spaces for every employee vehicle is added to the site.
         e) Outdoor Storage
            1) Semi-truck, trailer, or outside storage of equipment shall be screened from view from
               any R-O-W or parcel of land with a residential FLU designation or use, through use of
               opaque fences, walls, or existing or newly planted native vegetation. [Ord. 2018-018]
            2) No additional vegetation shall be required where equipment is screened from view
               behind permitted opaque fences or other structures; [Ord. 2018-018]
            3) Outdoor storage shall be prohibited within the front yard, and shall be set back a
               minimum of 25 feet and, [Ord. 2018-018]
         f) A maximum of three vehicles or equipment shall be permitted, unless the acreage
            requirement is met. [Ord. 2018-018]
         g) All vehicle parking or storage areas shall utilize improved surfaces such as asphalt,
            pavement or shell rock. [Ord. 2018-018]
         h) Ownership
            Permitted vehicles or equipment shall be owned or leased by the Home Occupation license
            holder, except for semi-trucks operated by the license holder, that are stored not more than
            two days per week at the home. [Ord. 2018-018]
         i) Trucks and Equipment
            The following vehicles or equipment owned by the business owner, may be allowed for
            each additional ten acres, and in accordance with the outdoor storage provisions above:
            [Ord. 2018-018]
            1) One semi-truck with or without trailer; one dump truck; and [Ord. 2018-018]
            2) One trailer and
            3) One item of heavy equipment, such as a bobcat or loader, but excluding large
               equipment such as cranes.
      2) Home Occupation having Contractor Storage Yard shall be exempt from the Incompatibility
         Buffer requirements. [Ord. 2018-018]
2. Data and Information Processing
   a. Definition
      An establishment for business offices of an industrial nature, including corporate centers, associated with uses such as: manufacturing and processing plants or similar industrial complexes; mass/bulk mail-processing; and, telemarketing centers. The use is often integrated into a campus-style development, and not frequented by the general public. This term does not include such uses as: Business or Professional Offices; computer-related Retail Sales establishments; and, Personal Services and Medical or Dental Offices.

3. Distribution Facility
   a. Definition
      An establishment for the loading, unloading, and interchange of freight or package express between modes of transportation.
   b. Typical Uses
      Typical uses include truck terminals, railroad depots and yards (including temporary storage), and major mail-processing centers.
   c. Zoning Districts with a CH FLU Designation
      A facility located in these zoning districts: CG, IRO, MUPD, MXPD, or Commercial Pod of a PIPD shall comply with the following additional requirements: [Ord. 2020-001]
      1) Outdoor Storage and activities shall be prohibited [Ord. 2020-001]
      2) When this use is proposed to replace a previously approved use, the Net Trips and Net Peak Hour Trips must be equal to or less than the approved use. [Ord. 2020-001]

4. Equestrian Waste Management Facility
   a. Definition
      An establishment used for the recovery, recycling, or transfer of equestrian waste, provided used bedding is limited to organic materials, such as wood shavings, chips or sawdust, straw or hay, peat moss, or paper limited to newspapers, but excluding plastics, textiles, or sand. Recovery may include collection, separation or sorting, or limited processing necessary to reduce volume, render materials safe for transport, storage or disposal, or the cleaning and packaging of materials for reuse. The facility may include manufacturing of products utilizing the equestrian waste including, but not limited to, bedding, fertilizer, pellets, and logs. Transfer may include the transfer of equestrian manure or bedding from smaller vehicles used for collection to larger vehicles for shipment to another destination.
   b. Glades and AGR Tiers
      Equestrian Waste Management Facility shall be prohibited in the Glades Tier and the AGR Tier. [Ord. 2018-018]
   c. Location
      Shall have frontage and access from an Arterial or Collector Street. Access from residential streets shall be prohibited.
   d. Separation Distance
      An Equestrian Waste Management Facility shall be separated a minimum of 1,000 feet from a food processing or packing plant. In addition to Art. 2.B.7.B.2, Standards, the BCC shall consider whether the proposed 1,000-foot separation is adequate for this use at this location as part of the findings for the final decision of the request. [Ord. 2018-018]
   e. Collocated Use
      Equestrian Waste Management Facility may be collocated with a Potting Soil Manufacturing, Composting Facility, or Chipping and Mulching subject to a Class A Conditional Use approval, only when located in a parcel with an industrial zoning district or FLU designation. [Ord. 2018-018]
   f. Landscaping Adjacent to Residential
      Any Equestrian Waste Management Facility located within 250 feet of a parcel with a residential use or FLU designation, shall provide a Type 3 Incompatibility Buffer. This Buffer shall be a minimum of 30 feet in width, and shall consist of a two-foot-high berm, and double the number of required trees, planted in two staggered rows. Where outdoor activities are permitted within this distance but an Incompatibility Buffer is not required, the buffer shall also be upgraded to include a minimum six-foot hedge, fence, or wall. Measurement shall be taken from property line of the Facility to the property line of the adjacent parcel of land. [Ord. 2018-018]
g. Storage or Waste Processing Areas
   1) Best Management Practices
      All storage areas, including the temporary or overnight parking of loaded trucks or trailers, and
      any outdoor waste processing areas, shall comply with Art. 5.J.3.A, Storage Related to Storage
      or Spreading of Livestock Waste.
   2) U/S Tier
      Outdoor storage shall be prohibited in the U/S Tier.
   3) Outdoor Storage
      Where permitted, the pile height of equestrian waste shall not exceed 12 feet, and bollards
      shall be provided to delineate pile locations and height, tied to a finished grade location
      designated on site.

h. Application Requirements – Operation Functions
   An application for an Equestrian Waste Management Facility shall include a Justification Statement
   and supporting documentation demonstrating acceptable industry design, configuration, and
   operational standards, including but not limited to:
   1) Site Plan
      The plan shall illustrate how the operation functions, including circulation routes, and the
      location and size of loading and processing areas, and storage piles.
   2) Waste Volume
      An explanation of the quantity of waste to be received, expressed in cubic yards per day or
      tons per day.
   3) Dust Control Program
      A program to address how dust generated from traffic, storage and processing areas will be
      managed pursuant to Art. 5.E.4.D.3, Dust and Particulate.
   4) Odor and Pest Control Program
      A program to address how odors and pests resulting from any vehicles transporting waste, or
      storage and processing areas will be managed pursuant to Art. 5.E.4.D.4, Objectionable Odors.

5. Gas and Fuel, Wholesale
   a. Definition
      An establishment engaged in the storage of flammable or explosive gases or fuel for wholesale
      distribution. [Ord. 2018-002]
   b. Typical Uses
      Wholesale Gas and Fuel may include but is not limited to the bulk storage, distribution, and
      wholesaling of motor vehicle fuels, propane, natural gas, welding gases, or other similar materials.
      [Ord. 2018-002]
   c. Approval Process – Exception
      Wholesale Gas and Fuel may be Permitted by Right subject to compliance with all of the following:
      [Ord. 2018-002]
      1. Limited to a maximum of 2,500 gallons or less or 2,000 gallons water capacity. [Ord. 2018-
         002]
      2. Storage areas shall be located a minimum of 200 feet from any parcel supporting residential
         uses or vacant parcels with a residential Future Land Use designation. [Ord. 2018-002]
      3. Bulk storage of flammable gases shall be prohibited unless approved by PBC Fire-Rescue.
         [Ord. 2018-002]
      4. The Applicant shall submit a storage management plan for all flammable liquids or gases and
         any non-flammable gases to include documentation demonstrating compliance with all
         applicable U.S. Department of Labor, Occupational Safety and Health Hazard (OSHA)
         standards, the National Fire Protection Association (NFPA) Compressed Gas and Cryogenic
         Fluids Code, Compressed Gas Association (CGA) Safe Handling of Compressed Gases, and
         any PBC Fire-Rescue standards. [Ord. 2018-002]
   d. Location
      This use shall not be located within the PBIAO. [Ord. 2017-025]
   e. Separation Distance
      A separation distance shall be established between this use and any adjacent uses. The separation
      distance shall be that prescribed by the PBC Fire-Rescue Department based upon recognized
      standards and guidelines.
6. **Heavy Industry**
   a. **Definition**
      An establishment engaged in the basic processing and manufacturing of materials or products predominately from extracted or raw materials, or a use engaged in storage of, or manufacturing processes utilizing flammable, hazardous, or explosive materials, or processes which potentially involve hazardous or commonly recognized offensive conditions.
   b. **Typical Uses**
      Typical uses include asphalt or concrete plant; manufacturing and warehousing of chemicals, dry ice, fertilizers, fireworks and explosives; pulp and paper products; radioactive materials; fat rendering plants; slaughterhouses and tanneries; and, steel works.
   c. **FLU Designation – EDC**
      Heavy Industry shall be prohibited in the EDC FLU designation.
   d. **Fireworks**
      The retail sale of fireworks from a permanent fireworks storage facility or establishment shall be limited to an accessory use.

7. **Machine or Welding Shop**
   a. **Definition**
      A workshop where machines, machine parts, or other metal products are fabricated. Typical uses include machine shops, welding shops, tool and die fabrication, and sheet metal shops.

8. **Manufacturing and Processing**
   a. **Definition**
      An establishment engaged in the manufacture, predominantly from previously prepared materials, of finished products or parts, including processing, fabrication, assembly, treatment, and packaging of such products. This use also includes incidental storage, sales, and distribution of such products, but excludes heavy industrial processing.
   b. **Typical Uses**
      Typical uses include factories, large-scale production, wholesale distribution, publishing, and food processing.
   c. **Zoning Districts with a CH FLU Designation**
      A facility located in these zoning districts: CG, IRO, MUPD, MXPD, or Commercial Pod of a PIPD shall comply with the following additional requirements: [Ord. 2020-001]
      1) Outdoor Storage and activities shall be prohibited.

9. **Medical or Dental Laboratory**
   a. **Definition**
      An establishment for the construction or repair of medical equipment, such as dental, optical, orthopedic, or prosthetic devices; or medical testing laboratories primarily engaged in providing analytic or diagnostic services exclusively on the written work order of a licensed member of the medical profession and not for the public.

10. **Multi-Media Production**
    a. **Definition**
       The use of a lot or building for the production of films or videos such as digital, audio, and motion pictures; production or broadcasting of television, radio, or internet programs; or recording of music.
    b. **Typical Uses**
       Typical uses include but are not limited to: film laboratories, stock footage film libraries, mass video publication, broadcasting studios, or soundstages.
    c. **Approval Process**
       Indoor Multi-Media Production establishments shall be Permitted by Right in the zoning districts where the use is allowed.
    d. **Transmission Facilities**
       Communication towers, antennas, and satellite dishes shall be subject to the applicable approval and Supplementary Standards contained in this Code.
    e. **Film Permit in Public Properties**
       Films in public properties such as parks, beaches, rights-of-way, or public buildings are not subject to these standards. Permits are issued by the Film and Television Commission.
11. Recycling Center
   a. Definition
      A permanent facility designed and used for collecting, purchasing, storing, dropping-off and
      redistributing of pre-sorted, recovered materials that are not intended for disposal.
   b. Approval Process – DRO
      A Recycling Center that is subject to a Class A Conditional Use approval may be approved by the
      DRO, provided that the use complies with one of the following:
      1) Located completely within enclosed buildings; or
      2) The use shall be located a minimum of 500 feet from a parcel with a residential, civic,
         institutional, recreation, or conservation FLU designation, zoning district, or use.
   c. Access
      Access shall be limited to Arterial, Collector, or Local Commercial Streets which do not serve
      residential lots.
   d. Operation Functions
      The Zoning application shall include a Justification Statement and supporting documentation
      demonstrating acceptable industry design, configuration and operational standards, based on the
      type of materials stored. The supporting documentation shall include but not limited to the following:
      1) Site Plan
         The Site Plan shall illustrate how the operation functions including circulation routes; the
         location of the operation areas, and storage piles.
      2) Dust Control
         A plan to address how dust generated from traffic and storage areas will be managed pursuant
         to Art. 5.E.4.D.3, Dust and Particulate.
      3) SWA Permit
         Prior to operation of the facility, the owner or operator shall obtain a SWA Permit.

12. Recycling Plant
   a. Definition
      An establishment used for the recovery of non-hazardous recyclable materials that are not intended
      for disposal to be collected, separated and sorted, or processed, for reuse. Recyclable materials
      include Construction and Demolition Debris, plastic, glass, metal, all grades of paper, textiles or
      rubber.
   b. Approval Process
      A Recycling Plant requiring Class A Conditional Use approval may be approved by the DRO subject
      to the following:
      1) When surrounded by parcels having an IND FLU designation that are vacant or developed with
         industrial uses providing a 500-foot separation between the use and any parcels having a
         residential, civic, recreation, or conservation FLU designation or use; or
      2) When all recycling activities are located within enclosed structures that have no openings
         oriented or visible from surrounding parcels having a residential, civic, recreation, or
         conservation FLU designation or use.
   c. Access
      Access from a Residential Street shall be prohibited. Entrances shall be gated to prevent access
      from unauthorized persons.
   d. Setbacks
      No part of a Recycling Plant and its accessory ramps, on site circulation system, or storage areas
      shall be located within 50 feet of any property line, unless adjacent to another property with an IND
      FLU designation that is vacant or has an existing industrial use.
   e. Lot Size
      The minimum lot size shall be five acres for any Recycling Plant with outdoor activities.
   f. Drainage
      Untreated surface water runoff shall not be permitted to discharge directly into lakes, streams,
      drainage canals, or navigable waterways other than into or through approved on-site containment
      areas.
   g. Storage Areas
      All outdoor storage of recyclable materials shall be in leak-proof containers or located on a paved
      area that is designed to capture all potential run-off associated with the stored material. Run-off
      shall be handled in a manner that is in conformance with Local, State, and Federal regulations.
h. **SWA Permit**
Verification that the Applicant has obtained a permit from and posted a bond with the SWA prior to Final Site Plan approval or Building Permit, whichever occurs first.

13. **Research and Development**
   a. **Definition**
      An establishment engaged in industrial, scientific or medical research, testing, and analysis.
   b. **Typical Uses**
      Typical uses include natural science/manufacturing research facilities, bioscience research/biotechnology and product testing/quality control facilities.
   c. **Overlay – Bioscience Research Protection Overlay (BRPO)**
      A Research and Development establishment located in the BRPO shall not be subject to the limitations of Table 4.A.9.B, Thresholds for Projects Requiring Board of County Commissioner Approval.
   d. **Outdoor Activities**
      Outdoor manufacturing, processing, or testing shall be limited to industrial zoning districts only.

14. **Salvage or Junk Yard**
   a. **Definition**
      An establishment used primarily for the collecting, storage and sale of scrap metal or discard material; or for the collecting, dismantling, storage and salvaging of machinery or vehicles not in running condition; or for the sale of parts thereof. Salvage may also include architectural salvage which consists of building materials and fixtures recovered prior to the demolition of buildings or structures.
   b. **Approval Process**
      Architectural salvage may be allowed subject to DRO approval in the following zoning districts:
      1) IL or IG;
      2) MUPD with an IND FLU designation; or,
      3) IND/L or IND/G Pod of a PIPD.

15. **Towing Service and Storage**
   a. **Definition**
      The use of a portion of an establishment for the temporary storage of operable or inoperable vehicles in conjunction with a commercial towing service. This shall not include retail sales, repair, or salvage of towed vehicles occurring within the storage area.

16. **Truck Stop**
   a. **Definition**
      An establishment which provides services primarily for transient commercial vehicle operators, such as fueling, day and overnight parking. A Truck Stop may also serve other travelers.
   b. **Location**
      Truck Stops shall have a minimum of 200 linear feet of frontage on an Arterial Street.
   c. **Lot Size**
      Shall be a minimum of five acres.
   d. **Setbacks**
      Parking areas, parking spaces, maneuvering areas, and drive aisles, shall be set back a minimum of 200 feet from any existing residential use, zoning district, or FLU designation.
   e. **Landscaping**
      Incompatibility Buffers shall be required adjacent to an existing residential use, zoning district, or FLU designation. The buffer shall include a six-foot-high berm with a six-foot-high opaque wall or fence installed at the plateau of the berm. Variances may be requested from these requirements.
   f. **Collocated Uses**
      For purposes of this Section, collocated uses shall mean a use that is mainly oriented to serving transient commercial vehicle operators. The following collocated uses shall be allowed in conjunction with a Truck Stop subject to DRO Approval:
      1) Type 1 Restaurant;
      2) Type 2 Restaurant;
      3) Car Wash;
      4) Hotel or Motel;
      5) Personal Services;
      6) Financial Institution;
      7) Financial Institution with Drive-Through;
9) Financial Institution – Freestanding ATM;
10) Gas and Fuel Retail;
11) Laundry Service; and,
12) Retail Sales.

g. **Site Design:**
The site shall be designed to ensure the provision of adequate vehicular circulation and parking patterns. Collocated uses listed above shall be designed and located to mainly serve transient commercial vehicle operators.

17. **Warehouse**
a. **Definition**
   An establishment used for the storage of raw materials, equipment, or products.

b. **Typical Uses**
   Typical uses include moving companies, cold storage, and dead storage facilities, but excludes self-service storage facilities.

c. **Overlay – WCRAO**
   Office/warehouse uses shall be allowed as specified in Table 3.B.14.E, WCRAO Sub-area Use Regulations. The office/warehouse development shall have a minimum of 25 percent office space per gross floor area for each bay.

d. **Zoning Districts with a CH FLU Designation**
   A facility located in these zoning districts: CG, IRO, MUPD, MXPD, or Commercial Pod of a PIPD shall comply with the following additional requirements: [Ord. 2020-001]
   1) Outdoor Storage and activities shall be prohibited. [Ord. 2020-001]

e. **Accessory Use**
   1) **Office**
      Unless approved as a Class A Conditional Use, or as specified in the Overlay – WCRAO standard, office space in each warehouse bay shall be a maximum of 30 percent of the GFA of that bay. [Ord. 2020-001]
   2) **General Retail**
      Sales shall be prohibited, except where allowed in conjunction with Flex Space. [Ord. 2020-001]

f. **Freestanding Structures**
   Freestanding structures for Warehouse developments located in an MUPD with an IND FLU designation shall not be subject to the provisions of Table 3.E.3.B, Freestanding Buildings. [Ord. 2019-005]

18. **Wholesaling**
a. **Definition**
   An establishment engaged in: the maintenance and display of inventories of goods for distribution and sale of goods to other firms for resale; or, the supplying of goods to various trades such as landscapers, construction contractors, wholesale building supplies, institutions, industries, or professional businesses. These establishments also sort and grade goods from large to small lots, and engage in delivery. This use excludes vehicle sales, and the wholesaling of nursery supplies, and gas and fuel.

b. **Zoning Districts with a CH FLU Designation**
   A facility located in these zoning districts: CG, IRO, MUPD, MXPD, or Commercial Pod of a PIPD shall comply with the following additional requirements: [Ord. 2020-001]
   1) Outdoor Storage and activities shall be prohibited. [Ord. 2020-001]

### Notes:

1. Policy and Procedures Manual (PPM) # Multiple Department (MD)-RI-002, Processing Building Permit and Zoning Applications for Farms, guides P2B staff in determining the preemptive effect of State law. This PPM is available upon request at Planning, Zoning and Building Department.

2. Supplementary Use Standards for each use must be reviewed regardless of the approval process set forth in the Use Matrix. Refer to the numbers in the Supplementary Use Standards column.

3. The change in use for a previously approved non-residential structure shall be Permitted by Right, if in compliance with Art. 3.B.16.E.1, Right to Continue or Change Use.

B. General Agricultural Standards
Reserved for future use.

C. Definitions and Supplementary Use Standards for Specific Uses

1. Agriculture, Bona Fide
   a. Definition
   Any plot of land where the principal use consists of the growing, cultivating, and harvesting of crops; the raising of animals, inclusive of aviculture, aquaculture, horses, and livestock; the production of animal products such as eggs, honey, or dairy products; or, the raising of plant material. The following standards shall apply to a Bona Fide Agriculture use, except where pre-empted by State law.

   b. Agricultural Uses in the U/S Tier
      1) Applicability
         Uses legally established prior to the effective date of this Code in the U/S Tier shall be considered conforming. Any expansion of existing agricultural uses shall be consistent with all applicable requirements and subject to the review procedure identified in this Code.
      2) Uses Not Listed
         Agricultural uses not listed in Table 4.B.6.A, Agricultural Use Matrix, as permitted in the U/S Tier shall only be permitted as an interim use, subject to Class A Conditional Use approval.
      3) AR Zoning District
         The AR Zoning District shall be considered consistent with all FLU designations in the U/S Tier for the purposes of permitting interim agricultural uses only.
      4) Temporary Agricultural Uses
         Property which has an existing Development Order may also receive an additional Development Order for a temporary agricultural use in the U/S Tier in accordance with the standards for the specific agricultural use, however, the agricultural use shall not be eligible for an Agricultural tax exemption.

   c. Groves and Row Crop
      The cultivation of fruits and vegetables as groves and row crops shall be subject to the following additional standards in all zoning districts:
      1) Lot Size
         A minimum of five acres.
      2) Setback
         Structures and accessory activities shall be set back a minimum of 50 feet.
      3) Hours of Operation
         Operation of commercial vehicles over one ton rated capacity or gross vehicle weight of 10,000 pounds, including load, from 7:00 p.m. to 6:00 a.m. is prohibited.
      4) Loading
         All loading and unloading of trucks shall be restricted to the site and shall not be permitted in any setbacks.
      5) Spraying
         No aerial application of any pesticides, fungicides, fertilizers, or any other chemical shall be allowed.

   d. Dipping Vats
      Dipping vats shall not be allowed in the AR Zoning District, unless approved as a Class B Conditional Use.

   e. Pens and Cages
      In the AR and AGR Zoning Districts, pens, cages, or structures shall meet the district setbacks for a principal use, or be set back a minimum of 50 feet from any property line, whichever is greater.

   f. Game and Exotic Animals
      The Florida Fish and Wildlife Conservation Commission (FWC) regulates game farms or game animal care for private or commercial purposes.
      1) Exotic Animals
         Care for exotic animals (imported or non-native animal species) for private or commercial breeding purposes shall have a minimum lot size of five acres.
      2) Dangerous or Class 1 and 2 Animals
         Ownership, care, or keeping of dangerous or Class 1 and 2 animals, as defined by the FG&FWFC, shall require Class A Conditional Use approval and shall have a minimum lot size of five acres.
g. Livestock Raising
   The breeding, raising, and caring for domestic animals including horses.
   1) Urban Service Area (USA)
      In the Urban Service Area, livestock raising shall comply with the following standards:
      a) Lot Size
         A minimum of five acres.
      b) Setback
         All accessory uses and structure, such as troughs, feed mechanisms and storage, shall be
         set back a minimum of 100 feet.
      c) Large Animals
         The maximum number of large animals permitted for each acre shall not exceed five. Large
         animals shall include horses, swine, cattle, goats, and sheep. An enclosed structure with
         one stall for each large animal is required when the total number of large animals exceeds
         three per acre. In addition, the following limitation on the number of specific large animals
         per acre shall apply: horses: five; swine: one; cattle: two; goats: two; sheep: two.
      d) Small Animals
         The maximum number of small animals permitted for each acre shall not exceed 100. Small
         animals shall include rabbits and fowl, excluding peafowl. Small animals shall be permitted
         in addition to large animals.
      e) Palm Beach County Animal Control Department (PBCACD)
         The Property Owner shall notify PBCACD as to the type of livestock and details of animal
         care to be provided.
      f) Processing and Slaughtering
         Processing and slaughtering shall be prohibited.
      g) Loading
         All loading and unloading of trucks shall be restricted to the site and shall not encroach any
         setback.
      h) Waste
         A plan outlining a method of waste removal shall be submitted to and approved by the PBC
         Health Department.
      i) Compatibility
         The use shall assure that there is no incompatibility with surrounding land uses. In the
         event that an incompatibility exists, the petitioner shall satisfactorily mitigate the
         incompatibility prior to receiving Conditional Use or DRO approval.

h. Agritourism
   Refer to F.S. § 570.85-§ 87 for applicability. [Ord. 2019-034]

i. Accessory Agricultural Uses
   These uses include “U-Pick-Em” operations; sale of on-site produced products; corrals; pens;
   training facilities; dipping vats; processing of raw material; storage sheds; repair, fabrication, body
   work and welding of agricultural equipment; freestanding coolers; bulk storage of petroleum
   products; shipping containers used for temporary storage; washing, cutting, and packing of farm
   products, and canning, dehydration, and basic preparation of raw food products prior to shipment,
   and outdoor storage of equipment.

j. Agriculture Marketplace
   A use that is accessory, incidental and subordinate, to a Bona Fide Agriculture use in the AGR Tier,
   conducted to allow for the sale of agricultural products or enhanced opportunities for visitors, which
   generates income for the owner or operator of the Bona Fide Agriculture use, adding economic
   viability to farming operations.
   1) Approval Process
      Class A Conditional Use.
   2) Location Criteria
      a) Tier and Zoning District
         AGR Tier and Zoning District only.
      b) Location
         The Agriculture Marketplace shall be located adjacent to an Arterial Road designated on
         the PBC Functional Classification of Roads Map.
c) Proximity to Residential Uses
The parcel or area designated on the Final Site Plan for an Agriculture Marketplace shall be located at least 500 feet measured from the property line, if adjacent to existing residential uses, or approvals for PUD or TMD Development Areas with residential uses.

3) Minimum Acreage and Production
May be allowed if the land area has a minimum of 75 contiguous acres. A Unity of Control shall be required at the time for the approval of the Class A Conditional Use.

a) Agriculture Preserve Parcels
The minimum acreage requirements may include parcels under an agricultural conservation easement, identified as an AGR-PUD Preserve or AGR-TMD Preserve, or other similar protections, provided that the Agriculture Marketplace is not located on those parcels.

b) Agriculture Production
A minimum of 70 percent of the overall land area must meet the requirements for Bona Fide Agriculture.

4) Use Limitations and Sale of Products
The area designated as an Agriculture Marketplace shall be limited to the retail sales of agricultural products such as fruits, vegetables, flowers, containerized house plants and other agricultural food products such as jelly, jam, honey and juice. This shall not preclude any structures from being used for the coordination of activities for permitted collocated uses, or other accessory, educational or recreational uses permitted on the Bona Fide Agriculture operation. The sale of grocery or convenience-type foods or products shall not be permitted nor shall vending machines or other similar equipment be permitted, unless stated otherwise herein.

a) Floor Area
A maximum of 24,000 square feet of GFA, including outdoor display areas. The floor area shall not include any FAR transferred from the portions of the site that is dedicated to Bona Fide Agriculture production or otherwise encumbered with a conservation easement, Preserve Area or other similar protection.

b) Outdoor Open Space Area
Areas set aside as outdoor open space for collocated uses and outdoor permanent activities shall be limited to a maximum of 12,000 square feet. Permanent shelters, such as Seminole chickee huts shall be limited to a maximum of 2,000 square feet.

c) Collocated Uses
Additional uses may be permitted subject to compliance with the Supplemental Use Standards for each use and the following:

(1) General Retail Sales
Ten percent or 2,000 square feet, whichever is less, of the GFA of the Agriculture Marketplace may be devoted to General Retail Sales. There shall be no exterior signage advertising to the public of the sale of grocery or other retail products. Approval shall be part of the Class A Conditional Use.

(2) Permanent Green Market
Subject to DRO approval. An Open Flea Market may be permitted in conjunction with a Green Market. The Open Flea Market shall be limited to ten percent of the total square footage of the Permanent Green Market.

(3) Retail Sales, Mobile or Temporary and Special Event
Mobile sales shall be permitted subject to approval of a Temporary Use through the ZAR process. [Ord. 2018-002]

d) Outdoor Permanent Activities
Activities shall be clearly shown and labeled on the Site Plan and shall function with other uses on the site. Impacts from these uses, including but not limited to, traffic, parking, rest rooms, or nuisances, shall be addressed as part of the Class A Conditional Use approval. The BCC may impose conditions of approval to address these activities. Additional activities, such as: cooking classes and charity events, shall be Permitted by Right, subject to the following:

(1) Shall be located within the GFA of the Agriculture Marketplace or permitted Outdoor Open Space areas;
(2) The maximum number of participants, including a combination of special activities, shall not exceed 50 attendees; and,
(3) Overflow parking is provided. A minimum of one parking space shall be provided for each three attendees. This shall require the posting of adequate onsite directional signage to preclude any inappropriate parking activity, such as parking in rights of way or on adjacent properties.

e) **Outdoor Display**
   Shall be limited to agricultural products only, located along the property's frontage or other area, except within required setbacks.

f) **Storage**
   Motor vehicles, including vans, trucks, semi-trucks, mobile homes, travel trailers, and other permanent or temporary structures shall not be used for storage or display purposes.

g) **Parking**
   Off-site parking within a public or private R-O-W, or to areas accessed by other than an approved access way, shall be prohibited.

h) **Hours of Operation**
   1) 8:00 a.m. to 6:00 p.m. Monday through Saturday; and
   2) 10:00 a.m. to 6:00 p.m. Sunday.

k. **Landscape Curbing**
   A Bona Fide Agriculture use may use railroad ties or landscape lumber as an alternate to the curbing requirement in **Art. 7.C.4.E.2 Alternative to Curbing**.

l. **Barbed Wire in AGR, AP, and AR Zoning Districts; and AGR-PDD Preserve Parcels**
   1) Barbed wire may be installed pursuant to **Art. 5.B.1.A.2.e, Dangerous Materials**.
   2) In the AR Zoning District with any Bona Fide Agriculture use, other than nurseries, provided it is set back a minimum of 25 feet from any property line.

2. **Agriculture, Light Manufacturing**
   a. **Definition**
      An accessory agricultural use for the manufacturing of products related to agricultural operations, such as fencing, pallets, crates, or containers. Product components are predominantly assembled from previously prepared materials or finished parts. Manufacturing includes processing, fabrication, assembly, treatment, and packaging of such products, and accessory storage and distribution, but excludes heavy industrial processing or manufacturing.
   b. **Setbacks**
      A minimum 100-foot setback shall be required adjacent to a residential zoning district.
   c. **Accessory Use**
      Light Agricultural Manufacturing operations may be allowed as an accessory use to a related Bona Fide Agriculture use on the same property provided it does not exceed 25,000 square feet.
   d. **Lanscaping**
      An Incompatibility Buffer may be omitted if the use is adjacent to Farm Workers Quarters or a Mobile Home accessory to agriculture.

3. **Agriculture, Packing Plant**
   a. **Definition**
      A facility used for the packing of produce not necessarily grown on site.
   b. **Typical Activities**
      Activities may also include canning, dehydration, washing, cutting, or basic preparation of raw produce prior to shipment.
   c. **Approval Process – AR/RSA Zoning District**
      May be permitted in the AR/RSA Zoning District with an SA FLU, subject to a Class A Conditional Use approval.
   d. **Zoning District AGR-PUD Preserve Area**
      An Agriculture Packing Plant located in an AGR Preserve Area, including where permitted as an accessory use as specified above, shall comply with the following:
      1) Located on a roadway classified as an Arterial Street on figure TE 3.1, Functional Classification of Roads; and
      2) Located on or adjacent to active agricultural crop production.
e. **Setbacks**
   A minimum of 100 feet along all property lines which are adjacent to a residential zoning district.

f. **Accessory Use**
   A packing plant in the AP and AGR Zoning Districts, or the Preserve Area of an AGR-PUD, may be allowed as an accessory use to a related farm use on the same property, provided it does not exceed 25,000 square feet.

g. **Lanscaping**
   An Incompatibility Buffer as required by Art. 7.C.2.C, Incompatibility Buffer, may be omitted if the use is adjacent to Farm Workers Quarters or a Mobile Home accessory to a farm use.

h. **Storage**
   Only equipment directly related to the facility shall be stored on the site. All stored equipment shall be screened from view from adjacent properties and streets.

4. **Agriculture, Renewable Fuels Production**
   a. **Definition**
      Any facility using biomass as its principal source of feed stock for the production of renewable fuel or fuels and other related renewable products including but not limited to ethanol or fuel ethanol.
   b. **Setbacks**
      The facility shall be located a minimum of 750 feet away from parcels with a residential zoning or Future Land Use designation that accommodate an existing residential structure.
   c. **Review Procedures and Standards**
      1) The Applicant shall submit a site plan, for informational purposes only, to the Zoning Division prior to Building Permit application. The site plan shall be consistent with the requirements indicated in the Technical Requirements Manual.
      2) The owner or operator shall obtain the required approval and permits from all applicable Federal, State, and Local agencies prior to operating the facility.
      3) The owner or operator shall perform a daily visual inspection of all wood material and similar vegetative matter to be used as feed stock.
      4) Any toxic or hazardous waste generated at the site shall be handled pursuant to Chapter 62-730, F.A.C.
   d. **Prohibitions**
      1) The generation of toxic or hazardous waste effluent into the sanitary system shall be prohibited unless adequate pretreatment facilities have been constructed and are being utilized. The pretreatment facilities are subject to approval by DEP and the appropriate sewage works provider.
      2) Feed stock observed to contain prohibited materials shall not be used.
   e. **Separation Distance**
      Facilities shall be separated two miles from an existing agricultural-related use.

5. **Agriculture, Research and Development**
   a. **Definition**
      The use of land or buildings for agriculture research and the cultivation of new agricultural products.
   b. **Approval Process – AR/RSA Zoning District**
      May be permitted in the AR/RSA Zoning District with an SA FLU subject to a Class B Conditional Use approval.
   c. **Outdoor Activities**
      Outdoor research, testing or development of agricultural products shall be limited to industrial zoning districts only.
   d. **Landscape**
      A Bona Fide Agriculture use may use railroad ties or landscape lumber as an alternate to the curbing requirement in Art. 7.C.4.E.2, Alternative to Curbing.

6. **Agriculture, Sales and Service**
   a. **Definition**
      An establishment primarily engaged in the sale or rental of farm tools, small implements and farming equipment such as pickers and mowers; sale of livestock, feed, grain, tack, riding attire, animal care products, farm supplies, and the like:
   b. **Approval Process – AR/RSA Zoning District**
      May be permitted in the AR/RSA Zoning District with an SA FLU, subject to a Class A Conditional Use approval.
c. **Storage**
   All storage areas for agricultural sales and service uses shall be enclosed or completely screened from view. A maximum of five tractor-trailers used for the transport of farm products may be stored outside if they are completely screened from view from adjacent properties and streets.

   **d. Grocery Sales**
   Five percent or 1,000 square feet, whichever is less, of the merchandise sales area use may be devoted to retail grocery sales. Shelves, floor area, counter space and overhead display areas shall be included in the calculation of the grocery sales area. There shall be no exterior signage and no external evidence of the availability of grocery products for sale.

   **e. Repair Service**
   Service of small implements only shall be permitted in an enclosed area that is completely screened from view from adjacent properties and set back a minimum of 25 feet from any side or rear property line. Repair activities shall occur only between the hours of 7:00 a.m. and 9:00 p.m.

7. **Agriculture, Storage**
   a. **Definition**
      The storage of equipment or products accessory or incidental to a principal agricultural use.
   b. **Storage**
      1) Storage of hazardous waste or regulated substances shall comply with Local, State, and Federal regulations.
      2) **Outdoor Agriculture Storage** shall comply with the following standards:
         a) **Urban Service Area**
            (1) **Setbacks**
               Outdoor Agriculture Storage shall meet the principal use setbacks of the zoning district in which it is located.
            (2) **Screening**
               Outdoor Agriculture Storage shall be screened from view by a solid fence, wall or building.
         b) **Outdoor Agriculture Storage**
            Outdoor Agriculture Storage is only permitted in the RE, RT, RS, RM, CN, CC and CG Zoning Districts as a Class B Conditional Use.
            (1) **Exception**
               Outdoor Agriculture Storage is not permitted in a PDD with a commercial FLU designation.
      3) Indoor Agricultural Storage shall be permitted in conjunction with a Bona Fide Agriculture use with or without a principal structure. Indoor storage shall be contained within a permanent structure. Agricultural Storage in a mobile home shall not be permitted. Agricultural Storage in a shipping container shall only be permitted in conjunction with a Bona Fide Agriculture use.
         a) **AR Zoning District in Urban Service Area (USA)**
            An enclosed structure shall be set back 100 feet from the front and side street and 50 feet from the side and rear property lines.
         b) **All Other Zoning Districts in Urban Service Area (USA)**
            An enclosed structure shall meet the principal use setbacks of the zoning district in which it is located.

8. **Agriculture, Transshipment**
   a. **Definition**
      A facility engaged in the transferring of agricultural products between two modes of transport, such as from a truck to a railroad car or from local vehicles to long-haul trucks.
   b. **Zoning District – AGR and AP**
      1) **Accessory Use**
         Agricultural Transshipment facilities not exceeding 25,000 square feet shall be permitted as an accessory use.
      2) **Setback**
         A minimum 100-foot setback shall be required along all property lines which are adjacent to an existing residential use, zoning district, or FLU designation as of the effective date of this Code excluding Farm Workers Quarters and Mobile Homes accessory to agriculture.

9. **Aviculture, Hobby Breeder**
   a. **Definition**
      The raising and care of birds in captivity.
b. **Lot Size**
   The minimum lot size shall be as follows:
   1) Two acres: 40-200 birds.
   2) Five acres: 201 or more birds.

c. **Hobby Breeder**
   1) **AR/USA**
      The raising of birds as a hobby in the AR/USA shall be permitted subject to the following:
      a) The hobby breeder shall not engage in the sale of more than 24 birds to the public during any consecutive 12-month period;
      b) The hobby breeder shall not provide care for more than 40 birds on a parcel of land at any time;
      c) The minimum lot size of two acres;
      d) Shelters, cages, and accessory structure shall be set back a minimum of 50 feet from all property lines;
      e) Outdoor shelters and cages shall be contained to specific areas on the site and screened from view on all sides by a minimum six-foot-high opaque fence or wall. The fence or wall shall be located within 20 feet of the containment area;
      f) The hobby breeder shall locate birds which excessively screech, chirp, crow, or make loud noises away from residential properties to the maximum extent possible. Birds considered a nuisance by the Sheriff’s Office shall be removed from the site; and,
      g) Care, licensing, registration, and inspections shall be as required by the Animal Care and Control Ordinance and other applicable statutes.

10. **Community Vegetable Garden**
    a. **Definition**
       A plot of land used primarily as a vegetable garden which is cultivated and harvested by a group of residents from the surrounding area.
    b. **Setbacks**
       Accessory activities shall maintain a setback of five feet from all property lines adjacent to residential zoning districts.
    c. **Accessory Structures**
       1) Accessory structures shall be limited to 400 square feet.
       2) Accessory structures shall meet the setbacks of the zoning district in which the parcel is located. [Ord. 2019-005]
    d. **Parking**
       Overnight parking shall be prohibited.
    e. **Loading**
       All loading and unloading activities shall be restricted to the site and shall not encroach into any setbacks.
    f. **Landscaping**
       Shall be exempt from Art. 7, Landscaping, when located in the WCRAO or CCRT Areas. [Ord. 2019-005]
    g. **Storage**
       Outdoor storage shall be prohibited. Storage of all accessory equipment or products shall be contained within an accessory structure.
    h. **Spraying**
       Aerial application of fertilizer or pesticides shall be prohibited.

11. **Equestrian Arena, Commercial**
    a. **Definition**
       An establishment engaged in commercial spectator activities involving equestrian events, but excluding any establishment engaged in gaming, pari-mutual wagering, off-track betting, events or activities held or broadcast for similar purposes.
    b. **Tier**
       1) **Urban/Suburban (U/S)**
          a) **Lot Size**
             The minimum lot size shall be five acres.
          b) **Frontage**
             The project in which an equestrian arena is located shall front on and access from Collector or Arterial Street.
2) Rural, Exurban, Agricultural Reserve (AGR) and Glades
   a) Location
      The project in which an equestrian arena is located shall have frontage on a paved street.
   b) Operating Hours
      Outdoor activity shall be limited to the hours of 5:00 a.m. and 10:00 p.m. daily.
   c) Loudspeakers
      Loudspeakers and public address systems shall not be used before 8:00 a.m. or after 8:00 p.m.

3. Setbacks
   a) Hours of Operation
      Outdoor activity shall be limited from hours of 6:00 a.m. to 10:00 p.m. daily.
   b) Loudspeakers
      Loudspeakers and public address systems shall not be used before 8:00 a.m. or after 8:00 p.m.

2) Rural, Exurban, Agricultural Reserve (AGR) and Glades
   a) Location
      The project in which an equestrian arena is located shall have frontage on a paved street.
   b) Operating Hours
      Outdoor activity shall be limited to the hours of 5:00 a.m. and 10:00 p.m. daily.
   c) Loudspeakers
      Loudspeakers and public address systems shall not be used before 8:00 a.m. or after 8:00 p.m.

3. Setbacks
   a) Hours of Operation
      Outdoor activity shall be limited from hours of 6:00 a.m. to 10:00 p.m. daily.
   b) Loudspeakers
      Loudspeakers and public address systems shall not be used before 8:00 a.m. or after 8:00 p.m.

2) Rural, Exurban, Agricultural Reserve (AGR) and Glades
   a) Location
      The project in which an equestrian arena is located shall have frontage on a paved street.
   b) Operating Hours
      Outdoor activity shall be limited to the hours of 5:00 a.m. and 10:00 p.m. daily.
   c) Loudspeakers
      Loudspeakers and public address systems shall not be used before 8:00 a.m. or after 8:00 p.m.

3. Setbacks
   a) Hours of Operation
      Outdoor activity shall be limited from hours of 6:00 a.m. to 10:00 p.m. daily.
   b) Loudspeakers
      Loudspeakers and public address systems shall not be used before 8:00 a.m. or after 8:00 p.m.
3) Alternative Buffer
   a) A six-foot-high landscape barrier shall be installed within a buffer with a minimum width of ten feet; [Ord. 2019-039]
   b) The landscape barrier shall be satisfied by plant material for sale provided that the plant material is grown in the ground, and spaced at least five feet on center. Plants in container may be used in lieu of the in-ground planting. Any removed plants shall be replaced, and shall be maintained to ensure there is a continuous visual screen being provided at all times [Ord. 2019-039]

4) Barbed Wire
   The use of barbed wire shall be prohibited.

h. Storage
   Mulch, rock, soil, or similar material shall comply with the outdoor storage standards in Art. 5.B, Accessory Uses and Structures. In residential zoning districts, outdoor bulk storage shall be set back a minimum of 50 feet or the zoning district setback, whichever is greater.

i. Site Plan
   Relocation of structures on a ZC or BCC approved site plan due to SFWMD or ERM requirements may exceed DRO threshold limitations.

j. Hours of Operation
   Operation of commercial vehicles over one ton rated capacity or gross vehicle weight of 10,000 pounds, including load, from 5:00 p.m. to 8:00 a.m. is prohibited.

k. Compatibility
   The use shall assure that there is no incompatibility with surrounding land uses. When an incompatibility exists, the Property Owner shall satisfactorily mitigate the incompatibility prior to receiving Conditional Use or DRO approval.

l. Spraying
   No aerial application of any pesticides, fungicides, fertilizers or any other chemical shall be allowed.

14. Nursery, Wholesale
   a. Definition
      The wholesale of horticultural specialties such as flowers, shrubs, sod, and trees, mulch and accessory hardscape materials such as decorative stones intended for ornamental or landscaping purposes.

   b. Approval Process

   1) All Other Districts
      Permitted.

   c. Tier
      In addition to the above standards, a Wholesale Nursery in the U/S Tier shall comply with the following standards:

   1) Lot Size
      A minimum of one acre.
2) **Setbacks**
All structures and outdoor storage areas shall be set back a minimum of 50 feet from the property line. Shade Houses shall be subject to the requirements pursuant to [Art. 4.B.6.C.17, Shade House](#).

3) **Compatibility**
The use shall assure that there is no incompatibility with surrounding land uses. When an incompatibility exists, the Property Owner shall satisfactorily mitigate the incompatibility prior to receiving a DO. [Ord. 2018-002]

4) **Spraying**
No aerial application of any pesticides, fungicides, fertilizers, or any other chemical shall be allowed.

d. **Zoning District – AR**
May be operated in conjunction with a residence.

e. **Accessory Use**
   1) A Retail Nursery may be permitted as an accessory use to a Wholesale Nursery in the AGR Tier.
   2) An office is permitted as an accessory use, provided it is not a mobile home.

f. **Parking and Loading**
All parking and loading shall occur on site.

g. **Landscaping**
A buffer, pursuant to [Art. 7, Landscaping](#), shall be provided along all property lines except when the growing area is located adjacent to the property line of the site, as follows: [Ord. 2019-039]
   1) **R-O-W and Incompatibility Buffer**
      May be modified when the growing area is 50 feet or more in width, subject to the provision of [Art. 4.B.6.14.g.3), Alternative Buffer](#). [Ord. 2019-039]
   2) **Compatibility Buffer**
      Is exempt where the growing area is adjacent to a parcel of land that has an existing agriculture use pursuant to [Art. 4.B.6, Agricultural Uses](#). [Ord. 2019-039]

3) **Alternative Buffer**
   a) A six-foot-high landscape barrier shall be installed within a buffer with a minimum width of ten feet. [Ord. 2019-039]
   b) The landscape barrier shall be satisfied by plant material for sale provided that the plant material is grown in the ground, and spaced at least five feet on center. Plants in container may be used in lieu of the in-ground planting. Any removed plants shall be replaced, and shall be maintained to ensure there is a continuous visual screen being provided at all times. [Ord. 2019-039]

4) **Barbed Wire**
The use of barbed wire shall be prohibited.

h. **Storage**
Outdoor bulk storage of mulch, rock, soil or similar material shall comply with the outdoor storage standards contained in [Art. 5.B, Accessory Uses and Structures](#). Outdoor bulk storage in residential zoning districts shall be set back a minimum of 50 feet or the district setback, whichever is greater.

i. **Hours of Operation**
Operation of commercial vehicles over one ton rated capacity or gross vehicle weight of 10,000 pounds, including load, from 7:00 p.m. to 6:00 a.m. is prohibited.

j. **Limitations of Sales**
Sales from a Wholesale Nursery are limited to exporters, distributors, landscape contractors, retailers, or other businesses.

k. **Site Plan**
Relocation of structures on a ZC or BCC approved site plan due to SFWMD or ERM requirements may exceed the DRO limitations contained in [Art. 2.G.4.G, Development Review Officer (DRO)](#).

15. **Potting Soil Manufacturing**
   a. **Definition**
      An establishment engaged in producing potting soil, including the use of incineration.
   b. **Approval Process – AR/RSA**
      May be permitted in the AR/RSA district with an SA FLU, subject to a Class A Conditional Use approval.
c. Location
The facility shall front on and access from a Collector or Arterial Street.

d. Setbacks
A minimum of 50 feet from any property line abutting a residential zoning district or use.

e. Collocated Uses
If a Potting Soil Manufacturing facility includes chipping, mulching, grinding, or air curtain incinerator, adherence to the Supplementary Use Standards applicable to such uses shall also be required.

f. Storage
Storage of unprocessed material shall be limited to 45 days and pile height of storage material shall be limited to 15 feet. Outdoor storage piles shall be set back a minimum of 25 feet from any property line or 50 feet from any property line abutting a residential zoning district or use. Storage areas shall be screened from view, pursuant to Art. 5.B, Accessory Uses and Structures.

g. Supplemental Application Requirements
1) Site Plan
The Site Plan shall illustrate how the operation functions including circulation routes, square footage, height; and location of buildings, equipment, and storage piles.

2) Dust Control
A plan to address dust control in traffic, storage and processing areas. Dust control measures may include: additional setbacks, full or partial enclosure of chipper or grinder and watering or enclosing mulch piles.

16. Produce Stand

a. Definition
An establishment engaged in the retail sale of fruits, vegetables, flowers, containerized house plants and other agricultural food products. The sale of grocery or convenience-type foods or products shall not be permitted, unless stated otherwise herein.

b. Permanent
1) Maximum Floor Area
The square footage of the establishment shall include both the structure and all accessory areas devoted to display or storage.

2) Outdoor Display and Storage
Outdoor storage shall be subject to the provisions in Art. 5.B, Accessory Uses and Structures. Outdoor display of only fresh fruits and vegetables is permitted, along the property’s frontage, except within the required setbacks.

3) Sale of Products
a) General
Includes sales of agricultural food products such as jelly, jam, honey, and juice. No ZAR process shall be permitted in conjunction with the stand except for seasonal sales. Seasonal sales that require additional storage area may be permitted in accordance with Art. 4.B.11.C.10, Temporary Retail Sales. No vending machines or other similar equipment shall be permitted on site. [Ord. 2018-002] [Ord. 2019-005]

b) Urban/Suburban Tier
The sale of packaged or canned food products may be permitted, where in compliance with the following:
   (1) The parcel has commercial Future Land Use designation; and
   (2) Sales area is limited to five percent of the total square footage of the structure, or 1,000 square feet, whichever is less.

4) Building Construction
The Produce Stand shall be contained in either an entirely enclosed or roofed open-air structure. Motor vehicles, including vans, trucks, semi-trucks, mobile homes, travel trailers, and other permanent or temporary structures shall not be used for storage or display purposes.

5) AR/RSA and AGR Tiers
In addition to the standards above, permanent produce stands shall comply with the following:

a) Locational Criteria
The structure and accessory area shall be:
   (1) Located on an Arterial designated on the PBC Thoroughfare Plan; and
   (2) Located at least 500 feet from adjacent existing residential uses.
b) Lot Size
The stand shall be located on a legal lot of record. A minimum of one acre shall be allocated to the exclusive use of the stand and accessory parking area.

c) Setbacks
The structure and accessory area shall be set back at least 50 feet from the front and side corner property lines. The rear and side interior setbacks shall meet the minimum standards of the zoning district.

d) Approval
A permanent Produce Stand shall be a permitted use in the AGR and AR, and by a DRO approval through the ZAR Process in the CN, CC, and CG districts. [Ord. 2018-002]

(1) AR and AGR Zoning Districts
The area devoted to the permanent Produce Stand exceeding 3,000 square feet shall be approved subject to a Class A Conditional Use.

6) Stands Less than 1,500 Square Feet
In addition to the standards stated above, stands less than 1,500 square feet (including both the structure and all accessory areas devoted to display or storage) shall be subject to the following development standards:

a) Paving
The surface parking lot may be constructed of shell rock or other similar material. At a minimum, the following areas shall be paved in accordance with Art. 6, Parking, Loading, and Circulation, of this Code:

(1) A paved driveway apron area, connecting the streets to the site shall be subject to approval by the County Engineer; and
(2) Handicap parking spaces and handicap access.

7) Wholesale
Wholesale of produce shall be allowed in the AGR Zoning District only.

c) Temporary Stands
A temporary stand used for the retail sale of agricultural products not necessarily grown on the site. A temporary Produce Stand shall consist exclusively of fresh unprocessed fruit, vegetables, flowers, and containerized interior houseplants.

1) Use Limitations
a) Location Criteria
The stand and accessory area shall be located:
(1) on an Arterial Street designated on the PBC Thoroughfare Plan;
(2) a minimum of 100 feet from an Intersection of an Arterial and any other dedicated R-O-W;
(3) at least 600 feet from any other agricultural stand permitted in accordance with these provisions; if located in a zoning district other than a commercial district;
(4) at least 500 feet from adjacent residential uses, and,
(5) located on a legal lot of record no less than one acre in size.

b) Number
Only one stand shall be permitted on a lot of record.

c) Approval
Subject to approval of a Temporary Use through the ZAR Process. [Ord. 2018-002]

d) Setbacks
The stand shall be set back a minimum of 35 feet from the front property line and 50 feet from all other property lines.

e) Size and Configuration
The stand shall not exceed 300 square feet. The accessory area shall be limited to display, storage and cashier purposes and shall be covered by a removable cantilevered canopy or umbrellas. No outdoor display or storage shall occur outside of the stand, umbrella, or canopy area.

2) Uses
No on-site food preparation or processing shall be permitted. No vending machines shall be permitted on site. No additional Temporary Uses shall be approved in conjunction with the stand except for seasonal sales. [Ord. 2018-002]
3) Parking
A minimum of two spaces and additional spaces subject to approval by the Zoning Director.

4) Special Regulations

a) Mobility
The stand shall retain its mobility, and have a frame of sufficient strength to withstand being transported by wheels, skids, or hoist.

b) Building Materials
The stand shall be constructed of durable materials such as but not limited to metal, fiberglass, wood, etc. The structure used for a stand shall be constructed for the sole purpose of selling agricultural products. Semi-truck trailers, mobile homes, and other permanent or temporary structures shall not be used as a stand. Motor vehicles, including vans and small trucks may be permitted provided the vehicle is removed from site at the end of each business day. These vehicles shall not be used for permanent or temporary residential purposes.

c) Refrigeration
Refrigeration shall be contained within the confines of the stand. If a motor vehicle is used for the stand, portable refrigeration may be used if contained as part of a motor vehicle and removed from the site daily.

d) Signage
Signs shall be limited to two, with a combined maximum sign face area of 32 square feet per side. Signs shall be set back a minimum of five feet from the base building line and have a minimum separation of 100 feet. Banners, pennants, balloons, or flags shall be prohibited.

e) Existing Stands
All stands with a valid permit in effect on July 11, 1995, and which have been operating continually with a valid Business Tax Receipt since issuance of the valid permit, shall be considered conforming uses. These operations may continue in the configuration as existed on July 11, 1995 in accordance with the laws and ordinances of PBC, Florida, and as provided herein:

17. Shade House

a. Definition
A temporary screen enclosure used to protect plants from insects, heat and exposure to the sun.

b. Permits
A Shade House used for Bona Fide Agriculture purposes less than 12 feet in height shall not be required to obtain a Building Permit.

c. **Commercial Greenhouse**

Commercial greenhouses having roofs and walls made of rolled plastic or other similar materials, used for the indoor cultivation of plants, including hydroponic farming using water containing dissolved inorganic nutrients, may be permitted in the AGR Zoning Districts, subject to the following:

1) **DRO Approval**
Commercial greenhouses that exceed the FAR limitations of FLU Element Table III.C.2 of the Plan, or with five or more acres of building coverage must be approved by the DRO.

2) **Property Development Regulations**
Setbacks for greenhouses in excess of 25 feet in height must be in accordance with Table 3.D.1.A, Property Development Regulations (PDRs). Setbacks for greenhouses less than 25 feet in height may be reduced by 50 percent. FAR and Building Coverage may be increased up to a maximum of 0.75 to accommodate commercial greenhouses.

3) **Landscaping and Buffering**
Commercial greenhouses are exempt from the interior and foundation planting requirements of Art. 7.C.3, Interior Landscaping. A Type 3 Incompatibility Buffer shall be required along property lines where greenhouses are adjacent to or visible from a public R-O-W or parcels with a civic, conservation, commercial, recreational, or residential FLU designation or use. Buffers shall be a minimum of 25 feet in width for greenhouses up to 25 feet in height, and 50 feet for greenhouses greater than 25 feet in height.

   a) **Exceptions**
      1) **Visual Screening**
         Landscape buffer and planting requirements may be waived in areas where it can be demonstrated that greenhouse structures are not visible from the subject property lines or use areas.
      2) **Alternative Planting**
         Planting requirements may be satisfied by the use of existing native vegetation or the placement of other related plant material, provided that the growing area is at least 25 feet wide and meets the buffering requirements for a Type 3 Incompatibility Buffer.

4) **Parking**
All parking and loading shall occur in the designated areas indicated on the site plan.

   a) **Parking**
      If vans, buses, or commercial loading vehicles are used for employee transportation, required parking shall be configured to accommodate these vehicles.
   b) **Loading**
      Loading zones shall not be oriented towards residential uses, and shall be set back from property lines a minimum of 250 feet, unless approved as a Type 1 Waiver.

5) **Storage**
Only equipment directly related to the facility may be stored on site. All stored equipment must be screened from view from adjacent properties and streets.

6) **Interior Lighting**
Greenhouses shall not be illuminated between 9:00 p.m. and 6:00 a.m. if light is visible from outside of the structure from any adjacent R-O-W, or properties with a residential FLU designation or use.

7) **Accessory Office**
An office is permitted as an accessory use, subject to the following and all other applicable requirements:

   a) Less than five acres of commercial greenhouse: 1,000 square feet.
   b) Greater than five acres of commercial greenhouse: 2,000 square feet.
   c) Bathroom facilities shall not be included in the calculation of office square footage.

8) **Signage**
Signage for commercial greenhouses shall be limited to one freestanding sign located at the projects primary entrance.
18. Stable, Commercial  
a. Definition  
An establishment for boarding, breeding, training or raising of horses not necessarily owned by the owners or operators of the establishment; rental of horses for riding or other equestrian activities, excluding uses classified as an equestrian arena.
b. Use Limitations  
A Commercial Stable shall be limited to raising, breeding, training, boarding, and grooming of horses, or rental (livery) of horses for riding and instruction.
c. Overlay – LOSTO  
A Commercial Stable with 20 or fewer stalls shall be subject to a DRO approval through the ZAR Process. [Ord. 2018-002]
d. Frontage  
The minimum required frontage on a public street to be used from the primary point of access shall be 100 feet, or the minimum standard of the Tier in which the stable is located, whichever is greater.
e. Lot Size  
A minimum of five acres.
f. Setbacks  
A minimum of 25 feet from any property line, or the minimum setback of the zoning district, whichever is greater.
g. Collocated Uses  
A Commercial Stable may be operated in conjunction with a residence and shall comply with the PBCACC.

19. Stable, Private  
a. Definition  
The breeding, boarding, training, or raising care of horses owned by the occupants or owners of the premises. A Private Stable shall comply with the PBCACC.
b. Setbacks  
1) Accessory Structure  
A Private Stable with 12 stalls or fewer located on a parcel with a Single Family residence shall be considered an accessory structure and shall meet the setback requirements for an accessory structure, or 25 feet, whichever is greater.
2) Principal Structure  
A Private Stable with more than 12 stalls located on a parcel with a Single Family residence, or a vacant parcel, shall be considered a principal structure and shall meet the applicable setback requirements for a principal structure.
c. Boarding  
On sites of at least two acres, boarding for up to four horses not owned by the owner or occupant of the premises shall be permitted.

20. Sugar Mill or Refinery  
a. Definition  
An establishment for the extraction and refining of sugar from agricultural products.
b. Setback  
Shall be set back 300 feet from off-site residentially occupied or zoned property. In the AR Zoning District, a Sugar Mill or Refinery shall be permitted on land in an RR FLU designation as a Class A Conditional Use.

**Use Approval Process Key:**
- **P** Permitted by Right
- **D** Subject to DRO Approval
- **A** Subject to BCC Approval (Class A Conditional Use)
- **B** Subject to Zoning Commission Approval (Class B Conditional Use)
- **R** Prohibited Use, unless stated otherwise within Supplementary Use Standards

**Supplementary Use Standards:**
- Use Approval Process Key: *(1)* Supplementary Use Standards for each use must be reviewed regardless of the approval process set forth in the Use Matrix. Refer to the numbers in the Supplementary Use Standards column.
B. General Utility Standards  
Reserved for future use.

C. Definitions and Supplementary Use Standards for Specific Uses  

1. Chipping and Mulching  
   a. Definition  
   An establishment using equipment designed to cut tree limbs, yard trash, or brush into small pieces for use as mulch.
   
   b. Approval Process  
   1) A Chipping and Mulching Use accessory to a Bona Fide Agriculture use in the AP Zoning District may be Permitted by Right.
   2) Chipping and Mulching may be allowed in the AR Zoning District of the RSA with an SA FLU designation, subject to Class A Conditional Use approval.
   
   c. Access  
   Access shall be limited to Arterial, Collector, or Local Commercial Streets which do not serve residential lots. Entrances shall be gated and set back from the road as required by the County Engineer to prevent access during non-operating hours from unauthorized persons.
   
   d. Lot Size  
   A minimum of five acres.
   
   e. Separation Distance  
   The use shall be located a minimum of 500 feet from a parcel of land with a residential FLU designation or uses.
   
   f. Collocated Uses to Recycling Plant  
   Chipping and Mulching may be approved by the DRO subject to the Supplementary Use Standards for Chipping and Mulching.
   
   g. Outdoor Storage  
   1) Outdoor storage shall be set back a minimum of 25 feet from any property line or 50 feet from any property line abutting a parcel with a residential FLU designation or use.
   2) Bollards or other acceptable barricade to the Zoning Division shall be provided to delineate pile locations.
   3) The pile height of storage materials shall be limited to 15 feet or less if required by Chapter 62-709, F.A.C., as amended. Bollards shall be maintained to indicate maximum permitted height, and tied to a finished grade benchmark delineated on site.
   4) Outdoor storage of material shall be limited to 45 days.
   
   h. Hours of Operation  
   The hours of operation shall be limited to 9:00 a.m. to 5:00 p.m. Monday through Friday if within 1,000 feet of a residential zoning district.
   
   i. Operation Functions  
   The Zoning application shall include but not limited to a Justification and supporting documentation demonstrating acceptable industry design, configuration and operational standards, based on the type of materials processed and stored, including but not limited to the following:
   1) Site Plan  
      The Site Plan shall illustrate how the operation functions including circulation routes; and the location and size of loading and processing areas and storage piles.
   2) Waste Volume  
      An explanation of the quantity of waste to be received, expressed in cubic yards per day or tons per day.
   3) Dust Control  
      A plan to address how dust generated from traffic, storage and processing areas will be managed pursuant to Art. 5.E.4.D.3, Dust and Particulate.
   4) SWA Permit  
      Prior to operation of the facility, the owner or operator shall obtain a SWA Permit.

2. Composting Facility  
   a. Definition  
   A facility designed and used for transforming yard waste, clean wood and other organic material into soil or fertilizer through biological decomposition.
   
   b. Approval Process  
   1) A Composting Facility accessory to a Bona Fide Agriculture use in the AP Zoning District may be Permitted by Right.
2) A Composting Facility may be allowed in the AR Zoning District in the RSA with an SA FLU designation, subject to Class A Conditional Use approval.

c. Access
Access shall be limited to Arterial, Collector, or Local Commercial Streets which do not serve residential lots. Entrances shall be gated and set back from the road as required by the County Engineer to prevent access during non-operating hours from unauthorized persons.

d. Lot Size
A minimum of five acres.

e. Separation Distance
The use shall be located a minimum of 500 feet from a parcel of land with a residential FLU designation or uses.

f. Outdoor Storage
1) Outdoor storage shall be set back a minimum of 25 feet from any property line or 50 feet from any property line abutting a parcel with a residential FLU designation, zoning district, or use.

2) Outdoor storage of material shall be limited to 45 days.

3) The pile height of storage materials shall be limited to 15 feet or less if required by Chapter 62-709, F.A.C., as amended.

4) The height of materials shall be tied to a finished grade benchmark delineated on site.

5) Bollards or other acceptable barricade to the Zoning Division shall be provided to delineate pile locations.

g. Hours of Operation
The hours of operation shall be limited to 9:00 a.m. to 5:00 p.m. Monday through Friday if within 1,000 feet of a residential FLU designation or use.

h. Operation Functions
The Zoning or Building application, whichever is submitted first, shall include a Justification Statement and supporting documentation demonstrating acceptable industry design, configuration and operational standards, based on the type of materials processed and stored, including but not limited to the following:

1) Site Plan
The Site Plan shall illustrate how the operation functions including circulation routes; and the location and size of loading and processing areas and storage piles.

2) Waste Volume
An explanation of the quantity of waste to be received, expressed in cubic yards per day or tons per day.

3) Dust Control
A plan to address how dust generated from traffic, storage and processing areas will be managed pursuant to Art. 5.E.4.D.3, Dust and Particulate.

4) SWA Permit
Prior to operation of the facility, the owner or operator shall obtain a SWA Permit.

i. Backyard Composting
This use does not include backyard-composting bins serving individual families.

j. Glades and AGR Tiers
The composting, storage or disposal of equestrian and other animal waste, and bio solids shall be prohibited in the Glades and AGR Tiers. This provision does not prohibit accessory uses to Bona Fide Agriculture or Composting Facilities with County approval in the AGR Tier as of the effective date of this Ordinance. [Ord. 2018-018]

3. Electric Distribution Substation
a. Definition
Defined in accordance with F.S. § 163.3208, as an electric substation which takes electricity from the transmission grid and converts it to a lower voltage so it can be distributed to customers in the local area on the local distribution grid through one or more distribution lines less than 69 kilovolts in size.

b. Landscaping
The use shall comply with the following additional requirements unless variance relief is obtained from landscaping regulations:
1) **Landscape Buffering – General**

Pursuant to **F.S. § 163.3208**, as may be amended from time to time, required perimeter buffers or landscape material located under overhead lines to the substation equipment shall not exceed a mature height of 14 feet.

2) **Landscape Buffering in Residential Areas**

Pursuant to **F.S. § 163.3208**, as may be amended from time to time, where located in or adjacent to a parcel of land with a residential FLU designation or use, landscape buffering shall be upgraded as follows:

a) An eight-foot-high wall or fence and native vegetation shall be installed around the substation where equipment or structures are setback less than 50 feet from the property line.

b) An open green space shall be maintained between required security fencing, equipment or structures, by installing native landscaping, including trees and shrub material, around the substation where equipment or structures are setback between 50 and 100 feet from the property line.

c. **Standard Residential Zoning Districts**

Electric Distribution Substations shall not be collocated with Neighborhood Recreation Facilities.

4. **Electric Power Plant**

a. **Definition**

An electric generating facility that uses any process or fuel, and includes any associated facility that directly supports the operation of the electrical power facility.

b. **Setbacks and Separation**

1) An Electric Power Plant, for electrical generation only, shall not be located within 1,000 feet of a parcel with a residential FLU designation or use.

2) Principal uses and structures (excluding electric poles) shall be set back a minimum of 500 feet from all property lines.

3) Accessory uses and structures (excluding electric poles) shall be set back a minimum of 50 feet from all property lines.

c. **Ash Disposal and Wood Recycling Facilities – AP Zoning District**

Ash disposal and wood recycling facilities shall be permitted on sites in the AP Zoning District as an accessory use to biomass Electric Power Plant. The primary use for the site shall be consistent with the underlying zoning designation.

1) Ash disposal facilities shall not exceed 220 feet in height measured from the existing grade at the base of the facility.

2) Ash disposal facilities shall be used only for the disposal of ash produced onsite by the biomass Electric Power Plant.

3) Ash disposal facilities shall not be constructed until the plans for its construction and operation have been reviewed and approved by all applicable governmental agencies.

4) Ash disposal facilities shall be constructed as a Class I landfill in compliance with the applicable standards adopted by the Florida Department of Environmental Protection and set forth in **F.S. § 403.707** and **Chapter 62-701, F.A.C.**, for Class I landfills.

d. **Screening and Perimeter Buffers**

A Type 3 Incompatibility Buffer shall be required when the subject site is adjacent to or visible from any street or parcels with a conservation (when open to the public), commercial, or residential FLU designation or use. Palms may not be substituted for required Canopy trees.

e. **Collocated Use – Electric Transmission Substation Facility**

An Electric Transmission Substation collocated with a new request or DOA for an Electric Power Plant may be reviewed and approved as one application, and shall comply with the requirements of **Art. 4.B.7.C.5, Electric Transmission Substation**.

5. **Electric Transmission Substation**

a. **Definition**

A facility associated with the transfer of bulk electrical energy from Electric Generating Plants to Electric Distribution Substations, including transmission voltage facilities or switching substations.

b. **Setbacks**

Notwithstanding the requirements of **Table 3.D.1.A, Property Development Regulations (PDRs)**, setbacks for Electric Transmission Substations, excluding transmission and distribution lines and electric poles, shall be as follows:
1) Buildings used for Electric Transmission Substations shall be set back a minimum of 50 feet from all property lines.

2) Setbacks for mechanical equipment, related structures and fencing shall be a minimum of 75 feet, or a minimum of 150 feet when adjacent to or visible from a street or parcels with a conservation (when open to the public), commercial, or residential FLU designation or use. Setbacks may be reduced to 100 feet, if the Incompatibility Buffer is increased to 50 feet in width and the number of required trees are doubled. Setbacks may also be reduced to 75 feet when adjacent to commercial properties, or when separated from adjacent properties by a R-O-W 100 feet in width or greater, if the Applicant can demonstrate that structures will not be visible from residential or public use areas.

3) One additional foot of setback shall be provided in addition to the minimum setback for each one foot in height, or fraction thereof, over 35 feet.

c. Landscaping
A Type 3 Incompatibility Buffer shall be required when the subject site is adjacent to or visible from any street or parcels with a conservation (when open to the public), commercial, or residential FLU designation or use. Palms shall not be substituted for required Canopy trees.

d. Standard Residential Zoning Districts
An Electric Transmission Substation shall not be collocated with Neighborhood Recreation Facilities.

6. Landfill or Incinerator
a. Definition
A facility for the disposal or incineration of solid waste for which a permit is required by the Florida Department of Environmental Protection, which receives solid waste for disposal in or upon the land. The term does not include a land-spreading site, injection well or surface impoundment.

b. SWA Permit
Prior to operation of the facility, the owner or operator shall obtain a SWA Permit.

c. Airport Land Use Compatibility Zoning
1) New Landfills are prohibited, and existing Landfills within the following areas are restricted pursuant to Art. 16.C.1.E, General Land Use Regulations – Off-Airport Land Use Compatibility Schedule (Appendix 8): [Ord. 2017-025]
   a) Within 10,000 feet from the nearest point of any Airport runway used or planned to be used by turbine aircraft or, [Ord. 2017-025]
   b) Within 5,000 feet from the nearest point of any Airport runway used by only non-turbine aircraft or, [Ord. 2017-025]
   c) Outside the perimeters defined in subparagraphs a) and b), but still within the lateral limits of the civil airport imaginary surfaces defined in 14 CFR § 77.19. Case-by-case review of such landfills is advised. [Ord. 2017-025]

2) Where any Landfill is located and constructed in a manner that attracts or sustains hazardous bird movements from feeding, water or roosting areas into, or across, the runways or approach and departure patterns of aircraft. The Landfill operator must incorporate bird management techniques or other practices to minimize bird hazard to airborne aircraft. These management techniques shall be addressed in the applicable zoning application. DOA, in consultation with the PZB, shall administer the review of development application for compliance. [Ord. 2017-025]

7. Minor Utility
a. Definition
An above-ground facility associated with utility distribution, collection, or transmission networks, required by their nature to be relatively dispersed throughout their service area other than electric generation and transmission facilities.

b. Typical Uses
Gas and water regulators, chlorine injection and potable water booster pump stations; water reclamation treatment, storage and distribution facilities, membrane bioreactor plants, sewage lift stations, telephone exchange buildings, and communication substations.

c. Floor Area
1) Residential Zoning Districts
A maximum of 3,000 square feet of gross enclosed floor area of buildings. Square footage calculations shall not include tanks and unoccupied facilities and structures.
2) **Non-Residential Zoning Districts**
   A maximum of 10,000 square feet of gross enclosed floor area of buildings. Square footage calculations shall not include tanks and unoccupied facilities and structures.

3) A Minor Utility exceeding either standard above may be approved as a Class A Conditional Use.

d. **Lift Station**
   1) **New Subdivisions**
      Facilities located in new subdivisions may be allowed subject to DRO approval concurrent with the subdivision approval.
   2) **Streets**
      Facilities located within streets or utility easements shall not be subject to DRO approval.

e. **States of Emergency**
   The PZB Executive Director may waive the review timeframes in the event of a declared state of emergency.

f. **Hours of Operation**
   Minor Utilities are not subject to the hours of operation in Art. 5, Supplementary Standards.

8. **Renewable Energy Solar Facility**
   a. **Definition**
      A facility that uses photovoltaic, thermal, or other systems with a principal use of producing electric or thermal power from the sun that is then stored and delivered to the transmission system and consumed off site. [Ord. 2019-023]
   b. **Lot Size**
      Lots shall comply with the minimum lot dimension requirements pursuant to Table 3.D.1.A, Property Development Regulations (PDRs), or the applicable PDD requirements.
   c. **Setbacks**
      Accessory electric poles, distribution, and transmission lines shall be exempt from the minimum setback requirements indicated below:
      1) **Lots 50 Acres or Greater**
         Setbacks shall be a minimum of 25 feet from the side and rear property lines. The facility shall comply with the minimum front and side street setbacks of the applicable zoning district.
      2) **Lots Less Than 50 Acres**
         Setbacks shall be a minimum of 15 feet from the side and rear property lines. The facility shall comply with the minimum front and side street setbacks of the applicable zoning district.
      3) **Lots Adjacent to Existing Residential Uses**
         Setbacks shall be a minimum of 35 feet or the zoning district setback, whichever is greater, along the affected property line.
      4) **Additional Setback**
         One additional foot of setback shall be required in addition to the minimum setback indicated above for each one foot of height, or fraction thereof, over 20 feet.
   d. **Perimeter Buffers and Interior Tree Requirements**
      1) For facilities within the Rural, Exurban, and Glades Tiers greater than 250 acres in size, the following rules shall apply: [Ord. 2019-023]
         a.) **R-O-W Buffer**
            Shall be exempt from the requirements of Art. 7.C.2.A, R-O-W Buffer, provided a six-foot-high landscape barrier is installed. If a hedge is proposed, credit to satisfy the hedge material may be granted for on-site preservation of existing vegetation pursuant to Art. 7.E.3, Credit and Replacement. An alternative hedge height may be allowed subject to the following: [Ord. 2019-023]
            (1) Minimum two feet at time of installation and maintained at a minimum height of six feet and no greater than 12 feet pursuant to Art. 7.D.4.A, Hedges; [Ord. 2019-023]
            (2) The solar panels, including support structures, shall be no greater than eight feet in height and set back a minimum of 80 feet from the adjacent R-O-W or base building line, whichever is more restrictive; and, [Ord. 2019-023]
            (3) The area between the R-O-W Buffer and the minimum setback shall be limited to landscaping, drainage easements, and a drive aisle that is used for the repair, maintenance, and/or installation of the solar panels, when the hedge is less than six feet in height. [Ord. 2019-023]
b.) **Compatibility Buffer**

(1) Shall be exempt from the landscaping requirements of [Art. 7, Landscaping](#) when the site meets or exceeds the minimum 25-foot setback, and is adjacent to a parcel of land with agricultural or utility uses or a conservation FLU designation; or *[Ord. 2019-023]*

(2) Shall be exempt from the landscaping requirements of [Art. 7, Landscaping](#) when the site meets or exceeds a 50-foot setback, and is adjacent to a parcel of land with an existing landscape buffer. *[Ord. 2019-023]*

c.) **Incompatibility Buffer**

The Type 3 Incompatibility Buffer may be reduced to 50 percent of the landscaping materials, excluding the width, and can be a hedge or fence. *[Ord. 2019-023]*

2) **All Tiers**

These facilities shall be exempt from interior landscape requirements for the developable area pursuant to [Art. 7, Landscaping](#) *[Ord. 2019-023]*

e. **Collocation with Existing Electric Power Plant**

Solar facilities located on a site with an existing Electric Power Plant may be approved pursuant to the approval process indicated in the appropriate Use Matrix, and shall not be subject to a Development Order Amendment pursuant to [Art. 2.B.7.C, Development Order Amendment (DOA)](#).

9. **Renewable Energy Wind Facility**

a. **Definition**

A facility that uses one or more wind turbines, meteorological (MET) towers, or other systems with a principal use of producing electric or mechanical power from the wind.

*Figure 4.B.1.A – Typical Renewable Energy Wind Turbine*
b. **Environmental Permitting – Letters of Engagement**

The Applicant shall provide a letter of engagement from all applicable environmental permitting agencies, including but not limited to: the Florida Fish and Wildlife Conservation Commission, U.S. Fish and Wildlife Service, Florida Department of Environmental Protection, or other applicable regulatory agency. Letters of engagement, or similar documentation, shall indicate that the proposed facility is under review for applicable permitting or siting requirements for endangered, threatened or species of special concern, migratory birds or bats, natural ecosystem or wetlands, or other local wildlife. The documentation shall be submitted to the Zoning Division, with the Zoning application. The Letter of Engagement shall include, at a minimum:
1) Identify organization as Federal, State, or Local;
2) Key individuals involved in review;
3) Role in review process (i.e. studies, review, or permitting); and,
4) Identify any permits or approvals required, critical dates, input in review process, and possible conditions of approval, where applicable.

d. **Lot Size**

Lots shall comply with the minimum lot dimension requirements pursuant to Table 3.D.1.A, Property Development Regulations (PDRs), or the applicable PDD requirements. Nonconforming legal lots of record may be included within the boundaries of a Renewable Energy Wind Facility if the overall project boundaries meet the minimum standards for the zoning district.

e. **Setback or Separation Requirements**

Accessory electric poles, distribution, and transmission lines shall be exempt from the minimum setback requirements indicated below.

1) Facilities shall comply with the minimum setback requirements of the applicable zoning district unless stated otherwise in the following Table.

<table>
<thead>
<tr>
<th>Structures</th>
<th>Minimum Separation (1)(2)</th>
<th>Minimum Setback (1)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Occupied Buildings within Project Boundary</td>
<td>Habitable Buildings within Project Boundary</td>
</tr>
<tr>
<td>Wind Turbines, MET Towers, or Other Similar Wind Energy Systems</td>
<td>1.1 x Height</td>
<td>2.5 x Height</td>
</tr>
<tr>
<td>Accessory or Collocated Buildings or Structures</td>
<td>Apply zoning district or accessory use PDRs as applicable.</td>
<td></td>
</tr>
</tbody>
</table>

**Notes:**
1. Setback or separation from wind turbines, MET towers or other similar structures shall be measured from the base as depicted in Figure 1.C.4.E, Typical Example of Measurement of Separation from Structure.
2. Definitions for Habitable and Occupied shall be in accordance with the Florida Building Code, as may be amended.

2) **Type 2 Variance for Setbacks or Separations**

Requests for Type 2 Variances from the setback or separation requirements listed above shall be permitted in accordance with Art. 2, Application Processes and Procedures, and the following:

a) The minimum proposed setback or separation is not less than 1.1 times the height of the structure; and

b) The Applicant submits a study demonstrating that shadow flicker caused by the proposed Renewable Energy Wind Facility will not affect any occupied or habitable building or outdoor recreation area. Some shadow flicker not to exceed 30 hours annually may be approved as part of the variance upon demonstration that the frequency range is not adverse to any segments of the public. The study shall be prepared by a licensed engineer, surveyor and mapper, architect, landscape architect, or other similar professional, including scientists specializing in Renewable Energy Wind technology.
3) **Setback within Multi-Parcel Renewable Energy Wind Facilities in AP**

Except for setbacks from habitable and occupied buildings as set forth in Table 4.B.7.C, **Renewable Energy Wind Facility Setbacks or Separations**, MET towers or other similar wind energy systems on parcels with an AP FLU designation and AP Zoning District, setbacks shall be measured from the Project Boundary, not from any lot lines located within the Project Boundary.

4) The measurement of height shall be in accordance with **Art. 4.B.9.B.5, Tower Height** (related to commercial communication towers), except that for wind turbines, the height shall be measured to the top of the turbine blade.

e. **Perimeter Buffers and Interior Tree Requirements**

1) A Type 1 Incompatibility Buffer shall be required when the subject site is adjacent to or visible from any street or parcels with a conservation (when open to the public), commercial, public and civic, or residential FLU designation, zoning district, or use. In addition, a Type 2 Incompatibility Buffer shall be required around the perimeter of all ground-mounted equipment or accessory buildings. Palms may be substituted for 50 percent of the required Canopy trees.

2) Wind turbines or MET towers located on parcels with an AP FLU designation and Zoning District shall be exempt from the landscaping requirements above.

3) These facilities shall be exempt from interior landscape requirements for the developable area pursuant to **Art. 7.C.3, Interior Landscaping**.

f. **Collocation with Existing Electric Power Plant**

Renewable Energy Wind Facilities located on a site with an existing Electric Power Plant shall be approved pursuant to the approval process indicated in the appropriate Use Matrix, and shall not be subject to a legislative Development Order Amendment, pursuant to **Art. 2.B.7.C, Development Order Amendment (DOA)**.

g. **Removal**

A Renewable Energy Wind project ("Project"), when deemed “abandoned,” shall be removed in accordance with the provisions of this Subsection g. For the purposes of this Section, the term Project shall also include individual wind turbines or MET towers located within a larger Renewable Energy Wind Facility. The Project shall be deemed “abandoned” when the Project is completely unable to generate electricity, whether through continued operation or repowering, and where the owner of the Project ("Project Owner") is not engaged in any effort to remedy the condition that gave rise to the complete inability to generate electricity, or if the project fails to generate electricity for a period of three years regardless of the efforts of the Project Owner. If a Project is deemed “abandoned,” the Project Owner shall commence removal of the Project. The arrangements regarding removal of the Project are to be set forth in contracts between the applicable landowners and the Project Owner, which such arrangements shall:

1) Require the removal of the turbine towers and foundations up to a depth of 36 inches below grade;

2) Establish a time frame up to 24 months, subject to adjustment due to **force majeure** events, to complete the removal; and,

3) Provide surety, in a form subject to approval of the County Attorney, for removal to the applicable landowner (as primary beneficiary) and to the County (as secondary beneficiary in the event the landowner fails to timely enforce its rights under the surety instrument). The amount of the surety shall be calculated by an independent, Florida certified professional engineer immediately prior to the date it is required to be provided, as set forth in this clause (3), and shall be equal to the cost of removing the Project. The surety amount shall be recalculated every five years thereafter. The surety, which shall be in the form of a single instrument, shall be provided to the applicable landowner and the County upon the earlier to occur of:

   (a) The date which is ten years prior to the end of the lease term between the applicable landowner and the Project Owner, as such term may be extended from time to time, or
   
   (b) The 90th day following the date the Project is deemed “abandoned.”
h. **MET Tower Approval Process Exceptions**

Permanent MET towers shall be considered a permitted accessory structure to a Renewable Energy Wind Facility.

1) **DRO Approval**

A temporary MET tower located on a parcel with an AP FLU designation and Zoning District, to be erected for a period of not more than three years, may be approved by the DRO.

2) **Permitted by Right**

A temporary MET tower located on a parcel with an AP FLU designation and Zoning District, to be erected for a period of not more than three years, where located one mile or more from a public R-O-W, or parcel of land with a conservation (when open to the public), commercial, public, civic, or residential FLU designation or use, may be Permitted by Right.

i. **Microwave Path Analysis**

At time of submittal for final DRO approval, a professionally prepared microwave path analysis shall be submitted for review and approval by FDO. Prior to final DRO approval, the site plan shall clearly depict any area(s) of the site that is required by that analysis to remain free and clear of encroachments in order to preclude interference with County microwave communication systems.

j. **Aircraft Hazard**

To ensure the safety of low flying aircraft, any application shall demonstrate compliance with 14 CFR § 77.9 and notification requirements to the Administrator of the FAA. In the event there are no applicable FAA requirements for safety markings of wind turbines or MET towers the following safety marking requirements shall be applied:

1) Paint will be applied to the top one-third of the MET tower in alternating bands of international orange and white.
2) Three orange guy wire marker spheres will be installed on each of the outer guy wires of the MET tower.
3) Ten-foot yellow florescent sleeves will be attached on either side of each marker sphere.
4) A low-intensity flashing red light will be mounted at the top of the MET tower.
5) Ten-foot yellow florescent sleeves will be attached to each guy wire at the anchor points of the MET tower.

k. **Color**

Towers, turbines, and blades shall be painted non-reflective white or grey, or other non-reflective unobtrusive color and shall be consistent with any information provided at time of DO approval. Change in color may be allowed subject to DRO approval, where required by regulatory agency permitting or other similar approvals. Signage, equipment, or project logo or labeling shall be prohibited on wind turbines, MET towers, or other similar wind energy systems.

10. **Solid Waste Transfer Station**

a. **Definition**

A facility where solid waste or yard waste from smaller vehicles is transferred into larger vehicles before being shipped or transported to a solid waste processing or disposal facility.

b. **Location**

The facility shall front on and have access from an Arterial or Collector Street.

c. **Setbacks**

All portions of a transfer station, including structures, ramps, parking and on-site circulation areas, shall be set back a minimum of 50 feet or the zoning district setback, whichever is greater, from all property lines, lakes, canals, water management tracts, retention/detention areas, drainage swales, and other water bodies.

d. **Buffer**

A minimum 50-foot-wide Incompatibility Buffer shall be provided adjacent to an existing residential FLU designation or use. Required landscaping not visible from adjacent lots or streets may be waived through a Type 1 Waiver.

e. **Storage Areas**

All solid waste stored outdoors shall be in leak-proof containers or located on a paved surface designed to capture all run-off. Run-off shall be treated in a manner that is in conformance with Local, State, and Federal regulations. Solid waste or yard waste may be sorted or temporarily stored but not processed at a Transfer Station.

f. **Operation Functions**

1) **Access**

A graphic and written analysis of access routes to the site.
2) **Type**
   An explanation of the type of facility requested including a description of the materials to be handled, methods of operation, handling procedures, whether sorting will occur, and runoff treatment plans.

3) **Waste**
   The quantity of waste to be received, expressed in cubic yards per day or tons per day.

4) **Hours of Operation**
   A statement specifying the hours of operation.

5) **SWA Permit**
   Prior to operation of the facility, the owner or operator shall obtain a SWA Permit.

### 11. Water or Wastewater Treatment Plant

a. **Definition**
   A facility designed for treatment and disposal of more than 5,000 gallons per day of water or wastewater.

b. **Location**
   In the AGR Zoning District, a Water or Wastewater Treatment Plant shall not be located west of SR 7/US 441.

c. **Sanitary Nuisances**
   Facilities shall be designed and operated to minimize objectionable odors. Potential sanitary nuisances shall be addressed by the PBC Health Department pursuant to [F.S. ch. 386, pt. I](#), as may be amended from time to time.

d. **Setbacks – Water or Wastewater Treatment Plant**
   For purposes of this Section, the AR Zoning District is not considered a residential zoning district. Required setbacks are as follows:
### Table 4.B.7.C – Wastewater Treatment Plant Setbacks

<table>
<thead>
<tr>
<th>Type/Capacity</th>
<th>Type of Plant</th>

<td>50 feet front; 15 feet side; 25 feet side street; and, 20 feet rear or the minimum district setback, whichever is greater</td>
<td>50 feet front; 15 feet side; 25 feet side street; and, 20 feet or the minimum district setback, whichever is greater</td>
</tr>
</tbody>
</table>

Notes:
1. Minimum lot dimensions shall be governed by the regulations above or the most recent standards adopted by the District and shall apply only to new schools. The District shall forward any changes in the standards to the Department within 20 days of School Board adoption. Minimum lot dimensions shall include, if applicable, sufficient room for any onsite retention.
2. Odor Control.
3. Tertiary filters do not require odor control.
4. If an existing utility site is being redeveloped into a water reclamation production facility or MBR, the setbacks established for the original use will be utilized for the water reclamation facility or MBR unless they are more restrictive than the setbacks noted in this Table. If the reclamation or MBR facility qualifies as a minor utility those regulations will apply instead of this Table.

### Table 4.B.7.C – Water Treatment Plant Setbacks for Open Treatment Process

<tr>
<td></td>
<td>Accessory units</td>
<td>100 feet</td>
</tr>
</tbody>
</table>

Notes:
1. Odor Control. Unless treatment for removal of sulfides for odor control is included.
2. Maximum building height. Buildings not including storage tanks and water towers higher than 35 feet are allowed provided the following setbacks are met:
   a. The minimum yard setback of this Section; and
   b. An additional one-foot setback for each one foot in height exceeding 35 feet.
**Table 4.B.7.C – Water Treatment Plant Setbacks for Enclosed Treatment Process without Gas Chlorine**

<td>100 feet</td>
</tr>
</tbody>
</table>

Notes:
1. Chemical storage setbacks may be reduced by fifty percent for facilities using enclosed treatment process without Chlorine gas, along property lines adjacent to parcels with a PO Zoning District and INST FLU designation, or AP Zoning District and FLU designations.

**e. Accessory Use**

A Water or Wastewater Treatment Plant may be collocated with a Public School installed in accordance with all applicable Federal, State, and Local utility standards.

1) **Location/Buffering**
   The facility shall be located and buffered to ensure compatibility with surrounding land use.

2) **Duration**
   The use of the facility shall only be permitted until such time as central water or wastewater service is available from the appropriate utility.

**f. Landscaping**

1) **Buffer**
   Perimeter landscape buffers shall have a minimum width of 25 feet or be equal to the setback requirements if less than 25 feet.

2) **Trees**
   A single row of trees shall be planted all landscape buffers at a ratio of one 14-foot-tall tree for each 25 linear feet.

3) **Screening**
   Screening consisting of a hedge, berm, or fence wall which will present a visual screen at least six feet in height within one year of installation shall be provided around the perimeter of the site.

**g. Package Treatment Facility**

Package water or wastewater treatment facilities shall comply with the following additional standards:

1) **Limited Service Area (LSA)**
   a) Package treatment facility shall be prohibited in the LSA except for use by schools or located in the United Technology Corporation Protection Overlay or the North County General Aviation Facility.
   b) If a package treatment facility is proposed to be developed in the LSA, confirmation shall be provided from the PBCHD that use of a package treatment plant is necessary to protect water quality. The PBCHD shall certify that the uses proposed can be adequately served with a package treatment plant.

2) **Rural Service Area (RSA)**
   If a package treatment facility is proposed to be developed in the RSA, there shall be demonstrated evidence that it is to be used to provide potable water or wastewater service to Bona Fide Agriculture uses, public recreational uses, public educational uses, or other uses when found to be consistent with the Plan by the Planning Director and upon approval of the Director of the PBCHD. The PBHD may impose conditions or restrictions necessary to protect public health and prevent the creation of a nuisance. All package plants in the RSA shall be operated and maintained by a public utility. Based on the standards of operator coverage in Chapter 62-699, F.A.C. and Chapter 62-602, F.A.C., the BCC, may require a higher level of operator coverage.
h. Effect on Previously Approved Plants
Water and Wastewater Treatment Plants approved prior to the effective date of this Code shall be considered conforming uses. Expansion or redevelopment of existing facilities or an existing utility site to the same or a different utility use or treatment technology may be allowed with setbacks less than those listed in this Section of the Code provided the expansion or redevelopment is reviewed and approved by the DRO and odor control is provided if applicable.

i. Biosolids Land Application
Class A or B biosolids, as defined by Chapter 62-640, F.A.C., may be applied to land in Bona Fide Agriculture operation in the AP, AGR, and AR Zoning Districts. Class AA biosolids, as defined by Chapter 62-640, F.A.C., has unlimited distribution pursuant to Chapter 62-640, F.A.C. Nothing herein shall preclude disposal of biosolids at a Landfill or at a Wastewater Treatment Plant in compliance with applicable Federal, State, and Local regulations nor effect any biosolid operation approved prior to the effective date of this Code.

1) AP and AGR Zoning Districts
A Class A or B biosolid shall be Permitted by Right on the site of a Bona Fide Agriculture operation in the AP and AGR Zoning Districts in compliance with FDEP standards in Chapter 62-640, F.A.C., as verified by the PBCHD. Following verification, the PBCHD shall be notified of the proposed first date of the land application no fewer than 30 days prior to land application.

2) AR Zoning District
Land application for a Class A or B biosolid shall be permitted in the AR Zoning District on the site of a Bona Fide Agriculture operation following approval by the DRO. An Applicant shall demonstrate compliance with FDEP standards except that the required separation from buildings and other property lines shall be as specified below. In the case of several adjacent properties which apply for a biosolid the properties may be combined for the purpose of measuring the required separation and the separation may be measured from the boundary of the most exterior property.

a) External Separation
There shall be a minimum separation of 500 feet from any off-site structure occupied on a daily or frequent basis by people. This distance shall be measured from the perimeter of the biosolid application area outward toward the structure.

b) Internal Separation
Internal to the site, there shall be a minimum 200-foot separation from the perimeter of the biosolid application area to the property line of the parcel.

c) Setbacks
These setbacks may be reduced or increased by the Director of the PBCHD.

**Supplementary Use Standards:**

- Refer to the numbers in the Supplementary Use Standards column.

---

B. General Transportation Standards for Aviation Related Uses

All Airports, Heliports, Landing Strips, and Seaplane Facilities not owned and operated by the State of Florida, PBC, or a hospital shall comply with the following standards:

1. Setbacks
   a. No structure or navigation aid shall be located within 50 feet of any property line.
   b. There shall be a 100-foot setback between the edge of the landing area, as defined by the FDOT, and the property line.

2. Structure Height
   A variance shall not be required for a structure to exceed the height limit for the zoning district in which the use is located, if the additional height is required by Federal law or Florida Statutes.

3. Hangars
   Storage buildings for aircraft shall be allowed as principal structures. Hangars accessory to an Agriculturally-Classified Use as established by State Statutes shall be located on parcels containing a minimum of 20 acres.

4. FAA and FDOT Requirements
   DRO and Class A Conditional Use approvals as related to FAA and FDOT requirements shall be in accordance with F.S. § 125.022(4), Development permits.

C. Definitions and Supplementary Use Standards for Specific Uses

1. Airport
   a. Definition
      Any facility designed to accommodate landing or take-off operations of aircraft.

2. Heliport or Vertiport
   a. Definition
      A facility designed to accommodate helicopter operations or other vertical takeoff and landing rotorcraft, including facilities and structures, needed for heliport business to function. [Ord. 2017-025]
   b. Accessory Use
      Except where otherwise allowed as a principal or collocated use, a Heliport limited to landing and takeoff of helicopters, tilt rotors or rotorcraft may be allowed as an accessory use, as follows:
      1) Accessory to an Agriculturally-Classified Use as established by State Statutes, in the AGR, AR, AP, and RE Zoning Districts, located on parcels containing a minimum of ten acres, shall be Permitted by Right.
      2) Accessory to Single Family in the AR, RE, and RM Zoning Districts, subject to Class A Conditional Use approval.
      3) Accessory to Residential subdivision, as a Neighborhood Recreation Facility, or within the Recreation or Civic Pod of a PDD or TDD, subject to Class A Conditional Use approval.
      4) Accessory to a Public Park as follows:
         a) Subject to Class A Conditional Use approval if located within 1,000 feet from a parcel of land with a residential use or FLU designation. A Heliport shall be Permitted by Right if located more than 1,000 feet from a parcel of land with a residential use or FLU designation. Measurement shall be made from the edge of the helipad to the property line of a parcel of land with a residential FLU designation or use; or
         b) Permitted by Right if limited to a helipad for emergency purposes.
      5) A helipad accessory to Data and Information Processing, and Research and Development subject to Class A Conditional Use approval.
      6) Accessory to Government Services or Government Facilities, subject to Class A Conditional Use approval. A Heliport shall be Permitted by Right if located more than 1,000 feet from a parcel of land with a residential FLU designation or use. Measurement shall be made from the edge of the helipad to the property line of a parcel of land with a residential FLU designation or use.
      7) Accessory to a Hospital may be Permitted by Right.

3. Landing Strip
   a. Definitions
      A ground facility designed to accommodate landing and take-off operations of aircraft, including facilities or structures, needed for landing strip functions.
b. **Accessory Uses**
   Except where otherwise allowed as a principal or collocated use, a Landing Strip may be allowed as an accessory use, as follows:
   1) Accessory to an Agriculturally-Classified Use as established by State Statutes, in the AGR, AP, and AR/RSA Zoning Districts, located on parcels containing a minimum of 20 acres, shall be Permitted by Right.
   2) Accessory to Residential subdivision, as a Neighborhood Recreation Facility, or within the Recreation or Civic Pod of a PDD or TDD, subject to Class A Conditional Use approval.
   3) Accessory to Government Services or Government Facilities, subject to Class A Conditional Use approval.

4. **Seaplane Facility**
   a. **Definitions**
      A facility, on land or water, designed to accommodate the landing and takeoff of seaplanes, water taxiing, anchoring, ramp service, and onshore facilities.
   b. **Separation Distance – Residential Zoning District**
      1) If the Seaplane Facility use is limited to the adjacent Property Owners who jointly own and maintain the aircraft facility, it may be located in a residential zoning district provided the facility is not commercial or within 400 feet of a residential use.
      2) If the facility is a commercial venture, it shall not be located within 1,000 feet of a parcel of land with a residential FLU designation or use.
   c. **Minimum Land Area**
      The minimum required land area for any type of seaplane operation shall be two acres.
   d. **Water Area**
      All seaplane operations shall comply with the following minimum standards for water landing area:

      | Table 4.8.3.C – Seaplane Landing Area Standards |
      |-----------------------------------------------|
      | Length        | 3,500 feet |
      | Width         | 300 feet   |
      | Depth         | 4 feet     |

   e. **Airport Approach**
      No seaplane operation shall be considered unless the airport approach to the water landing area is at a slope of 40-to-one or flatter for a distance of at least two miles from both ends of the water landing area and is clear of any building structure or portion thereof that extends through and above the airport approach plane.
   f. **Setbacks**
      All buildings, structures, and aircraft parked on shore shall be located a minimum distance from all property lines of at least 50 feet.
   g. **Landing Operations**
      All aircraft landings shall be performed under Visual Flying Rules (VFR) and shall not be conducted during the hours between sunset and sunrise.
   h. **Parking**
      Shore facilities shall provide one automobile parking space for each 2,000 square feet of hangar or tie-down area, or one space per craft, whichever is greater. All shore facilities shall provide a minimum of five parking spaces.

5. **Transportation Facility**
   a. **Definition**
      An establishment used as a transfer point for the loading and unloading of passengers from one mode of transportation to another, excluding airports, aviation related uses, and bus stops and alighting areas as outlined within **Art. 5.H, Mass Transit Standards**.
   b. **Typical Uses**
      A Transportation Facility use may include, but not be limited to: bus stations, ferryboat or cruise ship terminals, and commuter railroad stations.
c. Approval Process
   1) UC, UI, and PO Zoning Districts
      a) A Transportation Facility in the UC and UI Zoning Districts that is subject to Class A Conditional Use approval may be approved by the DRO if located 200 feet or more from a parcel of land with a residential FLU designation or use.
      b) A Transportation Facility in the PO Zoning District that is subject to Class A Conditional Use approval shall be Permitted by Right if located 200 feet or more from a parcel of land with a residential FLU designation or use.
   2) All Other Zoning Districts
      A Transportation Facility in all other zoning districts subject to Class A Conditional Use approval may be approved by the DRO if located 500 feet or more from a parcel of land with a residential FLU designation or use.

d. Location
   Bus or railroad stations shall have frontage on and access from a Collector or Arterial Street, unless located within a PDD or TDD.

e. Separation from Residential
   A Transportation Facility located within 200 feet from a parcel of land with a residential FLU designation or use shall be subject to the following:
   1) Building openings used by vehicles and unglazed architectural openings shall not face residential; and
   2) A Type 3 Incompatibility Buffer shall be required.

f. Vehicular and Pedestrian Circulation Areas
   The site design shall address the following:
   1) Vehicle idling and queuing spaces do not encumber on-site circulation traffic or present a safety hazard for vehicles or pedestrians.
   2) Designated passenger drop off/pick up areas.
   3) A minimum six-foot-wide sidewalk in front of or adjacent to the drop-off spaces and connected to the building entrance.
   4) On-site vehicular circulation paved areas shall be set back a minimum 100 feet if adjacent to a parcel of land with a residential FLU designation or use.

- **D** Subject to DRO Approval
- **A** Subject to BCC Approval (Class A Conditional Use)
- **B** Subject to Zoning Commission Approval (Class B Conditional Use)
- **X** Prohibited Use, unless stated otherwise within Supplementary Use Standards

**Notes:**

1. Supplementary Use Standards for each use must be reviewed regardless of the approval process set forth in the Use Matrix. Refer to the numbers in the Supplementary Use Standards column.
B. General Standards
Commercial Communication Towers include provisions for any tower, pole, or structure that supports a device whose principal use is to facilitate transmissions for AM/FM radio, television, microwave; cellular, personal wireless services, or related forms of electronic communications. The regulations include provisions for Stealth, Camouflage, Monopole, Self-Support/Lattice, and Guyed Towers.

Table 4.B.9.B – Typical Examples of Commercial Communication Towers

<table>
<thead>
<tr>
<th>Camouflage</th>
<th>Stealth</th>
<th>Monopole</th>
<th>Self-Support/Lattice</th>
<th>Guyed</th>
</tr>
</thead>
</table>

1. Collocated Tower and Accessory Structures
Communication towers may be permitted on a lot with another principal use as provided herein unless stated otherwise.
   a. Owned Parcel
      Communication towers may be located on lots containing another principal use, including another communication tower.
   b. Leased Parcel
      Towers may occupy a leased parcel on a lot that meets the minimum lot size requirement of the zoning district in which it is located. PBC may require execution of a unity of control, or other documentation as determined appropriate by the County Attorney, for leased parcels that do not meet the minimum lot size requirement for the zoning district in which they are located.
   c. Accessory Structures
      Any structure accessory to communication towers, other than peripheral supports and guy anchors, shall conform to the setback requirements for the zoning district in which it is located.

2. Separation and Setbacks
   Separation between communication towers and other uses on the lot may be required to ensure compatibility. Separation or setbacks for all towers shall be established, as provided in Table 4.B.9.B, Minimum Separation and Setbacks for Towers Located in Residential Zoning Districts, and Table 4.B.9.B, Minimum Separation and Setbacks for Towers Located in Non-Residential Zoning Districts, unless stated otherwise herein.

### c. Conforming Use or Structure
Construction of any lawful residential or non-residential structure within the required separation distance shall not create a nonconforming use or structure when an existing communication tower is established pursuant to the provisions in Art. 4.B.9.B.2, Separation and Setbacks.

### 3. Measurement of Separation and Setback from Residential Uses

#### a. Existing Residential Use
Separations from existing residential structures shall be measured from the wall of the closest principal residential structure to the base of the tower.
b. **Vacant Residential Parcel**

Setbacks from vacant residential parcels shall be measured from adjacent property lines to the base of the tower.

[Ord. 2017-016]

a. Measurement of Distance between Towers

The distance between an existing and a proposed tower shall be measured at grade in a direct lineal fashion between the closest points of the base of the existing and the base of proposed towers.
Separations between towers located in different zoning districts shall be measured as follows:

1) **Residential and Residential**
   The greater of the distance between towers requirements shall apply between residentially zoned parcels.

2) **Residential and Non-Residential**
   The greater of the distance between towers requirements shall apply between residentially and non-residentially zoned parcels.

3) **Non-Residential and Non-Residential**
   The lesser of the distance between towers requirements shall apply between non-residentially zoned parcels.

4) **Certification of Distance**
   The distance between towers shall be certified by a professional engineer or a professional surveyor and mapper, each of whom shall be licensed by the State of Florida.

5. **Tower Height**
   All antennas and other attachments shall be included in the height measurement of the tower structure, and shall not extend beyond its maximum permitted height. Lightning rods and whip antennas, less than six inches in diameter, shall be excluded from this requirement.

6. **Parking**
   Communication towers shall be exempt from the parking requirements of Art. 6, Parking, Loading, and Circulation, unless otherwise required by the Zoning Director.

7. **Perimeter Buffering**
   a. **Fence or Wall**
      A fence or wall, a minimum of eight feet in height measured from finished grade, shall be constructed around the base of each communication tower and accessory equipment structure, and around each guy anchor. Access to the communication tower shall be through a locked gate.

   b. **Landscaping**
      The landscape and buffer standards provided below shall be required around the perimeter of the tower, accessory structures, and guy anchors, unless waived as provided herein. These standards may be waived by the Zoning Director, unless otherwise required by the BCC or ZC when the proposed landscaping would not be visible from adjacent lots or streets.

      1) **Installation**
         Landscaping shall be installed along the exterior side of any required fences, unless the Zoning Director determines that the viability, survivability, or utility of the plant material is enhanced when located along the interior side of the fence or wall.

      2) **Leased Parcels**
         Landscaping shall be maintained pursuant to Art. 7, Landscaping. The Applicant shall execute a perpetual maintenance agreement with the Property Owner to ensure the maintenance of the landscape buffer if the buffer is installed outside of the leased parcel footprint.
3) Adjacent to Residential FLU Designation, Zoning District, or Use
   a) Towers Less than 50 feet from Existing Residential
      A Type 3 Incompatibility Buffer without a wall shall be installed between towers and
      adjacent lots with existing residential uses or FLU designations, pursuant to Art. 7.C.2.C,
      Incompatibility Buffer.
   b) Towers More than 50 feet from Existing Residential
      A Type 1 Incompatibility Buffer shall be installed between towers and adjacent lots with
      existing residential uses, residential zoning, or residential FLU designations, pursuant to

4) Adjacent to Non-Residential Uses or Zoning Districts
   Towers shall comply with the standards for landscape buffers between compatible uses of Art.

c. Accessory Equipment and Structures
   All accessory equipment and structures shall be located within the required perimeter buffering.

8. Signage
   a. Signs and Advertising
      The placement on a Monopole, Self-Support/Lattice, or Guyed Tower, of any signs, flags, or
      appurtenances for advertising purposes, including company name, shall be prohibited. Signs or
      advertising may be permitted when in conjunction with a Stealth Tower when that structure is an
      integral element of a principal building or structure.

9. Generators
   All permanently installed generators used on site shall use propane fuel. However, generators 125
   kilowatts or greater may utilize diesel fuel.

10. Lighting
    The least intensive nighttime method of illumination acceptable to the FAA shall be utilized. To the
    extent possible, strobe lighting or similar types of lighting shall not be utilized. All required lighting shall
    be maintained on an as needed basis by the owner of the tower.

11. Interference
    a. As provided by the FCC, towers shall not interfere with the normal operation of electrical or
       mechanical equipment located within surrounding properties.
    b. Towers or guy wires shall not impede the aerial mosquito control activities performed by PBC, as
determined by the BCC, for the health, safety, and welfare of its residents.

12. Building Permits
    In addition to the approval processes required in Table 4.B.9.A, Commercial Communication Towers
    Matrix, a Building Permit shall be required for all towers, support and accessory structures, and antenna
    attachments, except as otherwise provided by Federal, State of Florida, or Local law.
    a. Accessory Structures
       Building Permits shall be required for all accessory structures related to an antenna.
    b. Windload Standards
       All antennas and other tower attachments shall meet the required windload standards pursuant to
       Building Division review. Documentation indicating compliance with the windload standards shall
       be certified by a professional engineer, licensed in the State of Florida, and submitted to the
       Building Division at the time of Building Permit application.
    c. Airport Regulations
       Prior to the issuance of a Building Permit for a tower, proof of compliance with applicable
requirements of Art. 16, Airport Regulations of the Code, shall be provided in a manner acceptable
to the Zoning Director.

13. Providers
    All communication towers, shall be constructed to accommodate a minimum number of providers as
    follows:
### Table 4.B.9.B – Providers by Tower Type

<table>
<thead>
<tr>
<th>Tower Types (1)</th>
<th>Minimum Number of Providers</th>
</tr>
</thead>
<tbody>
<tr>
<td>Stealth</td>
<td>Two Providers (2)</td>
</tr>
<tr>
<td>Camouflage</td>
<td>One Provider for a maximum 100-foot height tower</td>
</tr>
<tr>
<td></td>
<td>Two Providers for a maximum 125-foot height tower</td>
</tr>
<tr>
<td></td>
<td>Three Providers for a maximum 150-foot height tower</td>
</tr>
<tr>
<td>Monopole, Self-Support/Lattice, and Guyed</td>
<td>Two Providers</td>
</tr>
</tbody>
</table>

**Notes:**
1. Prior to the issuance of a Building Permit for a structure with two or more providers, the Applicant shall provide proof of shared use/collocation in a form acceptable to the County Attorney and Zoning Director.
2. An Applicant may not be required to accommodate the additional providers in the event the shared use/collocation review procedures indicate no other service provider wishes to collocate on the structure.

### 14. Antenna

Antennas attached to towers shall be subject to the standards contained in [Art. 4.B.9, Commercial Communication Towers](#). Standards for antennas attached to other type of structure are addressed in [Art. 5, Supplementary Standards](#).

### 15. Inspections

All towers shall be inspected in compliance as required by the Building Division.

### 16. Violation of Standards

The Property Owners, as well as the tower owners, shall be responsible for violations of applicable standards.

### C. Definitions and Supplementary Tower Standards

#### 1. Stealth Tower

**a. Definition**

A structure, which is not readily identifiable as a tower and is compatible with existing or proposed uses on site. The structure may or may not have a secondary function.

**b. Typical Structures**

Typical structures include but are not limited to bell tower, steeple, flagpole, cross, or water tank where antennas are typically concealed.

**c. Approval Process – AGR, AR, and RE Zoning Districts**

In the AGR, AR/RSA, AR/USA, and RE Zoning Districts, Stealth Towers 100 feet in height or less may be approved through DRO Agency Review process when the parcel has an existing DRO approved Site Plan. Approval shall be subject to the Administrative Modification standards contained in [Art. 2, Application Processes and Procedures](#).

**d. Approval Process – Commercial and Civic Pod of PUD**

In the Commercial Pod and Civic Pod of a PUD, Stealth Towers 60 feet in height or less may be approved by the DRO.

**e. Location – Recreation Pod of PUD**

Stealth Towers may be permitted in the Recreation Pod of a PUD only when located on a Golf Course subject to Class A Conditional Use approval.

**f. Lot Size – MUPD**

A Stealth Tower may be located in MUPD with CH and CL FLU designation with a minimum of five acres, provided the tower complies with all applicable regulations.

**g. Criteria**

Stealth structures shall comply with the following criteria:

1) The structure shall be compatible with the architectural style of the existing buildings/structures on site and with the character of the surrounding area. A determination of architectural compatibility shall include, but not be limited to, color, type of building material, and architectural style;

2) The structure shall be consistent with the character of existing uses on site;

3) Communications equipment or devices shall not be readily identifiable;

4) The structure shall be related to and integrated into the existing natural and/or man-made environment to the greatest extent possible; and,

5) The maximum height of the structure shall not exceed 200 feet.
h. Associated Uses in RT, RS, and RM Zoning Districts and Commercial or Civic Pod of a PUD
Stealth Towers shall be permitted only in association with the following uses: Assembly Institutional Nonprofit; Place of Worship; College or University; Electric Power Plant, excluding electrical transmission line streets as provided herein; Government Services; Passive Park; Public Park; Golf Course; Schools; Solid Waste Transfer Station; Minor Utility; Electric Distribution Substations; or Water or Wastewater Treatment Plant; commercial, office or industrial development.

i. Flagpoles

j. Public Parks Five Acres or Greater
The minimum separation between any existing residential structure, and Stealth Towers located in public parks five acres or greater shall be 125 percent of tower height. In addition, the tower shall be set back a distance of at least 75 percent of tower height from any property line adjacent to an existing residential use or vacant residential parcel or 20 percent of the tower height from any adjacent non-residential zoning district or public R-O-W.

2. Camouflage Tower
   a. Definition
   A tower or structure, which is incorporated into and is compatible with existing or proposed uses on site and the structure has an additional function other than antenna support.

   b. Typical Structures
   Examples include but are not limited to antenna incorporated into site lighting at a park or incorporated into an electrical distribution center.

   c. Location – Recreation Pod of PUD
   Camouflage Towers may be permitted in the Recreation Pod of a PUD only when located on a Golf Course subject to Class A Conditional Use approval.

   d. Approval Process – Commercial and Civic Pod of PUD
